REVIEWS

Toll-like receptor polymorphisms and susceptibility to human disease

E. A. Misch and T. R. Hawn

347–360

Published on the Internet 1 February 2008, doi:10.1042/CS20070214

Vascular effects of adiponectin: molecular mechanisms and potential therapeutic intervention

W. Zhu, K. K. Y. Cheng, P. M. Vanhoutte, K. S. L. Lam and A. Xu

361–374

Published on the Internet 1 February 2008, doi:10.1042/CS20070347

PAPERS

Circulating renin–angiotensin system and catecholamines in childhood: is there a role for birthweight?

M. C. P. Franco, D. E. Casarini, M. S. Carneiro-Ramos, A. L. Sawaya, M. L. M. Barreto-Chaves and R. Sesso

375–380

Published as Immediate Publication 22 October 2007, doi:10.1042/CS20070284

Protein restriction during gestation and/or lactation causes adverse transgenerational effects on biometry and glucose metabolism in F1 and F2 progenies of rats

A. R. Pinheiro, I. D. M. Salvucci, M. B. Aguila and C. A. Mandarim-de-Lacerda

381–392

Published as Immediate Publication 11 October 2007, doi:10.1042/CS20070302

Parabolic relationship between plasma triacylglycerols and LDL-cholesterol in familial combined hyperlipidaemia: the multiple-type hyperlipidaemia explained?

M. C. G. J. Brouwers, J. de Graaf, M. M. J. van Greevenbroek, A. M. Georgieva, C. J. H. van der Kallen,

E. ter Avest, C. D. A. Stehouwer, A. F. Stalenhoef and T. W. A. de Bruin

393–401

Published as Immediate Publication 22 October 2007, doi:10.1042/CS20070314
