### Introduction

The Cape Canaveral Archeological Mitigation Project (CCAMP) is the utilization of archeological tools and skills to record the Site number 8BR2352, the Burnham family cemetery is one of the eight cemeteries at the Cape Canaveral Air Force Station. It is located west of Samuel C. Phillips Highway and is adjacent to the Banana river (Penders 2015:23). This site is part of a multi-component site that includes a native American burial mound and the Wilson Brothers cemetery. The Cemetery was used by the Burnham family, including Mills O. Burnham, the first permanent lighthouse keeper, first permanent Anglo-settler in Cape Canaveral and one of the first to establish citrus groves in the area. The Purpose of this project is to survey and record as much of the site as possible. This site and many others are in danger of unpredictable weather patterns, specialize flooding and inundation.

The Cemetery itself is surrounded by a Chain linked fence, measuring 44 m x 15 m. The wall facing southwest is 11.6 meters, making the cemetery slightly smaller on one side. It also not all even in all of the sides since the elevation is not the same throughout the site. Inside the cemetery, there are different types of flora ranging from palmettos and a giant oak tree. A white concrete enclosure is located at the north east side of the cemetery, and it contains two of graves of the cemetery.

### History of the Cemetery

This part of the site was established approximately in the year 1866, and it belonged to the Burnham family, the Burns family, and since 1949 to the present time, the United States Air Force holds ownership to the cemetery. While the reason is not known, the cemetery stopped being used, or the graves ceased, by the year 1924. The burials range from the years of 1866 to

the latest being 1924. The cemetery has stayed the same since the years it was established with no expansions added to the site. the cemetery has historical significance to Cape Canaveral. The main occupants of the cemetery were the Burnham family. Many the generations the family are buried at this site, including Mills O. Burnham, the first Anglo-settler and homesteader, and the first permanent lighthouse keeper in Cape Canaveral.

The Burnham cemetery has undergone some repairs, specifically to the headstones and the concrete enclosure. Some of the graves were marked by wooden crosses, which can rot at an accelerated time because of the wet and humid Florida weather, the graves of Henrietta W. Wilson, Mary A. Burnham, and Mills O. Burnham were given new headstones made out of marble in 2016. In October of 2016, Category 3 hurricane Matthew hit the eastern coast of Florida, causing damage to the concrete enclosure of the cemetery. Later the same year, the enclosure was repaired.

The site does meet the requirements to be eligible for the NRHP for all of the criteria. It is associated with events that have made a significant contribution to our history, which is criterion A. Mills O. Burnham was the first permanent Anglo-settler and first to stablish citrus groves, and the site is also his final resting place, this meets criterion B. The cemetery represents traditional cultural values, criterion C, and it has potential to add additional information about the history of Brevard County, which meets criterion D (National Park Service 2002).

#### Description

As stated previously, the cemetery was utilized by the Burnham and Burns family, and some members of the Wilson family are buried at the site, too. These qualities fit the description for a family type cemetery. The definition for a family cemetery is “a small, private burial place

for members of an immediate or extended family; typically found in rural areas and near a residence. It is considered different than a family plot, which is an area reserved for family members within a larger cemetery.” (Florida master site 2011:15). The current status of the cemetery is that is not being used, and the last grave to be buried was in the year 1924.

There are a total of nine graves in the cemetery, eight of them are traditional marked with a headstone, three of the graves just mentioned also have a footstone or a brick surrounding, and one grave that is unmarked. During the survey and mapping process, there were no signs of unmarked graves besides the one that has an untraditional grave marker with no inscription.

The fence enclosing the cemetery is a 3.50 m tall wire fence, and dimensions of the cemetery are not completely even. The west side of the fence is 44.7 m, the side facing the north east measures 15.3 m, the wall facing south east measures 43.5 m, and the side facing south west is approximately 11.6 m. The different lengths of the fence side is probably due to the change in elevation in the cemetery, or another possibility might be that the south west point of the cemetery does not contain many features or graves.

By the year 1950, the U.S. government purchased all of the privately owned land in cape Canaveral. The Air Force gained the control of the of the lighthouse site and the cemetery sites but demolished most of the building to make way for the development of its launch facilities (Boyton 2015:30). Since the cemeteries are located inside the Air Force Base, there is a required safety clearing to access the Burnham cemetery and the rest of the sites that are located inside of the base.

As stated before, the Burnham cemetery is part of multi-component site that includes the Burns mound (8BR85) and the Wilson Brothers cemetery (8BR2353). The Burns mound site is a

burial mound located adjacent to the Burnham cemetery, and it has a historical component that includes dumps, scattered Domestic refuse, the ruins of a firebox feature and ornamental plantings (Penders 2015:22). There have been some issues with the site, for example it was initially excavated in 1869 and revisited several times after that. The mound has been used for fill and has received damage from a heavy machinery operator, and it has not been fully excavated, so there is no way to know what part of the mound is original or back filled (Penders 2015: 22). Today, there is a chain linked fence that encloses the mound with two reparation mounds.

The Wilson Brothers cemetery was originally a part of the mound site, and there are only two known graves inside the chain linked fence cemetery. There is also a memorial marker dedicated to Alfred B. Wilson from the Chief Petty Officers Association of the Naval Ordnance.

#### Grave Marker Descriptions

From the nine total graves in the cemetery, there are eight that have headstones and a couple that also have a footstone and/or a border around the grave. The graves are separated into different clusters and the headstones are diversified but have some similarities. The following list are of all the graves recorded at the Burnham cemetery during the survey and mapping phase:

Grave #1: Thomas Thompson

Grave number one is the grave of Thomas Thomson. The grave is within a masonry enclosure that is inside the cemetery, this concrete fencing measuring 4.6 m x 4.5 m. during the mapping process, this enclosure was used as datum point. Grave number one and number two are in this enclosure. The grave has a concrete bordering that measures 1.8 m in length and .80 m wide. The Headstone is a military issued headstone, with a semicircular arch to it, and it is

made out of marble. The headstone's dimensions are 54 cm high, 36 cm wide, and 14 cm in thickness. The epitaph on the graves reads:

*Thomas Thompson  
Maryland  
1<sup>st</sup> SGT 4 U.S. CAV  
January 13, 1922*

The condition of the inscription is sharp, tooling is evident and it's in good condition. Coping.../ there is no visible markers mark on the headstone or any grave good around the grave.

Grave #2: Henrietta W. Wilson

Grave number two is the grave of Henrietta W. Wilson, granddaughter to Mills and Mary Burnham, Daughter to Henry and Frances Wilson, wife to Thomas Thompson (who was her second husband), which is why they are grouped together in the concrete enclosure. This grave also has a brick border around it, and it measures 2.10 m in length and its .80 m wide. The headstone is made out of granite and it is a plaque marker, and its dimensions are 23 cm in length, 44 cm wide, and 12 cm thick. This headstone is one of the newer headstones that were put in place in 2016. The epitaph reads:

*Henrietta W. Wilson  
Mar 21, 1855-Jan 18, 1929*

The Headstone is in great condition, and the inscription is as well. There is no visible markers mark and there are no grave goods around the grave.

Grave #3: Harold W. Butler

Grave number three is the grave of Harold W. Butler. This grave is no part of a grave cluster, and is a noticeably small grave, this being because is the grave of an infant. Harold W. Butler was the son of the lighthouse assistant (Boyton 2015). The grave is 80 cm in length, and

40 cm wide; the headstone is die in base headstone and made out of marble, with the dimension of 50 cm high, 28 cm wide, and it is 10 cm thick. this is one of the graves that has a footstone, with the dimensions of 22 cm high, 16 cm wide, and 10 cm in thickness. the epitaph reads:

*Harold W.  
Butler  
Born  
June 8, 1914  
Died  
Aug 13, 1914  
Gone But not Forgotten*

The Headstone is in good shape, but it is a bit weathered and has a couple of cracks and missing chunks. The Inscription is in good condition and the tooling is evident. There are no visible makers mark or any grave goods.

Grave #4: Mary A. Burnham

Grave four belongs to Mary A. Burnham, wife to Mills O. Burnham. The grave is located of the western part of the cemetery, and it is grouped with three other graves. the grave length and width cannot be determined from the surface since there is an absence of a footstone or another indicator to tell how big the grave is. The headstone is plaque marker made out of granite, with dimensions of 24 cm in length, 44 cm wide, and 12 cm thick. The epitaph reads:

*Mary A. Burnham  
Aug 17, 1819-Jan 25, 1888*

The headstone is one of the newer headstones as well, so it is in great condition. The inscription condition is sharp, and tooling is evident. There was no visible makers mark or any grave goods around the marker.

Grave #5: Mills O. Burnham

Grave number 5 belongs to Mills O. Burnham, first permanent light house keeper, first Anglo-settler in Cape Canaveral, and one of the first to plant citrus groves in Cape Canaveral. His grave is located on the Western side of the cemetery, and it is grouped with three other graves, with the one of Mary A. Burnham, Mills Burnham's wife, to its right. The grave has its own individual fencing made out of brick, measuring 2.4 m in length and 1.1 m wide. It also has a 1.1 m high head board like structure also made out of brick right behind the headstone. The Headstone itself is a plaque marker and its dimensions are 24 cm in length, 44 cm wide, and 12 cm thick. The grave also has a brick footstone measuring 30 cm in length, the top brick 27 cm wide, and the base measuring 75 cm wide. The epitaph reads

*Mills O. Burnham  
Sept 18, 1817- Apr 17, 1888*

This headstone is also one of the newer headstones, so it is in good condition. The inscription located on top of the marker is sharp, and tooling is evident, and it is in good condition. There are no visible signs of a maker's mark or any grave goods around the grave.

Grave #6: Henry Wilson

Grave number six belongs to Henry Wilson. The grave is located on the west side of the enclosure, and it is grouped with grave numbers 4, 5, and 7. the grave does not have a footstone or another indicator to know the dimensions of the grave from the surface. The Headstone is Military issued marker, made out of granite, and the dimensions of the headstone are 62 cm in length, 36 cm wide, and 13 cm thick. The epitaph reads:

*Henry Wilson  
New York  
PVT 2 U.S. ARTY  
Mexican War  
April 14, 1917*

The headstone is in good condition...the inscription is sharp and tooling is evident, and the technique used on the inscription is carving. There is no visible markers mark and there are no greave goods around the grave or marker.

Grave #7: Frances A. Wilson

Grave number seven belongs to Frances A. Wilson. This grave is located on the west side of the cemetery, and is grouped with graves 4, 5, and 6. Frances Wilson was wife to Henry Wilson, and the eldest daughter of Mill and Mary Burnham. The grave does not have a footstone or another indicator to know the exact dimensions of the grave from the surface. The headstone is a die on base, made out of granite, and the dimensions are 47 cm in length, 44 cm wide, and 19 cm thick. The epitaph reads:

*In Memory Of  
Frances A.  
Wilson  
1838- 1924*

The inscription on the headstone is located on the font of the marker, the inscription is sharp and tooling is evident, and the technique used for the inscription was carved onto the headstone. There is no visible markers mark and there are no grave goods around the grave or marker.

Grave #8: Elliot J. Burns

The last of the marked graves is grave number nine and it belongs to Elliot J. Burns. Elliot Burns was the person who purchased the home of Mills and Mary Burnham (Boyton 2015:34). The grave does not have a footstone or another indicator to know the dimensions of the grave from the surface. The headstone is unique in that no other headstone in the cemetery is like it, and is made out of a gray stone. The marker is a little sunken on its right side. The dimension of the headstone 44 cm in length, 44 cm wide, and 22 cm thick at the base and 10 cm thick at the top. The epitaph reads:

*In Memoriam  
Elliot J. Burns  
Born May .7. 1954  
Died Dec .28. 1996  
I am the resurrection and the life*

The inscription is located in the front of the marker, and it is sharp and tooling is evident. The bottom of the inscription is clear, but slightly worn, and the technique that was used to get the inscription on the marker was carving. There are no visible maker's marks or any grave good around the marker or grave.

Grave #9: unmarked grave

The last grave in the cemetery is a grave without a marker. The grave is marked by small shrub that is within a white fence that is 1.0 m long and .55 m wide. The grave does not have any grave goods around it.

#### *Research and Methods Used*

For this site, I began with some background research on how to properly document a historical cemetery. First, I looked at already done research and forms to make a plan on how to do it and to get everything that is required, such as looking for the right forms and how to fill them out, which method of recording would be best for this type of site, and how to not disturb and conserve the archaeological record. Then, after getting an idea of what I was going to do, I went to the site to properly map and record the cemetery. With a measuring tape, the surrounding fence, the graves, the headstones, and all of the spaces between each of them were measured. The datum point chosen was the concrete enclosure where the Thompson family were buried. From that point, the location from each feature, such as trees and graves, were mapped and recorded.

The next step was recording the individual graves. all of the graves in the cemetery, marked and unmarked, had to be measured and recorded in different forms. The following details were recorded for the markers: the dimensions, the inscription condition, the epitaph, the condition of the marker, coping, material the marker was made of, grave goods and makers mark. After the survey and mapping, there were multiple forms to fill out, including the individual grave forms, cemetery assessment form, and cemetery family/grouping map.

#### Threats, conservation, and Conclusion

The Burnham cemetery and other sites in the cape Canaveral area in danger of being lost forever. This is due to the location of where these sites are located that make them susceptible to flooding and inundation. One of the sites in the cape that was also worked on for the CCAMP, the old lighthouse site is facing inundation due to its beach side location. The Burns site, which includes the Burns mound, the Burnham cemetery, and the Wilson cemetery are also in danger of inundation due to its close location to the Banana river.

Some of the ways the Cape Canaveral Archaeological Mitigation Project is doing to conserve the sites in Cape Canaveral is to figure out where the site boundaries are, survey, record, and map. An example of conservation done at the Burnham cemetery would be the replacement of grave markers. Three of the graves were marked by crosses made out of wood, making them highly susceptible to rot and erosion from Florida's humid weather. The crosses were replaced by granite markers to sustain the humidity. The Burnham cemetery has also been recorded and mapped, from the fencing to its gravestones, and any reparations that have been one to it.

**DESCRIPTION**

The cemetery is enclosed by a cham link fence that is slightly uneven of each side. Inside, there are nine graves, eight of them are marked, and the last one is unmarked. The cemetery is in pretty good shape, it has been maintained, and there are signs of repairs. Two of the graves (grave 1 & 2) are enclosed in a ~~low~~ concrete fence that is partially broken on the north east wall.

**MARKER/TOMB DESCRIPTION**

Type of Marker/Tomb:  Tombstone, Single  Tombstone, Double  Tab in Socket  Die on Base  
 Military  Obelisk  Column  Pulpit Marker  Die, Base & Cap  Plaque Marker  Pedestal  
 Ledger  Box Tomb  Table Tomb  Flush/Lawn Style  Bedstead/Cradle Grave  Raised Top  
 Rounded Raised Top  Pillow  Tree Stump  Diamond Die  Urn  Cross  Tent Grave  
 Stacked Stone  Grave Shelter  Cenotaph  Funeral Home Plaque  Marked with objects or plants  
(no headstone on grave)  Other: \_\_\_\_\_  
Marker/Tomb Design:  Plain  Bible  Clasp hands  Cross & Crown  Cross  Lamb  
 Dove  Flowers  Willows and Urn  Torch  Finger Pointing  Hand Drawn  Masonic  
 Relief Decoration  Other Fraternal Order: \_\_\_\_\_ Inclusions: \_\_\_\_\_  
 Other: \_\_\_\_\_  
Marker Arch/Shape Forms:  Basket Arch  Segmental Arch  Semicircular Arch  Discoid  
 Double Arch  Rectangular  Pointed Arch  Pointed Arch with Caps  Scotia Haunch  Cyma Recta  
 Cyma Reversa  Caps  Tympanum  
Marker/Tomb Material:  Marble  Granite  Limestone  Sandstone  Slate  Fieldstone  
 Soapstone  Native Stone (coquina)  Zinc  Cast Iron  Wrought Iron  Aluminum  Bronze  
 Wood  Brick  Concrete/Cement  Limewash  Cement Wash  Stucco  Other: \_\_\_\_\_  
Condition of Marker:  Good  Broken  Cracked  Weathered  Vandalized  Loose  
 Repaired  Failed Repair  Leaning/Tilting  Unattached  Stained  Portions Missing  
 Sunken  Corrosion  Stained  Biological Growth  Disassembled  Erosion  
 Exposed Foundation  Mower Abrasions  Flaking  
Size of Marker (cm): Height: 23 cm Width: 44 cm Thickness: 12 cm

**STONECUTTER'S INFORMATION**

Name Present:  Yes  No  
Stonecutter's Name: \_\_\_\_\_ City: \_\_\_\_\_ Location of Mark: \_\_\_\_\_

### INSCRIPTION

Inscription Condition:  None  Sharp, Tooling Evident  Clear, But Worn  Partially Legible  
Illegible

Inscription Location:  Top  Front  Rear  Sides  NA

Inscription Technique:  Carved  Painted  Hand Lettered  Other: \_\_\_\_\_

Inscription: Henrietta W. Wilson / May 21, 1855 - Jan 18, 1929

### FOOTSTONE

Footstone:  Yes  No

Footstone Material:  Marble  Granite  Limestone  Sandstone  Slate  Fieldstone  
 Soapstone  Native Stone (coquina)  Zinc  Cast Iron  Wrought Iron  Aluminum  Bronze  
 Wood  Brick  Concrete/Cement  Limewash  Cement Wash  Stucco  Other: \_\_\_\_\_

Footstone Design: \_\_\_\_\_

### COPING

Coping:  Yes  No

Coping Material:  Marble  Granite  Limestone  Sandstone  Slate  Fieldstone  
 Soapstone  Native Stone (coquina)  Zinc  Cast Iron  Wrought Iron  Aluminum  Bronze  
 Wood  Brick  Concrete/Cement  Limewash  Cement Wash  Stucco  Other: \_\_\_\_\_

Coping Design:  Squared  Beveled  Peaked  Rounded  Rounded & Edged

Coping Posts:  Squared  Beveled  Peaked  Rounded  Bulbous  Ornate

### FENCING

Fencing:  Yes  No

Fencing Material:  Marble  Granite  Limestone  Sandstone  Slate  Fieldstone  Curbing  
 Soapstone  Native Stone (coquina)  Zinc  Cast Iron  Wrought Iron  Aluminum  Bronze  
 Wood  Brick  Concrete/Cement  Limewash  Cement Wash  Stucco  Chain & Pipe  
 Other: \_\_\_\_\_

Fencing Design:  Hairpin  Hairpin & Picket  Bow & Picket  Bow & Hairpin  Milled Point  
 Woven Wire  Pipe Railing  Stacked Stones  Masonry Brick Courses  Other: \_\_\_\_\_

### GRAVE GOODS

Grave Goods:  Yes  No

Type of Grave Goods:  Vase/Urn  Plastic Flowers  Shells  Planting  Bench  Sculpture  
Votives (candles, toys, food, etc.)

Describe: \_\_\_\_\_
