

ABC Transporters and Scavenger Receptor BI:
Important Mediators of Lipid Metabolism and
Atherosclerosis

Illiana Meurs

ABC Transporters and Scavenger Receptor BI:
Important Mediators of Lipid Metabolism and
Atherosclerosis

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Prof. Mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 7 juni 2011
klokke 15.00 uur

door

Illiana Meurs
geboren te 's-Gravenhage
in 1981

Promotiecommissie

Promotor: Prof. Dr.Th.J.C. van Berkel
Co-promotor: Dr. M. van Eck

Overige leden: Prof. Dr. M. Danhof (LACDR)
Prof. Dr.A. K. Groen (University of Groningen)
Prof. Dr. L. M. Havekes (LUMC)
Dr. R. Masereeuw (University of Nijmegen)

The studies presented in this thesis were supported by grant 917.66.301 from the Netherlands Organization for Scientific Research (NWO) and were performed at the Division of Biopharmaceutics, Leiden/Amsterdam Center for Drug Research, Leiden University, Leiden, The Netherlands.

Financial support for the printing of this thesis was provided by:

- LACDR
- Leiden University
- Chiron Development Consultancy

Aan mijn ouders en opa

Cover design: Robin Alderliesten & Illiana Meurs
Bone marrow-derived macrophages loaded with β VLDL

Printing: Wöhrmann Print Service

ISBN: 978-90-8570-757-8

Meurs, Illiana
ABC Transporters and Scavenger Receptor BI: Important Mediators of Lipid Metabolism
and Atherosclerosis

Proefschrift Leiden
Met literatuur opgave - Met samenvatting in het Nederlands

Table of contents

	Page
Chapter 1: General introduction	11
1.1 Atherosclerosis	13
1.2 HDL: key molecule in cholesterol efflux and the prevention of atherosclerosis <i>Curr Pharm Design. 2010, 16:1445-1467</i>	17
1.3 Role of the ABC transporters ABCA1 and ABCG1 in foam cell formation and atherosclerosis <i>Future Lipidol. 2008, 3:675-687</i>	61
1.4 Outline of the thesis	83
Chapter 2: The effect of ABCG1 deficiency on atherosclerotic lesion development in LDL receptor knockout mice depends on the stage of atherogenesis <i>Submitted for publication</i>	87
Chapter 3: Macrophage ABCA5 deficiency influences cellular cholesterol efflux and increases susceptibility to atherosclerosis in female LDL receptor knockout mice <i>Biochem Biophys Res Commun. 2010, 395:387-394</i>	105
Chapter 4: Effects of deletion of macrophage ABCA7 on lipid metabolism and the development of atherosclerosis in the presence and absence of ABCA1 <i>Submitted for publication</i>	123
Chapter 5: Macrophage ABCB1 deficiency increases serum cholesterol levels but does not promote atherosclerosis in LDLr knockout mice on Western-type diet <i>Submitted for publication</i>	149
Chapter 6: Transcriptional profiling of ABC transporters in murine foam cells and atherosclerotic lesions identifies putative novel targets for improving macrophage lipid homeostasis	165
Chapter 7: Identification of novel macrophage cholesterol-responsive genes in peritoneal and bone marrow-derived macrophage foam cells	185
Chapter 8: HDL cholesterol levels are an important factor for determining the lifespan of erythrocytes <i>Exp Hematol. 2005, 33:1309-1319</i>	207

	Page
Chapter 9: Deletion of the high-density lipoprotein receptor scavenger receptor BI in mice modulates thrombosis susceptibility and indirectly affects platelet function by elevation of plasma free cholesterol <i>Atheroscler Thromb Vasc Biol. 2011, 31:34-42</i>	227
Chapter 10: Genetic variant of the scavenger receptor BI in humans <i>N Engl J Med. 2011, 364:136-45</i>	253
Chapter 11: General discussion and perspectives	285
Nederlandse samenvatting	299
List of abbreviations	306
List of publications	309
Curriculum Vitae	312
