

Systems Biology of Osteoarthritis

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 25 maart 2010
klokke 16.15 uur

Door

Jurre Jorian Kamphorst

Geboren te Gouda
in 1981

Promotiecommissie

Promotoren: Prof. Dr. T. Hankemeier
Prof. Dr. J. van der Greef
Dr. J. de Groot
Dr. R. van der Heijden

Overige leden: Prof. Dr. M. Danhof
Prof. Dr. A.P. IJzerman
Prof. Dr. F.P.J.G. Lafeber
Dr. G.P. Rozing

The Centre for Medical Systems Biology (CMSB) is gratefully acknowledged for funding the research described in this thesis.

Printing of this thesis was financially supported by Agilent Technologies and TNO Quality of Life.

The research described in this thesis was performed at the Division of Analytical Biosciences of the Leiden/Amsterdam Center for Drug Research, Leiden University, the Netherlands, in collaboration with the business unit Biosciences, TNO Quality of Life.

ISBN: 978-90-74538-71-8

This thesis was printed by Wöhrmann Print Service (Zutphen, the Netherlands)

Contents

1	General introduction and scope	5
2	Systems biology in osteoarthritis: omics-data integration, biological interpretation and information-gap identification	13
3	Profiling of endogenous peptides in human synovial fluid by nanoLC-MS: method validation and peptide identification	33
4	Exploratory synovial fluid peptidomics for the study of osteoarthritis	55
	Appendix: Evaluation of a chip-based nanoLC platform for peptidomics biomarker studies	77
5	Feasibility of electro dialysis as a fast and selective sample preparation method for the profiling of low-abundant peptides in biofluids	83
6	Lipid profiling reveals local as well as systemic changes in lipid homeostasis during osteoarthritis	107
7	Conclusions and perspectives	127
	Summary	133
	Samenvatting	137
	Curriculum Vitae	142
	List of Publications	143
	Nawoord	144
