in 1979

Promotiecommissie

Promotores	Prof. Dr. A.C. Gittenberger-de Groot Prof. Dr. R.E. Poelmann
Co-promotores	Dr. M.J. Goumans Dr. D.E. Atsma
Overige leden	Prof. Dr. J.A. Romijn Dr. R. Passier Prof. Dr. R.A. Bank (Rijksuniversiteit Groningen)

The work presented in this thesis was carried out at the Department of Anatomy and Embryology of the Leiden University Medical Center and was supported by a grant from the Interuniversity Cardiology Institute of the Netherlands (05.303).

Financial support by the Netherlands Heart Foundation and the Interuniversity Cardiology Institute of the Netherlands for the publication of this thesis is gratefully acknowledged.

The realization of this thesis was also financially supported by the Matty Brand Stichting, J.E. Jurriaanse Stichting, Boehringer Ingelheim, Astellas Pharma and Astra Zeneca.

Maximus in Minimis

Contents

- 9-22 **Chapter 1**
General Introduction

Part 1

Epicardium-derived cells and their potential in the infarcted adult heart.

- 25-42 **Chapter 2**
Epicardium-derived cells in cardiogenesis and cardiac regeneration.
Cellular and Molecular Life Sciences, CMLS. 2007; 64(6): 692-703
- 43-70 **Chapter 3**
Preservation of left ventricular function and attenuation of remodeling after transplantation of human epicardium-derived cells into the infarcted mouse heart.
Circulation. 2007; 116(8): 917-927
- 71-94 **Chapter 4**
The potential of epicardium in the first week after myocardial infarction.
Submitted for publication
- 95-130 **Chapter 5**
A new direction for cardiac regeneration therapy: application of synergistically acting epicardium-derived cells and cardiomyocyte progenitor cells.
Circulation: Heart Failure. 2009; in press

Part 2

Mesenchymal stem cells as source for cardiac regeneration

- 133-152 **Chapter 6**
Mesenchymal stem cells from ischemic heart disease patients improve left ventricular function after acute myocardial infarction.
American Journal of Physiology. 2007; 293(4): H2438-H2447.

Part 3

Functional assessment of the infarcted mouse heart

155-172 **Chapter 7**

Left ventricular function in the post-infarct failing mouse heart by magnetic resonance imaging and conductance catheter: a comparative analysis.

Acta Physiologica. 2008; 194(2): 111-122

173-182 **Chapter 8**

Cell tracking using iron-oxide fails to distinguish dead from living transplanted cells in the infarcted heart.

Magnetic Resonance in Medicine. 2009; *in press*

183-199 **Chapter 9**

General Discussion

200 Abbreviations

206 Summary

210 Samenvatting
