Among U. S. Colleges and Universities —

PV Students Listed In Who's Who

ALCOA FOUNDATION AWARD — H. W. Brooks, personnel manager at Alcoa is shown presenting \$10,000 check to President A. I. Thomas for university development. Career planning and placement director Brutus Jackson is pictured at left.

The 1978-79 edition of Who's Who Among Students in American Universities and Colleges will carry the names of 49 students from Prairie View A&M University, Prairie View, Texas who have been selected as being among the country's most outstanding campus leaders.

Campus nominating committees and editors of the annual directory have included the names of these students based on their academic achievement, service to the community, leadership in extracurricular activities and future potential.

They join an elite group of students selected from more than 1,000 institutions of higher learning in all 50 states, the District of Columbia and several foreign nations.

Outstanding students have been honored in the annual directory since it was first published in 1934.

Students named this year

from Prairie View A&M University are: Waheed A. Alli, Kathy S. Bigsby, Rhonda H. Bouyer, Rachel Buckner, Quintin Bullock, Brenda Childers, Jerry Daniels, Jiles P. Daniels, Clara Davis, Hulen Davis, Jr., George Dawson, Omega F. Elmore, Lora Gaitwood, Karen Johnson, Pamela Jones, Larry D. Martin, Obe Nylander, Cynthia Lynn Patterson, Carl Platt, Renee Price, Debra Ross, Penny Songy, Beverly J. Teal, Willie Tempton, Cynthia E. Thomas, Barbara D. Tompkins, Vweiser Turner, Jr., Corina Watson, Doretha Woods, Shaune E. Tubbs, Timmie A. Neal, Drusilla Cockrell, Barry DeBose, Debra Hill, Obiora B. Ifejoku, Tony A. Jones, Rachel McBride, Alice Pendleton, Linda A. Powell, Ingrid Proctor, Sharon Singletery, Dorothy Upton, Angel Lenord, Renita J. Iguers, Lance Alexander, McKel Elliott, Rickey L. Gaines, James E. Scott, Cheryl Wilson.

BASKETBALL ACTION — Men and Womens team are pictured in recent games in the Field house.

Job Interviews Schedule of Recruiting Increasing at PV

A large number of recruiters representing many of the nation's major business firms are scheduled on campus throughout the next two months.

The schedule is particularly heavy during the next two weeks.

Placement office officials are urging students to take advantage of the opportunities to meet and talk with company representatives who

are looking for prospective employers.

The Panther calls your attention to Ads in this issue.

Black Awareness —

February is Major Activities Month

The month of February 1979 is shaping up as one of the busiest during the academic year.

It is Brotherhood and Race Relations month, plus Valentine Day and a lot of basketball. Mix together "Black History Month" or Week and you have plenty going on.

At PV, the month really gets

underway with the Annual Ministers Conference, scheduled the year on February 6-7. Several outstanding visiting church leaders are slated to speak at various session during the two-day meeting.

Black History month is expected to increase the presentation of such programs as dramatic productions art exhibits and various cultural programs.

Job Market Featured —

Insider Magazine to Be Panther February Supplement

A 24-page full color supplement entitled *Ford's Insider*, "Career Close-up: An Inside Look at Today's Job Market" will appear in the Panther in February.

This supplement is one of a continuing series named *Insider* sponsored by Ford Division of Ford Motor Company in their efforts to provide services to college students.

Each issue of *Ford's Insider* is designed to deal in depth with one feature topic of interest to college students. This issue at the job market — how it changes and what it holds for college graduates in a variety of fields.

For starters, "Job Evolution" examines some of the key forces that are creating new types of

jobs while turning scores of others into dinosaurs. "News from the Workplace" highlights some of the day-to-day details of life on the job. "Their Work Is Play" talks with six young people in highly unusual jobs — while "Your First Job" discusses some of the big changes and adjustments that nearly every new worker has to face. And for a final overview, there's "Career Forecast," a look at the trends and growth areas in eight major career fields.

Each issue of *Ford's Insider* is edited and designed exclusively for insertion in college newspapers by 13-30 Corporation, Knoxville, Tennessee, for the Ford Motor Company.

Ministers Conference Set February 6-7

Outstanding Visiting Leaders Scheduled As Speakers

Reverend W. Van Johnson, Dean of Chapel and director of the Ministers' Conference announced that over 400

ministers of all religious faiths will be coming to Prairie View A&M University for its twenty-first annual Ministers' Conference on February 6-7.

The conference theme is "Christianity and Cultism — A Modern Day Dilemma."

Guest speakers scheduled Tuesday, February 6, include Bishop O. T. Jones, Holy Temple Church of God in Christ, Philadelphia, Pennsylvania; Reverend James A. Covington, BeBee Tabernacle CME Church, Houston, Texas, and Dr. Bernilee Faison, Zion Hill Baptist Church, Los Angeles, California.

The speaker for the second general session is Dr. Terry M. Batts, Sardis Primitive Baptist Church, Cleveland, Ohio.

The annual Ministers' Convocation will be held at 9:30 a.m. on Wednesday, February 7 in the University Field House. The speaker for the occasion is Reverend Robert L. Pruitt, pastor of the Metropolitan AME Church, Washington, D.C.

Reverend Otis Moss, Jr., Olivet Institutional Baptist Church, Cleveland, Ohio, will speak at the closing luncheon session at noon Wednesday.

Dr. E. Stanley Branch is serving as conference chairman and Rev. W. Van Johnson is conference director.

Bishop O. T. Jones

Rev. James A. Covington

Rev. Robert L. Pruitt

Dr. Bernilee Faison

Dr. Jerry M. Batts

Rev. Otis Moss, Jr.

Black History Month Begins February 1st

Federal Career Day Set for February 16

The Fourth Annual Federal Government Career Day is scheduled to be held at the University on February 16 from 9:00 a.m. to 4:30 p.m.

The event is sponsored by the Division of Career Education and Placement services in cooperation with the Houston Area Office of the United States Civil Service Commission and the Texas Gulf Coast Government Recruiting Council. The public is invited and there is no cost involved.

According to Jerome L. Pinkston, associate director for Technical placement, the objective of Career Day is to maximize Prairie View students' opportunities for federal employment. In order to meet this objective the placement office will provide for on-the-spot registration for the PACE examination.

A&M System Chancellor Dr. Jack Williams Resigns

Dr. Jack K. Williams resigned Tuesday as chancellor of The Texas A&M University System.

Williams made his announcement at the conclusion of a regular business meeting of the board of regents. He expressed a desire to take a six-month leave of absence and then "resume a teaching career that I left several years ago."

He said he probably would teach at Texas A&M. He taught American history at Clemson University earlier in his career.

Clyde H. Wells, who earlier in the meeting had been elected to a sixth consecutive two-year term as board of regents chairman, said he learned of Williams' plans just prior to the morning session.

Noting that Williams is "looked upon as a statesman in

Dr. Jack Williams Returns to Coaching

higher education,' Wells thanked him for the "contributions you have made to higher education in Texas."

Williams, 58, was named president of both Texas A&M University and The Texas A&M University System in 1970 and was elevated to the system chancellorship May 24, 1977. He served as the first commissioner of the Coordinating Board, Texas College and University System from 1966 until 1968, and was instrumental in founding the agency which has a major role in guiding higher education throughout the state.

Prior to moving into the chancellorship, Dr. Williams had a series of heart-related problems which resulted in open-heart surgery in mid-1976.

The regents formally granted Williams' request for a leave of absence and delegated to the board chairman, on a temporary basis, the authority normally delegated to the chancellor.

Regents Chairman Wells also was authorized to appoint a committee of the board to search for prospects to be considered for the chancellorship.

Wells' re-election as board chairman followed his re-appointment earlier this month to a fourth six-year term on the governing board for the statewide teaching, research and public service institution. A rancher and businessman, he resides in Granbury and has offices in Dallas.

H. C. Bell, Jr. was elected vice chairman of the nine-member board. The Austin businessman and former chamber of commerce president, currently serving his second term, succeeds Richard A. Goodson of Dallas who, along with Mrs. Wilmer Smith of Wilson, retired from the panel.

Tuesday's meeting was the first for Norman N. Moser of DeKalb and Royce E. Wisenbaker of Tyler who were appointed at the same time Wells was re-appointed. Appointments of the trio, all Texas A&M graduates, were confirmed by the Senate last week. Sen. William T. "Bill" Moore administered the oath of office Monday.

The ranch called San Bartolome established about 1753 in present Karnes and Wilson counties is possibly the site of the first ranch in Texas. It was established by Andres Hernandez.

National Teacher Examinations Set

Prospective teachers who plan to take the National Teacher Examinations on February 17, 1979 at Prairie View A&M University were reminded today that they have less than two weeks to register with Educational Testing Service (ETS) of Princeton, NJ.

Dr. George H. Stafford, Director Counseling Services said registrations should be mailed in time to reach ETS no later than January 25 when regular registration closes. A penalty fee of \$5 is charged for registrations received at ETS after January 25 but prior to January 31. After January 31 registrations will not be accepted for the February administration. Registration forms and instructions may be obtained from Dr. Stafford, Room 111 NCR Bldg. or directly from the National Teacher Examinations, ETS, Box 911, Princeton, NJ 08541. On-the-spot registration is not permitted.

During the one-day testing session, a registrant may take the Common Examinations, which include tests in professional and general education, plus one of the 26 Area Examinations designed to probe knowledge of particular subject matter and teaching methods.

Once registered, each candidate will receive an admission ticket and notification of the exact location of the center at which to report. Those taking the Common Examinations will report at 8:30 a.m., and finish at about 12:30 p.m., Dr. Stafford said. Area Examination are scheduled from 1:30 p.m. to about 4:15 p.m.

Distinguished Service Award

Dr. Coleman

Mrs. Gordon

Dr. John B. Coleman, M.D. and Mrs. Thelma Gordon, Director, Jackson Funeral Home will receive the distinguished service award during the twenty-first annual ministers' conference at Prairie View A&M University on February 6-7, 1979. The award is being presented to these two distinguished persons for their outstanding leadership in our efforts to construct an All Faiths Chapel at Prairie View A&M University. Also for their contribution in civic, religious and educational endeavors. Both persons are from Houston.

Ministers Conference Leaders

**Rev. E. Standley Branch
Conference Chairman**

**Rev. W. Van Johnson
Conference Director**

We're looking for the best graduates in the nation. That's why we're interviewing at Prairie View A&M.

We've grown because we've made it a practice to employ the brightest, most capable people available. Which is exactly why we're coming here.

We're Halliburton Services, the largest oil field service company in the world. We provide a full range of highly technical, extremely complex services to the petroleum and other industries. This visit, we're interviewing for positions in the following area of our business:

Research and Development

A major reason for Halliburton's leadership position is the constant flow of new products, techniques, and procedures from Research and Development Department. The departments are widely recognized as both the most productive and the largest of their type in the world. The departments function in four basic areas—Chemical, Mechanical, Electrical, and Tools.

Several different professional disciplines are required. In R&D you'll be given responsibility for a complete project. Eventually you'll even initiate your own projects. You'll have primary responsibility for the project, including technical support personnel, development, testing, introduction to the field, and coordination of the finished product with manufacturing. It is a position that requires an individual with a unique understanding of how to practically apply theoretical concepts, able to communicate with field personnel, and who enjoys the challenge of expanding an entire industry's technological base.

Sign up now at placement office. On campus interviews February 9.

Halliburton Services personnel will be on campus to interview candidates for positions in this area:

Research & Development

Geophysics, Physics, Nuclear Physics, Rock Mechanics, Computer Science, Chemistry, Geology, Chemical, Geological, Petroleum, Reservoir, Nuclear, Mechanical, Aeronautical, Agricultural, and Electrical Engineering.

If you are unable to interview when we're on campus, please send a copy of your resume to:
Bill Baker, Recruiting Coordinator,
Drawer 1431, Duncan OK 73533.

Let's Support The Panthers

By Bennie Brown

As the spring semester gets underway, more and more athletic events will be occurring on campus. It is my hope that these events such as basketball, baseball, track, tennis, etc. will again receive the fan support it has received in the past.

If the Panthers are to be successful in any sport this year, the student body and faculty must play their part as well in helping to achieve this goal.

My solution is for every able body to come out to the games or events in full forces and yell, scream, or whatever it takes to cheer the Panthers on. And in your spare time go over and watch the players practice, get involved as much as you can.

Just look around you and except the fact that Prairie View has the best fan support of any university around.

This is a new year, a new beginning, so I'm urging everyone to become a part of Panthermania.

Black Awareness

How many of you know that February is Black History Month? If you did know, you would be surprised to know how many of your fellow students don't, and worse yet, don't even care to know. In a university in which the vast majority of the students are black, I think it is a shame that

so little is done to promote an increase in black awareness.

In this month each one of us should do something to increase our black awareness. Maybe some people in each department could set up a display or decorate a bulletin board. A stop by the library to

AKA Wants to Know —

What is the Future of Black America?

By Beatrice "Super Bea" Moore

It was just only a little over a 100 years ago that it was against the law of many states to teach a Black to read or write, and who can say that even now there is a public commitment to provide equal advantages and equal educational opportunity of a kind to make up for the generations of educational impoverishments imposed upon Black families in the past? We say that neither the total community nor the Black community has moved fast enough to obtain educational justice for the Black. The whole American community suffers from the inadequate development of Black youth who are potential professionals.

It is only now that the movement has seen greater results, and our institutions of higher learning are becoming really intergrated. But we must not forget from where we came. After obtaining an education, we must put back into our communities to insure that our future will be a picture painted of prosperity not one of doom and more poverty. February is Black History Month, and we should all take this time to remember the courage and strength which our predecessors have displayed. Without them, who's to say that we would have come so far? Of course the past is now history, but soon today will be tomorrow. So we must take pride and instill that pride of our heritage in all around us and see that it never die.

Our future as a country, as a race, as a world, is determined now in our actions. We must see to it that all Blacks are given the same opportunities or even better ones to insure our survival as a proud people. There is definitely a Black America, no matter how intergrated our society may become. So let it be an America based upon high principles, pride and determination, and most of strength and a strong will to succeed and exist. So each and everyone should make it our job to make Black History Month a personal project to find out all we can about our heritage. It is our duty to ourselves and our future that our past not be lost in the sands of time. There, is, after all, a multitude of contributions made by our people to make the world what it is today and let us see to it that we are recognized for them.

A Tribute To Dr. Martin Luther King —

"Then My Living Will Not Be In Vain"

MARTIN LUTHER KING — Monday, January 15, mark the 50th birthday anniversary of Dr. Martin Luther King, Jr., one of the greatest civil rights leaders of all times. The Panther honors Dr. King and remembers him in excerpts taken from his speech.

Every now and then I guess we all think realistically about that day when we will be victimized with what is life's final common denominator that something we call death.

We all think about it, and every now and then I think about my own death, and I think about my own funeral. And I don't think about it in a morbid sense. And every now and then I ask myself what it is that I would want said and I leave the word to you this morning.

read some black poetry or listen to a tape or album would take as little as ten minutes. We need to do something to awaken our black awareness! Let's not forget that to remember we're black. Let's open our eyes and look around us, and open our minds and

look inside ourselves. When you do this, you awaken your black awareness. When you awaken your black awareness, you awaken your black pride, and when you awaken your black pride, you awaken pride in yourselves.

Katherine Wells

If any of you around when I have to meet my day, I don't want a long funeral.

And if you get somebody to deliver the eulogy, tell him not to talk too long.

And every now and then I wonder what I want him to say. Tell him not to mention that I have a Nobel Peace Prize. That isn't so important.

Tell him not to mention that I have three or four hundred other awards — that's not important. Tell him not to mention where I went to school.

I'd like somebody to mention that day that Martin Luther King, Jr. tried to give his life serving others.

I'd like for somebody to say that day that Martin Luther King, Jr. tried to love somebody.

I want you to say that I tried to be right on the war question. I want you to be able to say that day that I did try to feed the hungry. I want you to say that day that I did try in my life to clothe those who were naked.

I want you to say on that day that I did try in my life to visit those who were in prison. And I want you to say that I tried to love and serve humanity.

Yes, if you want to, say that I was a drum major. Say that I was a drum major for justice. Say that I was a drum major for peace, I was a drum major for righteousness.

And all of the other shallow things will not matter. I won't have any money to leave behind. I won't have the fine and luxurious things of life to leave behind. But I just want to leave a committed life behind.

And that is all I want to say. If I can help somebody as I pass along, if I cheer somebody with a song, if I can show somebody he's traveling wrong, then my living will not be in vain.

If I can do my duty as a Christian ought.
If I can bring salvation to a world once wrought.
If I can spread the messages as the master taught.
Then my living will not be in vain.

TAKE CARE OF #1 IN MINNEAPOLIS, MINNESOTA ...While Taking Care Of America

As a total living environment, Minnesota is tops...green forests...clean cities...and career opportunities as plentiful as the sky-blue waters. And for the new engineer ready to meet the challenges of modern technology, HONEYWELL's Defense Systems Division provides real growth opportunities and the latest in sophisticated equipment. Major areas of technological advancement will occur in the following:

- Integrated Circuit Design
- Explosion Dynamics
- Aerodynamics
- Millimeter Wave Components
- Hybrid Circuit Design
- Structural Dynamics
- Hydraulics
- Material Science
- RF Components
- Mission Analysis

STUDENT AFFAIRS LEADERS PRESENT CHECK FOR DEVELOPMENT — Pictured from left are Cynthia Lynn Patterson, Dr. A. I. Thomas, Quinton Bullock, Nikki Torian and Lance Alexander, who made the presentation to President Thomas.

How you can change the world in 25 years or less.

Let's face it.

In 25 years or less, the world of energy as you know it, will be entirely different.

So will we.

Today, we're a leader in the petroleum industry. And tomorrow, when your children are grown, we hope to be meeting their energy needs as well.

We've committed 83 million dollars this year alone to research and development programs that read like science fiction.

We're into earth sciences. Mining and milling uranium. Solar research. Geothermal energy development. Even new technology to produce fuel from coal; and synthetic crude oil from tar sands and oil shale.

And all the while, we're still looking for ways to squeeze every drop out of old oil fields. And

continuing the important search world-wide for new ones.

If you're also committed to changing the world, to making your mark on the energy frontiers ahead, we'd like to talk to you.

February And —

Valentine Day Ahead

February is just around the corner and everyone knows that "the lover's holiday" will be celebrated. St. Valentine's Day has been celebrated by people all over the world for many decades. This year the Sorors of Delta Sigma Theta Sorority, Inc. are going to help you celebrate Valentine's Day by giving you the opportunity to remember a loved one with flowers. A flower is the most precious way in which one can say the few words that we all long to hear "I Love You." Give the words as a little gift, with a beautiful carnation. Tell your friend or loved one "Mon Cher Amour," Je Suis Amour Vous, (My love . . . I love you.) Be compassionate in your decision about life and love.

Remember, the soul can be touched. One assured way is the lovely simple things. Perhaps with *this* lovely simple thing you can turn your friendship into a meaningful relationship. Carnations may be purchased from any Soror of Delta Sigma Theta here at Prairie View. Upon purchase or order, your loves name will be placed on a large heart that will be located on the Memorial Student Center.

The Sorors will also be sponsoring a Valentine's Day Party on the night of February 14th in the Newman Center. Come out and enjoy "the lover's holidays."

Alpha Phi Alpha Fall Line Earns Who's Who Honor

The fall line of Alpha Phi Alpha made distinction for themselves and their fraternity, when they were nominated for Who's Who in America Colleges and Universities.

The five brothers are Benny Smith, an Industrial Education major from Hooks, Texas; Jimmy Williams, a History major from Fort Worth, Texas; Donovan Turnquest, a Soil Science major from Freeport, Bahamas; Micheal Jackson, a Business major from Houston, Texas, and Ricky Gaines, an Agriculture major from Tyler, Texas.

These brothers are also on the President's Honor Roll and had an accumulative line average of 3.49. This marks the first time in Eta Gamma history that a pledge line has all been nominated for Who's Who, and the brothers of Eta Gamma wish to recognize the achievement of the "Moonstruck Madness." The brothers would also like to take this time to welcome the faculty, staff and students back, and hope your new year is a successful and as satisfying as last year.

Brother Jimmy Williams

AKA Wants To Know —

How Do You Handle Emotions?

Having and expressing feelings is not highly valued in our society. If you doubt that statement, consider the following fragments of dialogue, all of them typical of the American scene:

"Don't get excited!" "You blew your cool!" "Why are you getting so emotional?"

Since every one of us came into this world full of excitement and prepared to express our feelings, some sort of learning process must be responsible for the change. If you observe what happens around you for a couple of days, you'll probably see the process taking place.

When was the last time you expressed anger at a parent or teacher? If you're male, how old were you when you no longer dared cry in the presence of other boys? How old were you before you could express

interest in a girl without inviting ridicule?

If you're female, when did you last behave aggressively toward a male? How much luck have you had in doing anything that involved you in any real way in leadership, competitions or adventure?

To many people, showing feelings isn't safe; it leaves one exposed and vulnerable. Spontaneity is distrusted. Individuals must work hard to break down these barriers. Those who succeed discover that they can be honest with one another, even express anger, affection, or fear without provoking disaster.

A person devoid of feelings is existentially dead; only by standing on a technicality could you number him among the living. In other words, to be alive is to feel.

Reflections of AKA

Hello once again from the sorors of Alpha Kappa Alpha Sorority. This is a new beginning for many of us and an end for others, so whichever may be the case for you, we certainly hope that you succeed.

The sorors would like to extend a welcome to those of you who are attending Prairie View for the first time, and feel free to visit the sorors and attend their functions, we would like for you to feel comfortable here and make your education a success.

In our efforts to be of service to mankind, we recently donated a check for \$100.00 to the All Faiths Chapel fund drive to construct a Chapel for Prairie View A&M University. We urge all students and faculty to donate to such a worthy cause, because this is certainly a building which would be for the benefit for all who attend or visit our university.

Birthday wishes are in order for 3 ladies of AKA. Sorors Brenda Stewart, Velva Sauls and a belated birthday wish to Soror Merrie Nichols. We wish

you all many more birthdays, and the same for those who follow our articles. God bless you.

Beatrice "Super Bea" Moore

Southwestern Tool Expo in Houston Stress Productivity

Productivity-g geared technology and management expertise highlighted the 4th annual Southwestern Tool & Manufacturing Conference and Exposition held at Houston's Astorhall January 23-25. The three-day event was sponsored by the Society of Manufacturing Engineers (SME) and the Houston Chapter of the National Tool, Die & Precision Machining Association (NTDPMA).

The 1979 event was the largest in the four-year series, both in attendance and number of exhibitors.

SME sponsored technical sessions on Numerical Control, Gaging and Inspection Techniques, Cold Forming, Powder Coating, Machinability and New Tool Development.

coming... WELCOME TO THE JOB MARKET

What's your best bet in today's marketplace? What can you expect from your first job? Need it be a nine-to-five one? These and many other questions related to entering the job market will be discussed in this issue of "Insider"—the free supplement to your college newspaper from Ford.

Ford hopes these tips about what awaits you in the job market will help you start your career off on the right track. And if you're in the market for a new car or truck, we also hope you'll check out the great lineup of '79 Fords.

Look for "Insider"—Ford's continuing series of college newspaper supplements.

Honor Society of Kappa Delta Pi Elects Officers

On December 13, 1978, the Mu Epsilon Chapter of Kappa Delta Phi at Prairie View A&M University, held an initiation of new members and officers.

Dr. Gwendolyn Grossman, Mr. C. A. Thomas, and Mr. C. F. Randle are faculty members of this chapter which assisted in the induction ceremony of new members.

The new members on campus are as follow: Linda Kay Joseph, president; Linda Powell, secretary; Cheryl D. Wilson, treasurer, and Shari Hughes, member.

To our new Kadelphians, the charter asks, "that you accept the challenges that the field of education has to offer with deep aspiration to indeed become the finest educators of all."

The purpose of Kappa Delta

Linda Joseph

Pi is to recognize outstanding contributions to education. The organization is open to all education majors of junior and senior status who maintains a minimum of "B" average.

Linda Joseph, President 1979

Why Is Les Beaux Arts On Campus

The brothers of Les Beaux Arts Black Cultural Fraternity are here to design a better atmosphere for the students. Trying to get each and every one of us to see that there is a way for us to succeed. You really ought to hate how the majority of us take for granted what our ancestors have done for us.

We need to know more about our people who the history have neglected to tell us about; who have and still is fighting, suffering and dying for all of us to have the right to better life. Well, the members of Les Beaux Arts are here to tell you about them in our own version. LBA tries to display a type of society that we (young promising executives) need to exercise in our every day lives. Les Beaux Arts is also striving for perfection, and to give an

enrichment of happiness whenever we are in your present.

We are a cultural fraternity with emphasis on six arts: Music, Dancing, Drama, Art, Literature, and Architect. We analyze these six arts to give the campus the best knowledge of what people of these different fields already have accomplished. LBA, the leader in culture will be at your disposal at anytime, for any questions, suggestion or compliments that you might have.

We encourage each and every student to come and be a part of us or our sisters (Les Belles Lettres). Be a part of togetherness, togetherness of a part. One of many. Support the Arts. That's where the people of tomorrow are. Can we help to make you one of Prairie View's Productive People?

Waller School Trustees Re-Elected Take Office

The Waller ISD Board of Trustees met Monday night to canvas the returns of the January 20 election. Three positions were unopposed, and although a few were in votes were received, it did not affect the outcome of the election.

A total of 220 votes were cast, with these results: Mrs. John (Jo) Trimble, 217; Maurice Hart, Sr., 215; and Raymond Phillips, 209; A J. Glasco, H. T. Jones, and George Kimbro received one write-in vote each,

and Eunice Harrison garnered two.

Herbert Schulz issued the trustee commission and administered the oath of office, and the new board organized for the new year.

The Boart voted to reinstate the officers of the previous year: James Dahse, president; Jo Trimble, vice president; Jo and Dr. Marion Henry, secretary. Other members are Maurice Hart, Sr., Clyde Christopher, Raymond Phillips and Milton Helfrich.

U.S.—China Plan Study Exchanges in Agriculture

Scientific and scholarly exchanges in agriculture between the People's Republic of China and the U.S. will begin as early as June 1979 under an agreement announced by Secretary of Agriculture Bob Bergland after his visit to China. The U.S. exchanges will be coordinated by the International Science and Education Council (ISEC, co-chaired by Elmer Kiehl, University of Missouri, and Assistant Secretary Hathaway. The Society of Agronomy will be the PRC counterpart. The agreements will include two categories: scientific exchanges and educational exchanges.

The agreement calls for teams of scientists to be

exchanged in three fields: plant germ plasma, biological control of pests and animal science and health; some scheduled for as early as June and July, 1979. Host countries will pay local costs for reciprocal teams. The Chinese are prepared to send study teams to the U.S. to selected universities and regions in (1) education in agriculture, (2) agricultural research and extension, (3) forestry, (4) agricultural engineering and (5) management of pastures. In addition, technical training has been requested by the PRC in (1) application of remote sensing, (2) soil survey and testing and (3) computer technology.

National Newspaper Being Planned

The New York Times, the mainstay of public and collegian libraries and the closest thing America has to a national newspaper, may have a true national issue on the market by 1980.

The paper's media analysts are currently test marketing the Times as a national edition. The paper has undergone a number of changes in recent years, including the addition of special interest sections on

business, sports, science, home and lifestyle.

The paper hopes to be able to cash in on its reputation as a leader in foreign and domestic news coverage, a reputation which already gives the paper a circulation of over 270,000 outside the New York area.

The Times hopes to market the national edition of the Times with a largely home-delivered circulation of 500,000.

Freshman of The Month

Kaye Buffington has been selected the Freshman student of the month because of her activities, assertiveness and intellectual ability. She is a native of Houston, Texas, where she graduated from Forest Brooke High School. While at Forest Brooke, she was in the National Honor Society, E.T.A., a majorette in the marching band and she received a gold medal for her solo performance in U.I.L. competition.

In addition, Kaye is a Pre-med major and a Chemistry minor here at Prairie View. Furthermore, she attained a 4.0 academic average for the first semester. Her interest are reading, music, and French. She also plays a flute in the Prairie View symphonic band. In the future, she endeavors to become a Obstetrician Gynecologist. Moreover, she is listed in the Who's Who Among American High School Stu-

Kaye Buffington

dents, and the National Society of Distinguished High School Americans.

We the Freshmen class and other are proud and honored to have such a versatile intellectually inclined individual in our class. Indeed, she is a individual, whom we all respect and admire.

Department of Energy Funds Minority Assistance Program

The Department of Energy (DOE) has awarded a \$497,000 grant to the Center for Urban Environmental Studies (CUES) of Washington, D.C. to conduct a minority energy technical assistance program (MATEP) for elected local, state and federal officials representing predominantly minority and low-income communities.

"By involving policy-makers at the state and local level, METAP provides a vehicle for developing energy conservation policies which better reflect the interest and concerns of local communities," Assistant Secretary of Conservation and Solar Applications Omi Walden said.

The METAP program involves three phases. First, a needs assessment consisting of a survey to be used to determine the level of elected officials' knowledge and in-

volvement in energy conservation matters.

Second, a training program, based on the results of the needs assessment, will be used as a vehicle for disseminating information on existing and proposed national energy conservation policy and its possible impact on local constituencies. This will be accomplished through a series of ten workshops, one in each of the DOE regions.

Third, an information and referral data bank to provide officials with pertinent energy information and data necessary for local decision-making and program implementation.

For further information contact Dave Robinson, Center for Urban Environmental Studies, Suite 706, 1012 14th Street, N.W., Washington, D.C. 20005, tel: 202-347-6020.

Family Resource Development Program Gets New Aide

By Linda Freeman

Mrs. Debra Newton recently became the new program aide in Falls County for the Family Resource Development Program-Youth Phase of the Prairie View Extension.

The new program aide will be responsible for training youth, ages 9-12, on how to help themselves in areas such as home management and food and nutrition.

A native of Marlin, Texas, Mrs. Newton is a graduate of Bryan High School where she was an outstanding student.

Mrs. Newton is married to Ralph Newton, Jr. and they have one son.

If leisure time is something you have plenty of, why not experience the world at your local library real soon?

Civil Rights Compliance Study Being Revised

Prairie View A&M and 17 other Texas institutions of higher education are involved in a Civil rights compliance study being conducted by the Department of Health, Education and Welfare (HEW). It has been reported that the study due for completion last August is being revised and is expected to be released sometime in February.

The investigation is being conducted as a result of a federal court ruling ordering HEW to examine states which had legally-mandated segregation, and determine whether any traces of a dual "separate but equal" system remain.

On-site investigations were made at Texas A&M and Prairie View, and at the other universities.

Similar reports have been prepared for Alabama and Delaware.

The court also ordered HEW to require desegregation plans in those states where reviews show continued discrimination.

If it is determined that vestiges of a segregated system exist, then the governor would appoint a panel to draw up a remedial plan.

Once the revisions are completed, copies of the report will be mailed to the governor and the institutions involved, Stephens said.

New Job Opportunities For Women Described

Some of the best job opportunities for women during the next decade will be found in business management, health care and the building and construction trades, according to a report released today.

The report, compiled by the editors of Redbook magazine from information supplied by the Federation of Business and Professional Women's Clubs and interviews with numerous women throughout the country, concludes that business management is "the real growth industry" for women.

An article in Redbook's

current (February) issue urges women interested in management careers to get a master's degree in business administration and to seek out corporations that offer executive training programs.

Stiffer Federal laws regarding on-the-job health and safety standards will triple the demand for health care specialists, the magazine predicted. Legislation will, likewise, increase the demand for women in the building and construction trades, the magazine said.

PV Grad Named to Texas Management Intern Program

The Honorable Nolan F. Ward, a graduate of Prairie View A&M University and the current Chairman and Executive Director of the Texas Employment Commission, is one of the nine members named to the advisory council of the Texas Management Intern Program (TMIP), the Merit System Council announced today.

Nolan F. Ward has been named as advisory council member of the Texas Management Intern Program. He is currently the Chairman and Executive Director of the Texas Employment Commission.

Other members named are Senator William Meier, Representative William J. Blythe, and D. W. Bond, Department of Human Resources.

Also serving on the council are Wilda Campbell, LBJ School of Public Affairs, University of Texas; Frank Hejl, Department of Health; Dr. Walter J. McCoy, Dean of the School of Public Affairs at Texas Southern University; Janell Robertson of the Air Control Board; and Dr. Jay Starling, Director of Graduate Program in Public Administration at Southern Methodist University.

The Texas Management Intern Program is designed to attract to state government outstanding graduates with degrees in public affairs, public administration or other degrees focused on managing the state's business.

The program is a result of a Merit System Council's effort

to make the best personnel available to its ten agencies.

Agencies served by the Merit System are the Air Control Board, Commission on Alcoholism, Committee on Aging, Department of Health, Department of Mental Health and Mental Retardation, Department of Human Resources, Division of Disaster Emergency Services, Drug Abuse Division, Texas Employment Commission, and the Surplus Property Agency.

Free For What

For freedom Christ has set us free. Galatians 5:1.

If you can gain your freedom, avail yourself of the opportunity. 1 Corinthians 7:21.

One of the traits we inherit from New England Puritanism is our often stubborn insistence upon freedom and independence. A hymn specialist reveals that it took ten years of controversy to persuade the New England Conscience that a regulated tune did not infringe upon individual freedom.

Let's talk a little about freedom, and in particular about Christian freedom. As Paul points out in first Corinthians: if you have a chance for freedom, grasp it. While his immediate reference is to freedom from slavery, it has a wider meaning for our times. Paul says it somewhat differently in Galatians "For freedom Christ has set us free."

"For freedom Christ has set us free." Not me free. Individual freedom is irreplaceably precious. But the freedom we are dealing with today is the freedom which is bound to a context, created within a community, freedom within a plural setting.

The church that has been set free by Christ also strikes us with its utter humanity. It is able to let people be people — which means they are messy, clumsy, thoughtless, and brittle, but also pure, gracious, thoughtful, and resilient. The freely human church has its share of flaws and foibles, fears and failures and its share of strength and resolution, courage and accomplishment. And if we are going to get on with the Christian enterprise, it is this church — and no other — that has to be taken seriously.

True, because of its very "humanity," it is often criticized. Critics say of it, "Christianity, yes; Churchianity, no."

Oh, we can profit from the critical insights of those who won't dare or don't care to hazard life within the church. Nevertheless, the church's real hope rests on those who are more interested in washing the dishes and scrubbing the floors than in protecting themselves from spiritual dishpan hands or housemaid's knee.

The free church is able to accept those around it with a kind of contagious enthusiasm. And how many people ache and hunger for such acceptance. What they need — what we need — is not acceptance based upon merit. That is, what they need is not acceptance based upon IQ, social status, charm, piety, or talent. Nor for that

By
Rev.
E. J.
Johnson
Sponsor
B.S.M.

matter should it be an acceptance based upon the lack of these, as if persons could be pitied into faith. No, what is needed — and given by a Christ-freed church — is an unqualified and undiscourageable acceptance, based upon nothing save our mutual need for it. Thus, the freed church, this community of faith, has a secret; since we have been accepted, we can be accepting.

But there is a going out and a coming in to freedom. The crucial question is not so much what we are free from as what we are free for.

The former question is relatively easy to answer. The American colonists, even the most ignorant of them, were able to answer that they sought freedom from George III and his oppressive England. But what they sought freedom for was a question requiring the efforts of the best minds and long decades of dialogue. Some of our modern day protests seem to be deficient at this point. They are protest for protest's sake. They demand freedom from the politician or from the college administration or from the military or from apparent inequality or injustice. But ask what do they seek freedom for? and the answers are not so clear. Yet these are the questions:

Peace followed by what? University reform to what end? How do we better establish equality and justice?

It is precisely this issue which freedom in Christ forces us to face. It exists for that state of spiritual affairs when the revolution is won, the freedom is gained. What then?

For the church, whose history God also questions, whose future God also judges, it is the same: bound or else not free. For the church to be free means for it to be unhindered in all that it counts good. If that means selling some property, or buying some, the church will do it. If that means organizing a committee or writing some music, the church will do it. If that means providing rebuke for a friend or bandages for an enemy, then that too. Whatever the church has done, whatever it's about to do, whatever it may ever do is called into question by him to whom it is freely bound and him in whom it is bound to be free.

At Law Reviews —

What's Good for the Geeses Displeases Stanford and Harvard

One of the best ways for a law student or professor to help his or her career is to be published in a law review published by one of the country's more prestigious law schools. Competition for law review space is consequently fierce. Some authors, using standard practice, even try to bargain their way up the ladder, using one journal's acceptance of an article to pressure another, more prestigious, journal to publish it instead.

That's what one ambitious, unnamed writer tried to do by playing the *Stanford Law*

Review against Harvard's journal. The result was a "no gain" for the writer's career.

The *Stanford University News Service* reports that one professor from a mid-western university — whom the service refuses to name — submitted an article about "a previously unexplored area of torts law." *Review* President Robert Weisberg liked the piece, and told the writer the *Review* would publish it after "a few minor editorial changes." According to Weisberg, the *Review* staff devoted 35 hours to checking facts and reactions.

But then came a letter from

the author, who had yet to see the staff's changes, saying "I will withhold the article until I can find a law review which will publish it without editing."

Weisberg was suspicious, for "nobody refuses publication because of suggested editing. All law review editors edit." There were, he reasoned, only two other law journals the author might pressure into publishing the article. "We lose articles only to the two (journals) at the top, Harvard and Yale."

Thus Weisberg discovered that Harvard had accepted the article the same day the author

had written Stanford, withdrawing the piece. While it was acceptable for authors to bargain their articles up to Stanford and Harvard, the two schools apparently do not like it when authors try to use such tactics against them.

"We talked it over with Harvard," Weisberg recalls, "and both of us decided not to publish it," regardless of the article's worth.

As Stanford's News Service put it, "Congress can sort of second-guess a Supreme Court justice, but nobody except a spouse can talk back to a top-flight law review editor."

IF YOU HAVE AMBITIOUS CAREER GOALS... AND ARE WILLING TO WORK HARD IN A DYNAMIC ORGANIZATION TO ACHIEVE THEM... YOUR "SOMEDAY" IS TODAY AT

OUR REPRESENTATIVES WILL BE INTERVIEWING ON CAMPUS FEBRUARY 1ST

Our concentration in the growth fields means we can offer you more opportunity to be a part of the action, because there is more action. We're thinking ahead in practically every segment of the computer and automation industries... with a range of products and services that respond to markets as broad as technology itself. Our goal is to make tomorrow's ideas today's realities to help people - and their organizations - become more productive through automation.

AVIONICS DIVISION - MINNEAPOLIS

Located in Minneapolis, the Avionics Division designs, develops and manufactures navigation, guidance and control systems, for aircraft, spacecraft, missiles, boosters and ships. It is a leader in development of aircraft instrumentation, aerospace computers and memories and computer automated test equipment for commercial and government application.

Primary needs of the Avionics Division are for BSEE or MSEE candidates for Development, Production and Field Application Engineering positions, and additional positions exist in real time mini-computer and microprocessor software development.

DEFENSE SYSTEMS DIVISION - MINNEAPOLIS

Located in suburban Hopkins, Minnesota, with facilities in San Diego, California, Keyport, Washington and St. Petersburg, Florida, the Defense Systems Division has over two thousand salaried employees of which a third are graduate engineers. Among the technologies involved are signal processing, acoustics, millimeter wave, micro processor design and application, digital and micro electronics, aerodynamics, hydrodynamics and systems engineering and analysis.

Primary needs are for BSEE and MSEE candidates although openings also exist

for BS Physics, BSME, MS Computer Science candidates in all engineering functions such as development, reliability and quality.

LARGE INFORMATION SYSTEMS DIVISION - PHOENIX

Located in Phoenix, the Large Information Systems Division (LISD) is involved with the product planning, design, development and manufacture of Honeywell's large-scale computer systems.

LISD is seeking BSEE and BS Computer Science candidates to fill software specialist and engineering positions in Software Development and Engineering. Also, there are a limited number of openings for BSEE and Computer Science candidates for the three year Advanced Engineering Program which includes graduate education toward advanced degrees.

RESIDENTIAL DIVISION - MINNEAPOLIS

Located in Minneapolis, the Residential Division designs, develops and manufactures electronic and electrical environment controls and control systems for homes, energy management systems for light commercial buildings, as well as life system devices such a solid state smoke detectors for the consumer market.

Primary Residential Division needs are for BSEE candidates for Development, Production and Quality Engineering positions.

Ask at your placement office to sign on our schedule and to obtain our brochure, or write to E.M. von Heimbürg, Manager of University Relations, HONEYWELL, INC. Honeywell Plaza, Minneapolis, MN. 55408. An Equal Opportunity Employer M/F.

\$100,000 Mitchell Prize for Original Ideas of Sustainable Growth Announced

Guidelines were announced recently for the 1979 Mitchell Prize, which offers \$100,000 in cash to individuals "demonstrating the highest degree of creativity in designing workable strategies to achieve sustainable societies."

The Mitchell Prize, established five years ago by George and Cynthia Mitchell of Houston, will be presented at the third Woodlands Conference on Growth Policies, which is scheduled for October 28-31, 1979, at The Woodlands, a new town near Houston.

One first place award of \$10,000 and eight awards of \$5,000 each will go to winners of an open competition which seeks to encourage "creative, constructive thinking about the nature of sustainable societies." Another \$50,000 will be

given for specially prepared papers on themes directly related to the agenda of the 1979 Woodlands Conference. These papers will be commissioned by the conference sponsors.

The Mitchell Prize is being administered by the University of Houston System, and winners will be selected by an independent panel of judges. The first round of judging will be based on written summaries of proposed entries, which may take the form of research, a scholarly paper, film, engineering drawing, working model, computer model, or any other appropriate medium. Maximum length of each summary, which must be in English, will be 2,500 words. Initial entries must be

Mrs. Delia M. Hunt (shown speaking) was honored by the College of Home Economics.

postmarked by February 28, 1979.

Background information, significant rules and applica-

tion forms — which must accompany all entries — are available from: Woodlands Conference, University of Houston, 312 C & O, Houston, Texas 77004.

Participation in the Mitchell Prize competition is being encouraged in more than 150 countries around the world. In addition to receiving cash awards, the winners will be invited to take part in the Woodlands Conference on Growth Policies, and their papers or entries will be included in publications that are expected to emanate from the October 1979 meeting. The conference is part of a ten-year series of international biennial assemblies aimed at stimulating research and discussion into problems associated with

Interested Zetas In The News

Interested Zetas are young ladies who desire to be members of the Zeta Phi Beta Sorority, Inc., Omega Gamma Chapter.

The club's purpose is to acquaint the members of the I-Z club with the ladies of Zeta Phi Beta Sor., and to raise

growing demands for the earth's available resources.

The conference is sponsored by the Aspen Institute for Humanistic Studies, University of Houston System, Center for Integrative Studies, and Mitchell and Development Corp., of which George Mitchell is chairman and president.

money for the pledge period. Recently, a dance was given to help promote the fund-raising effort.

Members of the I-Z club are: Judy Armstrong, jr., Elem. Ed. major from Houston; Robbi Brown, sr., electrical engineering major from Dallas; Lynn Byrd, soph., office administration major from Houston; Susan Carmon, soph., electrical engineering major from Houston; Nancy Carr, jr., sociology ed. major from Houston; Bobbi Calloway, jr., physical education major from Calvert; Claudia Emanuel, soph., electrical engineering major from

1979 Yearbook Activities Getting Underway

A large number of students answered the call for yearbook volunteer workers as an organizational meeting was held last week.

Special immediate emphasis is being given to special features, including campus queens and who's who. The project to select 'Most Beautiful' etc. is being put together also.

Campus organizations are being asked to register with the Publication Office and set schedules for group and individual photos.

Wesley Foundation —

Methodist Campus Ministry 1979 Spring Semester Offerings

Back to School Disco Party — Wednesday, January 17, 1979; 7:30 p.m., Upward Bound Building.

Weekly University Community Fellowship — each Wednesday, 9:00-12:30, Memorial Student Center #135; bite, drink, relax, and express concerns.

Mid-Week Inspiration Hour — Wednesday (weekly), 7:30 p.m., MSC #135 or otherwise announced.

Valentine Party — Wednesday, February 14, 7:30 p.m., MSC Ballroom or TBA

Spring Festival — TBA (late in March or April)

SEMINARS:

Love and Marriage — Tuesday (weekly), 4:00 p.m., MSC #135.

Book of Revelation — Wednesday (weekly), 4:00 p.m., MSC #135.

Work and Office of the Ministry (Persons desiring to enter the public professional Christian ministry — TBA — See the director).

RETREATS AND OTHER OPPORTUNITIES:

All campus spring retreat — Lakeview Methodist Assembly, Palestine, Texas, February 2-4. See director for details.

Sr. High Mid-Winter Camp Counselors — Lakeview, February 16-18 and 23-25. See director.

WORSHIP AND OUT REACH:

Regular Sunday Services: First United Methodist Church, ¼ mile east of the Freeze King on the PV-Waller Road. Sunday School 9:45-10:45 a.m. Morning worship 11:00-12:00 a.m.

Special Worship Services TBA, including outside visits.

All persons are invited and welcome to participate in any or all activities. It is called Methodist because it is supported by the United Methodist Church, but is for all persons. The director is available for you in what ever way he can be.

Director: The Reverend Darnell L. Walker, 202B Holley Hall, 3128, 2126, 3929.

Some other contact persons: Mr. Samuel Montgomery, 2627 (Adm. Bldg., B-2); The Reverend Reginald Garrett, 2514 (Adm. Bldg., Fiscal Office) Dr. I. C. Gordon, 4955, (Upward Bound Bldg.); The Reverend (Mrs.) Raye Lott Brown, 3036 (Sr. Fellow Banks Hall); The Reverend W. Van Johnson, 4410 (MSC 203, University Chaplain).

Journalism Scholarships Announced

The Ralph McGill Scholarship Fund offers scholarships for the 1979-80 school year of up to \$1,500 each to students with southern backgrounds who have completed at least two years of college, Jack Tarver, chairman of the Scholarship Fund, said today.

Tarver said May 1st is the deadline for applications. He said a number of scholarships

are awarded each year to students who have demonstrated a long-time interest in the news and editorial phase of newspapering.

Scholarships, he said, are limited to those young men and women whose roots lie in the south. Applicants must also convince the Awards Committee that they firmly intend to pursue a career in daily or

weekly newspapering. Tarver said the Awards Committee wants to give scholarships to those who are likely to become leaders in the newspaper field.

Successful applicants will be required to maintain a "B" average in order to keep the scholarship.

A letter of not more than 500 words telling why the applicant

wants a scholarship, together with a photograph of the applicant, must accompany each application. Applicants also must have a letter of recommendation from a college authority.

Application blanks may be obtained from: The Ralph McGill Scholarship Fund; Box 4689; Atlanta, Georgia 30302.

Live in Dallas.

The Southwest's largest and liveliest metropolitan area.

Discover all the glitter and glamour, spectacular sport and high fashion Dallas is famous for — yet an economical place to make a home. Cost of living is way below the urban U.S. average. And there's no state income tax. The country's 7th largest city has year-round sunshine plus lots of lakes and facilities to enjoy it. Dallas and surrounding area has 47 colleges, 50 hospitals, 2 major medical education and research institutions, and a wealth of major media and entertainment.

Interviewing on Campus

February 1

If unable to interview at this time, send resume to: Ruth Lodowski/Texas Instruments/P. O. Box 226015, M.S. 222/Dallas, Texas 75266.

MCAUTO PROGRAMMING CHALLENGES

The Programming Sciences area of McDonnell Douglas Automation Company has opportunities for college graduates with Bachelor or Master degrees in Computer Science, Mathematics, Physics and Engineering.

INTERACTIVE GRAPHICS SYSTEM DEVELOPMENT

Opportunities to design, implement and maintain state-of-the-art graphics applications for Business and Engineering on HP-3000 Mini-Computers, IBM 370 MVS/TSO, and CDC Cyber 175 Computer Systems.

REAL TIME APPLICATIONS PROGRAMMING

Opportunities to develop sophisticated systems software for mini-computer based systems and general purpose computers such as the IBM 370.

ENGINEERING PROGRAMMING APPLICATIONS

Develop and maintain Civil, Structural, and Mechanical Engineering software.

DATA-BASE APPLICATIONS CONSULTING

Work with prospective users of the System 2000 Data-Base Management System in the areas of application development, user training, documentation, and systems implementation.

MANAGEMENT CONTROL PROGRAMMING APPLICATIONS

Examples include developing critical path scheduling algorithms, resource allocation algorithms, and cost tracking methods.

SCIENTIFIC APPLICATIONS PROGRAMMING

Opportunities in Robotics to develop a control language, vision techniques, and control systems.

The McDonnell Douglas Representative will be at your campus on:

Monday

February 5, 1979

Make an appointment through your Placement Office to talk to us about your future, or send your resume to: T. P. Stiffler • College Relations Manager

"She's Just A Little Girl"

By Cheryl Y. Hackett

Note: Unwanted teenage pregnancy is a problem which is widespread throughout the United States. It can be a poignant experience with as many sentiments attached to it as there are people involved. In the short but moving narrative below, Cheryl Yvonne Hackett describes the scene of a young girl facing this problem.

As I strolled down the street upon which my childhood years had been spent, I noticed a little girl crying in her window, peering hopelessly at the vacant schoolyard across the street. Tired and hungry, I decided to sit and rest a while. Quietness and freshness seemed to dominate my senses as I approached the bench; only the rhythmic ticking of my watch would break the stillness surrounding me. Suddenly, a loud bell rang out and children

ran from several directions to form a line. Puzzled by their behavior, I decided to go and see what was going on. As I crossed the street I savored the aroma of delicious and highly seasoned food. Failing to get the attention of busy cafeteria workers, I went to the counter and settled for a sandwich, chips and some milk.

As I hurriedly walked back to the bench, I noticed that the little girl had come outside and was standing by a tall and beautiful oak tree. I was astonished to see the protrusion from the big, soft, flowered blouse that she wore. She was pregnant. Her complexion was healthy and glowing, highlighted by her rosy and blooming cheeks. Her dull-braided hair hung to her shoulders with bows and ribbons tied neatly around them. Her otherwise adolescent frame revealed that

she couldn't have been much more than 13 years old. I smiled and said hello. She looked up with her bloodshot eyes fixed, soft tears streaming and she saw misery. She stood there stoically; yet in her heart she knew she was adrift in a sea of trouble. The voice of someone calling and the sound of footsteps drew closer and closer. The squeaks from the door preceded an older woman's appearance on the porch. Her face was pale with tight, pinched wrinkles at each corner.

The little girl turned to look straight into her mother's cold, black eyes. "Come inside!" her mother demanded congenitally. Quickly but unassuredly she follow-her mother's path, frightened and confused about a condition which few people, young or old, seem to be able to cope with.

PHI DELTA KAPPA WORKSHOP — Dr. Jack Frymier, representative of the national PDK office conducted the workshop on Climate for Learning on January 15-16. A total of 35 persons participated including educators from five independent school districts and Houston Community College.

In Support of The Cagers

By Bennie Brown

With the arrival of the new year, new hopes and dreams for PVAMU's basketball team have also arrived, and the man who has the most dreams is Coach Elwood Plummer.

Although the season has not been fully satisfying for Coach Plummer and his basketball squad, he feels strongly that his team is as good as any team they've played all year. He sees better things ahead for his team in the near future.

Recently, I talked with the man who is considered by his peers to be a young and very intelligent coach.

Q. Are you proud of the way the Panthers are playing now?

A. At this particular time, I'm not real pleased with our playing, because I think we are a little lackadaisical on defense sometimes. And also we play good ball at times and other times we don't. So at this point, I would have to say that I'm not fully pleased with the way we are playing.

Q. Is there any chance the Panthers might win SWAC?

A. Well, I don't think there is any chance for us to win SWAC now, but we could come out in second or third place. And this is what we are striving for right now.

Q. Compare this year team to the previous teams you've coached at PVAMU.

A. I think this team is going to be a real fine team. I don't think that we have reached our potential yet. I'll have to say that the best team I've coached was the '75 team with Marvin Jackson at forward, Brooks at center and Butch Grant and Charles Gant at guards. However I feel that this years team has the potential to match 75s' team.

Q. Are there any stars on this team or are they all individuals playing together to win?

A. We don't look at any body as being a star. We try to play team ball and stress team effort, and to play together as a unit. We do have people who lead in various categories, for example, Larry Hagan and George Walker are leading in scoring, Melvin Smith and Al Reynolds are leading in rebounds and a couple of guys are leading in assists. So no, we don't have any stars. We play together as a unit.

Q. How do you get your players up for a game?

A. Well, we try to motivate our players through the team that we are playing, and we try to tell them how important this game means to them and they need to do to win.

Q. Are you pleased with the student support that the cagers

receive at home and away from home?

A. I'm pleased with the way that the students support us at home. We have a built-in audience and we are going to always have from four to five thousand fans at the game. But on our away games, I would like to have more support from the student body.

Q. Do you believe that the support of the fans could very well play a vital part in helping to make the athletic programs on campus a winner?

A. Yes, I believe that the students and faculty play an important part in building the players moral and giving the guys the upper hand to make

them play with alot of enthusiasm.

Q. Are there any other comments you would like to make?

A. I would like to let the fans know that the players and coaches appreciate your support very much. So keep on supporting us.

The U.S. plans to send and study teams to China in (1) pasture and range management (2) medicinal herbs, (3) horticulture (fruit culture), (4) multiple cropping, (5) water management, (6) forestry, (7) agriculture education.

Enter the World of Honeywell Avionics... It's more exciting than you can imagine.

Our Representatives will be on Campus February 1

As you read this today, the professionals at Honeywell Avionics are embarking on yet another series of challenging, stimulating projects crucial to our government and commercial airline space and advanced aviation programs.

At one time or another, each of our employees searched - just as you are - for a similarly professional environment conducive to progressive, innovative thinking and receptive to the strong individual. Over the years, Honeywell Avionics has consistently fostered just such a constructive environment.

Today, we are proud to offer you more of these kinds of opportunities...growth positions that will enable us, and you...to continue moving ahead.

Our business is located in the culturally and commercially sophisticated environment of Minneapolis and St. Paul. A healthy blend of understated midwestern friendliness and metropolitan vigor, Minnesota's synthesis of forests, lakes and people offer an exceptional quality of life.

If your ambitious career goals include a corporation posture to remain a leader, your future can begin at Honeywell Avionics. We have immediate openings for qualified BSEE, MSEE, BSME, BSIE and Computer Science Engineering Graduates in the areas of:

- Design Engineering,
- Software Engineering
- Production Engineering,
- Quality Engineering
- Field Engineering

We are also seeking, accounting and business administration graduates.

Panthers Drop Jarvis College

Boost Season Record to 9-8

Senior guard Larry Hagan scored 30 points to lead Prairie View A&M University to a convenient 112-98 win over Jarvis Christian College Thursday at the Prairie View Little Dome.

The win boosted the Panthers' record to 9-8 in overall competition and 2-4 in conference play. The loss gave Jarvis an overall record of 6-14.

The Panthers jumped out to a ten-point lead in the first quarter which set the stage for the game's outcome. Other than a second quarter rally which had Jarvis within two points of Prairie View, the east Texas team never posed a viable threat to Prairie View and trailed the Panthers throughout the game.

Taking advantage of excessive fouling in the first half, Prairie View made roughly 85 percent of their free throws which helped them to a 47-43 lead at halftime.

At the start of the second half, Hagan dispelled most hopes of a Jarvis rally after tallying 14 points before the first five minutes had elapsed.

Jarvis' Anthony Suttles and Donnie Alexander together scored 40 points but Jarvis' mediocre 60 per cent free throw showing and ever-pressing Panther defense marred their chances for a victory.

HELP WANTED

Addressers Wanted Immediately! Work at home — no experience necessary — excellent pay. Write American Service, 8350 Park Lane, Suite 269, Dallas, TX 75231.
