# ImAc Project

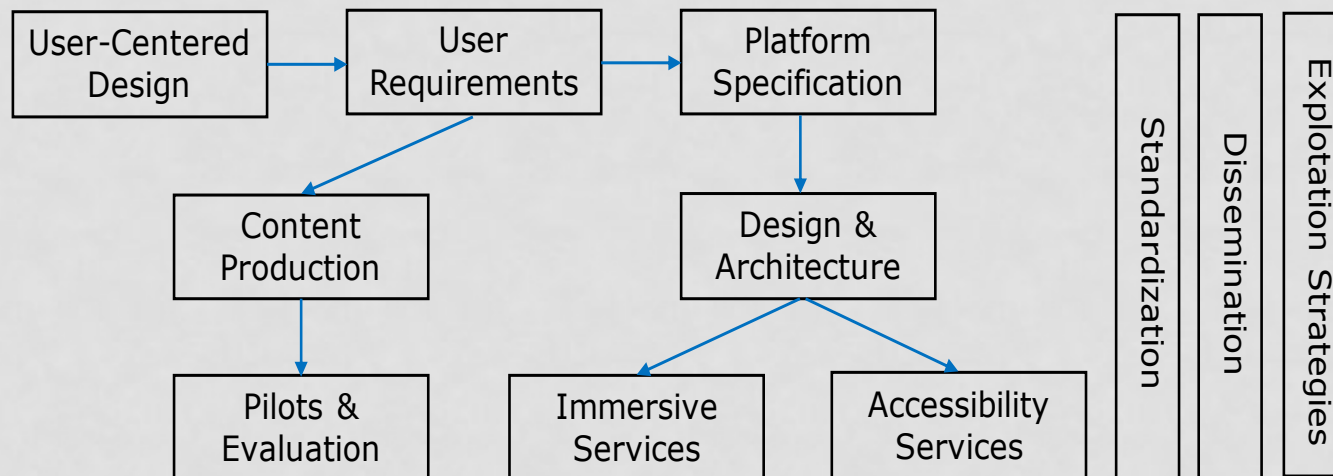

- **European Project**, funded by **H2020** program:
  - <http://www.imac-project.eu/>
- How to **efficiently integrate accessibility** within immersive media
  - Omnidirectional Audio and Video, VR
  - Services: (audio) **subtitling, audio description, sign language**
  - Assistive technologies (guiding mechanisms, augmentation, voice recognition, AI...)
  - Media Processing Techniques
- **Personalized** Services, based on needs / preferences
- Compliance with current technologies and **standards**

# ImAc Project

- **User-Centric Methodology:**
  - 1) requirements gathering
  - 2) development and integration
  - 3) validation and dissemination

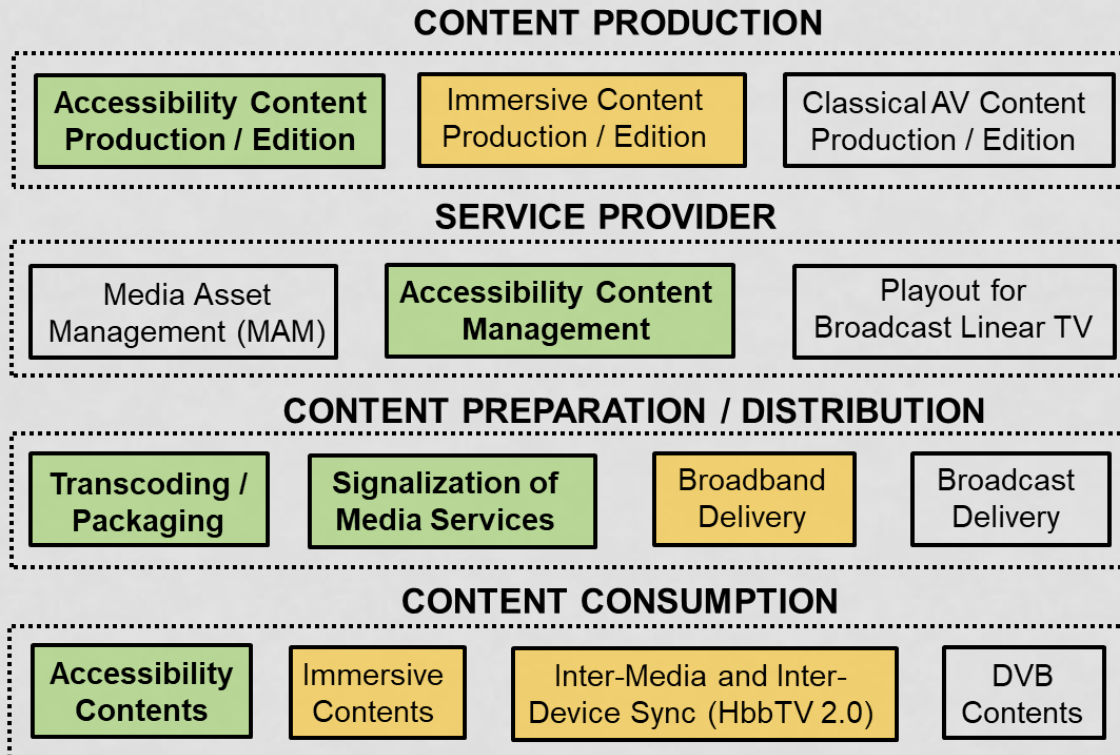

# Aims

- **Requirements** to enable truly inclusive + accessible media services?
- How current (immersive) technologies and systems can be augmented in order to **seamlessly integrate** and support accessibility services?
- How to **simultaneously manage** (all?) accessibility services?
- What **personalization** features should be provided in order to meet particular users' needs and/or preferences?
- What kind of **assistive technologies** should be adopted?
- Which **presentation modes** for accessibility contents are better suited in the envisioned scenarios?
- What are the **comfortable viewing fields** for accessibility contents, especially when using HMDs?
- **User Interface** and **Interaction Features**?

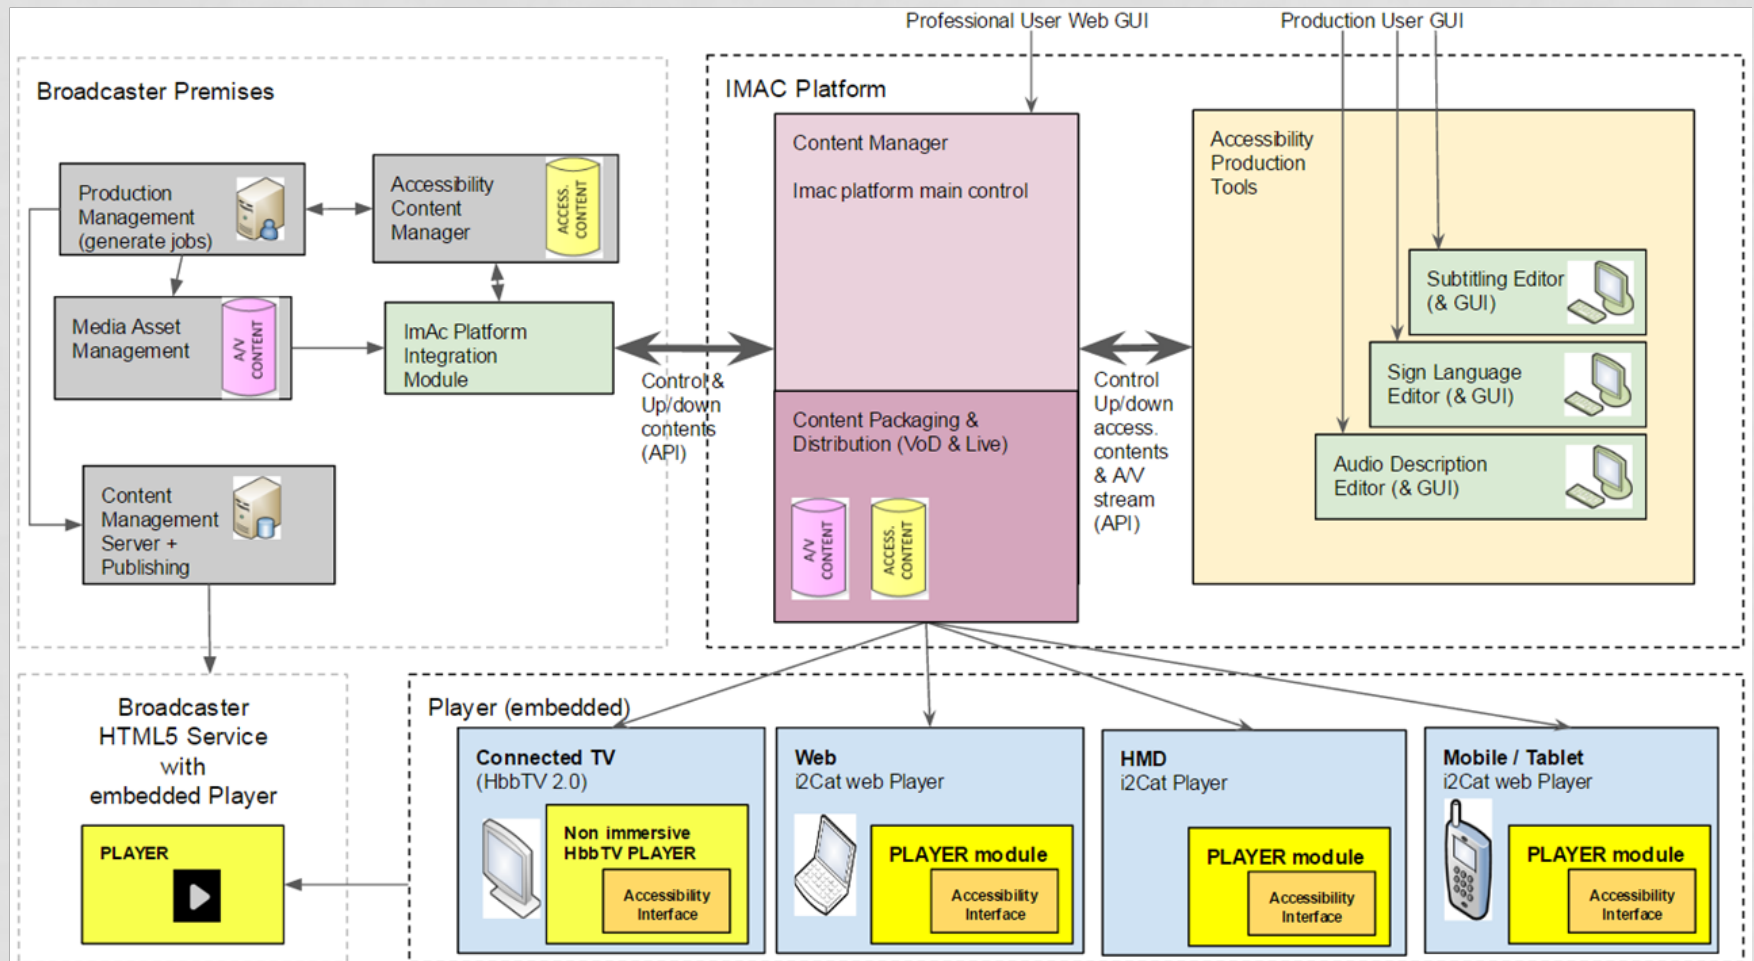

# End-to-End Platform

- Modules Overview:

# End-to-End Platform

- Components Overview:

# End-to-End Platform

- **ImAc Production /Editing Tools:**
  - Editors for Subtitling, Audio Description and Sign Language in 360° videos
  - Metadata Models + Signaling
- Accessibility Content Manager (ACM)

The screenshot displays the ImAc Accessibility Content Manager (ACM) interface. At the top, there is a navigation bar with the ImAc logo, a 'Task List' tab, and user profile icons (SM, CM, ED, PU) along with 'Version 24'. Below the navigation bar is a search and filter section with a search input field, a 'File type' dropdown, a 'Language' dropdown, a 'View finished' toggle, and several icons for file management. The main content area shows a list of video cards, each representing a video entry. The first card is titled 'Crystal Shower Falls' and has a yellow header. The other three cards are titled 'hola', 'Liceu', and 'Test contingut Polonia ST' and have grey headers. Each card displays a video thumbnail, an ID, a language dropdown, a status dropdown, and a filename. An 'Edit' button with a pencil icon is located at the bottom of each card.

ID	Language	Status	Filename
295	English	In prc	295_Crystal_Shower_Falls_en_20180718-125122.xml
297	English	Pend	297_hola_en_20180716-113353.xml
157	Spanish	Pend	LICEU_CAST_20180614-115654.xml
239	Spanish	Pend	239_Test_contingut_Polonia_ST_de_VOG_20180627-162708.ad

# End-to-End Platform

- **ImAc Player:**
  - Media Layers
    - Traditional Media
    - Immersive / Omnidirectional Media
    - Accessibility Services
  - User Interface + Interaction Features
    - Traditional + Low-Sighted Menu
    - Universal Accessible (Text-based) Icons
    - Personalization Features
  - Assistive Technologies
    - Voice Recognition + Control
    - Magnification
    - Media Processing Techniques
  - Integration with current standards / techs
    - Web-based tech and formats (DASH, IMSC)
    - HbbTV 2.0.1 (Multi-Screen Scenario)

## DISCOVERY & ASSOCIATION & APP LAUNCHING (Ad-hoc + HbbTV 2.0 Solutions)

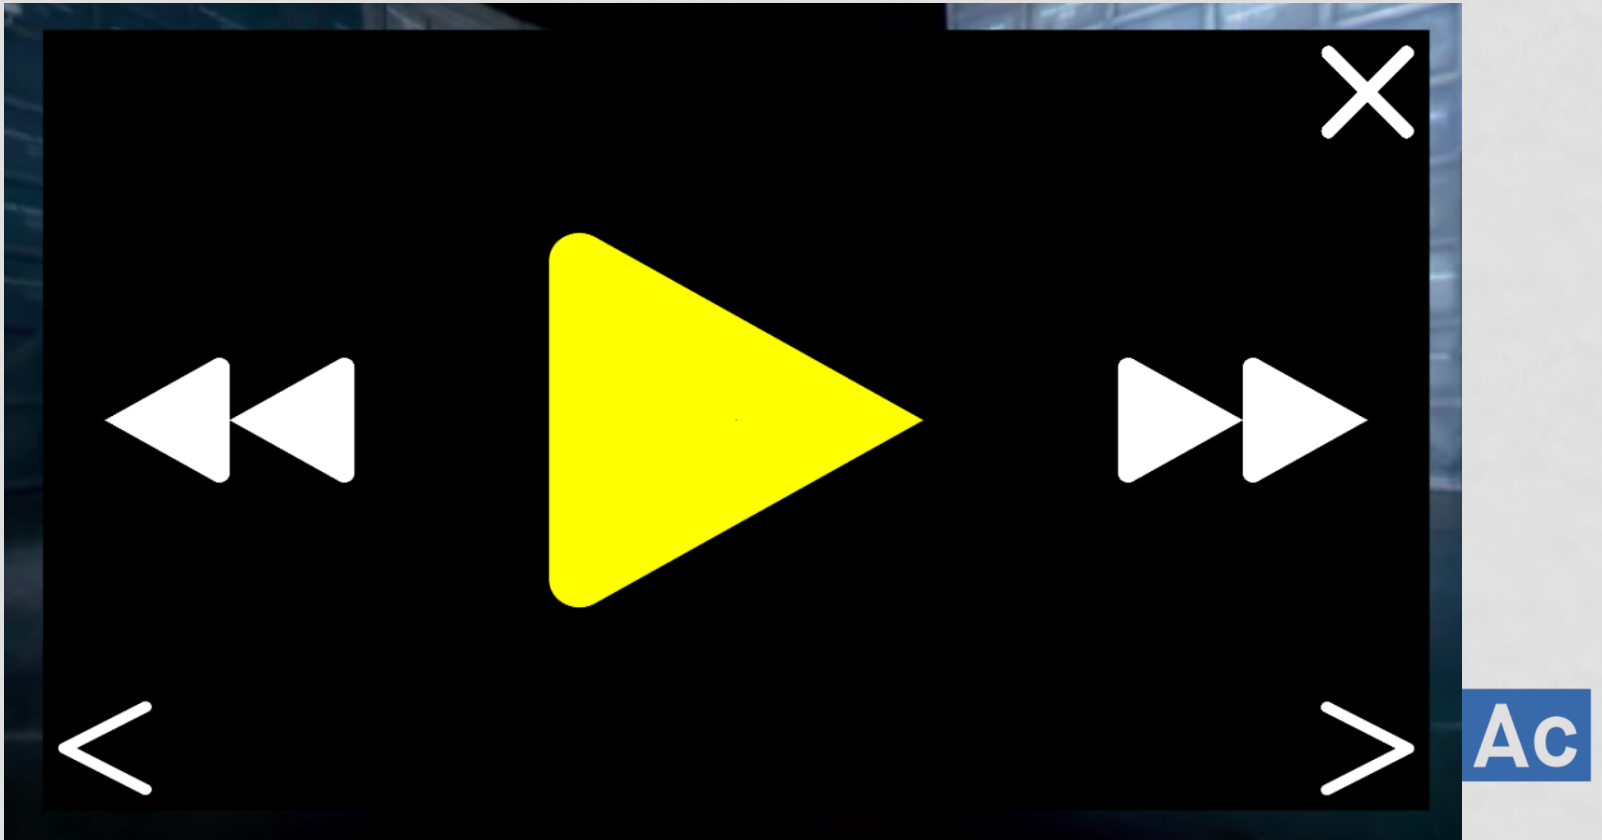

# End-to-End Platform

- ImAc Player – Traditional UI

# End-to-End Platform

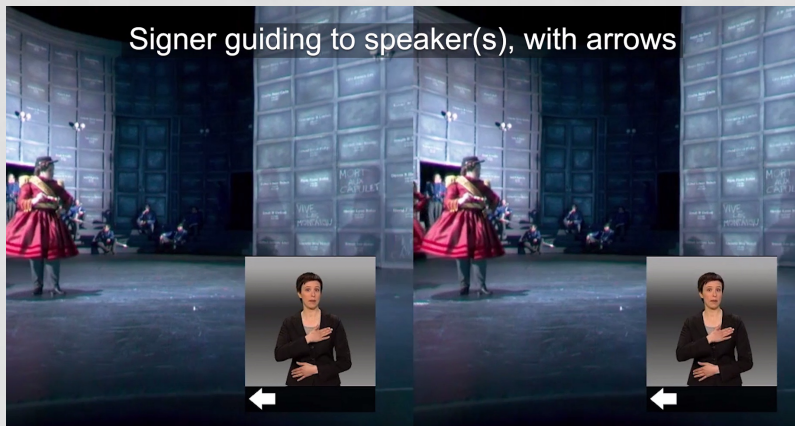

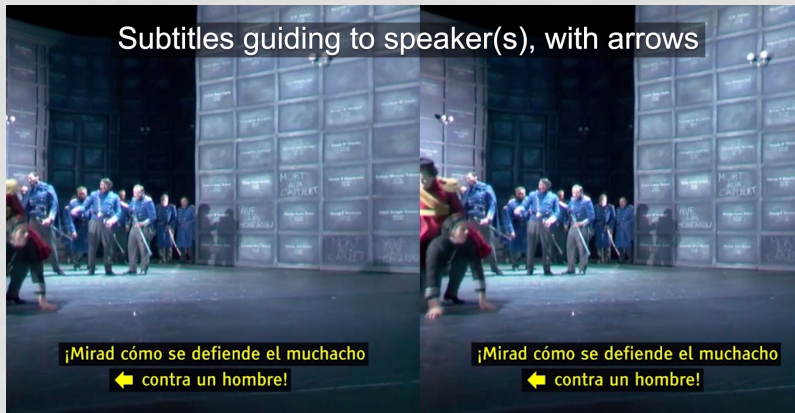

- ImAc Player – Low-Sighted UI

# End-to-End Platform
