## INSPECTION OF COMMERCIAL FEEDING-STUFFS

---

### The Feeding Stuffs Law.

---

An Act to Regulate the Sale of Concentrated Commercial Feeding Stuffs enacted by the New Hampshire legislature of 1901 and amended by the legislature of 1915 authorizes the Commissioner of Agriculture, Mr. Andrew L. Felker, to direct an annual collection of samples of Commercial Feeding Stuffs offered for sale in the State and to have these samples analyzed at the New Hampshire Agricultural Experiment Station.

A copy of this law follows:-

### STATE OF NEW HAMPSHIRE

CHAPTER 35, SESSION LAWS OF 1901, AS AMENDED BY CHAPTER 195, SESSION LAWS OF 1911, AND CHAPTER 174, SESSION LAWS OF 1915.

---

### An Act to Regulate the Sale of Concentrated Commercial Feeding-Stuffs.

SECTION 1. Every manufacturer, company, or person, who shall sell, offer or expose for sale or for distribution in this State any concentrated commercial feeding-stuff used for feeding farm live-stock, shall furnish with each car or other amount shipped in bulk and shall affix to every package of such feeding-stuff, in a conspicuous place on the outside thereof, a plainly printed statement clearly and truly certifying the number of net pounds in the package sold or offered for sale; the name or trademark under which the article is sold, the name of the manufacturer or shipper, the place of manufacture, the place of business, and a chemical analysis stating the minimum percentages only which it contains of crude protein (allowing one per centum of nitrogen to equal six and one-fourth per centum of protein), the minimum percentage only of carbo-hydrates, the minimum percentage only of crude fat, and the maximum percentage only of crude fibre, each constituent to be determined by the methods prescribed by the Association of Official Agricultural Chemists.

And shall state in bold type upon the container or a tag attached thereto, if a compounded feed, the names of the several ingredients therein contained. Whenever any feeding-stuff is sold at retail, in bulk, or in packages belonging to the purchaser, the agent or dealer, upon request of the purchaser, shall furnish to him the certified statement named in this section.

SECT. 2 The term "concentrated commercial feeding-stuffs," as used in this act, shall include linseed meals, cottonseed meals, pea meals, coconut meals, gluten meals, gluten feeds, maize feeds, starch feeds, sugar feeds, dried brewer's grains, malt sprouts, hominy feeds, cerealine feeds, rice meals, oat feeds, corn and oat chops, wheat, rye, and buckwheat bran and middlings, ground beef, or fish scraps, mixed feeds and all other materials of similar nature; but shall not include hay, straw, and whole seed, nor the unmixed meals made directly from the entire grains of wheat, rye, barley, oats, Indian corn, broom corn, and buckwheat.

SECT. 3. Before any manufacturer, company or person shall sell or offer for sale in this state any concentrated commercial feeding-stuffs, he or they shall, for each and every feeding-stuff bearing a distinguishing name or trademark, file annually during the month of December with the commissioner of agriculture a certified copy of the statement specified in the preceding sections, said certified copy to be accompanied, when the commissioner shall so request, by a sealed glass jar or bottle containing at least one pound of the feeding-stuff to be sold or offered for sale, and the company or person furnishing said sample shall thereupon make affidavit that said sample corresponds within reasonable limits to the feeding-stuff which it represents in the percentage of protein, carbohydrates, fat and crude fibre which it contains.

SECT. 4. Each manufacturer, importer, agent, or seller of any concentrated commercial feeding-stuffs, shall pay annually during the month of December to the commissioner of agriculture an analysis fee of fifteen dollars for each brand offered for sale within the state. Whenever a manufacturer, importer, agent, or seller of concentrated commercial feeding-stuff desires at any time to sell such material and has not paid the analysis fee therefor in the preceeding month of December, as required by this section, he shall pay the analysis fee prescribed herein before making any such sale. The amount of analysis fees received by said secretary pursuant to the provisions of this section shall be paid by him to the treasurer of the State of New Hampshire. The treasurer of the State of New Hampshire shall pay from such amount when duly approved the moneys required for the expense

incurred in making the inspection required by this act and enforcing the provisions thereof. The commissioner of agriculture shall report annually to the governor and council the amount received pursuant to this act and the expense incurred for salaries, laboratory expenses, chemical supplies, traveling expenses, printing, and other necessary matters. Whenever the manufacturer, importer, or shipper of concentrated commercial feeding-stuffs shall have filed the statement required by Section 1 of this act and paid the analysis fee as prescribed in this section, no agent or seller of such manufacturer, importer, or shipper shall be required to file such statement or pay such fee.

SECT. 5. The commissioner of agriculture shall annually cause to be analyzed at the New Hampshire College Agricultural Experiment Station at least one sample, to be taken in the manner hereinafter prescribed, of every concentrated commercial feeding-stuff sold or offered for sale under the provisions of this act. Said commissioner shall cause a sample to be taken not exceeding two pounds in weight, for such analysis, from any lot or package of such commercial feeding-stuff which may be in the possession of any manufacturer, importer, agent, or seller in this State. Said sample shall be drawn in the presence of the parties in interest, or their representatives, and taken from a parcel or a number of packages, which shall not be less than ten per cent. of the whole lot sampled, and shall be thoroughly mixed, and then divided into two equal samples and placed in glass vials and carefully sealed, and a label placed on each stating the name of the party from whose stock the sample was drawn and the time and place of drawing, and said label shall also be signed by the person taking the sample and by the party or parties in interest, or their representatives, at the drawing and sealing of said samples. One of said duplicate samples shall be retained by the commissioner and the other by the party whose stock was sampled, and the sample or samples retained by the commissioner shall be for comparison with the certified statement named in section 3 of this act. The result of the analysis of the sample or samples so procured, together with such additional information as circumstances advise, shall be promptly published in reports of bulletins by the commissioner of agriculture or by the New Hampshire College Agricultural Experiment Station, as the governor and council may determine.

SECT. 6. Any manufacturer, importer, or person who shall sell, offer, or expose for sale or for distribution in this state any concentrated commercial feeding-stuff, without complying with the requirements of this act, or any feeding-stuff which contains substantially a smaller percentage of the constituents than are certified to be contained, shall, on conviction in a court of com-

petent jurisdiction, be fined not more than one hundred dollars for the first offense, and not more than two hundred dollars for each subsequent offense.

SECT. 7. Any person who shall adulterate any kind of meal or ground grain with milling or manufacturing offals, or any other substance whatever, for the purpose of sale, unless the true composition, mixture, or adulteration thereof is plainly marked or indicated upon the package containing the same or in which it is offered for sale; or any person who knowingly sells, or offers for sale, any meal or ground grain which has been so adulterated unless the true composition, mixture, or adulteration is plainly marked or indicated upon the package containing the same, or in which it is offered for sale, shall be fined not less than twenty-five or more than one hundred dollars for each offense.

SECT. 8. Whenever said commissioner becomes cognizant of the violation of any of the provisions of this act he shall prosecute the party or parties thus reported, but it shall be the duty of said commissioner, upon thus ascertaining any violation of this act to forthwith notify the manufacturer, importer, or dealer in writing, and give him not less than thirty days thereafter in which to comply with the requirements of this law; but there shall be no prosecution in relation to the quality of any concentrated commercial feeding-stuff if the same shall be found substantially equivalent to the certified statement named in section three of this article.

SECT. 9. This act shall take effect upon its passage.

### Objects of the Law.

The principal objects of this law are:-

1. To protect the purchasers of feeding stuffs against the adulterated, misbranded, and inferior feeds of the unscrupulous manufacturer.
2. To protect the honest manufacturer and seller of good quality feeding stuffs against the unfair competition of the dishonest manufacturer and seller of inferior feeds.
3. To furnish purchasers with information which will enable them to distinguish between good quality and poor quality feeding stuffs, between reliable and unreliable manufacturers, agents and dealers, and to promote the intelligent and economical purchase and use of feeds.

### The Sliding-Scale or Double Guarantee.

There is one provision of this law still being violated by a few manufacturers which can no longer be tolerated; namely,

the use of the double or sliding-scale guarantee. The law definitely states that the minimum percentage only of protein, fat and carbohydrates shall be printed in the guarantee. When a manufacturer prints a guarantee, for example, of 35-50% protein—a spread of 15%—knowing that this particular brand will probably fall below the minimum guarantee of 35% in as many samples as it will analyze as much as three per cent above 35%, he is attempting to deceive the consumer by making it appear that he may get 50% protein where he has hardly a chance of getting more than 38% and may not even get 35%. The purpose of the law requiring the minimum guarantee only is to prevent such deception; and the sale of any feed as represented to contain more than its minimum guarantee is fraudulent and illegal.

### The Misleading Brand Name.

Another deception of a few manufacturers, particularly the manufacturers of proprietary or compounded feeds which the consumer is warned to guard against is the misleading brand name of the feed. In buying feeds the purchaser should consider the percentage of protein, the percentage of fat and the percentage of total carbohydrates, less the percentage of crude fiber, in connection with the price of the feed per ton or per hundred pounds. An examination of the brand names and the analyses in the following pages will show several attempts at deception by the manufacturer by giving to a feed low in protein and fat a name indicating that it has unusual feeding value.

The Inspector, Mr. Eugene D. Sanborn, visited nearly every town in the State and collected samples of 306 different brands. These samples were analyzed with the assistance of Mr. P. Bruce Place. The following classification, alphabetically arranged, is the one under which the respective feeds were offered for sale by the dealers.

### Alfalfa Meals.

Two samples of alfalfa meal were analyzed. These feeds average to contain 15.34% protein, 1.81% fat, and to retail at \$2.46 per one hundred pounds. One hundred per cent of these feeds equalled or exceeded the manufacturer's guarantee in both protein and fat.

### Barley Feeds.

Seven samples of barley feeds were analyzed. These feeds averaged to contain 10.30% protein, 2.77% fat, and to retail at \$2.80 per one hundred pounds. Eighty-six per cent of these feeds equalled or exceeded the manufacturer's guarantee in both protein and fat.

### Beet Pulps.

Three samples of beet pulps were analyzed. These feeds averaged to contain 8.66% protein, 0.35% fat, and to retail at \$2.81 per one hundred pounds. One hundred per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and thirty-three per cent his fat guarantee.

### Calf Meals.

Four samples of calf meals were analyzed. These feeds averaged to contain 24.85% protein, 5.99% fat, and to retail at \$5.22 one hundred pounds. Fifty per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and seventy-five per cent his fat guarantee.

### Compounded Feeds.

Forty-five samples of compounded feeds were analyzed. These feeds averaged to contain 10.85% protein, 4.41% fat, and to retail at \$3.07 per one hundred pounds. Sixty-six per cent of these feeds equalled or exceeded the manufacturer's guarantee in both protein and fat.

### Cottonseed Meals.

Twenty-three samples of cottonseed meals were analyzed. These feeds averaged to contain 33.14% protein, 6.17% fat, and retail at \$3.37 per one hundred pounds. Sixty-five per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and ninety-six per cent his fat guarantee.

### Dairy Feeds.

Twenty-five samples of dairy feeds were analyzed. These feeds averaged to contain 22.13% protein, 5.43% fat, and to retail at \$3.37 per one hundred pounds. Sixty-five per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and ninety-two per cent his fat guarantee.

### Distillers' Grains.

Two samples of distillers' grains were analyzed. These feeds averaged to contain 15.94% protein, 6.08% fat, and to retail at \$2.80 per one hundred pounds. Fifty per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and one hundred per cent his fat guarantee.

### Flaxseed Meals.

Eight samples of flaxseed meals were analyzed. These feeds averaged to contain 34.52% protein, 6.91% fat, and to retail at \$3.35 per hundred pounds. One hundred per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and eighty-eight per cent his fat guarantee.

### Gluten Feeds.

Eight samples of gluten feeds were analyzed. These feeds averaged to contain 23.90% protein, 3.39% fat, and to retail at \$3.31 per one hundred pounds. Twelve per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and eighty-eight per cent his fat guarantee. The fact that so large a per cent of this year's gluten feeds failed to meet the manufacturer's guarantee is doubtless due to the inferior quality of the 1917 corn crop.

### Hominy Feeds.

Nine samples of hominy feeds were analyzed. These feeds averaged to contain 10.19% protein, 5.84% fat, and to retail at \$3.22 per one hundred pounds. Eighty-nine per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and seventy-eight per cent his fat guarantee.

### Molasses Feeds.

Ten samples of molasses feeds were analyzed. These feeds averaged to contain 13.49% protein, 4.77% fat, and to retail at \$3.00 per one hundred pounds. Ninety per cent of these feeds equalled or exceeded the manufacturer's guarantee both of protein and fat.

### Peanut Feeds.

Three samples of peanut feeds were analyzed. These feeds averaged to contain 30.76% protein, 7.42% fat, and to retail at \$3.15 per one hundred pounds. Thirty-three per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and one hundred per cent of his fat guarantee.

### Poultry Feeds.

Thirty-nine samples of poultry feeds were analyzed. These feeds averaged to contain 22.70% protein, 6.36% fat, and to

retail at \$4.72 per one hundred pounds. Forty-nine per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and 95 per cent his fat guarantee.

### Rye Feeds.

Five samples of rye feeds were analyzed. These feeds averaged to contain 15.59% protein, 3.52% fat, and to retail at \$2.90 per one hundred pounds. Eighty per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and one hundred per cent his fat guarantee.

### Wheat Feeds.

One hundred and five samples of wheat feeds were analyzed. These feeds averaged to contain 15.88% protein, 4.68% fat and to retail at \$2.84 per one hundred pounds. Eighty-eight per cent of these feeds equalled or exceeded the manufacturer's protein guarantee and ninety-three per cent his fat guarantee.

## Analyses of Commercial Feeding Stuffs.
