This volume contains research presented at the third annual meeting of the Society for Computation in Linguistics (SCiL), held online, February 14-19, 2021, in conjunction with the annual meeting of the Linguistic Society of America.

Research was submitted to be reviewed either in the form of a paper, or as an abstract. The oral presentations, or talks, at the conference included both papers and abstracts. Authors of accepted abstracts were given the option of publishing an extended version; these follow the papers in this volume.

In total, we received 84 submissions to the conference, 37 abstracts and 47 papers. 25 submissions were selected for oral presentation (~30%) and 43 for poster presentation (~51%).

We thank our reviewers for their indispensable help in selecting the research for presentation at the conference:
