How to safely connect with family and friends during the COVID-19 pandemic

5G IS COVID FREE

What is 5G?

- 5G is the new cellphone connection. It's just as safe as the cellphone reception you had before, only faster!
- Research shows 5G causes no health concerns with COVID

What can cause the spread of COVID-19?

- You can spread it by breathing even if you feel healthy
- It can be spread from sneezes, coughs, or just talking
- Reduce spread by wearing masks in public and social distancing

Is it safe to connect with family over 5G?

- Use apps like Google Duo, Facebook Video Chat, or Zoom to connect face to face
- Now more than ever it's important to stay connected to loved ones!
