Funding This project received funding from the European Society of Intensive Care Medicine (ESICM), the Flemish Society for Critical Care Nurses, and the HOGENT Fund for Applied Research. SB holds a research mandate from the Special Research Fund at Ghent University. In the UK, infrastructure support was provided by the National Institute for Health Research (NIHR) Imperial Bio-medical Research Centre (BRC). The views expressed are those of the authors and not necessarily those of the NHS, the NIHR or the Department of Health and Social Care. LR was funded by a TD Nursing Professorship in Critical Care Research from

Sunnybrook Research Institute, Toronto, Canada. The ESICM financed and co-administered the online data collection platform, provided a study webpage, and supported study administration. The other funding sources had no role in this work.
