GRADING FUNCTIONAL CLASS CAPACITY AT TIME OF STUDY ACCORDING TO
NEW YORK HEART ASSOCIATION

NYHA Class I = Patients with cardiac disease but without limitation of physical activities. Ordinary physical activity does not cause fatigue, dyspnoea or palpitations.

NYHA Class II = Patients with cardiac disease resulting in slight limitation of physical activity. Ordinary physical activity results in fatigue, dyspnoea, palpitations.

NYHA Class III = Patients with cardiac disease resulting in marked limitation of physical activity. Less than ordinary physical activity leads to symptoms

NYHA Class IV = Patients with cardiac disease resulting in inability to carry out any physical activity without discomfort.
