## **ABSTRACT**

The main aim of this study was to apply the Information, Motivation and Behavioural Skills (IMB) model in a school-based programme for the reduction of HIV-risk behaviour among adolescents in South Africa. The study also aimed at evaluating the effectiveness of the model in improving levels of information, motivation to act upon the information, and imparting behavioural skills aimed at reducing HIV-risk behaviour in high school adolescent learners.

Prior to the main study, a preliminary study was conducted to identify existing and prior intervention initiatives targeting HIV-risk behaviour within the schools in Alexandra township, Johannesburg. This was a qualitative study in which participating learners from two secondary schools reported on the HIV and AIDS education they were exposed to prior to the main study and intervention. The study sample consisted of 259 Grade 11 learners of which 123 were from School 1 (ES) and 136 from School 2 (CS). The findings from the preliminary study indicate that, while much HIV/AIDS education was done through the LoveLife campaigns, important gaps still existed in the levels of HIV/AIDS information, motivation and behavioural skills among the learners in the participating schools.

The main study was quantitative in nature, and involved the same sample as the preliminary study. Data was collected with the use of a questionnaire adapted from the Teen Health Survey instrument. School 1 (ES) was the Experimental group, while School 2 (CS) was the Control group. A baseline assessment (Time 1) was conducted at both schools.

This assessment was followed by a 3-week HIV/AIDS intervention programme at School 1 (ES) which focused on HIV/AIDS information, motivation and behavioural skills. A post-test (Time 2) was carried out at both schools. The intervention at School 1 (ES) was then repeated at School 2 (CS). This was followed by another post-test (Time 3) at both schools. A final test (Time 4) was done at both schools. This was followed by another post-test (Time 3) at both schools. A final test (Time 4) was done at both schools.

Data was analyzed using repeated measures ANOVA including univariate ANOVA and paired *t*-tests. The results show significant increases in information across time for both schools. However, while there was clear change, it was not directly linked to the intervention. Overall estimates for all three variables, for instance, indicate that the mean scores at School 2 (CS) rose at Time 2, despite the absence of the intervention between Times 1 and 2 at that school. The fluctuating pattern of mean scores further attests to the deviation of the mean scores from the hypothesized pattern. In some of these fluctuations, the results showed the same trend for both groups, irrespective of the difference in the timing of the intervention.

It is recommended, among other things, that when applied in the South African context, the IMB model should be used along with other HIV/AIDS prevention strategies to incorporate the social, cultural, economic and other structural challenges faced by learners.

## **DECLARATION**

I declare that this thesis is my own unaided work. It is submitted for the degree of Doctor of Philosophy at the University of the Witwatersrand, Johannesburg. It has not been submitted before for any other degree or examination at any other university.

## **ACKNOWLEDGEMENTS**

I wish to express my indebtedness to the people who helped me carry out this study.

- My heartfelt gratitude first goes to Dr Mambwe Kasese-Hara, my supervisor, who, through her genuine and personal interest in my success, gave me all the professional advice and expert guidance throughout this study.
- My sincere thanks goes to Michael Greyling, who, through his statistical background, rendered excellent support when I was analysing my data. I also wish to thank Noleen Pillay, who, despite her busy commitments, spared moments to assist me in the statistical part of my study.
- I wish to also sincerely thank Professor Ruksana Osman, Head of Wits School of Education, for her determination and commitment in ensuring that all obstacles were removed in my study towards a PhD. Her genuine interest and continuous support in my effort to get this qualification was second to none.

- I am also indebted to the Transformation Office at the University of the Witwatersrand which, through its Carnegie Grant, made it possible for me to take ‘Time-off’, for a certain period of time during my study. The influence of Hugo Canham (in that office) is much appreciated.
- My sincerest thanks go to the principals, Life Orientation educators and learners at Kwa-Bhekilanga and East Bank High schools in Alexandra township, Johannesburg, South Africa. Their co-operation and participation in this study is particularly noted and highly appreciated.
- I am particularly grateful to my wife, Jacqueline, whose love and patience towards me, made her to contend with my continuous absence from home, sometimes being away in my office till the late hours of the night, working on my thesis. Her sweet voice, “How far did you go today?”, when I came home each day, will forever ring in my ears when I think of her support for my study.
- Last, but not least, my thanks also go to my children, Prince, Nontokozi, Thembisile and Zibusiso, for their continual social and emotional support for my study. Their often-expressed desire for a daddy with a PhD qualification, kept them asking, “When are you finishing?” Their question motivated me to carry on with even greater zeal and determination.

3.4 Super and Harkness' Developmental Niche .....	33
3.5 Conclusion .....	34

## **CHAPTER FOUR – THEORIES OF BEHAVIOURAL CHANGE**

4.1 Introduction .....	35
4.2 Theory of Planned Behaviour .....	35
4.3 AIDS Risk Reduction Model .....	37
4.4 Information, Motivation and Behavioural Skills (IMB) Model .....	39
4.5 Empowerment of Adolescents through the IMB Model .....	41
4.5.1 Empowerment through HIV/AIDS Information .....	42
4.5.2 Empowerment through Motivation .....	42
4.5.3 Empowerment through Behavioural Skills .....	43
4.6 Conclusion .....	44

## **CHAPTER FIVE - METHODOLOGY AND DESIGN**

5.1 Introduction .....	45
5.2 Preliminary Study .....	45
5.3 Main Study .....	46
5.3.1 Research Design .....	46
5.3.2 Setting .....	46
5.3.3 Research Sample and Sampling Procedure .....	50
5.3.4 Data Collection .....	50
Pretest (Schools 1 and 2) Baseline Assessment .....	53
Intervention: School 1 (ES) and School 2 (CS) .....	53
5.4 Outcome Measures .....	55
5.4.1 Measures of HIV Information .....	56
5.4.2 Measures of Motivation .....	56
5.4.3 Measures of Behavioural Skills .....	58

5.5 Method of Data Collection .....	59
5.5.1 Biographical Information of Participating Grade 11 Learners .....	59
5.5.2 Research Instrument: The Teen Health Survey .....	59
5.5.3 Data Analysis .....	59
5.5.4 Standardization, Reliability and Validity .....	60
5.6 Procedures .....	61
5.7 Ethical Considerations .....	62
5.8 Conclusion .....	63

## **CHAPTER SIX - RESULTS: PRELIMINARY STUDY**

6.1 Overview .....	64
6.2 Results on Preliminary Study .....	64
6.3 Further Data Collection: loveLife Programme .....	74
6.3.1 Interview with the loveLife Regional Trainer (Summary of loveLife Initiatives) .....	74
6.3.2 loveLife on HIV/AIDS Information, Motivation and Behavioural Skills ...	77
6.4 Discussion .....	80
6.5 Conclusion .....	82

## **CHAPTER SEVEN - RESULTS: MAIN STUDY**

7.1 Overview .....	84
7.2 Biographical Information .....	84
7.2.1 Gender .....	87
7.2.2 Age .....	87
7.2.3 Language .....	88
7.2.4 Who Learners Live With .....	89
7.2.5 Parental Education .....	90
7.2.6 Household Income .....	91

7.4 Repeated Measures ANOVA and Mean Estimates: HIV/AIDS Information ...	94
7.4.1 Multivariate tests: HIV/AIDS Information .....	95
7.4.2 Test of Assumptions: HIV/AIDS Information .....	96
7.4.3 Univariate tests: HIV/AIDS Information .....	97
7.4.4 Paired t-tests of Mean Estimates: HIV/AIDS Information .....	101
7.5 Findings on HIV/AIDS information .....	111
7.5.1 Introduction .....	111
7.5.2 Pre-intervention levels of HIV/AIDS information: School 1 (ES) .....	113
7.5.3 Pre-intervention levels of HIV/AIDS information: School 2 (CS) .....	115
7.5.4 Post-intervention increases in HIV/AIDS information: School 1 (ES) .....	117
7.5.5 Post-intervention increases in HIV/AIDS information: School 2 (CS) .....	119
7.5.6 Information: Mean Estimates and T-test Results .....	121
7.5.7 Summary .....	124

7.6 Repeated Measures ANOVA and Mean Estimates and <i>t-test</i> Results:	
Motivation .....	127
7.6.1 Multivariate Tests: Motivation (Attitudes) to Perform HIV Preventive Behaviours .....	127
7.6.2 Test of Assumptions: Motivation (Attitudes) to Perform HIV Preventive Behaviours .....	128
7.6.3 Univariate tests: Motivation (Attitudes) to Perform HIV Preventive Behaviours .....	129
7.6.4 Paired <i>t</i> -tests of Mean Estimates: Motivation (Attitudes) to Perform HIV Preventive Behaviours .....	131
7.7 Repeated Measures ANOVA and Mean Estimates: Motivation (Subjective Norms) to Perform HIV Preventive Acts .....	151
7.7.1 Multivariate tests: Motivation (Subjective Norms) to Perform HIV Preventive Acts .....	151
7.7.2 Tests of Assumptions: Motivation (Subjective Norms) to Perform HIV Preventive Acts .....	152
7.7.3 Univariate tests: Motivation (Subjective Norms) to Perform HIV Preventive Acts .....	153
7.7.4 Paired <i>t</i> -tests of Mean Estimates: Motivation (Subjective Norms) to Perform HIV Preventive Acts .....	156
7.8 Repeated Measures ANOVA and Mean Estimates: Motivation (Behavioural Intentions) .....	162
7.8.1 Multivariate tests: Motivation (Behavioural Intentions) to Perform HIV Preventive Behaviours .....	162
7.8.2 Test of Assumptions: Motivation (Behavioural Intentions) to Perform HIV Preventive Behaviours .....	163
7.8.3 Univariate tests: Motivation (Behavioural Intentions) to Perform HIV Preventive Behaviours .....	164
7.8.4 Paired <i>t</i> -tests of Mean Estimates: Motivation (Behavioural Intentions) to Perform HIV Preventive Behaviours .....	166
7.9 Repeated Measures ANOVA and Mean Estimates: Motivation (Vulnerability to HIV Infection) .....	181
7.9.1 Multivariate tests: Vulnerability to HIV Infection .....	181
7.9.2 Test of Assumptions: Vulnerability to HIV Infection .....	182
7.9.3 Univariate tests: Vulnerability to HIV Infection .....	183
7.9.4 Paired <i>t</i> -tests of Mean Estimates: Vulnerability to HIV Infection .....	184
7.9.5 Summary .....	187
7.10 Repeated Measures ANOVA and Mean Estimates: Behavioural Skills .....	189
7.10.1 Multivariate tests: Behavioural Skills .....	189
7.10.2 Test of Assumptions: Behavioural Skills .....	190
7.10.3 Univariate tests: Behavioural Skills .....	190
7.10.4 Paired <i>t</i> -tests of Mean Estimates: Behavioural Skills .....	193
7.11 Conclusion .....	205

## **CHAPTER EIGHT - DISCUSSION AND CONCLUSION**

8.1 Overview of the Chapter .....	206
8.2 General Discussion .....	206
8.3 Limitations .....	210
8.4 Summary .....	213
8.5 Conclusions .....	215
8.6 Recommendations .....	216
8.7 Implications for further research .....	221
