ABOUT US

Loyola Marymount University

LMU is a private Catholic university with 6,250 undergraduates, 2,150 graduate, and 1,100 law students from diverse backgrounds and many perspectives. Our seven colleges and schools boast best-in-the-nation programs in film and television, business, education, and more. Our stunning campus in West Los Angeles is a sun-soaked oasis overlooking the Pacific coast and a model of sustainability. We are rooted in the heart of Los Angeles, a global capital for arts and entertainment, innovation and technology, business, and entrepreneurship. Our mission is grounded in centuries-old Jesuit educational tradition that produces extraordinary men and women dedicated to service and social justice. We are proud of more than 92,000 LMU alumni whose professional achievements are matched by a deep commitment to improving the lives of others.

For more LMU news and events, please visit LMU.EDU/news.

Center for the Study of Los Angeles

At its core, the Thomas and Dorothy Leavey Center for the Study of Los Angeles (StudyLA) at Loyola Marymount University is a teaching institution. We are recognized as one of the leading undergraduate research centers in the nation and we are a respected leader in public opinion surveys, exit polls, and leadership and community studies. Founded in 1996, StudyLA conducts groundbreaking research through its LA Votes Election Projects, LA Riots Anniversary Studies, and Los Angeles Public Opinion Surveys. We provide rigorous, mentored research experiences for undergraduate students at LMU with an emphasis on hands-on field research. As the preamble to the University's mission states, "We benefit from our location in Los Angeles, a dynamic city that brings into sharp focus the issues of our time and provides an ideal context for study, research, creative work, and active engagement. We invite men and women diverse in talents, interests, and cultural backgrounds to enrich our educational community." StudyLA brings this mission alive, taking pride in our work's emphasis on understanding and communicating the issues of our time.

About This Report

This report details the results of the 2019 intercept survey of 610 Downtown LA residents. These data are compared to results of the 2019 Los Angeles Public Opinion Survey of 2,008 Los Angeles County residents.

In early 2019, StudyLA field researchers conducted a study in Downtown LA to measure resident perception of various aspects that contribute to quality of life and outlook on the future of the region. To gather the data, trained researchers recruited individuals in Downtown LA to complete a 10 minute survey available in both English and Spanish. The questions assessed public opinion on a range of topics including the area's characteristics, services, and amenities. The study concluded in 610 completed surveys from Downtown LA residents. The margin of error is ±4% for the entire sample.

For more information about these results, please contact Brianne Gilbert, Associate Director, at brianne.gilbert@lmu.edu.

SECTION 1. STUDY LOCATION AND SAMPLE

Location

StudyLA defined the boundaries of Downtown LA by two Community Plan Areas: (1) Central City and (2) Central City North. These two areas include the following eight zip codes: 90013, 90014, 90071 (completely within boundaries), 90012, 90015, 90017, 90021, and 90058 (partially within boundaries).

Sample

To identify whether a survey respondent lives within Downtown LA boundaries, the survey asked a number of questions: the reason for being in Downtown LA at the moment, home zip code, and their community plan area (map shown). A respondent was tagged as a Downtown LA resident if (a) they lived in one of the eight zip codes and indicated either Central City or Central City North community plan area; (b) if the respondent did not indicate home zip code but indicated one of the two community plan areas; (c) if the respondent did not indicate home zip code or community plan area, but chose "I live in Downtown LA" as a reason for being in Downtown LA that day, and (d) if the respondent indicated that they were homeless in the area.

Note that all respondents were welcome to complete the survey and field researchers did not screen for Downtown LA residence. This is an important element of methodology, as StudyLA's definition of Downtown LA can differ from people's perceptions. For example, out of all the respondents (858 individuals) who stated "I live in Downtown LA" on the survey, only 768 (90%) actually live there according to their home zip code and community plan area. On the other hand, out of all the respondents who did *not* state that they live in Downtown LA (1,728 respondents who said they were there either for work, to shop, to eat, or other reasons), 394 (or 23%) actually do live in Downtown LA according to StudyLA boundaries. Thus, people's understanding of where they live was not a reliable way to identify true Downtown LA residents, and it was best to approach all individuals during data collection.

Survey Completion

The final sample of Downtown LA residents (610 individuals) includes only completed surveys. StudyLA considers a survey "completed" if at least half of the second page of the survey is filled out without a notable stopping point on that page (e.g., the individual did not do the first column of questions and then leave the entire second column blank). Since respondents could skip any questions they did not wish to answer, some respondents skipped the entire second page (mostly due to lack of time). These surveys (325 partially completed by Downtown LA residents) are not included in the 610 final sample. Overall, StudyLA collected 2,207 surveys to obtain the target sample of 610 Downtown LA residents who sufficiently completed the survey.
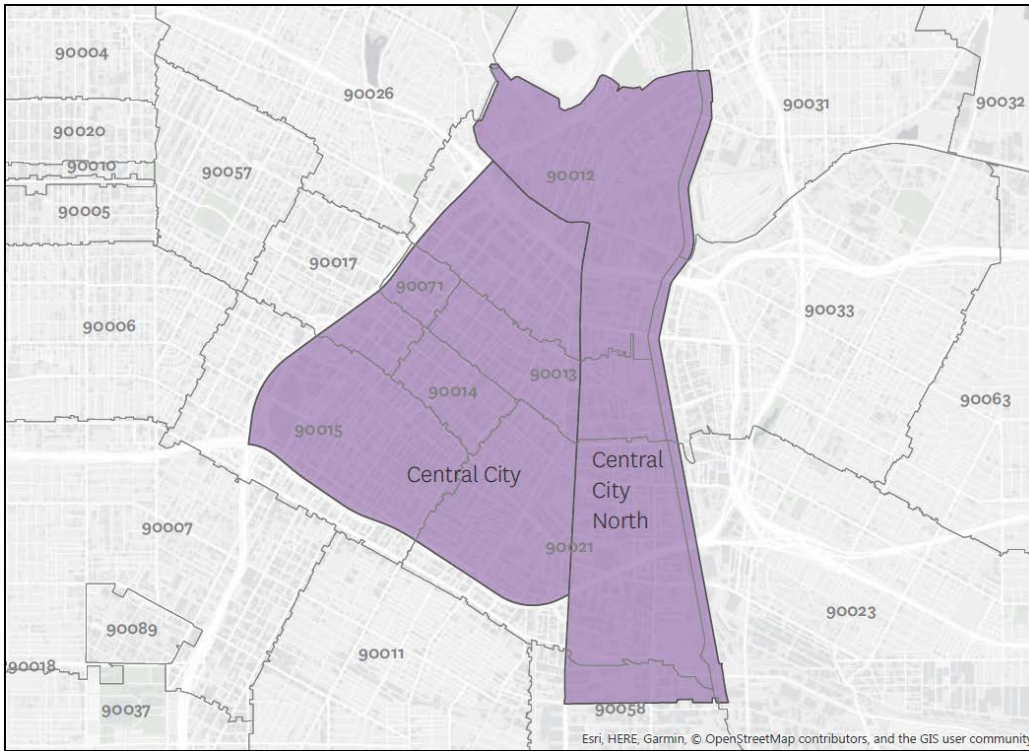

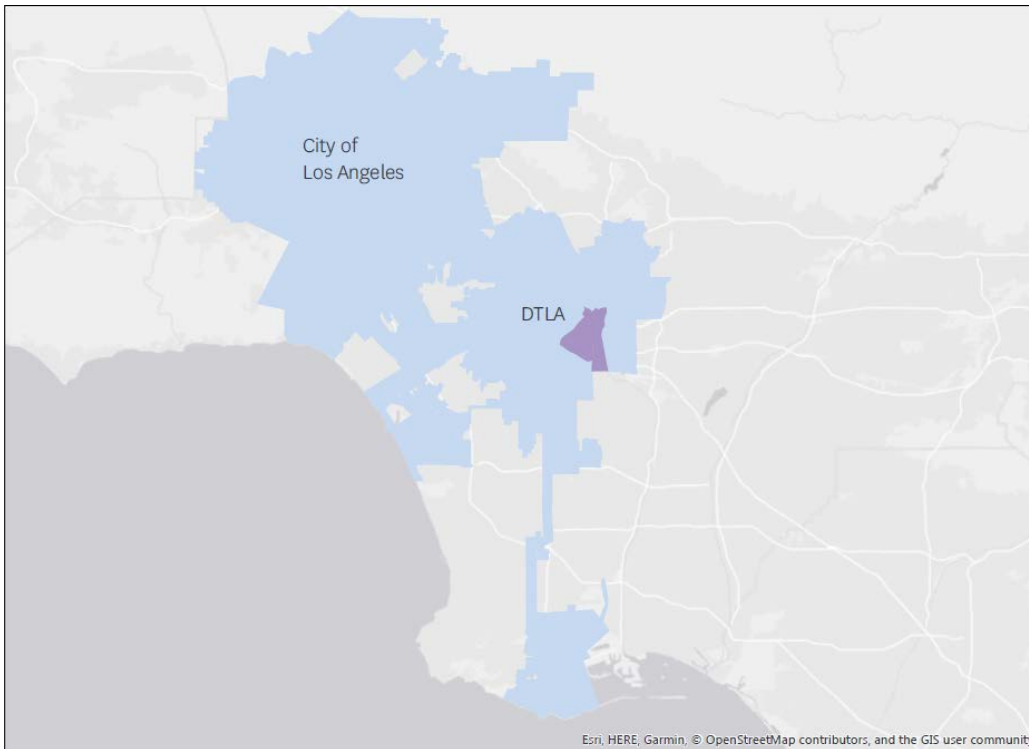

SECTION 2. PUBLIC OPINION

Methodology

Data for the Downtown LA responses come from the 2019 Downtown LA Survey, which ran concurrently with the Los Angeles Public Opinion Survey in January-February. Intercept surveys were collected in-person (610) throughout the Downtown area in both English and Spanish. The margin of error is ±4.0% for the entire sample of 610 respondents. See Appendix for a more detailed description of the study methodology. Note that all demographic percentages in the following tables are weighted to reflect actual area demographics using latest U.S. Census data.

Data for the city of Los Angeles and Los Angeles County responses come from the 2019 Los Angeles Public Opinion Survey collected in January-February. Surveys were conducted over the phone and online asking residents questions on various civic issues. Surveys were collected in English, Spanish, Mandarin, and Korean. The margin of error is ±3.0% for the entire sample of 2,008.

Demographics

The tables below summarize key demographics for the Downtown LA, city of LA, and LA County overall samples. In comparison to the city of LA and LA County overall, Downtown LA residents are more likely to be male, younger, and have shorter tenure in the region.

Table 2.01 Sample Demographics: Gender, Age, and Tenure

	DOWNTOWN LA	CITY OF LA	LA COUNTY

Overall Outlook

A majority of Downtown LA residents are optimistic about the direction their neighborhood, city, and the LA region are heading. Notably, while the 2019 Public Opinion Survey respondents tend to be least positive about the direction of the region overall, Downtown LA residents show highest optimism at 73%.

Table 2.04 Direction of the Area

Ratings of Services and Opinion on Current Issues

The tables below break down participant ratings of various characteristics and city services by themes: quality of life, housing and homelessness, transportation and mobility, safety, and community wellbeing, as well as various aspects of living in Downtown LA.

Quality of Life Ratings

More than half of Downtown LA residents rate food and beverage options, as well as shopping and entertainment as "good" in Downtown LA. Less than half give a "good" rating to desirable employment opportunities, quality of K-12 education, access to quality child care, and the overall quality of life. Yet, for employment and overall quality of life specifically, Downtown LA ratings are higher than those for residents of the city of Los Angeles. The worst ratings are for K-12 education and child care, where Downtown LA residents are considerably more likely to choose a "poor" rating than city and county residents.

Table 2.05 Ratings of Quality of Life

	DOWNTOWN LA	CITY OF LA	LA COUNTY
Overall Quality of Life			
% Good	48.8	32.9	41.1
% Fair	38.3	51.9	49.1
% Poor	12.9	15.2	9.8

Housing and Homelessness

Only one in four Downtown LA residents rate housing options in their area as "good" and an overwhelming majority (80%) supports new housing being built in Downtown LA. Downtown LA residents are also less likely to think that a majority of residents in their area can afford to buy a condo (when compared with city of LA and LA County residents when asked about buying a home in their area).

Table 2.06 Ratings of Housing

	DOWNTOWN LA	CITY OF LA	LA COUNTY
Do you think a majority of residents can afford to buy a condo Downtown LA/a home in your city or area?			
% Yes	7.7	16.1	18.5
% No	92.3	83.9	81.5
Ratings of Housing Options			
% Good	24.9		
% Fair	40.0		
% Poor	35.1

% Somewhat supportive	30.7		
% Somewhat opposed	9.8		
% Strongly opposed	10.0		

Source: StudyLA 2019 Downtown LA Survey; StudyLA 2019 Los Angeles Public Opinion Survey.

A majority (>75%) of both Downtown LA and city of LA residents give a "poor" rating to homelessness in their area. Half of Downtown LA residents also rate efforts to address homelessness there as "poor." Additionally, only 38% of Downtown LA residents are optimistic and believe the homeless situation will get better.

Table 2.07 Ratings of Homelessness

	DOWNTOWN LA	CITY OF LA	LA COUNTY
Rating of Homelessness			
% Good	9.8	6.9	14.0
% Fair	14.0	17.5	27.1

Transportation and Mobility

More than half of Downtown LA residents rate public transportation and walkability in Downtown LA as "good" – a better rating than for city of LA or LA County residents. Parking, on the other hand, is rated worst at 56% of Downtown LA residents rating it as "poor."

Table 2.08 Ratings of Transportation and Mobility

% Public transit	26.3
% Walk	23.7
% Bicycle/Scooter	2.0

Source: StudyLA 2019 Downtown LA Survey.

Community Well-being and Safety

Downtown LA's rating for the sense of community is on par with city of LA and LA County (approximately one third of residents rate it as "good"). More than half (60%) of Downtown LA residents rate diversity – cultural, social, and economic – as "good" in their area.

Table 2.11 Ratings of Community Wellbeing

	DOWNTOWN LA	CITY OF LA	LA COUNTY
Sense of Community			
% Good	32.3	27.1	34.9
% Fair	44.1	48.6	47.5

Those who live in Downtown LA are less likely to rate their fire services as "good." Additionally, only one in five rates crime and safety in Downtown LA as "good" (a slightly better rating than for the city of LA residents). Nevertheless, at least half would recommend Downtown LA as a safe place to live and a vast majority of Downtown LA residents feel safe there (73%).

Table 2.12 Ratings of Police and Fire Services

LIVING IN DOWNTOWN LA

An overwhelming majority of Downtown LA residents say they like living downtown. More than half (61%) also report that they are likely to stay in Downtown LA for at least the next five years.

Table 2.14 Living and Staying in Downtown LA

	DOWNTOWN LA
Do you like living in Downtown LA?	
% Yes	85.5
% No	14.5
In the next 5 years, are you likely to stay or move out of Downtown LA?	
% Very likely to stay	42.7
% Somewhat likely to stay	18.2
% Somewhat likely to move out	18.3
% Very likely to move out	20.8

Source: StudyLA 2019 Downtown LA Survey.

Two open-ended questions allowed residents to elaborate further. First, after residents indicated whether they liked living in Downtown LA (yes/no), they were asked to write out some of the reasons for their answer. The most common reason for liking Downtown LA is its central location, proximity to work and entertainment, and great walkability/public transit. Some of the main reasons to dislike living in Downtown LA include safety issues and poor appearance/sanitation. In terms of concerns for the future of Downtown LA, homelessness is the top worry.

Table 2.15 Rationale and Concerns for Downtown LA Future (Open-Ended Answers)

	DOWNTOWN LA
(Likes Living in Downtown LA) What are some of the reasons?	
% Yes: Convenient location/walkability/good transit	44.6
% Yes: Culture/art/entertainment/shopping/dining	21.7
% Yes: Other reasons (<5% each)	33.3
(Does Not Like Living in Downtown LA) What are some of the reasons?	
% No: Safety concerns/crime/drugs	25.0
% No: Appearance/sanitation	22.8
% No: Other reasons (<5% each)	50.3

Table 2.15 Rationale and Concerns for Downtown LA Future (Open-Ended Answers) (Continued)

	DOWNTOWN LA
What specific concerns do you have about the future of Downtown LA?	
% Homelessness	47.4
% Housing affordability/cost of living	17.6
% Safety & crime	10.5
% Other reasons (<5% each)	24.5

Source: StudyLA 2019 Downtown LA Survey. Note: The open-ended response could contain a number of themes, thus percentages may not add up to 100%.

Area Recommendations and Downtown Activities

When asked if respondents would recommend their area or neighborhood for someone interested in moving in, most Downtown LA residents (73%) would recommend Downtown LA as a place to live overall. This rating appears to be driven by employment opportunities – 79% recommend Downtown LA as a place to work (7% more than for LA County). However, note that less than half (42%) rated desirable employment opportunities as "good" (see Table 2.05). Fewer respondents (<31%) recommend Downtown LA as a place to retire or raise children – a lower rating than that for city of LA and LA County.

Table 2.16 Recommendation of Area/Neighborhood for Newcomers

	DOWNTOWN LA	CITY OF LA	LA COUNTY
Place to Live Overall			
% Yes	73.3	73.4	81.1
% No	26.7	26.6	18.9

Council District 14 and the 2020 Election

Survey respondents were asked if they lived in Council District 14 (CD14). If the respondent did not know, they were shown a map of CD14 and asked a second time. One third of Downtown LA residents (both overall and those registered to vote) did not know whether they lived in CD14. After seeing the map and answering the question again, 63% of survey respondents (and 67% of voters) actually live within CD14 boundaries.

Table 2.18 Council District 14

	DOWNTOWN LA ALL RESIDENTS	DOWNTOWN LA REGISTERED VOTERS
Do you live in Council District 14?		
% Yes, I live in CD14	53.3	58.7
% No, I do not live in CD14	14.6	12.3
% I don't know	32.1	29.0
Actually Resides in Council District 14		
% Lives in CD14	62.9	66.6
% Does not live in CD14	37.1	33.4

Source: StudyLA 2019 Downtown LA Survey. Note: The percentages for those who actually reside in CD14 are determined by answers to the two questions. A respondent was tagged as one that actually resides in CD14 if (a) they said "Yes, I live in CD14" to the first or second question or (b) said "No, I do not live in CD14" or "I don't know" to question 1, but said "Yes, I live in CD14" in question 2 after seeing the map.

The following tables show responses for Downtown LA residents who live in Council District 14 – both overall (357 residents) and those registered to vote (295, or 83% of CD14 residents who took the survey). A majority of Downtown LA residents who live in CD14 do not know the name of the current Councilmember – José Huizar. A majority of CD14 residents have heard of de León who is running for LA City Council District 14 in March 2020; registered voters are more likely to have heard of him (6% difference). In terms of voting plans for 2020, Kevin de León has most support at about 27% of registered voters in CD14 planning to vote for him. About 45% of CD14 residents chose an "other" candidate for this question, but a majority of written in responses consisted of "none" or "I don't know."

Table 2.19 Council District 14 – 2020 Election

	CD14 RESIDENTS	CD14 REGISTERED VOTERS
Do you know who the council member has been for City Council District 14? If so, what is his or her name?		
% Respondent does not know or wrote in the wrong name	86.9	84.7

APPENDIX

2019 Downtown LA Survey Methodology
In early 2019, StudyLA conducted intercept surveys with residents of Downtown Los Angeles to gauge overall outlook on the upcoming year as well as measure perceptions of various aspects of quality of life in the area. To gather the data, trained researchers recruited individuals in Downtown LA to complete a 10-minute paper survey, which was available both in English and Spanish. Survey questions assessed public opinions on a range of topics, including safety, housing, amenities and cultural events, as well as ratings of the areas' characteristics and services. The study collected 610 completed surveys Downtown LA residents.

Participants were surveyed between January 16th and February 25th from 4:00pm-8:00pm, Monday-Friday, and 10:30am-7:30pm, Saturday-Sunday, with rotating location assignments and field researchers each day. StudyLA defined Downtown LA boundaries by the Community Planning areas (Central City and Central City North), which include eight zip codes. To ensure coverage of the entire Downtown LA area, StudyLA researchers identified 23 intercept locations that included both planning areas and all eight zip codes. Once field researchers arrived to their assigned intercept location for data collection, they applied a skip pattern approaching every 2nd individual with the recruitment script, ensuring the participant was at least 18 years old. The 610 responses were weighted based on respondents' self-identified racial and ethnic group, gender, and age, matching them to the most recently available population parameters from the American Community Survey (ACS) estimates.

The margin of error for the entire sample of 610 respondents is ±4%.

2019 Los Angeles Public Opinion Survey Methodology
As part of StudyLA's unique approach to forecasting in the Los Angeles region, the Center for the Study of Los Angeles conducted an outlook survey. The Los Angeles Public Opinion Survey involved 20-minute telephone sessions and online surveys with more than 2,000 adults (phone and online) living in Los Angeles County. Survey respondents were asked about quality-of-life perceptions, personal economic wellbeing, economic concerns, overall life satisfaction, and various civic issues.

Since the primary purpose of this study was to gather representative input from adult residents within the LA region, an initial random digit dial (RDD) sample was employed. The RDD sample was drawn by determining the active phone exchanges (the first three numbers of a seven-digit phone number) and blocks within a given sampling area (in this case, by the zip codes that comprise the county). A random list of all active residential and cell phone numbers in the area was produced. This method included both listed and unlisted phone numbers. Listed samples were used to meet particular quotas for racial/ethnic categories and geographic location.

The online portion was comprised of responses from double opt-in respondents who have agreed to participate in surveys. Real-time sampling and survey publishing services were also used to target respondents outside of the initial reach. Finally, listed samples were used to fill gaps within racial/ethnic and geographic quotas. For all methods, adult respondents in LA County were targeted and then randomly selected within their group.

The protocol for this study involved asking potential respondents a series of questions used to ensure that the person lived within the county and was at least 18 years old. The target sample size was 1,000 residents from the city of Los Angeles and 1,000 residents from Los Angeles County who live outside the city of LA. The first quota was a random digit dialing of approximately 475 residents (with 80% cell phone). The online survey ran concurrently with a target sample size of 800 respondents. The remaining racial/ethnic and geographic quotas were determined based on the fallout: 350 African American residents, 500 Asian residents, and 400 residents from the San Fernando Valley (only within the city of Los Angeles). Given the demographic proportion of Latina/o and white residents in the region, as expected, both groups naturally fell out from the initial wave of online and phone respondents.

Telephone surveys were conducted the first four full weeks in January 2019 and first two weeks in February between the hours of 4:30pm and 9pm during the week, 10am to 4pm on Saturday, and 12pm to 5pm on Sunday. The survey was translated into Spanish, Mandarin, and Korean. Translators were available to conduct interviews for residents who only spoke, or were more comfortable speaking any of those languages. The online survey ran concurrent with the phone survey and were available in both English and Spanish. The margin of error is ±3.0% for the entire sample of 2,000 residents, not adjusted for weighting or design effects. The 2,000 responses collected for this survey were weighted based on respondents' self-identified racial and ethnic group, gender, age, and geographic location matching them to the most recently available population parameters from the American Community Survey (ACS) estimates.
