Lean Six Sigma & Sustainability

WHEN: February 15, 3:45 pm WHERE: Online via Zoom

Brion Hurley

Business Performance Improvement

Brion Hurley is a Lean Six Sigma Master Black Belt in St. Louis, MO. He teaches Lean and Six Sigma classes, facilitates workshops and events, performs statistical analysis, and mentors employees through improvement efforts. He has over 20 years of experience, including 18 years in Aerospace. He also led corporate sustainability teams to reduce electricity usage and solid waste, and volunteers his time with local nonprofits. He is the author of the “Lean Six Sigma for Good” book series.

Lean and Six Sigma are improvement methodologies that have helped organizations and businesses save money, improve delivery performance, reduce inventory and improve quality for decades. These techniques can also be used to help reduce negative impacts on the environment (energy, waste and landfill usage), and improve government agencies, education systems, nonprofits, healthcare, and more.

For more information, please contact Dr. Robert Taylor at taylorr@montclair.edu
