2. Description

The database ICULD-0016 contains recordings of phrases and sentences of Northern Sotho produced by a single speaker in March 2020. All recordings were made on a Zoom H5 recorder mounted on a tripod in Thohoyandou, Limpopo, South Africa (sampling rate 44,100 Hz with 16-but quantization). Northern Sotho (S32), also known as Sepedi, is a Bantu language spoken in South Africa by 4.7 million speakers. As one of the official languages of South Africa, the speech in this archive is based on the Northern Sotho variety spoken in and around the Mahokone village in the Limpopo province.
