This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Mechanical and Industrial Engineering Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

IE 440 Stochastic Models in Operations Research

Instructor: Layek Malek

Spring 2021

Recommended TEXT: Hillier & Lieberman: Introduction to *Operations Research*, 10th Edition 2015

Office Hours: Tuesday 2:00 -3:00 pm and by appointment

*Week

Topic

1. Introduction to Stochastic Processes, Review of Probability
2. Introduction to Inventory Theory, Components of Inventory Models
3. Deterministic Models in Inventory Models
4. Stochastic Models in Inventory Theory
5. Markov Chains and classification of their states
6. Long-Run Properties of Markov Chains, and application of Markov Chains
7. Introduction to Queuing Theory, Birth and Death Process
8. **Midterm Exam****
9. M/M/1/ ∞ System, M/M/C Systems and M/G/I System
10. Application to Queuing Theory
11. Tandem, Queues and Markovian queuing network
12. Introduction to Reliability
13. Reliability Structural Function, Parallel Series Systems, Redundancy
14. Term project presentation
15. **Final Exam****

Grading : Midterm 33%
 Final 33%
 Class work 34%

*Approximate

** May be replaced by quizzes as the situation evolves
