ABSTRACT

Buyer-supplier relationships have been increasingly considered a critical part of contemporary supply chain management. In response to dynamic and unpredictable market changes, buyers and suppliers enter into cooperative relationships to pursue individual goals and joint goals for better economic and non-economic performance of the supply chain. On the other hand, cooperation between channel members is surrounded by uncertainty, which can create a detrimental impact on the performance of a supply chain.

Previous research has focused on various aspects of uncertainty that could affect supply chain member behaviour. The present research contends that relationship behavioural factors play an important role in increasing or mitigating channel members' perceived uncertainty in their supply or purchase decision-making. Specifically, the purpose of this research is to investigate the impact of retailer-supplier cooperation and retailer/supplier's decision-making uncertainty (DMU) on retail supply chain performance from the perspectives of both the retailer and the supplier. A holistic model was developed as the theoretical framework for this conceptualisation. A sample of 202 retailers and 64 suppliers in the sporting goods retail business in Taiwan was used to separately test a number of hypothesised relationships by using structural equation modelling (SEM).

The findings indicate that both cooperation and DMU are the key determinants of retail supply chain performance, including financial performance and non-financial performance (i.e., supply flexibility and customer service). Financial performance is positively affected by retailer-supplier cooperation and negatively affected by DMU in both the retailer model and the supplier model. The five dimensions of retailer-supplier cooperation (i.e. trust, *guanxi*, dependence, coercive power and non-coercive power) have significant effects on cooperation. However, apart from *guanxi* with the retailer/supplier, neither other relationship dimensions nor retailer-supplier cooperation have any influence on retailer's DMU or supplier's DMU. The results also indicate that differences and similarities exist across retailers and suppliers with respect to the effects of several relationship dimensions on cooperation and uncertainty.

The holistic empirical model developed for this research contributes further to understanding the links, which have been lacking in the extant channel relationship literature and supply chain management literature, between buyer-supplier relationships, DMU, and supply chain performance. The findings that a retailer/supplier's DMU can erode the performance of a supply chain in various aspects highlight the need for improvement in some areas of supply chain efficiency and effectiveness, through cooperation-enhancing actions between the retailer and the supplier. From a managerial perspective, the performance improvement in the supply chain, in turn, will motivate more reciprocal commitment and efforts from the retailer and the supplier to maintain their working relationship. As such, mutual trust and enriched *guanxi*, dependence and non-coercive power help both the retailer and the supplier to have less uncertainty in their purchase/supply decision-making process. It creates a win-win position for both parties in the supply chain.

Key words: supply chain management, buyer-supplier relationship, cooperation, decision-making uncertainty, supply chain performance

ACKNOWLEDGEMENTS

The journey of studying a PhD is like running a marathon, which needs enormous energy, patience, time, and wisdom. The completion of this dissertation could not have been accomplished without the support and encouragement from many individuals. Their contributions are sincerely appreciated and must be recognised.

First, I would like to express my deepest gratitude to my supervisor, Professor David Hensher. His super efficiency and continuous support to my work motivated me to carry out a quality work until the end. He is more than just a supervisor. His intelligence, academic achievement and leadership always inspire me to follow his example not only in my academic pursuits, but also in life in general.

I would like to express my profound gratitude to Professor James Wilcox at Texas Tech University. His generous guidance in learning structural equation modelling tremendously helped me gain analytical skills, and he always answered my questions in detail. I am also thankful to Dr. Catherine Button-Bradly, from the Marketing Department, for constant advice and valuable comments in the last stages of my research.

I am grateful to my former supervisor, Dr. Sharon Purchase, at the Information Management and Marketing Department of University of Western Australia. She was the one who first introduced me to the interesting field of business networks and supply chain management.

My other wonderful and supportive PhD colleagues, Ale, Sean, Jaafar, Wafa, Geoffrey, Tony, Virginia and Theingi should be also praised. Particularly, I have to appreciate Dr. John Rose, who was also my PhD colleague, for his continuous assistance with my statistics questions at any time I need his help. He is really a helpful advisor for other PhD students.

A special thanks goes to my Chinese doctors – Dr. Wu, Dr. Chen, and Dr. Ma. They have been looking after my health whenever I study in Sydney all these years. I would like to express my deep-heart appreciation to Ms. Tigger Wise, who is my proofreader and is also a PhD mother, for her patience in correcting my writing.

It was a privilege that I was given study leave for three and half years from Ling Tung University in Taiwan. I show my sincerest appreciation to my colleagues at the Department of Technology Management and other colleagues for their administrative support and encouragement of my PhD study.

I am very grateful to my parents, my sister, and my brothers. Their special love, caring, and understanding have always given me the greatest strength and spiritual support during the PhD journey. The success of this work belongs to them as much as anyone else.

STATEMENT OF ORIGINALITY

I certify that this work has not previously been submitted for a degree or diploma in any university. To the best of my knowledge and belief, the dissertation contains no material previously published or written by another person except where due reference is made in the dissertation itself.

TABLE OF CONTENTS

ABSTRACT.....	I
ACKNOWLEDGEMENTS	III
STATEMENT OF ORIGINALITY.....	V
TABLE OF CONTENTS.....	VI
LIST OF TABLES.....	XI
LIST OF FIGURES	XIII
CHAPTER ONE	1
INTRODUCTION	1
1.1 Performance Issues in Buyer-Supplier Relationships.....	2
1.2 Research Questions and Objectives of the Research.....	3
1.3 Scope of the Research.....	5
1.4 The Sporting Goods Industry.....	6
1.4.1 Current Sports Retail Supply Chain.....	7
1.4.2 The Role of SMEs in Taiwan’s Economy.....	8
1.4.3 Growth Opportunities for Sporting Goods Industry.....	9
1.4.4 Issues in the Sporting Goods Supply Chain.....	10
1.5 Overview of the Methodology and Analysis	11
1.6 Organisation of the Dissertation	12
CHAPTER TWO	13
LITERATURE REVIEW.....	13
2.1 Introduction.....	13
2.2 Theoretical Foundation on Buyer-supplier Relationship.....	15
2.2.1 Social Exchange Theory	15
2.2.2 Transaction Cost Analysis.....	17
2.2.3 Comparison between Social Exchange Theory and Transaction Cost Analysis	18
2.3 Supply Chain Performance	19
2.3.1 Definition and Objectives of Supply Chain Performance	19
2.3.2 Need for Supply Chain Performance	19
2.3.3 Measurement of Supply Chain Performance	20
2.4 Cooperation.....	26
2.4.1 Definition of Cooperation.....	26
2.4.2 Importance of Cooperation	26

2.4.3	Motivations of Cooperation	27
2.4.4	Impact of Cooperation in Relationship.....	29
2.5	Decision-Making Uncertainty.....	30
2.5.1	Definition of Decision-Making Uncertainty (DMU).....	31
2.5.2	Types of Retail Purchase Decision	32
2.5.3	Effect of Buyer-Supplier Relationship on DMU	34
2.6	Trust	37
2.6.1	Definition of Trust	37
2.6.2	Importance of Trust in Buyer-Supplier Relationship.....	39
2.6.3	The Role of Trust	39
2.6.4	Impact of Trust in Relationship	41
