Details of Catalogue

Number	Number in current study, see concordance for details of original publication
Material	Refers to stone (etc.) type for cylinder seals, and sealing type for seal impressions. An asterix(*) indicates change in material designation, according to the nomenclature system of the Corpus. A cross(+) indicates assumption of 'bitumen aggregate' material without actual petrographic designation following Connan & Deschesne 1996
Dimensions	Height and diameter of seals, height of impression for sealings.
Site	Site where item found
Provenance	Specific findspot at site, where known/detailed in original publication
Style	Style and type as allocated in this study
Orig. Class.	"Original Classification"; details of stylistic classification from original publication, where detailed
Inscription	following original publication, where detailed
