# How to use this reference handbook

## The purpose of this handbook

This handbook contains all **undergraduate** units of study in one printed volume. It is particularly useful for staff who need to search for subject and content, regardless of faculty.

This publication provides a broader perspective on units of study – one that is not restricted by course structure and timetables.

It offers an overview of the areas of undergraduate study available at the University of Sydney.

## Unit of study reference handbook – two volume set

The unit of study reference is a limited edition publication produced as a two volume set:

- Unit of study reference handbook – undergraduate
- Unit of study reference handbook – postgraduate

## How this book is structured

This is a reference handbook of every undergraduate unit of study available in 2009.

The emphasis is on the unit of study and not necessarily its context, which means that units are not sorted by faculty, but rather by alpha-numeric code.

For a complete list of units of study by faculty, please refer to the relevant student handbook by visiting [www.usyd.edu.au/handbooks](http://www.usyd.edu.au/handbooks).

## Contents

The units of study have been sorted alphabetically by alpha-numeric code. Each chapter represents one letter of the alphabet.

## Course information

This publication should be read in conjunction with the relevant student handbook and the *University Calendar 2009* for a complete overview of official course rules and requirements.

## About the index

This reference guide contains two indexes:

- Units of study by name
- Units of study by alpha-numeric code, including faculty

## Index abbreviations

Abbreviation	Faculty name
AG	Agriculture, Food and Natural Resources
ARCH	Architecture, Design and Planning
ARTS	Arts
CON	Sydney Conservatorium of Music
DENT	Dentistry
E&B	Economics and Business
EDU	Education and Social Work
ENG	Engineering and Information Technologies
HSCI	Health Sciences
LAW	Sydney Law School
MED	Medicine
NURS	Nursing and Midwifery
PAN	Pan-Faculty
PHAR	Pharmacy
SCA	Sydney College of the Arts
SCI	Science
VETS	Veterinary Science

## ACCP3601

### Elective Performance Study 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 6-14 one hour lessons, group/masterclasses and/or performance workshops/wk **Prerequisites:** Principal Study 4 in major study area. Departmental permission is required to enrol in this unit of study. **Assessment:** Completion of performance project. 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Preference will usually be given to B.Mus students whose Principal Study area is non-orchestral instrument.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

This unit of study provides an opportunity for students enrolled in Sydney Conservatorium of Music undergraduate programs to undertake a second principal study area. Students must submit a project proposal and complete an audition and/or interview at least 4 weeks before the start of the semester in which the Elective Performance Study is proposed to be undertaken. Entry is subject to approval from the relevant Chairs of Units and the Dean/Head of School.

## ACCP3602

### Elective Performance Study 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 6-14 one hour lessons, group/masterclasses and/or performance workshops/wk **Prerequisites:** ACCP3601 Elective Performance Study 1, Principal Study 5 in major study area. Departmental permission is required to enrol in this unit of study **Assessment:** Completion of performance project. 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

This unit of study provides an opportunity for students enrolled in Sydney Conservatorium of Music undergraduate programs to undertake a second principal study area. Students must submit a project proposal and complete an audition and/or interview at least 4 weeks before the start of the semester in which the Elective Performance Study is proposed to be undertaken. Entry is subject to approval from the relevant Chairs of Units and Dean/Head of School.

## ACCP3605

### Accompaniment 5

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** 14X1hr lessons, 1hr/wk concert practice/performance class **Prerequisites:** ENSE2001 Accompaniment 4, KEYB2624 Pianoforte 4 **Corequisites:** ACCP4705 Accompaniment 5 (Adv) **Assumed knowledge:** Students will be expected to have indicated a demonstrable interest in the art of accompaniment during the first four semesters of their course and an involvement in duo or chamber repertoire both within and outside the Conservatorium **Assessment:** Teacher Assessment 100% **Assessment criteria:** Technical and musical progress, commitment and effectiveness of practice/rehearsals, quality of performances (technique, interpretation, ensemble, projection, confidence, rapport etc.), development of teaching/coaching techniques, music craft skills (sight reading, quick study, repertoire etc.) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Entry to this UoS depends on results from ENSE2001 Accompaniment 4 and a possible additional audition*

**Associated degrees:** B Mus (Perf).

This unit is designed for those keyboard students who have exhibited exceptional ability as vocal and instrumental accompanists. It enables them to study in greater depth the various aspects of piano

accompaniment as a profession. Students will be exposed to a wide range of performance and learning experiences as they apply to ensemble repertoire and situations. Emphasis will be placed on techniques of rehearsal and performance with a musical partner, the adaptation of keyboard technique to the demands of ensemble, the specialized skills required of the vocal as opposed to the instrumental accompanist, an extensive exploration of the ensemble repertoire both vocal and instrumental and a study of the special problems arising from choosing and working with a musical partner.

## ACCP3606

### Accompaniment 6

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** 14X1hr lessons, 1hr/wk concert practice/performance class **Prerequisites:** ACCP3605 Accompaniment 5 **Corequisites:** ACCP4706 Accompaniment 6 (Adv) **Assumed knowledge:** A developing grasp of ensemble performance and an extended repertoire **Assessment:** 40 minute solo junior recital. Panel grade 80%; teacher grade 20%. Students must pass both assessment components. **Assessment criteria:** Technical and musical progress, commitment and effectiveness of practice/rehearsals, quality of performances (technique, interpretation, ensemble, projection, confidence, rapport etc.), development of teaching/coaching techniques, music craft skills (sight reading, quick study, repertoire etc.) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Perf).

## ACCP3611

### Recital Preparation 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** 8 hrs per semester **Assessment:** 100% assessment by Ensemble Studies Unit staff based on attendance, participation, performance and preparation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit must be taken by students in the new award courses who wish to use SCM Ensemble Studies staff accompanists. Can only be taken in the semester in which a student has a recital or qualifying exam (i.e. Diploma semester 4; B Mus Studies semester 6; B Mus semesters 4, 6 and 8; B Mus Hons semesters 4, 6, 7 or 8.) Students may take a maximum of 3 Recital Preparation units of study during their award course. Recital Preparation units of study are optional for students enrolled in pre-2008 courses.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

The purpose of recital preparation units of study is to develop the range of skills that musicians must possess to prepare them to be professional performers particularly in an ensemble situation. Students will receive training/instruction in all aspects of collaborative recital preparation. Through recital repertoire chosen by the student and the principal study teacher at the beginning of the semester, students will learn practical application of elements of recital preparation and performance including appropriate recital structure, issues in

collaborative performance, strategies for improvement of accuracy of rhythmic and intonation control, ethics and professional conduct of a musician. Students must abide by the recital preparation attendance and rehearsal policy of the Ensemble Studies Unit. The objectives of this Unit of Study are to develop: the ability to concentrate and perform with commitment; teamwork; the ability to work effectively with another musician. Assessment is based on all aspects of participation in the preparation sessions. Assessment criteria include: level of preparation, actual performance in the sessions, commitment, concentration, ability and teamwork. For further information contact the relevant Chair of the Ensemble Studies Unit.

### ACCP3612

#### Recital Preparation 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** 8 hrs per semester **Assessment:** 100% assessment by Ensemble Studies Unit staff based on attendance, participation, performance and preparation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit must be taken by students in the new award courses who wish to use SCM Ensemble Studies staff accompanists. Can only be taken in the semester in which a student has a recital or qualifying exam (i.e. Diploma semester 4; BMus Studies semester 6; BMus semesters 4, 6 and 8; BMus Hons semesters 4, 6, 7 or 8.) Students may take a maximum of 3 Recital Preparation units of study during their award course. Recital Preparation units of study are optional for students enrolled in pre-2008 courses.*

**ACCT1001****Accounting 1A****Economics and Business**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs of lectures/tutorials per week **Prohibitions:** ACCT1003, ACCT1004 **Assumed knowledge:** HSC Mathematics **Assessment:** Mid-semester examination; Tutorial and research assignments; Practice Set; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

Accounting 1A introduces students to the fundamentals of accounting and the double entry system of financial recording. Students examine the assumptions underlying the preparation of financial statements for external users and gain the skills necessary to prepare, interpret and analyse financial statements. In doing so students develop their ability to understand, discuss, analyse and write about accounting-related topics. This unit is designed as an introduction to accounting. As such, no prior knowledge of accounting is assumed.

**ACCT1002****Accounting 1B****Economics and Business**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** ACCT1001 **Prohibitions:** ACCT1003, ACCT1004 **Assessment:** Homework tasks; Group project; Interactive On-line Assessment; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

Accounting is about the recording, classification, reporting and interpretation of information to help make economic decisions. Accounting 1A introduces accounting and the double entry system for financial recording. Accounting 1B develops themes and competencies learnt in Accounting 1A. The primary focus of this unit of study is on conceptual and technical issues relating to management accounting and the information required by internal users to make strategic and operational decisions relating to managing a business. A second theme is the financial accounting information businesses are required to produce to assess a firm's financial state and performance. Students examine how commercial and ethical issues affect business decisions and how there are present and future consequences that will affect different groups of interest.

**ACCT1003****Financial Accounting Concepts****Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs of lectures/tutorials per week **Prohibitions:** ACCT1001, ACCT1002 **Assessment:** Group assignments; Mid-semester examination; Final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Terminating unit.*

**Associated degrees:** B Agr Ec, B Com (Liberal Studies), B E, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, B S T, UG Study Abroad Program.

Provides an introduction to the concepts underlying "external" accounting and is designed for students who are not majoring in accounting. The unit utilises a transaction-effect approach to the preparation of financial statements with basic bookkeeping minimised. Accounting-method choices are analysed for their effect on the financial statements, and, thus, on decision-making.

#### ACCT1004

##### Management Accounting Concepts Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs of lectures/tutorials per week **Prohibitions:** ACCT1001, ACCT1002 **Assessment:** Quizzes; Assignment; Presentation; Final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Terminating unit.*

**Associated degrees:** B Agr Ec, B Com (Liberal Studies), B E, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B S T, UG Study Abroad Program.

This unit is designed to explain how managers use accounting information, with an emphasis on identifying relevant accounting information for decision-making. Topics include: estimating cost functions, relevant costing, cost allocation, budgeting, short and long term decision making and managing within a changing environment.

#### ACCT1551

##### Accounting Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc, B Int S.

#### ACCT2011

##### Financial Accounting A Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Early **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** ACCT1001 and ACCT1002 and ECMT1010 **Prohibitions:** ACCT2001 **Assessment:** Presentation; Tutorial participation; Research project; Mid-semester examination; Final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

This unit examines the accounting and reporting practices of reporting entities, particularly listed public companies. Emphasis is placed on developing an understanding of, and the ability to critically evaluate, the various regulatory requirements (professional and statutory) governing financial reporting. The unit commences with an overview of the financial reporting environment and theories that seek to explain the accounting policy choices of management. This framework provides a basis for examining a range of specific issues in financial accounting. Emphasis throughout the unit is on both the application of specific accounting techniques/rules and the conceptual/theoretical issues associated with alternative accounting methods.

#### ACCT2012

##### Management Accounting A Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** ACCT1001 and ACCT1002 **Prohibitions:** ACCT2002 **Assessment:** Quizzes; case study assignment; final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This course provides students with an introduction to the basics of management/cost accounting. Areas specifically covered include: cost terms and purposes, cost behaviour, cost-volume-profit analysis, cost

estimation, basic and alternative product costing methods (including activity-based costing), detailed study of the mechanics of the budgeting process (master budgets, flexible budgets, standard costing and variance analysis), decision making using relevant costs/revenues and cost allocation.

#### ACCT2551

##### Accounting Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc.

#### ACCT2552

##### Accounting Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc.

#### ACCT3011

##### Financial Accounting B Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** ACCT2011 or ACCT2001 **Prohibitions:** ACCT3001 **Assessment:** Mid-semester examination; group project; final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, UG Study Abroad Program.

This unit introduces students to accounting for investments in other entities, including controlled and significantly influenced entities. The first part of the course focuses on the process of consolidation, the preparation of consolidated financial statements for corporate groups, including the treatment of goodwill, intra-group transactions and minority interests. The accounting requirements for significantly influenced entities are also studied. Other aspects of group accounting, such as segment disclosures and related party disclosures, are investigated. The first part of the course concludes with a critical analysis of the consolidation process, including the outcomes of the consolidation process and the impact of this upon the user of the consolidated financial statements. The second part of the course focuses on critically evaluating current issues in accounting regulation and practice, such as the politics of the standard-setting process, using accounting for financial instruments as a special case. Finally, voluntary disclosures for social and environmental reporting are considered. This course aims to further develop students' written communication skills and critical and analytic skills within the context of corporate group activities.

#### ACCT3012

##### Management Accounting B Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** ACCT2012 or ACCT2002 **Prohibitions:** ACCT3002 **Assessment:** Mid-semester examination; Tutorial work/participation; Presentation; Essay; Final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Discipline Permission required for students who haven't passed ACCT2012 (or ACCT2002)*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, UG Study Abroad Program.

Management Accounting B deals with the theory and practice of a selection of contemporary management accounting issues. The course begins by examining the influences that impact upon the design of an organisation and its management accounting system. Behavioural factors, rather than technical factors, are highlighted and a range of

organisational settings and management levels are reviewed. The unit then examines advanced issues relevant to operational management accounting. While this section of the course builds on the foundations laid in Management Accounting A, the focus remains on the behavioural implications of accounting techniques for making decisions in organisations.

### ACCT3013

#### Financial Statement Analysis

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** (ACCT2011 or ACCT2001) and (FINC2011 or FINC2001) **Prohibitions:** ACCT3003 **Assessment:** Tutorial participation; Mid-semester examination; Group case studies; Final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, UG Study Abroad Program.

Although the appropriate 'form' of financial analysis depends largely on the specific context (e.g. equity investment, credit extension, analysis of supplier/customer health, competitor analysis, regulatory overview or intervention, valuation for takeover/restructuring), many of the techniques of financial analysis are common to each. A primary purpose of this course is to develop an understanding of these techniques, as well as the inherent difficulties in their application. Specific issues addressed include the analysis of business performance and disclosure, the analysis of earnings quality, cash flow assessment, credit worthiness and accounting-based valuation methods.

### ACCT3014

#### Auditing and Assurance

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** ACCT3011 or ACCT3001 **Prohibitions:** ACCT3004 **Assessment:** Group audit planning project; Group assignment; Mid-semester examination; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, UG Study Abroad Program.

This unit of study examines the process of auditing and the concepts which underlay the practice. Although the focus of attention is on audits of financial reports undertaken in compliance with the Corporation Act 2001, reference is also made to other forms of audit and assurance. The course is intended to provide an overview of the audit process within the context of Australian Auditing Standards. The course is both practical and theoretical, with students required to apply their knowledge to case studies developed from practice.

### ACCT3031

#### International Corporate Governance

##### Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** ACCT2011 or ACCT2001 **Assessment:** Group assignments; Mid-semester quiz; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B Int S, B Sc, B Com, UG Study Abroad Program.

This unit seeks to develop students' ability to understand and critically evaluate the principles of corporate governance and how they are applied in Australia and internationally. Topics include, governance structures - an international perspective; governance arrangements and external and internal stakeholders. Japanese and European systems; governance in Asia; western governance - legal framework; control of the modern corporation; operations of a Board; role of board sub-committees; Boards and the development or endorsement of strategies; measuring and rewarding performance; corporate governance and financial reporting; corporate governance and the audit process.

### ACCT3032

#### Current Issues in Management Accounting

### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs of lectures/tutorials per week **Prerequisites:** ACCT2012 or ACCT2002 **Assessment:** Continuous assessment; In-class essay; Final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Ec, B Ec Soc Sc, UG Study Abroad Program.

This unit builds on the fundamentals of management accounting practice (ACCT2012) by introducing a series of advanced management accounting topics such as strategic management accounting, innovation and change in management accounting and designing management accounting systems for new organizational forms. In addition, this unit relaxes the hitherto held assumption that management accounting works in a world characterised by certainty and rationality and instead shows that management accounting more often operates in a world characterised by fuzziness and ambiguity. This real-world view requires students to develop their judgemental skills and to adopt a more critical and reflective approach that challenges their beliefs about how management accounting works in practice.

### ACCT3098

#### Accounting Honours Preparation A

##### Economics and Business

**Credit points:** 3 **Session:** Semester 1 **Classes:** 1 x 1.5 hr seminar per week **Prerequisites:** ACCT2011 or ACCT2001 **Corequisites:** ACCT3011 **Assessment:** Seminar participation; Paper summaries; Paper presentation; Essay; Research Proposal **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Entry to this unit of study is at the discretion of the Discipline. Students will require a credit average in previous ACCT units attempted.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc, UG Study Abroad Program.

The purpose of this unit of study is to prepare students for entry to the fourth year honours program in accounting. As such, this unit of study has been designed to: first, extend the substantive knowledge of students in relation to financial accounting by examining emerging/advanced issues in relation to theory and practice; second, introduce students to different ways of conducting accounting research, considering extant research mobilising a variety of epistemologies and research methods; and, third, assist students to identify potential topic areas for research and appropriate research questions. The course will be based on a series of readings drawn from the accounting research literature.

### ACCT3099

#### Accounting Honours Preparation B

##### Economics and Business

**Credit points:** 3 **Session:** Semester 2 **Classes:** 1 x 1.5 hr seminar per week **Prerequisites:** ACCT2012 or ACCT2002 **Corequisites:** ACCT3012 **Assessment:** Class participation; Proposal **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Entry to this unit of study is at the discretion of the Discipline. Students will require a credit average in previous ACCT units attempted.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc, UG Study Abroad Program.

### ACCT4101

#### Accounting Honours A Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Major in Accounting with Credit average overall and a distinction average for second and third year units in Accounting **Assessment:** Course work; Thesis **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Requirements for the pass degree must be completed before entry to level 4000 honours units of study.*

**Associated degrees:** B Com (Hons), B Ec (Hons).

Honours study within the Discipline is directed at: (i) increasing students' analytic and constructive skills beyond the level acquired in undergraduate Pass level units; (ii) providing a foundation for the conduct of applied research in accounting; and (iii) conducting research in the form of a research report. These skills are developed through the completion of an additional year of study that may be either a full- or a part-time basis, though the former is more common.

### AERO1400

#### Intro to Aircraft Construction & Design Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (two 1hr lec & one 3hr prac session) per week **Assessment:** In-course involvement, assignments and quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

This unit aims to introduce and foster practical engineering skills in students newly enrolled in the degree of Bachelor of Engineering (Aeronautical).

At the end of this unit student will be able to actively participate in the construction and design of a light aircraft. The aircraft is to be constructed under current Civil Aviation Regulations so that students will gain an insight into all aspects of the process. By being a part of the construction team students will also experience the organisational requirements necessary to successfully complete a complex engineering project. The final outcome will be that students gain an understanding of: Light aircraft design methods; Innovative methods of construction; Techniques for selecting, sizing and stressing components; Regulatory requirements for certification; Off-Design requirements; Construction tolerances; Team-work requirements in undertaking complex engineering projects.

Course content will include Introduction to aircraft design and construction methods; fibreglass molding of complex components; bonding and glueing; structural reinforcement; manufacture of metal components; wooden components; aircraft grade materials; welding; riveting; bolting and other fasteners. Investigation of a typical aircraft configuration; component layout; alternate configurations; weight penalties or gains. Requirements for ancillary equipment; aircraft instruments; accuracy of instruments; engine and propeller selection; fuel system; navigation and communication systems. Aviation regulation; process of aircraft certification; aircraft categories; performance measurement and requirements; weight and balance; centre of gravity requirements.

### AERO1560

#### Introduction to Aerospace Engineering Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Two 1hr lec, one 1hr tut, one 3hr lab) per week **Prohibitions:** MECH1560 Introduction to Mechanical Engineering, MTRX1701 Mechatronics Engineering Introductory **Assessment:** Assignments, practical work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

This unit aims to develop an understanding of the role of aerospace engineers within industry, along with the overlying fundamentals of aerospace vehicle design, analysis performance and operation; skills in working in groups, communication and presentation of information; understanding of the fundamentals of vehicle manufacture, construction, servicing and repair; skills working with machine tools and hand tools.

Course content will include a glossary of terms for aerospace vehicles and their components; a brief introduction to aerodynamics, astronautics, aircraft and spacecraft performance; mechanics of flight, aerospace structures, materials and propulsion systems; the operating characteristics of modern vehicles, their uses and limitations; modern developments in aerospace; future trends, mass transport vehicles, aerospace planes, orbital vehicles; the limitations of the aerospace environment.

At the end of this unit student will have an understanding of: Workshop Practice. Fitting: measurement, measuring tools, marking tools, holding tools, hammers, cutting tool materials, cutting tool shapes, the machine tools: lathe, mill, grinder, drill, shaper, deburring and finishing operations. Welding: welding processes, distortions, flame cutting, resistance welding. Problems of welding aircraft materials. Heat treatment: definition and importance of heat treatment, forging, normalising, hardening, case hardening, stress relief. Fasteners: types of fasteners for aircraft, riveted, bolted, bonded, locking of fasteners. Maintenance: requirements for various aircraft components, engine overhaul, component life, lubrication, patches and repairs, serviceability of components.

### AERO2703

#### Aerospace Technology 1 Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (One 3hr lec/workgroup/demo session and one 2hr lab/tut session) per week **Assumed knowledge:** AERO1560 **Assessment:** Assignments; examination; group work; oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop in students an understanding of the background technologies and processes that are involved in the design, construction and operation of Aerospace vehicles.

At the end of this unit students will be able to select and use appropriate instrumentation to suit measurement and analysis needs for a wide range of Aerospace problems. Students will be able to

design and carry out calibration and validity checking experiments for such equipment. Students will become aware of the regulatory and liability requirements relating to all aspects of the Aerospace industry. Students will be able to carry out weight and balance checks on aircraft configurations, estimate performance parameters for the operation of aircraft and specify optimum flight conditions for any particular configuration.

Course content will include a survey of current practice in aviation measurement and instrumentation. The environment for aircraft operation. Introduction to pressure, velocity and force measurement devices; anemometers; transducers and accelerometers. Use of computer data acquisition systems; filtering; signal processing; A/D conversion. Signal post processing; mean; standard deviation; analysis using FFT's. Calibration of measurement devices. Civil Aviation regulations and airworthiness standards. Certification procedures. Standards. Weight and Balance control. Aircraft performance; take-off, climb; cruise; descent; landing; range and endurance. Manoeuvre performance. Mission Profiles and their relevance to an optimised design.

### AERO2705

#### Space Engineering 1 Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (One 3hr lec/tut/demo and one 2hr tut session) per week **Prerequisites:** AERO1560 (or MECH1560 or MTRX1701), MATH1001, MATH1002, MATH1003 and either MATH1004 or MATH1005 (or the advanced versions of the MATH units) **Assessment:** Assignments and examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to introduce students to the terminology, technology and current practice in the field of Space Engineering.

At the end of this unit students will be able to: identify and predict various orbits and trajectories for space craft; use appropriate instrumentation to suit measurement and analysis needs for a wide range of satellite operational problems. Students will become aware of the regulatory and liability requirements relating to all aspects of the Space industry.

Course content will include a survey of current practice in space engineering; Introduction to the technology required to enable successful operation of space vehicles; Launch system basics; basic flight mechanics and orbital mechanics; Vehicle stability and control; Introduction to spacecraft subsystems; attitude control, structures, thermal loading, mechanisms, power generation and storage, propulsion; liquid and solid rockets; Basic properties of the electro-magnetic environment in space; Introduction to Maxwell's equations; Application to analogue electronics, data acquisition systems; filtering; signal processing, amplification and signal transmission; Digital systems, A/D conversion, signal post processing; mean; standard deviation; analysis using FFT's; Encoding and decoding, error detection and correction; Basic Space Law and legislative issues; The Outer Space Treaty; The Space Activities Act; Standards.

### AERO2711

#### Space Engineering Project 1 Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Project work and the design of a Satellite or Launch Vehicle Sub-system. **Prerequisites:** Completed the junior years (first 2 years) of Aero(Space), Mechanical(Space) or Mechatronics(Space) Engineering. A WAM of > 75% is required as well as departmental permission from the Space Engineering Coordinator. **Assessment:** Final written report and an oral presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Summer/Winter School.

This unit of study aims to develop deeper practical knowledge in the area of Space systems engineering. Students who take this subject would be interested in developing design skills by working on the sub-system of a real satellite or launch vehicle. As the introductory element to the Space Engineering Projects, this unit allows students

to develop a deeper appreciation for the complexities of designing space systems, and if completed successfully will allow the student to take further Space Engineering Projects towards the sub-systems actual development.

### AERO3260

#### Aerodynamics 1

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Three 1hr lec & one 2hr tut/lab/demo session) per week. **Prerequisites:** AERO2201 or MECH2202 or AMME2200 **Assessment:** Assignments, lab reports and examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop in students a knowledge of the complex behaviour of airflow in the case of two dimensional aerofoil sections and three dimensional wings. To encourage hands-on experimentation with wind-tunnel tests to allow an understanding of these concepts and their range of applicability.

At the end of this unit students will be able to: predict flow properties for general aircraft wing sections to obtain lift, drag and pitching moment; extrapolate section results to predict full three dimensional wing behaviour; undertake experiments and analyse data to verify theoretical predictions; construct simple computer algorithms that will allow more complex geometries to be solved; understand the limitations of theory and the effect of second order parameters (Reynolds number, Mach Number) to the primary flow properties.

Course content will include: construction and designation of two dimensional aerofoil sections; point vortex model of aerofoil; Joukowski transformation theory; thin aerofoil theory; linear lift properties for sections; limiting effects such as stall; calculation of pitching moment coefficient; methods for estimation of boundary flow and friction drag calculations; viscous-inviscid panel method numerical solutions; modelling of three dimension wing flows; lifting line theory and vortex lattice method.; effects of downwash, aspect ratio, sweep angle and asymmetry.

### AERO3261

#### Propulsion

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Three 1hr lec & one 2hr tut) per week **Prerequisites:** AMME2200 or (MECH2201 and (AERO2201 or MECH2202)) **Assessment:** Assignment, report and examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop an understanding of the modern techniques used for aircraft propulsion. Students will gain skills in problem solving for aircraft propulsion systems ranging from propellers, gas-turbine engines to rockets.

This unit of study teaches the students the techniques used to propel aircraft and rockets. The students will learn to analyse various propulsion systems in use: propellers, gas turbines, rocket motors.

Course content will include: Propulsion unit requirements subsonic and supersonic flight; thrust components, efficiencies, additive drag of intakes; Piston engine components and operation; Propeller theory; Operation, components and cycle analysis of gas turbine engines, turbojets, turbofans, turboprops, ramjets; Components: compressor; fan; burner; turbine; nozzle, efficiency of components; off-design considerations; Operation, components and thermodynamics of rocket motors; Dynamics of rocket flight, orbital velocity; staging; Future directions; minimisation of noise and pollution; sub-orbital propulsion systems; scram-jets; hybrid engines.

### AERO3360

#### Aerospace Structures 1

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (3 lec and 1 tut) per week **Prerequisites:** (AMME2301 or AERO2300) and one of (MATH2061 or MATH2067 or (MATH2001 and MATH2005)) **Assessment:** Assignments and examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop a student's understanding of the theoretical basis of advanced aerospace structural analysis; and introduce students to the solution of real-world aircraft structural problems. This unit of study will develop the following attributes: An understanding of the derivation of the fundamental equations of elasticity and their application in certain analytical problems; An understanding of plate theory and the ability to use this to obtain analytical solutions for plate bending and buckling problems; An understanding of energy-method solution techniques for structural problems; An understanding of the basic principals behind stressed-skin aircraft construction and the practical analysis of typical aircraft components, including the limitations of such techniques.

At the end of this unit students will have an understanding of: 2-D and 3-D elasticity: general equations and solution techniques; Energy methods in structural analysis, including the principles of virtual work and total potential and complimentary energies; Fundamental theory of plates, including in-plane and bending loads as well as buckling and shear instabilities; Solution techniques for plate problems including: Navier solutions for rectangular plates; Combined bending and in-plane loading problems; Energy methods for plate-bending; and Plate buckling for compression and shear loadings; Bending of beams with unsymmetrical cross-sections; Basic principals and theory of stressed-skin structural analysis; Determination of direct stresses and shear flows in arbitrary thin-walled beams under arbitrary loading conditions including: Unsymmetrical sections, Open and closed sections, Single and multi-cell closed sections, Tapered sections, Continuous and idealized sections; The analysis of common aircraft components including fuselages, wings, skin-panels, stringers, ribs, frames and cut-outs; The effects of end constraints and shear-lag on the solutions developed as well as an overall appreciation of the limitations of the solution methods presented.

### AERO3460

#### Aerospace Design 1

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs and Tut 3hrs) per week **Prerequisites:** AMME2301 or AERO2300; MATH1001; MATH1002; MATH1003 **Assessment:** Assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to introduce students to the theory and practice of aircraft structural component design. In doing so it will emphasize all the considerations, trade-offs and decisions inherent in this process and thus enable students to gain an understanding of why aircraft structures are designed in the way they are with respect to structural, manufacturing and cost considerations.

At the end of this unit students will be able to understand the design process, especially as it applies to aircraft structural component design; Have a familiarity with some of the practice of aircraft component structural design; An increasing familiarity with typical aircraft structural paradigms and how they work and can be analysed along with the primary failure modes that need to be considered; An understanding of the importance of different failure modes for different components and how these relate to load-conditions and understanding of some of the legal and ethical requirements of aircraft design engineers; A basic understanding of the regulatory framework in which aircraft design is conducted.

### AERO3465

#### Aerospace Technology 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (One 4hr session and one 2hr session of lec, tut and prac) per week **Prerequisites:** AERO1560 or AERO1701; MECH2400; AMME2301 or AERO2300 **Assumed knowledge:** AERO1400; AMME2302 **Assessment:** Assignment, Design-built-Test Module, Lab tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop an understanding of the aerospace industry procedures for design, analysis, and testing of aircraft and aerospace vehicle components. To provide a Design-Build-Test experience in putting into practice learning outcomes from this and other previously completed units of study by working on a small structure which is representative of a typical light metal aircraft. To provide an introduction to composite materials and structures for aerospace vehicles. To provide an introduction to fatigue and damaged tolerance analysis of metallic aircraft structures. To provide skills and knowledge in structural testing methods, procedures, techniques, and equipment. At the end of this unit students will have gained practical skills relevant to working on typical modern aircraft and aerospace vehicle components. They will learn from methods, techniques, and experiences from the modern aerospace industry. Experiential learning outcomes through verifying analyses with actual testing of fabricated component and the experience of a full design-build-test cycle of a typical aircraft structural component.

Course content will include design methods, internal loads calculations, stress analysis, design for manufacture; joints and fasteners; test procedures; fatigue and damage tolerance; composites; the art of design.

### AERO3560

#### Flight Mechanics 1

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 3hrs, Tut 2hrs) per week. **Prerequisites:** MECH2500 or AMME2500 **Assessment:** Major project, flight simulation, assignments and examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop an understanding of aircraft longitudinal equilibrium, static stability, dynamic stability and response. Students will develop an understanding of the importance and significance of flight stability, will gain skills in dynamic system analysis and will learn mathematical tools used for prediction of aircraft flight behaviour. Students will gain skills in problem solving in the area of flight vehicle motion, and learn the fundamentals of flight simulation.

At the end of this unit students will be able to understand: aircraft flight conditions and equilibrium; the effects of aerodynamic and propulsive controls on equilibrium conditions; the significance of flight stability and its impact of aircraft operations and pilot workload; the meaning of aerodynamic stability derivatives and their sources;

the effects of aerodynamic derivatives on flight stability; the impact of flight stability and trim on all atmospheric flight vehicles, including launch and re-entry of space vehicles. Students will also be able to model aircraft flight characteristics using computational techniques and analyse the aircraft equations of rigid-body motion and to extract stability characteristics.

Course content will include static longitudinal aircraft stability: origin of symmetric forces and moments; static and manoeuvring longitudinal stability, equilibrium and control of rigid aircraft; aerodynamic load effects of wings, stabilisers, fuselages and power plants; trailing edge aerodynamic controls; trimmed equilibrium condition; static margin; effect on static stability of free and reversible controls.

### AERO3660

#### Aerospace Management

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** One 3hr session and one 2hr session of lec/tut/prac per week **Assessment:** Assignments, reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop an understanding of the current state of aerospace manufacturing for the Australian aviation industry. Students will gain skills in aerospace engineering management.

At the end of this unit students will be able to apply risk management skills to a variety of industry situations and use appropriate methodology to manage these situations. Students will also become proficient in

the use of Project Management tools and learn how to apply them to industry standard problems.

Course content will include principles and practice of aviation and airline management; discussion and analysis of airline operations; flight safety and airworthiness standards; risk and reliability management.

### AERO3711

#### Space Engineering Project 2

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Project work and the design and development of a prototype Satellite or Launch Vehicle Sub-system. **Prerequisites:** AERO2711 Space Engineering Project 1; a WAM of > 75% is required as well as departmental permission from the Space Engineering Coordinator. **Assessment:** Oral presentation and critique of the prototype design. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Summer/Winter School.

This unit of study is for those students who have completed Space Engineering Project 1, and who wish to extend their design into the prototype phase. Students who take this subject would be interested in manufacturing a sub-system for a real satellite or launch vehicle. This unit allows students to develop a deeper appreciation for the complexities of designing and building space sub-systems, and if completed successfully will allow the student to take further Space Engineering Projects towards the final development of a sub-system ready for launch.

### AERO3760

#### Space Engineering 2

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (One 2hr lec & one 3hr tut) per week. **Prerequisites:** AERO2705 or AERO2702 **Assessment:** Assignments, group work, log book **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

This unit aims to provide students with a learning environment that promotes systems thinking and allows students to develop skills in systems analysis and design. In particular the unit will focus on Aerospace systems, and students will develop both theoretical and practical skills in the area of systems engineering for this discipline. The primary objective is to develop fundamental systems engineering and systems thinking skills.

At the end of this unit students will be able to: define the requirements process and be able to apply it to aerospace systems design.; conduct requirements analysis for an aerospace system and to drill down through requirements breakdown and the use of the V-diagram in this analysis; conduct functional and technical analysis and determine design drivers in a system; manage the use of a log book and its application in engineering design; develop technical skills in the design and development of satellite subsystems; conduct appropriate interaction processes between team members for the successful achievement of goals.

Course content will include fundamentals of systems engineering; satellite subsystems; systems design.

### AERO4206

#### Rotary Wing Aircraft

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour Lectures and one 2 hour Tutorial per week **Prerequisites:** AERO3260 Aerodynamics 1 **Assumed knowledge:** Material as covered in ThermoFluids, year 2 and Aerodynamics 1 and Flight Mechanics 1, year 3. **Assessment:** Assessment semester project based assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop an understanding of the theory of flight, design and analysis of helicopters, auto-gyros and other rotary wing aircraft. Students will gain an appreciation of the extra difficulties involved when the vehicle flow is cyclic in nature.

At the end of this unit students will be able to: Identify and predict the various flow states of a generic lift producing rotor; Use appropriate methods to determine the forces and torques associated with the rotor; Estimate values for typical stability derivatives for helicopters and be able to construct a simple set of stability analysis equations for the vehicle; become aware of the regulatory and liability requirements relating to all aspects of commercial helicopter operation and maintenance.

Unit content will include introduction to rotary wing aircraft; vertical flight performance; forward flight performance; blade motion and control; dynamics of rotors; rotor-craft stability and control; rotor blade design; mechanical reliability; alternate or innovative rotary wing vehicles.

### AERO4260

#### Aerodynamics 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 3hrs & Tut 2hrs) per week. **Prerequisites:** AMME2200 or (MECH2201 and (AERO2201 or MECH2202)) **Assumed knowledge:** MECH3261 or AERO3260 **Assessment:** Assignments and examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to introduce students to: elementary and advanced topics in Gasdynamics (High Speed Flows); Physical aspects of gas flows at subsonic and supersonic flows will be brought out. Formation and propagation of shocks and other features will be explained. Equations for shock, expansion waves and other phenomena of high speed flow will be developed; Advanced topics covered include Method of Characteristics, Unsteady Flows, Transonic and Hypersonic Flows.

At the end of this unit the student will be able to calculate a high speed flow about an aerofoil and compressible flow through a duct of varying cross section and will have a good appreciation of Transonic and Hypersonic Flows.

the student to elementary and advanced topics in Gasdynamics (i.e., High Speed Flows); physical aspects of gas flows at subsonic and supersonic flows will be brought out; formation and propagation of shocks and other features will be explained; equations for shock, expansion waves and other phenomena of high speed flow will be developed.

At the end of the course, the student will be able to calculate a high speed flow about an aerofoil and compressible flow through a duct of varying cross section. The student will have a good appreciation of Transonic and Hypersonic Flows.

Course content will include review of Equations of Gasdynamics; One-Dimensional Gas Flow, Isentropic Flows, Normal Shock, Flow in A converging and a Converging-Diverging Nozzle; Steady two-dimensional supersonic flow; shock waves; normal and oblique; method of characteristics; Two-dimensional supersonic aerofoils. Introduction to three-dimensional effects; Unsteady Flows, Moving Shock, Shock Tube Flow; Transonic Flow, Compressible Boundary Layers, Approximate.

### AERO4360

#### Aerospace Structures 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (One 2hr lec, one 1hr lec/tut, one 3hr lab session) per week. **Prerequisites:** (AMME2301 or AERO2300) and (AERO3360 or AERO3301) **Assumed knowledge:** An understanding of aerospace structural designs (AERO3465). **Assessment:** Assignments, major project, quizzes and examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to teach fundamentals of modern numerical and analytical techniques for evaluating stresses, strains, deformations and strengths of representative aerospace structures. In particular

the focus is on developing an understanding of: Fundamental concepts and formulations of the finite element methods for basic structural analysis; Elements for typical aerospace structures, such as beams/frames, plates/shells, and their applications and limitations; Finite element techniques for various types of problems pertinent to aerospace structures; d)and, developing hands-on experience of using selected commercial finite element analysis program.

At the end of this unit students will have covered: Introduction to Finite Element Method for modern structural and stress analysis; One-dimensional rod elements; Generalization of FEM for elasticity; Two- and three-dimensional trusses; FEA for beams and frames in 2D and 3D; Two-dimensional problems using constant strain triangular elements; The two-dimensional isoparametric elements; Plates and shells elements and their applications; FEA for axisymmetric shells and pressure vessels, shells of revolution; FEA for axisymmetric solids subjected to axisymmetric loading; FEA for structural dynamics, eigenvalue analysis, modal response, transient response; Finite element analysis for stress stiffening and buckling of beams, plates and shells; Three-dimensional problems in stress analysis; Extensions to the element library, higher order elements, special elements; Constraints; FEA modeling strategy; FEA for heat conduction; FEA for non-linear material and geometric analysis.

### AERO4460

#### Aerospace Design 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** One 3-hour lecture and one 2-hour tutorial per week **Prerequisites:** MECH2400; AERO3460 or (AERO3450 and (AERO3400 or AERO3401)) **Assumed knowledge:** AERO1400 Introduction to Aircraft Construction and Design and AERO3465 **Assessment:** Group work, design reports and presentations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop an understanding of the application of design to the modern aerospace industry. Students will gain an overview of how to manage a design team and will also gain skills in carrying out detailed design problems.

Course content will include: Design requirements; Sources of information for aircraft design; Configuration design: performance, weight and balance, propulsion; Aerodynamic design: lift, drag and control; Structural design: loads, materials; Philosophies of design and analysis; System design: requirements and specification; System design procedures; systems integration.

### AERO4560

#### Flight Mechanics 2

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lec 2hrs & Tut 3hrs per week

**Prerequisites:** AERO3500 or AERO3560; (MECH3500 and MECH3800) or AMME3500

**Assessment:** Assignments and examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop an understanding of the application of flight mechanics principles to modern aircraft systems. Students will gain skills in problem solving in the areas of dynamic aircraft behaviour, aircraft sensitivity to wind gusts, control systems development and aircraft handling analysis.

At the end of this unit students will be able to: Understand the nature of an aircraft's response to control inputs and atmospheric disturbances, including the roles of the various modes of motion; Analyse an aircraft's response to control inputs in the frequency domain using Laplace Transforms and Transfer Function representations; Represent and model wind gust distributions using stochastic methods (Power Spectral Density); Analyse an aircraft's response to disturbances (wind gust inputs) by combining Transfer Function representations with gust PSD's; Understand the principles of stability augmentation systems and autopilot control systems in aircraft operation, their functions and purposes; Understand basic feedback control systems and classical frequency domain loop analysis; Understand the characteristics of closed loop system responses; Understand the characteristics of PID, Lead, Lag and Lead-Lag compensators, and to be competent in designing suitable compensators using Bode and Root-locus design techniques; Design multi-loop control and guidance systems and the reasons for their structures.

### AERO4701

#### Space Engineering 3

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (One 2hr lec and one 2-3hr tut) per week **Prerequisites:** (AERO3560 or AERO3500) and (AERO3760 or AERO3700) and (AMME3500 or MECH3800) **Assessment:** Assignments.

**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to teach the fundamentals of Inertial Navigation techniques as applied in the Aerospace field. In particular the focus is on developing an understanding of: Inertial navigation equations which provide information about the position, velocity and attitude of aerospace vehicles; Inertial sensors, their function, and how errors in the sensors and the algorithms impact on the navigation solutions; The basic concepts behind the control of position and velocity of a spacecraft (Orbital Mechanics) and more detailed analysis of the control of attitude of a spacecraft (Attitude Determination and Control (ADC).

At the end of this unit students will be able to: derive the fundamental inertial navigation equations; understand the dynamics of the inertial navigation equations and how the various components within the algorithm interact with one another; implement the inertial navigation equations both with simulated and real data; understand what errors are commonly associated with inertial navigation and how they impact on navigation performance; appreciate that other external sensors are normally used to constrain errors associated with inertial navigation; understand how control of the attitude of spacecraft requires sensing as part of the feedback process, and that this comes predominately from the inertial navigation system; implement close loop control systems, with inertial feedback, in the attitude control of a spacecraft.

### AERO4711

#### Space Engineering Project 3

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Project work and the final design and development of a Satellite or Launch Vehicle Sub-system.

**Prerequisites:** AERO3711 Space Engineering Project 2; a WAM of > 75% is required as well as departmental permission from the Space Engineering Coordinator. **Assessment:** Final report and critique of the sub-system design.

**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Summer/Winter School.

This unit of study is for those students who have completed Space Engineering Projects 2, and who wish to formalise their design into the launch phase. Students who take this subject would be interested in manufacturing the final sub-system for a real satellite or launch vehicle. This unit allows students to develop a deeper appreciation for the complexities of designing and building space sub-systems, and provide an opportunity for the actual launch of the sub-system. Launch of the sub-system will be dependent on the current opportunities existing with international collaborators.

## AERO4712

### Space Engineering Project 4 Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Project work and the final development and integration of a Satellite or Launch Vehicle Sub-system. **Prerequisites:** AERO4711 Space Engineering Project 3; a WAM of > 75% is required as well as departmental permission from the Space Engineering Coordinator. **Assessment:** Final report and critique of design for insertion of the sub-system into the actual Satellite or Launch Vehicle. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Summer/Winter School.

This unit of study is for those students who have completed Space Engineering Projects 3, and who wish to finalise their design by developing the interfacing and insertion phases into Satellite or Launch Vehicle system. Students who take this subject would have completed the previous three Space Engineering Projects, and have been provided with the opportunity to place their system into an actual system. Launch of the sub-system will be dependent on the current opportunities existing with international collaborators.

## AFNR1001

### The Rural Environment Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Daniel Tan **Session:** Semester 1 **Classes:** (2 lec, 1 tut, 2 prac)/wk **Assessment:** On-line assessment (problem based learning), practical reports and plant collection, practical tests, two hr final exam. **Practical field work:** Field practical sessions allow 'hands-on' experience with agronomy and animal husbandry **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

This unit allows students to discuss Australian rural production and the Australian environment, their interrelation, the issues agriculture and the environment face for the future and the context in which this takes place. It is a core unit for students in BScAgr, BHortSc, BLWSc, BAnVetBioSc and is the main introductory unit for further studies in the Faculty. For studies in the area of Agriculture and Natural Resources, it is important to be able to identify and describe common domestic animals, crops and weeds, broad acre production systems, key environmental issues and to be able to discuss their significance. Students completing this unit of study will be able to relate the Australian environment to opportunities and limitations for agronomy, animal husbandry and native animal and plant species, partly through problem based learning (PBL) in relation to a topical rural issue. In addition students will practice the identification of economic plant species and explore the ecology of pests and weeds and related integrated management practices. Through the problem based activities, students will learn valuable research skills and how to critically assess sources of information through library and database research. Through the production of reports and essays, students can demonstrate academic writing and recognise the importance of academic honesty.

## AFNR1002

### Climate and the Environment Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Daniel Tan **Session:** Semester 2 **Classes:** (2 lec, 1 tut & 2 prac)/wk **Assessment:** On-line assessments (problem based learning), laboratory reports and web activities, 2 hr final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

This unit allows the students to discover how climate influences the biophysical and biotic environment and how this affects rural production, native and domestic animals, crops and pastures, native

vegetation and pest populations; it also highlights the importance of physics in solving problems in relation to climate and rural production. It is a core unit for students in BScAgr, BHortSc, BLWSc, BAnVetBioSc, builds on knowledge gained in AFNR1001 and lays the basis for studies in the biophysical area of the Faculty. For studies in the area of Agriculture and Natural Resources, it is important to develop knowledge and quantitative skills in the basic physical principles and the main drivers for climate and climate change in an agricultural context. Students completing this unit of study will be able to reflect on the ecosystem interactions between animals, plants and the biophysical environment. In addition, students will experiment with how changes in climate and spatial climate variability can affect animal and pest populations, vegetation densities and cropping patterns and its relation to management decisions. Using problem based activities, students will learn valuable research skills and to critically assess sources of information through library and database research. Students will demonstrate academic writing by producing reports and essays and recognise the importance of academic honesty.

## AFNR4001

### Professional Experience Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Ms Lynn Henry, Dr Damien Field and the Dean of the Faculty **Session:** Semester 2 **Classes:** 4 workshops 3 hours each over 4 years **Assessment:** One 2hr exam, 2 (multi media) case studies (equivalent to 4000 words), 4 blog postings (1000 words total). **Practical field work:** 60 days of professional experience, 1 weeklong excursion **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc Agr.

This unit of study is designed to allow students to critically reflect on the relationship between the rural enterprise and environment and how they can contribute to the future decisions and management affecting rural community. It is a core unit of study in 4th year for the BAgEc, BScAgr, BLWSc, BResEc, BHortSc which requires students to complete 60 days of professional experience with the expectation that students will examine the nature of facts from their degree in this environment. The unit will be counted towards 4th year, but professional experience placements will normally be undertaken throughout the degree (full details are available in the Faculty handbook). The Professional Experience program has been developed to enable students to experience range of activities, such as research, extension, on-farm and industry both in the rural and urban to complement their learning within their individual degree programs. Specific emphasis will also be placed on students reflecting on their personal and professional development through these experiences. On completing this unit, students will be able to integrate their broad range of knowledge of the rural environment and enterprises with theories and concepts from across disciplines. Students will be able to use these new understandings to support and guide the future developments in the rural enterprise. This would require the students to critically reflect on the pivotal relationships between the academic degree, rural environment, professional experience, and beliefs and values of the rural community. By developing and presenting the portfolio and engaging in other online activities the students will enhance their skills in inquiry, information literacy and communication. In particular the autonomous development of case studies reflecting the contemporary issues in agriculture the students will have to consider their understandings of ethical, social and professional issues and further develop the personal and intellectual autonomy.

## AFNR4101

### Research Project A Agriculture, Food and Natural Resources

**Credit points:** 12 **Teacher/Coordinator:** Dr Lindsay Campbell **Session:** Semester 1 **Classes:** No formal classes, approx 18h per week **Prerequisites:** [HORT3005 and GENE2001 and PPAT3003 and PLNT3001/3901 and PLNT3002/3902] or [LWSC3005 and SOIL3008 and SOIL2004 and BIOM3006] or [AGCH3025 and PPAT3003 and SOIL2004 and AGRO3004] or AGRO3002

or SOIL3004 or LWSC3004 or HORT3005 or PPAT3003 **Assessment:** Oral presentation, literature review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr.

This unit aims to develop a student's ability to undertake a major research project in an area of specialization. The unit builds on theoretical and applied knowledge gained across most of the units of study undertaken throughout their degree program. This unit is a corequisite with AFNR4102 and each student will work with an academic supervisor in an area of specialization and develop a well defined research project to be executed. The research project is undertaken to advance the students ability to build a well-developed research skills, a strong analytical capacity, and the ability to provide high quality research results demonstrating a sound grasp of the research question. Working with an academic supervisor students will develop their ability to define a research project including the producing testable hypotheses, identifying existing knowledge from reviewing the literature and the design and execution of a research strategy towards solving the research question. Students will build on their previous research and inquiry skills through sourcing a wide range of knowledge to solve the research problem and enhance their intellectual and personal autonomy by means of the development of experimental programs. Students will improve their communication skills through oral presentation of their research project proposal and the writing of a comprehensive literature review.

### AFNR4102

#### Research Project B

#### Agriculture, Food and Natural Resources

**Credit points:** 12 **Teacher/Coordinator:** Dr Lindsay Campbell **Session:** Semester 2 **Classes:** No formal classes, approx 18h per week **Prerequisites:** AFNR4101 **Assessment:** Oral presentation, research paper. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr.

This unit is a continuation of the major research project initiated in AFNR4101 and continues to build on theoretical and applied knowledge gained across most of the units of study undertaken throughout their degree program. Working with their academic supervisor in the area of specialization the student will continue to pursue the defined research project towards presenting final results and conclusions. The research results are presented in a format of a research paper as submitted to a research journal. The research paper and corrected literature review is combined and presented together as a thesis. Students will continue to build their research skills, develop strong analytical capacity, demonstrate a sound grasp of the topic, and an ability to interpret results in a broad framework. Working with an academic supervisor students will develop their ability to produce results of high quality, draw reliable conclusions and identify future areas avenues of research. Students will build on their previous research and inquiry skills through sourcing a wide range of knowledge to solve the research problem and enhance their intellectual and personal autonomy by means of the managing the research program. Students will improve their communication skills through oral presentation of their research findings and the writing of a research paper.

### AGCH2003

#### Rural Environmental Chemistry

#### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Robert Caldwell **Session:** Semester 1 **Classes:** 3 lec/week and 30 hours of lab/semester **Prerequisites:** 12 credit points of Junior Chemistry **Prohibitions:** AGCH2001, AGCH2002 and CHEM2404 **Assessment:** One 2 hr exam, laboratory reports, theory of prac test, lecture quiz. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Environmental), B Sc Agr, UG Study Abroad Program.

This introductory unit of study consists of aspects of chemistry relevant in studies of basic and applied biological sciences including agriculture, food and the rural environment. Lecture topics include an introduction to quantitative aspects of biophysical, environmental and aquatic

chemistry with particular reference to protocols for specimen sampling and maintenance of specimen quality; the principles of basic analytical methods such as spectroscopy, chromatography and electrochemistry; environmental aspects of water such as thermal properties and its behaviour as a solvent of hydrophobic solutes, surfactants, neutral hydrophilic solutes, salts and other electrolytes, and gases. The lectures will also include environmental nutrient cycling (C, N, S, O, P, micronutrients) with reference to pesticides, herbicides, organic and inorganic pollutants affecting agricultural produce and the environment, and gases of environmental concern. Ten laboratory sessions will demonstrate aspects of analytical chemistry including: elemental analysis of foods and natural waters, spectrophotometry, chromatographic techniques, preparation of buffers, fundamentals of pH and conductance measurement, water as a solvent including the effect of surfactants and electrolytes. Students will analyze natural water samples using the skills acquired in earlier laboratory sessions and write an environmental assessment from their findings. An on-line tutorial on safety procedures in a chemistry laboratory is a pre-requisite for commencement of laboratory experiments.

### AGCH2004

#### Agricultural Chemistry

#### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Caldwell (Coordinator), Prof Fraser **Session:** Semester 1 **Classes:** 3 lec/wk and 33 hr prac **Prerequisites:** 12 junior credit points of Chemistry **Prohibitions:** AGCH2003 **Assessment:** One 2hr theory exam, one 1 hr theory of prac exam, lecture quiz, laboratory reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc.

This introductory unit of study consists of aspects of chemistry relevant in studies of basic and applied biological sciences including agriculture, food and the rural environment. Lecture topics include an introduction to quantitative aspects of bio-analytical chemistry; the principles of basic analytical methods such as spectroscopy, chromatography and electrochemistry; environmental aspects of water and its behaviour as a solvent of hydrophobic solutes, surfactants, neutral hydrophilic solutes, salts and other electrolytes, and gases. A component of the unit will be devoted to basic biological chemistry and enzymology having particular emphasis on biochemical processes in animals. Six laboratory sessions will demonstrate aspects of analytical chemistry including: elemental analysis of foods and natural waters, spectrophotometry, chromatographic techniques, preparation of buffers, fundamentals of pH measurement. A further five laboratory sessions will involve experiments in the preparation and/or properties of carbohydrates, proteins, lipids and DNA. One session will examine some fundamental properties of enzymes.

### AGCH3025

#### Chemistry and Biochemistry of Foods

#### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Meredith Wilkes, Dr Robert Caldwell, Prof Les Copeland **Session:** Semester 1 **Classes:** 3 lec/wk; 24 hrs lab **Prerequisites:** AGCH2003 or AGCH2004 or PLNT2001 or PLNT2901 or BCHM2071 or BCHM2072 or 6 credit points of Intermediate units in Chemistry **Prohibitions:** AFNR5102 **Assessment:** One 2-hr theory exam, one 1-hr theory of prac exam, practical reports, lecture quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc, B Sc (Environmental), B Sc (Nutrition), B Sc Agr, UG Study Abroad Program.

This unit of study aims to give students an understanding of the properties of food constituents, and the interactions between these constituents during food processing, storage and digestion. The unit will develop an understanding of the relationship between form and functionality of constituents and the concept of fitness-for-purpose (ie, quality) in converting agricultural products into foods. Students will gain an appreciation of the relationship between chemical composition and properties of macroconstituents (carbohydrates, proteins, lipids) and microconstituents (vitamins, minerals, flavour and antinutritional chemicals) and their functions in plant and animal based foods. The material presented in lectures and practical classes will enable students to develop research and inquiry skills and an analytical

approach in understanding the biochemistry of foods, food processing and storage. On completing this unit, students will be able to describe the chemical and biochemical properties of major food constituents, and demonstrate an understanding of the functionality of these constituents in food processing and nutrition. Students will have gained experience in laboratory techniques used in industry for the analysis of some food products, and information literacy and communication skills from the preparation of practical reports.

#### Textbooks

Laboratory notes will be available for purchase from the Copy Centre in the first week of semester and lecture notes and readings will be made available through WebCT. There is no recommended textbook.

### AGCH3026

#### Food Biotechnology

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Meredith Wilkes, Dr Robert Caldwell, Prof Les Copeland **Session:** Semester 1 **Classes:** 3 lec/wk; 24 hrs lab **Prerequisites:** AGCH2003 or AGCH2004 or PLNT2001 or PLNT2901 or BCHM2071 or BCHM2072 or 6 credit points of Intermediate units in Chemistry **Corequisites:** AGCH3025 **Prohibitions:** AFNR5103 **Assessment:** One 2-hr exam, practical reports, one 1-hr theory of practical exam, oral and written presentation on a case study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc, B Sc (Environmental), B Sc (Nutrition), B Sc Agr, UG Study Abroad Program.

This unit aims to give students an understanding of the chemistry, biochemistry and biotechnology of analytical and diagnostic methods and manufacturing processes used in the conversion of raw products into foods. Knowledge of food constituents gained in AGCH3025 will be applied to develop an understanding of: the use of enzymes in food processing and diagnostic technologies; processing of cereal, legume and oilseed grains, and livestock products, into foods; doughs and baking technologies; the evaluation of foods and food quality. Emphasis is placed on current issues faced by the food industry (including GM technology, organic production, food safety) through a series of special guest lectures from people connected with the food industry. On completing this unit, students will have gained an enhanced understanding of food production and manufacturing systems, the processing of raw ingredients into food products, and food analysis and evaluation. Students will have gained experience in laboratory techniques used in industry for the analysis of some food products, and information literacy and communication skills from the preparation of a case study and practical reports.

#### Textbooks

Laboratory notes will be available for purchase from the Copy Centre in the first week of semester and lecture notes and readings will be made available through WebCT. There is no recommended textbook.

### AGCH3032

#### Land and Water Ecochemistry

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Professor Ivan Kennedy, Dr Robert Caldwell **Session:** Semester 2 **Classes:** 5-day field trip in AVCC common break; 20 hr lectures/tutorials, 25 hr laboratory classes and project during semester **Prerequisites:** AGCH2003 or AGCH2004 or PLNT2001 or CHEM24XX or BCHM2XXX or ENVI2001 **Prohibitions:** AGCH3030, AGCH3031 **Assessment:** One 2 hr exam, field trip report and presentation, prac and project reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

This field-oriented unit will develop professional expertise in rural ecochemistry, measuring impacts on sustainability and seeking solutions to chemical problems at the catchment scale. AGCH3032 is an elective unit suitable for the BSc, BScAgr, BLWSc, BHortSc, BResEc and BAnVetBioSc degrees, building on intermediate units in chemistry or biochemistry. It will promote knowledge and professional skills related to key chemical processes in ecosystems causing risks to soil and water resources, the quality of agricultural produce and to ecological biodiversity. These will be examined by quantitative risk analysis, targeted monitoring and remediation, seeking innovative solutions (e.g. IPM and genetic modification).

A field trip in the AVCC break and professional report on a chosen topic will investigate relevant case studies at selected centres in eastern Australia doing innovative research on global warming and climate change, soil and water quality and environmental protection. Lectures will provide knowledge in the environmental C, N and S cycles important for sustaining action in ecosystems, the nature of greenhouse gases and mitigation of their production including C sequestration, risks to biota (soil, water, plants, animals) from acidification and innovative means of remediation, environmental risk from pesticides and other pollutants, monitoring and their remediation. In laboratory exercises, students will gain skills in relevant analyses using GC, LC, mass spectrometry and ELISA. The assessment procedures are designed to provide students with skills in definition of research problems and risk assessment, quality in analyses, risk management and remediation, and effective communication of outputs.

### AGCH4007

#### Instrumentation in Analytical Chemistry

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Robert Caldwell **Session:** Semester 1 **Classes:** Four student contact hours on average per week: Lectures: 13 hours (in weeks 1 to 13); Laboratories: 8 x 3 h **Prerequisites:** PLNT2001, AGCH2003 or AGCH2004 **Assessment:** One 2hr exam, laboratory work reports, one major problem solving assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

This unit of study is designed to expose students to the principles and technology associated with modern analytical instrumentation. This unit plays an important role for students undertaking complementary studies in analytical food or environmental chemistry. Students are given the theoretical principles behind the instrumentation and wherever possible given hands-on training in the use of that instrumentation. At the conclusion of this unit, students should be able to develop software analysis protocols for several analytical instruments, carry out analytical procedures, and perform basic fault-finding diagnostics. Students will be able to confidently assert that they have had experience in certain types of analytical procedures and operations using a range of analytical instrumentation.

### AGCH4021

#### Agricultural Chemistry Honours A

##### Agriculture, Food and Natural Resources

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B ST (Hons), B Sc (Environmental)(Hons), B Sc (Hons), UG Study Abroad Program.

Students enrolled in the Honours program study various advanced aspects of Agricultural Chemistry. The program may include lectures, tutorials, seminars and practicals. Students will undertake a research project. Assessment will include the project and may include examinations and classwork.

### AGCH4022

#### Agricultural Chemistry Honours B

##### Agriculture, Food and Natural Resources

## AGEC1006

### Economic Environment of Agriculture Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Ms Lynn Henry **Session:** Semester 2 **Classes:** (3 lec, 1 workshop)/wk **Prohibitions:** AGECE1003, AGECE1004  
**Assumed knowledge:** HSC Mathematics **Assessment:** One two hour exam, workshop papers, mid semester exam. **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B Sc Agr, UG Study Abroad Program.

To give students an overview of the structure, viability and importance of the agricultural sector in the Australian economy. It is a core unit of study in the BScAgr, BHortSc and BAnVetBioSc degrees. It is designed to give an understanding of the basic economic principles and how they relate to Australian agriculture. Students will look at basic economic theory and concepts and then apply these concepts to solve simplified versions of real problems faced by the agriculture and resource sectors. Students will look at the relationship between these concepts and the concepts learnt within their science related courses. Students will be able to analyse economic concepts and apply these concepts to real world scenarios. They will be able to synthesis and comprehend the relationship between the economic and science disciplines. The students will gain skills through workshop based tasks, information literacy and communication skills through the presentation of the workshop reports and discussion throughout the workshop.

## AGEC1101

### Agricultural and Resource Systems Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 1, Semester 2 **Classes:** (3x1hour lectures, 1x1hour tutorial)/week **Prohibitions:** AGECE1001 **Assumed knowledge:** HSC Mathematics or HSC Mathematics Extension 1 **Assessment:** 1x1hour mid-semester exam, 1x2hour final exam, 1xassignment, tutorial papers. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

An introductory unit of study which serves as a foundation for later units in agricultural economics, and introduces some of the basic economic principles required in the discipline of agricultural and resource economics. Topics covered include the agricultural and resource industries in the Australian and world economies; changing place of agriculture in world economies; place of agriculture in economic development; economic and physical factors determining the location of agricultural and resources industries; the changing structure of the Australian agricultural and resource sectors; the physical and biological environment in which farm firms operate; issues in natural resources.

## AGEC1102

### Agricultural Economics 1

## Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 1, Semester 2 **Classes:** (3x1hour lectures, 1x1hour tutorial)/week **Corequisites:** AGECE1101 **Prohibitions:** AGECE1002 **Assumed knowledge:** HSC Mathematics or HSC Mathematics Extension 1 **Assessment:** 1x1hour mid-semester exam, 1x2hour final exam, 1xassignment, tutorial papers. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

The unit applies principles studied in introductory microeconomics to the agricultural sector. The first part of the unit is focused on basic concepts of supply, demand, equilibrium in agricultural markets, and how markets can be modelled mathematically. Market dynamics are considered. The second part of the unit is focused on agricultural business decision making. Concepts of income, cost and profit, their measurement and documentation in farm business accounts, ownership structures and taxation issues are covered. Sources of risk in agriculture, alternative management strategies, and basic techniques of decision making in the face of risk are explored.

## AGEC2101

### Market and Price Analysis Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 2 **Classes:** (2-3 lec & 1x1hour tut)/wk **Prerequisites:** ECON1001 or AGECE1006 or (AGECE1003 and AGECE1004) or RSEC1031 **Prohibitions:** AGECE2001 **Assessment:** Mid semester exam (1 hour), final exam (2 hours), tutorial assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit focuses on the nature of agricultural and resource commodity markets, market demand relationships, market supply relationships, price determination under alternative market structures, marketing margin relationships, derived demand for inputs, spatially and temporally related markets, market dynamics, price expectations, commodity futures markets and other pertinent topics. Applied examples from the agricultural and resource industries and the overall economy will be used throughout the semester as illustrations of the principles involved.

## AGEC2102

### Agribusiness Marketing Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Ms Elizabeth Nolan **Session:** Semester 1 **Classes:** (2 lec, 1 tut)/wk **Prerequisites:** AGECE1006 or (AGECE1003 and AGECE1004) or AGECE1002 or AGECE1102 or RSEC1031 or AGECE1031 **Assessment:** One 45 minute mid semester, one group presentation based on individual case studies, one 2000 word case study, one 2hr exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit of study is designed to provide an introductory understanding of agribusiness marketing in a modern context.

The unit will provide students in the Sciences degrees with an understanding of how the economic theory taught in first year in AGECE1006 can be treated in an applied context. For BAgREc students, it is an intermediate level unit in the Agribusiness major.

In this unit of study students will study the theory relating to the firm-level marketing mix and marketing strategy, decision making, marketing management and planning, market research and information. The unit of study will also address the organisation and trends of agribusiness marketing including value-adding and market power in the supply chain, market efficiency and international marketing by agribusiness firms.

The unit content is analytical, and draws on applied microeconomics to demonstrate how marketing decisions are made along the marketing chain. At the end of this unit students will be able to use marketing

theory to analyse the steps in the marketing chain and be aware of the forces for change within that chain.

By completing this unit, students should have improved their ability to master key theories, identify and frame problems, organise knowledge, carry out individual and group research, and synthesise information. They should also have improved their information literacy skills, and communication skills through group presentations and individual research.

#### Textbooks

Schaffner, DJ, Schroder, WR and Earle, MD (2003). Food Marketing: An international Perspective, 2nd Edition, McGraw-Hill.

### AGEC2103

#### Production Economics

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Ms Shauna Phillips **Session:** Semester 1 **Classes:** (2 lec, 1 tut)/wk **Prerequisites:** ECON1001 or AGECE1006 or (AGECE1003 and AGECE1004) or RSEC1031 **Prohibitions:** AGECE2003 **Assessment:** 1 mid sem exam (50 mins), 1 end sem exam (2hrs), 1 assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

Production economics is concerned with production decisions on resource allocation at the firm, industry and economy levels. The topics include: the nature of agricultural resource industry production; production functions; factor substitution; principles of enterprise combination and multi-product production; firm objectives; constrained and unconstrained maximisation; cost functions and other duality relationships; economies of scale and size in farming; input demands and dual relationships; production over time; productivity and technical change; production under risk and the illustration of the principles involved through the use of practical applications and exercises involving both the agricultural and resource industries. In addition, basic decision analysis will be introduced including basic concepts of probability; concepts of utility; utility functions and elicitation of preferences.

Students will understand the major economic concepts and principles of resource allocation for the firm in the context of agricultural production, and understand the firm and market level economic insights provided by economic analysis of production.

This is a core unit for BAgREc and BResEc students and a non-core unit for BScAgr students. Production Economics is the first of several units of study in the BAgREc and BResEc degrees directed towards developing an economic understanding of how society organizes its production activities. Other related units of study include the third year units Agribusiness Management (BAgREc) and Applied Optimisation (BResEc), and various fourth year units, eg. Quantitative Planning Methods, Agricultural Finance and Risk and Environmental and Resource Economics and other resource economics units.

Students will formulate simple economic optimisation problems of production graphically and mathematically, such problems include unconstrained optimisations, equality-constrained optimisations and linear inequality-constrained optimizations. Students will use both calculus and linear algebra in deriving optimal resource allocations for these problems. Familiarity with performing optimisations and exploring the sensitivity of optima will be developed with the use of spreadsheets and mathematical programming packages.

Debertin, D.L. (2002) Agricultural Production Economics, 2nd edn, D.L. Debertin, University of Kentucky, Lexington.

### AGEC2105

#### Applied Econometric Modelling

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Ms Shauna Phillips **Session:** Semester 1 **Classes:** (2 lec, 1 tut)/wk **Prerequisites:** (ECMT1010 and ECMT1020) or (MATH1001 and MATH1002 and MATH1003 and MATH1005) or BIOM1003 or RSEC1031 **Prohibitions:** AGECE2005 **Assessment:** 1 mid semester exam (50 mins), 1 end semester exam (2hrs), 1 assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

Applied Econometric Modelling is designed to provide students with a sound understanding of the application of applied econometric methods to the agricultural and resource sectors. Topics covered will include: single and multiple regression, forecasting, dummy variables, violations of OLS assumptions, dynamics, binary choice models, and an introduction to cointegration. Emphasis will be placed on developing the ability to estimate and interpret economic relationships. The computing side of the unit involves the use of the statistical package EViews.

This unit of study is designed to develop student understanding and capability in applied regression analysis.

It is a core unit for students in BAgREc and BResEc, students and a non core unit for BScAgr students.

Students will become familiar with exploring data sets and estimating, interpreting, and assessing regressions that represent economic relationships.

At the end of this unit, students will be able to understand the major concepts and principles of applied regression analysis, estimate simple regressions in EViews and interpret the output, and be able to read, understand, and possibly replicate recent literature in agricultural and resource economics journals that apply econometric methods.

The students will gain research and computing skills.

### AGEC3101

#### Agribusiness Management

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Ms Lynn Henry **Session:** Semester 2 **Classes:** (2 lec, 2 wkshp)/wk **Prerequisites:** AGECE2103 or AGECE2003 or AGECE1006 or (AGECE1003 and AGECE1004) **Prohibitions:** AGECE1102; AGECE3103; AGECE3001 **Assessment:** One mid semester exam (1 hour), one final exam (2 hours), workshop papers and assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

This unit of study is designed to introduce decision making problems encountered by firms and agribusiness firms and general methods of solving microeconomic decision making problems. It is unit of study that builds on knowledge gained in junior units of study in particular AGECE1006, AGECE2103 and AGECE2102. Students will review production economics and activity analysis and show how budgeting methods can be used to relate them. They will extend these budgeting techniques to problems of time and risk, using capital and parametric budgeting. Students will also be introduced to linear programming and show how this tool is a practical method of solving decision making problems. Students will learn to consider methods for solving decision making problems where the outcomes are not known with certainty. The students will gain skills through workshop based tasks, an assignment, information literacy and communication skills through the presentation of the workshop reports and discussion throughout the workshop.

### AGEC3102

#### Agricultural and Resource Policy

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 1 **Classes:** (2-3 lec & 1x1 hour tut)/wk **Prerequisites:** {(AGECE2001 or AGECE2101) and (AGECE2003 or AGECE2103)} OR {(ECON2001 or ECOS2001) and (ECON2002 or ECOS2002)} **Prohibitions:** AGECE3002 **Assessment:** One mid semester exam (1 hour); one final exam (2 hours); assignments; tutorial papers. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit is designed to cover basic theoretical and modelling frameworks for economic evaluation of policy formation (including Pareto welfare economics and public choice theory); market and government failure; the institutional structure of agricultural and

resource policy formulation in Australia; micro and macroeconomic issues in agricultural and resource policy; and issues arising from linkages between agriculture and the resource industries and with the rest of the economy. Students will be expected to read widely.

### AGEC3103

#### Applied Optimisation

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Ross Drynan **Session:** Semester 1 **Classes:** (2 lec & 2 tut)/wk **Prerequisites:** (AGEC2001 or AGEC2101) and (AGEC2003 or AGEC2103) **Prohibitions:** AGEC3101 **Assessment:** One end-of-semester exam (2 hours), assignments, class work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit of study deals with constrained optimization problems in which when one or more constraints are inequalities. Such problems are explored/solved by "mathematical programming" techniques. The focus of the unit is on linear programming (LP) problems, i.e. ones in which both the objective and the constraints are linear functions. Linear programming has wide application to farm planning, financial planning, and other planning contexts. Graphical and mathematical representations of linear programming problems are covered. Topics include solution methods, solution information, primal and dual formulations, stability of optimal solutions, and parametric programming. After covering the basics of LP, the focus shifts to modelling of real world scenarios in LP models. Special formulations (eg. transportation model), and extension to integer programming are examined. Students develop experience and confidence in the use of spreadsheet-based optimizer routines, and with specialised optimization packages (e.g. LINDO).

### AGEC3104

#### Research Methods

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 2 **Classes:** (2 lec & 1-2 hr tut)/wk **Prerequisites:** AGEC2105 or ECMT2010 or ECMT2110 or AGEC2005 **Prohibitions:** AGEC3004 **Assessment:** One mid semester exam (1 hour), one final exam (2 hours), assignments, research proposal. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit deals with the nature of research and inquiry in applied economics. Topics covered will include: alternative philosophical perspectives on inquiry; scientific method; inductive thought and deductive logic; creativity; research as an orderly process of enquiry; preparation of research proposals; secondary data sources for agricultural and resource economists; collection of primary data; statistical design of sample surveys; questionnaire construction; interviewing techniques; and methods of analysis of survey data. Topics are illustrated with examples of research in theoretical economics, empirical discipline-advancing research, empirical exploratory research, and research using policy-evaluation modelling. Students are expected to read widely.

### AGEC4101

#### Agricultural Marketing Analysis

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 2 **Classes:** (2-3 hr lec & 1x1 hour tut)/wk **Prerequisites:** (AGEC2001 or AGEC2101) and (AGEC2003 or AGEC2103) **Prohibitions:** AGEC4004 **Assessment:** One mid semester exam (1 hour) one final exam (2 hours), case studies. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, B Res Ec, B Sc Agr, UG Study Abroad Program.

Performance of the agricultural and resource marketing systems, marketing margins, transportation, storage, advertising, wholesaling, and retailing. The structure, conduct and performance of marketing firms, and government and public interest in the food system will also be addressed via a number of case studies. Extensive readings will be required. The unit is designed to focus on analysing applied strategic management problems facing marketing firms. Students will be required to read widely.

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 1 **Classes:** (2-3 hours lec & 1x1 hour tutorial)/wk **Prerequisites:** (AGEC2001 or AGEC2101) and (AGEC2003 or AGEC2103) **Prohibitions:** AGEC4003 **Assessment:** One mid semester exam (1 hour) one final exam (2 hours), case studies. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

In this unit of study the basic economic principles underlying international trade in agricultural and resource commodities and the policies involved will be presented. Issues related to trade and development will also be considered. The main topics covered will include: trends in agricultural and resources trade; economics and politics of protection, economic integration and impacts on international commodity trade; international trade policy making. An understanding of globalisation, including foreign direct investment, will also be required. Extensive reading will be required.

#### Agribusiness Analysis

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 1 **Classes:** (2-3 hours lec & 1x1 hour tut)/wk **Prerequisites:** (AGEC2001 or AGEC2101) and (AGEC2003 or AGEC2103) **Assessment:** One mid semester exam (1 hour), one final exam (2 hours), case studies. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit focuses on applications of economic theory and methods in agribusiness decision making. It provides advanced treatment of the industrial organisation of agribusiness firms. Case studies will be used to examine the economic complexities of global agribusiness systems. Extensive readings make up the central component of the unit.

### Quantitative Planning Methods

#### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 1 **Classes:** (2 lec & 2 tut/lab session)/wk **Prerequisites:** AGE43101 or AGE43103 or AGE43031 or AGE43001 **Prohibitions:** AGE4008 **Assessment:** One end-of-semester exam (2 hours), 2 assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, B Res Ec, B Sc Agr.

This unit examines the use of mathematical methods and models in planning at both the individual firm level and the sectoral level. While the principal focus is on formal optimization, simulation and Monte Carlo methods are briefly discussed. Topics include non-linear programming, elements of input-output analysis, computable general equilibrium analysis, dynamic problems and methods (e.g. dynamic programming and optimal control). Sectoral level planning applications considered include transportation and plant location studies; spatial equilibrium; and resource utilization across time. Firm level applications include multi-period planning, queuing problems, inventory analysis, and replacement problems. Extensive use is made of computer-based optimization.

## AGEC4109

### Agricultural Finance and Risk

#### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Ross Drynan **Session:** Semester 2 **Classes:** (2 lec & 2 tut/lab session)/wk **Prerequisites:** {(AGE43001 or AGE43101) and (AGE42003 or AGE42103)} OR (AGE41102 and AGE43103) **Prohibitions:** AGE4009 **Assessment:** One end-of-semester exam (2 hours), 2 assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B Res Ec, B Sc Agr.

This unit has two related components. One component concerns risk and risk management in agriculture; the other deals with issues of agricultural producer finance. Risk topics include: risk measurement, subjective probability, adjusting beliefs as a result of new information; risk attitudes; decision making under risk; expected utility theory; valuing information; generalizations of expected utility theory; E-V analysis; stochastic dominance; internal measures to cope with risk including diversification and flexibility; insurance, futures, options and other market instruments for managing risk. Finance topics include the implications of capital market imperfections and consequential differences between corporate and small business finance; financial relationships between debt/equity levels and risk, optimal debt levels; cost of capital; short term working capital management; and longer term capital (investment) budgeting. Techniques of valuation of projects in risk-free and risk situations are examined. Financial and risk management practices in Australian agriculture are reviewed.

## AGEC4110

### Professional Skills

## Agriculture, Food and Natural Resources

**Credit points:** 3 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 1 **Classes:** (One 2 hr sem)/wk **Corequisites:** AGE4011 or AGE4111 **Prohibitions:** AGE4010 **Assessment:** Discussion papers. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Res Ec.

A series of lectures, seminars and workshops designed to provide students with enhanced professional skills. Sessions will focus on communication skills, including report writing, preparation of policy briefs, seminar and workshop presentations. Other sessions will be focused on aspects of professional ethics, attitudes and responsibilities and leadership. Participatory activities such as team debates and mock inquiry hearings addressing issues of current relevance to agricultural /resource economists are used to develop the student's communication skills and knowledge of issues.

## AGEC4111

### Contemporary Issues

#### Agriculture, Food and Natural Resources

**Credit points:** 3 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 2 **Classes:** (One 2 hr seminar)/wk **Corequisites:** AGE4010 or AGE4110 **Prohibitions:** AGE4011 **Assessment:** 1x2hour final exam, 1xgroup presentation, 1x assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Res Ec.

Through regular seminars by guest speakers and occasional workshops or other participatory activities, students examine a broad range of national and international issues of current relevance to Australian agricultural and resource economists.

## AGEC4112

### Research Project A

#### Agriculture, Food and Natural Resources

**Credit points:** 9 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 1 **Classes:** (2 hr sem)/wk **Prerequisites:** AGE43104 or AGE43004 **Corequisites:** AGE4113 **Prohibitions:** AGE4012 **Assessment:** Research thesis; presentations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting on a single research study (thesis). Students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 25,000 words in length. Students are allocated to the thesis on the basis of available resources and the advice and approval of the co-ordinator for the Research Project.

## AGEC4113

### Research Project B

#### Agriculture, Food and Natural Resources

**Credit points:** 9 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 2 **Classes:** (2 hr sem)/wk **Prerequisites:** AGE43104 or AGE43004 **Corequisites:** AGE4112 **Prohibitions:** AGE4013 **Assessment:** Research thesis; presentations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting on a single research study (thesis). Students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 25,000 words in length. Students are allocated to the thesis on the basis of available resources and the advice and approval of the co-ordinator for the Research Project.

## AGEC4121

### Research Exercises A

**Agriculture, Food and Natural Resources**

**Credit points:** 9 **Teacher/Coordinator:** A/Prof Ross Drynan **Session:** Semester 1 **Classes:** (2 lec or sem)/wk **Prerequisites:** AGECE3104 or AGECE3004 **Corequisites:** AGECE4122 **Prohibitions:** AGECE4012, AGECE4112 **Assessment:** Written research report/paper(s), seminar. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec.

This unit of study is taken in conjunction with the companion unit, AGECE4122 Research Exercises B. Students develop skills in economic research by participating in the designing, undertaking and reporting on one or more research exercises undertaken under the guidance of a staff member. Students typically work partly individually and partly in groups on a project that is common to the entire class. Students may be required to work on separate aspects of that project or may be required to examine the same aspect using different approaches. Students will be required to prepare individual and/or group written reports and/or oral presentations concerning data acquisition, analysis and interpretation of results. The precise nature of the research, the research methods, and the emphasis of the exercises will be determined in conjunction with the specification of the research exercise(s) undertaken in the companion unit, AGECE4122.

**AGECE4122****Research Exercises B****Agriculture, Food and Natural Resources**

**Credit points:** 9 **Teacher/Coordinator:** Dr Michael Harris **Session:** Semester 2 **Classes:** (2 lec or sem)/wk **Prerequisites:** AGECE3104 or AGECE3004 **Corequisites:** AGECE4121 **Prohibitions:** AGECE4013, AGECE4113 **Assessment:** Written research reports and papers. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec.

This unit of study is taken in conjunction with the companion unit, AGECE4121 Research Exercises A. See AGECE4121 for details.

Requirements for the 60 days outlined in 'Regulations'.

**AGRO3004****Managing Agro-Ecosystems****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Carina Moeller, Dr Brett Whelan, Dr Daniel Tan **Session:** Semester 2 **Classes:** (2hrs lec, 3hrs field and computer lab pracs)/wk **Prerequisites:** PLNT2003 or PLNT2903 **Assumed knowledge:** AFNR1001 and AFNR1002 **Assessment:** Crop fact-sheets, report on field practical (group work), take-home exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

The most critical and interesting questions managers of natural resources face deal with the inherent complexity of agricultural systems. Long- and short-term interactions exist between physical (eg climate, soil) and biological (eg crops, pastures) factors and agricultural management, among others. To understand these interactions and their impacts on production and environmental outcomes in dryland systems including crop and pastures is the overall aim of this unit. AGRO3004 is a core unit for BScAgr students and builds on knowledge and skills gained in the first year and second year units AFNR1001, AFNR1002, AVBS1002, PLNT2003 and SOIL2003. During the semester, the concept of an agro-ecosystem and principles of crop and pasture production are introduced. Emphasis is given to the magnitude, temporal and spatial scale of variability in agro-ecosystems and the consequent management implications. Computer simulation is used to explore effects of climate, soil type and alternative management options in systems including crops and pastures. Precision agriculture techniques for optimising agricultural management are introduced. Students develop key graduate attributes for agricultural scientists in information literacy, experimentation, critical analysis, written expression and team work.

**Textbooks**

Pratley J (Ed.) (2003) 'Principles of field crop production (4 edn).' (Oxford University Press: Melbourne, Australia).

**AGRO4003****Crop and Pasture Agronomy****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Lindsay Campbell **Session:** Semester 1 **Classes:** Tutes, intensives/workshops, excursion **Prerequisites:** AGRO3004 or PLNT2003 or PLNT2903 **Assessment:** Report, oral presentation and exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit examines agronomy as the discipline that underpins agricultural production. As a case study, the cotton industry is examined in detail to understand the end-user and social demands on agricultural production, the technical issues that challenge the farmer and the diversity of other specialist information from relevant disciplines such as entomology, pathology and soil science that must be integrated into the farming system. Likewise the rice and/or pastoral industries provide a contrasting farming system as another case study. The unit includes a one-week excursion to cotton growing areas in northern NSW, specialist intensive instruction provided by the Cotton

CRC and a series of workshops) tutorials that provides analysis and synthesis of the major farming systems in this industry.

#### AGRO4004

##### Sustainable Farming Systems

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Lindsay Campbell **Session:** Semester 1 **Classes:** Negotiated practicals and workshops (63h) **Prerequisites:** AGRO3002 or AGRO3004 **Assessment:** Reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit is designed to provide students with training in the professional skills required to practice agronomy. The unit principally builds on theoretical and applied knowledge gained in third year agronomy (AGRO3004) and second year plant physiology (PLNT2003). In this unit students will integrate their knowledge of soils, plant pathology, entomology, experimental design, biometry and economics to address applied problems in agronomy, namely the issue of sustainability. After completing this unit students should be able to confidently design and manage a field experiment and interpret their findings by integrating knowledge from across discipline boundaries. Students will develop their ability to establish conclusions towards making recommendations for long term sustainability. By implementing and managing a major field experiment students will develop their research and inquiry skills. Team work is strongly encouraged in this unit and the integration and reporting of their findings will develop their critical thinking and written communication skills.

#### AGRO4005

##### Livestock Production Systems

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Lindsay Campbell **Session:** Semester 2 **Classes:** (2 hr lectures or workshop, 1 hr practical or fieldtrip, 1 hr case study)/wk **Prerequisites:** AGRO3004 **Assumed knowledge:** ANSC3101 **Assessment:** One 2hr exam (50%), case study report (25%), practical or fieldtrip assignments (15%), participation in debate (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

The aim of this unit is to highlight the interrelationships between livestock production, plant, soil and water resources using scientific principles and predicting the effects of management actions and environmental conditions on the system. Livestock production systems builds on knowledge in the AGRO3004, which deals with pasture and cropping systems and expands this into the management of systems involving animals. As such it integrates knowledge from all prior units in the degree and is the most senior units for students interested in Agronomy and Livestock production systems. In this unit students will investigate and discuss how pasture management directly influences livestock production and how management of livestock systems can be a sustainable industry in terms of natural resources. The students will work in a group to research a new component in livestock management systems research and participate in a debate about intensifying or extensifying the livestock industry. Students completing this unit will be able to evaluate how the management of different pastoral systems (both dryland and irrigated) affects the nutritional value of different pastures and sustainability of soil and water resources, and demonstrate management decision making in relation to stocking rates and pasture growth and nutrition. In addition students will contrast new and innovative animal grazing systems to more traditional systems in terms of stocking rates, live weight gain and natural resource impact and debate the ethical and scientific views of intensive animal production (such as feedlots) and extensive animal production (such as native animal and biological production). Through group work and independent research on the case studies students will gain valuable research and interpersonal skills. Writing and communication skills are developed through report and exam writing and oral communication through participation in a debate.

#### AHCD1006

##### Study Skills

##### Health Sciences

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit introduces students to the skills needed for successful tertiary study, particularly related to health science courses. Topics covered include time management, research skills, exam preparation skills and writing skills.

#### AHCD1009

##### Anatomy Support (A)

##### Health Sciences

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials consultations **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit commences two weeks prior to the start of the academic year. It begins by introducing students to the principles of studying anatomy and orienting them to the anatomy laboratories. The unit continues to be offered concurrently with the anatomy component of the student's course and provides the opportunity for students to revise and consolidate concepts covered in that component of their course.

#### AHCD1010

##### Anatomy Support (B)

##### Health Sciences

**Credit points:** 2 **Session:** Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

The unit runs concurrently with the anatomy component of the student's course and provides the opportunity for students to revise and consolidate concepts covered in that component of their course.

#### AHCD1011

##### Biological Sciences Orientation

##### Health Sciences

**Credit points:** 2 **Session:** Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

The material covered in this unit depends on the course being undertaken by the student. The pre-course option is offered only in Semester 2 and aims to provide students with an understanding of the fundamental concepts of chemistry and physiology needed for successful participation in the human biology component of their course in the following year.

#### AHCD1012

##### Biological Sciences Support (A)

##### Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** Abor Hlth Sc Support Prog.

Biological Sciences Support (A) and (B) provide students with an opportunity to revise and consolidate content covered in human biology/physiology units. Both group and individual tuition is provided.

#### AHCD1013

##### Biological Sciences Support (B)

###### Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

The Biological Sciences Support units provide students with an opportunity to revise and consolidate content covered in human biology/physiology units. Both group and individual tuition is provided.

#### AHCD1014

##### Physics Support

###### Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

The unit is designed for students enrolled in Medical Radiation Sciences who may not have a strong background in physics. It aims at both preparing students for study in physics-related units, and the opportunity to revise and consolidate concepts covered in the physics component of their course. It also covers the mathematical concepts required.

#### AHCD1015

##### Research Methods Support (1)

###### Health Sciences

**Credit points:** 3 **Session:** Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit aims to provide students with the opportunity to further understand and use experimental and descriptive research methods.

#### AHCD1016

##### Professional Studies Support (1A)

###### Health Sciences

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit supports one or more of the professional units a student may be having difficulty with. It is based on individual student need.

#### AHCD1017

##### Professional Studies Support (1B)

###### Health Sciences

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit supports one or more of the professional units a student may be having difficulty with. It is based on individual student need.

#### AHCD1018

##### Biomechanics Support (1)

###### Health Sciences

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit aims to provide an introduction to the fundamental principles of biomechanics as well as provide students in the first year of their degree course with the opportunity to consolidate and revise material covered in the biomechanics component of their course.

#### AHCD1019

##### Neurobiology Support

###### Health Sciences

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit aims to introduce students to the fundamental concepts of neurobiology and to provide students with an opportunity to revise and consolidate content covered in the neurobiology component of their course.

#### AHCD1020

##### Behavioural Sciences Support (A)

###### Health Sciences

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

The Behavioural Sciences Support units aim to introduce students to the fundamental concepts of behavioural sciences and to provide them with an opportunity to revise and consolidate content covered in the behavioural sciences component of their course.

#### AHCD1021

##### Behavioural Sciences Support (B)

###### Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

The Behavioural Sciences Support units aim to introduce students to the fundamental concepts of behavioural sciences and to provide them with an opportunity to revise and consolidate content covered in the behavioural sciences component of their course.

#### AHCD1057

##### Biological Sciences Support

###### Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 6hrs/block, 3 blocks/semester **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit is conducted concurrently with Biological Sciences units in the Diploma of Health Science (Aboriginal Health & Community Development) program and enables the students to revise unit material and identify and develop the academic skills required to successfully complete the Biological Sciences units.

#### AHCD1058

##### Maths Workshop A Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** 3 short assignments (30%, 30% and 40%) due in Wks 6, 11 & 15. (Each assignment involves calculations, short answers, and the construction of tables and charts). Topics covered include estimation and approximation; fractions, percentages, decimals and rates; graphs, charts and tables. **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus  
*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit aims to teach the numeracy skills students may need in their chosen course. It takes into account the individual student's past experience of learning maths, and deals with issues such as maths anxiety. The unit contains mathematical concepts which relate to the undergraduate health sciences units. The unit includes both group and individual tuition.

#### AHCD1059

##### Academic Skills Workshop A Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** Several assignments (ranging in weights from 5% to 25%) are evenly distributed through the semester. The assignments cover writing skills, information literacy, and communication skills. **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus  
*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit aims to assist students preparing for study at a tertiary institution. It investigates issues such as the culture and values of the tertiary institution, explores students' past educational background and teaches academic skills such as computing, information gathering skills, organisational strategies, research, reading and writing skills, and exam techniques. The unit includes both group and individual tuition.

#### AHCD1060

##### Human Biology Workshop A Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** Workbook readings and questions (30%), 1000 word written reports (40%), end semester MCQ and SAQs (30%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus  
*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit introduces students to the study of human biology. It begins with an introduction to basic chemical concepts and related mathematical concepts. The unit also covers important physiological concepts such as cell structure, metabolism, genetics and the physiology of various body systems. The unit has a large practical component aimed at teaching laboratory skills. Students have an option to enrol in a relevant Biological Sciences unit within an undergraduate degree program as part of this unit of study.

#### AHCD1061

##### Aboriginal Studies A Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** 300 word independent note taking and reconstruction, due Wk 5 (25%), 600 word independent note taking and reconstruction, due Wk 9 (30%), 1000 word independent note taking, reconstruction/summary writing, due Wk13 (45%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus  
*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit aims to investigate a number of issues relevant to Aboriginal students considering participating in tertiary level education. The meaning of Aboriginality in contemporary society is explored, together with issues of Aboriginality.

#### AHCD1062

##### Anatomy Workshop A Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** Workbook readings and questions (30%), 1000 word written reports (40%), end semester MCQ and SAQs (30%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus  
*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit introduces the student to the study of anatomy. It covers topics such as anatomical language, histology, neuroanatomy, the musculoskeletal system, as well as the anatomy of other various body systems. Emphasis is placed on acquiring the skills needed to study anatomy successfully, including laboratory skills and learning anatomical language.

#### AHCD1063

##### Behavioural Science Workshop A Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** Individual or small group tuition **Assessment:** During each session students will be required to complete an in-class worksheet which will be marked and returned, 75min open book exam (100%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus  
*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit introduces students to the study of behavioural science. It uses topics such as health as the basis for exploring contemporary sociological and psychological theories. Emphasis is placed on developing skills needed to study behavioural science successfully, including field observation, presenting seminars and reading research reports. Students have an option to enrol in a relevant Behavioural Sciences unit within an undergraduate degree program as part of this unit of study.

#### AHCD1064

##### Mathematics Workshop B Health Sciences

**Credit points:** 4 **Session:** Semester 2 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** 3 short assignments (20%, 20%, 40%), in-class closed book exam (20%) in the final block. Assignments due in Wks 6, 11 & 15. Each assignment involves calculations, short answers, and the construction of tables and charts. **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus  
*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit aims to teach the numeracy skills students may need in their chosen course. It takes into account the individual student's past experience of learning maths, and deals with issues such as maths anxiety. The unit contains mathematical concepts which relate to the undergraduate health sciences units. The unit includes both group and individual tuition.

#### AHCD1065

##### Academic Skills Workshop B Health Sciences

**Credit points:** 4 **Session:** Semester 2 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** Similar to AHCD1059. Several assignments are given through the semester, in addition to a comprehension exam (20%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus  
*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit aims to assist students preparing for study at a tertiary institution. It investigates issues such as the culture and values of the tertiary institution; explores students' past educational background; and teaches academic skills such as computing, information gathering skills, organisational strategies, research, reading and writing skills, and exam techniques. The unit includes both group and individual tuition.

**AHCD1066****Human Biology Workshop B  
Health Sciences**

**Credit points:** 4 **Session:** Semester 2 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** Workbook readings and questions (30%), 1000 word written reports (40%), end semester MCQ and SAQs (30%) **Campus:** Cumberland  
**Mode of delivery:** Distance Education/Intensive on Campus

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit introduces students to the study of human biology. It begins with an introduction to basic chemical concepts and related mathematical concepts. The unit also covers important physiological concepts such as cell structure, metabolism, genetics and the physiology of various body systems. The unit has a large practical component aimed at teaching laboratory skills. Students have an option to enrol in a relevant Biological Sciences unit within an undergraduate degree program as part of this unit of study.

**AHCD1067****Aboriginal Studies B  
Health Sciences**

**Credit points:** 4 **Session:** Semester 2 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** Summary writing and essay plan, due Wk 5 (25%), 1000 word descriptive essay, due Wk 9 (35%), 1000 word reflective journal, due Wk 13 (40%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit aims to investigate a number of issues relevant to Aboriginal students considering participating in tertiary level education. The meaning of Aboriginality in contemporary society is explored, together with issues of Aboriginality.

**AHCD1068****Anatomy Workshop B  
Health Sciences**

**Credit points:** 4 **Session:** Semester 2 **Classes:** 6hrs/block, 3 blocks/semester  
**Assessment:** Workbook readings and questions (30%), 1000 word written reports (40%), end semester MCQ and SAQs (30%) **Campus:** Cumberland  
**Mode of delivery:** Distance Education/Intensive on Campus

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit introduces the student to the study of anatomy. It covers topics such as anatomical language, histology, neuroanatomy and the musculoskeletal system, as well as the anatomy of other various body systems. Emphasis is placed on acquiring the skills needed to study anatomy successfully, including laboratory skills and learning anatomical language.

**AHCD1069****Behavioural Science Workshop B  
Health Sciences**

**Credit points:** 4 **Session:** Semester 2 **Classes:** Individual or small group tuition **Assessment:** During each session students will be required to complete an in-class worksheet which will be marked and returned, 75min open book exam (100%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Prep Prog.

This unit introduces students to the study of behavioural science. It uses topics such as health as the basis for exploring contemporary sociological and psychological theories. Emphasis is placed on developing skills needed to study behavioural science successfully, including field observation, presenting seminars and reading research reports. Students have an option to enrol in a relevant Behavioural Sciences unit within an undergraduate degree program as part of this unit of study.

**AHCD2008****Biomechanics Support (2)****Health Sciences**

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit aims to provide students in the second year of their degree course with the opportunity to consolidate and revise material covered in the biomechanics component of their course.

**AHCD2009****Professional Studies Support (2)  
Health Sciences**

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit supports one or more of the professional units a student may be having difficulty with. It is based on individual student need.

**AHCD2011****Research Methods Support (2B)  
Health Sciences**

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week or according to student need **Assessment:** Formative assessments only, individual and small group tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Abor Hlth Sc Support Prog.

This unit aim to provide students with the opportunity to further understand and use experimental and descriptive research methods.

**AHCD3008****Indigenous Community Health Project A  
Health Sciences**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Block mode **Assessment:** In-class assessment, written assignment **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev).

Indigenous Community Health Project A and B provide students with an opportunity to integrate learning throughout the course by defining, planning, implementing, evaluating and reporting on a project related to professional practice in Aboriginal health and community development. The project plan will be developed in Indigenous Community Health Project A.

**AHCD3009****Professional Practice III  
Health Sciences**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Block mode **Prerequisites:** AHCD2020 Professional Practice II **Assessment:** Participation in block work classes, the professional practice placement, submission of written work **Practical field work:** Supervised professional practice placement (70hrs) **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev).

This compulsory unit aims to provide students with the opportunity to extend and integrate their practical skills and theoretical knowledge as these relate to the roles and responsibilities of Indigenous health & community development practitioners. There is increasing emphasis in this unit on the development of reflective learning skills and critical analysis of issues as they relate to Indigenous health in its many contexts. The subject requires attendance at lectures during block and participation in a 70 hour supervised professional practice placement in an organisation providing health or community development services to Indigenous communities.

## AHCD3017

### Health Promotion Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Freidoon Khavarpour **Session:** Semester 1, Semester 2 **Classes:** 6 hrs/block, 3 blocks/semester **Assessment:** 1500 word individual analysis (40%), 500 word individual outline (20%), 1500 word initiative plan (40%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus

**Associated degrees:** B B Hlth Sc, B Hlth Sci.

This unit of study introduces you to the concept and principles of health promotion and provides you with a framework for developing health promotion initiatives in your professional capacity as an allied health practitioner. The unit is structured around three modules: the concept and meaning of health; health promotion practice: and designing and evaluating health promotion initiative.

#### Textbooks

Reading will be provided in the distance mode package

## AHCD4001

### Indigenous Community Health Project B Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Block mode **Prerequisites:** AHCD3008 Indigenous Community Health Project A **Assumed knowledge:** Knowledge of project planning **Assessment:** In-class assessment, written assignment **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev).

Indigenous Community Health Project A and B provide students with an opportunity to integrate learning throughout the course by defining, planning, implementing, evaluating and reporting on a project related to professional practice in Aboriginal health and community development. In this unit, students will complete their project, following the project plan developed in AHCD3008 Indigenous Community Health Project A.

## AHCD4002

### Professional Practice IV Health Sciences

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** Block mode **Prerequisites:** AHCD3009 Professional Practice III **Assessment:** Assessment is based on participation in block mode classes, a placement (4 weeks) and submission of written work **Practical field work:** Supervised placement **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev).

The aim of this unit is to provide an opportunity for students to participate in a supervised placement for 140 hours in an organisation providing health and/or community development related services or programs to Indigenous communities. Participation in the placement will enable students to consolidate theoretical knowledge and practical skills as it applies to the role of Indigenous health and community development practitioners. In addition, students are asked to relate their knowledge and skills to one of 6 stream electives including: research; counselling and Indigenous mental health; Indigenous community development and management; primary health care/health promotion; addiction studies; Indigenous environmental health & housing.

## AHCD4014

### Current Issues in Health, Law & Medicine Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Block mode **Assessment:** Essay, worksheet, take home exam **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev).

This unit will introduce students to an understanding of the Australian legal system and general principles and law governing human behaviour. This unit will also provide the student with an understanding of human rights and the international legal system. Students will be

encouraged to explore the relationship between health, human rights and the law.

## AHCD4018

### Action Research Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Block mode **Prerequisites:** AHCD2022 Introduction to Health Research **Assessment:** In-class assessment, written assignment **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev).

Participatory action research extends knowledge and improves social practices through processes which empower ordinary people. Action research projects proceed through cycles of planning, acting, observing and reflecting, with the participation of the people affected by the practices under consideration.

## AHCD4022

### Indigenous Community Health Promotion B Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 6hrs/block, 3 blocks/semester **Assessment:** Short answer questions (25%), conceptual framework (10%), discussion paper (40%), journal & reflection summary (25%) **Practical field work:** 10-12hrs of fieldwork **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev).

The aim of this unit of study is to introduce the students to the global view of health promotion. What the role of Aboriginal health professionals might be in the initiation of a health promotion initiative will be discussed. The steps necessary in building partnership with other members of the organisation and communities for health promotion activities will be also examined.

#### Textbooks

Readings will be provided

## AHCD4032

### Health Planning, Policy and Evaluation A Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Block mode **Assessment:** In-class assessment, written assignment **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev), Health Sciences UG Cross Inst.

This unit of study provides the students with an understanding of the meaning and concept of policy and policy development within the Australian political structure. Various models of policy development and in particular the Australian policy development model will be examined. Application of these models to a current policy will be also investigated.

#### Textbooks

Readings provided

## AHCD4034

### Indigenous Community Health Promotion A Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 6hrs/block, 3 blocks/semester **Assessment:** 750 word reflective paper (30%), 750 word short answer paper (30%), 2000 word essay (40%) **Practical field work:** 6hrs of fieldwork **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev), B Hlth Sc (Hons), B Hlth Sci, Health Sciences UG Cross Inst.

This unit of study introduces students to the concept and meaning of health promotion and how it is different from health education. The

unit ends up with a comparative study of a mainstream and Indigenous health promotion initiative.

*Textbooks*

Readings will be provided

#### AHCD4035

##### Primary Health Care III Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Block mode  
**Prerequisites:** AHCD2015 Primary Health Care II **Assessment:** In-class assessment, written assignment **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev), Health Sciences UG Cross Inst.

This unit of study builds on the concepts of primary health care explored in AHCD1030 Primary Health Care 1 and AHCD2015 Primary Health Care II. Students will critically examine primary health care in Indigenous communities. There will also be a consideration of how PHC can be used to facilitate action for change.

#### AHCD4040

##### Addictions Counselling Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Block mode  
**Assumed knowledge:** AHCD1032 Introduction to Counselling Skills  
**Assessment:** Practical survey (25%), 500 word written letter (15%), 2000 word essay (40%), 250 word written/class exercise (20%) **Campus:** Cumberland  
**Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev).

The relationship between addiction and personality will be explored in depth. Specific addictions such as addiction to gambling will be discussed. Part of the assessment for this unit will require students to present a relevant case study for discussion.

#### AHCD4042

##### Wellness Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Block mode  
**Prerequisites:** AHCD1032 Introduction to Counselling Skills **Assessment:** In-class assessment, written assignment **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev).

This unit will encourage students to focus their attention on the conditions required for healthy living from a holistic perspective of Indigenous health. Students will be asked to consider the positive environmental influences required for individuals and communities to achieve and maintain a state of healthy well-being. Contributions to an understanding of wellness will be sought from traditional Aboriginal culture and custom, anthropology, sociology and psychology. Content for this unit will be thematic and be determined by current student interest.

#### AHCD4049

##### Skills for Teaching Health Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Block mode  
**Assessment:** 250 word in-class tutorial questions (10%), 2000 word written report description of the context of your teaching session (30%), a description of the teaching methods, justify your selection of teaching methods (30%), 10min microskill's presentation (20%), 500 word reflection report (10%) **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev).

This unit provides an opportunity for students to identify and develop teaching skills for use in their professional roles as health workers. The content for this unit will include: principles of adult learning; the teaching process; instructional design; the skills of questioning,

explaining and facilitating small group discussions; and the preparation and use of audiovisual teaching materials.

#### AHCD4052

##### Honours Workshop Health Sciences

**Credit points:** 6 **Session:** Semester 1 **Classes:** Block mode **Assessment:** Continuous assessment **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: This unit is available only to students admitted to the honours program*

**Associated degrees:** B B Hlth Sc (Hons), B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev).

This unit of study is divided into two semesters. In Semester 1, students will concentrate on the further development of their literature review and collection of the data. Analysis and interpretation of the data towards the first draft of the honours thesis will also be covered in this semester. In Semester 2, redrafting and rewriting of the thesis will be maintained and continued.

*Textbooks*

Individual based

#### AHCD4053

##### Human Rights and Social Justice Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 6hrs/block, 3 blocks/semester **Assessment:** 800-1000 word essay (20%), 800-1000 word essay (20%), 2000-2500 word report on a policy (50%), 500 word reflection (10%) **Campus:** Cumberland **Mode of delivery:** Distance Education/Intensive on Campus

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Aborig Hlth &Comm Dev) Hons, B Hlth Sc (Aborig Hlth &Comm Dev), B Hlth Sc (Hons), B Hlth Sci.

This unit of study will examine human rights and social justice issues from an Australian Indigenous perspective at international, national and local levels. It discusses the effect of these issues on the health and welfare of Indigenous peoples' lives. The unit will detail the optimum standard for health and justice advocated by the international human rights treaty system, and discusses the Australian government's responsibility, accountability and the success and failures towards these benchmarks. The unit is based on participation and includes literature review and group discussions.

#### AMME0011

##### International Exchange B Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prerequisites:** Department permission required for enrolment. **Assessment:** Pass/Fail, based on marks returned from the Overseas Institution. Not included in WAM calculations  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

A generic 6cp exchange unit for students going on International Exchange.

#### AMME0012

##### International Exchange C Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prerequisites:** Department permission required for enrolment. **Assessment:** Pass/Fail, based on marks returned from the Overseas Institution. Not included in WAM calculations  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

#### International Exchange H

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prerequisites:** Department permission required for enrolment. **Assessment:** Pass/Fail, based on marks returned from the Overseas Institution. Not included in WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

A generic 6cp exchange unit for students going on International Exchange.

### AMME0018

#### International Exchange I

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prerequisites:** Department permission required for enrolment. **Assessment:** Pass/Fail, based on marks returned from the Overseas Institution. Not included in WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

A generic 6cp exchange unit for students going on International Exchange.

### AMME1550

#### Dynamics 1

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (2 hrs lec and 3 hrs tut) per week **Assessment:** Assignments, quizzes, exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

This unit aims to develop an understanding of the basic methods required to perform kinematics and dynamic analysis on particles.

Students will develop skills in solving problems in kinematics and dynamics of particles.

Course content will include: Newton's laws, kinematics of particles: rectilinear motion, plane curvilinear motion, rectangular coordinates, normal and tangential coordinates, polar coordinates, space curvilinear motion, relative motion, constrained motion, kinetics of particles: force, mass and acceleration; Newton's second law, equation of motion, rectilinear motion, curvilinear motion, work and energy; work and kinetic energy, potential energy, impulse and momentum; linear impulse and linear momentum, angular impulse and momentum, impact, central-force motion, relative motion, Kinetics of systems of particles: work-energy, impulse-momentum, conservation of energy and momentum, steady mass flow, variable mass. By the end of this unit of study student will be able solve complicated kinematics and dynamics problems of particles in both 2 and 3 dimensions.

### AMME2200

#### Thermodynamics and Fluids

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (3hrs lec, 2hrs tut, 3hrs lab) per week. **Assumed knowledge:** MATH1001; MATH1002; MATH1003. **Assessment:** Assignments, quizzes, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to teach the basic laws of thermodynamics and the fundamentals of fluid statics and dynamics.

At the end of this unit students will have: an understanding of the basic laws of thermodynamics and basic equations governing the statics and dynamics of fluids; the ability to analyze the thermodynamics of a simple open or closed engineering system; the ability to analyze and determine the forces governing static fluid; the ability to evaluate the relevant flow parameters for fluid flow in internal engineering systems such as pipes and pumps (velocities, losses, etc.) and external systems such as flow over wings and airfoils (lift and drag).

Course content will include concepts of heat and work, properties of substances, first law of thermodynamics, control mass and control volume analysis, thermal efficiency, entropy, second law of thermodynamics, reversible and irreversible processes, isentropic efficiency, power and refrigeration cycles; basic concepts of pressure, force, acceleration, continuity, streamline and stream function, viscosity, non-dimensional parameters; Fluid statics: governing hydrostatic equations, buoyancy; Fluid dynamics: governing conservation equations; Potential flow, vorticity and circulation; Bernoulli and Euler equations; A brief introduction to flow measuring devices, pipe flow, flow over surfaces, lift and drag.

*Textbooks*

Cengel and Turner, Fundamentals of Thermal Fluid Sciences, McGrawhill

### AMME2301

#### Mechanics of Solids

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (3hrs lec and 2hrs tut) per week. **Prerequisites:** (MATH1001 or MATH1901 or MATH1906), (MATH1002 or MATH1902), (MATH1003 or MATH1903 or MATH1907), (ENGG1802 or PHYS1001 or PHYS1901) **Assessment:** Assignment, lab report, quiz, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to teach the fundamentals of analysing stress and deformation in elemental structures/components in aerospace, mechanical and biomedical engineering (bars, beams, frames, cell box beams and tubes) under simple and combined loading of tension, compression, bending and torsion. The vibration will also be addressed.

At the end of this unit students will have gained knowledge of: equilibrium of deformable structures; basic concept of deformation compatibility; stress and strain in bars, beams and their structures subjected to tension, compression, bending, torsion and combined loading; statically determinate and indeterminate structures; energy methods for bar and beam structures; simple buckling; simple vibration; deformation of simple frames and cell box beams; simple two-dimensional stress and Mohr's circle; problem-based applications in aerospace, mechanical and biomedical engineering.

### AMME2302

#### Materials 1

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (3hrs lec, 2hrs tut) per week plus two 3hr labs sessions per semester **Prohibitions:** CIVL2110 **Assessment:** Assignment, lab reports, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to cover four key focus areas: Atomic structure of the solid state: atomic bonding, crystal structures, crystal imperfections, and diffusion; Mechanical properties and microstructure: the relationship between properties and microstructure, and the effects of heat treatment on properties and microstructure; Electrical, magnetic, thermal, and optical properties of materials; Manufacture and applications of materials: metals, ceramics, polymers.

At the end of this unit students will have gained an understanding of: the ways in which atoms are arranged in the solid state; the ways in which their arrangement and the imperfections of their arrangement affect the macroscopic properties of a material; gain an understanding of the various types of properties of materials, how to measure and calculate them, and how to use these skills in engineering design and failure analysis; gain an understanding of the means by which the properties of materials can be manipulated via heat treatment, alloying, and other means.

Course content will include: Atomic Structure/Crystallography; Microstructure - Composites/Monolithics; Dislocation Theory; Diffusion; Phase Equilibrium and Heat Treatment; Suspension Rheology; Physical Properties.

#### Engineering Dynamics

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Three 1hr lec; one 2hr tut) per week and two 3hr workshops per semester **Prerequisites:** (MATH1001 or MATH1901 or MATH1906), (MATH1002 or MATH1902), (AMME1550 or PHYS1001 or PHYS1901 or ENGG1802 prior to 2008) **Assessment:** Assignment, lab work, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study aims to teach: Dynamics of Rigid Bodies: Analysis of Planar mechanisms; Kinematics of rigid bodies; Kinetics of rigid bodies. Students will also develop their skills in: how to model and analyse dynamic systems and the application of theory to real systems through practical/laboratory sessions.

At the end of this unit students will have developed skills in modelling and analysing planar mechanisms and rigid body dynamic systems.

Course content will include planar mechanisms, linkages, mobility; instant centres of rotation, Kennedy's theorem; velocity and acceleration polygons; kinematics of rigid bodies, frames of reference, velocity and acceleration, rotating frame of reference, relative velocity and acceleration, gyroscopic acceleration; kinetics of rigid bodies, linear momentum and Euler's first law; angular momentum and Euler's second law; centre of mass; moments of inertia, parallel axis and parallel plane theorems, principal axes and principal moments of inertia, rotation about an axis; impulse and momentum; work and energy, kinetic and potential energies; applications to orbital and gyroscopic motion; introduction to Lagrangian methods.

### AMME3110

#### Project A

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prohibitions:** AMME4110 Project B **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Summer/Winter School.

Supervised project on a relevant engineering discipline.

### AMME3500

#### System Dynamics and Control

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (lec 2hrs, lab/tut 3hrs) per week **Prerequisites:** AMME2500 or MECH2500; MATH2061 or MATH2961 or MATH2067 or (MATH2001 or MATH2901 and MATH2005 or MATH2905) **Assumed knowledge:** AMME2500, MATH2061 **Assessment:** Assignment, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to introduce the methods used for the analysis and design of linear feedback control systems. There are three key focus areas: An understanding of how mechanical systems respond to control inputs and disturbances, and how one can analyse and interpret these responses mathematically and graphically; To be able to represent these mechanical systems in a feedback control system as well as being able to determine what desired specifications of the system would be achievable, practical and important when the system is under control; An understanding of how different theoretical and practical techniques help engineers in designing control systems, and which technique best helps in solving a given problem.

Course content will include concentration on linear systems and will be based on classical control theory. Topics covered will include system modelling, time and frequency response, stability, root locus and Bode diagrams, and control using computers. Computer programs Matlab and Simulink will be used to illustrate the concepts presented in the lectures and for the design and simulation exercises associated with the case studies. Labs will be undertaken using a variety of physical plants to highlight the nature of control systems engineering. A number of case studies based on practical examples will also be presented.

### AMME4010

#### Major Industrial Project

#### Engineering and Information Technologies

**Credit points:** 24 **Session:** Semester 1, Semester 2 **Classes:** Students spend 6 months at an industrial placement working on an engineering project relevant to their engineering stream. **Prerequisites:** Passed at least 144 credit points. Departmental permission required for enrolment **Assessment:** Thesis; case study reports; oral presentations **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study will give students a rich experience in carrying out a major project within an industrial environment, and in preparing and presenting detailed technical reports (both oral and written) on their work. The project is carried out under joint University/industry supervision and extends over several months, with the student essentially being engaged fulltime on the project at the industrial site. Student will obtain the following essential engineering skills: how to examine published and experimental data; set objectives; organise a programme of work; analyse results and evaluate these in relation to existing knowledge; presentation skills.

#### AMME4100

##### Practical Experience Engineering and Information Technologies

**Session:** Semester 1, Semester 2 **Prerequisites:** 30 credit points of second year units of study. **Assessment:** Evaluation of an industrial experience report. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B E.

The aim of this unit is to give students the opportunity to work in an engineering organisation and gain some professional experience. To enhance student abilities and experience in technical report writing.

Students will have a better appreciation of the role of engineers in the workplace, the ability to present structured observations and reflections in the mode of a formal written report.

Each student is required to work as an employee of an approved engineering organisation and to submit a satisfactory written report of his or her work. Normally 12 weeks (60 days) of practical work experience is required and this is undertaken after the completion of some or all of the prescribed second year core units of study and before enrolment in the final year of study. The University Careers and Appointments Service is available to assist students to obtain suitable employment. This unit of study must be passed in order to graduate.

#### AMME4103

##### Interdisciplinary Thesis A Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** It is expected that students will spend at least one full day per week undertaking background research work, organising their plan of work and preparing their experimental or developmental program. **Prerequisites:** 36 credit points of Third Year units of study. **Assessment:** Satisfactory or Unsatisfactory on the basis of the Proposal, Progress Report and actual progress as verified by the supervisor. The student can only progress to Thesis B on attainment of a satisfactory result in Thesis A. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: 0*

**Associated degrees:** B E.

This unit aims to involve students in a research or major design project and give them the opportunity to conduct systematic investigations. Learning outcomes: ability to plan; submit a Proposal; autonomously carry out a project and write a Progress Report at the end of semester. In this unit of study, each candidate works towards and writes an undergraduate thesis from work carried out in Thesis A and B. Towards the end of each academic year a list of suggested topics and supervisors for thesis work is published for the information of current Third year students. In the case of students enrolling in Thesis A in 2nd semester, topics will be made available in 1st semester. Each prospective Fourth year student is then required to consult with prospective supervisors to apply for a topic. In the normal course of events some or all of the theoretical, developmental, and experimental aspects of research or design work are expected in a thesis. These aspects may be either directed by the supervisor or be of an original nature, but in any event the student is directly responsible to his or her supervisor for the execution of his or her practical work and the general layout of the thesis itself. Thesis A is the first part of Thesis A and Thesis B and requires the student to make significant progress toward the objectives outlined in the Proposal. This includes any workshop drawings and experimental set up. Generally about 50% of the total Thesis A & B time should be spent in Thesis A. Progress is

assessed by the supervisor through regular contact with the student and through the formal Progress Report.

#### AMME4104

##### Interdisciplinary Thesis B Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** It is expected that students will spend at least one full day per week undertaking background research work, organising their plan of work and preparing their experimental or developmental program. **Prerequisites:** AMME4103 Interdisciplinary Thesis A **Assessment:** Assessment for this unit will be based on the evaluation of the progress report (10%) submitted at the end of Thesis A, the presentation of a seminar relating to their chosen topic (10%) and the thesis document itself (80%). The final grade for thesis is based on the work done in both Thesis A and Thesis B. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: 0*

**Associated degrees:** B E.

This unit aims to involve students in a research or major design project and give them the opportunity to conduct systematic investigations. Each candidate works towards and writes an undergraduate thesis, at least one copy of which should be submitted in completed form before a date to be announced. Thesis B is the second part of Thesis A and Thesis B and requires the student to continue from the progress attained in Thesis A. In the normal course of events some or all of the theoretical, developmental, and experimental aspects of research or design work are expected in a thesis. These aspects may be either directed by the supervisor or be of an original nature, but in any event the student is directly responsible to his or her supervisor for the execution of his or her practical work and the general layout of the thesis itself. Theses should be typewritten on A4 with text, diagrams, graphs, photographs, etc., properly displayed. One copy should be submitted, hard-bound for the departmental library, on or before the due date. The penalty rate for late submissions will be advertised. Students are responsible for supplying their own thesis production materials. At the end of this unit students will have the ability to plan and execute a complete piece of scientific work and to report their study in a thesis.

#### AMME4110

##### Project B Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prohibitions:** AMME3110 Project A **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Summer/Winter School.

Supervised project on a relevant engineering discipline.

#### AMME4111

##### Honours Thesis A Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Colin Dunstan **Session:** Semester 1, Semester 2 **Classes:** None, but it is expected that students will spend at least one full day per week undertaking background research work, organising their plan of work and preparing their developmental program. **Prerequisites:** 36 credit points of senior units of study and WAM 65 or over **Prohibitions:** AMME4121 Engineering Project A, AMME4122 Engineering Project B, AMME4103, AMME4104 **Assessment:** Progress Report - 10%; Seminar - 10%; Thesis - 80% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims to give students an understanding of how to define, plan, undertake and report on an open-ended piece of supervised research or design work.

Students are required to plan and begin working on a major research or design project. Some projects will be experimental in nature, others may involve computer-based simulation, feasibility studies or the design, construction and testing of equipment.

Toward the end of each academic year a list of suggested topics and supervisors for honours thesis work is published for the information

of current third year students. Each prospective Honours Thesis A student is expected to consult with supervisors and to select a topic of interest to them from the list. Availability of topics is limited and students should undertake to speak with prospective supervisors as soon as possible.

Students who are unable to secure a supervisor and topic will be allocated a supervisor by the unit coordinator.

Alternatively, students may do a thesis with a supervisor in industry or in another university department. In this case, the student must also find a second supervisor within the School of AMME.

An honours thesis project is done individually, although students will often be working within a research group involving other undergraduate and postgraduate students.

During the course of this unit of study, students will learn how to examine published and experimental data, set objectives, organize a program of work and devise an experimental or developmental program.

The progress at the end of Honours Thesis A will be assessed by the supervisor based on: interactions between the student and supervisor during the course of the semester; a Thesis Proposal submitted around week 5; and a formal Progress Report submitted at the end of the semester. The Progress Report should consist of the introduction and literature review sections and a skeleton outline of remaining sections of the final Thesis, plus a one to two page summary of the student's progress during the semester and an outline of work to be completed during the second semester.

Honours Thesis A is only available to students with a GWAM of 65 or over at the time of their enrolment into this unit of study. Students with a GWAM less than 65 must enrol in Project A instead of Honours Thesis A. Students doing Project instead of Honours Thesis will still be awarded an honours degree if their HWAM is above 65 on completion of their degree. Overall the expected learning outcomes of Project and Honours Thesis are similar. The main differences are that in Project there is a greater emphasis on more practical engineering projects and team work, whereas an Honours Thesis will typically have more of a research focus, and is undertaken individually.

### **AMME4112 Honours Thesis B Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Colin Dunstan **Session:** Semester 1, Semester 2 **Classes:** None, but it is expected that students will spend at least one to two full days per week undertaking background research work, organizing their program of work, preparing and analysing results and writing the thesis. **Prerequisites:** AMME4111 Honours Thesis A **Prohibitions:** AMME4121 Engineering Project A, AMME4122 Engineering Project B, AMME4103, AMME4104 **Assessment:** Progress Report - 10%; Seminar - 10%; Thesis - 80% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims to give students an understanding of how to define, plan, undertake and report on an open-ended piece of supervised design or research work.

Students continue working on the thesis project started in Honours Thesis A.

During the course of this unit of study, students will develop the following skills: an ability to complete a major research or design project; an ability to design and conduct experiments and to analyse and interpret data from those experiments or design; an ability to find and interpret relevant published information and data; an ability to prepare and submit a Thesis detailing the context of the problem, relevant background research and results of the investigation; an ability to work independently.

The Thesis document will be judged on the extent and quality of the student's original work and particularly how critical, perceptive and constructive he or she has been in assessing his/her work and that of others. Students will also be required to present a Seminar on the results of their findings to their peers and supervisor.

### **AMME4121 Engineering Project A Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Colin Dunstan **Session:** Semester 1, Semester 2 **Classes:** None, but it is expected that students will spend at least one full day per week undertaking background research work, organising their plan of work and preparing their developmental program. **Prerequisites:** 36 credit points of senior units of study. **Prohibitions:** AMME4111, AMME4112, AMME4103, AMME4104 **Assessment:** Progress Report - 10%; Seminar - 10%; Final Report - 80% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims to give students an understanding of how to define, plan, undertake and report on an open-ended piece of supervised design or research work while working in a group.

Students are required to plan and begin working on a major design or research project. Some projects will be experimental in nature, others may involve computer-based simulation, feasibility studies or the design, construction and testing of equipment.

Toward the end of each academic year a list of suggested topics and supervisors for project work is published for the information of current third year students. Each prospective Project A student is expected to consult with supervisors and to select a topic of interest to them from the list. Availability of topics is limited and students should undertake to speak with prospective supervisors as soon as possible. Students who are unable to secure a supervisor and topic will be allocated a supervisor by the unit coordinator.

Projects are undertaken in groups of two or more students. The number of students in a group will depend on the nature of the particular project, and will be determined by the supervisor. Students who would like to work together in a group are advised to approach prospective supervisors together.

During the course of this unit of study, students will learn how to examine published and experimental data, set objectives, organize a program of work and devise an experimental or developmental program.

The progress at the end of Project A will be assessed by the supervisor based on: interactions between students and supervisor during the course of the semester; a Proposal submitted around week 5; and a formal Progress Report submitted at the end of the semester. The Progress Report should consist of the introduction and literature review sections and a skeleton outline of remaining sections of the Final Report. This may be done either as a group or individually depending on the project, as determined by the supervisor. In addition each student is required to submit a one to two page summary of their progress during the semester and an outline of work to be completed during the second semester.

Project is available to all students, whereas Honours Thesis is only available to students with a GWAM of 65 or over at the time of their enrollment into this unit of study. Students with a GWAM less than 65 must enrol in Project A instead of Honours Thesis A. Students doing Project instead of Honours Thesis will still be awarded an honours degree if their HWAM is above 65 on completion of their degree. Overall the expected learning outcomes of Project and Honours Thesis are similar. The main differences are that in Project there is a greater emphasis on more practical engineering projects and team work, whereas an Honours Thesis will typically have more of a research focus, and is undertaken individually.

### **AMME4122 Engineering Project B Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Colin Dunstan **Session:** Semester 1, Semester 2 **Classes:** None, but it is expected that students will spend at least one to two full days per week undertaking background research work, organizing their program of work, preparing and analysing results and writing the Final Report. **Prerequisites:** AMME4121 Engineering Project A **Prohibitions:** AMME4111, AMME4112, AMME4103, AMME4104 **Assessment:** Progress Report - 10%; Seminar - 10%; Final Report - 80% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims to give students an understanding of how to define, plan, undertake and report on an open-ended piece of supervised design or research work while working within a group.

Students continue working on the design or research project started in Project A.

During the course of this unit of study, students will develop the following skills: an ability to complete a major design or research project; an ability to design and conduct experiments and to analyse and interpret data from those experiments or design; an ability to find and interpret relevant published information and data; an ability to prepare and submit a substantial Final Report detailing the context of the problem, relevant background research and results of the investigation; an ability to work in a team or group.

The Final Report will be judged on the extent and quality of the student's original work and particularly how critical, perceptive and constructive he or she has been in assessing his/her work and that of others. Students will also be required to present a Seminar on the results of their findings to their peers and supervisor. The Final Report and Seminar may be done as a group or individually depending on the nature of the project. This will be determined by the supervisor.

### AMME4210

#### Computational Fluid Dynamics Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (1hr lec, 1hr tut, 2hr lab)/week  
**Prerequisites:** MECH3261 or AERO3260 **Assumed knowledge:** Partial differential equations, finite difference methods, linear algebra, matrix methods, pressure, force, acceleration, continuity, streamline and streamfunction, viscosity, control parameters, non-dimensionalisation. **Assessment:** Tutorials/laboratories, Assignments and Major project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The aim of this unit is to provide students with an understanding of the theoretical basis of computational fluid dynamics, the ability to write a simple Navier-Stokes solver and the skills to use a state of the art commercial computational fluid dynamics package.

At the end of this unit students will have the ability to assess fluid mechanics problems commonly encountered in industrial and environmental settings, construct and apply computational models, determine critical control parameters and relate them to desired outcomes and write reports. Knowledge skills, thinking skills, personal skills, personal attributes and practical skills.

Course content will include Navier-Stokes equations; finite difference methods; accuracy and stability for the advection and diffusion equations; direct and iterative solution techniques; solution of the full Navier-Stokes equations; turbulent flow; cartesian tensors; turbulence models.

*Textbooks*

Reference books:

Fletcher Computational Techniques for Fluid Dynamics, vols 1 and 2 (Springer, 1988)

Patankar Numerical Heat Transfer and Fluid Flow (Hemisphere, 1983)

### AMME4241

#### Renewable Energy Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1hr lec and one 3hr tut per week **Prerequisites:** MECH3260, MECH3261 **Assessment:** Assignment, project, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Fourth year elective unit of study.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop understanding of the engineering design and analysis of different devices and technologies for generating power from renewable sources including: solar, wind, wave, tidal, geothermal, hydro-electric, and biofuels;

to understand the environmental, operational and economic issues associated with each of these technologies.

At the end of this unit students will be able to perform in depth technical analysis of different types of renewable energy generation devices

using the principles of fluid mechanics, thermodynamics and heat transfer. Students will be able to describe the environmental, economic and operational issues associated with these devices.

Course content will include motivations - climate change; first and second law efficiencies, exergy; solar energy - photovoltaic, solar thermal; wind energy - turbine design, choice of site, operational issues; wave and tidal energy - analysis of different wave generation devices; geothermal energy - geological considerations, choice of site, large scale plants, geothermal energy in buildings; hydro-electric power - design and function of hydro-electric power plants, operational issues; biofuels - types, applications, carbon budget analysis; general issues - variable output, integration of renewable energy sources into power grid.

### AMME4500

#### Guidance and Control Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (one 2hr lec and one 3hr tut) per week **Prerequisites:** AMME3500. **Assessment:** Assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study will extend the concepts of control theory that students were introduced to in classic control techniques in third year. This subject will focus on state space design and focus on modern control techniques. Students will also look into aspects of controllability and observability of systems. The subject will also focus on particular implementations and students will design their own control system. Students will also study the concepts of trajectory planning and trajectory control. Students will solve specific trajectory and control examples related to the motion of complex platforms.

### AMME4660

#### Management, Employees and Industrial Rel Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours lecture and 3 hours tutorial per week **Assessment:** Assignments, exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop an understanding of industrial relations issues in Australia, Government regulations, awards and agreements, and how they relate to companies, management, employers, employees, and unions. Students will develop skills and understanding of Australian regulations and awards, negotiation of workplace agreements, enterprise bargaining agreements, and working with unions. The course will be viewed from the perspective of all players in the system so that a new graduate, who will at some time fit all categories, has an understanding of employer/employee relationships in the workforce. Guest lecturers will be invited from industry (management, unions, etc.) to present their experiences in industrial relations. Role playing will be used to simulate working environments to develop skill in handling grievances, resolving conflicts, and develop negotiating skills.

By the end of this unit of study students will be better prepared to enter the workforce as both an employee and as a manager.

### AMME4700

#### Inertial Navigation & the Kalman Filter Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (one 2hr lec and one 3hr tut) per week **Prerequisites:** AERO4701 or MECH4720 or MECH4730 or MTRX4700 or AERO4560. **Assessment:** Assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study introduces students to the concepts of stochastic processes and statistical estimation. The subject will focus primarily on the theoretical underpinnings of the Kalman Filter. Students will delve into the Kalman Filter algorithm and its practical implementation. Examples of its use from a broad range of areas will be provided. The subject will then move onto the specific implementation of the Kalman

Filter when applied to inertial navigation, and students will be design and implementing their own navigation filter.

### AMME4710

#### Computer Vision and Image Processing Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (3hrs lec, 3hrs tut/lab) per week **Prerequisites:** MECH4720 or MECH4730 **Assessment:** Three assignments, major project and a final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study introduces students to vision sensors, computer vision analysis and digital image processing. This course will cover the following areas: fundamental principles of vision sensors such as physics law, radiometry, optical design, CMOS/CDD imagers architecture, photo-detector, colour reconstruction; the design of physics based models for vision will then be introduced, (i.e. reflectance models, photometric invariants, radiometric calibration, shape from shading).

This course will also presents Algorithms for video/image analysis, transmission and scene interpretation. This will cover topics such as image enhancement, restoration, compression, stereo correspondence, pattern recognition and object segmentation.

### AMME4790

#### Introduction to Biomechanics Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (2hr lec, 2hr lab, 1hr tut) per week **Prerequisites:** MTRX3700 or MECH3921 **Assessment:** Tutorials, assignments and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

Biomechanics is the application of mechatronic engineering to human biology and as such it forms an important subset of the overall biomedical engineering discipline. It involves the following: Active and passive prosthetic limbs and joints; Active implants; Bio interfaces for diagnostics and control; Sensing & biofeedback; Bio electrical signal processing; Haptic devices; Tele surgery; Robot based surgery; Medical imaging; Mobility aids, rehabilitation devices & home care, and care of aged; The future.

### AMME4971

#### Tissue Engineering Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3hrs lec per week **Prerequisites:** BIOL1003 or 6cp of junior biology; CHEM1101 or 6cp of junior chemistry; MECH2901 or MECH2900 **Assumed knowledge:** MECH3921 **Assessment:** Group report, group seminar, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to provide an introduction to the principles of tissue engineering, as well as an up to date overview of recent progress in the field of tissue engineering and where it is going. This unit assumes prior knowledge of cell biology and chemistry and builds on that foundation to elaborate on the important aspects of tissue engineering. The objectives are to: gain a basic understanding of the major areas of interest in tissue engineering; learn to apply basic engineering principles to tissue engineering systems; understand the challenges and difficulties of tissue engineering.

At the end of this unit students will have a theoretical understanding of the basic concepts of tissue engineering: cell culturing; stem cells and engineering cell differentiation; engineering scaffolds, seeding and vascularising them; clinical applications of tissue engineering.

Course content will include: introduction to tissue engineering and the limitations of biomaterials and donor transplants; cell culturing principles and procedures; stem cells: totipotency, multipotency,

pluripotency, and differentiation; engineered tissue scaffolds; scaffold seeding; scaffold vascularisation; ethical considerations; specific biomedical engineering applications.

### AMME4981

#### Applied Biomedical Engineering Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs lectures or seminars/week in a 3-hr block **Prerequisites:** BIOL1003 or 6cp of junior biology; CHEM1101 or 6cp of junior chemistry; MECH2300 or AMME2302 **Assumed knowledge:** MECH3921 or MECH3920, MECH3300 or MECH3362, MECH4960 **Assessment:** Group report, group seminar. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

Computer simulation is a very important aspect of engineering in general, and biomedical engineering specifically. This is because it overcomes the problems of clinical, ethical, and design considerations involved in testing early prototypes on live subjects. This unit of study will take a project-based-learning approach to the topic of computer simulation and design optimization of biomedical devices through lectures and facilitated design work and group seminars. The primary focus will be on finite element modeling, and biomedical implantable devices. After some weeks of lectures on these topics, students will form into teams and use computer simulation techniques to develop and optimize their design.

### AMME4990

#### Biomedical Product Development Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Colin Dunstan **Session:** Semester 1 **Classes:** 2 hours of Lectures and 2 hours of Tutorials per week **Prerequisites:** BIOL1003 or 6 credit points of junior biology CHEM1101 or 6 credit points of junior chemistry MECH2901 or 6 credit points of intermediate physiology or equivalent MECH3921 **Assumed knowledge:** Junior level chemistry, intermediate level biology, and specific knowledge of cell biology at least at the junior level, and preferably at the intermediate level. **Assessment:** Final 2 hour open-book exam - 50%; Assignment on a product development issue - 50%; The assignment is due on Thursday week 13 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

Elective Unit of Study: Translating new concepts to marketable products in the biomedical area presents unique challenges. Development of good manufacturing and quality control processes, preclinical and clinical validation of product safety and efficacy, and regulatory filings, are each progressive and interdependent processes. This UoS will provide a broad understanding of regulatory requirements for biomedical product development, with particular emphasis on the dependence of each component on the development of processes and control systems that conform to Good Manufacturing Practice. Students will gain a broad understanding of biomedical product development, becoming familiar with the challenges and difficulties of Good Manufacturing Practice, the purpose and conduct of preclinical and clinical testing, and how each of these components fit together to support regulatory filings.

### AMST2601

#### American Foundations Arts

**Credit points:** 6 **Teacher/Coordinator:** Sarah Gleeson-White, Department of English **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 junior level credit points in the departments of English, and/or History and/or Art History and Film, in the Faculty of Arts **Assessment:** Close-reading exercise (1000 words); essay (2000 words); take-home exam (1500 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit introduces students to the contradictory richness of "Americanness" from an interdisciplinary standpoint and prepares them for the Major in American Studies. It is divided into different modules, each addressing a core national myth. We will approach

each module from a variety of angles: historiographical, literary and visual, opening lines of interrelation between historical and imaginary forms in the construction and ongoing redefinition of the United States.

#### ANAT2008

##### Principles of Histology

##### Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Laura Lindsay **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour practical per week; online and

museum exercises (6 hours per week total) **Prerequisites:** 12 credit points of Junior Biology or Junior Psychology **Prohibitions:** ANAT2001 **Assumed knowledge:** General concepts in human biology **Assessment:** One 1 hour theory exam, one 1 hour practical exam, four quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Sc, UG Study Abroad Program.

This unit of study covers the principles of cell biology and study of the structure of cells, tissues and organ systems at the light and electron microscopic levels. The focus is on human systems. Extension exercises introduce students to the connection between histology and anatomy. Modern practical applications of histological techniques and analysis for research are also presented.

#### ANAT2009

##### Comparative Primate Anatomy

##### Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Denise Donlon **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week; museum project. **Prerequisites:** 12 credit points of Junior Biology or Junior Psychology or Junior Archaeology. **Prohibitions:** ANAT2002 **Assumed knowledge:** Knowledge of basic vertebrate biology **Assessment:** One 1 hour theory exam, one 30 min prac exam, two quizzes, one 2000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Adv)(Hons), B Sc, UG Study Abroad Program.

This unit of student covers the musculo-skeletal anatomy of the human body with particular emphasis on human evolution and comparisons with apes and fossil hominids. The topics covered include the versatility of the human hand, in manipulation and locomotion, bipedalism, climbing and brachiation in apes, and the change in pelvic anatomy associated with bipedalism and obstetric consequences.

#### ANAT2010

##### Concepts of Neuroanatomy

##### Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Karen Cullen **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** BIOL (1003 or 1903) and one of: ANAT2008 or BIOL (1002 or 1902) or MBLG(1001 or 1901 or 2071 or 2971) or PSYC (1001 and 1002). Students must have a grade of credit in at least one of the prerequisite units. **Prohibitions:** ANAT2003 **Assumed knowledge:** Background in basic cell biology and basic mammalian biology. **Assessment:** One 1.5 hour theory exam, one 1 hour practical exam, 2000 word essay, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Sc, UG Study Abroad Program.

Students are introduced to the structure and organisation of the central and peripheral nervous system. The course begins with an exploration into the make-up of the individual cells, followed by an examination of the different regions of the nervous system. A final theme of the course touches on the organisation of various systems (sensory and motor), together with aspects of higher-order function (memory). In essence, the course covers general concepts of organisation, structure and function of the brain and its different areas. The practicals offer students the unique opportunity to examine specimens in the Anatomy labs and museum. This course will be of considerable interest to students studying science and related disciplines, as well as those wishing to pursue further study in Neuroscience at senior levels.

**ANAT3004****Cranial and Cervical Anatomy  
Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Robin Arnold **Session:** Semester 2 **Classes:** One 1 hour lecture and two 2 hour tutorials per week. **Prerequisites:**

ANAT2009 or ANAT2010 or BMED2803 or BMED2804 or BMED2805 or BMED2806 **Prohibitions:** ANAT3904 **Assumed knowledge:** General knowledge of biology. **Assessment:** Theory exam, prac exam, continuous assessment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG is highly recommended.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit of study covers skull, muscles of facial expression, muscles of jaw and neck, ear, eye, nose, oral cavity and larynx and pharynx as well as peripheral distribution of cranial nerves in the head and neck. The functional components of the cranial nerves and their relationship to the special senses and special motor functions such as facial gesture and speech are also studied. Tutorials are designed to encourage students to develop their own approach to the understanding and organisation of subject material. Communication of key concepts and presentation of subject material in an academic context are encouraged and assessed in a major assignment.

*Textbooks*

Rohan, Yokochi and Lutjen-drecoll, Color Atlas of Human Anatomy.

**ANAT3006****Forensic Osteology  
Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Denise Donlon **Session:** Semester 1 **Classes:** Two 1 hour lectures, one 2 hour tutorial and one 1 hour practical per week. **Prerequisites:** Credit in ANAT2009 or Credit in ANAT2002 (for students who completed Intermediate study before 2005) **Assumed knowledge:** An understanding of basic human musculoskeletal anatomy. **Assessment:** One 1.5 hour theory exam, one 30 min. prac exam, continuous assessment, case study **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG is highly recommended.*

**Associated degrees:** B A (Adv)(Hons), B Sc, UG Study Abroad Program.

This unit of study aims to introduce students to the area of forensic osteology, which is the study of human skeletal remains within the legal context. Thus the unit of study aims to help students learn about human morphology and variation through the investigation and identification of human bones. It will also help students gain skills in observation and rigorous record taking and in analysis and interpretation. Production of case reports and practice in acting as 'expert witness' will improve students written and oral skills. An additional objective will be to assist students in learning to deal with legal and ethical issues.

*Textbooks*

**ANAT3007****Visceral Anatomy  
Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Robin Arnold **Session:** Semester 1 **Classes:** Two 1 hour lectures and two 2 hour practicals per week. **Prerequisites:** ANAT2009 or ANAT2010 **Assumed knowledge:** General knowledge of biology. **Assessment:** Theory exam, prac exam, continuous assessment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Sc, UG Study Abroad Program.

This unit of study aims to provide an understanding of the anatomy of the viscera of the thorax, abdomen and pelvis. Structures covered include the heart and associated great vessels, lungs, mediastinum and the abdominal viscera, the alimentary organs and the genitourinary system. The structure of anterior thoracic and abdominal walls and pelvis along with the nerve supply to the viscera and relevant endocrine structures is also covered. Emphasis is placed on the relationship of structure to function especially with respect to the important functions of breathing, digestion, excretion and reproduction. Students will also be encouraged to relate their understanding of the structures studied to current research into these structures in related fields such as molecular biology and physiology.

*Textbooks*

Rohan, Yokochi and Lutjen-drecoll. Color Atlas of Human Anatomy.

### ANAT3008 Musculoskeletal Anatomy Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Richard Ward **Session:** Semester 2 **Classes:** Two 1 hour lectures, two 2 hour tutorials/practicals per week. **Prerequisites:** ANAT2009 or ANAT2002 (for students who completed Intermediate study before 2005) or BMED2803 or BMED2804 or BMED2805 or BMED2806 **Prohibitions:** ANAT3005 **Assumed knowledge:** Some knowledge of basic mammalian biology **Assessment:** One assignment, one 1 hour prac exam, one 1.5 hour theory exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The unit provides an opportunity for students to study the topographical and systems anatomy of the upper limb, lower limb and the back regions. Emphasis is placed upon the identification and description of structures and the correlation of structure with function. This includes for the upper limb, its role in manipulation, for the lower limb standing and walking and for the back flexible support and protection. Emphasis is also given to the innervation of the limbs. The unit also aims to develop the general skills of observation, description, drawing, writing and discussion as applying to biological structure.

### ANAT3551 Anatomy and Histology Exchange Medicine

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc.

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### ANAT3552 Anatomy and Histology Exchange Medicine

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc.

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### ANAT3553 Anatomy and Histology Exchange Medicine

**Credit points:** 12 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc.

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### ANAT3554 Anatomy and Histology Exchange Medicine

**Credit points:** 12 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc.

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### ANAT3904 Cranial & Cervical Anatomy (Advanced) Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Robin Arnold and Dr Laura Lindsay **Session:** Semester 2 **Classes:** Two lectures per week, one 1 hour tutorial per week **Prerequisites:** For Medical Science: Credit in BMED(2803 or 2804 or 2805 or 2806). For BSc and other students Credit in ANAT(3007 or 2010 or 2009). **Prohibitions:** ANAT3004 **Assessment:** Theory exam, practical spot test, participation in dissection practicals and production of detailed weekly reports of the dissection carried out that week **Practical field work:** One 3 hour dissection per week **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Students must receive permission from the coordinators for enrolment. Course is subject to availability of donor material for dissection.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit of study is an alternative to ANAT3004 Cranial & Cervical for talented students with a special interest in and need for dissection experience. The lecture/tutorial component of the course is run in conjunction with ANAT3004. Students in the advanced course will study the anatomy of the skull, muscles of face, jaw and neck, eye, ear, nose oral cavity, larynx and pharynx as well as the peripheral distribution of cranial nerves in the neck. Dissection will allow students to find these structures in donated human cadavers for themselves and to study and to understand at least some of the many anomalies and variations which characterise human cranial and cervical anatomy.

*Textbooks*

An Anatomy atlas such as Rohan, Yokochi, Lutjen-Drecoll, Colour Atlas of Human Anatomy

### ANAT4011 Anatomy Honours A Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Hons).

Students enrolled in the Honours program study various advanced aspects of Anatomy. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

### ANAT4012 Anatomy Honours B Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ANAT4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Hons).

Students enrolled in the Honours programs study various advanced aspects of Anatomy. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

### ANAT4013 Anatomy Honours C Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ANAT4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Hons).

Students enrolled in the Honours programs study various advanced aspects of Anatomy. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

**ANAT4014****Anatomy Honours D  
Medicine**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ANAT4013  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Hons).

Students enrolled in the Honours programs study various advanced aspects of Anatomy. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

**ANHS1600****Foundations for Ancient Greece  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Alastair Blanshard **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week  
**Prohibitions:** ANHS1003 **Assessment:** Assessable tasks (1000 words), participation, one 1000 word research exercise and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Sc, B Com, Dip Arts, UG Study Abroad Program.

Delphic oracles, epic stories of heroes, graceful temples, tales of lust and tyranny - the Greek world has much to delight and surprise. This unit of study will introduce you to the study of ancient Greek history and culture and provides a springboard for further studies in history, archaeology and literature. It is informed by a cross-disciplinary approach that combines a variety of perspectives to achieve a holistic view of the ancient world.

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

Stories about Greek and Roman gods, heroes, and monsters occupy an important place in Western culture. Greco-Roman mythology is the fount of inspiration for the masterpieces of art, music, and literature. This unit examines these enduring ancient narratives, symbols, and mythical ideas in their historical, cultural and religious context. Learn about the manifold meanings of myth, its transformations and transgressions, its uses and abuses from antiquity to the present day.

Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathryn Welch **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of Ancient History, Classical Studies, Ancient Greek or History OR 6 junior credit points of Ancient History and 6 junior credit points of either Latin, Greek (Ancient), Classical Studies, History, Philosophy, Archaeology (Classical) or Archaeology (Near Eastern) **Prohibitions:** ANHS2001 **Assessment:** one 2 hour exam, one 2000 word class paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

The empire of Rome made the Mediterranean World one. How did a single city win this controlling position? What were the experiences of Rome's predecessors (Sparta, Athens, Carthage) and why did a city-state of the same order make the breakthrough which they did not? Material factors (military, demographic and economic) are balanced against imperial concepts (glory, service, faith and majesty) and the question posed: Is this universal empire best seen as an achievement of conquest, an economic imperative or a world-community being formed? How applicable are our findings to other empires at other times or was Rome historically conditioned and unique?

**ANHS2605****Ancient Greek Religion  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Julia Kindt **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of Ancient History, Classical Studies, Ancient Greek or History OR 6 junior credit points of Ancient History and 6 junior credit points of either Latin, Greek (Ancient), Classical Studies, History, Philosophy, Archaeology (Classical) or Archaeology (Near Eastern) **Assessment:** one 2000 word class paper, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit explores Greek religion as a defining feature of what it meant to be Greek. We will investigate similarities and differences between religious beliefs and practices throughout the ancient Greek world and trace how religion changed over time. Topics addressed include sacrifice, religious festivals and games, the use (and abuse) of divination, and shared notions of purity and pollution.

**ANHS2611****Greek and Roman Magic  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lindsay Watson **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of Ancient History, History or Classical Studies OR 6 junior credit points of Ancient History or Classical Studies and 6 junior credit points of either Latin, Greek (Ancient), History or Archaeology **Prohibitions:** CLSS2602 **Assessment:** one 1000 word tutorial paper, one 1750 word essay, one 1750 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

This unit will provide students with a grounding in the most important aspects of Greek and Roman magical practice. Students will acquire an understanding of the socio-cultural perceptions which informed the use of magic; gain a sense of whether certain types of magic were sex-specific; ask to what extent erotic magic can be seen as empowering; consider whether magic can be legitimately demarcated

from religion; come to understand the reasons for the hostility of Greek and Roman authorities to magical activities.

#### ANHS2612

##### Historiography Ancient and Modern

###### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of Ancient History or History or Asian Studies OR 6 junior credit points of Ancient History or History or Asian Studies and 6 junior credit points of either Classical Studies, Latin, Greek (Ancient), or Archaeology **Prohibitions:** ANHS2691, ANHS2692 **Assessment:** one 3000 word essay, one 1500 word exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

Greco-Roman historiography remains a central object of inquiry for students of the ancient world. This unit examines samples of Greco-Roman historiography in light of their original contexts and of modern approaches. Topics will include: Why did the ancients invent and how did they exploit literary representations of the past? What were their methods and their criteria for ascertaining historical truths? How was history implicated in Greco-Roman literature and in Greco-Roman culture? How can modern historiographical theories illuminate ancient practices?

#### ANHS3610

##### Research Issues in Ancient Greek Studies

###### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Alastair Blanshard **Session:** Semester 2 **Classes:** two 1 hour lectures per week **Prerequisites:** Credit average in 18 senior credit points of Ancient History, Classical Studies, History, Latin, Greek (Ancient), Archaeology including ANHS2691 or HSTY2691 **Assessment:** one 6000 word research essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This seminar provides an introduction to advanced research design and techniques in Greek history and culture, including library resources and technology. You will undertake a detailed study of a topic relevant to Greek studies selected by your teacher. Your research paper will treat an aspect of that topic chosen by you with advice from your teacher and your class.

#### ANHS3611

##### Research Issues in Roman Studies

###### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Roche **Session:** Semester 1, Summer Main **Classes:** two 1 hour lectures per week **Prerequisites:** Credit average in 18 senior credit points of Ancient History, Classical Studies, History, Latin, Greek (Ancient), Archaeology including ANHS2691 or HSTY2691 **Assessment:** one 6000 word research essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: In summer the unit will be taught as an intensive program in Rome. To register your interest, please contact Dr Paul Roche via email, paul.roche@usyd.edu.au*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This seminar offers an introduction to advanced research design and techniques in Roman history and culture, including library resources and technology. #### Animal Conservation Biology

##### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Jaime Gongora **Session:** Semester 2 **Classes:** variable consisting of up to 6hrs/week (students advised to consult weekly timetable) of lectures, tutorials and practical classes, lectures will involve guest speakers from specialist areas **Prohibitions:** VETS2015 **Assessment:** 80% of the total grade for this unit shall be gained from assessment within the VETS2015 unit of study (2 hour theory exam (70%), assignments/presentations (30%)), the final 20% for this unit of study shall be assessed by a second assignment/presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc.

This unit will also provide the student with a broad knowledge and general understanding of the taxonomy, ecology, biology and conservation status of Australia's unique vertebrate fauna, specified key aspects of the anatomy and physiology of Australia's native vertebrate fauna (ANF) and provide an understanding of the principles of the ecology, population dynamics, conservation status and management of macropods in Australia. The threatening processes past and present that continue to adversely affect Australia's fauna will be covered. Instruction into critically evaluating the arguments for and against the sustainable utilisation of wildlife, including the ethical and animal welfare aspects will be introduced to the student. Through examples and guest speakers the student will be shown the general principles of disease as they apply to wildlife health and gain a broad knowledge and understanding of the husbandry and handling requirements for captive breeding of ANF, as well as be made aware of and gain understanding in the principles, animal welfare aspects and ethics of wildlife rehabilitation and translocation. Further topics covered will allow the student to be aware of, understand and critically evaluate the basis for current approaches to wildlife emergency management (oil spills, bushfires, marine mammal strandings), have a working knowledge and understanding of the legislation and treaties that deal with wildlife conservation and management, have exposure to, and knowledge of, a specified range of field techniques for assessing wildlife populations and habitats. The unit provides an introduction to use of reproductive technology as a conservation tool and genetics in the management of endangered populations. It will also look at the economics of biodiversity preservation, including opportunity costs in conservation and preservation. Assignments will build on the knowledge gained in lectures and practical classes and allow students to investigate topics related to this unit that may be of special interest to them as individuals and a group.

#### Animal Nutrition 3

### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Alex Chaves **Session:** Semester 2 **Classes:** lectures 3 hrs/wk, tutorials 1 hr/wk, laboratories 2 hrs/wk **Prerequisites:** ANSC2002 or AVBS1002 **Assessment:** assignments, including web based problem solving exercises (35%), oral presentation (10%), quiz (10%), tutorial (5%), written exam (40%) **Practical field work:** 2 field trips (6 hours) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc (Molecular Biotechnology), B Sc Agr.

This Unit of Study builds upon principles discussed in ANSC2002 (Animal Science 2). The Unit is broadly divided into four sections, namely: estimating the nutritive value of feeds; estimating the nutrient requirements of animals; diet formulation; errors in feeding. The focus is on coming to an understanding of the assessment of nutritional adequacy and the avoidance and solving of nutritional problems, with a particular emphasis on animals used in agricultural production systems and wildlife. The principles discussed in this course will be expanded in the following year, in which species-specific systems will be described. The basis of successful feeding management is an understanding of the following: the composition of feeds; the digestibility and efficiency of utilisation of nutrients by the animal; the requirements of the animal for nutrients; interactions between nutrients that influence health and production. And following from this an ability to: formulate diets to meet animal requirements for a variety of purposes and under a variety of constraints; identify deficiencies, excesses and imbalances in diets and so avoid a decline in productive efficiency and/or a decline in health.

### ANSC3102

#### Animal Reproduction

##### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Chris Grupen **Session:** Semester 1 **Classes:** lectures 2 hrs/week, tutorials 1 hr/week, practicals 3 hrs/week **Prerequisites:** ANSC2002 or AVBS1002 **Assessment:** written and oral assignments 25%, written exam 15%, end of semester written exam 60% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc (Molecular Biotechnology), B Sc Agr.

This unit of study provides a comprehensive programme on basic and applied aspects of male and female reproductive biology, with particular emphasis on domestic animals. The fundamental topics include reproductive cycles, sexual differentiation, gametogenesis, fertilization, embryo development, gestation and parturition. The applied aspects include tuition on semen collection and processing, control and management of reproduction, artificial insemination, embryo transfer, pregnancy diagnosis, and induction of parturition. Classes are given at the Camperdown Campus in Sydney and at the Camden Campus Animal Reproduction Unit in Cobbitty.

### ANSC3103

#### Animal Structure and Function A

##### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Melanie Collier **Session:** Semester 1 **Classes:** lectures 3hrs/wk, laboratories/tutorials 3hrs/wk (note these will vary depending upon the week) **Prerequisites:** 12 credit points of junior biology **Assumed knowledge:** ANSC2002 or AVBS1002 **Assessment:** assignments/presentations (45%), theory exam (55%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc (Molecular Biotechnology), B Sc Agr.

Animal Structure and Function A will develop an understanding of the role of the body systems in maintaining homeostasis in an animal's internal environment. In ASFA the structure and function of the

cardiovascular, respiratory, central nervous and urinary systems of the body are explored in depth particularly with reference to the maintenance of homeostasis and an animal's perception of, and response to, its environment. The developed understanding of the normal functioning of these systems allows identification of the impact on the animal of abnormal function of these systems. A study of the structure and function of muscle will include its role in movement, as meat in a production setting and in a study of a horse's response to exercise and training. The overall goals of the Unit are (i) to enable students to develop a rich understanding of the relationships between body systems and structures (to be continued in ASFB), (ii) to develop generic skills particularly in oral presentation, (iii) to develop an appreciation of the links between structure, function and their relevance to animal production that will be further developed in advanced, applied studies in Behaviour in third year and in 4th year Animal Production.

#### Textbooks

The recommended textbook for the animal structure component of the unit is: Dyce, KM, Sack, WO & Wensing, CJG 2002, Textbook of veterinary anatomy, 3rd edn, W.B.Saunders, Philadelphia for the physiology component of this unit: Sherwood, L, Klandorf, H and Yancey, P H ( 2005) Animal Physiology. From Genes to Organisms. Thomson Brooks Cole A handbook containing details of lecture outlines, objectives, reference lists, details of practical classes, staffing as well as other relevant class material will be available for students to purchase

### ANSC3104

#### Animal Structure and Function B Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Melanie Collier **Session:** Semester 2 **Classes:** lectures 3 hrs/wk, laboratories/tutorials 3 hrs/wk, activities will vary on a weekly basis **Prerequisites:** ANSC3103 **Assumed knowledge:** ANSC2002 or AVBS1002 **Assessment:** anatomy dissection project 20%, topic test 20%, exam 60% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc (Molecular Biotechnology), B Sc Agr.

In this Unit students will complete the study of the structure and function of organ systems in animals started in ANSC3103. The role of hormones, the integument and the immune systems will be investigated in relation to maintenance of internal homeostasis. An introduction to digestion and male and female reproductive anatomy and physiology will form the basis for further applied studies in these areas in third year Units of Study in Animal Nutrition and Animal Reproduction. There will be development of the generic skills of critically reading and writing.

### ANSC3105

#### Animal Biotechnology Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Prof Chris Moran **Session:** Semester 2 **Classes:** lectures 3 hrs/wk, tutorials 1 hr/wk, seminars/workshops 0.25 hrs/wk, laboratories 0.5 hrs/wk **Prerequisites:** (ANSC2002 or AVBS1002) and GENE 2001 **Assessment:** seminar (20%), essay (20%), 2 hr exam (60%) **Practical field work:** excursions, self-directed learning, supervised reading, computer aided instruction 1.25 hrs/wk **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc (Molecular Biotechnology), B Sc Agr.

Lectures, tutorials, laboratories (PCR, DNA sequencing and bioinformatics), seminars and supervised reading and directed learning instruction will cover the application of biotechnology to animal productivity, disease control, the development of new products from animals and the impact of altered micro-organisms and plants on animals. A firm foundation in molecular biology and recombinant DNA

technology is provided, with an emphasis on relevance in animals. Regulation of gene expression in vivo and in expression systems, monitoring of gene expression including microarrays and proteomics, gene mapping, genomics and gene discovery are all discussed in contexts relevant to domestic animals. Genetic modifications of animals including transgenesis and gene knockout, and methods for achieving these modifications including cloning by nuclear transfer are detailed. Basic skills in bioinformatics are developed to access and utilise the vast information resources available. Legal methods of protecting intellectual property are described. Finally animal biotechnology is reviewed from an ethical perspective.

### ANSC3106

#### Animal Behaviour and Welfare Science 3 Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Greg Cronin **Session:** Semester 1 **Classes:** 6 hrs/wk (lectures, demonstrations, discussions and debates) **Prerequisites:** ANSC2002 or AVBS1002 **Prohibitions:** VETS3018 **Assessment:** assignments/presentations (50%), theory exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc.

Animal Behaviour and Welfare Science 3 builds on the understanding of animal form and operation that students have developed in prior Units. In Animal Behaviour and Welfare Science 3, the behavioural and physiological responses of animals to stressors related to husbandry, housing, transport, slaughter, training and performance are explored in some detail. This Unit enables students to develop a three-dimensional appreciation of the species differences in response to common management interventions that arise in the context of domestication. The principles of animal responses to distress are illustrated with production species as the main examples.

Contemporary approaches in the scientific assessment of animal stress and welfare, based on an appropriate selection of scientific disciplines including ethology, physiology and neuroscience are assessed with an emphasis on livestock species. Genetic, environmental and evolutionary determinants of pain, stress and fear responses in animals are considered in the light of what is known about cognition and motivation in animals. Methods for assessing and enhancing animal environments and husbandry systems are examined and the impact on animal welfare of stockmanship and human personality is explored in the context of human-animal interactions. Finally, the design and conduct of scientific experiments is assessed with a focus on welfare issues.

Animal Behaviour and Welfare Science 3 includes a compulsory library based assignment that provides students with an opportunity to select one species on which they report a summary of scientific advances that may contribute to animal welfare.

The other assessment task involves completion of core elements of an animal ethics approval application form that requires students to interpret an experimental design, giving a lay summary, an explanation of the impact on the animals' welfare and an explanation of how animal welfare will be ensured using the principle of the three R's (reduction, refinement, replacement).

#### Textbooks

The recommended textbook for the animal structure component of the unit is: Broom, DM & Fraser, AF 2007, Domestic animal behaviour and welfare, 4th edition, CAB International, Cambridge Uni Press, Cambridge  
Other core texts are:

Monamy, V 1996, Animal experimentation: a student guide to balancing the issues, Australian and New Zealand Council for the Care of Animals in Research and Teaching, Glen Osmond, Australia  
Gregory, NG The physiology and behaviour of animal suffering, UFAW, Blackwell Scientific, Oxon

A course handbook containing details of lecture outlines, objectives, reference lists, details of practical classes, staffing as well as other relevant class material will be available for students to purchase

**ANSC3107****Animal Genetics 3  
Veterinary Science**

**Credit points:** 6 **Teacher/Coordinator:** Prof Chris Moran **Session:** Semester 2 **Classes:** lectures 3 hrs/wk, practicals 3 hrs/wk **Prerequisites:** GENE2001 or MBLG2072 or MBLG2972 **Assessment:** 30min test on practicals (25%), 1500wd essay (25%), 1.5 hr exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc.

The unit of Study explores in detail genetic aspects of commercial animal populations and investigates options for the practical application of genetics to improve animal productivity. It is designed to provide the background material, fundamental concepts and data analysis methods for breeding strategies in each of the animal industries. The unit of study develops basic principles of population and quantitative genetics from Agricultural Genetics 2 and provides a valuable complement to the molecular principles expanded in Animal Biotechnology 3. Animal Genetics provides the context and justifies the application for advanced reproductive technologies presented in Animal Reproduction 3.

At the end of this Unit of Study, students will demonstrate an understanding of: the principles of population genetics and the concepts of relationship and inbreeding, and adverse effects of this inbreeding; the principles of quantitative genetics including the concepts of genetic variance, heritability and repeatability, and methods for the identification and selection of superior livestock; the use of multitrait selection procedures to increase the overall economic value of populations of animals; the constraints to production gains using genetic selection programmes and advantages obtained through crossbreeding; the practical application of selection and crossing in animals; the genetical implications of reproductive technology such as embryo sexing, splitting and cloning, artificial insemination and MOET.

**ANTH1001****Cultural Difference: An Introduction  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Gaynor Macdonald and Dr Linda Connor **Session:** Semester 1, Summer Late **Classes:** two 1 hour lectures and one 1 hour tutorial per week, occasional hour-long optional film-screenings and workshops **Prohibitions:** ANTH1003 **Assessment:** 2500 words of written work (50%) and one 2 hour exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ec (Soc Sc), B Int S, B Sc, B Com, Dip Soc Sc, UG Study Abroad Program, UG Summer/Winter School.

Anthropology explores and explains cultural difference while affirming the unity of humankind. It provides accounts of cultural specificity that illuminate the world today. Lectures will address some examples of cultural difference from the present and the past. These examples will introduce modern Anthropology, the method of ethnography, and its related forms of social and cultural analysis.

readings will be available at the University Copy Centre

**ANTH1002****Anthropology and the Global  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Neil Maclean and Dr Holly High **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prohibitions:** ANTH1004 **Assessment:** 2500 words of written work (50%) and one 2 hour exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ec (Soc Sc), B Int S, B Sc, B Com, Dip Soc Sc, UG Study Abroad Program.

Anthropology's ethnographic method, long term embedded-ness within a specific culture, allows for a particularly intimate understanding of

people's experiences of the social worlds they inhabit. This course shows the importance of this experiential intimacy for understanding some of the key issues associated with globalisation: the culturally diverse adaptations of global capitalism, the transnational communities emanating from global population movements, the transformations of colonial and post-colonial cultures, the rise of global movements and the corresponding transformation of Western nationalism.

**ANTH2601****The Ethnography of Southeast Asia  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Holly High **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points of Anthropology **Assessment:** 2500 words of written work (60%) and 2 hour exam (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Soc Sc, UG Study Abroad Program.

Southeast Asia comprises a broad spectrum of social and ecological landscapes, from primate cities to primary forests. This unit of study examines how humans have made meaningful lives in these contexts in terms of productive activities, social units, political formations and cultural representations. This unit also examines the various approaches anthropologists have used for the task of conceptualising of and writing about these.

*Textbooks*

Readings available from the University Copy Centre.

**ANTH2621****Initiation Rituals  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jadran Mimica **Session:** Semester 2, Summer Late **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points of Anthropology **Prohibitions:** ANTH2021 **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Soc Sc, UG Study Abroad Program, UG Summer/Winter School.

This unit examines and elucidates a wide range of phenomena commonly known as "initiation rituals". Through a wealth of ethnographies the course surveys male and female forms of these practices and appraises their various interpretations by anthropologists, psychoanalysts and scholars of comparative religion. A special focus is on the psycho-dynamics and meanings of self-transformations which these radical practices effect upon the practitioners themselves. The unit also articulates a general theory of ritual action grounded in phenomenology and psychoanalysis.

reading lists will be available at the beginning of lectures

## ANTH2625

### Culture and Development Arts

**Credit points:** 6 **Teacher/Coordinator:** TBA **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points of Anthropology **Assessment:** 2,500 words of written work (60%) and 2 hours of examination (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Ec (Soc Sc), B Int S, Dip Soc Sc, UG Study Abroad Program.

Development is the tension between new forms of wealth, human wants and structures of inequality generated by capital, the attempts through state and international political and legal systems to control that process and the specificity of the local social systems they seek to 'develop'. This unit compares the variety of local forms of this process in colonial, post-colonial, third- and fourth world settings. Key themes include: resource politics, religion, the politics of the family, ethnicity, corruption and contemporary violence.

## ANTH2626

### The City: Global Flows and Local Forms Arts

**Credit points:** 6 **Teacher/Coordinator:** Erin Taylor **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points of Anthropology **Prohibitions:** ANTH2026 **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Soc Sc, UG Study Abroad Program.

Modern cities are produced in two ways: (a) as types of city responsive to their larger social and cultural environment - the metropolis, the trading or rural centre and the city of sprawling shanty towns; (b) as types of ordered urban space that allocate different identities to a city's inhabitants. This unit focuses on ethnographic and historical studies of urbanism around the world. Lectures will also discuss the method of ethnography and its many uses for research in urban environments.

## ANTH2627

### Medical Anthropology Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Holly High **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial **Prerequisites:** 12 Junior credit points of Anthropology **Prohibitions:** ANTH2027 **Assessment:** 2,500 words of written work (60%) and 2 hours of examination (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Ec (Soc Sc), B Int S, Dip Soc Sc, UG Study Abroad Program.

Medical anthropology is a comparative and ethnographic response to the global influence of biomedicine within diverse cultural worlds. This unit will examine major theoretical approaches, their respective critiques, and the methods that underpin them. Concepts such as 'health/illness', 'disease', 'well-being', 'life-death', and 'body/mind' will be located in a variety of cultural contexts and their implications for different approaches to diagnosis and treatment considered. The unit will include culturally located case studies of major contemporary health concerns such as AIDS.

## ANTH2629

### Race and Ethnic Relations Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Sebastian Job **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points of Anthropology **Prohibitions:** ANTH2117 **Assessment:** one 2500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Ec (Soc Sc), B Int S, UG Study Abroad Program.

A comparative study of race and ethnic group relations. The unit will consider the history of ideas of 'race' and practices of racialising and their relationship to ethnicity. It will draw on studies from various areas including North America, the Caribbean, Japan and Australia.

*Textbooks*

Reading lists will be available at the beginning of lectures

## ANTH2630

### Indigenous Australians and Modernity Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Gaynor Macdonald **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points of Anthropology **Assessment:** one 1500 word essay, one 2500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Soc Sc, UG Study Abroad Program.

Australian Aboriginal peoples have always engaged with the 'modern world' but Enlightenment ideas established a colonial context juxtaposing modernity with tradition. Indigenous difference was locked into past-oriented, static and small scale traditions. The unit examines some key concepts of modernity, including progress, civility, change, tradition - and modernity itself - so as to shed light on Australian Indigenous people's experiences, past and present, as colonial subjects. The unit will explore Aboriginal engagement with, for instance, work, vehicles, the law, and the arts (painting, music etc) as practices through which Aboriginal people have sought 'alternative modernities'.

## ANTH2655

### The Social Production of Space Arts

**Credit points:** 6 **Teacher/Coordinator:** TBA **Session:** Semester 1 **Classes:** One 2 hour seminar per week **Prerequisites:** 12 junior credit points in Anthropolgy. **Prohibitions:** ANTH3911 **Assessment:** 2,500 words of written work (60%) and 2 hours of examinations (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Ec (Soc Sc), B Int S.

Space/place appears in anthropology as both a product of historically specific social practice and as an irreducible dimension of any social formation. This theoretical tension will be explored through examination of such themes as: the contradiction between the global as abstract space and the local as qualitatively distinct place; struggles over the definition and control of space; space/time as an aspect of any world; centre/periphery and inside/outside as pervasive tropes of social analysis.

*Textbooks*

Reading lists will be available at the beginning of lectures.

## ANTH2664

### Cosmology and Power in South Asia Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Sheleyah Courtney **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial **Prerequisites:** ANTH1001 or ASNS1001 or ASNS1002 **Assessment:** one 2500 word essay and one 2 hour examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, UG Study Abroad Program.

This unit explores South Asian cultures through ethnographies of village and urban life. The unit also observes the ways in which religious ideologies of the subaltern classes both complement and contradict those of the Brahmin elite via an examination of Goddess and Bhakti traditions and other religious phenomena such as radical asceticism. To this end the unit examines dimensions of caste, gender, nationalism and communal and family relations. Students engage with contemporary debates concerning approaches to the analysis of South Asian culture.

readings will be available at the University Copy Centre

## ANTH2665

### South Asian Popular Culture Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Sheleyah Courtney **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** ANTH1001 or ASNS1001 or ASNS1002 **Assessment:** one

2500 word essay and one 2 hour examination **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, UG Study Abroad Program.

This unit explores South Asian popular culture and its transnational appeal. Bollywood cinema exemplifies this phenomenon, homogenizing South Asia's vast linguistic, cultural, regional and class divides, creating a supra-national identity. Yet it remains unique and culturally continuous, possessing diverse influences from folk theatre: the Bengali Yatra, the Maharashtran Tamasha, Ram-Lila from Uttar Pradesh, the Rajesthani Nautanki, and the Ramayana and Mahabharata epics. Students explore portrayal of divinity and devotion in film and its effects on South Asia's religious, political and sexual culture.

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Soc Sc.

## ANTH3601

### Contemporary Theory and Anthropology Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Jadran Mimica **Session:** Semester 1 **Classes:** one 2 hour seminar per week **Prerequisites:** 12 credit points of Senior Anthropology at Credit level or above **Prohibitions:** ANTH3921, ANTH3922 **Assessment:** 6000 words of written work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Soc Sc, UG Study Abroad Program.

This honours preparation unit will assist students to define their objectives in anthropology and anticipate their honours year through: 1) exploring key concepts of anthropological analysis and critique, 2) increasing their knowledge of the ethnographic method and its contemporary challenges, 3) developing library research skills and experience in formulating a research project.

## ANTH3602

### Reading Ethnography Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Linda Connor **Session:** Semester 2 **Classes:** one 2 hour seminar per week **Prerequisites:** 12 Credit Points of Senior Anthropology completed at Credit level or above **Prohibitions:** ANTH3611, ANTH3612, ANTH3613, ANTH3614 **Assessment:** one 1500 word essay, one 2500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Soc Sc.

Ethnography is grounded on the 'participant observation' of social practice and the interpretation of values and experience in particular social contexts. It makes the strange familiar, and the familiar strange. This unit will focus on the relationship between research methods and design and the development of regionally and thematically specific debates in anthropology.

## ANTH4011

### Social Anthropology Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Gaynor Macdonald **Session:** Semester 1, Semester 2 **Classes:** consult department **Prerequisites:** Students must have a Credit average in Senior level Anthropology units totalling at least 48 credit points. Units must include ANTH3601 and at least one of the following: ANTH3611, ANTH3613 or ANTH3614. **Assessment:** all of the major components of the Honours year will be assessed **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Ec (Soc Sc)(Hons), B Int S (Hons), Dip Soc Sc (Hons).

Honours consists of a number of seminars, coursework and the completion of a substantial research thesis. For details please contact the Chair of Department or the Honours Co-ordinator (where applicable).

## ANTH4012

### Social Anthropology Honours B Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Gaynor Macdonald **Session:** Semester 1, Semester 2 **Classes:** consult department **Corequisites:** ANTH4011 **Assessment:** all of the major components of the Honours year will be assessed **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Ec (Soc Sc)(Hons), B Int S (Hons), Dip Soc Sc (Hons).

## ARBC1611

### Arabic Introductory 1B

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nijmeh Hajjar **Session:** Semester 1 **Classes:** 4 face-to-face classes per week and 1 hour autonomous learning in language lab **Prohibitions:** ARBC1311, ARBC1312, ARBC1101, ARBC1102 **Assessment:** 2.5-hour exam (equivalent to 2000 words), regular assignments and class assessment (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to teach Arabic as a living language. It is meant for students with no previous learning experience of the language. The unit is designed to introduce and build up basic language skills: listening and speaking, reading and writing, using modern standard and educated every-day Arabic. Students will learn basic vocabulary, language structures, morphology and syntax of Arabic in context, through lively dialogues, realistic conversational situations, story lines, exercises and drills, rather than formal grammar. On completion of this unit, students progress to ARBC1612 in second semester.

#### Textbooks

Nijmeh Hajjar, Living Arabic in Context: An Introductory Course, Beirut, 2005

## ARBC1612

### Arabic Introductory 2B

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nijmeh Hajjar **Session:** Semester 2 **Classes:** 4 face-to-face classes per week and 1 hour autonomous learning in language lab **Prerequisites:** ARBC1101 or ARBC1611 or equivalent **Prohibitions:** ARBC1311, ARBC1312, ARBC1102 **Assessment:** 2.5-hour exam (equivalent to 2000 words), regular assignments and class assessment (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to strengthen students' listening, speaking, reading and writing skills in living Arabic. Emphasis will be on building up communicative ability as well as extending the vocabulary and language structures through realistic dialogues and story lines in modern standard and educated every-day Arabic. Morphology and syntax of Arabic are gradually introduced in context through a structured method of progression, using realistic patterns, exercises and drills, rather than formal grammar. On completion of this unit, students progress to ARBC2613.

#### Textbooks

Nijmeh Hajjar, Living Arabic in Context: Arabic for Beginners, Stage 2, Sydney, 2004. (For textbook and audio CDs consult the department.)

## ARBC2613

### Arabic Language and Literature 3B

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nijmeh Hajjar **Session:** Semester 1 **Classes:** 4 hours per week for 9 weeks and 3 hours per week for 1 week **Prerequisites:** ARBC1102 or ARBC1612 or equivalent **Prohibitions:** ARBC1311, ARBC1312, ARBC2633, ARBC2634, ARBC2103 **Assessment:** Regular assignments (equivalent to 2000 words, 50%), 2.5-hour end of semester exam (equivalent to 2500 words, 50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to extend students' language skills in Arabic and enable them to appreciate Arabic literary texts. Students will be able to build up their communicative ability and extend their knowledge of modern Arabic vocabulary and structures, through realistic dialogues and class activity, including role-playing. They will be introduced to modern

Arabic literature through reading and discussing selected texts by prominent authors, in their societal context. On completion of this unit, students progress to ARBC2614.

#### Textbooks

Language material and a selection of literary texts will be available. (Consult the department.)

## ARBC2614

### Arabic Language and Literature 4B

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nijmeh Hajjar **Session:** Semester 2 **Classes:** 4 hours per week for 9 weeks and 3 hours per week for 1 week **Prerequisites:** ARBC2103 or ARBC2613 or equivalent **Prohibitions:** ARBC2104, ARBC1311, ARBC1312, ARBC2313, ARBC2314, ARBC2633, ARBC2634, ARBC3635, ARBC3636, ARBC3637, ARBC3638 **Assessment:** Regular assignments (equivalent to 2000 words, 50%), 2.5-hour end of semester exam (equivalent to 2500 words, 50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims at further strengthening students' communicative skills in Arabic, both aural/oral and written, as well as building up their ability to read, appreciate and discuss samples of Arabic literature by prominent authors in their societal context. Students will be able to extend their knowledge of Arabic vocabulary and structures through realistic dialogues, role-playing and the use of a range of recorded material in Arabic. On completion of this unit, students progress to ARBC3615.

#### Textbooks

Language material and a selection of literary texts will be available. (Consult the department.)

## ARBC2633

### Arabic Advanced Language & Literature 3A

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nijmeh Hajjar **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** HSC Arabic Extension or Arabic Continuers or 70% or above in Arabic Beginners (subject to placement test) or equivalent **Prohibitions:** ARBC1311 **Assessment:** Regular assignments (equivalent to 2500 words), essay/exam (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to strengthen practical language skills, including writing and translation, to enrich the student's understanding of Arabic literature and culture, develop their analytical and critical skills through reading of a variety of Arabic texts by writers from different Arab countries, focusing on themes of modernity and identity as reflected in modern Arabic essays on political, social and cultural issues and in contemporary Arabic literature in general.

#### Textbooks

A dossier of texts will be provided.

## ARBC2634

### Arabic Advanced Language & Literature 4A

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nijmeh Hajjar **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** ARBC1311 or ARBC2633 **Prohibitions:** ARBC1312, ARBC1101, ARBC1102, ARBC1611, ARBC1612 **Assessment:** Regular assignments (equivalent to 2500 words), essay/exam (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to strengthen practical language skills in Arabic, building on the approach followed in semester 1, including writing and translation skills to enrich students' understanding of Arabic literature and culture, and to develop their analytical and critical skills through reading of modern Arabic writers from various Arab countries.

#### Textbooks

A dossier of texts will be provided.

### ARCA1001

#### Ancient Civilisations

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mitch Hendrickson **Session:** Semester 1, Summer Late **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Assessment:** one 500 word assignment, one 1500 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

Human history has been punctuated by the rise and decline of numerous major civilisations all across the globe. The aim of this unit is to introduce students to some of the most impressive discoveries made by archaeologists during the past 150 years, and to the remarkable achievements of the great civilisations of the past, including the Inca, Aztec and Maya in the New World, and the Sumerians, Egyptians, Greeks, Romans, Harappans (India/Pakistan) and Shang Chinese in the Old World. This unit will provide a comprehensive overview of humanity's greatest architectural, technological and artistic achievements in the distant past.

### ARCA1002

#### Archaeology: An Introduction

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Martin Gibbs **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prohibitions:** ARPH1001 **Assessment:** one 2000 word essay, one 1000 word test and six tutorial exercises **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

Archaeology is a dynamic world-wide discipline which draws on both the sciences and humanities to interpret material remains of the human past. This unit introduces key aspects of archaeological method and theory and explores links between archaeological practice and heritage issues of wide public interest based on archaeological case studies. It provides an essential introduction for senior units of study in Archaeology and will also interest anyone with a more general interest in this fascinating and topical field of study.

### ARCA2601

#### Laboratory Methods

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Melissa Carter **Session:** Semester 1 **Classes:** one 3 hour workshop per week **Prerequisites:** 12 junior credit points of Archaeology **Prohibitions:** ARPH2614 **Assessment:** one 3000 word

laboratory report, one 1500 word class test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

An introduction to post-fieldwork archaeological laboratory principles and practices. The unit introduces students to key principles for the effective management and processing of archaeological finds and other materials excavated from archaeological sites, recording and interpretation of data recorded from this material and the application of various methods of analysis which can be used to produce different types of archaeological knowledge and interpretation.

### ARCA2606

#### Maps, Time and Visualisation

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Ian Johnson **Session:** Semester 2 **Classes:** one 1 hour lecture and one 2 hour workshop per week **Prerequisites:** 12 junior credit points **Prohibitions:** ARPH3690 **Assessment:** one 2000 word critical evaluation and report including annotated bibliography, one 2000 word mapping project including production of online interactive map, contribution to online discussion **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit examines ways in which maps, timelines and other forms of data visualisation are constructed and used to present archaeological data and historical argument, and how digital methods and web delivery have facilitated the use of visualisation and enabled greater user engagement through interaction with online databases, encyclopaedias, collaborative systems, maps, timelines, animations and 3D models. Practical sessions offer students the opportunity to become familiar with simple techniques and software tools for creating and publishing visualisations on the Web.

### ARCA2608

#### Near Eastern Ancient Civilisations

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Alison Betts **Session:** Semester 1 **Classes:** two 1 hour lectures per week **Prerequisites:** 12 junior credit points of Archaeology or 6 junior credit points of Archaeology plus 6 junior credit points of Ancient History or Classical Studies **Prohibitions:** ARNE1001 **Assessment:** one 1000 word research paper, one 2500 word essay, one 2500 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study provides an introduction to the wide sweep of cultures that have shaped western and central Asia. Using archaeological evidence, students will learn about the development of agriculture, the first cities, the earliest forms of writing, and how civilisations developed in rich and varied ways across the ancient world. Material is based within a broad chronological framework, beginning with the growth of the first farming villages and going on to explore the rise of kingdoms and empires.

### ARCA2610

#### Minoans and Mycenaens

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Margaret Miller **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of Archaeology or 6 junior credit points of Archaeology plus 6 junior credit points of Ancient History or Classical Studies **Assessment:** one 2000 word essay, tutorial exercises and one 1.5 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Archaeological research since the 19th century discovery and excavation of Knossos and Mycenae continues to expand our understanding about the rich prehistoric cultures of Greece but dimly remembered in later times. Recent shift of attention from palace centres to the economic, social and religious life of the ordinary person is aided by such discoveries as the Cycladic town at Akrotiri. The three

main cultures of Bronze Age Greece (ca. 3000-1100 BC) are explored with focus on their characteristic features.

#### A Greek Odyssey: The First Millennium BC

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Beaumont **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of Archaeology or 6 junior credit points of Archaeology plus 6 junior credit points of Ancient History or Classical Studies **Assessment:** one 2000 word essay, one 1.5 hour exam, tutorial/workshop based exercises **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Between 1050 and 146 BC the Aegean world underwent radical transformation. The changes which took place not only affected all aspects of ancient Greek society, but also established the foundations on which modern western civilization would later build. This unit traces the history and development of the Greek world as evidenced by the surviving material culture of the first millennium BC. The unit also examines the resonances of the ancient Aegean still evident in contemporary Australia.

### ARCA2614

#### Contact and Exchange in South Italy

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Ted Robinson **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of Archaeology or 6 junior credit points of Archaeology plus 6 junior credit points of Ancient History or Classical Studies **Assessment:** one 2000 word essay, tutorial exercises and one 1.5 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Ancient South Italy existed at a vital crossroads between the Eastern and Western Mediterranean. From the arrival of the earliest settled farmers in the 7th millennium BC to its conquest by the Romans, the region experienced repeated waves of migrants, visitors, colonists and conquerors, and developed a distinctive and vibrant culture as a result. The Unit will begin its survey in the Neolithic period, but concentrate especially on the Greek/Italian colonial interactions of the first millennium BC.

#### Archaeological Research Principles

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Beaumont **Session:** Semester 2 **Classes:** one 2 hour seminar per week **Prerequisites:** Credit average in 24 senior credit points of Archaeology **Prohibitions:** ARPH3692 **Assessment:** one 5000 word essay, one 500 word seminar paper, one 500 word written class exercise **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

This unit of study is designed to prepare students to conduct archaeological research at Honours level and to assist with the preparation of long essays and theses. An introduction to key elements of archaeological theory, research design and the archaeological research process with particular focus on the role of literature review and the preparation, organisation and presentation of archaeological research.

### ARCA3602

#### Greece and the East

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Margaret Miller **Session:** Semester 2 **Classes:** one 2 hour seminar per week **Prerequisites:** Credit result in one of the following units: ARCA2610, ARCA2611, ARCA2612, ARCA2613,

ARCA2614, ARCA2615, ARCL2601, ARCL2602, ARCL2603, ARCL2604, ARCL2605 **Assessment:** one 3500 word essay, seminar presentations and one exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Greek interaction with the older civilisations to the East (Anatolia, Near and Middle East, and Egypt) created a vital cultural dynamic throughout antiquity, not just in the seventh-century BC "orientalising" period. Areas of focus include the impact of relations with the East on the development of Greek material culture in specific periods, with reference to the areas of conceptual difficulty: the definition of cultural receptivity, the articulation of the "sources", the means of communication and types of reception.

### ARCH4003

#### Dissertation and Research Methods A Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Completion of the Pass degree with a WAM of at least 70. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Bachelor of Design in Architecture honours students only.*

**Associated degrees:** B Des Arch (Hons).

Students must submit an Honours application form. Entry into Honours in the Bachelor of Design in Architecture requires you to have completed your pass degree with a Weighted Average Mark of at least 70.

The honours degree requires full time study over two semesters (ARCH4003 and ARCH4004 and then ARCH4005 and ARCH4006). In special cases the Dean may approve a part time enrolment over four semesters. The units are not assessed separately. A single dissertation is required. The appointment of a supervisor will depend on the topic chosen for the dissertation by the student.

The dissertation should be submitted by the end of the first week of the formal examination period in the semester in which ARCH4006 Dissertation and Research Methods D is taken.

### ARCH4004

#### Dissertation and Research Methods B Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ARCH4003 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Arch (Hons).

Students must submit an Honours application form. Entry into Honours in the Bachelor of Design in Architecture requires you to have completed your pass degree with a Weighted Average Mark of at least 70.

The honours degree requires full time study over two semesters (ARCH4003 and ARCH4004 and then ARCH4005 and ARCH4006). In special cases the Dean may approve a part time enrolment over four semesters. The units are not assessed separately. A single dissertation is required. The appointment of a supervisor will depend on the topic chosen for the dissertation by the student.

The dissertation should be submitted by the end of the first week of the formal examination period in the semester in which ARCH4006 Dissertation and Research Methods D is taken.

### ARCH4005

#### Dissertation and Research Methods C Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ARCH4004 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Arch (Hons).

Students must submit an Honours application form. Entry into Honours in the Bachelor of Design in Architecture requires you to have

completed your pass degree with a Weighted Average Mark of at least 70.

The honours degree requires full time study over two semesters (ARCH4003 and ARCH4004 and then ARCH4005 and ARCH4006). In special cases the Dean may approve a part time enrolment over four semesters. The units are not assessed separately. A single dissertation is required. The appointment of a supervisor will depend on the topic chosen for the dissertation by the student.

The dissertation should be submitted by the end of the first week of the formal examination period in the semester in which ARCH4006 Dissertation and Research Methods D is taken.

### ARCH4006

#### Dissertation and Research Methods D Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ARCH4005 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Arch (Hons).

Students must submit an Honours application form. Entry into Honours in the Bachelor of Design in Architecture requires you to have completed your pass degree with a Weighted Average Mark of at least 70.

The honours degree requires full time study over two semesters (ARCH4003 and ARCH4004 and then ARCH4005 and ARCH4006). In special cases the Dean may approve a part time enrolment over four semesters. The dissertation should be submitted by the end of the first week of the formal examination period in the semester in which ARCH4006 Dissertation and Research Methods D is taken.

### ARCH5101

#### Architectural Design Studio C Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 6 hours per week for 8 weeks **Prerequisites:** ARCH4201 **Prohibitions:** ARCH3104 **Assessment:** Attendance; tutorial participation, including staged exercises; and submission and presentation of developed design. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment. Note: This unit available to BArch only and not available beyond 2009. Classes will run with MARC4001, 4002 or 4003.*

**Associated degrees:** B Arch.

Architectural projects offered by Faculty staff and visiting design practitioners will introduce students to a range of design issues and ideas, drawing on contemporary theory and practice. At the conclusion students will have worked closely with a tutor on a unique project, absorbing the key issues informing the project and demonstrating an ability to translate these issues into a design project.

Students will gain an understanding of a specific design outlook and process, as developed through weekly exercises and design development drawings and models. Also, the ability to translate this process into a developed design, presented as an architectural project at the end of the unit.

This unit is core to the Bachelor of Architecture. Contact hours: 6 hours per week for 8 weeks. Class preparation: 10 hours per week for 8 weeks. Assessment preparation: 28 hours per semester.

### ARCH5201

#### Architectural Design Studio D Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 8 hours per week **Prerequisites:** ARCH4201 **Corequisites:** ARCH5202 **Prohibitions:** ARCH3105 **Assessment:** Assessment will be in the form of specific, short design exercises, attendance and a major design proposal presentation to a critique jury. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit available to BArch only and not available beyond 2009. Classes will run with MARC5001.*

**Associated degrees:** B Arch.

On the successful completion of this unit students will have demonstrated: an ability to graphically communicate an interpretation of a brief; an ability to formulate and present concepts useful to design from a brief and site; the ability to translate and extend these starting points into a working design proposal; a method of developing a design proposal in response to critique; the communication of design ideas effectively through appropriate graphic and three dimensional means using architectural conventions, and demonstrating the ability to cohesively design and execute a comprehensive presentation.

This unit is core to the Bachelor of Architecture. Contact hours: 8 hours per week. Class preparation: 8 hours per week. Assessment preparation: 8 hours per week.

## ARCH5202

### Design Technology 2

#### Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2.5 hours per week  
**Prerequisites:** ARCH4202 **Corequisites:** ARCH5101 **Prohibitions:** ARCH3102, DESC2101 **Assessment:** Attendance, tutorial participation and Assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit available to BArch only and not available beyond 2009.*

**Associated degrees:** B Arch, UG Study Abroad Program.

This unit is intended to cover the practicalities that need to be resolved when proposing a building. The proposal must be realisable in terms of planning, servicing, meeting the provisions of the Building Code of Australia, and funding. This unit concentrates on the implications of building services provision on space planning, building form and architectural design. It will instil in students an understanding of the vocabulary of building services so that they can usefully contribute to and direct the selection of servicing strategies and equipment choices in discussion with other building consultants. It will further nurture the student's ability to make early design 'guesstimates' of the space needs and appreciation of the layout consequences of design decisions.

At the successful completion of this unit of study, students will have demonstrated: an ability to realistically assess the services requirements for a building in terms of its usage; an ability to generate and assess alternative servicing strategies; an understanding of the advantages and disadvantages of different types of servicing equipment; an ability to prepare early 'guesstimates' of the space and volume requirements of the servicing equipment; an ability to comprehend the potential spatial clashes between structure and services; and an awareness of the impact of the BCA Fire, Egress, and Amenity provisions on design.

This unit is core to the Bachelor of Architecture. Contact hours: 2.5 hours per week. Class preparation: 2.5 hours per week. Assessment preparation: 13 hours per semester.

## ARCH6104

### Theory in Architecture

#### Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours per week  
**Prohibitions:** ARCH2102 **Assessment:** Attendance, tutorial participation and submission on selected theory and buildings. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit available to BArch only and not available beyond 2009. Classes will run with MARC4102.*

**Associated degrees:** B Arch, UG Study Abroad Program.

The unit examines recent and contemporary theory in architecture. Select examples will be emphasised, and their relationship to both theory and architecture discussed. At the conclusion students will be familiar with these key debates in theory, and will understand their terms and their relationship to architecture. Particular emphasis will be placed on theory related to modernity and to contemporary practice. On successful completion of this unit a student will have demonstrated: a familiarity with select examples of theory, and an understanding of the references and terms used as expressed in the student's words in written or seminar format; and an ability to apply or relate specific

theory to architecture, using the essay and/or graphic means to demonstrate this relationship between theory and architecture.

This unit is core in the Bachelor of Architecture. Contact hours: 2 hours per week. Class preparation: 2 hours per week. Assessment preparation: 26 hours per semester.

## ARCH6201

### Management in Architecture

#### Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours per week  
**Prerequisites:** ARCH4103 **Prohibitions:** ARCH3106, ARCH3107  
**Assessment:** written exercises, tutorial participation, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit available to BArch only and not available beyond 2009. Classes will run with MARC5201.*

**Associated degrees:** B Arch, UG Study Abroad Program.

Students are expected to demonstrate a capacity to identify specific issues and articulate methods of resolving related problems with specific reference to the links between the contacts, their administration, the architect's responsibility to the contracted parties, and how these issues can impact on the design and construction of a building project.

This unit provides information on the practice of architecture with particular emphasis on the obligations and responsibilities of architects to clients, builders, consultants and the community and to the administration of contracts commonly used in the procurement of buildings.

The unit provides instruction in: the regulation of the architectural profession; roles of consultants and their selection, engagement, coordination and responsibilities; modes of practice, conditions of engagement for architects; fee structures; meeting procedures; pre-contract management; contract selection and administration; alternative procurement methods and the relationship of these factors in completing a building project.

On the successful completion of this unit of study, students will have demonstrated: an understanding of an architect's responsibilities; an understanding of the management of architectural practices; an understanding of the manner in which architects are involved in contract administration, and commonly used procurement methods within the building industry.

This unit is core in the Bachelor of Architecture. Contact hours: 3 hours per week. Class preparation: 1 hour per week. Assessment preparation: 26 hours per semester.

## ARHT1001

### Art and Experience Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc. Prof. M Roberts **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Assessment:** Essay and tutorial paper (total of 4,000 words) **Practical field work:** The Art Workshop. Students undertaking the Art History and Theory First Year Program are encouraged to enrol in a practical unit of study offered at the Art Workshop in the Faculty of Architecture. Only one introductory level workshop (worth 6 junior level credit points) is permitted. For more details please consult the Art Workshop on 9351 3115. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

ARHT1001 and ARHT1002 offer an introduction to the study of art history and theory as it is taught at the Senior and Honours levels in the Department. The subject matter covers a wide range of art practices and media, film, design and costume, and includes the examination of art from different cultures. In each semester unit, historical analysis will be combined with discussions of the different methodologies and approaches to the interpretation and study of these visual materials.

Art and Experience: the European Tradition will focus on the history of art and architecture in Western Europe from classical antiquity to the early modern period. A key focus will be on recognising the importance of the social, cultural, political and religious purpose an object or building was designed to serve, and the range of meanings the work was intended to embody - and how these change across time.

### Art History and Theory Exchange Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr K Broadfoot **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point Junior unit of study in Art History and Theory at an

approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Director of Undergraduate Studies.

### ARHT2610

#### Art and Society in Trecento Italy

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr L Marshall **Session:** Semester 1 **Classes:** One 2 hour lecture and 1 hour tutorial per week **Prerequisites:** ARHT1001 and ARHT1002 **Prohibitions:** ARHT2010 **Assessment:** One 1000 word visual test (35%), one class presentation (10%) and one 3000 word essay (55%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study will explore a range of alternative approaches to art produced in Italy during the late thirteenth and fourteenth centuries. Topics to be investigated include: problems of monographic analysis; the implications of contemporary workshop practice; civic, familial and princely patterns of artistic patronage; the meaning of Trecento 'naturalism'; alternatives to the 'Tuscanisation' of fourteenth-century art through a consideration of other centres such as Bologna, Rimini, Verona, Padua and Venice.

#### 17th Century Art: Royalty and Riches

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc. Prof. J Milam **Session:** Semester 2 **Classes:** One 2hour lecture and one 1hour tutorial per week. **Prerequisites:** ARHT1001 and ARHT1002 **Prohibitions:** ARHT2012 **Assessment:** Essay 2000 words, visual test 2000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

This unit of study considers the place of the artist and the architect in European courts during the seventeenth century. The focus will be on the image of the ruler and the princely palace as a political and social symbol. Patterns of patronage and issues of artistic independence will be investigated through examples of major commissions in painting, sculpture and architecture. Tutorials will involve a more careful examination of theoretical approaches to the expression of power, wealth and glory in visual form.

This unit of study examines contemporary international art and craft. Focus is on art materials, technologies and processes, along with recurrent themes and issues raised in work from selected regions. The course is organised thematically, and its international frame is not centred on Europe and the U.S. The course is organised thematically, and its international frame is not centred on Europe and the U.S. An important component of the unit is the analysis of contemporary art writing and curatorial practice. Tutorials will include visits to significant exhibitions including the Biennale of Sydney. Students are encouraged to work with contemporary museum holdings.

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

This course studies the efflorescence of contemporary Aboriginal and Torres Strait Islander art, which makes up over half of today's Australian art market. While providing a grounding in major movements like Papunya Tula (from 1971) and bark painting in Arnhem Land, the focus will be on critical and theoretical issues affecting art practice today: questions of appropriation and copyright, the relationship of art to native title and reconciliation, the market for Indigenous art (from prestigious auctions to tourist shops), the politics of curatorial practice, the changing status of women artists, the Indigenous use and re-use of photography, and the relevance of postmodern and postcolonial theories in reading urban art. Key figures treated will include Tracy Moffatt, Gordon Bennett, Rover Thomas and Emily Kngwarreye. Certain classes will be conducted at the Art Gallery of New South Wales or the Museum of Contemporary Art. Lecturers will include prominent Indigenous curators and artists.

In Asia there has developed both the nationalist art of a series of modernising states and a counter-establishment art which has frequently been formally modern. Students will learn how to analyse art works and institutions in terms of critical notions of modernity which arise in these Asian contexts but which do not require projection from outside. Focus will chiefly be on China, Hong Kong, Taiwan and India since the 1850s. Other examples will be drawn from Japan, Thailand and Indonesia.

### ARHT2652 From Silent to Sound Cinema Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr L Jayamanne **Session:** Semester 2 **Classes:** One 2 hour lecture, one 1 hour tutorial and one 2 hour film screening per week **Prerequisites:** ARHT1001 and ARHT1002 (For Art History Major) ARHT1002 or ENGL1025 (For Film Major) **Prohibitions:** ARHT2052 **Assessment:** One essay, one film analysis and one tutorial presentation totalling 4000-4500 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Film Studies Core Unit. This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This course examines film/cinema as a manifestation of modernity i.e. as commodity, industry, institution and mass production of the senses (aesthetics). These concepts integral to modernity will be explored through a study of Early American cinema and the Weimar cinema of Germany in the 1920s. Detailed work will be done on the following genres, Slapstick & Melodrama (in Hollywood), and Horror/Fantasy (in Weimar cinema). While the focus will be on the aesthetics of these films, the historical and industrial context of each national cinema will form an essential background.

The course will introduce a selection of major classical and contemporary film theories such as those of Sergei Eisenstein and Gilles Deleuze as well as the recent scholarship on silent film aesthetics and spectatorship within the wider intellectual tradition of theorising modernity and vernacular modernisms.

An emphasis will be placed on the idea of filmic performance (film as an art of movement and time) which includes camera rhetoric, editing, acting, mise-en-scene. The course will study the phenomenon of stardom through one of cinema's very first global icons, Charlie Chaplin whose work will enable us to cross the technological divide between silent and sound cinema in the last segment of the course.

### ARHT2655 Modern Cinema: Modes of Viewing Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr K Broadfoot **Session:** Semester 2, Summer Main **Classes:** One 2 hour lecture, 1 hour tutorial and one 2 hour film screening per week **Prerequisites:** ARHT1001 and ARHT1002 (For Art History Major) ARHT1002 or ENGL1025 (for Film Majors) **Prohibitions:** ARHT2055 **Assessment:** Essay and tutorial paper totalling 4000-4500 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit of study will give an introduction to how film studies has analysed the meaning of a film in relation to how the film incorporates or addresses the spectator (what is known as theories of spectatorship). Commencing with debates around classical Hollywood cinema and the functioning of the point of view shot, the unit will examine how theories of spectatorship have understood the significance of different genres.

**ARHT2656****National and Transnational Cinemas****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr R Smith **Session:** Semester 1  
**Classes:** One 2hour lecture, one 1hour tutorial, 2-3 hour film screening.  
**Prerequisites:** ARHT1001 and ARHT1002 (For Art History Major) ARHT1002 or ENGL1025 (for Film Majors) **Prohibitions:** ARHT2056 **Assessment:** Essay and film analysis (total 4,000-4,500 words) **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

This unit of study investigates the problem of national cinema in terms of cultural specificity, identity and difference. The cinematic production of different nations will be compared in ways that draw out the various dimensions of the overall problem of the relation of cinema to the nation, of cinematic nationalism, and of cinema to existent and emergent cultural forms. One problem for national cinemas is that production is geographically dispersed and formally divergent. A film that is in production can exist not only in several forms, for instance, in analogue and digital forms, but can also be in production in different places and at different stages of production, pre-production and postproduction, at the same time. A key issue, then, is how national cinemas have responded, and continue to respond to globalised, transnational film production and distribution, and to the ever-present demand for technological and aesthetic renewal. If a film does not exist in any one form or be present in any one place how can it be said to belong to a national context?

#### Art History and Theory Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr K Broadfoot **Session:** Semester 1, Semester 2 **Classes:** Two hour seminars **Prerequisites:** Students wishing to do Honours should have results of credit or better in at least 48 senior ARHT credit points. **Assessment:** Art History and Theory IV has three components: a thesis and 2 semester-length seminars chosen from a pool of units of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), Dip Arts(Hons).

Seminar Units:

NOTE: These courses are based on weekly 2 hour seminars. Students are required to submit written work totalling 5000 words for each option.

Semester 1

American Film & Hollywood,

Dr R Smith

This unit explores the relationship between 'American cinema' and Hollywood cinema. 'American cinema' draws inspiration from and attempts to contribute to cultural movements and contexts that include Hollywood but extend to literature and the visual arts more generally. Hollywood's power as a cultural sign will be examined in relation to alternative and independent film cultures. This will include not only analysis of feature films but also of writings by filmmakers and theorists. Questions of cinematic subjectivity and authorship will be a focus of the unit.

Editing the Moving Image

Dr K Broadfoot

This unit examines different approaches to the editing of the moving image. Different styles of editing from the early days of cinema to contemporary media practice will be studied. There will be regular screening of films with particular sequences selected each week for analysis and discussion. The impact of different technologies and forms, such as television and the digital image, will be considered. The range of methodologies that film and media studies have developed for interpreting the effects of editing will be studied.

Australian Art: A World Upside Down

Dr A Calloway

This unit considers the special significance of ephemeral art as the cultural thread that linked the European hub to its periphery. It will examine how, in colonial situations where the academic canon could not apply. Western high-art traditions were encoded in innovative and less rarefied imagery. In identifying the classical and theatrical rhetoric embodied in popular art and public spectacle, the unit will consider the practical, theoretical and historiographical implications of this Antipodean inversion of the traditional hierarchy of art.

The Eighteenth Century: Art, Film, Text

Assoc. Prof. J Milam

This unit examines social, cultural, historical and aesthetic connections between the visual arts, texts and films related to the long eighteenth century. In two-week blocks, we will consider key works of art, architecture, fashion, memoirs, collected letters and literature from the period first in terms of their original contexts, and then as visual

narrative devices through which contemporary issues have been explored in Hollywood and European films.

Matisse & Picasso: Discourse & Exhibition

Prof. R Benjamin

This unit offers a parallel study of the European modernists Henri Matisse and Pablo Picasso from their earliest academic training in 1890 to the aftermath of World War II. Situating them within the avant-garde and its institutions, it encompasses Fauvism, analytic and synthetic Cubism, decorative modernism, the Return to Order, Surrealism, and the Cutout. Key artworks will be a focus for analyses of the criticism of the day. Current interpretative models, textual as well as exhibition-based (eg Matisse/Picasso, MoMA New York) will also be debated.

Semester 2

Asian Modernities

Dr T Berghuis

The unit will examine the theoretical and empirical implications of plural modernities in art, and not the singular, homogenous genealogy of Euramerican discussions. It examines problems of post-modern and post-colonial conceptions applied in Asian contexts, and the range of other models for interpreting modernities as parallel to or 'other' than those of Euramerica. Each student will present a theoretical survey of one issue and also an application of a theoretical position to a concrete Asian art historical case.

Texts:

Clark, John, 'Modern Asian Art', Honolulu, University of Hawai'i Press, 1998 and 'Asian Modernism: Diverse Development in Indonesia, the Philippines and Thailand', Tokyo, Asia Center, 1995.

Cross-Cultural Art & Film

Assoc. Prof. Mary Roberts

This unit explores major issues and debates in the study of cross-cultural art. A central focus is the examination of contemporary art in relation to its colonial heritage. The theoretical issues that inform this subject include: the relationship between aesthetics and politics, post-colonialism and feminism, questions of cultural agency and resistance, the structure and operation of the colonial stereotype, cultural hybridity, cross-cultural borrowing and appropriation. Students should complete the subject with an understanding of both the broad theoretical issues and the historical/regional specificity of cross-cultural art forms.

Recommended Readings:

Zeynep Celik, "Speaking Back to Orientalist Discourse at the World's Columbian Exposition", 'Noble Dreams Wicked Pleasures. Orientalism in America, 1870-1930', Princeton University Press and Sterling and Francine Clark Art Institute, New Jersey and Williamstown, 2000, pp77-97; Darcy Grigsby, "Out of the Earth: Egypt's Statue of Liberty", 'Edges of Empire, Orientalism and Visual Culture', eds., Jocelyn Hackforth-Jones and Mary Roberts, Blackwells, Oxford, 2005, pp. 38-69.; Michael Archer, Guy Brett and Catherine de Zegher (eds.), 'Mona Hatoum', Phaidon, London, 1997; Edward Said, "Reflections on Exile", 'Out There, Marginalization and Contemporary Cultures', eds. Russell Ferguson, Martha Gever, Trinh T.

Death & Disease in Renaissance Italy

Dr L Marshall

This course explore the interplay between art and disease in Renaissance Italy. Issues to be investigated include: the religious and psychological effects of catastrophic disease, such as the Black Death, and the possible effects on art; images of death and disease before and after the plague; the prophylactic role of images; Renaissance conceptions of the workings of the celestial court; civic, familial and individual patronage of plague images.

Recommended Readings:

P. Ziegler, The Black Death, London, 1969;

M. Meiss, Painting in Florence and Siena after the Black Death, Princeton, 1951 (and later reprintings);

L. Marshall, "Manipulating the Sacred: Image and Plague in Renaissance Italy", *Renaissance Quarterly*, 47, 1994, 485-532.

Film Theory: Art, Industry, Culture

Dr K Broadfoot

The relation of film to industrial modernity is an ongoing issue for film theorists. With the advent of digital image processes and production the relation of art and industry has re-emerged with a new set of problems. How do we conceptualise the new forms? What theoretical and aesthetic language(s) do we draw on? And how best to rethink film in the face of rapid technological, formal and cultural change? These issues will be investigated via an examination of the history of film theory's attempts to formulate concepts adequate to the age of industrial modernity.

Documentary Film

Dr R Smith

This unit examines the theory, practice and criticism of documentary filmmaking from its inception to the present. It will focus on key movements and filmmakers as a means of tracking and assessing critical changes to the status and value of the "truth claims" of the documentary. The unit will move towards a critical assessment of the slow erosion of the distinction between the documentary image and the fiction image in its place in new media.

Cinematographic Performance

Dr L Jayamanne

This unit will provide an overview of the history of feminist film theory, criticism and film, taken as a point of departure for the study of cinematic modulation of gesture and affect. The aim is to explore the powers and qualities by which film creates bodies of all sorts (both organic and non-organic), including of course gendered bodies. This is therefore a unit concerned with film aesthetics, providing a precise focus on the study of how filmic powers and qualities are activated across a range of films (Hollywood genre films and Independent films). Gilles Deleuze's film theory will be used in this course as analytic tools to open up the field to further experimentation.

Technocultures explores how technology and culture are bound together in increasingly complex ways. Information and communication technologies in particular contribute to widespread reconfigurations of writing, sociality, politics, embodiment, aesthetics, perception, memory and thought itself. Drawing on recent critical theory and cultural research, this unit unravels the complex interplay between humans and technologies.

## ARIN3620

### Researching Digital Cultures

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr C Chesher **Session:** Semester 2  
**Classes:** One 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 18 senior credit points **Prohibitions:** ARIN2000 **Assessment:** Paper/review (750 words); Research proposal and ethics form (3000 words); Journal (750 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A (Dig Tech & Culture), B A Informatics.

How do people use new media technologies? To answer this question you need to know how to conduct research: a systematic investigation using carefully chosen and ethically sound methods. In this unit students prepare a research proposal to improve knowledge about the social implications of the latest developments in information technologies. They build their methodology by choosing a combination of methods: ethnography, interviews, surveys, online methods, discourse analysis, content analysis or case studies.

### Computer Games and Simulation

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Mr J Tonkin **Session:** Semester 1  
**Classes:** One 1 hour lecture and one 2 hour seminar per week **Prerequisites:** 18 junior credit points **Assessment:** One 1500 word review, one 1500 word exercise and one design project (equiv 1500 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A (Dig Tech & Culture), B A Informatics, UG Study Abroad Program.

From first person shooters to massively multiplayer environments, computer games are rapidly emerging as distinctive cultural forms. The screen languages of interaction and simulation are diverging from and complicating cinematic and televisual conventions. Simulation and visualisation technologies and techniques have developed across many fields. This unit of study introduces students to key concepts and methodologies in computer games and simulation. It combines critical and historical readings in games studies, new media theory and interaction design with hands-on exercises.

## ARIN3650

### Digital Cultures Project 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms K Cleland **Session:** Semester 1  
**Classes:** One 2 hour seminar and one 1 hour consultation with supervisor per week **Prerequisites:** ISYS3403 (ISYS3113), ISYS3400 (ISYS3207) and ARIN3620 (ARIN2000) **Prohibitions:** ARIN3500, ARIN3600 **Assessment:** One 1000 word article, one 1500 report and one 3000 word project proposal **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Dig Tech & Culture), B A Informatics.

In this unit, students work in groups to research and develop a detailed proposal for a Digital Cultures project. They identify an actual client and prepare the scope and design for the project. This gives BA (Digital Technology and Culture) students the opportunity to apply, extend and inter-relate skills and knowledge gained from their Information Systems major, Arts major, and Digital Technology and Culture units. The proposal forms the basis of the ARIN3660 project.

## ARIN3660

### Digital Cultures Project 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr C Chesher **Session:** Semester 2  
**Classes:** One 2 hour seminar per week **Prerequisites:** ISYS3403 (ISYS3113), ISYS3400 (ISYS3207), ARIN3620 (ARIN2000) and ARIN3650 **Prohibitions:** ARIN3500, ARIN3600 **Assessment:** Project presentation (1000 words); Project prototype and documentation (2500 word equiv.); Project report (1000 words); participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Dig Tech & Culture), B A Informatics.

In this unit of study students develop a prototype of the Digital Cultures project that they proposed in ARIN3650. Through this project they will demonstrate strategies, skills and knowledge from their studies in Information systems, the Arts, including units in the Digital Technology and Culture Program.

### Digital Cultures Internship

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms K Cleland **Session:** Semester 1, Semester 2 **Prerequisites:** ARIN1000 and either ISYS1003 or INFO1000 or INFO1003; 36 senior credit points of ARIN and ISYS/INFO **Corequisites:** ARIN3680 **Prohibitions:** Enrolment is subject to approval by the Director of the BA (Digital Technology and Culture) program and locating an appropriate match between student and organisation. **Assessment:** Students must satisfy the requirements of an internship contract with their workplace, including attendance and performance, as evaluated through a workplace supervisor report. Students will also be required to keep an online journal during the duration of the internship. The internship and journal are assessed on a satisfactory/unsatisfactory basis. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment. Note: Students will usually not enrol in ARIN3670 until the second semester of their 3rd year.*

**Associated degrees:** B A (Dig Tech & Culture), B A Informatics.

The internship consists of a work placement comprising a minimum of 20 working days in an appropriate organisation, assisted and supervised by both the workplace and staff from the Digital Technology and Culture Program. Placements may include arts and cultural organisations and information and communication technology organisations. Students will be required to keep an online journal documenting and analysing their experiences during the internship. In consultation with their supervisor, students will formulate a topic for their research essay for the co-requisite unit ARIN3680 Digital Cultures Internship Project.

## ARIN3680

### Digital Cultures Internship Project

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms K Cleland **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per week **Prerequisites:** ARIN1000 and either ISYS1003 or INFO1000 or INFO1003; 36 senior credit points of ARIN and ISYS/INFO **Corequisites:** ARIN3670 **Assessment:** One 1000 word annotated bibliography and one 3500 word research essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Dig Tech & Culture), B A Informatics.

The Digital Cultures Internship Project follows on from the ARIN3670 Digital Cultures Internship where students are placed within an appropriate workplace. The major assessment for this unit of study is a research essay where students critically reflect on these experiences.

## ARIN4011

### Digital Cultures Honours A

#### Arts

**Credit points:** 12 **Teacher/Coordinator:** Ms K Cleland **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per semester-long unit per week **Prerequisites:** Completion of 48 senior credit points in the Digital Cultures Program comprising ARIN and cross-listed units of study. For 2008, the ARIN units must include ARIN2600 Technocultures and ARIN3620 Researching Digital Cultures. An average of credit or above must be achieved for the 48 credit points. **Assessment:** Thesis (15,000 words); 2 x Essay (9000 words equivalent)

each) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Dig Tech & Culture) Hons, B A (Hons), B A Informatics(Hons).

Honours comprises two semester-long units of study (25% each) and a thesis (50%)

#### ARIS1671

##### Arabs, Islam & Middle East: Introduction

###### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Ahmad Shboul **Session:** Semester 1 **Classes:** 3 hours per week **Assessment:** 2000 word essay, class presentation, final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

This unit provides an introduction to the study of the Arab world, Islam and the Middle East. It focuses on Arab and Islamic society and culture in the Middle East. Main themes include: Geographical setting and historical orientations; environment and society, the Arabs and the world of late antiquity; the importance of Arab trade and seafaring; the rise of Islam: the Prophet Muhammad and the Qur'an, Pillars of Islam and Community, the early Arab Islamic Caliphate; religion and politics in the Islamic tradition, Islamic law and society, aspects of Middle Eastern socio-economic and cultural life in the age of the Caliphate as a background to the early modern Middle East up to Ottoman times. On completion of this unit, students proceed to ARIS1672 in Semester 2.

*Textbooks*

Course readings and bibliography will be available.

#### ARIS1672

##### Arab-Islamic Civilisation: Introduction

###### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Ahmad Shboul **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** ARIS1001 or ARIS1671 **Assessment:** 2000 word essay, class presentation, final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

This unit focuses on Arab and Islamic Learning, Spirituality and Art. Themes include: The scope of classical Arabic learning: Qur'anic studies and Prophetic traditions, the Hellenistic legacy in Arabic learning, Islamic philosophy and sciences, geographical writings and historiography, issues in Islamic theology, role of scholars, the concept of knowledge; contribution of Arabic-speaking Christian scholars to classical Arab intellectual life; Islamic asceticism, mysticism and the Sufi orders; Arab and Islamic aesthetics: religious and secular art, architectural design and decoration, the role of calligraphy, geometry and arabesque. On completion of this unit, students should proceed to ARIS3675 and ARIS3676 in the year 2010 and to ARIS2673 and ARIS2674 in the year 2011.

*Textbooks*

Course readings and bibliography will be available.

#### ARIS2673

##### Islam and Muslims in World History

###### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Ahmad Shboul **Session:** Semester 1 **Classes:** 2 hour lecture and 1 hour tutorial per week **Prerequisites:** ARIS1001 or ARIS1671 or equivalent **Prohibitions:** ARIS2003 **Assessment:** Essay (2250 words), take-home exam (2250 words), tutorial participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit focuses on the role of Islam in world history through the discussion of issues of intercultural relations and acculturation. It highlights Islam's place in the Mediterranean world; connections with Eastern Christianity, including Byzantium; the Islamic-European encounter in Spain and Sicily and the Crusades from an Arab perspective. The unit deals with the significance of acculturation and adaptation of Islamic traditions in different parts of Africa and Asia and the role of urbanisation and trade in Islamic history.

*Textbooks*

Course readings, bibliography and brief notes will be available.

#### ARIS2674

##### Islam and Politics: Modernity Challenges

###### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Ahmad Shboul **Session:** Semester 2 **Classes:** 2 hour lecture and 1 hour tutorial per week **Prerequisites:** ARIS1001 or ARIS1671 **Prohibitions:** ARIS2004 **Assessment:** Essay (2250 words), take-home exam (2250 words), tutorial participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit focuses on Islam as a political and cultural force in the modern world, particularly in the Middle East, North Africa and Asia. Issues include: Islamic political thought; the Sunna-Shi'a divergence and the significance of Shi'a Islam; Islamic traditionalism; reform; radicalism; Jihad and 'fundamentalism'; Islamic political movements in Arab countries; Turkey, Iran and Asia; Islam and legitimacy of political regimes; Muslim minorities in the world; current debates on the 'Islamic threat'; 'terrorism'; 'clash of civilisations' and Islamic-Western mutual perceptions.

*Textbooks*

Course readings, bibliography and brief notes will be available.

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit, which is a prerequisite for intending honours students, will provide students with a grounding in approaches, research tools and critical methodologies in various aspects of Arabic, Islamic and Middle Eastern Studies today and familiarise them with a range of available resources to support research in this field. It will enable students to discuss issues with established researchers and to carry out practical exercises aimed at developing their critical and analytical skills and their ability to embark on their own individual research projects under supervision in specific areas of Arab, Islamic and Middle Eastern Studies.

**Textbooks**

Course readings, bibliography and brief notes will be available.

**ARIS4011****Arabic and Islamic Studies Honours A Arts**

**Credit points:** 12 **Teacher/Coordinator:** Assoc Prof Ahmad Shboul, Dr Nijmeh Hajjar **Session:** Semester 1, Semester 2 **Classes:** 2 hour research seminar and 2 hours of Advanced Arabic for research purposes **Prerequisites:** A total of 48 credit points in a combination of ARBC and ARIS senior units, with at least credit average. These include the 36 credit points of the major in Arabic and Islamic Studies, plus two more senior units, including the special entry unit, ARIS3680 (Approaches to Arabic and Islamic Studies). **Assessment:** Essay, classwork including seminar presentation, bibliographical assignments, 12000-15000 word thesis. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), Dip Arts(Hons).

The honours program is research oriented and should equip the student with better language and cultural skills for further and deeper study in a specialised area of Arabic and Islamic Studies. This can include: Arabic language and literature, Islamic Studies, Arabic and Islamic history, the contemporary Arab world and the Middle East, society and politics, and the study of Islam in history or in the modern world.

Students from ARIS and ARBC (beginners or advanced Arabic language strands) are encouraged to plan for honours from their first or second year of study. Students need to be highly motivated and aim to score a Credit average or higher in their Arabic and Islamic Studies major.

The fourth year honours program in Arabic and Islamic Studies consist of:

1. Practical advanced language for research purposes (in Semester 1 and 2)
2. Seminar/workshop on methodology of research in Arabic and Islamic studies (in Semester 1 and 2)
3. Four honours seminars (2 in each semester) from available advanced coursework options in Arabic and Islamic Studies
4. Writing a thesis 12000 - 15000 words (in English or Arabic) under the supervision of a member of staff who is an active researcher in the department (in Semester 2)

Students with interdisciplinary interests can enrol in joint honours or double honours, combining Arabic/Islamic studies with another suitable subject area. Students, who plan to do joint honours or double honours, need to have completed 48 senior credit points in each of the two disciplines (Arabic/Islamic and another subject area). They can take half a load in each department during their honours year, usually writing their honours thesis under joint supervision. Joint honours is usually completed in one year, double honours usually takes two consecutive years to complete.

### ARNE2603

#### Introduction to the Archaeology of Iran

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Dan Potts **Session:** Semester 2 **Classes:** one 1 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of Archaeology, Classical Civilisation or Ancient History **Assessment:** two 3000 word essays **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

An introduction to the art, archaeology, religion, landscape and settlement patterns of the principal cultures inhabiting the Iranian plateau and adjacent regions, with special emphasis on the culture of the Elamites, Persians, Parthians and Sasanians from prehistoric times to the 6th century AD.

### ARNE2606

#### The Archaeology of Central Asia

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Fiona Kidd **Session:** Semester 1 **Classes:** one 2 hour lecture per week **Prerequisites:** 12 junior credit points from Archaeology, Classical Civilisation or Ancient History. **Assessment:** one 500 word paper, one 2000 word essay, one 3500 word research paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study covers the archaeology of Central Asia from later prehistory to the rise of Islam. The region bridges east and west, with cultural and political influences from China, India and Persia blending into those of Mesopotamia and the Classical World. Topics include regional early state development in the Bronze Age, Achaemenid and Hellenistic influences, the empire of the Kushans and the rise of nomadic societies in the northern steppes.

### ARNE2691

#### Material Culture

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Dan Potts **Session:** Semester 2 **Classes:** One 2 hour seminar per week **Prerequisites:** Credit result in ARNE1001 **Prohibitions:** ARNE2901 **Assessment:** one 3000 word essay, one 3000 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts.

A seminar-style introduction to the study of some of the most common categories of material in the Near East, including copper-bronze, iron, limestone, pottery and ivory, and to various genres of materials, such as seals, ceramics, weaponry, carved decorations and equestrian equipment, with particular emphasis on technology, manufacture, function, style, iconography, chronology and spatial distribution. Material will normally be drawn from the collections of the Nicholson Museum and may vary from year to year.

### ARPH1801

#### Archaeology (Prehistoric & Historic) Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

### ARPH2602

#### Scientific Analysis of Materials Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Reade **Session:** Semester 2 **Classes:** one 3 hour lecture/seminar per week **Prerequisites:** 12 Junior credit points in Archaeology **Prohibitions:** ARPH2621 **Assessment:** four 1000 word assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

This unit examines the structure and properties of archaeological materials, with an emphasis on the methodology and approaches to scientific analysis. A range of analytical techniques, including spectroscopic and electron microscopy methods, is introduced. The accent is on archaeological applications, and assessment is by assignment and practical sessions.

### ARPH2603

#### The Archaeology of Society Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Dougald O'Reilly **Session:** Semester 2 **Classes:** one 2 hour lecture per week **Prerequisites:** 12 Junior credit points of Archaeology **Prohibitions:** ARPH2003 **Assessment:** two 2000 word essays and one 2 hour class test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

A global introduction to the processes and issues involved in the major transformation of human settlement behaviour since the end of the last glacial phase. Essay and project topics are arranged on an individual basis in consultation with the coordinator to suit the interests of students. Topics may be chosen on a worldwide basis. This unit of study can be used to conduct a detailed study of one region or to gain experience of a diversity of regions and topics.

### ARPH2612

#### Historical Archaeology Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Martin Gibbs **Session:** Semester 2 **Classes:** one 2 hour lecture per week **Prerequisites:** 12 Junior credit points of Archaeology **Prohibitions:** ARPH2702 **Assessment:** one 4000 word essay,

one 2000 word take-home exam or online test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This course will introduce students to the international development of historical archaeology since 1960. Because of its explicit links to historiography and documentary scholarship, historical archaeology enjoys a uniquely interdisciplinary perspective, and has been directly influenced by shifts in both anthropology and history. The current practice and international form of historical archaeology will therefore be explored in detail. Students will be required to participate in class discussions, produce oral presentations on reading materials, and complete written assignments.

### ARPH2616

#### Public Archaeology Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Sarah Colley **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour seminar per week **Prerequisites:** 12 Junior credit points of Archaeology **Prohibitions:** ARPH2010 **Assessment:** one 2500 word essay, one 1000 word seminar write-up, one 1000 word in-class test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit introduces and discusses the theory and practice of archaeology in the public domain where archaeologists have responsibilities to Indigenous peoples, community groups, clients and government. Australian and other case studies will be used to discuss the public benefits of archaeology and ways in which government policies and legislation and issues surrounding ethics and professionalism interact with popular and public understandings of the past to produce different kinds of archaeological knowledge and practice which have historical and contemporary evidence.

#### ASLT2601

##### Australian Literature 1920-1960 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr P Kirkpatrick **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points **Prohibitions:** ASLT2001 **Assessment:** One 1500 word mid-semester essay (30%) and one 3000 word end-of-semester take-home exam (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit aims to introduce some of the key writers of this period. It will also encourage students to develop reading skills appropriate to different genres and to acquire an awareness of the issues, movements and critical debates that were central to the development of Australian literature.

##### Textbooks

Herbert X. Capricornia. Angus & Robertson  
Prichard K.S. Coonardoo. Angus & Robertson  
White P. Voss. Vintage  
Resource book, containing poetry and other literary texts from the period.

#### ASLT2602

##### Australian Literature 1960-1988 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr B Brennan **Session:** Semester 2, Summer Main **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points **Prohibitions:** ASLT2002 **Assessment:** One 1500 word essay (mid-semester, 30%), one 3000 word take-home exam (end-of-semester, 70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit of study aims to introduce some of the key writers of this period. It will also encourage students to develop reading skills

appropriate to different genres and to acquire an awareness of issues, movements and critical debates that have been central to the development of recent Australian literature.

#### Textbooks

Anderson, J. *Tirra Lirra by the River*  
 Hazzard S. *The Transit of Venus*. Viking  
 Mudrooroo, *Wildcat Falling*. Angus & Robertson  
 Stow R. *Tourmaline*. UQP  
 White P. *The Solid Mandala*. Vintage  
 Course Reader will include short stories from Moorhouse, Carey, Garner as well as the poetry that will be covered in this unit of study.

### ASLT2605

#### Reorientations in Australian Literature

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** A/Prof D Brooks **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points **Prohibitions:** ASLT2005 **Assessment:** One 1500 word mid-semester essay (30%), one 4000 word end-of-semester take-home exam (60%) and one tutorial presentation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Through a reading of Australian fiction, film and poetry, this unit examines the nature, place and function of China, Southeast Asia and the South Pacific in the Australian literary imagination. Its intention is at once to give students a broad acquaintance with such works and an introduction to the poetics of trans-cultural perception which those works wittingly or unwittingly manifest.

#### Textbooks

Castro, B. *Shanghai Dancing*. Giramondo  
 Drewe R. *A Cry in the Jungle Bar*. Picador  
 Koch C.J. *The Year of Living Dangerously*. Grafton  
 Jones, R. *Julia Paradise*. Penguin  
 Yu, O. *Eastern Slope Chronicle*. Brandl  
 [Additional works to be advised]  
 Resource book.

### ASLT2619

#### Australian Gothic

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr P Kirkpatrick **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 junior credit points **Assessment:** One 1500 word essay, one oral presentation, 5-10 minutes, with 500 word written summary and one 2000 word take-home examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

From the earliest days of European colonisation, alongside visions of its promise Australia has also been seen as the worst of all possible worlds, a hellish place of exile where nature seemed uncannily strange or hostile. The 'gothic' has offered a powerful means representing this dystopian theme. This unit examines the gothic mode in Australian literature and film from the nineteenth century to the present, taking in such issues as 'Weird Melancholy', ghosts, bunyips, badlands and postcolonial (dis)enchantment.

#### Textbooks

Marcus Clarke, *For the Term of His Natural Life*, any complete edition.  
 Ken Gelder and Rachel Weaver (eds), *The Anthology of Australian Colonial Gothic Fiction*, Melbourne University Press.  
 Ross Gibson, *Seven Versions of an Australian Badland*, University of Queensland Press.  
 The Proposition, Dir. John Hillcoat.  
 Wolf Creek, Dir. Greg McLean.  
 Resource book of poetry and other texts.

### ASLT3601

#### Australian Literature Research Methods

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof R Dixon **Session:** Semester 2 **Classes:** One 2 hour seminar per week **Prerequisites:** 12 senior credit points

in Australian Literature with credit average **Prohibitions:** ASLT3901, ENGL3964 **Assessment:** Two 1500 word assignments and one 3000 word journal-style essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

This seminar aims to prepare students for the Honours year in Australian Literature through a study of current issues and approaches in research and criticism.

#### Textbooks

Williams & Abbott. *Introduction to Bibliographical & Textual Studies (MLA)*.  
 Slade. *Form and Style* (Houghton Mifflin).  
 Resource book available from the Copy Centre.

### ASLT3602

#### Australian Literature Research Issues

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof R Dixon **Session:** Semester 1 **Classes:** One 2 hour seminar per week **Prerequisites:** 12 senior credit points in Australian Literature with Credit average and ASLT3601 **Prohibitions:** ASLT3902, ENGL3962 **Assessment:** One 2000 word assignment and one 4000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

This seminar aims to prepare students for the Honours year in Australian Literature through a study of current issues and approaches in research and criticism.

#### Textbooks

Norton Anthology of Theory and Criticism. ed. Leitch & others.  
 Resource book available from the Copy Centre.

### ASLT4011

#### Australian Literature Honours A

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr H Griffiths **Session:** Semester 1, Semester 2 **Classes:** Students will take four semester units of study. In addition to the Australian Literature Semester Options, students may also choose up to two semester units of study from those offered for the MA program or for English IV. **Prerequisites:** Credit or above in 48 senior credit points in Australian Literature including ASLT3601 (or ASLT3901) and ASLT3602 (or ASLT3902) (may include up to 18 senior credit points of English and/or Australian Studies) **Assessment:** All students will submit a long essay on a topic to be approved. Essays are 15000 words in length. Each semester option is assessed by a 4000 word essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), Dip Arts(Hons).

#### Australian Poetry and the Symbolistes

Assoc. Prof. D Brooks. Semester: 1. **Classes:** One 2 hour seminar per week.

A study of some of the great French and German poems of the late nineteenth century (in translation) and their key role in the development of Australian poetry from 1900 to the present.

Texts:

A reader of essential poems and background texts will be distributed in class. These will be drawn largely from the following recommended background readings:

Poe E A. *The Fall of the House of Usher and Other Writings*. (Penguin)  
 Baudelaire C. *Selected Poems*, trans. Joanna Richardson. (Penguin Classics).  
 Rimbaud A. *Complete Works*, trans. Paul Schmidt. (Picador Classics, or equivalent)  
 Mallarmé S. *Selected Poetry and Prose*, ed. Mary Ann Caws. (New Directions)

Rilke R M. *Selected Poems*, trans. Leishman. (Penguin, or equivalent)

Brennan C. *Poems 1913*, ed. Adamson. (HarperCollins)

McAuley J. *Poetry, essays and personal commentary*, ed. Kramer. (UQP)

Hope A.D. *Selected Poetry and Prose*, ed. Brooks. (Halstead Press).

Wright J. Collected Poems. (HarperCollins)

Tranter J. Selected Poems. (Hale & Iremonger)

Adamson R. Selected Poems. (UQP)

Undisciplined Histories

Prof. Robert Dixon. Semester: 1. Classes: One 2 hour seminar per week.

This seminar examines a range of true fictions about the past that circulate in the public domain as literature. Students will read a diverse array of historical fictions in the light of ideas drawn from theorists of literature and historiography. In what ways have historians deployed literary devices? How have literary authors shaped the novel both as a genre of public history and as a form of historiographic metafiction? What is gained and/or lost by packaging and disseminating history as fiction? What can be learned by using literary theory and textual analysis to understand the dynamics of scholarly historical narrative? And finally, how have literary authors and their critics become entangled in Australia's on-going history wars.

Texts:

To be announced

Classic Australian Literature

Prof Robert Dixon. Semester: 2. Classes: One 2 hour seminar per week.

This seminar examines a range of Australian novels that have achieved the status of 'classics'. It will examine the background of historical debates about the emergence of a distinctive Australian literature, the emergence of the 'Great Australian Novel', and arguments about literary canons. It will develop techniques of close reading while also attending to the wider social contexts of reception and reputation-making both nationally and internationally.

Texts:

To be announced

Australian Postmodernism

Dr Bernadette Brennan. Semester: 2. Classes: One 2 hour seminar per week.

This seminar examines a range of Australian texts in the light of postmodern theory and questions. Among the issues to be explored are: unwriting meta-narratives; writing and/as re-writing; the death of the author/birth of the reader; alliances of textuality, truth and power; discursive (de)constructions of the subject; relations between postmodernism and modernism and between the postmodern and the postcolonial.

Texts:

Carey P. My Life as a Fake. (Random House)

Castro B. Shanghai Dancing. (Giramondo)

Jones G. Black Mirror. (Picador)

Lilley K. Versary. (Salt)

Porter D. The Monkey's Mask. (Hyland House).

Tsiolkas, C. Dead Europe. (Random House)

Turner Hospital, J. Due Preparations for the Plague. (Fourth Estate)

The seminar will also include work by: J S Harry, Kevin Hart, Michael Brennan and 'Ern Malley' and essays by Nietzsche, de Mann, Lejeune, Castro, Derrida and Eagleton. All of these works will be distributed in class.

## ASNS1101

### Introduction to Chinese Civilisation

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof H. Dunstan **Session:** Semester 1 **Classes:** 2 lectures and 1 tutorial per week **Assessment:** Classwork (20%) and informal writing assignment(s), e.g., workbook (20%); two 1500-word essays (25% and 35%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: No prior knowledge is assumed. All teaching and all assigned readings are in English; however, a Chinese-language tutorial option may be provided.*

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

A broad-ranging, chronologically-arranged introduction to Chinese civilisation from prehistory to recent times. Readings will include representative philosophical, literary and religious works in English translation. Social science perspectives will be introduced through lectures/tutorial readings on social history, kinship structure, modern change, etc. This unit of study will provide a foundation for more advanced work in Chinese studies.

#### Textbooks

Cyril Birch, comp. Anthology of Chinese Literature. Vol. 1. New York: Grove Press, 1965

Anthology of readings available online and/or from the University Copy Centre  
Patricia Buckley Ebrey. The Cambridge Illustrated History of China. Cambridge: Cambridge University Press, 1996

## ASNS1601

### Asian Traditions: Past in the Present

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Pankaj Mohan **Session:** Semester 1 **Classes:** 2 hour lecture and 1 hour tutorial per week **Assessment:** 1500-word essay (40%), 2-hour exam (40%), 1000 word tutorial presentation and abstract (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

This unit introduces key features of ancient, imperial, and traditional Asian societies and cultures across different periods, down to the present. It lays the groundwork and provides a basis of comparison for students to understand the social transformations that these different Asian societies later underwent in modern times. Issues and themes may include: religion, ritual, and philosophical thought; sacred kings and capitals; hierarchy and social order; family, kinship and gender systems; art, architecture, and archaeology.

## ASNS1602

### Modernity in Asia

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Adrian Vickers **Session:** Semester 2 **Classes:** 3 hours per week **Assessment:** 1500-word essay (40%); 2-hour exam (40%); 1000 word tutorial presentation and abstract (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

Asia has undergone dramatic and rapid modernisation since the Eighteenth Century. Religious change, state-formation, political and social movements, gender and family, consumer culture, rural development, urban culture, and modern class structure are some of the cultural, social, economic and political aspects of Asia's social transformation. Through the study of selected Asian societies, this subject will examine some of these aspects in the contexts of colonialism, nationalism, postcolonial economic development, and globalisation.

#### Asian Studies Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

### ASNS2612

#### Chinese Religions in Modernity

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Mayfair Yang **Session:** Semester 1 **Classes:** 2 hours per week, 1 hour tutorial **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** 3000-word research paper (40%), 2-hour exam (40%), 1000-word oral presentation abstract (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit examines the decline of traditional religious life and religious institutions in modern China and their current revival. Religious practices to be covered may include ancestor worship, Daoism, Confucianism, Chinese & Tibetan Buddhism, popular religion, geomancy, divination, Islam, and Christianity. Modern processes affecting Chinese religions include doctrines of social evolutionism and nationalism, secularization, state policies, anti-religious campaigns, commercialization, and globalization. We will also explore Chinese religion's connections with Taiwan, and their globalization in Asia and the world.

### ASNS2621

#### Buddhist Philosophy

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2, Summer Late **Classes:** 3 hours per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Prohibitions:** ASNS2313 **Assessment:** 3000 word essay, 1200-1500 word tutorial paper. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit will approach the core ideas of Buddhism on suffering, impermanence, non-self and interdependence in a systematic fashion and explore the implications for the Buddhist understanding of ontology (theory of being) and epistemology (theory of knowledge). The connection between philosophical ideas and the Buddhist path will be explored in relation to ethics, meditation and the cultivation of insight and wisdom. The connections between Buddhist philosophy and modern and postmodern Western philosophy will also be explored.

### ASNS2623

#### India: Tradition and Modernity

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2 **Classes:** 2 hours of lectures and 1 hour tutorial per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** 3000 word essay, 1500 word tutorial paper. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit explores assumptions underpinning Indian thought and culture with specific reference to Indian religious traditions. In particular, traditional notions of the individual, authenticity, and the concept of dharma will be addressed through an exploration of social and political structures, gender and the family, and forms of artistic, literary and religious expression. A key focus will be on the continuity of tradition and its interaction with modernity and the implications this has for understanding today's India.

### ASNS2625

#### Buddhism in Modern Asia

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** 3000-word essay, 1000-word tutorial paper and presentation, tutorial participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, Dip Arts, UG Study Abroad Program.

This unit explores the diversity and continued dynamism of Buddhism in modern Asia. The focus of the unit is social, cultural and political with an emphasis on the way Buddhism is influencing Asian societies and is, in turn, influenced by them. Buddhism's encounter with modernity and its role in the nation state, in lay and environmental movements and its influence on social and political discourses and practices will be examined.

### ASNS2632

#### Modern Japanese Social History

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Elise Tipton **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Prohibitions:** ASNS2308 **Assessment:** Class presentation (20%), 1500 word essay (30%), 1.5 hour semester exam (30%), test (10%), continuous assessment, including class participation and writing tasks (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit of study will begin with examination of social aspects of the Meiji reforms, evaluating interpretations of their aims and effects. The focus will then turn to the emergence of new social forces in the twentieth century, including industrial workers, an urban middle class and a women's movement. We will also explore changes in daily life and attitudes to work and leisure as urbanisation and industrialisation progressed and assess the effects of the Second World War and the Occupation.

### ASNS2634

#### Samurai and Merchants: Tokugawa Japan

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Olivier Ansart **Session:** Semester 2 **Classes:** 2 hours of lectures, 1 hour tutorial per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Prohibitions:** ASNS2304 **Assessment:** Attendance and participation in tutorials (15%), tutorial writing tasks and essays (equivalent to 2500 words, 45%), 2 hour final exam (equivalent to 2000 words, 40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

Tokugawa Japan (1603-1868) had a complex feudal structure articulated around the shogun, the feudal lords and their samurai retainers. It also had huge cities, birthplaces of some of the first modern ways of life. The tensions between the feudal framework and

the embryonic modernity of Tokugawa society make a fascinating case study in the non-Western world of what is to be modern. To do so, we shall follow a cross disciplinary approach: history, politics, sociology, economy, religion, arts and literature.

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit examines the history of Indonesia, the world's fourth most populous country, emphasizing the interaction between Islam, nationalism and democracy. The unit traces these forces impact on the formation of modern Indonesia from the late nineteenth century, highlighting the experience and legacy of colonialism, the independence struggle, and the rise and fall of military rule. Particular attention is given to changing notions of national identity, debates about the place of Islam in the polity and authoritarianism and democratisation.

### ASNS2662

#### Southeast Asian Dictators & Democracies

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** 12 Junior credit points in Asian Studies, History, Economic History, Government and International Relations, Sociology, Anthropology or an Asian Language or departmental permission. **Prohibitions:** ASNS2414, ASNS2416 **Assessment:** 2 hour exam (45%), 2000 word essay (45%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit examines post-World War II Indonesia, Thailand, Malaysia, Singapore, Burma and the Philippines. It focuses on the emergence of varied forms of authoritarian and semi-authoritarian rule from the 1950s, and, from the 1980s, growing pressures for more democratic government. We will investigate a range of approaches for studying authoritarianism and democratisation in the region, including those which emphasise political culture and tradition, economic growth and crisis, political elites, class conflict, civil society and globalisation.

### ASNS2663

#### Social Activism in Southeast Asia

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michele Ford **Session:** Semester 1 **Classes:** 2 lectures and 1 tutorial per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** Class participation (20%), 1 hour in-class test (equivalent to 1000 words, 20%), essay portfolio (equivalent to 1000 words, 15%), 2500 word essay (45%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit examines country-specific and transnational social movements in Southeast Asia, including those focused on labour,

women, the environment and identity. During the semester we will explore how these movements emerged, what they have sought to achieve, and how successful they have been in promoting social change in the Southeast Asian region. The unit adopts a multi-disciplinary approach based on contemporary case study material from Indonesia, Malaysia, Thailand, the Philippines and Singapore, with a particular focus on Indonesia.

### ASNS2664

#### Southeast Asia Transformed Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Adrian Vickers **Session:** Semester 2 **Classes:** 1 hour lecture, 1 hour tutorial and 1 hour mixed tutorial/online learning per week. **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** A research report (45%) (consisting of in-class presentation equivalent to 1000 words, 15% and 2000 word write-up, 30%), 2000 word essay (45%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Social change in Southeast Asia involves shifts in relations of production and consumption. This unit examines these shifts first through tracing the colonial origins of present-day relations of production, and then through assessing the changes in social life since the 1950s. Important features of these changes include the decline of agriculture, the growth of new kinds of industry such as clothing production and tourism, and new patterns of consumption generated by the rise of middle-class lifestyles in the region.

### ASNS2670

#### Mass Media in East Asia Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Ki-Sung Kwak **Session:** Semester 1, Summer Main **Classes:** 3 hours per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Prohibitions:** KRNS2600, ASNS2600 **Assessment:** 1000 word tutorial paper, 1500 word essay, final exam (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit introduces students to the media industry and policies in selected countries in East Asia, namely Japan, Hong Kong, South Korea and Taiwan. In addressing the topics, the main features of media in the region are discussed and compared. The unit will be multi-disciplinary, covering various aspects of mass media in the region. These include social and cultural role of the media, political and economic justification of state control, and implications of the emergence of new communication technologies.

### ASNS2672

#### Japan in East Asia from 1840 until Today Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Lionel Babicz **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** Two in class quizzes, (equivalent to 500 words each), 2-hour exam, group presentation (equivalent to 500 words), group essay (1000-words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit inserts the modern and contemporary history of Japan inside its East Asian context. We will examine a dozen key events and subjects pertaining to the relations between Japan, China and Korea, from the 1840 Opium War until today. Doing so, we will touch many sensitive and controversial topics, become aware of the differing historical consciousness prevalent in these three countries, and understand why the historical question constitutes a major political issue in East Asia.

### ASNS2676

#### Gender in Modern Asia Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Mayfair Yang **Session:** Semester 2, Summer Early **Classes:** 2 hour lecture and 1 hour tutorial per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** Mid-semester exam consisting of short identification questions, approximately 750 words (20%), 2 hour final exam (40%), tutorial performance (10%), 1750 word essay (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit of study examines changes in gender relations and gender construction in modern and contemporary Asian societies - China, Japan, South Korea, India, Singapore, and Taiwan. Major issues include: changes in the family; the role of the state in shaping gender (family and population policies, women's employment programs etc.); popular culture and mass media images of femininity, masculinity, and sexuality; the gendered construction of Asian nationalisms; gendered division of labour and economy; gay cultures; and the commoditisation of sex.

### ASNS3617

#### Citizens and Politics in China Today Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr David Bray **Session:** Semester 2 **Classes:** 2 lectures and 1 tutorial per week **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** Classwork (15%); 2500-word essay (35%); 1000-word writing assignment (15%); oral presentation (15%); 1-hour test 20%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit will be taught in English, but a Chinese-language tutorial option may be provided. This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

In China, ideas like 'citizenship', 'rights', and 'community', have come into widespread use over recent years. This unit will explore the way in which these terms are conceptualised and practiced within the People's Republic of China. Using texts (from government documents to popular media) and case studies from different parts of mainland China, this unit will provide a framework for understanding the interplay of social, cultural and political forces that are transforming techniques of local governance in China.

#### Textbooks

Anthology of readings available online and/or from the University Copy Centre. Chinese-language reading options will also be available.

### ASNS3618

#### Popular China Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Yiyang Wang **Session:** Semester 2 **Classes:** 2 hours of lectures and one 1-hour tutorial per week. (A separate 1-hour tutorial option for students who have advanced Chinese language skills may be provided.) **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** Classwork (20%); 2500 word essay (40%); oral presentation based on work for essay (10%); other writing assignment (e.g. portfolio with essay, total of 2000 words, 30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

This unit of study introduces students to popular culture in mainland China, Hong Kong, Taiwan and the Chinese diaspora. From film to television, from music to theatre, from print media to internet and from popular literature to visual arts, this unit explores popular Chinese culture as it is generated in Chinese societies and lived by Chinese people. It will cover a range of critical and theoretical perspectives to analyse these phenomena.

### ASNS3619

#### China and Globalisation

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr David Bray **Session:** Semester 1  
**Classes:** 2 lectures and 1 tutorial per week; students may attend either an English-language or a Chinese-language tutorial **Prerequisites:** 12 credit points from junior level Asian Studies, or other subject areas listed in Table A in the Faculty of Arts Handbook. **Assessment:** Classwork (20%); 1-hour test (20%); 1000 word essay or equivalent writing assignment (20%); 2500 word essay (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, Dip Lang Stud, UG Study Abroad Program.

On the brink of disaster in 1989, China has since become a political and economic power in the world. This unit of study examines the impact of globalisation on China with respect to the multilateral movements of ideas, capital and people. It will explore recent political, economic and social change in China, focusing on responses to China's expanded engagement with the outside world. Due attention will be paid to China's changing relations with its Asian neighbours and with Western countries.

## ASNS3690

### Approaches to Research in Asian Studies Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Olivier Ansart and others **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** Credit average or above in a minimum of 30 senior credit points of Asian studies or Asian language. **Prohibitions:** ASNS3902, JPNS3902, CHNS3902, INMS3902 **Assessment:** Classwork (20%), 3000 word research proposal (40%), bibliographical exercise (equivalent to 1000 words, 10%), presentation based on draft proposal (10%) and critical reviews or other written assignments (2000 words, 20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts.

This unit gives students the opportunity to undertake broad background reading in preparation for the honours thesis. The unit trains students to discuss published work exemplifying a range of approaches to humanistic and/or social scientific research. It thus provides models on which students can draw in creating their own research proposal.

*Textbooks*

Course reader available from the University Copy Centre.

## ASNS4011

### Asian Studies Honours A Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** A major in Asian Studies or in an Asian language; ASNS3690; 48 senior credit points; credit average in all qualifying units of study. Please contact the Asian Studies Program Director for any problem in the prerequisites. **Assessment:** Coursework (50%), 15000-20000 word thesis (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B Int S (Hons), Dip Arts(Hons).

The honours fourth year program consists of three seminars - the coursework - and a 15000 - 20000 word thesis weighted at 50 per cent of the final result. As with the undergraduate Asian Studies major, all units and the thesis will be in English. However, we encourage students with Asian-language proficiency to utilise sources in that language for their thesis research.

Students will enroll in ASNS4011, 4012, 4013 and 4014. Those however are merely generic codes: for their coursework component, students should take three from the following pool of subjects, whose availability will vary from year to year:

ASNS6903 Theory and Method in Asian Studies (sem 2)

ASNS6904 Human Rights in Asia (sem 1)

ASNS6905 Asian Popular Culture (sem 1)

ASNS6900 Contemporary Asian Societies (sem 1)

ASNS6976 Buddhism and the State in North Asia (sem 1)

ASNS6901 Japan in the Western Imagination (sem 2)

ASNS6938 The Chinese City from Text to Screen (sem 2)

CHNS5982 Approaches to Research on Modern China (sem 1)

CHNS6966 Society and State in China 1368-1911 (sem 2)

CHNS6975 Society and Individual in Post-Mao China (sem 2)

JPNS6909 The Underside of Modern Japan (sem 1)

Students may cross-list up to two for the three coursework components from units of study offered in other departments and faculties. They should check the availability of those units with the different departments. In any case they should consult with the Honours Coordinator before deciding the units taken as coursework.

## ASNS4012

### Asian Studies Honours B Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ASNS4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B Int S (Hons), Dip Arts(Hons).

See ASNS4011

## ASNS4013

## ASNS4014

### Asian Studies Honours D Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ASNS4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B Int S (Hons), Dip Arts(Hons).

See ASNS4011

## ASSN3001

### Advanced Clinical Nursing Assessment Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures/tutorials, online **Assessment:** health history, patient assessment essay, clinical journal and reflective essay, webct participation **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit of study focuses on the advanced clinical abilities required for nursing assessment of patients, families and communities in the 21st century. Students will learn how to assess a patient's condition, physically and mentally, and to make insightful nursing observation that can inform practice. At the community level, and in the wider socio-economic context, students will study emerging patterns of disease.

## ASSN3002

### Health Illness & Care: Int'l Perspective Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** lecturers/tutorials, online **Assessment:** assignments, exam **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit critically analyses international concepts of health, illness, and care. It investigates the ways in which historical forces have shaped ideas and beliefs about health and illness. The unit also examines the structure of contemporary societies, emphasising the

relationship between social structures, cultural factors, and the distribution of health and illness. In particular it examines the effects of social inequalities on the health of vulnerable, at-risk, and marginalised groups.

### ASSN3003

#### Clinical and Patient Education Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures/tutorials, online **Assessment:** essays and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B N.

The field of clinical and patient education is explored in the context of the practice professions and continuing changes in technologies, information and evidence bases for practice. The unit involves a study of the literature on the nature of learned and performed skills, what factors affect changing understandings, beliefs, dogma and practices (s) in clinical settings and subsequently clinical and patient education. The unit is interdisciplinary in approach and has a fieldwork/practice component.

### ASSN3004

#### Minor Thesis/Practice Project Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** lectures/tutorials, online **Prerequisites:** 24 unspecified credit points **Assessment:** 1x5000wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B N.

Students undertake advanced work on an area of practice, or a particular practice, in nursing. The project will involve three stages: first, conducting a review of the available research literature; second, examining other forms of evidence, such as written policies and protocols or actual practices; and third, composing a written report on the ways in which practice can be enhanced and/or further investigated by original research. This project will be highly suited to currently practising nurses whose professional responsibilities and interests include clinical leadership, management of a clinical service or practice development and/or the use of evidence in practice.

### ASSN3005

#### Nursing Management & Clinical Governance Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** lectures/tutorials, online **Assessment:** assignments, exam **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This course provides a forum for experienced practitioners to enhance their skills and knowledge of nursing management and clinical governance and to develop a framework for their implementation. The structure of the course will enable participants to explore and critique issues surrounding clinical governance in the context of care provision, organisational climate and culture, quality, clinical and professional leadership and financial responsibility. This course utilises a better practice (continuum of care / quality / cost / utilisation and health outcomes) framework.

### ASSN3006

#### Current Issues in Nursing Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures/tutorials, online **Assessment:** essay, presentation and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit encourages critical reflection on the context within which nursing operates, from a local, national, and international perspective. Students evaluate and analyse the influence of social, political, educational change, scientific and technological advances, and legal, professional, and ethical/moral guidelines on their nursing practice.

This unit has a dynamic focus so that issues affecting nursing globally and within regions and countries.

### ASSN3007

#### Inquiry and Research in Nursing Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** lectures/tutorials, online **Assessment:** research proposal, and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit of study builds on the tenet throughout the course that research is integral to all aspects of nursing theory, education, application and practice. Nursing (and midwifery) research will be the focus of examination and critique. A critical analysis of various modes of inquiry will be used to investigate aspects of nursing practice and relevant nursing issues. A variety of perspectives, methodologies and methods that constitute modes of inquiry will be included. This unit will assist students to develop research knowledge and prepare them for future research activities. Opportunities will be provided to experience the inquiry process with reference to clinically related situations or to areas that have an implication for nurses (and midwives) and their practice.

### ASSN3009

#### Nursing, Knowledge and Practice Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures/tutorials, online **Assessment:** essay and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit of study examines the historical background to, and current debates surrounding, how nurses have established their knowledge and practice. In addition to examining the historical records in relation to nursing as a discrete area of knowledge and practice in health care, this unit of study analyses and critiques current trends, ethical considerations, and discourses in nursing and how they impact on understandings of the nature of nursing knowledge and contemporary practice(s).

### ASTR2601

#### Australia: Land and Nation Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr B Rooney **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 18 junior credit points **Prohibitions:** ASTR2001 **Assessment:** One 1000 word essay (25%), one oral presentation with a 1000 word oral report (25%), one 2000 word take-home exam (40%) and class participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: May be cross listed to a major in Australian Literature. This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

A study of some of the interactions between two major meanings of the term 'Australia':

- 1) the name now given to a large island in the South Pacific and
- 2) a nation which came into being on 1 January 1901. Three major themes will be followed:
  1. Naming and representing land by Indigenous people and early European settlers.
  2. Changing European perceptions of the Australian environment and landscape.
  3. Changing debates about nation from 1901 to the present.

#### Textbooks

A course reader containing essential reading and information will be available for purchase from the Copy Centre.

## AVBS1002

### Concepts of Animal Management

#### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Mrs Irene Van Ekris **Session:** Semester 2 **Classes:** 6 hrs/week (lectures and practicals) **Prerequisites:** 6 credit points of junior Biology **Assessment:** practical class testing (20%), written assignments (20%), 90 min exam (60%) **Practical field work:** There will be several whole day practical classes at the Camden campus **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

This unit will explore the management of animals in natural and man-made environments. At the end of this unit of study, student will understand: The characteristics of the management systems of the major domestic species used for production in Australia and in a world wide context; the characteristics and principles underpinning sustainable management of native animals in natural and man-made environments; an appreciation of the dependence of living organisms upon their environment; an appreciation of the husbandry practices and innovations that have been adopted by the production industries to retain their competitive advantage; a demonstrated capability in handling and husbandry of the major domestic production animal species, and an appreciation of the application of these skills to non-domestic species; a demonstrated understanding of the importance of high standards of animal welfare practice in the management of animals.

#### Textbooks

There is no single text that adequately covers the unit content and for this reason no formal text is required. Where appropriate, relevant reference material will be identified for specific area of the course.

## AVBS2001

### Introductory Veterinary Pathogenesis

#### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Damien Higgins **Session:** Semester 2 **Classes:** 6 hrs/week (lectures and practicals) **Prerequisites:** BIOL1001 and BIOL1002 and (CHEM1101 or CHEM1001) and (CHEM1102 or CHEM1002) and ANSC3103 **Corequisites:** ANSC3104 **Assessment:** Prac class quizzes (10%), mid-semester quiz (15%), essay (15%), practical exam (15%), written exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc.

The overarching theme for this unit of study is the concept of the interaction between the host (or the animal), the agent of disease (genetics, physical, chemical and infectious agents) and environmental factors. In disease states, the host responds to the aetiological agent of disease and the environment through one of the basic five pathological processes that occur in tissues. These include inflammation and repair, degeneration and necrosis, circulatory disturbances, tissue deposits and pigments, and disorders of growth. A case based approach will be used whenever possible to illustrate these principles and enable the student to develop a problem solving approach and the skills of critical thinking.

McGavin, MD & Zachary JF 2007, *Pathologic Basis of Disease* 4th ed., Mosby

## AVBS3000

### Professional Development

#### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Russell Bush **Session:** Semester 1, Semester 2 **Classes:** 5 preparatory workshops, seminars (throughout years 1-3) **Assessment:** professional development reports (60%), case studies (20%), current animal issues (20%) **Practical field work:** 60 days of work experience including a faculty field trip to be completed throughout the degree program **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc.

Students are required to undertake professional development in University vacations as an integral and essential part of their overall training in the degree of Bachelor of Animal and Veterinary Bioscience. Students will complete 60 days of work experience throughout their program, including a minimum of 20 days spent on commercial animal production enterprises and one faculty professional development field trip. Students will visit at least three different farming enterprises in the major and emerging animal production industries. The remaining 40 days will include at least one placement with an animal-related business or service provider, and experience in either a scientific research organisation or short scientific volunteer position. Students will undertake additional placements at relevant animal or animal-related businesses, farms or organisations as required to complete 60 days. A professional consultant-style report must be submitted after each placement. Seminars to promote awareness of career options and current issues in animal science will be provided on a regular basis by past graduates and other professionals working in the animal industries. Students are encouraged to attend as many of these as possible throughout their degree program, and are required to submit four case studies based on material presented in these seminars. Attendance at seminars is compulsory during third year. Students will also submit an essay on a current issue in the animal science area of their choice.

*Note: Department permission required for enrolment.*

**Associated degrees:** B An Vet Bio Sc.

**AVBS4001****Animal Health and Disease****Veterinary Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Muir **Session:** Semester 1 **Classes:** 3.5 hrs/wk lectures, 0.5 hr/wk tutorials, 2 hrs/wk practical (on average) **Prerequisites:** ANSC3104, (Animal and Veterinary Bioscience years 1-3 OR Bachelor of Science in Agriculture years 1-3) **Assessment:** participation in field trips (10%), oral presentations (15%), assignments (15%), 2 hr exam (60%) **Practical field work:** 2 day field trip to Arthursleigh farm **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

This Unit of Study describes the major constituents of the immune system and how they interact to protect animals from infection. Some major microbial, viral and parasitic infections of commercial consequence to animal production are detailed as well as the range of management and interventional strategies that are currently in use to minimize their impact.

After completing this Unit of Study, students will demonstrate an understanding of: The principles of animal management that are implemented to optimize health and to reduce the incidence and severity of disease; the fundamental principles of disease in animal populations; the functional components of the immune system and how they interact to minimise the impact of micro-organisms on animal production; specific infectious diseases of consequence for growth, reproduction and for the production of meat, wool, milk and eggs; approaches to their control and prevention through environmental and nutritional management, and interventional techniques such as vaccination programmes; management and interventional strategies to minimize the impact of pathogen infection on the efficiency of commercial animal production; the broad principles in managing the health of wildlife animals.

**Textbooks**

Students are advised to consult lecturers for recommended texts

**AVBS4002****Dairy Production and Technology****Veterinary Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Yani Garcia **Session:** Semester 2 **Classes:** lectures 2 hrs/wk, practicals 3 hrs/wk **Prerequisites:** ANSC3101, (Animal and Veterinary Bioscience years 1-3 OR Bachelor of Science (Agriculture) years 1-3) **Assumed knowledge:** Enrolled students are expected to have some understanding of key components of the dairy production system, including basic knowledge of animal physiology and nutrition. **Assessment:** Whole farm professional report (30%), pracs assessments, (20%), 2 hr exam (50%) **Practical field work:** Two or three visits to commercial dairy farms in NSW **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

This unit will explore the various aspects of dairy farming and the dairy industry from a scientific point of view. The lectures are a mix of the principles on which sound dairy farming is based and practical example of how this operates in practice. The course is not meant to provide a set of methods on dairying to be used as recommendations. Instead, focus is placed on integrating knowledge to gain understanding on the system of production as a whole.

At the end of this unit of study, students will demonstrate a solid understanding of: the characteristics of the dairy industry in Australia and in a world wide context; the key components of pasture-based dairy systems; principles and practices of pasture and feeding management; the application of new technologies to improve efficiency and productivity, (particularly automatic milking).

In addition, students will demonstrate an appreciation of key aspects of reproduction and lactation physiology; the integration of knowledge of genetics and reproduction into the type of herd improvement structure set up in the dairy industry; the application of ruminant physiology knowledge to developing feeding programs for dairy cows; the extension of basic reproductive physiology onto the dairy farm using case studies as examples; the economics of the dairy farm business.

**Textbooks**

There is no single text that adequately covers the course content and for this reason no formal text is required. However, the following books can be used as basic bibliography for consultation during the course: Milk Production from Pasture (CWV Holmes et al 2002) Feeding the dairy cow (Chamberlain and Wilkinson 1996) Where appropriate, relevant reference material will be identified for specific areas of the course.

**AVBS4003****Wildlife and Evolutionary Genetics****Veterinary Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jaime Gongora **Session:** Semester 2 **Classes:** variable consisting of up to 6hrs/week (students advised to consult weekly timetable) of lectures, tutorials and practical classes **Prerequisites:** Animal and Veterinary Bioscience years 1-3 OR Bachelor of Science (Agriculture) years 1-3 **Corequisites:** AVBS4001 or (BIOL3018 and BIOL3027) **Assessment:** written and oral assignment (30%), practical reports/class contribution (20%), final written exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc.

This unit of study focuses on the role and animal and veterinary biosciences in the field of wildlife management. The unit encourages an approach that spans management, wildlife biology and laboratory sciences. In recognition of the power of genetics as a tool in wildlife management and research, a large component of this course reviews fundamental genetic principals and their application in the disciplines of molecular, evolutionary and conservation genetics and focuses on how we use genetic theory and knowledge to better understand and conserve our wildlife.

At the end of this unit of study, students will demonstrate an understanding of: Important issues in wildlife management in Australia and the Asia-Pacific region; project management as it applies to multifaceted wildlife research and management issues; application of a range of genetic and physiological methods to the study of ecological issues; the use of appropriate analytical methods and molecular markers in wildlife conservation and management; the underlying genetic structural design of the natural world and how this reflects and influences evolutionary processes in healthy and diseased populations; the use of molecular information to test hypotheses about evolutionary, ecological and social structure of species; how to critically review the ways in which genetic principals are applied to the management and conservation of species; the use of appropriate analytical methods and molecular markers in wildlife conservation and management; how to conduct an investigation into a management problem in wildlife including project design and management recommendations.

Students are expected to immerse themselves into the field of conservation, evolutionary genetics and wildlife to develop the ability to critically evaluate the subject. There will be a substantial amount of reading required for the course. There is no formal text; students

will be directed to a recommended reading list of both primary and secondary literature.

### AVBS4004

#### Food Safety Assessment and Management Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Gary Muscatello **Session:** Semester 2 **Classes:** lectures 3hrs/wk, tutorials/practicals 2hrs/wk **Prerequisites:** ANSC3101, ANSC3102, ANSC3103, Animal and Veterinary Bioscience years 1-3 **Corequisites:** AVBS4001 **Assessment:** 1000wd individual report (20%), 1000wd group assignment (25%), 2hr exam (50%), MCQ (5%) **Practical field work:** Field trips 16 hrs in total **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

This Unit of Study focuses on the issues and practices in the animal industry relevant to food safety and zoonotic disease. This unit will cover general food safety issues, including risk assessment and hazard analysis of microbes and chemicals. Food-borne diseases of animal origin and their impact on public health will be explored through the examination of zoonotic diseases in scenario-based learning activities. In these processes diagnostic and strategic methods of investigating, controlling and preventing food-borne disease outbreaks will be explored. Students will be introduced to national and international animal and human health policy pertaining to food safety regulations and surveillance initiatives and strategies that underpin these policies. Students in this unit will be introduced to the issues regarding emerging food-borne pathogens and current industry driven topics. By the end of the unit, students should have global and local perspective on the major food-borne diseases, surveillance and control programs.

### AVBS4005

#### Feed Technology Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Russell Bush **Session:** Semester 1 **Classes:** lectures 3 hrs/wk **Prerequisites:** ANSC3101, (Animal and Veterinary Bioscience years 1-3 OR Bachelor of Science in Agriculture years 1-3) **Assessment:** poster (15%), oral presentation (10%), assignment (35%), two hour written exam (40%) **Practical field work:** Practicals/field work 3hrs/wk **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

Feed accounts for approximately 70% of the input costs associated with animal industries, including both monogastric (poultry and pigs, laboratory animals) ruminants (feedlot cattle and sheep) and caecal fermenters (horses, rabbits). The "feed industry" is described as the largest supporting industry for animal agriculture and is a major employer of graduates (undergraduate and postgraduate). Feed manufacturing is a vital part in enabling our animal industry to add value to nutrient sources that are routinely not consumed by humans and are an integral part in improving the overall sustainability of

agriculture and food production. The course will provide in-depth understanding of the feed industry, our understanding of factors influencing ingredient variability and availability (physical and economical), methods and applications of processing of ingredients to increase nutrient intake, availability (digestibility), retention and reduce excretion. All facets of the production and regulation of feed production will be discussed relative to their importance in animal agriculture and food production.

#### Textbooks

There is no textbook for this unit of study. Students should refer to trade information (the library subscribes to several; several specific feed resource web-sites; equipment web-sites) and scientific journals as resources

### AVBS4008

#### Intensive Animal Industries Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Jeff Downing **Session:** Semester 2 **Classes:** Lectures 3 hrs/week, practicals 3 hrs/week **Prerequisites:** ANSC3101, ANSC3102, ANSC3103, (Animal and Veterinary Bioscience years 1-3) OR (Bachelor of Science in Agriculture years 1-3) **Prohibitions:** AVBS4006, AVBS4007 **Assessment:** Farm report and in course evaluations (25% pigs), participation and broiler growth study (25% poultry), written exam (50%: poultry and pigs 50:50) **Practical field work:** Visits to an intensive pig farm, feed mill and poultry production and processing units. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

This unit of study is composed of two parts, a Poultry Production component and a Pig Production component. The course will provide students with a comprehensive overview of the production of eggs and poultry meat and pork. The individual components examine various aspects of the poultry and pig production systems important in maintaining efficiency and profitability. It investigates aspects of breeding, nutrition, housing, growth performance, health, welfare, reproductive capability, waste management, marketing and current industry issues. This unit will expand on some aspects of previous year 3 units of study in animal structure and function, nutrition and reproduction.

#### Textbooks

There is no single text that adequately covers in Australian pig industry and for this reason no formal text is required. There are many sites (industry, academic institutions and government departments) on the Web which provide excellent information. Links to these will be provided. Where appropriate, relevant reference material will be identified for specific areas of the course. Often poultry specific text books are obsolete very quickly, it would be important to learn to identify trade information (the library subscribes to breeder management guides and product expectations; equipment web-sites, etc) and scientific journals as resources.

### AVBS4009

#### Aquaculture Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Joy Becker **Session:** Semester 1 **Classes:** Lectures 2hrs/wk, tutorials 1hr/wk, practicals 3hrs/wk **Prerequisites:** ANSC3101, ANSC3102, ANSC3103, ANSC3104, ANSC3107, Animal and Veterinary Bioscience years 1-3 **Corequisites:** AVBS4001 **Assessment:** written and/or oral assignments (40%), written practical report (25%), exam 2 hrs (35%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

The Unit of Study explores in detail aspects of commercial aquaculture, including global trends in aquaculture development. Other topics include water quality, feeding, management, health and disease, genetics and reproduction, environmental impact and economic constraints to production. The unit of study emphasises methods to improve aquacultural productivity. It builds on basic principles of anatomy, physiology, nutrition, genetics and health and disease presented in other units of study in BAnVetBioSc.

At the end of this Unit of Study, students will demonstrate an understanding of the principles of: the context of aquaculture in global food production; husbandry, management and welfare of aquaculture species; comparative aspects of husbandry in aquaria, domestic, commercial; health and disease relevant to aquaculture; nutrition of aquaculture species; reproduction and genetics of species in

aquaculture; water quality and environmental impact of aquaculture; economics and marketing of aquaculture products.

## AVBS4012

### Extensive Animal Industries Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Russell Bush **Session:** Semester 1 **Classes:** Lectures 2hrs/wk, tutorials 1hr/wk, Practicals 2hrs/wk, field work 1 hr/wk **Prerequisites:** Animal and Veterinary Bioscience years 1-3 OR Bachelor of Science in Agriculture years 1-3 **Prohibitions:** AVBS4010, AVBS4011 **Assessment:** written assignment (25%), practical report (25%) and written exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

This unit introduces the concepts of sheep and beef cattle production in the Australian environment within the context of world food and fibre consumption and production. The key products and domestic and export markets for these are presented. The course then provides an historical perspective of the basis for each of these industries and then describes each of the production systems designed to meet the demand for these products. These will cover production in both the tropical and temperate regions of Australia and include the key elements of extensive grazing and intensive feedlot systems. Major issues will include breeds and breeding systems, basic nutrition and production practices and animal welfare issues as they affect the quality and quantity of product marketed. The concepts of first stage processing of both meat and fibre products in abattoirs and top-making plants respectively will be presented. The grading of products based on quality factors.

The major factors that influence the quality of product and therefore market demand will be presented. Lecture material will be supported with a 5 day study tour to the Riverina to evaluate different commercial production systems, appropriate practical classes and student presentations.

## AVBS4013

### Research Project B1 Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Muir **Session:** Semester 1, Semester 2 **Classes:** There is no face-to-face teaching. The equivalent of 6 hours of course work time will be allocated each week to this unit of study. **Prerequisites:** Animal and Veterinary Bioscience years 1-3 OR Bachelor of Science in Agriculture years 1-3 **Corequisites:** AVBS4014 **Prohibitions:** AVBS4015, AVBS4016, AVBS4017, AVBS4018 **Assessment:** Submit a written literature review on a research topic and give an oral presentation on some aspect of this topic **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

Research Project B is composed of 12 credit points and consists of units 4013 (Research Project B1) and 4014 (Research project B2). Both units can be taken in the same semester or Unit AVBS4013 in semester 1 and unit AVBS4014 in semester 2. In this unit, students, after consultation with academic(s) and/or researcher(s) choose an area of research interest and investigate various sources of information to produce a written literature review in the chosen research area. Students will also be required to give an oral presentation on some aspect of the research area chosen. In most cases there will be strong alignment between this unit and the activities undertaken in unit AVBS4014.

At the end of this Unit of Study, students will:

Identify a research area, define a problem that impacts on animals and analysed this problem using information from various sources; critically evaluate current research (experimental design, statistical analysis, technical limitations) and identify where the present knowledge is limiting for the chosen research topic; assimilate and manage information from within and across disciplines to provide new concepts or understanding in the area of research; become familiar with scientific principles of research and the ethical use of animals in research; produce a written review, after effectively resourcing the appropriate information, that is clearly written and which abides to accepted principles of scientific writing; develop competency at structuring and delivering an oral presentation on some research topic; apply the range of interpersonal skills necessary to work with peers and researchers.

## AVBS4014

### Research Project B2 Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Muir **Session:** Semester 1, Semester 2 **Classes:** There is no face-to-face teaching. The equivalent of 6 hours of course work time will be allocated each week to this unit of study. **Prerequisites:** Animal and Veterinary Bioscience years 1-3 OR Bachelor of Science in Agriculture years 1-3 **Corequisites:** AVBS4013 **Prohibitions:** AVBS4015, AVBS4016, AVBS4017, AVBS4018 **Assessment:** The students will be assessed on their research capabilities and will submit a report (Written/poster/oral) **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

Research Project B is composed of 12 credit points and consists of units 4013 (Research Project B1) and 4014 (Research Project B2). Both units can be taken in the same semester or Unit 4013 in semester 1 and unit 4014 in semester 2. In this unit, students, after consultation with an academic(s) and/or researcher(s) choose to:

Undertake the evaluation and analysis of existing experimental data and produce a report (written/poster/oral); in conjunction with a student undertaking units of study in Research Project A, participate in a defined component of this project and produce a report (written/poster/oral); undertake a laboratory project and produce a suitable report (written/poster/oral); produce a desktop review of an animal industry problem or issue; participate in a group project with other students undertaking Unit 4014 and produce a report (written/poster/oral); undertake some other activity that meets the learning outcomes for this unit of study and produce a report (written/poster/oral). This activity will need to be sanctioned by the Program Coordinator and the year 4 coordinators of the BAnVetBioSc course as well as supervising academic(s)/researcher(s).

## AVBS4015

### Research Project A1 Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Muir **Session:** Semester 1, Semester 2 **Classes:** There is no face-to-face teaching. The equivalent of 6 hours per week will be allocated from the course work timetable. **Prerequisites:** Animal and Veterinary Bioscience years 1-3. Students need to have obtained a second/third year WAM commensurate with obtaining a first class honours grade. **Corequisites:** AVBS4016, AVBS4017, AVBS4018 **Prohibitions:** AVBS4013, AVBS4014 **Assessment:** Provide a written preliminary research proposal. Provide a literature review on the research topic. Deliver an oral presentation on the research proposal. Deliver an oral presentation, on the research at the end of the project. Evaluation of the students for the research capabilities. Provide a written thesis. These assessment tasks will be scheduled throughout the four units comprising Research Project A (AVBS 4015, AVBS 4016, AVBS 4017, AVBS 4018) with the final grade averaged over all four units. **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

Research Project A is composed of 24 credit points and consists of units AVBS4015 (Research Project A1), AVBS4016 (Research Project A2), AVBS4017 (Research Project A3) and AVBS4018 (Research Project A4). All units can be taken in the same semester. However, the units need to be taken in chronological order if taken across both semesters. All four units are connected to the overall completion of the research project. Prior to start of this unit of study, students after consultation with an academic(s) and/or researcher(s) choose an area

of research interest and this will form the basis of the entire Research Project A program (24 credit points in total). In unit AVBS4015 students will be required to undertake assessment tasks and conduct research activities.

At the end of this Unit of Study, students will:

Identify a research area, define a problem that impacts on animals and analyse this problem using information from various sources; critically evaluate current research (experimental design, statistical analysis, technical limitations) and identify where the present knowledge limiting for the chosen research topic; assimilate and manage information from within and across disciplines to provide new concepts or understanding in the area of research; become familiar with scientific principles of research and the ethical use of animals in research; undertake research related to the project; meet set assessment tasks designed to develop written and oral presentation skills; apply the range of interpersonal skills necessary to work with peers and other researchers; meet deadlines and maintain accurate records related to the project.

#### AVBS4016

##### Research Project A2 Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Muir **Session:** Semester 1, Semester 2 **Classes:** There is no face-to-face teaching. The equivalent of 6 hours per week will be allocated from the course work timetable. **Prerequisites:** Animal and Veterinary Bioscience years 1-3. Students need to have obtained a second/third year WAM commensurate with obtaining a first class honours grade. **Corequisites:** AVBS4015, AVBS4017, AVBS4018 **Prohibitions:** AVBS4013, AVBS4014 **Assessment:** See AVBS4015 **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

Students will actively work on the research projects identified at the start of unit AVBS4015. This is will include, where appropriate, undertaking animal and laboratory studies, collection and analysis of samples and data, recording of data, continue to evaluate information from various sources and meet set assessment deadlines.

See under AVBS4015 for further information.

#### AVBS4017

##### Research Project A3 Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Muir **Session:** Semester 1, Semester 2 **Classes:** There is no face-to-face teaching. The equivalent of 6 hours per week will be allocated from the course work timetable. **Prerequisites:** Animal and Veterinary Bioscience years 1-3. Students need to have obtained a second/third year WAM commensurate with obtaining a first class honours grade. **Corequisites:** AVBS4015, AVBS4016, AVBS4018 **Prohibitions:** AVBS4013, AVBS4014 **Assessment:** See AVBS4015 **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

See under AVBS4015 and AVBS4016.

#### AVBS4018

##### Research Project A4 Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Muir **Session:** Semester 1, Semester 2 **Classes:** There is no face-to-face teaching. The equivalent of 6 hours per week will be allocated from the course work timetable. **Prerequisites:** AVBS4015, Animal and Veterinary Bioscience years 1-3. Students need to have obtained a second/third year WAM commensurate with obtaining a first class honours grade. **Corequisites:** AVBS4016, AVBS4017 **Prohibitions:** AVBS4013, AVBS4014 **Assessment:** See AVBS4015 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Sc Agr.

See under AVBS4015 and AVBS4016.

#### AWSS1001

##### Architectural Sketching and Drawing Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Jan Fieldsend **Session:** Semester 1 **Classes:** Two hours studio per week. **Assessment:** Portfolio of works and process journal. **Practical field work:** Studio practice. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Des Arch, UG Study Abroad Program.

This module aims to provide the student with the knowledge, skills and aptitude required to use a range of fundamental drawing skills and media to make a portfolio of drawings based on observation of the physical world, in particular the built world. On successful completion of this unit of study students will have demonstrated familiarity with a range of drawing media and techniques, including charcoal, graphite, conte crayon, pen, brush and ink, as well as being introduced to colour and mixed media. Students will be encouraged to develop a commitment to the practice of drawing as a discipline in its own right as well as a fundamental skill in all design areas. Each technique and approach will be presented against a background of art history and current architectural practice. Students will understand the importance of maintaining a diary as a site to record all their visual and conceptual research, and in which to draw on a daily basis as a means to develop both skills and ideas.

#### AWSS1003

##### Art Practice Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Three hours per week **Assessment:** Attendance, studio skills and technique, studio work, portfolio and completed projects. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment numbers are limited by space and equipment constraints. Students should submit written permission from the Tin Sheds Gallery with their request to enrol. Students may incur costs for materials in some Art Workshops units. Available to Bachelor of Arts (Art history and Theory) students only.*

**Associated degrees:** B A.

This unit enables students in the Bachelor of Arts (Art History and Theory) to attend an individual medium: Photography, Printmaking, Ceramics, Digital Video, General Drawing, Painting, Life Drawing, Screen-printing, Sculpture, Mixed Media, Site-Specific Art.

#### AWSS2001

##### Public Art Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Jan Fieldsend **Session:** Semester 1 **Classes:** Two hours per week. **Assessment:** Research Journal, Essay and Oral presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

The field of public art is rapidly growing and as such has generated much debate and interest.

The aim of this unit is to provide students with a broad overview of the issues that influence and inform the production of art in the public sphere: history and theory of public art, policy and management, conservation, community response and evaluation, current local and international practice. It aims to develop each student's ability to critically analyse and be able to enter into debate (both written and spoken) on public art issues, especially its relationship to architecture. Field trips, artist/commissioner talks, case studies, (eg. the Vietnam Memorial in Washington and the Sydney Olympic Public Art Projects) and slide lectures will complement the theoretical content of Public Art.

#### AWSS2002

##### Site Specific Art Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Jan Fieldsend **Session:** Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery,*

*Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This practical unit aims to give students a broad understanding of how site-specific art functions as a contemporary art medium, including its historical development and relationship to other visual art forms and architecture. Students gain experience in ways of selecting and analysing sites for the purposes of incorporation into artwork. Students begin to develop an individual art practice through using a wide range of materials to make temporary site-specific artworks and also begin to develop ways of analysing and evaluating site-specific artworks through directed group discussions.

#### AWSS2010

##### Ceramics (Handbuilding)

##### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mark Jones **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects, seminars and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This practical unit aims to give students the understanding to create handbuilt ceramic constructions that will be fired and glazed. Students will explore the plastic properties of clay as well as glazing, underglazing and surface treatments. There will be an investigation of handbuilt ceramics at both historical and contemporary levels. Set projects will enable students to discover their own means of expression and design of vessels and sculptural forms. Projects include slab and coil construction and combinations of coil, slab and pinch construction. Various surface finishes such as brushwork, glazing and sculptural relief applications will be introduced including coloured underglazes, slips and glazes.

#### AWSS2011

##### Ceramics (Wheel Throwing)

##### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mark Jones **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects, seminars and associated assignments. **Practical field work:** Studio Work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This practical unit aims to give students an introduction to the varied techniques of throwing on the wheel to produce vessels and designed forms. The emphasis is on the art and craft of this age old method of construction. There will be an investigation of this practice at both historical and contemporary levels. Various techniques will be introduced including combination throwing and handbuilding, turning, glazing and brushwork with slips and underglazes.

#### AWSS2013

##### Digital Video

##### Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Assessment is based on participation, process/research journal, practical digital video skills and completed projects. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This practical unit aims to explore the languages of moving images; conventions of framing, movement and editing; developing a fundamental understanding of the technical aspects of pre-production, production and post-production; and generate independent and cooperative working methods using a variety of media. Students will be introduced to digital video systems with up-to-date editing software. Emphasis is placed on skills development, process (storyboarding) and ideas. The module is divided into units exploring approaches to lighting, shooting, editing, sound production and concept development.

#### AWSS2014

##### Printmaking

##### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Seraphina Martin **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Attendance: 10%, Studio skills, image conception, research journal 30%, Print portfolio: 60% **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This practical unit aims to give students a broad understanding of how an etching is developed, offering contemporary non-toxic alternatives to traditional etching. A wide range of mark making techniques will be applied combining collage, photography, photocopy art, textural found objects, digital images, as well as the traditional discipline of drawing. Students will gain knowledge of fundamental plate making techniques, and their different applications through demonstration, slide lectures and discussion. Other forms of printmaking, such as lino cuts and mono prints may be also explored.

Students will be introduced to the history/theory of printmaking as an art form in contemporary art. Printmaking's relationship to architecture and digital media will be also discussed. Particular emphasis will be placed on the production of a high quality print portfolio on state of the art printmaking papers.

#### AWSS2015

##### General Drawing

##### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Sue Pedley **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This module aims to provide the student with the knowledge and aptitude required to use a range of fundamental drawing skills and media to make a portfolio of drawings based on observation of the physical world. It aims to increase the student's level of skill in representational, interpretive and expressive areas of drawing. The focus is on the formal aspects of composition and perspective as well as mixed media and experimental approaches. Students use a wide variety of mark-making methods to render line, tonal value and texture. Students are provided with the opportunity to combine sound observational skills with imaginative and experimental techniques in order to encourage a personal vision and a commitment to the practice of drawing. Drawing is a discipline in its own right as well as a fundamental skill in all design areas. Each technique and approach will be presented against a background of art history and theory.

#### AWSS2016

##### Graphic Design (Introduction)

## Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Teena Clerke **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This unit of study assumes the student knows little or nothing about graphic design. The aim is to introduce basic design principles and processes, examining the use of design elements, the construction of meaning in visual communications, research methods and the relationships between type, image and form.

The unit involves practical studio work with a lecture series that introduces students to the history, theory and practice of graphic design and typography. Preliminary exercises develop an understanding of the basic skills, concepts and materials of visual communication and document layout. Students learn about the elements of design, page composition and the use of type and image. Understanding of the integration of type and image is applied in the final project. Students consider how information is transmitted and interpreted and develop an understanding of the key roles of the media form, the audience and the communication objective.

Students address the issues of style and meaning in contemporary design and typography and are required to research and present a journal of collected print samples and readings that expand their knowledge.

### AWSS2018

#### Life Drawing

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mr Brandt Lewis **Session:** Semester 1, Semester 2 **Classes:** Three hours per week **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This module aims to provide the student with the knowledge, skills and aptitude required to use a range of fundamental drawing skills to make a portfolio of work based on observation of the human body through the use of life models. It aims to increase the student's level of skill in representational, interpretive and expressive areas of drawing, using a wide range of drawing media and techniques, focussing on the formal aspects of composition, anatomy, scale, proportion and foreshortening as well as developing dynamic approaches to drawing the human body. Students will be provided with the opportunity to combine sound observational skills with imaginative and experimental techniques in order to encourage a personal vision and style and a commitment to the practice of drawing as a discipline in its own right. Each technique and approach will be presented against a background of art history and theory.

### AWSS2019

#### Mixed Media

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Jan Fieldsend **Session:** Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

In the twentieth century, collage techniques profoundly changed the form and content of visual arts. Mixed Media examines these developments through practical classes, slide lectures and discussion. Collage, assemblage, montage, photocopy art and the more traditional disciplines of drawing, painting and printmaking are included in mixed media.

This unit of study presents students with a wide range of art materials, techniques and concepts. It aims to develop skill in and knowledge of various formal considerations in art practice: scale, line, texture, colour, space, shape etc. as well as understanding the conceptual bases of artwork. Through a set of preparatory exercises and finished artworks students can explore and develop creative expression, technical abilities and knowledge of materials. An awareness of art history/theory in relation to mixed media will be presented and discussed to inform the student's own approach to image making.

### AWSS2020

#### Object Design

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Anne Harry **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

In this unit students develop and inter-relate manufacturing and artisan skills with research, analysis and design development. It aims to develop a critical awareness of the nature of all objects which surround us, exploring cultural, contextual and symbolic aspects of object design as well as functional and aesthetic qualities. Sustainability and social issues relating to their manufacture, use and disposal are also discussed. The unit aims to increase appreciation of the materiality of objects focusing on timber as an example and introduces students to the wonderful diversity of timber species, environmental and ethical issues associated with their selection, and also emerging alternative materials. Through a series of exercises and production of their major project, students develop knowledge of construction techniques and skills in using wood/plastics tools and machinery and in so doing, build an awareness of industrial and craft practices and how they impact on the design process and outcome.

### AWSS2022

#### Painting

#### Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Three hours per week **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This module aims to provide the student with the knowledge and aptitude required to use a range of fundamental painting skills to make a portfolio of work based on observation of the physical world, and to experiment with imaginative applications of acrylic or oil media. Students with little or no experience with painting will be shown how to prepare grounds, mix colours, make a tonal scale in colour, then undertake practical work in observational painting including still-life and interior (painting form, modelling and shading techniques, use of pure colour), landscape (compositional techniques, perspective, use of grounds), the nude and self-portraiture (painting with a life model, anatomy). Each project will be presented against a background of relevant art history and conceptual approaches, including, where appropriate, contemporary approaches to style and appropriation, the decorative, text, collage and abstraction. Students will be shown how

to use a visual diary as their research/process journal which will include all their visual and conceptual research.

## AWSS2023

### Photography 1

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Paola Talbert or Ms Virginia Ross  
**Session:** Semester 1, Semester 2 **Classes:** Three hours per week.  
**Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This practical unit assumes students have little or no understanding of dark room practice. It aims to give students an understanding of how photography functions as a contemporary visual medium, including its historical development. Students will gain knowledge of the principles and practise of camera operations, the production of high quality black and white negatives and prints in small studio style classes. This module covers the use of a 35mm SLR camera, image composition, use of lighting, film developing and printing photographs. Practical work includes darkroom, gallery visits, completion of set class projects, technical exercises, class discussions and the production of a portfolio. Students should have access to a 35mm SLR film camera.

## AWSS2024

### Photography 2

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Paola Talbert or Ms Virginia Ross  
**Session:** Semester 1, Semester 2 **Classes:** Three hours per week.  
**Prerequisites:** AWSS2023 or equivalent. Equivalence can be established by either presenting a portfolio of b&w photographic work or by presenting a transcript indicating a minimum of a full semester unit in b&w photography.  
**Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

In this unit of study, students will have the opportunity to develop creative photographic projects from initial ideas to production of artwork, producing two major photographic series that function successfully at both an aesthetic and a conceptual level. They will have the opportunity to research and experiment with a variety of different ideas and take an experimental approach to photography, trying different techniques and considering which will best serve the intentions of the artwork.

## AWSS2026

### Screen Printing on Paper

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Ms Jan Fieldsend **Session:** S1 Intensive **Classes:** Three hours per week. **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This studio-based unit will introduce students to screen printing on paper, in both graphic design and contemporary art contexts. Screen-printing is most commonly known as a commercial process, however many artists have used this printmaking technique not only

for its versatile aesthetic qualities but to comment on the way art is perceived in the age of mass media and consumerism.

It aims to provide students with: the knowledge and skills to design for and print on paper; awareness and appreciation of screen-printing in historical and contemporary contexts; a wide variety of techniques and exercises that can be developed into an edition or experimental series of screen-prints.

Techniques covered include: photo, wax emulsion stencils, preparation of photo-positives, ink technology, registration and print set-up for multi-coloured screen-prints. Through studio practice, set exercises, slide-lectures, gallery visits and library research students will develop an understanding of their creative process and ability to interpret ideas through the medium of screen-printing.

## AWSS2027

### Sculpture

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mr Ari Purhonen **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

The aim of this unit of study is to develop knowledge and abilities in all areas, practical, historical and theoretical relevant to the making of sculpture.

Students will work with a broad range of materials and sculptural techniques such as clay modelling, plaster-mould making, casting, soldering, brazing and welding which will be used to explore elementary aspects of three-dimensional form and space.

You will be required to design, plan and complete two projects, a casting in plaster and a work using metal. In addition to this you will need to independently research historical precedents and contemporary practice in sculpture and discuss your ideas and development of your work in class.

## AWSS2028

### Web Art and Design

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mr Gianni Wise **Session:** Semester 1, Semester 2 **Classes:** Three hours per week. **Assessment:** Studio projects and associated assignments. **Practical field work:** Studio practice **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Tin Sheds Gallery, Wilkinson Building. Attendance at the first class is compulsory to maintain your place in the unit: allocation of spare places will be made at the first meeting. Students may incur costs for materials in some Art Workshops units.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

The Web Art and Design unit of study aims to introduce Web design and internet page creation within the context of contemporary art. The practical class will enable students to build a website using current software. The aim is to encourage engagement with the net in terms of its creative potential and cultural relevance rather than its commercial and educational uses. Students will investigate use of the internet by contemporary artists in such diverse areas as media arts, architecture, hypertext writing and other emerging forms of net art that engage with the very form of the internet. Students are expected to have a basic knowledge of Web design and the internet

# University undergraduate units of study – B

## BACH1031

### Clients, Practitioners and Organisations Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Rose Leontini **Session:** Semester 2 **Classes:** 13 lectures, 6 seminars **Assumed knowledge:** BACH1130 Foundations of Health Sociology **Assessment:** Group poster presentation (50%), 1hr exam (50%) **Campus:** Cumberland **Mode of delivery:** Distance Education or Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Leis&Hlth), B App Sc (Leis&Hlth)Hons, B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (Orth), B App Sc (Orth), B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), Hea.

This unit of study applies a sociological perspective to the complex relationships between stakeholders in the Australian health care system. The unit emphasises: sociology of client/practitioner relationships; sociology of work and organisations in health care settings; theoretical perspectives on the self, the body, illness and identity.

Book of readings

## BACH1130

### Social Determinants of Health Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Mr Ian Andrews **Session:** Semester 1, Semester 2 **Classes:** 2hr plenary session (or lecture)/week from Wks 1-13 inclusive **Assessment:** Class essay (35%), exam (65%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (Orth), B App Sc (Orth), B App Sc (OT), B App Sc (Phty), B App Sc (Phty), B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), B Hlth Sci, B O H, Health S.

This unit provides the sociological tools (theory and method) that are required to achieve social literacy in the domain of health and illness. The unit will develop within the student a sociological imagination, a quality of mind that will be used to scrutinise everyday assumptions regarding health and illness. Topics covered include: the key features of modern societies; the sociological imagination; structural inequalities in Australian society and their impact upon health and the provision of healthcare services; the distinction between biomedicine, individualistic health promotion and social medicine; the history, presence and future of medical dominance in the Australian healthcare sector and the complex links that exist between gender and health.

## BACH1132

### Foundations of Health Psychology Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Karen Pepper **Session:** Semester 1, Semester 2 **Classes:** 2 lectures/week **Assessment:** 1000 word essay (50%), 1hr MCQ exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (Orth), B App Sc (Orth), B App Sc (OT), B App Sc (Phty), B App Sc (Phty), B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), B Hlth Sci, B O H, Health S.

This unit provides an introduction to areas of psychology relevant to the health sciences. Students will first be introduced to the principles and applications of psychology, including the links between mind and body, and the role of learning. This will be followed by an examination of psychological changes through the life cycle, health psychology and the psychology of groups and organisations.

## BACH1134

### Health, Illness and Social Inquiry Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Ian Andrews, Dr Zakia Hossain **Session:** Semester 1 **Classes:** Strand 1: 2hr lecture/week; strand 2: 1hr lecture, 1hr workshop Wks 1-6, 1hr computer lab session Wks 8-14 **Assessment:** Strand 1: class essay (17.5%), exam (32.5%); strand 2: presentation (20%), exam (30%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (Phty), B B Hlth Sc, B Hlth Sc (Rehab Cng).

This unit is comprised of two complementary 3 credit point strands: 'Foundations of Health Sociology' and 'Applied Sociology: Health Inequalities'. The first strand provides the sociological tools (theory and method) that are required to achieve social literacy in the domain of health and illness. This strand will develop within the student a sociological imagination, a quality of mind that will be used to scrutinise everyday assumptions regarding health and illness. Topics covered include the key features of modern societies; structural inequalities in Australian society and their impact upon health and the provision of healthcare services; the distinction between biomedicine, individualistic health promotion and social medicine; the changing role of alternative medicine in the healthcare system; and globalisation and the political-economic context of healthcare. The second strand provides students with understanding of macro and micro sociological perspectives of health, illness and inequalities. It provides students with opportunities to apply these perspectives and concepts to analyse empirically demonstrable health inequalities in Australian society. Students will use two computer software packages, HealthWIZ and MapWIZ, to research sources of health and population data and to analyse this data using sociological concepts and theories.

## BACH1143

### Designing Health Research Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Tatjana Seizova-Cajic **Session:** Semester 1, Semester 2 **Classes:** 1hr lecture/week and fortnightly tutorials **Assessment:** 1500 word group report due Wks 12-13 (40%), 1.5hr MCQ/SA exam in Wks 15-16 (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (OT), B App Sc (Phty), B App Sc (Phty), B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, B Hlth Sc.

This unit introduces students to research methodology and design that is fundamental to the health professions. The unit of study presents an overview of the research process, as well as detailed information about ethics, sampling, measurement and both quantitative and qualitative approaches to research. Students will become familiar with main concepts and logic underlying all research designs, with specific terminology used in epidemiological studies and with the notion of evidence-based practice. Students will also develop skill in understanding, interpreting and evaluating research reports, doing literature search and review, selecting appropriate research methods to answer research questions and in presenting research findings using a standard format for quantitative studies.

## BACH1145

### Quantitative Health and Social Research Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Karen Pepper **Session:** Semester 1, Semester 2 **Classes:** 1hr lecture, 1hr tutorial/week **Assumed knowledge:** Basic mathematics **Assessment:** 1000 word assignment (40%), 1.5hr MCQ

exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (OT), B App Sc (Phy), B App Sc (Phy), B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), B Hlth Sc (Rehab Cng), B Hlth Sc (R).

This unit introduces prospective health science practitioners and researchers to methods for exploring, analysing, understanding and interpreting quantitative data. It aims to provide an understanding of the main ideas of statistics and useful skills for working with data as well as to introduce students to common data analysis tools. Methods for collecting, exploring and presenting data are discussed from the perspective of the practitioner. Graphical methods and descriptive statistics are emphasised throughout the unit and precede all analysis techniques. The normal and sampling distributions are introduced. The early emphasis in this unit will be placed on explaining; patterns in data, outliers and variability. Random sampling in the context of randomised comparative experiments precedes an introduction to statistical inference for comparisons and relationships. Methods for parametric and non-parametric inference are introduced for one, two and multiple samples. The unit also introduces students to techniques of epidemiological data analysis. Students will use data analysis software packages that are in common use in employment settings. The nexus between qualitative and quantitative methodologies is explored, throughout the unit, in the context of inference and scientific method.

#### BACH1147

##### Qualitative Health and Social Research Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Rose Leontini **Session:** Semester 1, Semester 2 **Classes:** 1hr lecture/week, 1hr tutorial every alternate week, commencing in Wks 2 and 3 **Assessment:** Two 1500 word assignments (50% ea) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (OT), B App Sc (Phy), B App Sc (Phy), UG Study Abroad Program.

This subject introduces students to key elements in the design of qualitative research. The student will acquire skills in recognising research questions and problems which are appropriately investigated using qualitative methods. The unit will present a range of qualitative methodologies including naturalistic observation and in-depth interviews. Students will develop skills in recording and presenting qualitative data and in the use of analysis techniques suitable for qualitative data.

#### BACH1148

##### Health, Attitudes and Interaction Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Gomathi Sitharthan **Session:** Semester 2 **Classes:** 2hr lectures for 13 weeks **Prerequisites:** BACH1132 Foundations of Health Psychology or BACH1133 Introduction to Health Psychology or Junior Oral Health Units **Assessment:** 1hr mid semester exam, 2hr final exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (Orth), B App Sc (Orth), B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), B Hlth Sci, B O H.

This unit of study comprises two modules. Module 1: Social Psychology examines the findings from research into social phenomena such as helping behaviour, aggression, prejudice and conformity. The unit extends this examination to the application of findings to health care settings and practitioners. Module 2: Disability Studies students will be exposed to an interdisciplinary perspective on the experiences of people with chronic illnesses and disability as well as community and professional perceptions of disability. Both modules examine the psychology of client-practitioner communication and interaction.

#### BACH1161

##### Introductory Behavioural Health Sciences

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Karen Pepper, Mr Ian Andrews **Session:** Semester 1, Semester 2 **Classes:** 4hrs/week **Assessment:** Class exercise (17.5%), mid semester 1000 word essay (25%), end semester exam (57.5%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B B Hlth Sc, B Hlth Sci, B Hlth Sci, M N, B O H, UG Study Abroad Program.

This unit provides an introduction to areas of psychology and sociology relevant to health and wellbeing. The unit provides the sociological tools (covering both theory and method) that are required to achieve social literacy in the domains of health and wellbeing as well as an introduction to the principles and applications of psychology as they pertain to these areas. The unit aims to develop a sociological imagination, a quality of mind that will be used to prompt students to question commonsense assumptions regarding health and wellbeing, including in specific areas such as exercise and sport. Students will also gain familiarity with the major paradigms and methodological approaches of contemporary psychology and will develop a facility in evaluating the application of psychological theory to specific health issues in their major area of study, such as addiction, stress, nutrition and diet and exercise adherence. Specifically, the sociology component of the unit will examine the origins, nature, and prospects of 'modern' societies; the nature of sociological explanation (the 'sociological imagination'); the social patterns, social processes, and social relationships that underpin inequalities in Australian society, especially as they relate to health and wellbeing; the characteristics, and limitations, of the classical biomedical model; the diagnostic and prescriptive distinctions between biomedicine, individualist health promotion, and social medicine; the wider political and economic context of healthcare, and of community sport and recreational activities. The psychology component of the unit will examine links between mind and body; the principles of learning and behaviour change; the psychological and biological responses to stress and pain; pain management; the psychology of groups, clubs, and other organisations; and selected additional topics as appropriate (for example, communication, exercise and fitness, health promotion, psychological changes across the lifespan).

#### BACH1165

##### Psychology and Cognitive Factors (Intro) Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Steve Cumming **Session:** Semester 2 **Classes:** 5hrs/week **Assessment:** Mid and end semester exam, written assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

This unit provides an introduction to developmental psychology and introduces students to an information processing approach to cognitive functions including attention, learning, memory, knowledge acquisition reasoning and decision making.

#### BACH2109

##### Cognitive Neuropsychology I Health Sciences

**Credit points:** 5 **Teacher/Coordinator:** Dr Steve Cumming **Session:** Semester 2 **Classes:** On-campus, 1 lecture in Wks 1-5, 2 lectures in Wks 6-13 **Prerequisites:** BACH1159 Cognitive Factors in Health **Assessment:** Assignments, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (MRS) Rad Thpy, B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

This unit extends the study of normal cognition begun in BACH1159 Cognitive Factors in Health, introduces the neuropsychological approach to brain-behaviour relationships and considers the cognitive neuropsychological approach to understanding fundamental cognitive processes.

*Textbooks*

Eysnck & Kerne, Cognitive Psychology (3rd ed), Psychology Press

## BACH2126

### Maladaptive Behaviours/Behaviour Change

#### Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Mairwen Jones **Session:** Semester 1, Semester 2 **Classes:** 2hr lectures/week (Wks 1-10), 1hr tutorials/week (Wks 1-13) **Assumed knowledge:** BACH1132 Foundations of Health Psychology or BACH1133 Introduction to Health Psychology **Assessment:** 25min small group (2-3 people) class presentation (problem and treatment) (40%), 2hr MCQ/SAQ/essay exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (OT), B App Sc (OT) Hons, B App Sc (Phy), B App Sc (Phy), B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, Health Sciences UG Non-Award, UG Study Abroad Program.

This unit provides students with a general theoretical framework within which psychologically problematic behaviours are discussed. Students will be presented with an overview of current etiological theories and best-practice treatment approaches for a range of common psychological conditions with reference to controlled treatment outcome studies. This unit also explores the cognitive-behavioural approach to the management of maladaptive behaviour and psychological dysfunction based upon the application of learning principles. The unit examines the theory and application of behavioural management strategies in a variety of clinical settings and contrasts these with competing models of psychological therapy.

## BACH2127

### Health Policy and Service Delivery

#### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kate O'Loughlin **Session:** Semester 1, Semester 2 **Classes:** 13 lectures, 6 tutorials **Prerequisites:** BACH1098 Introduction to Health Sociology or BACH1130 Foundations of Health Sociology **Assessment:** 1000 word essay (40%), 1.5hr exam essay and SAQ (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (OT), B Hlth Sci, Health Sciences UG Non-Award, UG Study Abroad Program.

This unit provides an understanding of key aspects of the relationship between Australian society, health and health service provision. It discusses the development, delivery and evaluation of Australian health and disability policy and services in a global context and across the life span. The importance of a holistic and preventive approach to health policy is stressed and the relationship between service access, equity, quality and cost is discussed.

## BACH2128

### Cognition and Cognitive Impairment

#### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Steve Cumming **Session:** Semester 2 **Classes:** 2hrs lectures/week in Wks 1-8, 1hr lecture, 1hr seminar/week in Wks 9-13 **Assumed knowledge:** BACH1132 Foundations of Health Psychology or BACH1133 Introduction to Health Psychology **Assessment:** 20min group presentation (30%), 1hr MC/SA exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (OT), UG Study Abroad Program.

This unit of study introduces students to visual and auditory perception and presents an information processing approach to cognitive functions including attention, motor skill learning, memory, knowledge acquisition, reasoning and decision-making. The unit of study emphasises the application of perceptual and cognitive research findings to a range of functional activities and to understanding the perceptual and cognitive functioning that may be expected to be associated with head injury and neurological illness and with developmental and learning disabilities.

## BACH2137

### Health Policy Development

## Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Zakia Hossain **Session:** Semester 1, Semester 2 **Classes:** Thirteen 1hr lectures, 12 tutorials **Assessment:** 1000 word project, 3000 word project, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B B Hlth Sc, UG Study Abroad Program.

The unit examines development and implementation of health policies in Australia. It provides a socio-demographic analysis of changing pattern of morbidity and mortality in Australia over time and their impact on health planning and policy development. The unit uses cross-sectional analysis in identifying health issues and health priorities. It focuses on policy determinants, organisational context in policy making, and health policy and financing. Students will develop skills in assessing community health needs; developing health policy and implementation; and monitoring and evaluation of health programs.

## BACH2140

### Research Methods for Health Sciences

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Karen Pepper **Session:** Semester 1, Semester 2 **Classes:** 4hrs/week **Assessment:** 1500 word research report, practical assignment, 3hr end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B B Hlth Sc, B Hlth Sci, B Hlth Sci, M N, UG Study Abroad Program.

Health science graduates are expected to be informed consumers of health research with an evidence-based practice perspective. The aim of this unit is to provide a foundation for critical appraisal of the main approaches and techniques used in health research. The unit introduces students to key elements common to research paradigms, such as problem formulation, research ethics, design, measurement, sampling, data collection and data analysis, and describes their application of a range of fundamental research designs. Research designs commonly used in health settings will be the focus of this unit. Thus, the fundamental principles of experimental and quasi-experimental group and single case research designs, epidemiological research, survey-based approaches, ethnography, phenomenology and grounded theory will be considered, along with methods of data collection including the use of standardised instruments, structured and naturalistic observation and interviewing. The unit will also introduce students to major quantitative and qualitative techniques appropriate for analysing research data.

## BACH2142

### Cognitive Neuropsychology

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Steve Cumming **Session:** Semester 2 **Classes:** 4hrs/week **Prerequisites:** BACH1165 Psychology and Cognitive Factors (Intro) **Assessment:** Assignment, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

Student acquire knowledge of normal cognition, neuropsychological approach to brain-behaviour relationships and cognitive processes; the cognitive and behavioural consequences of brain damage and models of cognitive rehabilitation.

## BACH2143

### Counselling & Behaviour Management for CD

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Chris Lennings **Session:** Semester 2 **Classes:** 4hrs/week **Assessment:** Case study, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

Students will acquire knowledge of basic and advanced counselling, psychotherapeutic and behaviour management skills as they are used

by students and professionals in health sciences working with individuals with communication disorders.

### BACH2144

#### Behaviour, Management and Health Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Mairwen Jones **Session:** Semester 2 **Classes:** 2hr lectures/week (Wks 1-10), 1hr tutorial/week (Wks 1-13) **Assumed knowledge:** BACH1132 Foundations of Health Psychology or BACH1133 Introduction to Health Psychology or equivalent **Assessment:** 25min small group (2-3 people) class presentation (problem and treatment) (30%), 2hr MCQ/SAQ/essay exam (50%), 1000 word essay (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sci, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit provides students with a general theoretical framework within which psychologically problematic behaviours are discussed. The social implication of the use of psychological labels is discussed alongside the need for accurate and non-stigmatising language when discussing mental illness. Students will be presented with an overview of current etiological theories and best-practice treatment approaches for a range of common psychological conditions with reference to controlled treatment outcome studies. This unit also explores the cognitive-behavioural approach to the management of maladaptive behaviour and psychological dysfunction based upon the application of learning principles. The unit examines the theory and application of behavioural management strategies in a variety of clinical settings and contrasts these with competing models of psychological therapy. Students will also have the opportunity to investigate the cultural and social significance of the manifestation of mental illness in a number of societies.

### BACH3055

#### Cognitive Neuropsychology II Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 2 **Classes:** 1hr lecture, 1hr tutorial/week **Prerequisites:** BACH2109 Cognitive Neuropsychology I **Assessment:** 1hr exam (60%), 25min seminar presentation (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

This unit is concerned with the cognitive and behavioural consequences of brain damage and models of cognitive rehabilitation.

### BACH3056

#### Patient Management Theories/Applications Health Sciences

**Credit points:** 5 **Teacher/Coordinator:** Ms Karen Pepper **Session:** Semester 1 **Classes:** Four 1hr lectures, 1hr seminar/week **Prerequisites:** BACH1132 Foundations of Health Psychology, BACH1159 Cognitive Factors in Health, BACH2126 Maladaptive Behaviours/Behaviour Change **Assessment:** 2hr SA/MC exam (40%), 1hr MC exam (20%), 1500 word case report (20%), video counselling report (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

This unit examines the psychological needs of clients and their families in the context of speech pathology practice. Topics of study include detection of underlying anxiety, depression, conflict and other psychological disorders. The client-practitioner relationship is considered and students will acquire basic counselling skills that will enhance compliance and satisfaction with treatment. Students will apply behavioural therapies to the treatment of speech and language disorders, diagnose and manage learning disabilities with special reference to reading delay and to developmental and acquired reading disability in children and adults. Accurate diagnosis depends on the administration and interpretation of tests. Students will therefore develop skills in the critical evaluation of test theory and test construction, administration and reliability and validity, with special reference to speech and language tests.

### BACH3075

#### Health Psychology Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 1 **Classes:** Lecture and seminar **Prerequisites:** BACH2138 Psychological Disorders and Their Treatment or BACH3144 Psychology and Mental Health or HSBH1003 Health, Behaviour and Society **Assessment:** Assignments, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Rad Thpy, B B Hlth Sc, B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit examines two major areas of health psychology. Firstly, psychological approaches to understanding and managing pain and the relationship of pain to injury and chronic illness are considered. Pain is a complex multi-dimensional construct with sensory, emotional, motivational, behavioural and environmental components. Current theoretical debates regarding the nature and perception of acute and chronic pain are introduced and techniques currently used in the management of acute and chronic pain are surveyed. Secondly, students are acquainted with the major approaches to understanding and conceptualising stress and coping in our society. Stress represents a reaction to a situation or event which depends on personality, the person-environment fit and the presence of social support. Aspects of the work situation and human service organisations are identified as foci for the study of stress. The seminar program aims to give students a first hand knowledge of the assessment strategies used in stress research and management and direct participation in stress management skills, including relaxation, time management, goal setting and developing coping skills.

### BACH3077

#### Workplace Attachment Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Deborah McGregor **Session:** Semester 2 **Classes:** All-day workshop (Wk 11), 15 days (100 hours) workplace attendance **Assessment:** 1500 word workplace report (50%), 20min presentation (50%) **Practical field work:** 15 days fieldwork **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B B Hlth Sc, B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

This unit involves two components. Firstly, students undertake a three week workplace attachment during the inter-semester break. Secondly, students will meet during semester to discuss their fieldwork experiences, in terms of the goals of the workplace, and of the policy, ethical, legal, communication, and management issues and applications encountered. Students will submit a detailed report of the workplace attachment, analysing the experience in terms of each of these dimensions.

### BACH3081

#### Sociology of Sport Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Mr Ian Andrews **Session:** Semester 2 **Classes:** On-campus, 2hrs/week **Prerequisites:** BACH1130 Foundations of Health Sociology or BACH1134 Health, Illness and Social Inquiry **Prohibitions:** BACH3130 Sport, Society and Social Theory **Assessment:** Assignment, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

This unit examines the nature of modern sporting forms and practices and relates them to broader social structures and cultural processes. These aims are realised through the reflexive application of a range of sociological theories and concepts. Topics covered include the relationship between sport and the key dimensions of social structure (class, gender, ethnicity, age and disability); ideology, power and politics in sport; the links between sport and 'community' and the relationship between the mass media and professional sports.

### BACH3082

#### Sociology of the Aged and Ageing

**Health Sciences**

**Credit points:** 3 **Teacher/Coordinator:** Dr Zakia Hossain **Session:** Semester 1 **Classes:** 1hr lecture, 1hr seminar/week **Prerequisites:** BACH1098 Introduction to Health Sociology or BACH1130 Foundations of Health Sociology, BACH1134 Health, Illness and Social Inquiry **Assessment:** Seminar presentation, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B Hlth Sc (Hons), B Hlth Sc (Rehab Cng), B Hlth Sci, UG Study Abroad Program.

This unit of study uses sociological analysis to examine aspects of Australia's changing demographic profile. Ideological, policy, political, economic and legislative aspects will be analysed. Theories and models of ageing will be applied to patterns of community response, to media representations, and to the well being of older people. The unit examines structural and non-structural factors of their influence on health of older people. Effects of ageing and service provision in various ethnic communities, family reunion, refugee migration, mainstreaming and ethno-specific accommodation will be examined. Students will be expected to use these concepts in an analysis of current government interventions.

**BACH3095****Ageing Society and Professional Practice  
Health Sciences**

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Cherry Russell **Session:** Semester 2 **Classes:** Independent learning package **Assumed knowledge:** BACH1098 Introduction to Health Sociology **Assessment:** Report **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sc (Rehab Cng), B Hlth Sci, UG Study Abroad Program.

This unit aims to contribute to effective professional practice in an ageing society. It provides an overview of key themes and issues including demographic ageing, social constructions of ageing, retirement, social divisions and public policy directions.

**BACH3096****Older People in the Community  
Health Sciences**

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Cherry Russell **Session:** Semester 1 **Classes:** Independent learning package: off-campus **Assumed knowledge:** BACH1098 Introduction to Health Sociology **Assessment:** Two assignments **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sc (Rehab Cng), B Hlth Sci, UG Study Abroad Program.

This unit examines the home and community environment of older people in relation to social factors which affect their health and quality of life.

**BACH3115****Behaviour Disorders and Management  
Health Sciences**

**Credit points:** 3 **Teacher/Coordinator:** Dr Mairwen Jones **Session:** Semester 1 **Classes:** Ten 2hr lectures **Assessment:** 2hr exam, 750 word essay **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

This unit provides students with a general theoretical framework within which psychologically problematic behaviours are discussed. The application of behavioural techniques to a variety of situations is studied. These techniques are employed in changing old habits and learning new skills, in managing pain, loss of function, stress, illness and stigma.

**BACH3120****Self, Society and Mental Health  
Health Sciences**

**Credit points:** 3 **Teacher/Coordinator:** Mr Ian Andrews **Session:** Semester 1 **Classes:** 2hrs/week **Prerequisites:** BACH1134 Health, Illness and Social Inquiry or BACH1130 Foundations of Health Sociology or BACH1098 Introduction

to Health Sociology **Assessment:** Assignment, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc.

This unit examines the nature of the self in the modern world and assesses various strategies for shaping and controlling the process of self-formation. These aims are addressed through the application of a range of sociological theories and concepts. Topics covered include: the social nature of the self and the process of socialisation; the social origins of mental illness in general and suicide in particular; the contrasting epistemologies of psychiatry, psychology and assorted forms of psychotherapy; the social construction of madness and the anti-psychiatry movement; psychoanalytic views on the self and society; the aims and limitations of 'self-help' and 'personal development' discourses; and the role of narrative in the formation of self-identity. Throughout the unit, students will be encouraged to reflexively apply to their own lives the theoretical perspectives that are covered, with a view to illuminating their own biography and sense of self.

Book of readings will be available

**BACH3122****Psychosocial Aspects of Ageing  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Steve Cumming **Session:** Semester 1 **Classes:** Distance mode **Prerequisites:** BACH1161 Introductory Behavioural Health Sciences **Assessment:** Three 2000 word essays/exercises **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B B Hlth Sc, B Hlth Sc (Hons), B Hlth Sci.

This unit examines the psychosocial context of late adulthood. The impact of changing social, environmental, economic and biological dimensions are examined in the context of healthy ageing and age-related illness. Implications for health care delivery are considered.

**BACH3126****Research Project Development  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Rob Heard **Session:** Semester 1, Semester 2 **Classes:** Three 1hr classes on-campus plus off-campus materials **Assessment:** Three assignments, 6000 words in total (weighted 28%, 28% and 44%) **Campus:** Cumberland **Mode of delivery:** Distance Education or Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B B Hlth Sc, B Hlth Sc (Hons), B Hlth Sci.

The unit will provide an overview of the research process and focus on the formulation of a research proposal. It will provide students with an opportunity to review and update their knowledge of research methods. Basic research design issues will be considered. Various methods of data collection will be examined together with their suitability for investigating different types of research questions. Students will explore the use of quantitative and qualitative data, longitudinal and cross-sectional designs and data resulting from experimental interview, observation, single case and survey research methods in addition to content analysis and secondary data analysis. Emphasis will be placed on the issues of validity and reliability of data collection techniques. Basic statistical procedures will be briefly reviewed and applications such as epidemiology and evaluation research will be introduced. By the end of this unit students will have developed a research proposal.

**BACH3127****History & Philosophy of Science  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Rodd Rothwell **Session:** Semester 2 **Classes:** Distance education/WebCT (equivalent to 13 2hr face-to-face lectures) **Assessment:** 2000 word essay (40%), 3000 word essay (60%) **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B B Hlth Sc, B Hlth Sc (Hons), B Hlth Sci.

This unit is designed to provide students with a critical perspective on science as a specific form of knowledge. It introduces students to the major philosophies of the nature of the scientific enterprise taking into account the social versus natural science controversy. Emphasis will be placed also on methodologies designated as hermeneutic/interpretive.

### BACH3128

#### Health and Globalisation

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Zakia Hossain **Session:** Semester 2 **Classes:** 1hr lecture, 1hr seminar for 8 weeks **Assessment:** 2000 word essay, semester presentation **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc, B Hlth Sc (Hons), B Hlth Sci.

The focus of the unit of study is to understand the meaning of globalisation and the impact of globalisation on health. The unit examines the changing trade processes and social and cultural shifts and their impact on populations' health. The unit also aims to provide understanding of both direct and indirect impact of globalisation on health. The direct impact of globalisation on health includes shifting disease patterns; shifting behaviour patterns (diet and smoking) and indirect impact includes changes in trade laws affecting workers' health, the existence of internet 'globalisation' on the health and utilisation of health care services.

### BACH3130

#### Sport, Society & Social Theory

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Ian Andrews **Session:** Semester 2 **Classes:** 2hr lecture for 13 weeks **Prerequisites:** BACH1130 Foundations of Health Sociology/Introduction to Health Sociology or BACH1134 Health, Illness and Social Inquiry or BACH1161 Introductory Behavioural Health Sciences **Prohibitions:** BACH3081 Sociology of Sport **Assessment:** 1000 word essay, 3000 word essay, 2hr exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), B B Hlth Sc, B Hlth Sci.

This unit draws on the work of numerous social theorists to elucidate the origins, nature and prospects of modern sporting forms and practices. The theorists covered include Norbert Elias, Max Weber, Emile Durkheim, Karl Marx, Antonio Gramsci and Jurgen Habermas. The topics covered include: the social development of modern sports; the functional similarities of sport and religion; ideology, power and politics in contemporary sport; gender, feminism and women's sport; the history of the Olympic Games; the structural transformation of professional football leagues and the role of sport in the formation of self-identity.

### BACH3132

#### Contemporary Issues in Health & Medicine

##### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kaye Brock **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week **Assessment:** Case study, report/seminar **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

Students familiarise themselves with contemporary issues in health and medicine. The combined knowledge and skills from previous learning is utilised in their critical evaluation of these issues.

### BACH3133

#### Health Planning, Policy and Evaluation

### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Zakia Hossain **Session:** Semester 2 **Classes:** 1hr/week **Assessment:** Assignment (project) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, B Hlth Sci, UG Study Abroad Program.

The purpose of this unit is to introduce students to the basic elements of needs assessment, program planning and evaluation in areas of health and health services. Topics include program planning concept, concept of need assessment, theories of change, implementation process and evaluation techniques.

#### Textbooks

Book of readings

### BACH3143

#### Counselling Skills

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Chris Lennings **Session:** Semester 1 **Classes:** 4 hrs/week **Assessment:** Practical assessment (20%), assignment (40%), exam (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc, B Hlth Sci.

The unit begins by presenting students with relevant theory and skills in counselling before considering special applications of helping skills such as team decision making, mediation, negotiation and motivational interviewing. The counselling relationship is then explored, with an overview of issues and techniques involved in the psychological treatment of children, adults and families. Major approaches to counselling and psychotherapy will be represented and contrasted. Students will develop skills in basic communication and counselling approaches and will develop an awareness of the techniques that underlie creditable psychotherapies. A seminar program will provide an opportunity to develop basic counselling and behaviour change skills.

### BACH3145

#### Health Policy

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 1 **Classes:** 4hrs/week **Prerequisites:** BACH1161 Introductory Behavioural Health Sciences **Assessment:** Essay (40%), class assignment (20%), exam (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc, UG Study Abroad Program.

This unit explores the development, implementation and analysis of health related policy in the Australian political, economic and demographic context. The unit provides students with understanding of multi-sectoral approach to health and health policy, resource allocation and budgeting, and evidence-based policy making. Students will be able to analyse current health policy of young people, ageing population and special groups. Students will develop skills in needs assessment, program development, program implementation and program evaluation. Where appropriate, students will undertake comparative studies of Australian and relevant overseas health policy developments.

### BACH3146

#### Cyberpsychology and e-Health

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrew Campbell **Session:** Semester 2 **Classes:** 1hr lectures for 12 weeks **Assessment:** Two 2000 word essays, quizzes, 2hr exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc, B B Hlth Sc (Hons), B Hlth Sc (Rehab Cng), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

Cyberpsychology and e-health aims to educate those seeking careers in allied health on how societal and individual health is both affected and resourced by the internet. The course will be based on current research and policy guidelines set by the Australian and American Medical Associations, the American Psychological Association and

Australian Psychological Society for the use of information technology in the following areas: informing allied health professionals of online resources for their profession; how types of ICT functions may affect the behaviour of youth and the elderly; ethics and viability of delivering general health and mental health resources online; the evolution of telemedicine and cyber-pharmacology practices; provision of psychological therapy over the internet; general health and mental health research and testing online; quality control and assessment of general and specific online health resources; and future directions of information technology and its application to health.

#### Textbooks

No set textbook but recommended reading will be outlined

### BACH4017

#### Epidemiological Research Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kaye Brock **Session:** Semester 2 **Classes:** 2hr lectures, tutorials/week **Prerequisites:** HIMT3032 Epidemiology **Assessment:** Open book exam or assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

In this unit students will be exposed to aspects of conducting epidemiological research, an area which focuses on the study of the distribution of disease, the search for determinants of the observed distribution and a subsequent evaluation of causal hypotheses.

### BACH4019

#### History and Philosophy of Science Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Rodd Rothwell **Session:** Semester 2 **Classes:** Distance education **Assessment:** Two 1000 word assignments **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sc (Rehab Cng) Hons, B Hlth Sci, B Hlth Sci, M C V S, UG Study Abroad Program.

This unit is designed to provide students with a critical perspective on science as a specific form of knowledge. It introduces students to the major philosophies of the scientific enterprise taking into account the social versus natural science controversy. Emphasis will be placed also on methodologies designated as hermeneutic/interpretive.

Hung E, The Name of Science: Problems and Perspective, Wadsworth Press (1997)

### BACH4043

#### Intermediate Statistics Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Rob Heard, Dr Zakia Hossain **Session:** Semester 2 **Classes:** Distance education/some intensive classes **Prerequisites:** BACH1143 Designing Health Research, BACH1145 Quantitative Health and Social Research **Assessment:** Written assignments, exam **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci.

In this unit, students will extend and consolidate the research methods and statistical skills acquired in previous research methods units. Students will gain experience in data screening techniques, analysis of variance, multiple regression and non-parametric statistics. Students will learn how to use SPSS to conduct these statistical tests.

### BACH4045

#### Qualitative Research Methods Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Cherry Russell **Session:** Semester 2 **Classes:** Wednesdays, 4-7pm **Assessment:** Two assignments **Practical field work:** 2 hrs fieldwork **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Evening

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, B Hlth Sci, UG Study Abroad Program.

In this unit students will learn about qualitative research techniques, such as in-depth interviewing and participant observation, which focus on the investigation of people's experiences and their interpretation of events. This unit examines the types of research questions for which these methods are best suited and provides training in data collection methods and analysis. The unit is conducted as a seminar in which students actively participate; students also work on a research project of their choice throughout the semester.

#### Textbooks

Silverman D, Doing Qualitative Research (2nd ed), Sage (2005)

### BACH4046

#### Survey Research Methods Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kate O'Loughlin **Session:** Semester 2 **Classes:** Monday, 5-8pm **Assessment:** Eight page essay (50%), 10 page essay (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Evening

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

This unit examines survey research design principles and considers conceptualisation, sampling, questionnaire construction and pilot testing of data collection instruments. Techniques for the collection, coding and key punching of survey data will be covered and students will gain experience with computer analysis of survey data. The strengths and limitations of survey data will be discussed.

### BACH4047

#### Developing a Research Project Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Rob Heard **Session:** Semester 1, Semester 2 **Classes:** On-campus, 3hrs/week or distance mode **Assessment:** Three assignments **Campus:** Cumberland **Mode of delivery:** Distance Education

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons, B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

The unit will provide an overview of the research process and focus on the formulation of a research proposal. It will provide students with an opportunity to review and update their knowledge of research methods and introduce the research electives that concentrate on a particular methodology or aspect of the research process. Basic research design issues will be considered. Various methods of data collection will be examined together with their suitability for investigating different types of research questions. Students will explore the use of quantitative and qualitative data, longitudinal and cross-sectional designs and data resulting from experimental interview, observation, single case and survey research methods in addition to content analysis and secondary data analysis. Emphasis will be placed on the issues of validity and reliability of data collection techniques. Basic statistical procedures will be briefly reviewed and applications such as epidemiology and evaluation research will be introduced.

### BACH4055

#### Intermediate Statistics Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Rob Heard **Session:** Semester 1 **Classes:** On-campus, 3hrs/week **Assessment:** Written assignment, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B B Hlth Sc, B B Hlth Sc (Hons), B Hlth Sc (Aborig Hlth & Comm Dev) Hons, B Hlth Sci.

In this unit, students will extend and consolidate the research methods and statistical skills acquired in BACH2115 Research Methods I and BACH3059 Research Methods II. Students will gain experience in data screening techniques, analysis of variance, multiple regression and non-parametric statistics. Students will learn how to use SPSS to conduct these statistical tests.

## BACH4056

### Qualitative Research Methods

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Cherry Russell **Session:** Semester 2 **Classes:** On-campus, 3hrs/week **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc, B B Hlth Sc (Hons), B Hlth Sc (Aborig Hlth & Comm Dev) Hons, B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

In this unit, students will learn about qualitative research techniques such as in-depth interviewing and participant observation which focus on the investigation of people's experiences and their interpretation of events. This unit examines the types of research questions for which these methods are best suited and provides training in data collection methods and analysis. The unit is conducted as a seminar in which students actively participate. In addition, students work on a research project of their choice throughout the semester.

## BACH4057

### Survey Research Methods

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Kate O'Loughlin **Session:** Semester 1, Semester 2 **Classes:** 3hr lecture/week **Assessment:** Three written assignments, due Wks 4, 8, 14 (33.3% ea) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc, B B Hlth Sc (Hons), B Hlth Sc (Aborig Hlth & Comm Dev) Hons, B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

This unit examines survey research design principles and considers conceptualisation, sampling, questionnaire construction and pilot testing of data collection instruments. Techniques for the collection, coding and key punching of survey data will be covered and students will gain experience with computer analysis of survey data. The strengths and limitations of survey data will be discussed.

## BACH4066

### Health and Cultural Pluralism

#### Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Zakia Hossain **Session:** Semester 1, Semester 2 **Classes:** Individual supervision **Assessment:** 4000 word project **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc (Hons), UG Study Abroad Program.

This unit examines the health values and experiences of young people from diverse cultures and their families in a multicultural society. Particular emphasis on multiculturalism, health care delivery, cultural difference in treatment and sickness behaviour of the population. Sociological analysis will be used to examine demographic issues, cultural values, sickness behaviour, family structures and community attitudes in preventative and remedial health care. Government policies and provisions will also be examined and the way in which these have responded to Australia's changing populations will be analysed.

## BACH4071

### Evidence Based Health Care Research

#### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kaye Brock **Session:** Semester 1, Semester 2 **Classes:** Thirteen 2hr lectures **Assumed knowledge:** BACH1139 Health and Research Design - General **Assessment:** Open book exam or 1500 word assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

One of the greatest challenges in modern health care is knowing how to use the results of research in the context of decision making regarding an individual client. This unit provides students with the skills necessary for critical reading of reviews prepared by Cochrane Collaboration concerned with the efficacy of interventions and aetiology of health outcomes.

## BACH4073

### Metabolic Epidemiology

## Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kaye Brock **Session:** Semester 1, Semester 2 **Classes:** 2hrs lectures, tutorials/week **Prerequisites:** HINT3032 Epidemiology **Assumed knowledge:** BACH1139 Health and Research Design - General **Assessment:** Open book exam or assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

Metabolic epidemiology is the study of the distribution and determinants of health outcomes associated with human metabolic status. Metabolic status can be defined variously by anthropometric measures (e.g., body measure of fat distribution), physiological measures (e.g., muscle strength, energy expenditure and exercise levels) and nutritional status (e.g., dietary intake). This unit provides students with the background and skills necessary for critical reading of profession-based papers in the clinical and research literature concerned with the efficacy of environmental interventions and the role of environment and metabolism with other factors in the aetiology of health outcomes.

## BACH4078

### Research Project 1

#### Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Dr Andrew Campbell **Session:** Semester 1 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day or Distance Education

**Associated degrees:** B B Hlth Sc (Hons).

Students will undertake a supervised research project. By the completion of this unit students will have collected data to answer a research question.

## BACH4079

### Research Project 2

#### Health Sciences

**Credit points:** 14 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 2 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day or Distance Education

**Associated degrees:** B B Hlth Sc (Hons).

Students will evaluate and interpret the findings of the research project commenced in BACH4078 Research Project 1.

## BACH4080

### Research Thesis Support

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 2 **Classes:** No formal classes: individual consultation as required **Prerequisites:** AHCD3016 Writing a Research Proposal, AHCD4052 Honours Workshop **Assessment:** 3000 word assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day or Distance Education

**Associated degrees:** B B Hlth Sc (Hons).

The aim of this unit is to assist with the final stage of writing the honours thesis. Students will complete a draft of the research thesis during this unit of study.

## BACH4082

### Research Project: Data Collection

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 1 **Classes:** Variable with project **Assessment:** Literature review (75%), research findings presentation (25%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available only to honours students*

**Associated degrees:** B B Hlth Sc (Hons), UG Study Abroad Program.

Students will undertake a supervised research project. By the completion of this unit, students will have collected data to answer a research question.

## BACH4083

### Research Project: Interpretation

## Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 2 **Classes:** Variable with project **Assessment:** Research thesis (journal article format) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc (Hons).

Student will evaluate and interpret the findings of the research project commenced in BACH4082 Research Project: Data Collection.

## BACH4084

### Special Investigation Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 2 **Prohibitions:** This unit is available only to honours students **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B B Hlth Sc (Hons).

Under the supervision of an academic staff member, students will conduct a detailed investigation in a relevant topic area. Mode of delivery will vary according to student numbers. Assessment tasks may also vary between topics, but total assessment load will be commensurate with FHS student workload guidelines.

## BBCL1001

### Biblical Studies 1 Arts

**Credit points:** 6 **Teacher/Coordinator:** Yael Avrahami **Session:** Semester 1 **Classes:** 3 hours per week. Attendance and participation in all lectures and tutorials is mandatory. **Assessment:** Class participation (10%), tutorial presentation and report (30%), research essay (30%), written exam (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

This unit provides an introduction to the study of the Bible including: textual, literary and structural criticism; the relevance of other academic disciplines to the study of the Bible; material from the Dead Sea Scrolls and other non-biblical texts. The first five books of the Bible are the focus of textual study in this semester. There are weekly tutorials at which students present papers.

## BBCL1002

### Biblical Studies 2 Arts

**Credit points:** 6 **Teacher/Coordinator:** Yael Avrahami **Session:** Semester 2 **Classes:** 3 hours per week. Attendance and participation in all lectures and tutorials is mandatory. **Assessment:** Class participation (10%), tutorial presentation and report (30%), research essay (30%), written exam (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

This unit focuses specifically on books of the Hebrew Bible such as Judges, Samuel and Kings. The course explores events of the period, the historiography of the texts, and religious and historical viewpoints conveyed. Attention will be directed to other relevant writings of the period in the Ancient Near East. There are weekly tutorials at which students present papers.

## BBCL2605

### Literature of Second Temple Judaism Arts

**Credit points:** 6 **Teacher/Coordinator:** Yael Avrahami **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** BBCL1001, BBCL1002 **Prohibitions:** BBCL2005 **Assessment:** 1.5 hour exam (equivalent to 1600 words, 35%), 1600 word essay (35%), other written assignments (equivalent to 1300 words, 30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit considers a range of biblical and extra-biblical texts composed during the Second Temple period (500 BCE - 100 CE). Students will read and analyse English translations of works originally composed

in Hebrew, Aramaic and Greek. Our critical approach to these texts will incorporate an examination of literary, historical and religious issues.

## BBCL2606

### Jewish Apocalyptic Literature Arts

**Credit points:** 6 **Teacher/Coordinator:** Yael Avrahami **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** BBCL1001, BBCL1002 **Prohibitions:** BBCL2006 **Assessment:** 1.5 hour exam (equivalent to 1600 words, 35%), 1600 word essay (35%), other written assignments (equivalent to 1300 words, 30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit considers biblical and extra-biblical apocalyptic writings of the Second Temple period of Judaism (c 500 BCE - 100CE). Apocalyptic works are concerned with the revelation of transcendent knowledge, especially eschatology and the nature of the heavenly realm. Texts will include the Book of Daniel from the Hebrew Bible, extra-biblical works such as the Book of Enoch, and, from the Christian Scriptures, the Book of Revelation. We will examine the development of the literary form of the apocalypse, and explore how these texts express religious, socio-cultural, and historical developments of the period.

## BBCL4011

### Biblical Studies Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Yael Avrahami **Session:** Semester 1, Semester 2 **Classes:** 4 hours per week **Prerequisites:** Credit average in 48 senior credit points from Hebrew, Biblical and Jewish Studies, or the equivalent in cross-listed units of study. These credit points must include 24 senior credit points from Biblical Studies and at least 12 senior credit points in Classical Hebrew. **Assessment:** Two 3 hour exams (70%), 15000 word thesis (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Int S (Hons).

First Semester: (i) Biblical and post-biblical texts (2 hours per week); (ii) Classical Hebrew; (iii) a special interest study will be pursued by students under supervision, leading to the writing of a 15,000 word honours thesis.

Second Semester: (i) Students will continue their study of biblical texts and early biblical interpretation with a focus upon a particular book or theme (2 hours a week); (ii) students will continue their study of Classical Hebrew (2 hours per week) at the appropriate level.

## BBCL4012

### Biblical Studies Honours B Arts

**Credit points:** 12 **Teacher/Coordinator:** Yael Avrahami **Session:** Semester 1, Semester 2 **Corequisites:** BBCL4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Int S (Hons).

See BBCL4011

## BBCL4013

### Biblical Studies Honours C Arts

**Credit points:** 12 **Teacher/Coordinator:** Yael Avrahami **Session:** Semester 1, Semester 2 **Corequisites:** BBCL4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Int S (Hons).

See BBCL4011

## BBCL4014

### Biblical Studies Honours D Arts

**Credit points:** 12 **Teacher/Coordinator:** Yael Avrahami **Session:** Semester 1, Semester 2 **Corequisites:** BBCL4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Int S (Hons).  
See BBCL4011

### BCHM2071 Protein Biochemistry Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Charles Collyer **Session:** Semester 1 **Classes:** Two 2 hour lectures per week, one 1 hour tutorial and one 4 hour practical per fortnight. **Prerequisites:** 12 credit points of Junior Chemistry and MBLG (1001 or 1901) **Corequisites:** Recommended concurrent units of study: MBLG2071 and BCHM2072 for progression to Senior Biochemistry. **Prohibitions:** BCHM2011, BCHM2971 **Assumed knowledge:** CHEM (1101 and 1102) **Assessment:** One 2hr theory and theory of practical exam, 2 prac reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study introduces biochemistry by describing the physical and chemical activities of proteins and their functions in cells. The details of protein interactions with other cellular components are presented and the relationship of protein structure and function is discussed. Techniques in protein chemistry and analysis, including proteomics are introduced together with key experiments which reveal the physical basis of the functioning of proteins. This course builds on the protein science presented in MBLG1001 and is ideally suited to students studying intermediate Chemistry together with Biochemistry. The practical course will nurture technical skills in biochemistry and will include protein preparation, the analysis of protein structure and enzymatic assays.

#### Textbooks

Lehninger Principles of Biochemistry 5th edition by Nelson and Cox  
Resources Manual for Biochemistry 2 Practical Sessions, Sem 1

### BCHM2072 Human Biochemistry Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Gareth Denyer **Session:** Semester 2 **Classes:** Two lectures per week, one tutorial per fortnight, and one 4 hour practical per fortnight **Prerequisites:** Either MBLG (1001 or 1901) and 12 credit points of Junior Chemistry or either MBLG2071 or MBLG2971 **Prohibitions:** BCHM2972, BCHM2002, BCHM2102, BCHM2902, BCHM2112 **Assessment:** One 3 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B Sc (Nutr), B E, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This unit of study aims to describe how cells work at the molecular level, with special emphasis on human biochemistry. The chemical reactions which occur inside cells are described in the first series of lectures, Cellular Metabolism. Aspects of the molecular architecture of cells which enable them to transduce messages and communicate are described in the second half of the unit of study. At every stage there is emphasis on the 'whole body' consequences of reactions, pathways and processes. Cellular Metabolism describes how cells extract energy from fuel molecules like fatty acids and carbohydrates, how the body controls the rate of fuel utilisation and how the mix of fuels is regulated (especially under different physiological circumstances such as starvation and exercise). The metabolic inter-relationships of the muscle, brain, adipose tissue and liver and the role of hormones in coordinating tissue metabolic relationships is discussed. The unit also discusses how the body lays down and stores vital fuel reserves such as fat and glycogen, how hormones modulate fuel partitioning between tissues and the strategies involved in digestion and absorption and transport of nutrients. Signal Transduction covers how communication across membranes occurs (i.e. via surface receptors and signaling cascades). This allows detailed molecular discussion of the mechanism of hormone action and intracellular process targeting. The practical component complements the lectures by exposing students to experiments which investigate the measurement of glucose utilisation using radioactive tracers and the design of biochemical assay systems. During the unit of study,

generic skills are nurtured by frequent use of computers and problem solving activities. However student exposure to generic skills will be extended by the introduction of exercises designed to teach oral communication, instruction writing and feedback articulation skills.

### BCHM2971 Protein Biochemistry (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Charles Collyer **Session:** Semester 1 **Classes:** Two 1 hour lectures per week, one 1 hour tutorial and one 4 hour practical per fortnight. **Prerequisites:** 12 credit points of Junior Chemistry and Distinction in MBLG1001 or MBLG1901 **Prohibitions:** BCHM2011, BCHM2071 **Assessment:** One 2 hour theory and theory of practical exam, online quizzes, practical assignments and laboratory book reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This advanced unit of study introduces biochemistry by describing the physical and chemical activities of proteins and their functions in cells. The details of protein interactions with other cellular components are presented and the relationship of protein structure and function is discussed. Techniques in protein chemistry and analysis, including proteomics are discussed together with key experiments which reveal the physical basis of the functioning of proteins. This course builds on the protein science presented in MBLG1001 and is ideally suited to students studying Intermediate Chemistry together with Biochemistry. The advanced practical course will nurture technical skills in protein biochemistry and will include protein preparation, the interpretation of protein structure, enzymatic assays and biochemical analysis.

### BCHM3071

#### Molecular Biology & Biochemistry- Genes Science

**Credit points:** 6 **Teacher/Coordinator:** Mrs Jill Johnston, Prof Merlin Crossley. **Session:** Semester 1 **Classes:** Two 1 hour lectures per week and one 6 hour practical per fortnight. **Prerequisites:** MBLG (1001 or 1901) and 12 CP of Intermediate BCHM/MBLG units (taken from MBLG2071/2971 or BCHM2071/2971 or BCHM2072/2972) or 42CP of Intermediate BMedSc units, including BMED2802 and BMED2804. **Prohibitions:** BCHM3971, BCHM3001,

BCHM3901 **Assessment:** One 2.5 hour exam, practical work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is designed to provide a comprehensive coverage of the activity of genes in living organisms, with a focus on eukaryotic and particularly human systems. The lecture component covers the arrangement and structure of genes, how genes are expressed, promoter activity and enhancer action. This leads into discussions on the biochemical basis of differentiation of eukaryotic cells, the molecular basis of imprinting, epigenetics, and the role of RNA in gene expression. Additionally, the course discusses the effects of damage to the genome and mechanisms of DNA repair. The modern techniques for manipulating and analysing macromolecules such as DNA and proteins and their relevance to medical and biotechnological applications are discussed. Techniques such as the generation of gene knockout and transgenic mice are discussed as well as genomic methods of analysing gene expression patterns. Particular emphasis is placed on how modern molecular biology and biochemical methods have led to our current understanding of the structure and functions of genes within the human genome. The practical course is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in molecular biology laboratories.

### BCHM3072

#### Human Molecular Cell Biology Science

**Credit points:** 6 **Teacher/Coordinator:** Mrs Jill Johnston, Prof Iain Campbell **Session:** Semester 2 **Classes:** One 2 hour lecture per week and one 6 hour practical per fortnight. **Prerequisites:** (MBLG (1001 or 1901) and 12 CP of Intermediate BCHM/MBLG units (taken from MBLG2071/MBLG2971 or BCHM2071/2971 or BCHM2072/2972)) or (42CP of Intermediate BMedSc units, including BMED2802 and BMED2804) **Prohibitions:** BCHM3972, BCHM3002, BCHM3902, BCHM3004, BCHM3904 **Assessment:** One 2.5 hour exam, practical work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: BExSci/BSc(Nutrition) students successfully progressing through the combined degree meet the pre-requisites for this unit of study*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B Sc (Nutr), B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study will explore the responses of cells to changes in their environment in both health and disease. The lecture course consists of four integrated modules. The first will provide an overview of the role of signalling mechanisms in the control of human cell biology and then focus on cell surface receptors and the downstream signal transduction events that they initiate. The second will examine how cells detect and respond to pathogenic molecular patterns displayed by infectious agents and injured cells by discussing the roles of relevant cell surface receptors, cytokines and signal transduction pathways. The third and fourth will focus on the life, death and differentiation of human cells in response to intra-cellular and extra-cellular signals by discussing the eukaryotic cell cycle under normal and pathological circumstances and programmed cell death in response to abnormal extra-cellular and intra-cellular signals. In all modules emphasis will be placed on the molecular processes involved in human cell biology, how modern molecular and cell biology methods have led to our current understanding of them and the implications of them for pathologies such as cancer. The practical component is designed to complement the lecture course, providing students with experience in a wide range of techniques used in modern molecular cell biology.

## Science

**Credit points:** 6 **Teacher/Coordinator:** Mrs Jill Johnston, Dr Joel Mackay  
**Session:** Semester 1 **Classes:** Two 2 hour lectures week and one 6 hour practical per fortnight. **Prerequisites:** MBLG (1001 or 1901) and 12 CP of Intermediate BCHM/MBLG units (taken from MBLG2071/2971 or BCHM2071/2971 or BCHM2072/2972) or 42CP of Intermediate BMedSc units, including BMED2802 and BMED2804. **Prohibitions:** BCHM3981, BCHM3001, BCHM3901 **Assessment:** One 2.5 hour exam, practical work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is designed to provide a comprehensive coverage of the functions of proteins in living organisms, with a focus on eukaryotic and particularly human systems. Its lecture component deals with how proteins adopt their biologically active forms, including discussions of protein structure, protein folding and how recombinant DNA technology can be used to design novel proteins with potential medical or biotechnology applications. Particular emphasis is placed on how modern molecular biology and biochemical methods have led to our current understanding of the structure and functions of proteins. It also covers physiologically and medically important aspects of proteins in living systems, including the roles of chaperones in protein folding inside cells, the pathological consequences of misfolding of proteins, how proteins are sorted to different cellular compartments and how the biological activities of proteins can be controlled by regulated protein degradation. The practical course is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in molecular biology and protein biochemistry laboratories.

This unit of study will explore the biochemical processes involved in the operation of cells and how they are integrated in tissues and in the whole human body in normal and diseased states. These concepts will be illustrated by considering whole-body aspects of energy utilisation, fat and glycogen storage and their regulation under normal conditions compared to obesity and diabetes. Key concepts that will be discussed include energy balance, regulation of metabolic rate, control of food intake, tissue interactions in fuel selection, the role of adipose tissue and transport of fuel molecules from storage organs and into cells. Particular emphasis will be placed on how the modern concepts of metabolomics, coupled with new methods, including magnetic resonance techniques, molecular biology methods and microarray technologies, as well as studies of the structure and function of enzymes, have led to our current understanding of how metabolic processes are normally integrated and how they become deranged in disease states. The practical component is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in modern medical and metabolic biochemistry.

## BCHM3092

### Proteomics and Functional Genomics

## Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Stuart Cordwell, Mrs Jill Johnston  
**Session:** Semester 2 **Classes:** Two 1 hour lectures per week and one 3 hour practical per week. **Prerequisites:** MBLG (1001 or 1901) and 12 CP of Intermediate BCHM/MBLG units (taken from MBLG2071/2971 or BCHM2071/2971 or BCHM2072/2972) or 42CP of Intermediate BMedSc units, including BMED2802 and BMED2804. **Prohibitions:** BCHM3992, BCHM3098 **Assessment:** One 2.5 hour exam, practical work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study will focus on the high throughput methods for the analysis of gene structure and function (genomics) and the analysis of proteins (proteomics), which are at the forefront of discovery in the biomedical sciences. The course will concentrate on the hierarchy of gene-protein-structure-function through an examination of modern technologies built on the concepts of genomics versus molecular biology, and proteomics versus biochemistry. Technologies to be examined include DNA sequencing, nucleic acid and protein microarrays, two-dimensional gel electrophoresis of proteins, uses of mass spectrometry for high throughput protein identification, isotope tagging for quantitative proteomics, high-performance liquid chromatography, high-throughput functional assays, affinity chromatography and modern methods for database analysis. Particular emphasis will be placed on how these technologies can provide insight into the molecular basis of changes in cellular function under both physiological and pathological conditions as well as how they can be applied to biotechnology for the discovery of biomarkers, diagnostics, and therapeutics. The practical component is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in proteomics and genomics.

### BCHM3992

#### Proteomics and Functional Genomics (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Stuart Cordwell, Mrs Jill Johnston  
**Session:** Semester 2 **Classes:** Two 1 hour lectures per week and one 3 hour practical per fortnight. **Prerequisites:** MBLG (1001 or 1901) and Distinction in 12 CP of Intermediate BCHM/MBLG units (taken from MBLG2071/2971 or BCHM2071/2971 or BCHM2072/2972) or 42CP of Intermediate BMedSc units, with Distinction in BMED2802 and BMED2804. **Prohibitions:** BCHM3092,

BCHM3098 **Assessment:** One 2.5 hour exam, practical work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study will focus on the high throughput methods for the analysis of gene structure and function (genomics) and the analysis of proteins (proteomics) which are at the forefront of discovery in the biomedical sciences. The course will concentrate on the hierarchy of gene-protein-structure-function through an examination of modern technologies built on the concepts of genomics versus molecular biology, and proteomics versus biochemistry. Technologies to be examined include DNA sequencing, nucleic acid and protein microarrays, two-dimensional gel electrophoresis of proteins, uses of mass spectrometry for high throughput protein identification, isotope tagging for quantitative proteomics, high-performance liquid chromatography, high-throughput functional assays, affinity chromatography and modern methods for database analysis. Particular emphasis will be placed on how these technologies can provide insight into the molecular basis of changes in cellular function under both physiological and pathological conditions as well as how they can be applied to biotechnology for the discovery of biomarkers, diagnostics, and therapeutics. The practical component is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in proteomics and genomics.

The lecture component of this unit of study is the same as BCHM3092. Qualified students will attend seminars/practical classes in which more sophisticated topics in gene expression and manipulation will be covered.

### BCHM4011

#### Biochemistry Honours A Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Entry into the School Honours program normally requires a credit average in a major relevant to the chosen project or relevant 24 credit points of senior study. The School will consider entry to students who do not have this requirement if their overall academic performance indicates an equivalent performance in other subject areas or if their SCIWAM exceeds 65.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons), B Sc (Nutrition)(Hons).

Students enrolled in the Honours program study various advanced aspects of Biochemistry. The program may include lectures, tutorials, seminars and practicals. Students will undertake a research project. Assessment will include the project and may include examination and coursework.

### BCHM4012

#### Biochemistry Honours B Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** BCHM4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Entry into the School Honours program normally requires a credit average in a major relevant to the chosen project or relevant 24 credit points of senior study. The School will consider entry to students who do not have this requirement if their overall academic performance indicates an equivalent performance in other subject areas or if their SCIWAM exceeds 65.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons), B Sc (Nutrition)(Hons).

See BCHM4011

### BCHM4013

#### Biochemistry Honours C

**Science**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** BCHM4012  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Entry into the School Honours program normally requires a credit average in a major relevant to the chosen project or relevant 24 credit points of senior study. The School will consider entry to students who do not have this requirement if their overall academic performance indicates an equivalent performance in other subject areas or if their SCIWAM exceeds 65.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons), B Sc (Nutrition)(Hons).

See BCHM4011

**BCHM4014****Biochemistry Honours D  
Science**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** BCHM4013  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Entry into the School Honours program normally requires a credit average in a major relevant to the chosen project or relevant 24 credit points of senior study. The School will consider entry to students who do not have this requirement if their overall academic performance indicates an equivalent performance in other subject areas or if their SCIWAM exceeds 65.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons), B Sc (Nutrition)(Hons).

See BCHM4011

**BHSC3013****Fieldwork Practicum  
Health Sciences**

**Credit points:** 4 **Teacher/Coordinator:** Dr Gary Lee **Session:** Semester 1, Semester 2 **Classes:** No classes: individual meetings with coordinator  
**Assessment:** Fieldwork report 3000 words (100%) **Practical field work:** Workplace attachment (3 weeks) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci.

In this unit, students will undertake a three week workplace attachment during the inter-semester break assessing health issues. The focus of the workplace attachment will depend on the student's (preliminary) core elective academic stream including environmental and occupational health or toxicology or health promotion. Students will develop, prior to the attachment, an approved learning contract that specifies the learning goals, strategies and outcomes expected from the attachment. Identification and organisation of the workplace attachment is the responsibility of the student who must ensure all ethical and legal requirement for the workplace are satisfied before they commence. Students will meet during semester to discuss their fieldwork experiences. Students will submit a detailed report of the workplace attachment, analysing the experience and learning outcomes. This unit is only available in the third year (full-time equivalent) of the program and subject to the approval of the course coordinator.

**BHSC3014****Honours Research Proposal  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Chin Moi Chow **Session:** Semester 2 **Classes:** No classes: individual meetings with research project supervisor  
**Assessment:** 3000 words (80%), seminar (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hons).

This unit is designed to assist honours student with the development of their individual research project for completion in Year 4. At the completion of this unit of study the student will have prepared a written proposal for a research project and a student grant application and ethics application, if appropriate. The development of the proposal and applications are undertaken in collaboration with an academic

supervisor. This unit is compulsory for students who have been accepted into the honours program.

**BHSC4001****Honours Research Seminar 1  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1 **Prerequisites:** BHSC3003 Honours Research Proposal or BHSC3014 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons).

Honours students undertake a research project in an area of specialised interest. Students will prepare and deliver a seminar on the progress of their research project to date, including a description of the research question, the process of investigation and a literature review.

**BHSC4002****Honours Research Seminar 2  
Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Prerequisites:** BHSC3003 Honours Research Proposal or BHSC3014 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons).

Honours students undertake a research project in an area of specialised interest. Students prepare and deliver a seminar on the progress of their research project to date with a focus on their findings and the implications of the findings.

**BHSC4003****Honours Thesis/Research Report A  
Health Sciences**

**Credit points:** 21 **Session:** Semester 1 **Corequisites:** BHSC4001 Honours Research Seminar 1 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons).

In this unit the student undertakes a research project in an approved topic area. The student implements, under the supervision of an academic staff member, the project designed in BHSC3003 Honours Research Proposal and submits either a thesis or a research report in a form suitable for submission to a refereed journal for publication. The choice of thesis or research report will be made in consultation with the student's academic supervisor.

**BHSC4004****Honours Thesis/Research Report B  
Health Sciences**

**Credit points:** 21 **Session:** Semester 2 **Corequisites:** BHSC4002 Honours Research Seminar 2 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons).

Honours students will complete their research project and submit either a thesis or research report in a form suitable for submission to a refereed journal for publication.

**BINF3101****Bioinformatics Project  
Science**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof L Jermin, Dr M Charleston **Session:** Semester 2 **Classes:** Meeting with academic supervisor 1 hour per week & class meeting 1 hour per week. **Prerequisites:** INFO3402 and 12 credit points from Intermediate Biology, Molecular Biology and Genetics, Biochemistry, Microbiology, Pharmacology **Prohibitions:** COMP3206, BINF3001, INFO3600, SOFT3300, SOFT3600, SOFT3200, SOFT3700 **Assumed knowledge:** INFO2110 and (INFO1103 or INFO1903) **Assessment:** Individual presentation, oral examination and group report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Sc, B Sc (Bioinformatics).

This unit will provide students an opportunity to apply the knowledge and practice the skills acquired in the prerequisite and qualifying units, in the context of designing and building a substantial bioinformatics

application. Working in groups, students will carry out the full range of activities including requirements capture, analysis and design, coding, testing and documentation.

### BINF3551

#### Bioinformatics Exchange

##### Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### BIOL1001

#### Concepts in Biology

##### Science

**Credit points:** 6 **Session:** Semester 1, Summer Main **Classes:** Three 1 hour lectures and one 3 hour practical per week. **Prohibitions:** BIOL1911 or 1101 or 1901 **Assumed knowledge:** None. However, students who have not completed HSC Biology (or equivalent) are strongly advised to take the Biology Bridging Course (in February). **Assessment:** One 2.5 hour exam, assignments, quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: It is recommended that BIOL (1001 or 1911) be taken concurrently with all other Junior units of study in Biology. Students who have completed HSC Biology and scored 80+ should enrol in BIOL1911. Students who lack 80+ in HSC Biology but have a UAI of at least 93 may enrol in BIOL1911 with permission from the UEO. The completion of MBLG 1001 is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Agr Ec, B An Vet Bio Sc, B Com, M B, B S, B E, B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M Rehab Cing, B Hort Sc, B L W Sc, B Med Sc, B N, B N (I A H), B N, B A, B N, B Sc, B Res Ec, B Sc, B Sc (Bioin).

Concepts in Biology is an introduction to the major themes of modern biology. The unit emphasizes how biologists carry out scientific investigations, from the cellular/molecular level to the level of ecosystems. Topics covered in lectures and practicals include: introductory cell biology, with particular emphasis on how cells obtain and use energy; the diversity and biology of microorganisms; an introduction to molecular biology through the role of DNA in protein synthesis, including current developments in DNA technology; genetics or organisms; theories of evolution and phylogenetic analysis, and how they are used to interpret the origins of the diversity of modern organisms; and interactions between organisms in biological communities, with emphasis on Australian ecology.

Knox R B et al. Biology, 3rd ed. McGraw-Hill. 2005

### BIOL1002

#### Living Systems

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 3 hour practical per week. **Prohibitions:** BIOL1902 **Assumed knowledge:** HSC 2-unit Biology. Students who have not undertaken an HSC biology course are strongly advised to complete a Biology Bridging Course (in February). **Assessment:** One 2.5 hour exam, assignments, quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: It is recommended that BIOL (1001 or 1911) be taken before this unit of study. This unit of study, together with BIOL (1001 or 1911) provides entry to all Intermediate units of study in biology in the School of Biological Sciences.*

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Agr Ec, B An Vet Bio Sc, B Com, M B, B S, B Hort Sc, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutri).

Living Systems deals with the biology of organisms, from bacteria to large plants and animals, and emphasises the ways in which they can live in a range of habitats. The importance of energy in living systems, and how elements are used and recycled in biological communities, are described. The unit of study includes lectures and laboratory

classes on the physiology of nutrition and growth, basic physiological processes of animals and plants, the ways in which organisms control and integrate their activities, and their reproduction. Finally applications of knowledge of genetics and ecology to practical problems in agriculture and conservation are introduced.

*Textbooks*

Knox R B et al. Biology. 3rd ed. McGraw-Hill. 2005

### BIOL1003

#### Human Biology

##### Science

**Credit points:** 6 **Session:** Semester 1, Summer Main **Classes:** Two 1 hour lectures per week (3 lectures in weeks 1 and 11). One 3 hour practical class and 6-9 hours HOnline work every two weeks covering online practical activities, prework and homework. **Prohibitions:** BIOL1903, EDUH1016. **Assumed knowledge:** HSC 2-unit Biology. Students who have not taken HSC biology are strongly advised to take the Biology Bridging Course in February. **Assessment:** One 2.5 hour exam, assignment, poster and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: It is recommended that BIOL (1001 or 1911) be taken concurrently with this unit of study.*

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Agr Ec, B Com, M B, B S, B E, B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cing, B Med Sc, B N, B N (I A H), B N, B A, B N, B Sc, B O H, B Pharm, B Pharm (Rural), B Res Ec, B Sc.

This Unit of Study has three main components: lectures, practicals and HOnline activities. The unit of study provides an introduction to human evolution and ecology, cell biology, physiology and anatomy, through lectures and practical work. The unit of study includes human nutrition, distribution of essential requirements to and from cells, control of body functions and defence mechanisms. After discussion of reproduction and development, it concludes with modern studies and research prospects in biotechnology and human genetics.

This unit of study, together with BIOL (1001 or 1911 or 1002 or 1902), or MBLG (1001 or 1901), provides entry to Intermediate units of study in Biology, but the contents of BIOL (1002 or 1902) is assumed knowledge for BIOL (2011 or 2012) and PLNT 2003, and students entering these units with BIOL (1003 or 1903) will need to do some preparatory reading.

This unit of study shares lectures and practical classes with BIOL1002 but also includes more demanding alternative components of Living Systems

*Textbooks*

As for BIOL1002.

**BIOL1903****Human Biology (Advanced)  
Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures per week (3 lectures in weeks 1 and 11). One 3 hour practical class and 6-9 hours HOnline work every two weeks covering online practical activities, prework and homework. **Prerequisites:** UAI of at least 93 and HSC Biology result in the 90+, or Distinction or better in a University level Biology unit, or by invitation. **Prohibitions:** BIOL1003, BIOL1904, EDUH1016 **Assessment:** One 2.5 hour exam, assignment, group project presentation, discussion activities and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Agr Ec, B Com, M B, B S, B Med Sc, B N, B N (I A H), B N, B A, B N, B Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is the same as BIOL1003 except for the addition of 3 special seminars from guest speakers, a three hour ethics and bioscience component and three student peer group case study presentations.

*Textbooks*

As for BIOL1003

**BIOL1911****Concepts in Biology (Advanced)  
Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 lectures & one 3 hrs prac/wk. **Prerequisites:** 80+ in HSC 2-unit Biology (or equivalent) or Distinction or better in a University level Biology unit, or by invitation. **Prohibitions:** BIOL (1001, 1101, 1901). **Assessment:** One 2.5hr exam, assignments, quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: It is recommended that BIOL (1001 or 1911) be taken concurrently with all other Junior units of study in Biology. The completion of MBLG1001 is highly recommended.*

**Associated degrees:** B Com, M B, B S, B Med Sc, B Sc, B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

Concepts in Biology (Advanced) builds on the main themes introduced in HSC Biology, with emphasis on current research in biology. Topics covered in lectures and practicals include: cell biology, with particular emphasis on how cells obtain and use energy; the diversity and biology of microorganisms; current developments in molecular biology, including recombinant DNA technology and the human genome project; inheritance, genetics and the origins of diversity of modern organisms; and interactions between organisms in biological communities, with emphasis on Australian ecology. Research-based lectures will expand on the general lecture topics and include current investigations of such diverse topic areas as cancer therapies, metabolic malfunction, anarchy in beehives, evolutionary studies of snake reproductive strategies, plant phylogeny and global environmental change.

*Textbooks*

As for BIOL1001.

**BIOL2011****Invertebrate Zoology  
Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr E May. **Session:** Semester 1 **Classes:** Two 1 hour lectures, one 1 hour tutorial and one 2 hour practical per week, or three 1 hour lectures and one 2 hour practical per week. **Prerequisites:** BIOL (1001 or 1911 or 1101 or 1901) and 6 additional credit points of Junior Biology (BIOL/MBLG/EDUH). 12 credit points of Junior Chemistry (or for students in the BSc[Marine Science] stream: 6 credit points of Junior Chemistry and 6 credit points of Junior Physics). **Prohibitions:** BIOL2911 **Assumed knowledge:** BIOL (1002 or 1902). **Assessment:** Mid-semester test, one 2 hour theory exam, one 1.5 hour prac exam, one essay, tutorial work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study may be taken alone, but when taken with BIOL2012 provides entry into certain Senior Biology units of study. The content of BIOL (1002 or 1902) is assumed knowledge and students entering without BIOL (1002 or 1902) will need to do some preparatory reading. The completion of 6 credit points of MBLG units of study is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit of study provides a thorough grounding in the diversity of animals by lectures and detailed laboratory classes, which include dissections and demonstrations of the functional anatomy of invertebrates. The material is presented within the conceptual framework of evolution and the principles and use of phylogeny and classification. Tutorials further explore concepts of phylogeny, animal structure and function, and provide opportunity to develop oral and written communication skills. The unit of study is designed to be taken in conjunction with BIOL2012 Vertebrates and their Origins; the two units of study together provide complete coverage of the diversity of animals at the level of phylum.

**BIOL2012****Vertebrates and their Origins  
Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr E L May **Session:** Semester 2 **Classes:** Two 1 hour lectures, one 1 hour tutorial and one 2 hour practical per week, or three 1 hour lectures and one 2 hour practical per week; one field trip. **Prerequisites:** BIOL (1001 or 1911 or 1101 or 1901) and 6 additional credit points of Junior Biology (BIOL/MBLG/EDUH). 12 credit points of Junior Chemistry (or for students in the BSc[Marine Science] stream: 6 credit points of Junior Chemistry and 6 credit points of Junior Physics). **Prohibitions:** BIOL 2912. **Assumed knowledge:** The content of BIOL (1002 or 1902) is assumed knowledge and students who have not completed BIOL (1002 or 1902) will need to do some preparatory reading. **Assessment:** Mid-semester test, one 2 hour theory exam, one 1.5 hour prac exam, one assignment, one essay, tutorial work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study may be taken alone, but when taken with BIOL2011 provides entry into certain Senior Biology units of study. The completion of MBLG1001 is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit of study completes the grounding in the diversity of animals at the level of phylum introduced in BIOL2011 Invertebrate Zoology, by lectures and detailed laboratory classes, which include dissections and demonstrations of the functional anatomy of vertebrates and invertebrate phyla not covered in BIOL2011. Tutorials further explore concepts of phylogeny, animal structure and function, and provide opportunity to develop oral and written communication skills. Students may choose to attend an intensive 3.5 day field trip, which takes place in the July break preceding Semester 2.

**BIOL2016****Cell Biology  
Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Murray Thomson. **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** 12 credit points of Junior Biology or equivalent, e.g. any combination of 2 units made from the following options, BIOL (1001 or 1101 or 1901 or 1911), BIOL (1002 or 1902), BIOL (1003 or 1903), BIOL (1904 or 1905), MBLG (1001 or 1901), EDUH1016, and 12 credit points of Junior Chemistry. For students in the BSc (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics. **Prohibitions:** BIOL2916. **Assessment:** One 3 hour theory

exam, one project assignment, one prac report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: The completion of MBLG1001 is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit of study focuses on contemporary principles in cell biology and development in plant and animals, with emphasis on cellular functions and favouring the molecular perspective. Topics include cancer and control of cell division and migration, pre-programmed cell death, molecular signaling and transport systems, cellular endocrinology and embryonic development. The practical component provides students with hands-on training in key industry techniques using modern equipment and is therefore of immense benefit to students contemplating honours study or a career in molecular and cellular research. The unit of study is designed to complement intermediate Molecular Biology and Genetics units and leads ideally to various senior units of study in biology, including Plant Growth & Development, Applications of Recombinant DNA Technology, Evolutionary Genetics & Animal Behaviour, Fungi in the Environment, Animal Physiology, Bioinformatics and Genomics, as well as senior units of study in biochemistry.

Alberts B, Johnson A, Lewis J, Raff M, Roberts K, Walter P. 2002. Molecular Biology of the Cell. 4th Edition. Garland Science.

### BIOL2017 Entomology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Dieter Hochuli **Session:** Semester 2 **Classes:** Two 1 hour lecture and one 3 hour practical per week. **Prerequisites:** BIOL (1001 or 1911 or 1101 or 1901 ) and 6 additional credit points of Junior Biology (BIOL/MBLG/EDUH). 12 credit points of Junior Chemistry (or for BSc (Marine Science) students 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics). **Prohibitions:** BIOL2917. **Assumed knowledge:** BIOL (2011 or 2911). **Assessment:** Two hour theory exam, two practical reports, spot test, review and an insect collection. **Practical field work:** The practical classes give students a working knowledge of the major orders of insects and species of importance, as well as principles of collection, preservation and identification. Project work considers forensic entomology, learning in social insects and insect behaviour. Field trips to the Australian Museum and Taronga Zoo will also consider insect husbandry and the role of insects in education. There will also be an introduction to entomological databases and an assignment that involves the making and presentation of a small collection of insects. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This is a general but comprehensive introduction to Insect Biology taught in 3 integrated modules. The first module examines morphology, classification, life histories and development, physiology, ecology, behaviour, conservation, and the biology of prominent members of major groups. The other two modules examine new developments in entomological research, focusing on research strengths at the University of Sydney, the biology of social insects and insect behaviour.

### BIOL2018 Introduction to Marine Biology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Adele Pile. **Session:** Semester 2 **Classes:** 2x1hr lectures per week, 6x1hr tutorials, 1x8hr field trip, 3x4hr field trips and 1x3hr practical. **Prerequisites:** BIOL (1001 or 1911 or 1101 or 1901) and 6 additional credit points of Junior Biology (BIOL/MBLG/EDUH). 12 credit points of Junior Chemistry (or for BSc (Marine Science) students 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics). **Prohibitions:** BIOL2918, MARS (2006 or 2906 or 2007 or 2907). **Assumed knowledge:** 12 credit points of Junior Biology; MARS2005. **Assessment:** Two hour theory exam, four written reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit will describe some of the ways in which the properties of the oceans affect marine organisms. It also introduces coral reefs and other marine ecosystems, together with their productivity, biological oceanography, the reproductive biology of marine organisms, and marine biological resources. The practical elements will provide the core skills and techniques that will equip students to perform laboratory and field studies in marine biology. The unit will introduce appropriate methodologies for the collection, handling and analysis of data; the scientific principles underlying experimental design; and the effective communication of scientific information.

Castro, P. and Humber, M. 2007. Marine Biology 4th Ed. McGraw-Hill Higher Education, Sydney.

### BIOL2554 Biology Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### BIOL2555 Biology Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### BIOL2556 Biology Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### BIOL2557 Biology Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### BIOL2911 Invertebrate Zoology (Advanced)

**Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr E May **Session:** Semester 1  
**Classes:** See BIOL2011 **Prerequisites:** Distinction average in BIOL (1001 or 1911 or 1101 or 1901) and 6 additional credit points of Junior Biology (BIOL/MBLG/EDUH). 12 credit points of Junior Chemistry (or for students in BSc[Marine Science] stream: 6 credit points of Junior Chemistry and 6 credit points of Junior Physics). These requirements may be varied and students with lower averages should consult the Unit Executive Officer **Prohibitions:** BIOL2011. **Assumed knowledge:** BIOL (1002 or 1902). **Assessment:** See BIOL2011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG units of study is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Qualified students will participate in alternative components of BIOL2011 Invertebrate Zoology. The content and nature of these components may vary from year to year.

**BIOL2912****Vertebrates and their Origins (Advanced)****Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr E May **Session:** Semester 2  
**Classes:** See BIOL2012 **Prerequisites:** Distinction average in BIOL (1001 or 1911 or 1101 or 1901) and 6 additional credit points of Junior Biology (BIOL/MBLG/EDUH). 12 credit points of Junior Chemistry (or for students in BSc[Marine Science] stream: 6 credit points of Junior Chemistry and 6 credit points of Junior Physics). These requirements may be varied and students with lower averages should consult the Unit Executive Officer **Prohibitions:** BIOL2012. **Assumed knowledge:** The content of BIOL (1002 or 1902) is assumed knowledge and students who have not completed BIOL (1002 or 1902) will need to do some preparatory reading. **Assessment:** See BIOL2012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of MBLG1001 is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Qualified students will participate in alternative components of BIOL2012 Vertebrates and their Origins. The content and nature of these components may vary from year to year.

**BIOL2916****Cell Biology (Advanced)****Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Murray Thomson. **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** Distinction average in 12 credit points of Junior Biology or equivalent, e.g. any combination of 2 units made from the following options, BIOL (1001 or 1101 or 1901 or 1911), BIOL (1002 or 1902), BIOL (1003 or 1903), BIOL (1904 or 1905), MBLG (1001 or 1901), EDUH1016, and 12 credit points of Junior Chemistry. For students in the BSc (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics. **Prohibitions:** BIOL2016. **Assessment:** One 3 hour exam, one practical report and one project assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of MBLG1001 is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Qualified students will participate in alternative components of BIOL2016 Cell Biology.

*Textbooks*

As for BIOL2016

**BIOL2917****Entomology (Advanced)****Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Dieter Hochuli. **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour practical per week. **Prerequisites:** Distinction average in BIOL (1001 or 1911 or 1101 or 1901) and 6 additional credit points of Junior Biology (BIOL/MBLG/EDUH). 12 credit points of Junior Chemistry (or for BSc (Marine Science) students: 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics). These requirements may be varied and students with lower averages should consult the Unit Executive Officer. **Prohibitions:**

BIOL2017. **Assumed knowledge:** BIOL (2011 or 2911). **Assessment:** Two hour theory exam, two practical reports, spot test, review and an insect collection. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Qualified students will participate in alternative components of BIOL2017, Entomology. The content and nature of these components may vary from year to year.

**BIOL2918****Introduction to Marine Biology (Adv)****Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Adele Pile. **Session:** Semester 2 **Classes:** 2x1hr lectures per week. 6x1hr tutorials, 1x8hr field trip, 3x4hr field trips and 1x3hr practical. **Prerequisites:** Distinction average in BIOL (1001 or 1911 or 1101 or 1901) and 6 additional credit points of Junior Biology (BIOL/MBLG/EDUH). 12 credit points of Junior Chemistry (or for BSc (Marine Science) students 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics). These requirements may be varied and students with lower averages should consult the Unit Executive Officer. **Prohibitions:** BIOL2018, MARS (2006 or 2906 or 2007 or 2907). **Assumed knowledge:** 12 credit points of Junior Biology; MARS2005. **Assessment:** Two hour theory exam, four written reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Entry is restricted and selection is made from applicants on the basis of previous performance.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as BIOL2018, Introduction to Marine Biology, and is suitable for students wishing to pursue aspects from the unit in greater depth. Students taking this unit will participate in alternatives to some elements of the ordinary level course and will be required to pursue the unit objectives by more independent means. Specific details of the unit will be announced in meetings, during the first week of teaching.

*Textbooks*

As for BIOL2018

**BIOL3006****Ecological Methods****Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Clare McArthur (UEO) **Session:** Semester 1 **Classes:** Two 1 hour lecture and one 3 hour laboratory per week. **Prerequisites:** 12 credit points of Intermediate Biology; or 6 credit points of Intermediate BIOL units and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3906, MARS3102 **Assumed knowledge:** BIOL (2011 or 2911 or 2012 or 2912) or PLNT (2002 or 2902). **Assessment:** One 2 hour exam 40%, practical assignments (including calculations, reports and reviews) 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit will consider ecology as a quantitative, experimental and theoretical science. It is concerned with the practical skills and philosophical background required to explore questions and test hypotheses in the real world. Application of ecological methods and theory to practical problems will be integrated throughout the unit of study. Lectures will focus on sound philosophical and experimental principles, drawing on real examples for demonstration of concepts, and will be useful as one basis for informed conservation and management of natural populations and habitats. Practical methods will include effective samplings, determining patterns of distribution and abundance, estimating ecological variables, and statistical analysing field data. Computer simulations and analyses will be used where appropriate.

### BIOL3007 Ecology Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Ross Coleman **Session:** Semester 2 **Classes:** Two 1 hour lecture and one 3 hour laboratory per week **Prerequisites:** 12 credit points of Intermediate Biology; or 6 credit points of Intermediate BIOL, and ENVI2111 or MARS2006; or 12 credit points of MARS units, including MARS2006 **Prohibitions:** BIOL3907, MARS3102 **Assumed knowledge:** Although not prerequisites, knowledge obtained from BIOL3006/3906, and BIOL3008/3908 and/or BIOL3009/3909, is strongly recommended. **Assessment:** One 2hr exam, presentations, essay, project report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit explores the dynamics of ecological systems, and considers the interactions between individual organisms and populations, organisms and the environment, and ecological processes. Lectures are grouped around four dominant themes: Interactions, Evolutionary Ecology, The Nature of Communities, and Conservation and Management. Emphasis is placed throughout on the importance of quantitative methods in ecology, including sound planning and experimental designs, and on the role of ecological science in the conservation, management, exploitation and control of populations. Relevant case studies and examples of ecological processes are drawn from marine, freshwater and terrestrial systems, with plants, animals, fungi and other life forms considered as required. Students will have some opportunity to undertake short term ecological projects, and to take part in discussions of important and emerging ideas in the ecological literature.

#### Textbooks

Ecology: an Australian Perspective (2003) Edited by P. Attiwill and B. Wilson. Oxford University Press.

### BIOL3008 Marine Field Ecology Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Ross Coleman **Session:** S2 Intensive **Classes:** Intensive 8 day-field course held in the pre-semester break. **Prerequisites:** 12 credit points of Intermediate Biology; or 6 credit points of Intermediate BIOL and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3908, MARS3102. **Assumed knowledge:** BIOL (3006 or 3906). Prior completion of one of these units is very strongly recommended. **Assessment:** Discussion groups, research project proposal, biodiversity survey report, data analysis and checking, research project report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Dates: 2 - 9 July 2009.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This field course provides a practical introduction to the experimental analysis of marine populations and assemblages. Students gain experience using a range of intertidal sampling techniques and develop a detailed understanding of the logical requirements necessary for manipulative ecological field experiments. No particular mathematical or statistical skills are required for this subject. Group experimental research projects in the field are the focus of the unit during the day, with lectures and discussion groups about the analysis of experimental data and current issues in experimental marine ecology occurring in the evening.

**Note:** Successful completion of BIOL3008/3908 and BIOL3007/3907 is a prerequisite for students wishing to proceed to Honours in Marine Ecology.

#### Textbooks

No textbook is prescribed but Coastal Marine Ecology of Temperate Australia. Eds. Underwood, A.J. & Chapman, M.G. 1995. University of New South Wales Press, provides useful background reading.

### BIOL3009 Terrestrial Field Ecology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Glenda Wardle **Session:** S2 Intensive **Classes:** One 6 day field trip held in the pre-semester break, and 4 practical classes during weeks 1-4 in Semester 2. **Prerequisites:** 12 credit points of Intermediate Biology or ANSC2004 and BIOM2001. **Prohibitions:** BIOL3909 **Assumed knowledge:** BIOL (3006 or 3906). Prior completion of one of these units is very strongly recommended. **Assessment:** Discussions and quiz (10%), research project proposal and brief presentation (10%), sampling project report (20%), specimen collection (10%), research project report (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: One 6 day field trip held in the pre-semester break (19 - 24 July 2009) and 4 practical classes during weeks 1-4 in Semester 2.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This field course provides practical experience in the experimental analysis of terrestrial populations and assemblages. Students learn a broad range of ecological sampling techniques and develop a detailed understanding of the logical requirements necessary for manipulative ecological field experiments. The field work incorporates survey techniques for plants, small mammals and invertebrates and thus provides a good background for ecological consulting work. Students attend a week-long field course and participate in a large-scale research project as well as conducting their own research project. Invited experts contribute to the lectures and discussions on issues relating to the ecology, conservation and management of Australia's terrestrial flora and fauna.

### BIOL3010 Tropical Wildlife Biology and Management Science

**Credit points:** 6 **Session:** S1 Intensive **Classes:** 5 day Field School, followed by 5 days of classes at Sydney University. **Prerequisites:** 12 credit points of Intermediate Biology (BIOL/ENVI/PLNT). **Prohibitions:** BIOL3910 **Assumed knowledge:** None, although BIOL2011/2911 would be useful. **Assessment:** One 2 hour exam, one 1 hour practical exam, a 2000 word practical, a 15 min oral presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Dates: 15 February - 20 February 2009 Northern Territory, followed by tutorials and practical classes at the University of Sydney 23 February - 27 February 2009.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B Ed (Sec), B Sc, B Ed (Sec:Science), B Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Due to its isolation from the rest of the world and unique evolutionary history, the Australian terrestrial vertebrate fauna (amphibians, reptiles, birds and mammals) is highly unusual, and hence has a lot to offer in the study of evolutionary processes. The rarity of some species and Australia's unusual climate and landforms present special challenges for the management of our native wildlife. This unit of study addresses the evolution, ecology and management of Australia's terrestrial fauna. The subject comprises a five-day field course in the Northern Territory, near Darwin, where students will learn field-based techniques in wildlife management, combined with lectures given by experts in the evolution, ecology and management of wildlife.

### BIOL3011 Ecophysiology Science

**Credit points:** 6 **Teacher/Coordinator:** UEO A/Prof Seebacher **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour laboratory per week. **Prerequisites:** 12 credit points of Intermediate Biology; or 6 credit points of Intermediate BIOL and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3911 **Assumed knowledge:** BIOL (2012 or 2912 or 2016 or 2916) or PLNT (2003 or 2903). **Assessment:** One 1.5 hour exam, field trip seminar, laboratory report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG units is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Ecophysiology is a conceptually based unit of study that covers physiological interactions between organisms and their environments. The unit focuses on the evolution of physiological capacities and how these may explain the ecology and biogeography of organisms. Lectures are based on the current primary literature. Lecturers have active research programs on the topics they cover and will present original research findings where appropriate. Examples are mainly from insects, vertebrates, and marine organisms. As part of the practical component, students design their own original research projects to be conducted during a week-end long field trip, and during self-directed laboratory sessions.

### BIOL3012 Animal Physiology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr M Thomson **Session:** Semester 1 **Classes:** Two 1 hour lectures, one 4 hour laboratory per week. **Prerequisites:** 12 credit points of Intermediate Biology including BIOL (2012 or 2912 or 2016 or 2916) or PLNT (2003 or 2903) **Prohibitions:** BIOL3912 **Assessment:** One 1.5 hour exam, laboratory/library reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG units is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

In this unit of study students explore how animal physiology is influenced by environmental factors. There is a strong emphasis on how modern research is expanding the field of physiology throughout a diverse array of vertebrates and invertebrates and the unit is designed to complement Ecophysiology. Particular emphasis will be placed on nutrition, animal behaviour, energy metabolism, endocrinology and neurobiology, as well as more exotic animal physiology such as electro-reception in sharks and infra-red detection of prey in snakes.

### BIOL3013 Marine Biology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Adele Pile **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour laboratory per week. **Prerequisites:** 12 credit points of Intermediate Biology, or 6 credit points of Intermediate BIOL and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3913 **Assumed knowledge:** BIOL 2018 or MARS2006 **Assessment:** Practical reports, paper criticisms and other assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG units is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

We will examine in detail processes that are important for the establishment and maintenance of marine communities. Lectures will expose students to the key ideas, researchers and methodologies within selected fields of marine biology. Laboratory sessions will complement the lectures by providing students with hands-on experience with the organisms and the processes that affect them. Students will develop critical analysis skills while examining the current literature.

### BIOL3017 Fungi in the Environment Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Peter McGee **Session:** S1 Intensive **Classes:** 40 hours of practicals in a two week intensive program held immediately prior to semester one (laboratory component each morning from 16-27 February 2009), plus the equivalent of 30 hours self-guided study during the semester. **Prerequisites:** 12 credit points of Intermediate Biology, or 6 credit points of Intermediate Biology and 6 Intermediate credit points of either Microbiology or Geography. **Prohibitions:** BIOL3917 **Assessment:** One 2 hour take home exam, laboratory and written assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Dates: 16-27 February 2009. The completion of 6 credit points of MBLG units is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

The unit is designed to develop understanding of fungal ecology in relation to environmental and rehabilitation biology, biological control of pests and pathogens, and soil microbiology. Emphasis will be placed on the function of fungi, and the benefit provided by fungi in symbiotic interactions with plants, including mycorrhizal fungi and shoot-borne endophytes. Physiological and ecological implications of the interactions will also be considered. Each student will design and implement a research project. Analytical thinking and research-led activity will be encouraged. Using broad scientific approaches, each student will gain the capacity to work cooperatively to find and analyse information from primary sources, develop approaches to test their understanding, and to present their work in a scientifically acceptable manner. Students will develop a deeper understanding of one area of fungal biology through independent study. Part of the learning material will be available on the internet.

### BIOL3018 Applications of Recombinant DNA Tech Science

**Credit points:** 6 **Teacher/Coordinator:** Dr B Lyon **Session:** Semester 1 **Classes:** Two 1 hour lectures per week; up to 4 hours laboratory per week. **Prerequisites:** 12 credit points from MBLG (2071/297), MBLG (2072/2972) and Intermediate Biology units. For BMedSc students: 36 credit points of Intermediate BMED units including BMED 2802. **Prohibitions:** BIOL3918 **Assessment:** One 2 hour exam, practical reports, assignment/seminar **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

A unit of study with lectures, practicals and tutorials on the application of recombinant DNA technology and the genetic manipulation of prokaryotic and eukaryotic organisms. Lectures cover the applications of molecular genetics in biotechnology and consider the impact and implications of genetic engineering. Topics include the cloning and expression of foreign genes in bacteria, yeast, animal and plant cells, novel human and animal therapeutics and vaccines including human gene therapy, new diagnostic techniques for human and veterinary disease, the transformation of animal and plant cells, the genetic engineering of animals and plants, and the environmental release of genetically-modified (transgenic) organisms. Practical work may include nucleic acid isolation and manipulation, gene cloning and PCR amplification, DNA sequencing and computer analysis of gene sequences, immunological detection of proteins, and the genetic transformation and assay of plants.

### BIOL3025 Evolutionary Genetics & Animal Behaviour Science

**Credit points:** 6 **Teacher/Coordinator:** Prof Oldroyd, A/Prof Beekman. **Session:** Semester 2 **Classes:** Two 1 hour lectures and up to 4 hours laboratory per week. **Prerequisites:** 12 credit points from (MBLG 2071/2971), MBLG (2072/2972) and Intermediate Biology units. For BMedSc students: 36 credit points of Intermediate BMED units including BMED2802. **Prohibitions:** BIOL3925 **Assessment:** One 1.5 hour exam, assignments, seminar **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

The unit of study covers the main themes of modern evolutionary theory including population genetics. In the practicals, students use molecular methods to quantify genetic variation in natural populations. Using these skills we will search for population subdivision and discuss how this can lead to speciation. Lectures will cover how the evolution of traits can be tracked using the comparative method. We will consider how studies of sex ratios, sexual selection, kin selection, game theory and quantitative genetics can illuminate the mechanisms by which animals have evolved, and explain why they behave as they do. We

will then consider if these themes have any relevance to human sociobiology. The unit also covers the role of genetics in conservation. There will be a field trip to collect organisms for population genetic analysis. There will be plenty of opportunity in the student seminars to examine the more controversial aspects of modern evolutionary thought.

### BIOL3026

#### Developmental Genetics Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Saleeba **Session:** Semester 2  
**Classes:** Two 1 hour lectures and up to 3 hours laboratory per week.  
**Prerequisites:** 12 credit points from MBLG (2071/2971) and MBLG (2072/2972). For BMedSc students: 36 credit points of Intermediate BMED units including BMED2802. **Prohibitions:** BIOL3926 **Assessment:** One 2 hour exam, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit discusses current understanding of developmental genetics with emphasis on molecular genetics. The developmental genetics of model plants and animals will be investigated. In particular, the molecular genetics of vertebrate development, pattern formation and gene expression, the study of mutants in development, plant specific processes such as root formation and flowering, will be covered making reference to modern techniques such as transgenics, recombinant DNA technology, and tissue-specific expression analysis. Various methods of genetic mapping will be covered. Practical work complements the theoretical aspects and develops important genetical skills.

### BIOL3027

#### Bioinformatics and Genomics Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Firth **Session:** Semester 1  
**Classes:** Two 1 hour lectures and up to 3 hours laboratory per week.  
**Prerequisites:** 12 credit points from MBLG (2071/2971), MBLG (2072/2972) and Intermediate Biology units. For BMedSc students: 36 credit points of Intermediate BMED units including BMED 2802. **Prohibitions:** BIOL3927 **Assessment:** One 2 hour exam, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

A unit of study comprising lectures, practical assignments and tutorials on the application of bioinformatics to the storage, retrieval and analysis of biological information, principally in the form of nucleotide and amino acid sequences. Although the main emphasis is on sequence data, other forms of biological information are considered. The unit begins with the assembly and management of nucleotide sequence data and an introduction to the databases that are normally used for the storage and retrieval of biological data, and continues with signal detection and analysis of deduced products, sequence alignment, and database search methods. Phylogenetic reconstruction based on distance-based methods, parsimony methods and maximum-likelihood methods is described and students are introduced to the idea of tree-space, phylogenetic uncertainty, and taught to evaluate phylogenetic trees and identify factors that will confound phylogenetic inference. Finally, whole genome analysis and comparative genomics are considered. The unit gives students an appreciation of the significance of bioinformatics in contemporary biological science by equipping them with skills in the use of a core set of programs and databases for "in silico" biology, and an awareness of the breadth of bioinformatics resources and applications.

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### **BIOL3557 Biology Exchange Science**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### **BIOL3906 Ecological Methods (Advanced) Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Clare McArthur (UEO) **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour laboratory per week **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology; or 6 credit points of Intermediate BIOL and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. These requirements may be varied and students with lower averages should consult the Unit Executive Officer. **Prohibitions:** BIOL3006, MARS3102 **Assumed knowledge:** BIOL (2011 or 2911 or 2012 or 2912) or PLNT (2002 or 2902). **Assessment:** One 2 hour exam 40%, practical assignments (including calculations, reports and reviews) 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as BIOL3006 Ecological Methods, and is suitable for students who wish to pursue certain aspects in greater depth. Entry is restricted, and selection is made from the applicants on the basis of their previous performance. Students taking this unit of study will participate in alternatives to some elements of the standard course and will be required to pursue the objectives by more independent means. Specific details of this unit of study and assessment will be announced in meetings with students in week 1 of semester 1. This unit of study may be taken as part of the BSc (Advanced) program.

*Textbooks*  
As for BIOL3006

### **BIOL3907 Ecology (Advanced) Science**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Ross Coleman (UEO) **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour laboratory per week. **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology; or 6 credit points of Intermediate BIOL and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3007, MARS3102 **Assumed knowledge:** Although not prerequisites, knowledge obtained from BIOL3006/3906, and BIOL3008/3908 and/or BIOL3009/3909, is strongly recommended. Students entering this unit of study should have achieved Distinction average. **Assessment:** One 2hr exam, presentations, essay, project report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as BIOL3007 Ecology, and is suitable for students who wish to pursue certain aspects in greater depth. Entry is restricted, and selection is made from the applicants on the basis of their previous performance. Students taking this unit of study will participate in alternatives to some elements of the standard course and will be required to pursue the objectives by more

independent means. Specific details of this unit of study and assessment will be announced in meetings with students in week 1 of semester 2. This unit of study may be taken as part of the BSc (Advanced) program.

*Textbooks*  
As for BIOL3007

### **BIOL3908 Marine Field Ecology (Advanced) Science**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Ross Coleman. **Session:** S2 Intensive **Classes:** One 8 day field course held in the pre-semester break, plus four 1 hour tutorials during semester 2. **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology; or 6 credit points of Intermediate Biology and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3008, MARS3102. **Assumed knowledge:** BIOL (3006 or 3906). Prior completion of one of these units is very strongly recommended. **Assessment:** Discussion groups, research project proposal, biodiversity report, data analysis and checking, research project report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Dates: 2 - 9 July 2009. Plus four 1 hour tutorials during semester 2.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as Marine Field Ecology BIOL3008, and is suitable for students wishing to pursue certain aspects of marine field ecology in a greater depth. Entry is restricted and selection is made from applicants on the basis of past performance. Students taking this unit of study will be expected to take part in a number of additional tutorials after the field course on advanced aspects of experimental design and analysis and will be expected to incorporate these advanced skills into their analyses and project reports. This unit may be taken as part of the BSc(Advanced).

*Note:* Successful completion of BIOL3008/3908 and BIOL3007/3907 is a prerequisite for students wishing to proceed to Honours in Marine Ecology.

*Textbooks*  
As for BIOL 3008.

### **BIOL3909 Terrestrial Field Ecology (Advanced) Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Glenda Wardle. **Session:** S2 Intensive **Classes:** 6 day field trip held in the pre-semester break and 4 practical classes during weeks 1-4 in Semester 2. **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology or ANSC2004 and BIOM2001 **Prohibitions:** BIOL3009. **Assumed knowledge:** BIOL (3006 or 3906). Prior completion of one of these units is very strongly recommended. **Assessment:** Discussions and quiz (10%), research project proposal and brief presentation (10%), sampling project report (20%), specimen collection (10%), research project report (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: One 6 day field trip held in the pre-semester break (19 - 24 July 2009) and 4 practical classes during weeks 1-4 in Semester 2.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as BIOL3009 Terrestrial Field Ecology, and is suitable for students who wish to pursue certain aspects in greater depth. Entry is restricted, and selection is made from applicants on the basis of previous performance. Students taking this unit of study will complete an individual research project on a topic negotiated with a member of staff. It is expected that much of the data collection will be completed during the field trip but some extra time may be needed during semester 2. Specific details of this unit of study and assessment will be announced in meetings with students at the beginning of the unit. This unit of study may be taken as part of the BSc (Advanced) program.

### **BIOL3910 Tropical Wildlife Biol & Management Adv**

## Science

**Credit points:** 6 **Session:** S1 Intensive **Classes:** 5 day Field School followed by 5 days of classes at Sydney University. **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology (BIOL/ENVI/PLNT). **Prohibitions:** BIOL3010 **Assumed knowledge:** None, although Vertebrates and their Origins would be useful. **Assessment:** One 2 hour exam, one 1 hour practical exam, a 2000 word practical report, one 15 min oral presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: 0*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as BIOL3010 Tropical Wildlife Biology and Management, and is suitable for students who wish to pursue certain aspects in greater depth. Entry is restricted, and selection is made from the applicants on the basis of their previous performance. Students taking this unit of study will participate in alternatives to some elements of the standard course and will be required to pursue the objectives by more independent means. Specific details of this unit of study and assessment will be announced in meetings with students at the beginning of the unit. This unit of study may be taken as part of the BSc(Advanced) program.

### BIOL3911

#### Ecophysiology (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** UEO A/Prof Seebacher **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour laboratory per week. **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology; or 6 credit points of Intermediate BIOL and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. These requirements may be varied and students with lower averages should consult the Unit Executive Officer. **Prohibitions:** BIOL3011 **Assumed knowledge:** BIOL (2012 or 2912 or 2016 or 2916) or PLNT (2003 or 2903) **Assessment:** One 1.5 hour exam, field trip seminar, independent project report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: The completion of 6 credit points of MBLG units is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Ecophysiology (Advanced) shares the same lectures as BIOL 3011 Ecophysiology, but it includes an independent project in place of the laboratory report (equivalent of 30% of Ecophysiology). The content and nature of the independent project varies and students are encouraged to design their own project.

### BIOL3912

#### Animal Physiology (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr M Thomson **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour laboratory per week. **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology including BIOL (2012 or 2912 or 2016 or 2916) or PLNT (2003 or 2903). These requirements may be varied and students with lower averages should consult the Unit Executive Officer. **Prohibitions:** BIOL3012 **Assessment:** One 1.5 hour exam, laboratory reports, independent project report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: The completion of 6 credit points of MBLG units is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Animal Physiology (Advanced) shares the same lectures as Animal Physiology, but it includes an independent project in place of one or more components of the laboratory classes to the equivalent of 30% of Animal Physiology. The content and nature of the independent project may vary from year to year.

### BIOL3913

#### Marine Biology (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Adele Pile **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour laboratory per week. **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology; or 6 credit points of Intermediate BIOL and ENVI2111 or MARS2006; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:**

BIOL3013 **Assumed knowledge:** BIOL2018 or MARS2006 **Assessment:** Practical reports, paper criticisms and other assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: The completion of 6 credit points of MBLG units is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Qualified students will participate in alternative components of the BIOL3103 Marine Biology unit. The content and nature of these components may vary from year to year.

### BIOL3917

#### Fungi in the Environment (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Peter McGee **Session:** S1 Intensive **Classes:** 40 hours of practical work in a two week intensive program immediately prior to semester one (labs run from 16 - 27 February 2009), plus the equivalent of 30 hours self-guided study during the semester. **Prerequisites:** Distinction average in 12 credit points of Intermediate Biology, or 6 credit points of Intermediate Biology and 6 Intermediate credit points of either Microbiology or Geography. **Prohibitions:** BIOL3017 **Assessment:** One 2 hour take home exam, research project, laboratory and written assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: The completion of 6 credit points of MBLG units is highly recommended.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Qualified students will be encouraged to develop a research project under supervision. The content and nature of the research will be agreed on with the executive officer.

### BIOL3918

#### Applications of Recombinant DNA Tech Adv

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr B Lyon **Session:** Semester 1 **Classes:** Two 1 hour lectures per week, and up to 4 hours laboratory per week. **Prerequisites:** Distinction average in 12 credit points from MBLG (2071/2971), MBLG (2072/2972) and Intermediate Biology units. For BMedSc students: 36 credit points of Intermediate BMED units including Distinction in BMED2802. **Prohibitions:** BIOL3018 **Assessment:** One 2 hour exam, assignment/seminar **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

Qualified students will participate in alternative components of BIOL3018 Applications of Recombinant DNA Technology. The content and nature of these components may vary from year to year.

### BIOL3925

#### Evolutionary Gen. & Animal Behaviour Adv

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Prof Oldroyd, A/Prof Beekman. **Session:** Semester 2 **Classes:** Two 1 hour lectures and up to 4 hours of laboratory per week. **Prerequisites:** Distinction average in 12 credit points from (MBLG2071/2971), (MBLG2072/2972) and Intermediate Biology units. For BMedSc students: 36 credit points of Intermediate BMED units including Distinction in BMED2802. **Prohibitions:** BIOL3025. **Assessment:** One 1.5 hour exam, assignments, seminar. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Qualified students will participate in alternative components of BIOL3025 Evolutionary Genetics and Animal Behaviour. The content and nature of these components may vary from year to year. Some assessment will be in an alternative format to components of BIOL3025.

### BIOL3926

#### Developmental Genetics (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Saleeba **Session:** Semester 2 **Classes:** Two 1 hour lectures and up to 3 hours of laboratory per week. **Prerequisites:** Distinction average in 12 credit points from MBLG (2071/2971),

and MBLG (2072/2972). For BMedSc students: 36 credit points of Intermediate BMED units including Distinction in BMED2802. **Prohibitions:** BIOL3026 **Assessment:** One 2 hour exam, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Qualified students will participate in alternative components to BIOL3026 Developmental Genetics. The content and nature of these components may vary from year to year. Some assessment will be in an alternative format to components of BIOL3026.

## BIOL3927

### Bioinformatics and Genomics (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Firth **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour laboratory per week. **Prerequisites:** Distinction average in 12 credit points from MBLG (2071/2971), MBLG (2072/2972) and Intermediate Biology units. For BMedSc students: 36 credit points of Intermediate BMED units including Distinction in BMED2802. **Prohibitions:** BIOL3027 **Assessment:** One 2 hour exam, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

Qualified students will participate in alternative components of BIOL3027 Bioinformatics and Genomics. The content and nature of these components may vary from year to year. Some assessment will be in alternative format.

## BIOL4012

### Biology Honours B Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** BIOL4011 or (BIOL4015 and BIOL4016) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

See BIOL4011 or BIOL4016

## BIOL4013

### Biology Honours C Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** BIOL4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

See BIOL4011 or BIOL4016

## BIOL4014

### Biology Honours D Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** BIOL4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

See BIOL4011 or BIOL4016

## BIOL4015

### Scientific Research in Biology Science

**Credit points:** 6 **Teacher/Coordinator:** Lecturers:- Prof S. Simpson, Prof B. Oldroyd, A/Prof R. Coleman, A/Prof M. Beekman, Dr. D. Hochuli, Dr. C. McArthur **Session:** Semester 1, Semester 2 **Classes:** 13 workshops **Prerequisites:** Pass degree in an area of Life Sciences or Equivalent **Corequisites:** BIOL4016 **Prohibitions:** BIOL4009, BIOL4010 **Assessment:** Research proposal (based

on University of Sydney Research and Development scheme) (50%). Written assignment to include data analysis and presentation of analysed results (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

Studies in Life Science investigate the dynamics of living organisms and span the levels of biological organization, from the ecosystem to the molecular. Research in the Life Sciences strives to offer explanations as to how organisms function, interact and evolve. A graduate Biologist must be conversant with a wide range of analytical techniques, including quantitative analysis as well as being able to communicate effectively about their research. Students must understand the logical structures which underpin analytical techniques, be able to design experiments based on understanding of biological processes and document their intended research. This course work unit provides the core skills and techniques that will equip students to perform a broad range of laboratory and field studies in biology, develop critical thinking and clear communication skills. Students will be introduced to the appropriate methodologies for data collection, handling and analysis which underpin the successful testing of biological hypotheses, and document their intended research as a grant proposal

## BIOL4016

### Biology Honours A Science

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Corequisites:** BIOL4015 **Prohibitions:** BIOL4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

Students enrolled in the Honours programs study various advanced aspects of Biology. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

## BIOM2001

### Biometry 2 Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Bishop **Session:** Semester 1 **Classes:** (2 lec, 1 workshop, 1x2 hr practical)/wk **Prerequisites:** BIOM1003 or (MATH1011 and MATH1015) **Assessment:** 1 2 hour theory exam (30%), 1 2 hour practical exam (30%), 1 written assignment (10%), weekly practical assignments (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

This unit of study is designed to introduce students to (i) analysing experiments where there are 3 or more treatment levels (ii) the modelling of regression relationships. It is a core unit for students in BScAgr, BHortSc, BLWSc and BAnVetBioSc, and builds upon the concepts learnt in BIOM1003. In the first part, students will investigate how to analyse experiments with more than 2 treatment levels, multiple factors and different blocking designs. In the second half they will learn to model relationships between response and predictor variables using regression. In addition they will learn about the scientific method

and the principles of experimental design. At the end of this unit, students will have learnt how to analyse data using ANOVA and regression, the basic methods needed for their future studies and careers. The students will gain research and inquiry skills through completion of weekly computer assignments and a written assignment on the scientific method. Information literacy and communication skills will be developed through weekly computer work.

#### Biometry 3

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Session:** Semester 1 **Classes:** (2 lec, 3 prac)/wk, individual research 1hr/wk **Prerequisites:** BIOM2001 or BIOM2002 **Prohibitions:** BIOM3005 **Assessment:** Reports (25%), assignment (20%), presentation (5%), theory/prac exam (50%). All open book. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc Agr.

This unit is designed for students who are interested in majoring in Biometry, or for students from other disciplines with an interest in further developing their skills in experimental design and advanced statistical modelling. It builds on the topics introduced in Biometry 2, and aims to give students sufficient skills and confidence to complete the analysis of their own research data in Fourth Year with a high degree of competence. We start by learning how to determine the number of replicates to use in an experiment. We revise multiple regression and extend the linear model to a time series system. We then examine how normally distributed data from designed experiments can be analysed in a general linear model framework, and hence how to cope with missing or incomplete data. The difference between maximum likelihood and residual maximum likelihood (REML) is studied for a single sample. A REML analysis is obtained for complete and incomplete factorial designs; for fixed, random and mixed models; for data collected from repeated observations on the same experimental unit. Next, we consider various techniques for the analysis of non-normal data, specifically: logistic regression for binary and proportion data; Poisson regression for count data; loglinear modelling for multi-way contingency tables; ordinal and nominal logistic regression for scores & ratings. The assignment is to design and analyse a 4th year experiment.

### BIOM3005

#### Environmetrics 3

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Bishop **Session:** Semester 1 **Classes:** (2 lec, 3 labs)/wk **Prerequisites:** BIOM2001 or BIOM2002 **Prohibitions:** BIOM3004 **Assessment:** 50% assignments, 3 hr open book exam 50%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr.

This unit is designed to give participants an opportunity to develop quantitative skills that are professionally relevant to the environmental sciences. Statistical computer packages, such as GenStat and Excel are used extensively to analyse environmental data sets. The unit commences with a revision of analysis of variance and regression; and an introduction to the ideas of sample size determination. Regression ideas are then extended to include the analysis of non-normal data via loglinear models and logistic regression. We next focus on environmental statistics, tackling the ideas of sampling strategies and environmental modeling. We also gain an introductory

knowledge of matrix algebra before considering trends in time and space in environmental data. Next we extend the idea of trends and correlation to consider time series, repeated measures and spatial analyses techniques. The unit will be based around two environmental datasets which will be used in both the lectures and the practicals.

As part of the learning outcomes of this unit the students completing this unit will have developed an understanding of the theory and techniques needed for the analysis and manipulation of environmental data; be able to develop a robust design for environmental sampling; have developed an understanding of the mathematics behind simulating processes in space and time; be able to use time series and spatial statistics to predict variables in time and space.

### BIOM3006

#### Statistics for the Natural Sciences

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Bishop **Session:** Semester 2 **Classes:** (2x1 hr workshops, 1x3 hr practical)/wk **Prerequisites:** BIOM2001 or STAT2012 or STAT2912 **Assessment:** 1x3 hour exam (40%), 1 major report (20%), weekly practical assignments (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

This unit of study is designed to introduced students to the analysis of data they may face in their future careers, in particular data that are not well behaved, they may be non-normal, there may be missing observations or they may be correlated in space and time. It is a core unit for students in BLWSc and is a prerequisite for those in BScAgr wishing to specialise in Environmetrics. It is also offered to BSc students wishing to complete an applied statistics unit. In the first part, students will learn about the generalisation of the linear regression and ANOVA model to accommodate non-normal data, mixtures of categorical and continuous data and non-linearities in the relationship between the response and predictor variables. In the second part, students will learn about stochastic processes and how to analyse (i) data that is correlated in space and time (ii) designed experiments with REML. At the end of this unit, students will have learnt a range of advanced statistical methods and be equipped to apply this knowledge to analyse data that they may encounter in their future studies and careers. The students will gain research and inquiry skills through completion of weekly computer assignments and a major report where they will analyse a 4th year research project. Information literacy and communication skills will be developed through weekly computer work and an oral presentation of the results from the major report.

### BIOM4003

#### Matrix Algebra and Linear Models

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Bishop **Session:** Semester 1 **Classes:** 3 lec/wk; individual research 3 hr/wk **Prerequisites:** BIOM3002 or BIOM3003 or BIOM3004 or BIOM3005 or equivalent **Assessment:** Assignment (50%), theory/prac exam (50%). All open book. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr.

So far in biometry, we have avoided the use of matrices in developing and explaining statistical and mathematical concepts. However, with more advanced work, it becomes far more convenient to express certain results in matrix notation. Matrices are not just used in statistics:

they find use in mathematical models in biology (e.g. age structured population growth models), engineering (e.g. structural perturbation analysis), and economic models (e.g. decision analysis). There are two aims to this course. Firstly, we will cover the basics of matrix algebra: matrix operations, special matrices (symmetric, orthogonal, idempotent), rank, determinants, inverses, eigenvalues and eigenvectors. Secondly we will see how we can apply these techniques to linear model problems - regression and ANOVA type situations, maximum likelihood and residual maximum likelihood. The course will also provide background for the multivariate analysis unit of study.

### BIOM4004

#### Applied Multivariate Analysis

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Bishop **Session:** Semester 1 **Classes:** 3 lec/wk; individual research 3 hr/wk **Prerequisites:** BIOM3002 or BIOM3003 or BIOM3004 or BIOM3005 or equivalent **Assessment:** Assignment (50%), theory/prac exam (50%). All open book. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr.

This course will introduce you to the main multivariate statistical techniques in common usage. While there will be some theoretical development in the course, the main focus will be on interpreting the results of the analysis, particularly in terms of explaining complex multi-dimensional data in terms of fewer dimensions. Since multivariate analysis by definition involves a treatment of at least two variables, there will be heavy use of matrix theory. Topics covered include multivariate normality, the likelihood ratio tests for independence of data variables, principal component analysis, discriminant analysis and Hotelling's T<sup>2</sup> for comparing two groups, multivariate analysis of variance (MANOVA), Canonical variate analysis, multivariate regression analysis, canonical correlations and correspondence analysis.

### BIOM4005

#### Biometrical Methods

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Bishop **Session:** Semester 1 **Classes:** 3 lec/wk; individual research 3 hr/wk **Prerequisites:** BIOM3002 or BIOM3003 or BIOM3004 or BIOM3005 or equivalent **Assessment:** Assignment (50%), Theory/Prac Examination (50%). All open book. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr.

This course introduces students to essential statistical and mathematical theory that should be at the fingertips of practising statisticians. Topics include a comprehensive review of statistical distributions and their properties; moments and moment generating functions; order statistics; bivariate and multivariate distribution theory; maximum and residual maximum likelihood estimation of parameters of these distributions; likelihood ratio tests; Taylor expansions and large sample variances. The theory is extended to regression and design problems: the mathematics of ANOVA, partitioning sums of squares, the theory of split plots and linear mixed models in general; log-linear modeling; Binomial, Poisson, ordinal and nominal logistic regression; spatial and nearest neighbour designs, intercropping experiments; meta analyses.

Many reference books exist in various Libraries.

### BIOS1126

#### Human Biology and Biochemistry Medicine

**Credit points:** 4 **Teacher/Coordinator:** Dr Diana Oakes **Session:** Semester 1 **Classes:** Three 1hr lectures/week **Assumed knowledge:** Basic Chemistry **Assessment:** Mid semester exam MCQ (20%), end semester exam MCQ (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Please contact Felicia Lim regarding enrolment into this Unit of Study: f.lim@usyd.edu.au*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Leis&Hlth), B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B App Sc (Orth), B App Sc (Orth), B App Sc (OT), B App Sc (Sp Path), B B Hlth Sc, B Hlth Sc (Hearing&Speech), B Hlth Sc (Rehab Cng), B H.

This unit of study introduces students to the biological and biochemical processes which are fundamental to life. The material covered in this unit forms the basis for subsequent biomedical and professional units of study. Knowledge gained in this unit will help students to understand principles of health and disease and the scientific basis for many of the professional practices they will undertake in their careers. The topics to be studied are divided into two areas: the basic processes fundamental to life and growth and development which is the outcome of the basic processes. The following topics are studied: the structure and function of cells, homeostasis, the basic chemical processes of life, the biochemistry of human function, energy and function (including metabolic processes and diseases), genetic code in health and disease (including basic genetics, protein synthesis and genetic diseases and counselling) and growth and development.

### BIOS1127

#### Body Systems I Medicine

**Credit points:** 3 **Teacher/Coordinator:** Dr Catherine Willis **Session:** Semester 2 **Classes:** Three 1hr lectures/week, three 2hr practical classes in the semester **Assumed knowledge:** BIOS1126 Human Biology and Biochemistry **Assessment:** 40min exam (25%), 2hr exam (75%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (OT), UG Study Abroad Program.

This unit builds on the foundation studies of BIOS1126 Human Biology and Biochemistry undertaken in Semester 1. It begins with the study of organ systems in the body, focusing on the cardiovascular and respiratory systems. In addition, the topics of infection control and immunology extend the concept of maintenance of homeostasis with discussion of the body's defenses and barriers to invading organisms. Some general concepts relating to the handling of drugs by the body are introduced and some drugs affecting the function of the autonomic nervous system will be discussed.

### BIOS1130

#### Molecules and Energy Medicine

**Credit points:** 4 **Teacher/Coordinator:** Dr Laura Batmanian **Session:** Semester 1 **Classes:** On-campus, 40hrs **Assumed knowledge:** Basic chemistry **Assessment:** Worksheets, mid semester exam (MCQ) (20%), end semester exam (MCQ/short answer) (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Please contact Felicia Lim regarding enrolment into this Unit of Study: f.lim@usyd.edu.au*

**Associated degrees:** B App Sc (Ex & Sp Sc), B App Sc (Phy), B App Sc (Phy), UG Study Abroad Program.

This unit presents aspects of the basic chemistry, biochemistry and physiology which underlie the normal function of the human body. The material covered will form the basis for subsequent biomedical and professional units of study. It will set the scene for understanding key issues such as the basic chemical processes of life, how we produce and use energy, how energy production relates to health and disease and the transmission of genetic information. The topics considered include the principles of homeostasis, general cellular structure and function, introductory chemistry and biochemistry, membrane structure and function, cell metabolism, cell division, protein synthesis and genetics.

### BIOS1132 Neuroscience I Medicine

**Credit points:** 3 **Teacher/Coordinator:** Dr Damian Holsinger **Session:** Semester 2 **Classes:** One 1hr and one 2hr lecture/wk, one 1hr tutorial/week **Assessment:** Mid semester exam (30%), end of semester exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Please contact Felicia Lim regarding enrolment into this Unit of Study: f.lim@usyd.edu.au*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (OT), B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M C V S, Health Sciences UG Cross Inst, UG Study Abroad Program.

This unit of study introduces the students to fundamental concepts of nervous system functioning and the structure of muscle tissue. Students are initially introduced to basic structure of the nervous system and neurones. This is followed by an understanding of basic electrical concepts underlying neural signals. The sites of signal transmission and communication in the nervous system, including central synapses, the neuromuscular junction and receptors are discussed. The structure, contractile process, mechanics and biochemistry of skeletal cardiac and smooth muscles are covered. The unit includes laboratory classes in which human cadavers are studied.

### BIOS1133 Body Systems: Structure and Function I Medicine

**Credit points:** 3 **Teacher/Coordinator:** Dr Ann Murphy **Session:** Semester 2 **Classes:** On-campus, 33hrs **Assumed knowledge:** BIOS1130 Molecules and Energy or CHEM1101 Chemistry IA or EXSS1031 Cell Metabolism & Biochemistry **Assessment:** Mid semester MCQ exam (20%), end semester MCQ exam (80%) plus formative assessment with feedback **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Please contact Felicia Lim regarding enrolment into this Unit of Study: f.lim@usyd.edu.au*

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (Phy), B App Sc (Phy), UG Study Abroad Program.

This unit will present the gross anatomy, functional histology and physiology of the cardiovascular and respiratory systems. The material covered in this unit forms the foundation for subsequent biomedical and professional units of study. This unit includes laboratory classes at which human cadaveric material is studied; attendance at such classes is strongly encouraged.

### BIOS1136 Functional Anatomy A Medicine

**Credit points:** 4 **Teacher/Coordinator:** Mr Darren Reed **Session:** Semester 1, Semester 2 **Classes:** On-campus, 42 hrs; online, 3 hrs **Assessment:** Mid semester exam (25%), end of semester practical exam (25%), end of semester exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Please contact Felicia Lim regarding enrolment into this Unit of Study: f.lim@usyd.edu.au*

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (OT), B App Sc (Phy), B App Sc (Phy), B Hlth Sc (Hons), B Hlth Sci, Health Sciences PG Non Award, Health Sciences UG Non-Award, UG Study Abroad Program.

This unit of study begins with an introduction to the study of anatomy with particular reference to the musculoskeletal system. A detailed study of the gross anatomical structure and functional anatomy of the upper limb will then be undertaken. In this unit of study we will also examine the histological features of the tissues of the musculoskeletal system and examine the ways in which some of these tissues are altered by varying activity states. Material will be presented in lectures, practical sessions and online. Students will also be expected to undertake some independent learning activities. This unit includes

laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged.

### BIOS1137 Introductory Neuroscience Medicine

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Freeman **Session:** Semester 1 **Classes:** Two 1hr lectures/week, 9hrs practical classes/semester **Assessment:** 1hr mid semester written exam (40%), 2hr end semester written exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Please contact Felicia Lim regarding enrolment into this Unit of Study: f.lim@usyd.edu.au*

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (Phy), B App Sc (Phy), B Hlth Sc (Hons), B Hlth Sci, Health Sciences UG Non-Award, UG Study Abroad Program.

This unit introduces students to the basic structure and function of the nervous system. The physiological aspects of the unit cover the mechanisms of signal generation and transmission in the nervous system, spinal reflexes, the somatosensory and autonomic nervous systems and the descending motor pathways. The anatomy component of the unit presents the basic structure of the spinal cord and the brain.

### BIOS1139 Functional Anatomy B Medicine

**Credit points:** 3 **Teacher/Coordinator:** Dr Catherine Willis **Session:** Semester 1 **Classes:** On-campus, 30hrs **Assumed knowledge:** BIOS1136 Functional Anatomy A **Assessment:** Intrasemester practical exam (35%), end semester exam (65%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (OT), B App Sc (Phy), B Hlth Sc (Hons), B Hlth Sci, Health Sciences PG Non Award, UG Study Abroad Program.

This unit of study begins with a detailed examination of the gross anatomical structure and functional anatomy of the lower limb. During the second half of the semester students will study the gross anatomy, and its functional applications, of the vertebral column thoracic cage and pelvis. Material will be presented in lectures, tutorials and practical sessions; students will also be expected to undertake some independent learning tutorials. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged.

Abrahams, Hutchings & Marks, McMinn's Colour Atlas of Human Anatomy (5th ed), Mosby Elsevier

### BIOS1141 Neuroscience II Medicine

**Credit points:** 3 **Teacher/Coordinator:** Dr Ros Bohringer **Session:** Semester 1 **Classes:** Three 1hr lectures/week, 2hr practical (5 weeks/semester- not blocks), three 1hr tutorials (3 weeks/semester- not blocks) **Assessment:** Mid semester exam (30%), end semester exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (OT), B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

This unit of study aims to provide basic understanding of the anatomy and physiology of neural structures. The anatomy of the spinal cord and the brain is presented and studied on models and human cadavers. The basic mechanisms of spinal reflexes and the function of the somatosensory system comprise the physiological aspects of the unit. Students are also introduced to the anatomy and physiology of the autonomic nervous system and motor pathways. Case studies

aimed at identifying simple neural problems associated with sensory and motor systems are specifically designed for the students of the profession.

### BIOS1144

#### Functional Anatomy B (Physiotherapy) Medicine

**Credit points:** 5 **Teacher/Coordinator:** Ms Jan Douglas-Morris **Session:** Semester 2 **Classes:** 3hr lecture, 2hr tutorial/week **Assumed knowledge:** BIOS1136 Functional Anatomy A **Assessment:** Practical exam (20%), end semester exam (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day or Distance Education

*Note: Department permission required for enrolment. Note: Please contact Felicia Lim regarding enrolment into this Unit of Study: f.lim@usyd.edu.au*

**Associated degrees:** B App Sc (Phy), UG Study Abroad Program.

This unit of study examines the detailed gross anatomical structure and functional anatomy of the lower limb, vertebral column, pelvis, thorax and neck, including the functional anatomy of gait. This is followed by an examination of the functional anatomy associated with chewing, swallowing and communication. In addition the embryological development of the musculoskeletal and cardiorespiratory systems of relevance to physiotherapists will be covered. Material will be presented in lectures and practical sessions on campus and in online tutorial sessions. In addition students will also be expected to undertake some independent learning activities. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged.

### BIOS1155

#### Structure, Function and Disease A Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Ann Murphy **Session:** Semester 1 **Classes:** Four 1hr lectures, one 2hr practical/week **Assessment:** 1hr mid semester assessment MCQ exam (40%), 2hr end semester assessment MCQ exam and 1hr MCQ exam (60%). Formative assessment provided **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B B Hlth Sc, B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M N, B O H, M Mid Res (Hons), UG Study Abroad Program.

This unit of study introduces the study of anatomy, physiology and pathophysiology. A detailed study of the normal function of the musculoskeletal, cardiovascular and respiratory systems is undertaken. This leads to a focus on the important diseases related to these systems and their effects on the body. The basic concepts of pharmacology will also be introduced to enable students to understand the action of drugs on each of the body systems as they are covered in this unit and in BIOS1158 Structure, Function and Disease B. Students are expected to complete computer-based, self-directed learning packages prior to some practical sessions. Material will be presented in lectures, tutorials and practical sessions. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged.

### BIOS1156

#### Human Biology and Radiobiology Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Diana Oakes **Session:** Semester 1 **Classes:** Four 1hr lectures/week **Assumed knowledge:** Basic chemistry **Assessment:** 2hr exam (70%), poster and talk presentation (30%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Please contact Felicia Lim regarding enrolment into this Unit of Study: f.lim@usyd.edu.au*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B B Hlth Sc, B Hlth Sci, B Hlth Sci, M N, B O H, UG Study Abroad Program.

This unit of study introduces students to the biological and biochemical processes that are fundamental to life. The material covered in this unit forms the basis of subsequent biomedical and professional units of study. Knowledge gained in this unit will help students to understand

principles of health and disease and the scientific basis for many of the professional practices they will undertake in their careers. The topics to be studied are divided into three areas; the basic processes fundamental to life, growth and development and radiation effects on these basic processes. The following topics are studied: structure and function of cells, homeostasis, basic chemical processes of life, biochemistry of human function, energy and function (including metabolic processes and diseases), genetic code in health and disease (including basic genetics, protein synthesis, and genetic diseases and counselling) and growth and development. In addition, radiation effect on biological systems at the cellular, tissue and organ levels, early and late effects, stochastic and non-stochastic effects will be covered. It concludes with a study of genetic effects, chromosome aberrations, genetic mutations and effects on pregnancy, the young and aged.

#### Introductory Health Physics Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Fazlul Huq **Session:** Semester 2 **Classes:** Three 1hr lectures/week, 1hr tutorial, 2hr practical/fortnight **Assessment:** Mid semester 1hr MCQ/SAQ exam (30%), end semester 2hr MCQ/SAQ exam (50%), practical work (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study provides a foundation for the physical concepts and devices used in medical radiation science. It commences with a study of the general principles of wave motion, optics, electricity and magnetism, electrical safety, basic electronics and the measurement of radiation. This provides the foundation on which to study devices used in medical radiation science such as ultrasonic transducers, linear accelerators, cyclotrons, oscilloscopes, televisions, optical fibres, liquid crystal displays, ionisation chambers, Geiger counters, scintillation counters, thermoluminescent dosimeters.

### BIOS1158

#### Structure, Function and Disease B Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Elizabeth Hegedus **Session:** Semester 2 **Classes:** Four 1hr lectures, one 2hr practical/week **Assessment:** 1hr exam (30%), 2hr exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M N, B O H, UG Study Abroad Program.

This unit of study examines the essential principles of infection control in health care practice and the immune system, highlighting its role in disease prevention and response to trauma. The part played by the immune system in producing disease is also covered. The normal structure and function of the digestive, urinary, reproductive, endocrine and nervous systems is described along with the pathophysiology of diseases associated with these systems. Specific diseases are studied because they are common and thus frequently encountered in practice, or because they provide significant insight into the reaction pattern of an injured organ. The bases for the management of these diseases will be examined. Material will be presented in lectures, tutorials and practical sessions. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged.

This unit of study presents a detailed study of the gross anatomical structure and functional anatomy of the lower limb, vertebral column, thorax and pelvis. Content will include application of anatomical principles to the analysis of movement. Students will be expected to undertake a number of independent learning activities including participating in online tutorials. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged. A module examining the analysis of integrated movements of upper and lower limbs will also be presented.

**BIOS1161****Biochemistry and Human Biology Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Diana Oakes **Session:** Semester 1 **Classes:** On-campus, 4hrs lectures/week **Assessment:** Mid semester exam (20%), end semester exam (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B B Hlth Sc, B Hlth Sci, B Hlth Sci, M N, B O H, M Mid Res (Hons), UG Study Abroad Program.

This unit of study introduces students to the biological and biochemical processes that are fundamental to life. The material covered in this unit forms the basis of subsequent biomedical and professional units of study. Knowledge gained in this unit will help students to understand principles of health and disease and the scientific basis for many of the professional practices they will undertake in their careers. The following topics are studied: structure and function of cells, homeostasis, basic chemical processes of life, biochemistry of human function, energy and function (including metabolic processes and diseases), genetic code in health and disease (including basic

genetics, protein synthesis, and genetic diseases and counselling) and growth and development. The application of these fundamental principles to developments in healthcare is examined.

**BIOS1163****Speech Science Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Helen Ritchie **Session:** Semester 1 **Classes:** Four 1hr lectures/week, 11 2hr pracs/semester **Assessment:** 1hr exam (30%), 2hr exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B Hlth Sci, UG Study Abroad Program.

This unit aims to provide an understanding of the anatomy, physiology and physics of speech. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is required.

**Textbooks**

**BIOS1166****Neuroscience I: Communication Disorders Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Damian Holsinger **Session:** Semester 2 **Classes:** 5hrs lectures, 2hr practicals/tutorials/week **Prerequisites:** BIOS1161 Biochemistry and Human Biology or BIOS1167 Human Cell Biology or BIOL1003 Human Biology **Assessment:** Mid and end semester exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students who have not completed Human Biology and Biochemistry or its equivalent will be required to attend additional tutorials*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M Rehab Cing, UG Study Abroad Program.

This unit of study includes fundamental concepts of nervous system functioning and muscle tissue. Anatomy of the brain and spinal cord is studied using models and human cadavers. Basic mechanisms of spinal reflexes and the function of the somatosensory sensory comprise the physiological component of the unit. Students are also introduced to the anatomy and physiology of the autonomic nervous system and motor pathways. Cases studies aimed at identifying simple neural problems associated with sensory and motor systems are specifically designed for students doing professional preparation degrees. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is required.

### BIOS1168

#### Functional Musculoskeletal Anatomy A Medicine

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3hr lectures, 2hr tutorial/week **Assessment:** Mid semester exam (25%), end semester practical exam (25%), end semester exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (OT), B App Sc (Phy), B Hlth Sci, UG Study Abroad Program.

This unit of study introduces the basic concepts in musculoskeletal anatomy prior to a more detailed study of the gross anatomical structure of the upper limb as it relates to functional activities. Students will also study the histological structure of musculoskeletal tissues and surface anatomy of the upper limb. Material will be presented in lectures, practical sessions and online. Students will also be expected to undertake some independent learning activities. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged.

### BIOS1169

#### Functional Musculoskeletal Anatomy B Medicine

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3hr lectures, 2hr tutorial/week **Prerequisites:** BIOS1168 Functional Musculoskeletal Anatomy A or BIOS1159 **Prohibitions:** BIOS1160 **Assessment:** Mid semester exam (25%), end semester practical exam (25%), end semester exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (OT), B App Sc (Phy), B Hlth Sci, UG Study Abroad Program.

This unit of study examines the detailed gross anatomical structure and surface anatomy of the lower limb, trunk and head and neck. Included are the anatomical analyses of functional activities which involve the lower limb, back and neck. Students will also look at the anatomical basis of chewing, swallowing and communication. Material will be presented in lectures, practical sessions and online. Students will also be expected to undertake some independent learning activities. This unit includes laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged.

### BIOS1170

#### Body Systems: Structure and Function Medicine

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Three 1hr lectures, one 2hr practical/week **Prohibitions:** BIOS1127 Body Systems I, BIOS1133 Body Systems: Structure & Function I, BIOS2098 Body Systems: Structure & Function II, BIOS2099 Body Systems II and Pharmacology **Assumed knowledge:** BIOS1167 Human Cell Biology or equivalent **Assessment:** Two formative assessments, mid semester exam (30%), end semester exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (OT), B App Sc (Phy), UG Study Abroad Program.

This unit will present the gross anatomy, functional histology, physiology and pathophysiology of the cardiovascular, respiratory and renal systems. Specific diseases of these systems that are commonly encountered in health care practice will be described. The unit will also cover the characteristics of the body's fluids and the concept of acid-base balance within the body. This unit includes laboratory classes at which human cadaveric material is studied; attendance at such classes is strongly encouraged.

#### Neuroscience Medicine

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Three 1hr lectures, 3hrs practical/week, with a small online component **Prohibitions:** BIOS1137 Introductory Neuroscience, BIOS2103 Neurosciences for Physiotherapists **Assessment:** Mid and end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (OT), B App Sc (Phy), B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M Rehab Cing, B Hlth Sci, M Rehab Cing.

This unit of study includes fundamental concepts of nervous system organization and function. Anatomy of the brain and spinal cord is studied using models to understand the cortical and subcortical pathways as well as integrating centres that control movement and posture. The physiology component introduces students to mechanisms of signal generation and transmission, basic mechanisms of spinal reflexes, the function of the somatosensory and autonomic nervous system and motor pathways. Case studies aimed at identifying simple neural problems associated with sensory and motor systems are specifically designed for students following professional preparation degrees.

### BIOS1172

#### Biological Aspects of Ageing Medicine

**Credit points:** 6 **Session:** Semester 1 **Classes:** Distance education mode: independent learning package with email support. No on-campus attendance required **Assumed knowledge:** Physiology of body systems **Assessment:** 2hr exam (50%), 2000 word essay (50%) **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** UG Study Abroad Program.

This unit of study examines the physiological changes associated with the normal processes of ageing and the decrease in functional capacity which occurs as a result. It will include a physiological explanation of ageing in relation to the cardiovascular, respiratory, immune, nervous, musculoskeletal, renal and endocrine systems and the skin. An understanding of the normal processes of ageing will help health professionals to interpret the ageing experience from the point of view

of the client, understand the functional limitations which result from ageing, and differentiate 'normal' from 'abnormal' ageing.

### **BIOS1173** **Disease in Ageing** **Medicine**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Distance education mode: independent learning package with email support. No on-campus attendance required **Assumed knowledge:** Physiology of body systems **Assessment:** 2hr exam (50%), 2000 word essay (50%) **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** UG Study Abroad Program.

This unit of study examines the disease processes and other physical health issues, which are important as people age. Students will study the factors which are responsible for the increased incidence of disease in the aged, the role of environmental factors in the development of disease, the relationships between disease and functional limitation, and the measures which can be taken to minimise the development and biological impact of disease. Students will also examine the relationships between the biomedical effects of ageing and sexuality. There will be in-depth consideration of one common disease of the aged, and its management in terms of prevention, treatment and residual disability.

### **BIOS2062** **Neuroscience II: Communication Disorders** **Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Roslyn Bohringer **Session:** Semester 1 **Classes:** 4hrs/week **Prerequisites:** BIOS1132 Neuroscience I and BIOS1141 Neuroscience II, or BIOS1166 Neuroscience **Assessment:** Mid semester exam (30%), final exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

This unit of study considers the development and anatomy of the brainstem and cranial nerves. The anatomy and physiology of special sensory systems and the control and integration of somatic motor activity with special reference to communication are explored comprehensively. Higher functions of the nervous system and adaptive properties as well as recovery of the nervous system after injury are also examined. Considerable emphasis is placed on the anatomical and physiological basis of neurological problems relating to communication disorders throughout the unit of study. This unit of study includes laboratory classes where tissues from human cadavers are examined in detail; attendance at such classes is required for the unit of study.

### **BIOS2098** **Body Systems: Structure & Function II** **Medicine**

**Credit points:** 3 **Teacher/Coordinator:** Dr Elizabeth Hegedus **Session:** Semester 1 **Classes:** Three 1hr lectures/week, weeks 1-10 **Assumed knowledge:** BIOS1130 Molecules and Energy or CHEM1101 Chemistry IA or CHEM1001 Fundamentals of Chemistry 1A **Assessment:** 30min MCQ exam (20%), 2hr MCQ/SAQ exam (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), B App Sc (Ex & Sp Sc), M N, UG Study Abroad Program.

This unit will present the gross anatomy, functional histology and physiology of the renal, digestive, reproductive and endocrine systems, with particular reference to adaptations occurring during exercise and the impact of exercise on system function where appropriate. In addition, immunology and immunological disorders will be covered.

### **BIOS2099** **Body Systems II and Pharmacology** **Medicine**

**Credit points:** 4 **Teacher/Coordinator:** Dr Elizabeth Hegedus **Session:** Semester 1 **Classes:** 3hr lectures/week for 13 weeks **Assumed knowledge:** BIOS1130 Molecules and Energy **Assessment:** Mid semester MCQ exam, end MCQ/SAQ semester exams, formative assessment with feedback **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phy), B App Sc (Phy), UG Study Abroad Program.

This unit will present the gross anatomy, functional histology and physiology of the renal, digestive, reproductive and endocrine systems, with particular reference to adaptations occurring during exercise and the impact of exercise on system function where appropriate. In addition, acid-base balance, pharmacology, immunology and immunological disorders will be covered.

### **BIOS2103** **Neurosciences for Physiotherapists** **Medicine**

**Credit points:** 3 **Teacher/Coordinator:** Dr John Burne **Session:** Semester 2 **Classes:** On-campus, 30hrs **Prerequisites:** BIOS1137 Introductory Neuroscience **Assessment:** Mid semester exam, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Phy), B App Sc (Phy), Health Sciences UG Non-Award, UG Study Abroad Program.

This unit provides an introduction to the anatomy and sensory physiology of the visual, auditory and nociceptive systems. The anatomy and physiology of the cortical and subcortical pathways and integrating centres that control movement and posture are summarized. The basic organization of the associative areas of the cerebral cortex is described and their role in sleep and memory introduced. Tissues from human cadavers will be studied; attendance at these classes is a subject requirement.

### **BIOS2111** **Introductory Toxicology** **Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Helen Ritchie **Session:** Semester 1 **Classes:** 3hrs/week **Assumed knowledge:** Any Junior Biology unit of study **Assessment:** Assignment, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, B Hlth Sci, M N.

This unit of study will introduce students to the classification and process of absorption and metabolism and effects of toxic environmental and industrial substances in the body. Topics will include a study of chemical principles related to toxicology, various toxic metals, gases, solvents, pesticides, carcinogens, air pollution, venoms and radiation. The student will be introduced to the principles of hazard identification and risk assessment. An underpinning of basic chemical principles will be included.

### **BIOS3042** **Biological Sciences IIIA** **Medicine**

**Credit points:** 2 **Teacher/Coordinator:** Ms Dana Strain **Session:** Semester 1 **Classes:** Distance education **Assessment:** As specified in learning contract **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B App Sc (Leis&Hlth), UG Study Abroad Program.

This unit of study will allow students to undertake study in four topic areas covering contemporary issues in health and human biology. It is expected that these areas will be of particular interest to students in their future professional roles. It will provide the opportunity to achieve confidence in dealing with biologically based material, to understand scientifically technical language and to interpret biologically based data.

### **BIOS3043** **Biological Sciences IIIB** **Medicine**

**Credit points:** 2 **Teacher/Coordinator:** Ms Dana Strain **Session:** Semester 2 **Classes:** Distance education **Prerequisites:** BIOS2096 Body Functions and Disease **Assessment:** As specified in learning contract **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B App Sc (Leis&Hlth), UG Study Abroad Program.

This unit of study will allow students to undertake study in four topic areas covering contemporary issues in health and human biology. It

is expected that these areas will be of particular interest to students in their future professional roles. It will provide the opportunity to achieve confidence in dealing with biologically based material, to understand scientifically technical language and to interpret biologically based data.

### **BIOS3054** **Contemporary Issues in Biomed Sciences** **Medicine**

**Credit points:** 4 **Teacher/Coordinator:** Dr Dana Strain **Session:** Semester 2 **Classes:** Students choose from 3 units which run online or distance modules **Assessment:** Students choose from 3 units which run online or distance modules. The assessment depends upon the choice made **Campus:** Cumberland **Mode of delivery:** On-line

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (Leis&Hlth)Hons, UG Study Abroad Program.

This unit of study will allow students to undertake study in three topic areas covering contemporary issues in health and human biology. It is expected that these areas will be of particular interest to students in their future professional roles. It will provide the opportunity to achieve confidence in dealing with biologically based material, to understand scientific technical language and to interpret biologically based data. Students enrolled in this unit of study will choose to work in one of the following areas: sexuality for health professionals; alternate health care or health disease and ageing. Assessments and instructional methodology will vary according to the topic selected.

### **BIOS3061** **Embryology & Genetics** **Medicine**

**Credit points:** 3 **Session:** Semester 2 **Classes:** 3hrs/week **Assumed knowledge:** BIOS1126 Human Biology and Biochemistry and BIOS2107 Ocular Biology II **Assessment:** 1hr exam (70%), presentation and report (30%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons.

An introduction to embryology and genetics, with particular reference to the structures of the head, orbit and eye.

### **BIOS3062** **Ocular Motor Systems** **Medicine**

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Freeman **Session:** Semester 2 **Classes:** 2hrs lectures/week **Assumed knowledge:** BIOS1141 Neuroscience II **Assessment:** 1hr mid semester exam (30%), 2hr end semester exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons. Neuroanatomy, physiology and plasticity of the ocular motor system.

### **BIOS3063** **Project Design and Management** **Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Gary Lee **Session:** Semester 1, Semester 2 **Classes:** 1hr lecture, 2hrs tutorial/week **Assessment:** 1500 word group report (70%), 1000 word individual report (30%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B B Hlth Sc, B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, B O H, UG Study Abroad Program.

This unit of study examines the principles and factors involved in the design and management of services, programs, and projects. Students will develop skills in planning, developing, implementing and evaluating projects as well as be given an introduction to financial management.

### **BIOS3065** **Anatomical Analysis of Exercise**

### **Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Karen Ginn **Session:** Semester 2 **Classes:** 1hr lecture, 2hr practical/tutorial class/week **Prerequisites:** BIOS1136 Functional Anatomy A or BIOS1159 Functional Anatomy A- Exercise Science and BIOS1160 Functional Anatomy B- Exercise Science or BIOS1144 Functional Anatomy B (Physiotherapy) or BIOS1139 Functional Anatomy B, or BIOS1168 Functional Musculoskeletal Anatomy A and BIOS1169 Functional Musculoskeletal Anatomy B **Assessment:** Formative assessment during practical classes and tutorials. Summative assessment: group project and presentation (40%), written exam (40%), contribution to class activities (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Preference will be given to students who have achieved graded passes in prerequisite units of study*

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (OT), B App Sc (Phy), B App Sc (Phy), B Hlth Sc (Hons), B Hlth Sci.

This unit of study will extend the student's knowledge of functional musculoskeletal anatomy by applying functional anatomy principles to the analysis of exercises. Relevant research and advanced knowledge of functional musculoskeletal anatomical concepts will be used to explore exercises designed to: strengthen and lengthen specific muscles; improve muscle coordination; develop dynamic stability; and prevent the development of muscle imbalances that may contribute to musculoskeletal injury. The application of musculoskeletal anatomy principles to increase exercise difficulty and variety will also be explored. This unit will include laboratory classes in which human cadavers are studied; attendance at such classes is strongly encouraged.

### **BIOS3066** **Current Issues in Healthcare** **Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Diana Oakes **Session:** Semester 1 **Classes:** 3hrs/week **Assessment:** Online assessment (20%), group work activities (40%), end semester exam (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M N, UG Study Abroad Program.

This unit introduces students to selected developments that are impacting, or are likely to impact, on the practice and management of the health care in Australia. Because health care is driven by a multitude of forces, the scope of the developments studied is broad. Topics to be covered will be drawn from the basic sciences applicable to health care, and health management. Examples of the topics under consideration include quality management in the manufacture of alternative health products, medical indemnity, the relationship between vaccination and disease, and psychoneuroimmunology. Because issues current in health care will change from year to year, student should consult with the unit of study coordinator to ascertain what will be covered in the unit in a particular year. Material will be presented in lectures, with use of self-directed learning and individual or group projects. The unit integrates units of study completed earlier in the program, thus enabling students to apply their knowledge while developing the skills needed to analyse, understand and anticipate future directions in health care.

### **BIOS3068** **Environmental Toxicology** **Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Diana Oakes **Session:** Semester 1, Semester 2 **Classes:** Three 1hr lectures/week **Prerequisites:** BIOS2111 Introductory Toxicology **Assessment:** 2hr end semester exam (45%), case study reports (55%) **Practical field work:** Two 2hr practicals/semester **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M N.

The unit examines the chemical principles related to toxicology and the effects of toxic agents on various body systems as well as developmental and reproductive toxicology, genetic toxicology and carcinogenesis as well as potential sources of injury in the environment, with particular emphasis on the workplace. Job analyses will be used to evaluate environmental exposures. The mode of

delivery will include lectures and practical sessions. In addition, the unit will be supported by case studies of toxic exposures in the workplace, learning materials (on-line worksheets) and assessment tasks that develop relevant generic skills (written communication).

### BIOS4035

#### Sexuality for Health Professionals

##### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Patricia Weerakoon **Session:** Semester 1, Semester 2 **Classes:** This unit is offered online. Attendance on campus is required only for the first session in Wk 1 of the semester **Assessment:** Group work assignment, individual assignment, online mastery type multiple-choice test **Campus:** Cumberland **Mode of delivery:** On-line  
*Note: This elective is only available to students in Year 2 or higher*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, B Hlth Sc (Hons), B Hlth Sc (Rehab Cing), B Hlth Sc (Rehab Cing) Hons, B Hlth Sci, UG Study Abroad Program.

This unit will examine the bio-psycho-social aspects of sexuality and health care, and assist health professionals to develop services for clients who have sexual or reproductive concerns. The course unit will provide a learning opportunity for the integration and application of prior learning in the disciplines involved. It will build on an existing knowledge base in the basic sciences and the professional disciplines. In addition, the students will be encouraged to examine their attitudes towards a range of sexual behaviours and develop skills in sexual history taking. Sexuality will be explored from a life cycle perspective. Sexual development will be traced from sexual differentiation to old age with consideration of the range of sexual expression at each stage. Students will explore normal and dysfunctional behaviour and available management options. They will be given the opportunity to explore individual interest areas in depth. Students will also be involved in experiential learning activities including value clarification exercises and off-campus experiences. Collaborative learning will be encouraged with online group discussions. Enrolment in this unit will be limited to 80 participants.

##### Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Vladimir Balcar **Session:** Semester 1 **Classes:** Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. **Prerequisites:** 42 credit points of Junior Bachelor of Medical Science units of study **Prohibitions:** All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) **Assessment:** One 2 hour theory exam; three in-semester assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc.

This unit of study begins with a discussion of the unique morphology of unicellular prokaryotic organisms (bacteria, fungi and viruses) followed by the structure and function of human cells. A strong understanding of cellular structures is essential for an appreciation of whole body function. Basic cell structure is examined by focussing on cell specialisation and tissue organisation in humans. The structure and function of excitable cells such as nerve and muscle will lead to a discussion of membrane potential, synaptic transmission and neuromuscular junction. The unit of study then gives an introduction into how gene expression is regulated during development, and how the cell cycle is controlled to coordinate programmed events such as differentiation and cell death. This allows discussion of the consequences and treatment of abnormal tissue growth (cancer).

Practical classes not only complement the lecture material but also introduce students to a wide range of technical skills, tissue processing and bacterial cultivation. In addition, the sessions are also designed to provide students with generic skills such as record keeping, data collection and presentation, protocol planning and written communication.

## BMED2802

### Molecular Basis of Medical Sciences Medicine

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Robin Allan **Session:** Semester 1 **Classes:** Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. **Prerequisites:** 42 credit points of Junior Bachelor of Medical Science units of study **Prohibitions:** All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) **Assessment:** One 2 hour theory exam; three in-semester assessments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc.

This unit of study extends pre-existing understanding of the way in which genetic information is stored, transmitted and expressed. Students will be introduced to the role of enzymes in the catalysis of cellular reactions and the pharmacological strategies employed to exploit our knowledge of these mechanisms is then discussed. Intracellular signalling cascades, cell to cell signalling and pharmacological intervention in these processes is covered. The molecular basis of drug action and the use of DNA technology in drug design will be discussed. Students will then cover the application of medical genetics to the study of advanced gene expression, recombinant technology, cloning and gene products, transgenics and the linkage and mapping of genes including reference to DNA fingerprinting and the human genome project and gene therapy.

The technical skills taught in the practical classes include the use of restriction enzymes, the separation of DNA molecules using electrophoresis, the inspection of chromosomes, linkage mapping, gene transfer and the measurement of gene expression. In addition to nurturing the skills involved in the design and execution of experiments, the practical sessions will formally teach students report writing skills and will give students practice at articulating feedback to their peers.

Genes IX (9th edition, Jones & Bartlett, 2008)

## BMED2803

### Cardiac, Respiratory and Renal Function Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Suzanne Ollerenshaw **Session:** Semester 1 **Classes:** Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. **Prerequisites:** 42 credit points of Junior Bachelor of Medical Science units of study **Prohibitions:** All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) **Assessment:** One 2hr theory exam; three in-semester assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc.

The maintenance of constant conditions in the human body is dependent on thousands of intricate control mechanisms. This unit of study examines many of those homeostatic processes with specific reference to major apparatus such as the respiratory, cardiovascular and renal. The structure and function of the cardiovascular system is discussed and cardiac output, blood pressure and blood flow are studied. Discussion of the respiratory system embraces the structure of the respiratory organs and description of the mechanism of the transport of gases to and from cells. Similar treatment of the renal system involves anatomical and histological investigation of kidney structure and a physiological description of kidney function.

Practical classes are designed to nurture the same generic attributes taught in BMED2801 and BMED2802 but, in addition, students are introduced to a wide range of anatomical and physiological technical skills. Specifically, students will investigate the structure and function of the heart and blood vessels, the components of the respiratory system and the kidney - all at the cellular and organ level. Students

will also conduct experiments (often on themselves) which show how heart rate and blood pressure are controlled, how breathing is regulated and how urine output is modulated in response to both physiological and pharmacological stimuli.

## BMED2804

### Digestion, Absorption and Metabolism Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Kim Bell-Anderson **Session:** Semester 2 **Classes:** Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. **Prerequisites:** 42 credit points of Junior Bachelor of Medical Science units of study **Prohibitions:** All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) **Assessment:** One 2 hour theory exam; three in-semester assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc.

This unit of study gives an introduction to the structures used to digest and absorb fuels, at both the anatomical and histological level. This is then followed by discussion of the utilisation and fate of absorbed nutrients. After an overview of the alimentary tract and associated organs, the detailed anatomy of the oral cavity, oesophagus, stomach, intestines, liver, etc is considered. This is complemented by description of the specialised cell types in the digestive system, discussion of the transport mechanisms employed to absorb nutrients, and consideration of the control systems used to regulate activity of the digestive process. The role of intestinal microflora in the gastrointestinal tract, contributing to both beneficial digestion and absorption of nutrients, as well as to pathogenic disruption, is also discussed in this unit of study. The fundamentals of metabolism are introduced, in particular, the chemical reactions that are responsible for fuel processing. The pharmacokinetic angle is explored further with discussion of the metabolism and absorption of drugs including the detoxification and excretion of xenobiotic compounds.

Practical classes give students extensive experience with inspection of the digestive system at both the cellular and gross anatomical level. The peristaltic reflex and pharmacological influences are explored. These sessions are designed to nurture observation, data analysis, record keeping and report writing skills.

## BMED2805

### Hormones, Reproduction and Development Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Miriam Frommer **Session:** Semester 2 **Classes:** Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. **Prerequisites:** 42 credit points of Junior Bachelor of Medical Science units of study **Prohibitions:** All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) **Assessment:** One 2 hr theory exam; three in-semester assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc.

This unit of study examines hormonal control of human body processes. Specifically, students will investigate the structure and function of endocrine glands: such as the pituitary, thyroid and pancreas - all at the cellular and organ level. Examples of the influence of hormones on metabolic processes are provided by consideration of fuel selection during exercise and starvation, and in diabetes and obesity. The fate of the macronutrients (carbohydrate, fat and protein) is then considered by reference to their uptake, disposal and reassembly into storage fuels and cellular structures. Biochemical pathways involved in the extraction of energy from the macronutrient fuels are then covered, with particular emphasis on the whole body integration and regulation of these metabolic processes. This leads on to discussion of performance enhancing drugs and also provides a solid background for the understanding of pharmacological intervention in these conditions. The hormones involved in reproduction, contraception, fertilisation and pregnancy are also discussed, leading on to foetal-new-born transition and the development of the human embryo and cell differentiation.

In the practical classes, students are introduced to a wide range of technical skills. Specifically, students will investigate the structure and

function of the important endocrine glands - all at the cellular and organ level. Students will design a biochemical kit for the evaluation of blood glucose and will perform a glucose tolerance test to investigate how glucose levels are regulated and modulated in response to a glucose load. In addition, sessions are designed to nurture oral presentation skills, hypothesis testing, data analysis, troubleshooting, instruction writing and feedback skills.

### BMED2806

#### Sensory and Motor Functions Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Richard Ward **Session:** Semester 1 **Classes:** Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. **Prerequisites:** 42 credit points of Junior Bachelor of Medical Science units of study **Prohibitions:** All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) **Assessment:** One 2 hour theory exam; three in-semester assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc.

This unit of study examines how neural and motor systems are adapted to sense and respond to changes in the external environment. After consideration of the basic anatomical organisation of the nervous and sensory systems, the way in which nerve signals are integrated and coordinated in response to external stimuli are covered in more detail. Various senses such as vision, touch and hearing are studied, together with a discussion on motor reflexes. The receptors involved in normal modes of communications are discussed before specific examples such as the fright and flight and stress responses are considered. This is complemented by discussion of the effects of drugs on the nervous system, with special reference to pain and analgesics. An appreciation is gained of how toxins and infections can perturb the normal neuromuscular co-ordination. Thus, pharmacological and pathological considerations, such as the use of poisoned arrows and muscle paralysis and viral and tetanus infections, are studied in concert with relevant physiological concepts.

In practical classes, students perform experiments (often on themselves) to illustrate the functioning of the senses and motor control and coordination involving both stretch and flexor reflexes. In addition, students extend their anatomical expertise by examining the structure and function of the nervous system and the skeleton (especially the vertebral column, the thorax and the limbs). Practical sessions also include the effects of analgesics on experimental pain and case studies of tetanus and botulism. The practical sessions draw widely on, and nurture, the generic skills taught in preceding units of study but particularly in BMED2804 and BMED2805.

### BMED2807

#### Microbes and Body Defences Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Allison Abendroth **Session:** Semester 2 **Classes:** Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. **Prerequisites:** 42 credit points of Junior Bachelor of Medical Science units of study **Prohibitions:** All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) **Assessment:** One 2hr theory exam; three in-semester assessments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc.

This unit of study begins by introducing the concepts of disease transmission, pathogenicity and virulence mechanisms of microbes. How the body deals with injury and infection is discussed by exploring host defences. Sections on wound healing, clotting and inflammation cover the response to physical damage and this is complemented by discussion of the pharmacological basis of anti-inflammatory agents and anti-coagulants.

For a full understanding of the process of infection, it is necessary to have an appreciation of the range of pathogens and injuries with which the body must cope. Therefore this unit of study examines the structure and function of pathogenic microorganisms (including bacteria, fungi, protists, and viruses, etc). The response of the body to pathogen invasion is studied by discussion of both molecular and cellular immune

responses. In particular, this gives students an appreciation of the structure, production and diversity of antibodies, the processing of antigens, operation of the complement system and recognition and destruction of invading cells. This allows students to appreciate the basis of derangements of the immune system and the mechanism of action of immuno-modulatory drugs.

Practical classes allow students to obtain experience in, and an understanding of, a range of techniques in classical and molecular virology, bacteriology and immunology. In addition, the practical sessions draw widely on, and nurture, the generic skills taught in preceding units of study.

### BMED2808

#### Disease in Society Science

**Credit points:** 6 **Teacher/Coordinator:** Helen Agus **Session:** Semester 2 **Classes:** Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. **Prerequisites:** 42 credit points of Junior Bachelor of Medical Science units of study **Prohibitions:** All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) **Assessment:** One 2hr theory exam; three in-semester assessments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc.

Disease in Society seeks to integrate basic knowledge of important diseases, ranging from metabolic diseases through airways and heart disease and cancer to infections. About half the unit considers infectious diseases: viral, bacterial, fungal and parasitic. The other half looks at inherited disorders, cardio-respiratory disorders such as angina, heart failure and asthma. Society's approaches to dealing with these diseases - whether by pharmacological intervention, counselling or lifestyle change are discussed. Putting the disease in the relevant social context is emphasized in all aspects of the unit.

The impact of bacteria and viruses on individuals and society is taught with reference to specific infectious diseases (eg influenza, polio, herpes, STDs, etc) and this leads into an introduction of epidemiology. Included in the discussion of the way in which these organisms cause and transmit disease is a consideration of how antibiotics and anti-viral drugs work and how microbes can become drug resistant.

Practical classes are designed to complement the lectures and provide a 'hands-on' experience in investigating disease. Also included are tutorial sessions in which hospital microbiologists guide students through clinical case studies and in an integrated session, students examine the infection, immunity and pathology of tuberculosis. These sessions are designed to nurture an appreciation of the importance of an integrative approach to the study of disease in today's society. The generic skills taught in preceding units of study are further reinforced.

## CAEL2003

### Warm Glass Elective Introductory Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The introductory Elective unit in Warm Glass provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum addressing concepts, methodologies and technologies integral to kiln fusing and slumping (Warm Glass).

## CAEL2004

### Warm Glass Elective Intermediate Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Prerequisites:** CAEL2003 **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This elective is designed to continue glass research at an intermediate level with a view to becoming self-directed.

The intermediate Elective unit in Warm Glass provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum addressing concepts, methodologies and technologies integral to kiln fusing and slumping (Warm Glass).

## CAEL2005

### Glass Flame Working Elective Intro Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The introductory Elective unit in Glass Flame-work provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum addressing concepts, methodologies and technologies integral to contemporary Glass Flame-work.

## CAEL2006

### Glass Flame Working Elective Inter Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Prerequisites:** CAEL2005 **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects

are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This elective is designed to continue glass research at an intermediate level with a view to becoming self-directed.

The intermediate Elective unit in Glass Flame-work provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum addressing concepts, methodologies and technologies integral to contemporary Glass Flame-work.

## CAEL2007

### Glass Casting Elective Introductory Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The introductory unit in casting glass provides a studio-based approach to the production of creative work. It will give students a basic understanding of open-face glass casting through practical experience with clay modelling, simple mould-making (investing), firing and basic cold working.

Throughout the semester students will, in consultation with a tutor, follow a project-based curriculum that addresses concepts, methodologies and technologies integral to contemporary Glass.

## CAEL2008

### Glass Casting Elective Intermediate Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Prerequisites:** CAEL2007 **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This elective is designed to continue glass research at an intermediate level with a view to becoming self-directed.

The intermediate unit in casting glass provides a studio-based approach to the production of creative work. It will give students a basic understanding of open-face glass casting through practical experience with clay modelling, simple mould-making (investing), firing and basic cold working.

## CAEL2009

### Hot Glass Elective Introductory Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical

review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The Introductory Elective unit in Hot Glass provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum addressing concepts, methodologies and technologies integral to contemporary hot glass.

## CAEL2010

### Hot Glass Elective Intermediate Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Prerequisites:** CAEL2009 **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This elective is designed to continue glass research at an intermediate level with a view to becoming self-directed.

The Intermediate Elective unit in Hot Glass provides a studio-based approach to the production of creative work. Throughout the semester students will in consultation with an academic staff member, follow a project-based curriculum addressing concepts, methodologies and technologies integral to contemporary hot glass.

## CAEL2022

### Electronic & New Media Art Elective Intr Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Steven Lojewski **Session:** Semester 1, Semester 2 **Classes:** 2 hours per week and a minimum 3 hours of independent study outside of class, **Assessment:** Assessment is progressive throughout the semester, taking into consideration attendance at scheduled classes and the meeting of deadlines and any other requirements that may be set. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum addressing concepts, methodologies and technologies integral to electronic and new media art. Thematic approaches will be supported by technical introductions to encourage exploration with electronic and new media art methodologies. The unit provides for the development and enhancement of critical skills through group and individual tutorials and critiques and through the acquisition of technical skills appropriate to the assigned projects.

## CAEL2028

### Artist in Residence 1 Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Jane Gavan **Session:** Semester 1, Semester 2 **Classes:** Depends on visiting artist **Assessment:** This unit has a pass/fail grading result. Method of assessment to be advised by Chair of individual subject areas. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission to enrol required. See Academic Advisor*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit draws on the SCA artists-in-residence program to develop analyses, and a practical understanding, of how new work is developed. Visiting artists will propose and run programs that are primarily research-led learning experiences for students.

The program is offered according to visiting artists' availability and scheduled activities in semester one or two. The learning activities for this unit may be intensive over a short period, and timetables will be available through the chair of each subject area.

## CAEL3002

### Warm Glass Elective Advanced Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Prerequisites:** CAEL2004 **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit is designed for students to undertake self-directed work . It is expected that students will develop proposal related projects specific to the sub discipline area of the elective they have chosen.

The Advanced Elective follows a self-directed curriculum addresses concepts, methodologies and technologies integral to kiln fusing and slumping (Warm Glass).

## CAEL3003

### Glass Flame Working Elective Advanced Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Prerequisites:** CAEL2006 **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit is designed for students to undertake self-directed work . It is expected that students will develop proposal related projects specific to the sub discipline area of the elective they have chosen.

The Advanced Elective follows a self-directed curriculum addresses concepts, methodologies and technologies integral to contemporary Glass Flame-work.

## CAEL3004

### Glass Casting Elective Advanced Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Prerequisites:** CAEL2008 **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit is designed for students to undertake self-directed work . It is expected that students will develop proposal related projects specific to the sub discipline area of the elective they have chosen.

The Advanced unit in casting glass provides a studio-based approach to the production of creative work. It will give students a basic understanding of open-face glass casting through practical experience with clay modelling, simple mould-making (investing), firing and basic cold working.

Throughout the semester students will, in consultation with a tutor, follow a self-directed curriculum that addresses concepts, methodologies and technologies integral to contemporary casting in Glass.

## CAEL3005

### Hot Glass Elective Advanced

## Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1, Semester 2 **Classes:** 2 hours contact and a minimum of 2 hours of independent study **Prerequisites:** CAEL2010 **Assessment:** Assessment is continuous and culminates with an end of semester assessment where projects are presented for critical review. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit is designed for students to undertake self-directed work. It is expected that students will develop proposal related projects specific to the sub discipline area of the elective they have chosen.

The Advanced Elective unit in Hot Glass provides a studio-based approach to the production of creative work. Throughout the semester students will in consultation with an academic staff member, follow a self-directed curriculum addressing concepts, methodologies and technologies integral to contemporary hot glass.

## CAEL3013

### Artist in Residence 2

#### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Jane Gavan **Session:** Semester 1, Semester 2 **Classes:** Depends on visiting artist **Prerequisites:** CAEL2028 **Assessment:** This unit has a pass/fail grading result. Method of assessment to be advised by Chair of individual subject areas. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit draws on the SCA artists-in-residence program to develop analyses, and a practical understanding, of how new work is developed. Visiting artists will propose and run programs that are primarily research-led learning experiences for students.

The program is offered according to visiting artists' availability and scheduled activities in semester one or two. The learning activities for this unit may be intensive over a short period, and timetables will be available through the chair of each subject area.

## CAEX2001

### Ceramics C Studio Extension

#### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Jan Guy **Session:** Semester 1 **Classes:** 3 hrs per week plus 3-6 hours outside of class including research and field work **Corequisites:** MSTD2511 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Ceramics Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Ceramics Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Ceramics studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

## CAEX2002

### Glass C Studio Extension

#### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work **Corequisites:** MSTD2521 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Glass Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Glass Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Glass studio

discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

## CAEX2003

### Jewellery and Object C Studio Extension

#### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Bridie Lander **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD2531 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Jewellery and Object Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Jewellery and Object Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Jewellery and Object studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

## CAEX2004

### Painting C Studio Extension

#### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Dr Debra Dawes **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work **Corequisites:** MSTD2541 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Painting Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Painting Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Painting studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

## CAEX2005

### Printmedia C Studio Extension

#### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Justin Trendall **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD2551 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Printmedia Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Printmedia Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Printmedia studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

## CAEX2006

### Sculpture C Studio Extension

#### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Dr Adam Geczy **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD2561 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Sculpture Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Sculpture Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Sculpture studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

### CAEX2007 Photomedia C Studio Extension Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Steven Lojewski **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work **Corequisites:** MSTD2571 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Photomedia Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Photomedia Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Photomedia studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

### CAEX2008 Film and Digital Art C Studio Extension Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Josephine Starrs **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work **Corequisites:** MSTD2581 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Film & Digital Art Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Film & Digital Art Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Film & Digital Art studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

### CAEX2009 Ceramics D Studio Extension Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Jan Guy **Session:** Semester 2 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. Co-requisites: one of **Corequisites:** MSTD2512 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Ceramics Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Ceramics Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Ceramics studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

### CAEX2010 Glass D Studio Extension Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 2 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD2522 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Glass Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Glass Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Glass studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

### CAEX2011 Jewellery and Object D Studio Extension Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Bridie Lander **Session:** Semester 2 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work **Corequisites:** MSTD2532 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Jewellery and Object Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Jewellery and Object Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Jewellery and Object studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

### CAEX2012 Painting D Studio Extension Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Dr Debra Dawes **Session:** Semester 2 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work **Corequisites:** MSTD2542 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Painting Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Painting Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Painting studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

### CAEX2013 Printmedia D Studio Extension Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Justin Trendall **Session:** Semester 2 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work **Corequisites:** MSTD2552 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Printmedia Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Printmedia Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Printmedia studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

### CAEX2014 Sculpture D Studio Extension Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Dr Adam Geczy **Session:** Semester 2 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work **Corequisites:** MSTD2562 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Sculpture Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Sculpture

Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Sculpture studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

#### CAEX2015

##### Photomedia D Studio Extension

##### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Steven Lojewski **Session:** Semester 2 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD2572 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Photomedia Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Photomedia Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Photomedia studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

#### CAEX2016

##### Film and Digital Art D Studio Extension

##### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Josephine Starrs **Session:** Semester 2 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD2582 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Film and Digital Art Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Film and Digital Art Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Film and Digital Art studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

#### CAEX3001

##### Ceramics E Studio Extension

##### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Jan Guy **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD3511 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Ceramics Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Ceramics Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Ceramics studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

#### CAEX3002

##### Glass E Studio Extension

##### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Andrew Lavery **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD3521 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension

of work required for the Glass Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Glass Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Glass studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

#### CAEX3003

##### Jewellery and Object E Studio Extension

##### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Bridie Lander **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD3531 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Jewellery and Object Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Jewellery and Object Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Jewellery and Object studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

#### CAEX3004

##### Painting E Studio Extension

##### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Dr Debra Dawes **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD3541 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Painting Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Painting Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Painting studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

#### CAEX3005

##### Printmedia E Studio Extension

##### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Justin Trendall **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research and field-work. **Corequisites:** MSTD3551 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Printmedia Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Printmedia Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Printmedia studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

#### CAEX3006

##### Sculpture E Studio Extension

##### Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Dr Adam Geczy **Session:** Semester 1 **Classes:** 3 hours per week and 3-6 hours outside of class, including research

and field-work. **Corequisites:** MSTD3561 **Assessment:** Assessable work produced for this unit of study will be an additional body of work or an extension of work required for the Sculpture Studio Major unit. It will be presented for assessment at the end of the semester, at the same time as work for the Sculpture Studio Major. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Sculpture studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

**Associated degrees:** B V A.

This Studio Extension unit is an additional academic component directly linked to the Studio Major unit offered in the Film and Digital Art studio discipline. The work will be in the form of either a body of work additional to that required for the Studio Major unit or an extension of the work required for the Studio Major unit.

**CAPP2001****Professional Placement for Artists 1  
Sydney College of the Arts**

**Credit points:** 3 **Teacher/Coordinator:** Jane Gavan **Session:** Semester 1, Semester 2 **Assessment:** This elective has a pass/fail grading result and will be based on attendance and completion of placement. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment. Note: Special permission to enrol is required. See Academic Advisor*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit aims to give students an experience of a successful practice in contemporary art, craft or design. Through professional placement with practising artists and designers, students will develop skills that enable them to work towards their own sustainable practice and to make valuable community contacts in their chosen discipline. Students interested in enrolling in the unit should consult their academic advisor

to ascertain if the programme is running in their subject area in any particular semester, and also to make arrangements for the placement.

**CAPP3001****Professional Placement for Artists 2  
Sydney College of the Arts**

**Credit points:** 3 **Teacher/Coordinator:** Jane Gavan **Session:** Semester 1, Semester 2 **Assessment:** This elective has a pass/fail grading result and will be based on attendance and completion of placement. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment. Note: Special permission to enrol is required. See Academic Advisor*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit aims to give students an experience of a successful practice in contemporary art, craft or design. Students interested in enrolling in the unit should consult their academic advisor to ascertain if the programme is running in their subject area in any particular semester, and also to make arrangements for the placement.

**CHEM1001****Fundamentals of Chemistry 1A  
Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. **Prohibitions:** CHEM1101, CHEM1901, CHEM1109, CHEM1903 **Assumed knowledge:** There is no assumed knowledge of chemistry for this unit of study, but students who have not undertaken an HSC chemistry course are strongly advised to complete a chemistry bridging course before lectures commence. **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Practical field work:** A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, M B, B S, B E, B Ed, B Sc (Psych), B Hort Sc, B L W Sc, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biol).

The aim of the unit of study is to provide those students whose chemical background is weak (or non-existent) with a good grounding in fundamental chemical principles together with an overview of the relevance of chemistry. There is no prerequisite or assumed knowledge for entry to this unit of study. Lectures: A series of 39 lectures, three per week throughout the semester.

**Textbooks**

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

**CHEM1002****Fundamentals of Chemistry 1B  
Science**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. **Prerequisites:** CHEM (1001 or 1101) or equivalent **Prohibitions:** CHEM1102, CHEM1108, CHEM1902, CHEM1904 **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Practical field work:** A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, M B, B S, B E, B Ed, B Sc (Psych), B Hort Sc, B L W Sc, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (M).

CHEM1002 builds on CHEM1001 to provide a sound coverage of inorganic and organic chemistry. Lectures: A series of 39 lectures, three per week throughout the semester.

**Textbooks**

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

**CHEM1101****Chemistry 1A**

## Science

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Main **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. **Corequisites:** Recommended concurrent units of study: 6 credit points of Junior Mathematics **Prohibitions:** CHEM1001, CHEM1109, CHEM1901, CHEM1903 **Assumed knowledge:** HSC Chemistry and Mathematics **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Practical field work:** A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, M B, B S, B E, B Ed, B Sc (Psych), B L W Sc, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Geneti).

Chemistry 1A is built on a satisfactory prior knowledge of the HSC Chemistry course. A brief revision of basic concepts of the high school course is given. Chemistry 1A covers chemical theory and physical chemistry. Lectures: A series of 39 lectures, three per week throughout the semester.

### Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

## CHEM1102 Chemistry 1B Science

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Main **Classes:** One 3 hour lecture and 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. **Prerequisites:** CHEM (1101 or 1901) or a Distinction in CHEM1001 or equivalent **Corequisites:** Recommended concurrent units of study: 6 credit points of Junior Mathematics **Prohibitions:** CHEM1002, CHEM1108, CHEM1902, CHEM1904 **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Practical field work:** A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, M B, B S, B E, B Ed, B Sc (Psych), B L W Sc, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), U.

Chemistry 1B is built on a satisfactory prior knowledge of Chemistry 1A and covers inorganic and organic chemistry. Successful completion of Chemistry 1B is an acceptable prerequisite for entry into Intermediate Chemistry units of study. Lectures: A series of 39 lectures, three per week throughout the semester.

### Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

## CHEM1108 Chemistry 1A Life Sciences Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. **Corequisites:** Recommended concurrent units of study: 6 credit points of Junior Mathematics **Prohibitions:** CHEM1002, CHEM1102, CHEM1902, CHEM1904 **Assumed knowledge:** HSC Chemistry and Mathematics **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). **Practical field work:** A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is available to students enrolled in the Bachelor of Medical Science, the Bachelor of Science (Molecular Biology and Genetics), the Bachelor of Science (Nutrition) and the Bachelor of Science (Molecular Biotechnology) only.*

**Associated degrees:** B Med Sc, B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

Lectures (39 hrs): A strong background in junior chemistry is essential for understanding molecular structures and processes. This unit of study provides the basis for understanding fundamental chemical processes and structures at an advanced level, with particular emphasis on how these apply to the life sciences. Topics to be covered include: atomic structure, chemical bonding and organic chemistry of functional groups with applications in life sciences.

Tutorials (12 hrs): These will provide aspects of problem solving relevant to the theory.

### Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

## CHEM1109 Chemistry 1B Life Sciences Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. **Prerequisites:** CHEM1108 **Corequisites:** Recommended concurrent units of study: 6 credit points of Junior Mathematics **Prohibitions:** CHEM1001, CHEM1101, CHEM1901, CHEM1903 **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Practical field work:** A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is available to students enrolled in the Bachelor of Medical Science, the Bachelor of Science (Molecular Biology and Genetics), the Bachelor of Science (Nutrition) and the Bachelor of Science (Molecular Biotechnology) only.*

**Associated degrees:** B Med Sc, B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

Lectures (39 hrs): A strong background in junior chemistry is essential for understanding molecular structures and processes. This unit of study provides the basis for understanding fundamental chemical processes and structures at an advanced level, with particular emphasis on how these apply to the life sciences. Topics to be covered include: chemical equilibria, solutions, acids and bases, ions in solution, redox reactions, colloids and surface chemistry, the biological periodic table, chemical kinetics and radiochemistry with applications to life sciences.

Tutorials (12 hrs): These will provide aspects of problem solving relevant to the unit of study.

### Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

## CHEM1405 Chemistry Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lectures: 52 hours Practicals: 27 hours (nine 3 hour classes) **Assumed knowledge:** HSC Chemistry **Assessment:** Intrasemester: 4 x Quizzes (15%), Lab work (10%) End of semester: 3 hr Exam (75%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B V Sc.

This is a one semester unit of study designed to provide (i) a suitable foundation for subsequent units of study such as biochemistry, animal nutrition, physiology and pharmacology, and (ii) a chemical background that will aid in the understanding, diagnosis and treatment of disease. It covers chemical theory, inorganic, physical, and organic chemistry with many examples from biological areas. It pre-supposes a satisfactory prior knowledge of HSC Chemistry. A total of 52 hours of lectures comprising 28 lectures in inorganic and physical chemistry and 24 lectures in organic chemistry.

### Textbooks

Detailed information about prescribed texts is available from the School of Chemistry.

## CHEM1551 Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Marine Science).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM1552 Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM1611 Chemistry A (Pharmacy) Science

**Credit points:** 6 **Teacher/Coordinator:** See School of Chemistry for list of staff **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. **Assumed knowledge:** HSC Chemistry and Mathematics **Assessment:** A theory examination is held at the end of the semester. Students are advised at the beginning of the semester about other factors contributing to assessment in the unit of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Students must have special permission from the Faculty of Pharmacy to enrol in this Unit of Study.*

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

Chemistry provides the basis for understanding molecular structures and processes, essential knowledge for many later year Pharmacy units of study. Lecture topics include some fundamental concepts, atomic theory, states and properties of matter, equations and stoichiometry, introduction to organic chemistry, nomenclature, aliphatic chemistry, aromatic chemistry, heterocyclic compounds, isomerism, stereoisomerism, reaction mechanisms, biomolecules, amino acids and peptides, carbohydrates, general acid-base theory, atomic structure, chemical bonding. Practical work is designed to enhance confidence and develop skills in the handling and manipulation of chemicals and in the observation and processing of experimental results.

Special preparative studies: Students wishing to enrol in CHEM1611 who do not have the assumed chemical knowledge are advised to consult the School of Chemistry for information about a bridging course.

#### Textbooks

Students should obtain a booklist from the School of Chemistry during the orientation period.

### CHEM1612 Chemistry B (Pharmacy) Science

**Credit points:** 6 **Teacher/Coordinator:** See School of Chemistry for list of staff **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. **Corequisites:** CHEM1611 Chemistry A (Pharmacy) **Assessment:** A theory examination is held at the end of the semester. Students are advised at the beginning of the semester about other factors contributing to assessment in the unit of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Students must have special permission from the Faculty of Pharmacy to enrol in this Unit of Study.*

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

Chemistry provides the basis for understanding molecular structures and processes, essential knowledge for many later year Pharmacy units of study. Lecture topics include redox reactions, electrochemistry, introduction to colloids and surface chemistry, the biological periodic table, radiochemistry, chemical energetics, equilibrium theory, solution theory. Practical work is designed to enhance confidence and develop

skills in the handling and manipulation of chemicals and in the observation and processing of experimental results.

#### Textbooks

Students should obtain a booklist from the School of Chemistry during the orientation period.

### CHEM1901 Chemistry 1A (Advanced) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lecture and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks.

**Prerequisites:** UAL of at least 96.4 and HSC Chemistry result in band 5 or 6, or Distinction or better in a University level Chemistry unit, or by invitation

**Corequisites:** Recommended concurrent unit of study: 6 credit points of Junior Mathematics **Prohibitions:** CHEM1001, CHEM1101, CHEM1109, CHEM1903

**Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Practical field work:** A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Com, M B, B S, B E, B Ed, B Sc (Psych), B Hort Sc, B L W Sc, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), B Sc Agr, UG Study.

Chemistry 1A (Advanced) is available to students with a very good HSC performance as well as a very good school record in chemistry or science. Students in this category are expected to do Chemistry 1A (Advanced) rather than Chemistry 1A.

The theory and practical work syllabuses for Chemistry 1A and Chemistry 1A (Advanced) are similar, though the level of treatment in the latter unit of study is more advanced, presupposing a very good grounding in the subject at secondary level. Chemistry 1A (Advanced) covers chemical theory and physical chemistry. Lectures: A series of about 39 lectures, three per week throughout the semester.

#### Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

### CHEM1902 Chemistry 1B (Advanced) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks.

**Prerequisites:** CHEM (1901 or 1903) or Distinction in CHEM1101 or equivalent

**Corequisites:** Recommended concurrent unit of study: 6 credit points of Junior Mathematics **Prohibitions:** CHEM1002, CHEM1102, CHEM1108, CHEM1904

**Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Practical field work:** A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Com, M B, B S, B E, B Ed, B Sc (Psych), B Hort Sc, B L W Sc, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), B Sc Agr, UG Study Abroad Program.

Chemistry 1B (Advanced) is built on a satisfactory prior knowledge of Chemistry 1A (Advanced) and covers inorganic and organic chemistry. Successful completion of Chemistry 1B (Advanced) is an acceptable prerequisite for entry into Intermediate Chemistry units of study. Lectures: A series of about 39 lectures, three per week throughout the semester.

#### Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

### CHEM1903 Chemistry 1A (Special Studies Program) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lecture, one 1 hour tutorial per week and one 3 hour practical per week. **Prerequisites:** UAL of at least 98.7 and HSC Chemistry result in Band 6

**Corequisites:** Recommended concurrent unit of study: 6 credit points of Junior Mathematics

**Prohibitions:** CHEM1001, CHEM1101, CHEM1109, CHEM1901 **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Entry is by invitation. This unit of study is deemed to be an Advanced unit of study.*

**Associated degrees:** B Com, M B, B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

Entry to Chemistry 1A (Special Studies Program) is restricted to students with an excellent school record in Chemistry. The practical work syllabus for Chemistry 1A (Special Studies Program) is very different from that for Chemistry 1A and Chemistry 1A (Advanced) and consists of special project-based laboratory exercises. All other unit of study details are the same as those for Chemistry 1A (Advanced). A Distinction in Chemistry 1A (Special Studies Program) is an acceptable prerequisite for entry into Chemistry 1B (Special Studies Program).

## CHEM1904

### Chemistry 1B (Special Studies Program) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lecture, one 1 hour tutorial per week and one 3 hour practical per week. **Prerequisites:** Distinction in CHEM1903 **Corequisites:** Recommended concurrent units of study: 6 credit points of Junior Mathematics. **Prohibitions:** CHEM1002, CHEM1102, CHEM1108, CHEM1902 **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Entry is by invitation. This unit of study is deemed to be an Advanced unit of study.*

**Associated degrees:** B Com, M B, B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

Entry to Chemistry 1B (Special Studies Program) is restricted to students who have gained a Distinction in Chemistry 1A (Special Studies Program). The practical work syllabus for Chemistry 1B (Special Studies Program) is very different from that for Chemistry 1B and Chemistry 1B (Advanced) and consists of special project-based laboratory exercises. All other unit of study details are the same as those for Chemistry 1B (Advanced). Successful completion of Chemistry 1B (Special Studies Program) is an acceptable prerequisite for entry into Intermediate Chemistry units of study.

## CHEM2401

### Molecular Reactivity and Spectroscopy Science

**Credit points:** 6 **Teacher/Coordinator:** Dr P J Rutledge **Session:** Semester 1 **Classes:** Three 1 hour lectures per week, seven 1 hour tutorials per semester, eight 4 hour practicals per semester. **Prerequisites:** CHEM (1101 or 1901 or 1903 or 1907 or 1908 or 1108) and CHEM (1102 or 1902 or 1904 or 1909 or 1109), 6 credit points of Junior Mathematics **Prohibitions:** CHEM2001, CHEM2101, CHEM2301, CHEM2311, CHEM2502, CHEM2901, CHEM2903, CHEM2911, CHEM2915 **Assessment:** One 3 hour examination, quizzes, lab reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This is a required chemistry unit of study for students intending to major in chemistry.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This is one of the two core units of study for students considering majoring in chemistry, and for students of other disciplines who wish to acquire a good general background in chemistry. The unit considers fundamental questions of molecular structure, chemical reactivity, and molecular spectroscopy: What are chemical reactions and what makes them happen? How can we follow and understand them? How can we exploit them to make useful molecules? This course includes the organic and medicinal chemistry of aromatic compounds, organic reaction mechanisms, vibrational and electronic spectroscopy and their applications, quantum chemistry, and molecular orbital theory.

## CHEM2402

### Chemical Structure and Stability Science

**Credit points:** 6 **Teacher/Coordinator:** Dr P J Rutledge **Session:** Semester 2 **Classes:** Three 1 hour lectures per week, seven 1 hour tutorials per semester, eight 4 hour practicals per semester. **Prerequisites:** CHEM (1101 or 1901 or

1903 or 1907 or 1908 or 1108) and CHEM (1102 or 1902 or 1904 or 1909 or 1109), 6 credit points of Junior of Mathematics **Prohibitions:** CHEM2202, CHEM2302, CHEM2902, CHEM2912, CHEM2916 **Assessment:** One 3 hour examination, quizzes, lab reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This is a required chemistry unit of study for students intending to major in chemistry.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This is the second core unit of study for students considering majoring in chemistry, and for students seeking a good general background in chemistry. The unit continues the consideration of molecular structure and chemical reactivity. Topics include the structure and bonding of inorganic compounds, the properties of metal complexes, statistical thermodynamics, the organic chemistry of carbonyl compounds and organometallic reagents, and the art of synthesis.

## CHEM2403

### Chemistry of Biological Molecules Science

**Credit points:** 6 **Teacher/Coordinator:** Dr P J Rutledge **Session:** Semester 2 **Classes:** Three 1 hour lectures per week, six 1 hour tutorials per semester, five 4 hour practical sessions per semester. **Prerequisites:** 12 credit points of Junior Chemistry; 6 credit points of Junior Mathematics **Prohibitions:** CHEM2001, CHEM2901, CHEM2311, CHEM2903, CHEM2913 **Assessment:** One 3 hour examination, quizzes, lab reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: To enrol in Senior Chemistry in 2010 students are required to have completed CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). Students are advised that combinations of CHEM2 units that do not meet this requirement will generally not allow progression to Senior Chemistry.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B I T, B Sc, B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun, UG Study Abroad Program.

Life is chemistry. This unit of study examines the key chemical processes that underlie all living systems. Lectures cover the chemistry of carbohydrates, lipids and DNA, the mechanisms of organic and biochemical reactions that occur in biological systems, chemical analysis of biological systems, the inorganic chemistry of metalloproteins, biomineralisation, biopolymers and biocolloids, and the application of spectroscopic techniques to biological systems. The practical course will include the chemical characterisation of biopolymers, experimental investigations of iron binding proteins, organic and inorganic chemical analysis, and the characterisation of anti-inflammatory drugs.

## CHEM2404

### Forensic and Environmental Chemistry Science

**Credit points:** 6 **Teacher/Coordinator:** Dr P J Rutledge **Session:** Semester 1 **Classes:** Three 1 hour lectures per week, six 1 hour tutorials and five 4 hour practical sessions per semester. **Prerequisites:** 12 credit points of Junior Chemistry; 6 credit points of Junior Mathematics **Prohibitions:** CHEM3107, CHEM3197 **Assessment:** One 3 hour examination, quizzes, lab reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: To enrol in Senior Chemistry in 2010 students are required to have completed CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). Students are advised that combinations of CHEM2 units that do not meet this requirement will generally not allow progression to Senior Chemistry.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Environmental), UG Study Abroad Program.

The identification of chemical species and quantitative determination of how much of each species is present are the essential first steps in solving all chemical puzzles. In this course students learn analytical techniques and chemical problem solving in the context of forensic and environmental chemistry. The lectures on environmental chemistry will cover two main topics: atmospheric chemistry (covering air pollution, global warming and ozone depletion), and water and soil chemistry (including bio-geochemical cycling, chemical speciation, catalysis and green chemistry). The forensic component of the course examines the gathering and analysis of evidence, using a variety of

chemical techniques, and the development of specialised forensic techniques in the analysis of trace evidence. Students will also study forensic analyses of inorganic, organic and biological materials (dust, soil, inks, paints, documents, etc.) in police, customs and insurance investigations and learn how a wide range of techniques are used to examine forensic evidence.

### CHEM2553 Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Marine Science).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM2554 Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM2555 Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM2556 Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM2911 Molecular Reactivity & Spectroscopy Adv Science

**Credit points:** 6 **Teacher/Coordinator:** Dr P J Rutledge **Session:** Semester 1 **Classes:** Three 1 hour lectures per week, seven 1 hour tutorials per semester and eight 4 hour practicals per semester. **Prerequisites:** Credit average or better in CHEM (1101 or 1901 or 1903 or 1907 or 1908 or 1108) and CHEM (1102 or 1902 or 1904 or 1909 or 1109). 6 credit points of Junior Mathematics.

**Prohibitions:** CHEM2001, CHEM2101, CHEM2301, CHEM2311, CHEM2401, CHEM2502, CHEM2901, CHEM2903, CHEM2915 **Assessment:** One 3 hour examination, quizzes, lab reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

The syllabus for this unit is the same as that of CHEM2401 together with special Advanced material presented in the theory and practical programs. The lectures cover fundamental consideration of molecular electronic structure and its role in molecular reactivity and spectroscopy and include applications of spectroscopy, the organic chemistry of aromatic systems, molecular orbital theory and quantum chemistry.

### CHEM2912 Chemical Structure and Stability (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr P J Rutledge **Session:** Semester 2 **Classes:** Three 1 hour lectures per week, seven 1 hour tutorials per semester, eight 4 hour practicals per semester. **Prerequisites:** Credit average or better in CHEM (1101 or 1901 or 1903 or 1907 or 1908 or 1108) and CHEM (1102 or 1902 or 1904 or 1909 or 1109). 6 credit points of Junior Mathematics. **Prohibitions:** CHEM2202, CHEM2302, CHEM2402, CHEM2902, CHEM2916 **Assessment:** One 3 hour examination, quizzes, lab reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

The syllabus for this unit is the same as that of CHEM2402 together with special Advanced material presented in the theory and practical programs. The lectures include the properties of inorganic compounds and complexes, statistical thermodynamics, the chemistry of carbonyls, nucleophilic organometallic reagents, and synthetic methods.

### CHEM2915 Molecular Reactivity & Spectroscopy SSP Science

**Credit points:** 6 **Teacher/Coordinator:** Dr P J Rutledge **Session:** Semester 1 **Classes:** Three 1 hour lectures per week, twelve 1 hour SSP seminars per semester, eight 4 hour practicals per semester. **Prerequisites:** By invitation. High WAM and a Distinction average in CHEM (1101 or 1901 or 1903 or 1907 or 1908 or 1108) and CHEM (1102 or 1902 or 1904 or 1909 or 1109). 6 credit points of Junior Mathematics. **Prohibitions:** CHEM2001, CHEM2101, CHEM2301, CHEM2311, CHEM2401, CHEM2502, CHEM2901, CHEM2903, CHEM2911 **Assessment:** One 3 hour examination, quizzes, assignments, lab reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: The number of places in this unit of study is strictly limited and entry is by invitation only. Enrolment is conditional upon available places.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

The lectures for this unit comprise the lectures for CHEM2401 and the Advanced practical program together with additional SSP seminars. Two streams of SSP seminars are offered: Series One comprises three seminar series on state of the art topics in chemistry (in 2018, these covered Advanced Kinetics, Quantum Theory and Palladium in organic synthesis), Series Two is devoted to Advanced Theoretical Chemistry.

### CHEM2916 Chemical Structure and Stability (SSP) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr P J Rutledge **Session:** Semester 2 **Classes:** Three 1 hour lectures per week, twelve 1 hour SSP seminars per semester, eight 4 hour practicals per semester. **Prerequisites:** By invitation. High WAM and a Distinction average in CHEM (1101 or 1901 or 1903 or 1907 or 1908 or 1108) and CHEM (1102 or 1902 or 1904 or 1909 or 1109). 6 credit points of Junior Mathematics. **Prohibitions:** CHEM2202, CHEM2302, CHEM2402, CHEM2902, CHEM2912 **Assessment:** One 3 hour examination, quizzes, assignments, lab reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: The number of places in this unit of study is strictly limited and entry is by invitation only. Enrolment is conditional upon available places.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

The lectures for this unit comprise the lectures for CHEM2402 and the Advanced practical program together with additional SSP seminars comprising three seminar series on state of the art topics in chemistry (in 2008, these covered carbon-rich chemistry, advanced theoretical chemistry and the chemistry of antibiotics).

### CHEM3110

#### Biomolecules: Properties and Reactions Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lecture and one 4 hour practical per week. **Prerequisites:** CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916) **Prohibitions:** CHEM3910 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

DNA, proteins and carbohydrates represent three classes of essential biomolecules present in all biological systems. This unit will cover the structure, reactivity and properties of biomolecules and the building blocks from which these molecules are assembled, their interactions with metal ions and small molecules, and highlight the chemical tools used to study the behaviour of biomolecules. The final section of the unit will illustrate how chemists apply the same principles used by nature in these systems to produce molecular sensors and switches for applications in medicine and industry.

### CHEM3111

#### Organic Structure and Reactivity Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916) **Prohibitions:** CHEM3911 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

The structure and shape of organic molecules determines their physical properties, their reaction chemistry as well as their biological/medicinal activity. The determination of this structure and understanding its chemical consequences is of fundamental importance in chemistry, biochemistry, medicinal and materials chemistry. This course examines the methods and techniques used to establish the structure of organic molecules as well as the chemistry which dictates the shapes that they adopt. The first part of the course examines the use of modern spectroscopic methods (nuclear magnetic resonance spectroscopy, infrared spectroscopy and mass spectroscopy) which are used routinely to identify organic compounds. The second part of the course examines the chemical consequences of molecular shapes in more depth and looks at how different molecular shapes arise as a consequence of the mechanism of chemical reactions used to synthesise them.

### CHEM3112

#### Materials Chemistry Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** One 2 hour lecture and one 4 hour practical per week. **Prerequisites:** CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916) **Prohibitions:** CHEM3912 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This course concerns the inorganic chemistry of solid-state materials: compounds that possess 'infinite' bonding networks. The extended structure of solid materials gives rise to a wide range of important chemical, mechanical, electrical, magnetic and optical properties.

Consequently such materials are of enormous technological significance as well as fundamental curiosity. In this course you will learn how chemistry can be used to design and synthesise novel materials with desirable properties. The course will start with familiar molecules such as C<sub>60</sub> and examine their solid states to understand how the nature of chemical bonding changes in the solid state, leading to new properties such as electronic conduction. This will be the basis for a broader examination of how chemistry is related to structure, and how structure is related to properties such as catalytic activity, mechanical strength, magnetism, and superconductivity. The symmetry of solids will be used explain how their structures are classified, how they can transform between related structures when external conditions such as temperature, pressure and electric field are changed, and how this can be exploited in technological applications such as sensors and switches. Key techniques used to characterise solid-state materials will be covered, particularly X-ray diffraction, microscopy, and physical property measurements.

### CHEM3113

#### Catalysis and Sustainable Processes Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** One 2 hour lecture and one 4 hour practical per week. **Prerequisites:** CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916) **Prohibitions:** CHEM3913 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

Almost 90% of manufactured chemicals (from fuels through polymers to drugs) involve at least one catalytic step in their production. Catalysis by enzymes is fundamental to all chemical pathways in living things. This course provides the foundation for a molecular-scale understanding of even the most complex catalysts. It begins by showing how organometallic fundamentals can be used to understand and design transition-metal catalysts. Making use of these concepts, the chemistry involved in surface catalysts will be examined. The course will address two main applications of catalysis. Synthetic polymers (plastics, woven materials, films, coatings, etc.) are the most ubiquitous and diverse of modern materials. These are synthesized by a range of catalytic processes, whose chemistry will be described. It will be shown how the mechanisms of these reactions in turn control the molecular weights of the resulting polymers, as well as other aspects of molecular architecture such as degree of branching. The other major application is the use of porous solids (zeotypes) as acid/base and redox catalysts. Confinement-induced selectivity changes are discussed and related to similar phenomena in enzymatic catalysis. In both applications students will also examine the overall process and look at the reasons behind choice of product, catalyst and reaction design with a specific focus on economy and environmental sustainability.

### CHEM3114

#### Metal Complexes: Medicine and Materials Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916) **Prohibitions:** CHEM3914 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

Coordination compounds, with bonds between a central metal atom and surrounding ligands, play critical roles in biology, biochemistry and medicine, controlling the structure and function of many enzymes and their metabolism. They play similarly vital roles in many industrial processes and in the development of new materials with specifically designed properties. Building on the foundation of crystal field theory, this course offers a comprehensive treatment of the structures and properties of coordination compounds, with a qualitative molecular orbital description of metal-ligand bonds, and their spectroscopic,

magnetic and dynamic effects. The exploitation of these properties in medicine and materials will be emphasized.

### CHEM3115

#### Synthetic Medicinal Chemistry Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916) **Prohibitions:** CHEM3915 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

The development of new pharmaceuticals fundamentally relies on the ability to design and synthesize new compounds. Synthesis is an enabling discipline for medicinal chemistry - without it, the development of new drugs cannot progress from design to implementation, and ultimately to a cure. This unit will tackle important factors in drug design, and will highlight the current arsenal of methods used in the discovery of new drugs, including rational drug design, high throughput screening and combinatorial chemistry. We will develop a logical approach to planning a synthesis of a particular target structure. The synthesis and chemistry of heterocycles, which comprise some 40% of all known organic compounds and are particularly common in pharmaceuticals, will be outlined. Examples will include important ring systems present in biological systems, such as pyrimidines and purines (DNA and RNA), imidazole and thiazole (amino acids and vitamins) and porphyrins (natural colouring substances and oxygen carrying component of blood). Throughout the course, the utility of synthesis in medicinal chemistry will be illustrated with case studies such as anti-influenza (Relenza), anaesthetic (benzocaine), anti-inflammatory (Vioxx), antihypertensive (pinacidil) and cholesterol-lowering (Lovastatin) drugs.

### CHEM3116

#### Membranes, Self Assembly and Surfaces Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lecture and one 4 hour practical per week. **Prerequisites:** CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916) **Prohibitions:** CHEM3916 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

Away from the covalent and ionic interactions that hold molecules and solids together is the world of fragile objects - folded polymers, membranes, surface adsorption and stable molecular aggregates - held together by weak forces such as van der Waals and the hydrophobic effect. The use of molecules rather than atoms as building blocks means that there are an enormous number of possibilities for stable aggregates with interesting chemical, physical and biological properties, many of which still wait to be explored. In this course we will examine the molecular interactions that drive self assembly and the consequences of these interactions in supramolecular assembly, lipid membrane formations and properties, microemulsions, polymer conformation and dynamics and range of fundamental surface properties including adhesion, wetting and colloidal stability.

### CHEM3117

#### Molecular Spectroscopy & Quantum Theory Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lecture and one 4 hour practical per week. **Prerequisites:** CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916) **Prohibitions:** CHEM3917 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This course will cover the fundamentals of molecular spectroscopy as a modern research tool and as a theoretical basis with which to understand everyday phenomena. This course is aimed at students who wish to acquire a rigorous understanding of the interaction between light and matter. The course teaches the quantum theory needed to understand spectroscopic phenomena (such as the absorption of light) without the need for difficult mathematics. This low level theory is used as a tool with which to understand models of everyday phenomena. The course teaches application and theory, with descriptions of applied spectroscopic techniques. Alongside the coverage of modern spectroscopy, the course provides an accessible treatment of the science behind vision, flames, solar cells and photochemical smog.

### CHEM3551

#### Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Marine Science).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM3552

#### Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Marine Science).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM3553

#### Chemistry Exchange Science

**Credit points:** 12 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Marine Science).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM3554

#### Chemistry Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

### CHEM3555

#### Chemistry Exchange

**Science**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

**CHEM3556****Chemistry Exchange Science**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

**CHEM3910****Biomolecules: Properties & Reactions Adv Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** WAM of 65 or greater and a Credit or better in: CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). **Prohibitions:** CHEM3110 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

DNA, proteins and carbohydrates represent three classes of essential biomolecules present in all biological systems. This unit will cover the structure, reactivity and properties of biomolecules and the building blocks from which these molecules are assembled, their interactions with metal ions and small molecules, and highlight the chemical tools used to study the behaviour of biomolecules. The final section of the unit will illustrate how chemists apply the same principles used by nature in these systems to produce molecular sensors and switches for applications in medicine and industry. CHEM3910 students attend the same lectures as CHEM3110 students but attend an additional advanced seminar series comprising one lecture a week for 12 weeks.

**CHEM3911****Organic Structure and Reactivity (Adv) Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour practicals per week. **Prerequisites:** WAM of 65 or greater and a Credit or better in: CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). **Prohibitions:** CHEM3111 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

The structure and shape of organic molecules determines their physical properties, their reaction chemistry as well as their biological/medicinal activity. The determination of this structure and understanding its chemical consequences is of fundamental importance in chemistry, biochemistry, medicinal and materials chemistry. This course examines the methods and techniques used to establish the structure of organic molecules as well as the chemistry which dictates the shapes that they adopt. The first part of the course examines the use of modern spectroscopic methods (nuclear magnetic resonance spectroscopy, infrared spectroscopy and mass spectroscopy) which are used routinely to identify organic compounds. The second part of the course

examines the chemical consequences of molecular shapes in more depth and looks at how different molecular shapes arise as a consequence of the mechanism of chemical reactions used to synthesize them. CHEM3911 students attend the same lectures as CHEM3111 students, but attend an additional advanced seminar series comprising one lecture a week for 12 weeks.

**CHEM3912****Materials Chemistry (Adv) Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 4 hour practicals per week. **Prerequisites:** WAM of 65 or greater and a Credit or better in: CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). **Prohibitions:** CHEM3112 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This course concerns the inorganic chemistry of solid-state materials: compounds that possess 'infinite' bonding networks. The extended structure of solid materials gives rise to a wide range of important chemical, mechanical, electrical, magnetic and optical properties. Consequently, such materials are of enormous technological significance as well as fundamental curiosity. In this course you will learn how chemistry can be used to design and synthesize novel materials with desirable properties. The course will start with familiar molecules such as C60 and examine their solid states to understand how the nature of chemical bonding changes in the solid state, leading to new properties such as electronic conduction. This will be the basis for a broader examination of how chemistry is related to structure, and how structure is related to properties such as catalytic activity, mechanical strength, magnetism, and superconductivity. The symmetry of solids will be used to explain how their structures are classified, how they can transform between related structures when external conditions such as temperature, pressure and electric field are changed, and how this can be exploited in technological applications such as sensors and switches. Key techniques used to characterise solid-state materials will be covered, particularly X-ray diffraction, microscopy, and physical property measurements. CHEM3912 students attend the same lectures as CHEM3112 students, but attend an additional advanced seminar series comprising one lecture a week for 12 weeks.

**CHEM3913****Catalysis and Sustainable Process (Adv) Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lecture and one 4 hour practical per week. **Prerequisites:** WAM of 65 or greater and a Credit or better in: CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). **Prohibitions:** CHEM3113 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

Almost 90% of manufactured chemicals (from fuels through polymers to drugs) involve at least one catalytic step in their production. Catalysis by enzymes is fundamental to all chemical pathways in living things. This course provides the foundation for a molecular-scale understanding of even the most complex catalysts. It begins by showing how organometallic fundamentals can be used to understand and design transition-metal catalysts. Making use of these concepts, the chemistry involved in surface catalysts will be examined. The course will address two main applications of catalysis. Synthetic polymers (plastics, woven materials, films, coatings, etc.) are the most ubiquitous and diverse of modern materials. They are synthesized by a range of catalytic processes, whose chemistry will be described. It will be shown how the mechanisms of these reactions in turn control the molecular weights of the resulting polymers, as well as other aspects of molecular architecture such as degree of branching. The other major application is the use of porous solids (zeotypes) as

acid/base and redox catalysts. Confinement-induced selectivity changes are discussed and related to similar phenomena in enzymatic catalysis. In both applications students will also examine the overall process and look at the reasons behind choice of product, catalyst and reaction design with a specific focus on economy and environmental sustainability. CHEM3913 students attend the same lectures as CHEM3113 students, but attend an additional advanced seminar series comprising one lecture a week for 12 weeks.

#### CHEM3914

##### Metal Complexes: Medic. & Mater. (Adv)

###### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** WAM of 65 or greater and a Credit or better in: CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). **Prohibitions:** CHEM3114 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

Coordination compounds, with bonds between a central metal atom and surrounding ligands, play critical roles in biology, biochemistry and medicine, controlling the structure and function of many enzymes and their metabolism. They play similarly vital roles in many industrial processes and in the development of new materials with specifically designed properties. Building on the foundation of crystal field theory, this course offers a comprehensive treatment of the structures and properties of coordination compounds, with a qualitative molecular orbital description of metal-ligand bonds, and their spectroscopic, magnetic and dynamic effects. The exploitation of these properties in medicine and materials will be emphasized. CHEM3914 students attend the same lectures as CHEM3114 students, but attend an additional advanced seminar series comprising one lecture a week for 12 weeks.

#### CHEM3915

##### Synthetic Medicinal Chemistry (Adv)

###### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** WAM of 65 or greater and a Credit or better in: CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). **Prohibitions:** CHEM3115 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

The development of new pharmaceuticals fundamentally relies on the ability to design and synthesize new compounds. Synthesis is an enabling discipline for medicinal chemistry - without it, the development of new drugs cannot progress from design to implementation, and ultimately to a cure. This unit will tackle important factors in drug design, and will highlight the current arsenal of methods used in the discovery of new drugs, including rational drug design, high throughput screening and combinatorial chemistry. We will develop a logical approach to planning a synthesis of a particular target structure. The synthesis and chemistry of heterocycles, which comprise some 40% of all known organic compounds and are particularly common in pharmaceuticals, will be outlined. Examples will include important ring systems present in biological systems, such as pyrimidines and purines (DNA and RNA), imidazole and thiazole (amino acids and vitamins) and porphyrins (natural colouring substances and oxygen carrying component of blood). Throughout the course, the utility of synthesis in medicinal chemistry will be illustrated with case studies such as anti-influenza (Relenza), anaesthetic (benzocaine), anti-inflammatory (Vioxx), antihypertensive (pinacidil) and cholesterol-lowering (Lovastatin) drugs. CHEM3915 students attend the same lectures as CHEM3115 students, but attend an additional advanced seminar series comprising one lecture a week for 12 weeks.

#### CHEM3916

##### Membranes, Self Assembly & Surfaces(Adv)

###### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 4 hour practical per week. **Prerequisites:** WAM of 65 or greater and a Credit or better in: CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). **Prohibitions:** CHEM3116 **Assessment:** One 2 hour exam, prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

Away from the covalent and ionic interactions that hold molecules and solids together is the world of fragile objects - folded polymers, membranes, surface adsorption and stable molecular aggregates - held together by weak forces such as van der Waals and the hydrophobic effect. The use of molecules rather than atoms as building blocks means that there are an enormous number of possibilities for stable aggregates with interesting chemical, physical and biological properties, many of which still wait to be explored. In this course we examine the molecular interactions that drive self assembly and the consequences of these interactions in supramolecular assembly, lipid membrane formations and properties, microemulsions, polymer conformation and dynamics and range of fundamental surface properties including adhesion, wetting and colloidal stability. **CHNG1006****Professional Communication for Engineers  
Engineering and Information Technologies**

**Credit points:** 2 **Teacher/Coordinator:** Dr Marjorie Valix **Session:** Semester 2  
**Classes:** 2 hours of lectures/tutorials per week for 1 semester. **Corequisites:** CHNG1103  
**Assessment:** Tutorials and assignments (pass/fail course): participation (attendance and contribution) 10%; individual written exercises 4 x 10%; individual written assignment 50% **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Students who fail a diagnostic skills test will be asked to enrol in this unit of study.*

**Associated degrees:** B E, UG Study Abroad Program.

**Aim:** To improve students' written communication for academic and professional purposes.

This course will specifically develop skills in the construction, cohesion, style and grammar of key written genres such as short answer responses and reports; to develop critical and analytical approaches to processing information; to support written assessment tasks within the discipline.

**Syllabus summary:** This course will address the need for engineers to have adequate literacy skills. The course will cover aspects of information retrieval and processing, construction and development of an answer, control of academic writing, grammatical correctness and quality of presentation. There will be a focus on improving the structure, academic style and grammatical correctness of students' writing.

**Outcome:** At the end of this unit of study students should be able to demonstrate improved skills in: writing appropriately for audience, purpose and situation; understanding basic sentence and paragraph structure; critically evaluating information; logical reasoning in writing.

**CHNG1103****Material & Energy Transformations Intro  
Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** Dr Marjorie Valix **Session:** Semester 2  
**Classes:** Two 1-hours lectures and a 3-hr tutorial each week **Prohibitions:** CHNG1101, CHNG1102, CHNG1001, CHNG1201 **Assumed knowledge:** Mathematics Extension 1; 2 unit Physics; 2 unit Chemistry. **Assessment:** Continuous assessment by assignments 50%; final examination 50%. **Practical field work:** Occasional field trips to industrial sites. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study is an introduction to chemical engineering processes and calculations.

**Syllabus summary:** Material transformations related topics will include unit systems and unit conversion; properties of fluids; mass balance calculations on flow systems; equilibrium compositions of reacting systems; vapour pressure and humidity. Energy related topics will include first law of thermodynamics applied to flow systems; thermodynamic properties such as enthalpy, internal energy, heat capacities; calculations for ideal gas and liquid gas systems and thermochemistry.

**Objectives:** Students should develop an understanding of and competence in the formulation and solution of material and energy balance problems in engineering; develop competence in using basic flowsheet analysis and appropriate computational tools; improve their group work and problem solving skills; gain an ability to extract a simplified version of a problem from a complex situation.

**Outcomes:** By the end of the unit of study, students will be able to set up and calculate energy and material balances for a variety of commonly encountered engineering scenarios; appreciate key aspects of processes carried out in today's chemical and process industries; work as an effective member of an engineering team; be able to outline a logical approach for solving a variety of complex engineering problems.

**CHNG2801****Conservation and Transport Processes  
Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Fariba Dehghani **Session:** Semester 1 **Classes:** 2 lectures per week for 1 semester, 1 hour tutorial per week for 1 semester and projects and self assisted learning (4 hours per week for 1 semester). **Prerequisites:** All core 1st year engineering units of study. **Assumed knowledge:** Calculus Computations (Matlab, Excel) Mass and Energy Balances **Assessment:** Competency based assessment, assessment weighting: Tutorials (20%) Quizzes (30%) Final examination and/or individual projects (30%) Group work and presentations (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

By the end of this unit of study, students should be proficient at applying the basic principles of mass, energy and momentum balances to solve engineering problems involving simple fluid flow, heat and mass transfer. Further, students will be able to perform simple dimensional analysis and to see the utility of this general approach in engineering: for example in friction factors, heat and mass-transfer correlations. Students will also develop skills in the basic design of different types of chemical reactors, given the corresponding chemical rate law.

The focus of this unit of study is to provide the key concepts and principles as tools through keynote lectures, with supporting tutorials and laboratory sessions giving valuable hands-on experience. Guidance will be provided to students to seek additional detailed information for specific applications in their projects.

This unit of study runs concurrently with another enabling technology unit of study CHNG2802. These two units together will provide students with the tools and know-how to tackle the real-life engineering problems encountered in the concurrent project-based unit of study, CHNG2803. This integrated course structure is designed to help students become familiar with the multi-disciplinary nature of chemical engineering today.

**CHNG2802****Applied Maths for Chemical Engineers  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lectures (2 hours per week for 1 semester), tutorials (2 hours per week for 1 semester). **Prerequisites:** All core 1st year engineering units of study. **Corequisites:** CHNG 2803 (Analysis Practice 1) CHNG 2801 (Conservation and Transport Processes) CHEM 2404 (Forensic and Environmental Chemistry) **Assumed knowledge:** Enrolment in this unit of study assumes that all core science and engineering UoS in first-year have been successfully completed. **Assessment:** Competency based assessment, assessment weighting: Tutorials (20%), Quizzes (30%), Final examination and/or individual projects (30%), Group work and presentations (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study consists of two main strands : statistical analysis of data and numerical (computer based) methods for solution of equation sets.

By the end of the statistical analysis strand, students should be proficient at applying the basic principles of statistical analysis, and appreciate how they can be applied to a variety of engineering applications. The following statistical tools are studied: normal distribution, the test statistic z, confidence intervals for the population mean, t-distribution, hypothesis testing, data fitting, uncertainty analysis, propagation of random errors and analysis of variance.

The numerical methods strand will see students become proficient at: solution of single and multivariable algebraic equations; solution of nonlinear differential equations; use of Excel and Matlab for data manipulation and equation solving; use of commercial flowsheeting software (Hysys) for solving engineering problems.

This unit of study runs concurrently with another enabling technology unit of study, CHNG2801. These two units together will provide students with the tools and know-how to tackle the real-life engineering problems encountered in the concurrent project-based unit of study, CHNG2803. This integrated course structure is designed to help students become familiar with the multi-disciplinary nature of chemical engineering today.

### CHNG2803

#### Energy and Fluid Systems Practice Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Assoc. Prof. Howard See **Session:** Semester 1 **Classes:** Projects and self assisted learning (8 hours per week) **Prerequisites:** All core engineering 1st year units of study. **Corequisites:** CHNG 2801 (Conservation and Transport Processes) CHNG 2802 (Applied Mathematics for Chemical Engineers) CHEM 2404 (Forensic and Environmental Chemistry) **Assumed knowledge:** Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems Ability to understand basic principles of physical chemistry, physics and mechanics. Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out computations with MATLAB and MS EXCEL. Ability to read widely outside of the technical literature, and to synthesise arguments based on such literature. Ability to write coherent reports and essays based on qualitative and quantitative information. **Assessment:** Projects (50%); Final examinations (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study is centred around real-life engineering projects which cover traditional and non-traditional domains of chemical engineering, and span the energy, chemical processing and bio-medical sectors.

By the end of this unit, students will be proficient in analysing complex fluid and energy networks and decomposing them into their essential component parts. Students will understand the functionality of each of these key components, and will be able to characterise the performance of the engineering network in terms of both component and system-wide variables. Students will also be able to take this information and explore the optimum operating conditions for the network.

This unit of study runs concurrently with two enabling technology units of study, CHNG2801 and CHNG2802. These two units will provide students with the tools and know-how to tackle the real-life engineering problems encountered in CHNG2803. This integrated course structure is designed to help students become familiar with the multi-disciplinary nature of chemical engineering today.

### CHNG2804

#### Chemical & Biological Systems Behaviour Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr Vincent Gomes **Session:** Semester 2 **Classes:** Lectures (1 hour per week for 1 semester), tutorials (2 hours per week for 1 semester). Projects and self assisted learning (4 hours per week for 1 semester). **Prerequisites:** All core 1st year engineering units of study. **Corequisites:** CHNG 2805 (Industrial Systems and Sustainability) CHNG 2806 (Analysis Practice 2 - Treatment, Purification and Recovery Systems) CHEM 2403 (Chemistry of Biological Molecules) **Assumed knowledge:** Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems Ability to understand basic principles of physical chemistry, physics and mechanics Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out

computations with MATLAB and MS EXCEL. **Assessment:** Competency based assessment; assessment weighting: Tutorials (10%), Quizzes (30%), Final examination and/or individual projects (30%), Group work and presentations (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

**Aims and Objectives:** Chemical Engineering requires an understanding of material and energy transformations and how these are driven by molecular interactions. The rate of such transformations is dependent on driving forces and resistances, and these need to be defined in terms of fundamental physical and chemical properties of systems.

This course seeks to provide students with a sound basis of the thermodynamics of chemical and biological systems, and how these, in turn, define limits of behaviour for such real systems. The thermodynamic basis for rate processes is explored, and the role of energy transfer processes in these highlighted, along with criteria for equilibrium and stability. Emphasis is placed on the prediction of physical properties of chemical and biological systems in terms of state variables. The course delivery mechanism is problem-based, and examples from thermal, chemical and biological processes will be considered, covering molecular to macro-systems scale.

The course builds naturally from the second year first semester course in conservation and transport processes, and prepares students fundamentally for the third year course in design of chemical and biological processes, which deals fundamentally with reaction / separation systems, and considers phase and chemical equilibria.

By the end of this unit of study a student should be competent in the following: Understanding the thermodynamic basis of rate processes; Predicting equilibrium and stability of chemical and biological systems from thermodynamic information; Predicting physical properties of such systems in terms of state variables; Using thermodynamic property information to analyse energy and material transfer processes in real systems.

### CHNG2805

#### Industrial Systems and Sustainability Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr John Kavanagh **Session:** Semester 2 **Classes:** Lectures (2 hour per week for 1 semester), tutorials (2 hours per week for 1 semester). Projects and self assisted learning (4 hours per week for 1 semester). **Prerequisites:** All core 1st year engineering units of study. **Corequisites:** CHNG 2804 (Chemical and Biological Systems Behaviour) CHNG 2806 (Analysis Practice 2 - Treatment, Purification & Recovery Systems) CHEM 2403 (Chemistry of Biological Molecules) **Assumed knowledge:** Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems Ability to understand basic principles of physical chemistry, physics and mechanics Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out computations with MATLAB and MS EXCEL. Ability to read widely outside of the technical literature, and to synthesise arguments based on such literature Ability to write coherent reports and essays based on qualitative information **Assessment:** Competency based assessment; assessment weighting: Tutorials and Group Presentations (10%), Tests (30%), Projects (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

**Aims and Objectives:** To develop an awareness of the various concepts which underpin Sustainable Development, including technical and economic efficiency, stewardship of the bio-physical environment, and social acceptability.

To examine the material economy from the perspective of open and closed thermodynamic systems, and the implications of this for resource consumption and waste generation

To explore governing frameworks for Sustainability, and engagement of chemical engineers with these.

To explore tools and approaches for quantifying industry's environmental performance and how this can be examined within a Sustainability framework.

To consider process design and operation, and product design, from a Sustainability perspective, how these can be informed by Green Engineering principles, and to suggest how this combination of perspectives could lead to a re-defined industry sector.

By the end of this UoS a student should be competent in: Understanding the thermodynamic basis of the material economy in terms of resource consumption and waste generation; Understanding the philosophical, social and political bases for sustainability, in addition to the technical, economic and environmental ones; Understanding the role of technology in promoting sustainability; Understanding corporate responsibilities with respect to sustainability; Quantifying the environmental performance of Australian and Global industries (with specific reference to the resource and processing sectors) using appropriate tools; Interrogating governing frameworks for sustainability to support actions within industry; Understanding the trade-offs in decisions which impact on sustainability; Being effective communicators of sustainability arguments to all stakeholders, and interpreters of social and environmental concerns in ways which can help shape industry practice.

### CHNG2806

#### Materials Purification and Recovery

##### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr Marjorie Valix **Session:** Semester 2 **Classes:** Projects and self assisted learning ( 8 hours per week for 1 semester.) **Prerequisites:** All core 1st year engineering units of study. **Corequisites:** CHNG2804 (Chemical and Biological Systems Behaviour) CHNG2805 (Industrial Systems and Sustainability) CHEM2403 (Chemistry of Biological Molecules) **Assumed knowledge:** Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems Ability to understand basic principles of physical chemistry, physics and mechanics Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out computations with MATLAB and MS EXCEL. Ability to read widely outside of the technical literature, and to synthesise arguments based on such literature Ability to write coherent reports and essays based on qualitative and quantitative information **Assessment:** Projects (50%); Final Examination (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

**Aims and Objectives:** To recognise that chemical engineers are involved in creation of products and processes, in manipulating complex systems, and in managing technical operations.

To develop an appreciation of the practical application of concepts and tools to real design problems in the process, product and service sectors in which chemical engineers are engaged.

To consider this through three project-driven case studies covering a range of integrated analysis scenarios, from the domain of energy and fluid systems.

This course is a concurrent requirement for the concept and enabling technology courses running in parallel in the same semester

By the end of this UoS a student should be proficient in the characterisation of process systems in which there is simultaneous transport of mass and energy, and optimise such systems around product quality objectives; characterisation of wastes and by-products in terms of their subsequent processing potential; understand biological processes to a level of being able to exploit them as reactive systems for product recovery; understand the tools of process analysis pertinent to such systems and to suggest design improvements to the component parts of such systems as part of process improvement. The three projects offered in this course module cover traditional and non-traditional domains of chemical engineering, and cover chemical and bio-chemical processing.

### CHNG3041

#### Exchange Program 3A

##### Engineering and Information Technologies

**Credit points:** 24 **Session:** Semester 1, Semester 2 **Prerequisites:** Completion of all Year 1 and 2 core units of study in Chemical Engineering, and at least 96 credit points towards the degree. Approval of the Heads of School of Chemical and Biomolecular Engineering at the University of Sydney and the host institution is required. **Assessment:** Individual approved subjects at the host institution are assessed according to their standard procedures and a grade of "R" satisfied requirements is recorded on their academic transcript from this institution. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

Year 3 elective unit of study for the degree in Chemical Engineering.

**Objectives/Outcomes:** The objective of this (single semester) Exchange Program is to provide students with the opportunity to live and learn in a foreign culture while completing the academic and professional requirements of the University of Sydney degree program. Upon completion of the full year-long exchange (i.e. both CHNG3041 and CHNG3042), students will have completed work at least equivalent to Year 3 in the Chemical Engineering degree, including in particular all Year 3 core units of study.

### CHNG3042

#### Exchange Program 3B

##### Engineering and Information Technologies

**Credit points:** 24 **Session:** Semester 1, Semester 2 **Prerequisites:** Completion of all Year 1 and 2 core units of study in Chemical Engineering, and at least 96 credit points towards the degree. Approval of the Heads of School of Chemical and Biomolecular Engineering at the University of Sydney and the host institution is required. **Assessment:** Individual approved subjects at the host institution are assessed according to their standard procedures and a grade of "R" satisfied requirements is recorded on their academic transcript from this institution. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

Year 3 elective unit of study for the degree in Chemical Engineering.

**Objectives/Outcomes:** The objective of this (single semester) Exchange Program is to provide students with the opportunity to live and learn in a foreign culture while completing the academic and professional requirements of the University of Sydney degree program. Upon completion of the full year-long exchange (i.e. both CHNG3041 and CHNG3042), students will have completed work at least equivalent to Year 3 in the Chemical Engineering degree, including in particular all Year 3 core units of study.

### CHNG3801

#### Process Design

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lectures (2 hours per week for 1 semester), tutorials (2 hours per week for 1 semester). **Prerequisites:** 12 credit points of junior Mathematics; 12 credit points of junior chemistry; ENGG1800; CHNG1103; CHNG2801; CHNG2802; CHNG2803; CHNG2804; CHNG2805; CHNG2806 **Corequisites:** CHNG3803 (Design Practice 1 - Chemical & Biological Processes) CHNG3802 (Operation, Analysis and Improvement of Industrial Systems) **Assumed knowledge:** Enrolment in this unit of study assumes that all (six) core chemical engineering UoS in second year have been successfully completed. **Assessment:** Competency based assessment; assessment weighting: Tutorials (20%), Quizzes (30%), Final examination and/or individual projects (30%), Group work and presentations (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This UoS is part of an integrated third-year program in chemical engineering. Completion of this body of work is required before a student will be permitted to move into the final-year with its emphasis on detailed design work, thesis based research and advanced engineering options.*

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study consists of three strands: reaction engineering; vapour-liquid equilibrium and distillation; heat transfer. The central aim is to show how these unit operations interact in the design and operation of process equipment.

The reaction engineering strand covers the following: development of appropriate kinetic rate laws; use of rate laws in designing continuous stirred tank, plug-flow and packed-bed reactors.

The second strand focuses on the following: numerical methods for predicting vapour-liquid equilibrium; binary and multi-component distillation; deviations from ideal behaviour.

The heat transfer strand covers the following issues: forced and natural convective heat transfer; shell and tube heat exchangers; heat transfer with phase change; radiative heat transfer.

The various strands make extensive use of computer software: Excel and Matlab for data manipulation and equation solving; commercial flowsheeting software (Hysys) for solving engineering design problems.

This unit of study runs concurrently with another enabling technology unit of study CHNG3802. These two units together provide students

with the tools and know-how to tackle real-life engineering problems encountered in the concurrent project-based unit of study, CHNG3803. This integrated course structure is designed to help students become familiar with the multi-disciplinary nature of chemical engineering today.

### CHNG3802 Operating/Improving Industrial Systems Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr John Kavanagh/Dr Ali Abbas  
**Session:** Semester 1 **Classes:** Lectures (2 hours per week for 1 semester), tutorials (2 hours per week for 1 semester). **Prerequisites:** 12 credit points of junior Mathematics; 12 credit points of junior Chemistry; CHNG1103; ENGG1800; CHNG2801; CHNG2802; CHNG2803; CHNG2804; CHNG2805; CHNG2806  
**Corequisites:** CHNG3801 (Process Design) CHNG3803 (Design Practice 1 - Chemical & Biological Processes) **Assumed knowledge:** Enrolment in this unit of study assumes that all (six) core chemical engineering UoS in second year have been successfully completed. **Assessment:** Competency based assessment; assessment weighting: Tutorials (10%), Quizzes (30%), Final examination and/or individual projects (30%), Group work and presentations (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This UoS is part of an integrated third-year program in chemical engineering. Completion of this body of work is required before a student will be permitted to move into the final-year with its emphasis on detailed design work, thesis based research and advanced engineering options.*

**Associated degrees:** B E, B S T, UG Study Abroad Program.

**Aims and Objectives:** All industrial processes require some process monitoring and control for satisfactory operation. The efficient use and recovery of energy is vital for industrial processes. The performance of a process may be improved via the implementation of some level of optimisation.

This unit of study commences with a component on process data management before moving on to empirical modelling and data reconciliation techniques. The second component will concentrate on the role of process control covering: the development of linear models, control system analysis, the design and performance of feedback control systems, advanced control systems and the use of control related software. In parallel, this unit of study also focuses on the efficient use of energy in process plants. The final component will focus on process optimisation of batch and continuous processes.

This unit of study demonstrates that: process control and optimisation are integral concepts for any modern plant; a unified approach allows a diversity of application fields to be readily handled via a consistent approach from data analysis, though process control to process optimisation. The unit of study will allow each student to achieve and demonstrate competency through a range of individual and group-based activities.

By the end of this unit of study a student should achieve competence in the following: process data management skills relevant to engineering (statistical analysis, data-based modelling and data reconciliation techniques); appreciation of the role of process control in modern manufacturing; designing an appropriate feedback control system and analysing its performance for a range of process applications using both traditional and software-based techniques; appreciation of the limitations of feedback control and be able to design a range of common enhancements; appreciation of the role of process optimisation in modern manufacturing; use of both traditional and software-based techniques to design optimisation schemes for a range of process applications and analyse the performance of such schemes; appreciate the limitations that exist whenever mathematical models are used as the basis for process control and/or optimisation; appreciate the 'vertical integration' that exists from modelling, through control, to optimisation.

### CHNG3803 Chemical/Biological Process Design Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr Vincent Gomes **Session:** Semester 1 **Classes:** Projects and self assisted learning (8 hours per week.) **Prerequisites:** 12 credit points of junior Mathematics; 12 credit points of junior Chemistry; CHNG1103; ENGG1800; CHNG2801; CHNG2802; CHNG2803; CHNG2804; CHNG2805; CHNG2806 **Corequisites:** CHNG3801 (Process

Design) CHNG3802 (Operation, Analysis and Improvement of Industrial Systems) **Assumed knowledge:** Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems. Ability to understand basic principles of physical chemistry, physics and mechanics. Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out computations with MATLAB and MS EXCEL. Ability to read widely outside of the technical literature, and to synthesise arguments based on such literature. Ability to write coherent reports and essays based on qualitative and quantitative information. **Assessment:** Projects (50%); Final Examination (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This UoS is part of an integrated third-year program in chemical engineering. Completion of this body of work is required before a student will be permitted to move into the fourth year.*

**Associated degrees:** B E, UG Study Abroad Program.

**Aims and Objectives:** To recognise that chemical engineers are involved in the creation of products and processes, in manipulating complex systems, and in managing technical operations; To develop an appreciation of the practical application of concepts and tools to real design problems in the process, product and service sectors in which chemical engineers are engaged; To consider this through three project-driven case studies covering a range of design scenarios, from the domain of chemical and biological processes.

This course is a concurrent requirement for the concept and enabling technology courses running in parallel in the same semester.

By the end of this unit of study a student should be proficient in: Developing a design strategy for integrated production of a liquid chemical product from a variety of raw materials, to specified purity, using a mix of chemical and biological synthesis techniques- and demonstrating this in project mode; Applying design and analysis tools for control and optimisation of the above process- and demonstrating this in project mode; Developing a strategy for chemical or biological product design, with a focus on characterisation of physical properties and functionality- and demonstrating this in project mode.

These three projects address the fundamentals of design of continuous processes, and the challenges inherent in them regarding their operation and optimisation.

### CHNG3804 Biochemical Engineering Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Fariba Dehghani **Session:** Semester 2 **Classes:** 1 x 1 hour lecture per week for 1 semester, 2 x 1 hr self directed group learning sessions per week for 1 semester. **Prerequisites:** 12 credit points of junior Mathematics; 12 credit points of junior Chemistry; CHNG1103; ENGG1800; CHNG2801; CHNG2802; CHNG2803; CHNG2804; CHNG2805; CHNG2806 **Assumed knowledge:** Enrolment in this unit of study assumes that all (six) core chemical engineering units of study in second year have been successfully completed. **Assessment:** Tutorials (10%), Quizzes (30%), Final examination and/or individual projects (30%), Group work and presentations (30%). **Practical field work:** 1 x 3 hour laboratory session per week for 1 semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is a third year elective in chemical engineering. The concepts and enabling technologies taught in this course are relevant to the real world practice of chemical engineering across a range of industries. Students with an interest in bio-engineering will find the background provided by this unit of study particularly useful in their fourth year research thesis.*

**Associated degrees:** B E, UG Study Abroad Program.

Biochemical engineering is increasingly playing an important role in technology to modern society. The engineers with knowledge of various aspects of biochemical processes are tremendously valuable. The course will examine cutting edge examples of biochemical technologies across a broad range of applications relevant to chemical engineering. The specific objectives of this course are to understand the history and scope of the biotechnology industry; examine the role of biochemical engineering in the industrial application of biotechnology and its development. We will provide an understanding of the major fundamental aspects of biochemical engineering and implementing the knowledge acquired to some selected industrial applications.

At the completion of this unit of study students should have developed an appreciation of the underlying principles of biochemical engineering and the ability to apply these skills to new and novel situations. The students will be able to critically analyse different types of biochemical

engineering processes and to improve these processes consistent with the principles of biochemical engineering.

Students are encouraged to engage in an interactive environment for exchange of information and develop problem-solving skills for successfully handling challenging engineering situations. This course will be assessed by quizzes, assignments and exams.

### CHNG3805

#### Product Formulation and Design

#### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrew Harris **Session:** Semester 2 **Classes:** lectures (2 hours per week for 1 semester), tutorials (1 hour per week for 1 semester) and projects and self assisted learning (4 hours per week for 1 semester) **Prerequisites:** 12 credit points of junior Mathematics; 12 credit points of junior Chemistry; CHNG1103; ENGG1800; CHNG2801; CHNG2802; CHNG2803; CHNG2804; CHNG2805; CHNG2806 **Corequisites:** CHNG3806 (Management of Industrial Systems) CHNG3807 (Design Practice 2 - Products and Value Chains) **Assumed knowledge:** Mass and Energy Balances Conservation and Transport Phenomena Applied Mathematics (for Chemical Engineering) Process Design Concepts Process Control and Optimisation Concepts **Assessment:** Competency based assessment; assessment weighting: Tutorials (20%), Quizzes (30%), Final examination and/or individual projects (30%), Group work and presentations (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This UoS is part of an integrated third-year program in chemical engineering. Completion of this body of work is required before a student will be permitted to move into the final-year with its emphasis on detailed design work, thesis based research and advanced engineering options.*

**Associated degrees:** B E, B S T, UG Study Abroad Program.

Product design is one of the new frontiers of chemical and biomolecular engineering. Many products emerge from their processing not as a continuous stream, but as discrete entities. There are many examples of discrete systems in chemical and biomolecular engineering; these include particulate systems (e.g. powders or solid particles in fluids), as well as polymeric and biological systems (e.g. emulsions and cells, respectively). This unit of study is an introduction to the basic concepts in discrete systems necessary for a chemical engineer to be able to formulate and design discrete products with desired properties. In essence it is a course on product formulation and design.

The unit of study will provide students with a working knowledge of the types of discrete systems available, the ways in which particulate systems can be characterized and their applications in industry. These aspects will form the foundation for an introduction to the common techniques used to model discrete systems. By the end of the unit of study students should be proficient at understanding the types of discrete systems available, and the techniques used to characterise particulate systems, understanding the basic principles of particle-fluid systems, applying these principles and solving simple problems in product design and particulate engineering.

### CHNG3806

#### Management of Industrial Systems

#### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Adjunct Assoc. Prof. Donald White **Session:** Semester 2 **Classes:** Lectures (2 hours per week for 1 semester), tutorials (2 hours per week for 1 semester). Projects and self assisted learning (4 hours per week for 1 semester). **Prerequisites:** 12 credit points of junior Mathematics; 12 credit points of junior Chemistry; CHNG1103; ENGG1800; CHNG2801; CHNG2802; CHNG2803; CHNG2804; CHNG2805; CHNG2806 **Corequisites:** CHNG3805 (Product Formulation and Design) CHNG3807 (Design Practice 2 - Products and Value Chains) **Assumed knowledge:** Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems Ability to understand basic principles of physical chemistry, physics and mechanics Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out computations with MATLAB and MS EXCEL. Ability to read widely outside of the technical literature, and to synthesise arguments based on such literature Ability to write coherent reports and essays based on qualitative information **Assessment:** Competency based assessment; assessment weighting: Tutorials (10%), Quizzes (30%), Final examination and/or individual projects (30%), Group work and presentations (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This UoS is part of an integrated third-year program in chemical engineering. Completion of this body of work is required before a student will be permitted to move into the fourth year.*

**Associated degrees:** B E, B S T, UG Study Abroad Program.

**Aims and Objectives:** To develop an appreciation of management practice in process-led and product-driven industries; considering project management, economic evaluation of processes, risk assessment and decision making with multiple objectives and uncertainty; to develop the requisite tools to support above; to consider approaches to innovation and entrepreneurship; to consider all this in the context of different scales of operation - from single process, to business unit, to enterprise, and across supply and value chains; to support this analysis through real-problem case studies and projects.

By the end of this unit of study a student should be competent in: developing project work plans in conjunction with project management schedules; performing economic evaluations of projects, plans and processes; performing qualitative risk assessments of projects, plans and processes; exploring optimisation of complex processes under risk and uncertainty, covering unit operations, business units, enterprises and value chains.

### CHNG3807

#### Products and Value Chains

#### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrew Harris **Session:** Semester 2 **Classes:** Projects and self assisted learning (8 hours per week for 1 semester.) **Prerequisites:** 12 credit points of junior Mathematics; 12 credit points of junior Chemistry; CHNG1103; ENGG1800; CHNG2801; CHNG2802; CHNG2803; CHNG2804; CHNG2805; CHNG2806 **Corequisites:** CHNG3805 (Product Formulation and Design) CHNG3806 (Management of Industrial Systems) **Assumed knowledge:** Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems. Ability to understand basic principles of physical chemistry, physics and mechanics. Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out computations with MATLAB and MS EXCEL. Ability to read widely outside of the technical literature, and to synthesise arguments based on such literature. Ability to write coherent reports and essays based on qualitative and quantitative information. **Assessment:** Projects (50%); Final examinations (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is part of an integrated third-year program in chemical engineering. Completion of this body of work is required before a student will be permitted to move into the fourth year.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study is designed to give students experience at solving complex, interesting, real world engineering problems, by applying theoretical and experimental principles learnt during their studies. During the unit of study students will be required to work on three project-driven case studies covering a range of design scenarios, from the domain of particulate products, entrepreneurial ventures (business 'start ups'), ethics and product value chains. This unit of study is a concurrent requirement for the concept and enabling technology courses running in parallel in the same semester. By the end of the unit of study students should be proficient at developing a strategy for taking a product development idea from concept to commercial artefact - with a comprehensive appreciation of economic arguments, underlying uncertainties (and how to mitigate these), and consideration of trade-offs inherent in this development. They should also be able to apply design and analysis tools for the synthesis of particulate products leading to the manufacture of a preferred product at pilot scale and be able to develop a strategy for the design and analysis of extended business enterprises. A key aspect of the unit of study is that students demonstrate these outcomes in project mode. The three projects in the unit of study address "issues of scale" of chemical and biomolecular engineering, from molecular to macro-systems levels.

### CHNG3808

#### Polymer Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** A/Professor Vincent Gomes, Department of Chemical Engineering, Room 452, 9351 4868, vgomes@chem.eng.usyd.edu.au **Session:** Semester 1 **Classes:** Lectures (2 hours per week for 1 semester), tutorials and laboratory sessions (2 hours per week for 1 semester). **Prerequisites:** 12 credit points of junior Mathematics; 12 credit points of junior Chemistry; CHNG1103; ENGG1800; CHNG2801; CHNG2802; CHNG2803; CHNG2804; CHNG2805; CHNG2806 **Assumed knowledge:** Completion of CHNG3801; CHNG3802; CHNG3803 and currently enrolled in CHNG3805, CHNG3806, CHNG3807. **Assessment:** Tutorials (10%),

Quizzes (30%), Final examination and/or individual projects (35%), Group work and presentations (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

Polymers are ubiquitous and a significant number of scientists and engineers are employed by the Polymer Industry. This unit of study will facilitate engagement with a broad spectrum of engineering knowledge base that range from polymer synthesis to design of polymer products to developing sustainable technology in polymer synthesis and applications. The industrial applications range from biomedical to electronics and semiconductors to nanotechnology, in addition to usual consumer products. Technical knowledge relating to polymer chemistry, mathematics, fluid and solid mechanics, heat transfer, mass transfer and reaction engineering will be applied for the planned outcomes of this course.

The specific objectives are: To analyse molecular structures and their relations with material properties; To investigate the variety of thermal and thermo-mechanical properties relevant for probing polymer structure as well as understanding material behaviour in the context of applications; To engage with rheological characterization of polymers to probe polymer structural as well as to understand material behaviour in the context of applications; To understand the principles of polymer synthesis and to design polymerization reactors for producing polymer resins; To understand the principles of polymer processing in order to design polymeric products for consumer and specialty applications; To critically analyze production of polymeric goods from the sustainability point of view; To engage with examples of cutting-edge engineering product and process designs and applications that encompass biomedical, nanotechnology, electronics and other emerging technologies.

At the completion of this Unit of Study students should have developed: An appreciation of the underlying principles of polymer engineering; The ability to apply these skills to new and novel situations; The ability to critically analyse the methods of manufacture of different products and processes and to improve these processes; The development of an integrated suite of problem-solving skills needed to successfully handle new engineering applications; An ability to independently research and be critical of the findings; An ability to analyze experimental data; An ability to carry out process and product design through critical thinking; Interpersonal, group and teamwork skills including the ability to communicate clearly and concisely; Professionalism in terms of taking responsibility for the results of their calculations and recommendations; Lifetime or self-directed learning skills including the ability to critically assess one's own performance in a constructive manner.

#### CHNG4001

##### Practical Experience

##### Engineering and Information Technologies

**Teacher/Coordinator:** Dr Marjorie Valix **Session:** Semester 1, Semester 2 **Classes:** There are no formal classes. Students are required to obtain a minimum of 10 weeks practical work experience before entering their 4th Year. **Assumed knowledge:** Advisory prerequisite: 28 credit points of 3rd year units **Assessment:** By submission of a report of approximately 2500 words on the industrial experience undertaken. The report will cover the nature of the industry, the company's organisational relationships both internally and externally and a technical section devoted to the work performed by the student. The report is to be submitted before the end of the first week of the 4th academic year. **Practical field work:** A minimum of 10 weeks work experience in a Chemical Engineering related industry. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B E.

Fourth year core unit of study for the degree in Chemical Engineering.

**Objectives/Outcomes:** To obtain first-hand experience of the way chemical engineering skills are employed in an industrial context.

**Syllabus Summary:** Each student is required to work as an employee of an approved organisation and to submit a report on that work. The employment undertaken must be relevant to Chemical Engineering and should be discussed, before acceptance, with a member of the Department of Chemical Engineering. While the responsibility for obtaining satisfactory employment rests with the student, the

Department, through the Chemical Engineering Foundation, and the Careers and Appointments Service will assist wherever possible.

#### CHNG4003

##### Advances in Chemical Engineering A

##### Engineering and Information Technologies

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Classes:** Two (1hr) lectures plus one (1 hr) tutorial per week for one semester. **Assumed knowledge:** Knowledge of modern chemical engineering principles and practice. **Assessment:** Depending on the project, an assortment of: Case Study reports; oral presentations; assignments; projects; quizzes; final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

Fourth year elective unit of study for the degree in Chemical Engineering.

**Objectives/Outcomes:** The objective of this unit of study is to provide students with exposure to the latest developments in research and technology.

**Syllabus:** This unit will discuss the impact of current research and new technology on the profession of chemical engineering. It will address the changes that are taking place in industrial processes as a result of these new technologies. The syllabus details will change from time to time as specialist lecturers become available.

#### CHNG4006

##### Professional Option

##### Engineering and Information Technologies

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Classes:** There are no formal classes for this course. **Assumed knowledge:** Passed at least 144 credit points. **Assessment:** Written report or oral presentation or poster presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Student must be in the final semester of their degree program.*

**Associated degrees:** B E.

Fourth year elective unit of study for the degree in Chemical Engineering.

**Objectives/Outcomes:** The objective of this course is to provide students with experience in how to prepare and present a technical report.

**Syllabus:** This course requires a student to carry out an assignment related to the profession of chemical engineering - this will normally consist of a discussion of the design or operation of an industrial process. The discussion will be presented in the form of a written report, as a seminar, or both.

#### CHNG4041

##### Exchange Program 4A

##### Engineering and Information Technologies

**Credit points:** 24 **Session:** Semester 1, Semester 2 **Prerequisites:** Completion of all Year 1, 2 and 3 core units of study in Chemical Engineering, and at least 144 credit points towards the degree. Approval of the Heads of School of Chemical and Biomolecular Engineering at the University of Sydney and at the participating exchange institution. **Assessment:** Students spend either one academic year or semester at the host institution where they take a normal load. Their specific course choices are approved by the Heads of Department of the two institutions. Individual approved subjects at the host institution are assessed according to their standard procedures and a grade of "R" satisfied requirements will be recorded on their academic transcript from this institution. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

Year 4 elective unit of study for the degree in Chemical Engineering.

**Objectives/Outcomes:** The objective of this (single semester) Exchange Program is to provide students with the opportunity to live and learn in a foreign culture while completing the academic and professional requirements of the University of Sydney degree program. Upon completion of the full year-long exchange (i.e. both CHNG4041 and CHNG4042), students will have completed work at least equivalent to Year 4 in the Chemical Engineering degree, including in particular

the Year 4 core units of study, and will have fulfilled all the requirements of their degree from the University of Sydney.

### CHNG4042

#### Exchange Program 4B

#### Engineering and Information Technologies

**Credit points:** 24 **Session:** Semester 1, Semester 2 **Prerequisites:** Completion of all Year 1, 2 and 3 core units of study in Chemical Engineering, and at least 144 credit points towards the degree. Approval of the Heads of School of Chemical and Biomolecular Engineering at the University of Sydney and at the participating exchange institution. **Assessment:** Students spend either one academic year or semester at the host institution where they take a normal load. Their specific course choices are approved by the Heads of Department of the two institutions. Individual approved subjects at the host institution are assessed according to their standard procedures and a grade of "R" (satisfied requirements) is recorded on their academic transcript at this institution. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

Year 4 elective unit of study for the degree in Chemical Engineering. **Objectives/Outcomes:** The objective of this (single semester) Exchange Program is to provide students with the opportunity to live and learn in a foreign culture while completing the academic and professional requirements of the University of Sydney degree program. Upon completion of the full year-long exchange (i.e. both CHNG4041 and CHNG4042), students will have completed work at least equivalent to Year 4 in the Chemical Engineering degree, including in particular the Year 4 core units of study, and will have fulfilled all the requirements of their degree from the University of Sydney.

### CHNG4203

#### Major Industrial Project

#### Engineering and Information Technologies

**Credit points:** 24 **Session:** Semester 1 **Classes:** Student spends six months at an industrial placement working on a Chemical Engineering project. **Prerequisites:** Passed at least 144 credit points. Students wishing to do this unit of study are required to discuss the matter with the Head of School prior to enrolment. **Assessment:** Thesis; case study reports; oral presentations; poster presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment. Note: WAM greater than credit average.*

**Associated degrees:** B E.

This unit of study will give students a rich experience in carrying out a major project within an industrial environment, and in preparing and presenting detailed technical reports (both oral and written) on their work.

The project is carried out under joint University/industry supervision and extends over several months, with the student essentially being engaged fulltime on the project at the industrial site. Previous students have been placed with industries in areas including the mining industry, oil and gas processing, plastic and paint manufacture, food production, manufacturing and so on. Students will learn from this experience the following essential engineering skills : how to examine published and experimental data, set objectives, organise a program of work, and analyse results and evaluate these in relation to existing knowledge. Presentation skills will also be developed, which are highly relevant to many branches of engineering activity.

### CHNG4802

#### Chemical Engineering Design A

#### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Adjunct Assoc. Prof. Don White **Session:** Semester 1 **Classes:** Lectures (2 hours per week for 1 semester), tutorials (2 hours per week for 1 semester), group work (2 hours per week for 1 semester). **Prerequisites:** CHNG3801 Process Design CHNG3802 Operation, Analysis and Improvement of Industrial Systems CHNG3803 Design Practice 1 - Chemical & Biological Processes CHNG3805 Product Formulation and Design CHNG3806 Management of Industrial Systems CHNG3807 Design Practice 2 - Products and Value Chains **Assumed knowledge:** Enrolment in this unit of study assumes that all (six) core chemical engineering unit of study in third year have been successfully completed. **Assessment:** Final examination and/or individual projects (30%), Group work and presentations (50%), Quizzes

and tutorials (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit of study is part of an integrated (two semester) fourth year program in chemical engineering design whose overarching aim is to complete the 'vertical integration' of knowledge - one of the pillars on which this degree program is based.*

**Associated degrees:** B E, UG Study Abroad Program.

**Aims and Objectives:** In the overall design process, chemical engineers must clearly understand the (often complex) interactions and trade-offs that occur between technical, economic, social and environmental considerations. This unit of study builds on concepts in each of these areas introduced in previous years but with an emphasis on their successful integration within a comprehensive design activity. This design activity is spread over two unit of study (Chemical Engineering Design A and B) run in first and second semester. The primary aim in the first unit of study is to consider the technical issues -with an emphasis on creating and evaluating a range of alternative options that exist at both the unit operation and complete flowsheet levels. The primary emphasis in the subsequent unit of study is on evaluating how non-technical considerations affect the final process design and its operation.

By the end of both units of study a student should be able to develop a wide range of alternative conceptual designs for a given product specification and market analysis, have an appreciation of how to evaluate process alternatives at the conceptual level with a view to creating a 'short-list' worthy of more detailed technical investigation, be familiar with the use of process flowsheeting software to compare alternative designs , appreciate the fact that technical considerations are only one component in an overall successful design project and be able to clearly present the results from both individual and group work in oral/written formats.

### CHNG4806

#### Chemical Engineering Design B

#### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Adjunct Assoc. Prof. Don White **Session:** Semester 2 **Classes:** Lectures (Average 1-2 hours per week for 1 semester), group work 8-10 hours per week for 1 semester). **Prerequisites:** CHNG4802 Chemical Engineering Design A or CHNG4203 MIPPS **Assumed knowledge:** Enrolment in this unit of study assumes that all core chemical engineering units of study in third-year have been successfully completed, as well as the related first semester unit of study Chemical Engineering Design A. **Assessment:** Group work contribution, Group Report and presentations (80%), Individual projects (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit of study is part of an integrated (two semester) fourth year program in chemical engineering design whose overarching aim is to complete 'vertical integration' of knowledge - one of the pillars on which this degree program is based.*

**Associated degrees:** B E, UG Study Abroad Program.

**Aims and Objectives:** In the overall design process, chemical engineers must clearly understand the (often complex) interactions and trade-offs that occur between technical, economic, social and environmental considerations. This unit of study builds on concepts in each of these areas introduced in previous years but with an emphasis on their successful integration within a comprehensive design activity. This design activity is spread over two unit of study (Chemical Engineering Design A or MIPPS run in first semester and Design B in second semester. The primary emphasis in this semester is on evaluating the interactions between the technical and non-technical considerations, and how they affect the final process design and its operation.

By the end of this unit of study a student should be able to develop a wide range of alternative conceptual designs for a given product specification and market analysis, have an appreciation of how to evaluate process alternatives at the conceptual level with a view to creating a 'short-list' worthy of more detailed technical investigation, be familiar with the use of process flowsheeting software to compare alternative designs , appreciate the fact that technical considerations are only one component in an overall successful design project and be able to clearly present the results from both individual and group work in oral/written formats.

**CHNG4811****Honours Thesis A****Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrew Harris **Session:** Semester 1 **Prerequisites:** CHNG3801 Process Design CHNG3802 Operation, Analysis and Improvement of Industrial Systems CHNG3803 Design Practice 1 - Chemical & Biological Processes CHNG3805 Product Formulation and Design CHNG3806 Management of Industrial Systems CHNG3807 Design Practice 2 - Products and Value Chains. This unit is available to only those students who have gained an entry to the Honours degree. **Prohibitions:** CHNG4801 Chemical Engineering Thesis A, CHNG4813 Engineering Project A **Assumed knowledge:** Enrolment in this unit of study assumes that all (six) core chemical engineering UoS in third year have been successfully completed. **Assessment:** Oral Presentation (40%), Progress Report (including literature review) (60%). The final grade is based on the work done in both Honours Thesis A and Honours Thesis B, and will be awarded upon successful completion of Honours Thesis B. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Students are expected to take the initiative when pursuing their research projects. The supervisor will be available for discussion - typically 1 hour per week.*

**Associated degrees:** B E, UG Study Abroad Program.

The ability to plan, systematically conduct and report on a major research project is an important skill for professional engineers. This unit of study builds on technical competencies introduced in previous years, as well as making use of the report writing and communications skills the students have developed. The research activity is spread over two units (Chemical Engineering Thesis A and B) run in first and second semester. In this unit of study, students are required to plan and begin work on a major research project, which is very often some aspect of a staff member's research interests. Some of the projects will be experimental in nature, while others may involve computer-based simulation, design or literature surveys. In this unit, students will learn how to examine published and experimental data, set objectives, organize a program of work and devise an experimental or developmental program. The progress at the end of Thesis A will be evaluated based on a seminar presentation and a progress report. The skills acquired will be invaluable to students undertaking engineering work.

**CHNG4812****Honours Thesis B****Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrew Harris **Session:** Semester 2 **Prerequisites:** CHNG4811 Honours Thesis A **Prohibitions:** CHNG4805 Chemical Engineering Thesis B, CHNG4814 Engineering Project B **Assumed knowledge:** Enrolment in this unit of study assumes that Honours Thesis A and all (six) core chemical engineering units of study in third year have been successfully completed. **Assessment:** Progress Report and presentation (20%), Thesis (70%), Oral presentation (10%). The final grade is based on the work done in both Chemical Engineering Research Thesis A and B, and will be awarded upon successful completion of Chemical Engineering Research Thesis B. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students are expected to take the initiative when pursuing their research projects. The supervisor will be available for discussion - typically 1 hour per week.*

**Associated degrees:** B E, UG Study Abroad Program.

The ability to plan, systematically conduct and report on a major research project is an important skill for professional engineers. This unit of study builds on technical competencies introduced in previous years, as well as making use of the report writing and communications skills the students have developed. The research activity is spread over two units (Honours Thesis A and B) run in first and second semester. In this unit of study, the primary emphasis is on the execution of a comprehensive and systemic series of investigations, and the reporting of the study in a major thesis document and an oral presentation. Students will acquire skills in developing a plan for a series of studies to illuminate an area of research, in evaluating alternatives at the conceptual level with a view to creating a 'short-list' worthy of more detailed technical investigation, and in searching the literature for guidance of the studies. Further, communication skills will be developed, such as the ability to clearly present the background and results in a written format and in an oral presentation to a general engineering audience. This UoS is part of an integrated (two semester) fourth year program involving a chemical engineering research project

and thesis. It has the overarching aim of completing the 'vertical integration' of knowledge - one of the pillars on which this degree program is based. Students who have successfully completed CHNG4203 Major Industrial Project may apply for exemption from this unit of study and replace it with an advanced level chemical engineering elective unit of study.

**CHNG4813****Engineering Project A****Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrew Harris **Session:** Semester 1 **Prerequisites:** CHNG3801 Process Design CHNG3802 Operation, Analysis and Improvement of Industrial Systems CHNG3803 Design Practice 1 - Chemical & Biological Processes CHNG3805 Product Formulation and Design CHNG3806 Management of Industrial Systems CHNG3807 Design Practice 2 - Products and Value Chains. **Prohibitions:** CHNG4805 Chemical Engineering Thesis B, CHNG4811 Honours Thesis A **Assumed knowledge:** Enrolment in this unit of study assumes that all (six) core chemical engineering UoS in third year have been successfully completed. **Assessment:** Oral Presentation (40%), Progress Report (including literature review) (60%). The final grade is based on the work done in both Engineering Project A and B, and will be awarded upon successful completion of Engineering Project B. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

#### Green Engineering

##### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrew Harris Department of Chemical Engineering Room 450 - 9351 2926 aharris@chem.eng.usyd.edu.au **Session:** Semester 2 **Classes:** 1 x 1 hour lecture per week, 2 x 1 hr self directed group learning sessions per week, and 1 x 3 hour laboratory session per week for 1 semester. **Assumed knowledge:** Enrolment in this unit of study assumes that all (six) core chemical engineering UoS in third year have been successfully completed. **Assessment:** Students will be assessed upon their performance in five case studies. Students will work in groups to solve real world engineering problems. They will document and report their findings using technical reports and oral presentation sessions. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

Green engineering, eco-technology and sustainable technology are all interchangeable terms for the design of products and processes that maximise resource and energy efficiency, minimise (or preferably eliminate) waste and cause no harm to the environment. In modern society, engineers equipped with the skills to develop sustainable technologies are tremendously valuable. This unit of study will examine cutting edge examples of sustainable technologies across a broad range of applications relevant to chemical and biomolecular engineering. The delivery of teaching and learning material will be exclusively in project mode. Students will be expected to critically analyse modern engineering processes and improve them, from the ground up if necessary, so that they satisfy the criteria of eco-design. At the completion of this unit of study students should have developed an appreciation of the underlying principles of green engineering and be able to demonstrate they can apply these skills to new and novel situations. Students are expected to develop an integrated suite of problem-solving skills needed to successfully handle novel (and previously unseen) engineering situations, coupled with an ability to independently research new areas and be critical of what is found, and an ability to cope with experimental data, change and uncertainty through critical thinking.

### CHNG5004

#### Particles and Surfaces

##### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr. Peter Linkson **Session:** Semester 1 **Classes:** Lectures (2 hours per week for 1 semester), tutorials (2 hours per week for 1 semester), practicals (10 hours per semester). **Assumed knowledge:** Enrolment in this unit of study assumes that all (six) core chemical engineering UoS in third year and all unit operations have been successfully completed. **Assessment:** Tutorials (15%), Quizzes (30%), Final examination and/or individual projects (55%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This UoS is an advanced Chemical Engineering elective.*

**Associated degrees:** B E, UG Study Abroad Program.

Particles and Surfaces: Mineral Processing. Aims and Objectives: Solid-solid and solid-liquid interactions are an important aspect in mineral processing. The aim of any mineral processing operation is the efficient extraction of the valuable metals or minerals (concentrate) from the waste materials in the ore (gangue). The goal of this course is to understand the various key steps and the corresponding principles required to achieve metal extraction from the ores.

Syllabus summary: This course will elucidate the principles in size reduction or comminution of the ore in liberating the valuable minerals, examine the microscopic details of solid-liquid, solid-gas and solid-solid interactions in mineral processing and their roles in macroscopic phenomena such as adhesion, wetting, adsorption, and mineral

reactions such as reduction roasting and leaching. The general understanding of these factors will allow manipulation and improvement of performance in mineral beneficiation, dewatering of mineral slurries and extractive metallurgy.

By the end of this course students should develop a proficiency in characterisation of physical, surface and chemical properties of solids and metal aqueous streams; devising strategies to achieve extraction process objectives, within the constraints imposed by social, economic and physical environments, developing management strategies for treating liquid and solid effluents and becoming familiar with computer software packages in modelling aqueous and solid systems.

### CHNS1101

#### Chinese 1A (For Beginners)

##### Arts

**Credit points:** 6 **Session:** Semester 1, Summer Main **Classes:** 5 class hours per week of which one may be required language laboratory work **Corequisites:** Students are strongly advised to take ASNS1101, Introduction to Chinese Civilisation. **Prohibitions:** HSC Chinese for Background Speakers; eligibility for CHNS1201 or higher **Assumed knowledge:** This unit of study is suitable for complete beginners and for those students who, in the department's judgement, are best advised to go back to the beginning. **Assessment:** (Subject to revision) classwork (10%); oral exercises (e.g., role play exercises, interview) (25%); two major tests (40% in total) and shorter tests; quizzes and other language exercises (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students must attend a placement interview with a staff member of the department of Chinese Studies prior to enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program, UG Summer/Winter School.

This unit is an introduction to Modern Standard Chinese for beginners. Foundation work on pronunciation, pinyin romanisation, elementary grammar and the Chinese writing system will be followed by an integrated program of grammar learning, vocabulary development and training in the skills of listening and speaking. Students will learn to read and write approximately 350 characters.

### CHNS1201

#### Chinese 1C (For Advanced Beginners)

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 4 class hours per week. Language laboratory work will be required **Corequisites:** Students are strongly advised to take ASNS1101, Introduction to Chinese Civilisation **Prohibitions:** HSC Chinese for Background Speakers; eligibility for higher-level classes **Assumed knowledge:** Native- or near-native-speaker fluency in a spoken Chinese language (e.g., putonghua, Cantonese) combined with no, or very limited, knowledge of characters. **Assessment:** (Subject to revision) classwork (20%); two oral presentations (10% each); vocabulary quizzes (10%), four composition tests or exercises (20%) and two major reading/writing tests (15%)

each). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students must attend a placement interview with a staff member of the department of Chinese Studies prior to enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

A fast-paced intermediate unit of study intended primarily for native and fluent "background" speakers of Chinese languages, including Cantonese, who know few (up to about 200) characters or none at all. The objective is rapid development of Chinese-language proficiency to equip students for advanced work in Chinese Studies. Emphases include reading and writing skills and standard putonghua pronunciation.

#### Chinese 2A (Lower Intermediate)

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 4 or 5 hours per week. Additional language laboratory work may be expected **Prerequisites:** CHNS1102 **Prohibitions:** HSC Chinese for Background Speakers or equivalent, CHNS2101 **Assumed knowledge:** One year (approx. 5 hours per week for 26 weeks) of Chinese at introductory level, preferably using full-form characters. **Assessment:** Classwork (10%); short compositions equivalent to 1000 words (20%); group performance, including written script (10%); three 1-hour tests

(20% each). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Intermediate unit of study in Modern Standard Chinese. Rapid vocabulary expansion, strengthening of reading, writing, listening and speaking skills, and sophistication of grammatical knowledge will be pursued in integrated fashion. Students must expect to work hard, using private study time to full advantage. On completion of this unit of study, students should have active use of up to about 1000 characters and be able to engage in simple discussions, write short compositions and read fluently within their vocabulary range.

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof H. Dunstan **Session:** Semester 1 **Classes:** 3 class hours per week **Prerequisites:** CHNS1102 or CHNS1202 or CHNS2602 or CHNS3602 or CHNS3604 or CHNS2102 or CHNS3104 or CHNS2204 or department permission **Prohibitions:** HSC Chinese for Background Speakers (or equivalent), CHNS2111, CHNS2903, CHNS1313 **Assumed knowledge:** Minimum of one year of Chinese at introductory level, preferably using full-form characters **Assessment:** Classwork (10%); two 30-minute tests (5% each); three 40-minute tests (20% each); cultural exploration project resulting in an essay of 1500 words (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Foundation work in Classical Chinese, an ancient language that still plays a role in modern China and that often challenges Western notions of how languages behave. Students will develop a basic understanding of the grammar and vocabulary, thus equipping themselves for exploration of China's distinctive philosophical and literary traditions in the original language. They will undertake supplementary reading in English on a topic of their choice, thus enriching their knowledge of premodern Chinese culture.

### CHNS2612

#### Classical Chinese B

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr D. Herforth **Session:** Semester 2 **Classes:** 3 class hours per week **Prerequisites:** CHNS2611; or CHNS2111; or HSC Chinese for Background Speakers (or equivalent) plus department

permission; or CHNS1313 plus department permission or CHNS2903  
**Prohibitions:** CHNS2112, CHNS2904, CHNS1314 **Assessment:** Classwork (10%); three 50-minute tests (20% each); homework exercises (10%); cultural exploration project resulting in an essay of 1500 words (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Continued study of Classical Chinese grammar and vocabulary through original texts. Students will gain the knowledge and confidence to explore a wider range of ancient and early-imperial Chinese philosophical and literary writings, including some poetry, thereby acquainting themselves with certain major authors in the Chinese tradition. Supplementary reading in English will enable them to broaden and deepen their understanding of Chinese culture while practising some basic research skills.

### CHNS2650

#### Chinese In-Country Study A

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prerequisites:** CHNS1102 or CHNS1202 (or a sequel within the same stream); or any senior CHNS unit of study whose numeric code has 60 as the second and third digits. Native speakers of Chinese who can read Chinese fluently and seek special permission to undertake in-country study after first year must present a coherent academic rationale to the department. **Assumed knowledge:** At least a year of Modern Standard Chinese at tertiary level (or equivalent). The department recommends that students complete at least two years of Chinese from beginning level prior to undertaking a full semester of in-country study. **Assessment:** As prescribed by the host institution. On successful completion of this unit of study, students will receive a "Satisfied Requirements" result at the University of Sydney. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

Enrolment in an approved semester-based program of study (normally intermediate or advanced Modern Standard Chinese language-training) at a tertiary institution in China or Taiwan. Students can earn 6 credit points for every 52 hours of Chinese-language class in China or Taiwan, to a maximum of 24 credit points in any one semester. Credit may also be awarded at the rate of 6 credit points per 4 full weeks of intensive study after completion of an approved summer in-country Chinese-language program.

### CHNS3601

#### Chinese 3A (Upper Intermediate)

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Y. Wang **Session:** Semester 1 **Classes:** 4 class hours per week. Language laboratory work will be required **Prerequisites:** CHNS2602 or CHNS2102 **Prohibitions:** HSC Chinese for Background Speakers or equivalent; CHNS3103 **Assumed knowledge:** Two years of university-level Chinese-language instruction for students without prior knowledge of Chinese. **Assessment:** Classwork (20%); two 1-hour tests (40% in total); group presentation and interview (20%); short quizzes (10%); Chinese-language writing assignments (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Upper-intermediate unit of study in Modern Standard Chinese. Proficiency in reading will be developed through study of Chinese-language texts on a range of social and cultural topics, short Chinese-language narratives, etc. Speaking, listening and writing will be enhanced through advanced language exercises, including composition and discussion, with due attention to the more sophisticated skills (e.g., use of appropriate registers, intelligent dictionary use, expressing ideas on more complex issues than at lower-intermediate level).

### CHNS3602

#### Chinese 3B (Upper Intermediate)

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Y. Wang **Session:** Semester 2 **Classes:** 4 class hours per week. Language laboratory work will be required **Prerequisites:** CHNS3601 or CHNS3103 **Prohibitions:** HSC Chinese for Background Speakers or equivalent; CHNS3104 **Assumed knowledge:** Two and a half years of university-level Chinese-language instruction for students without prior knowledge of Chinese. **Assessment:** Classwork (20%); two 1-hour tests (40% in total); group presentation and interview (20%); short quizzes (10%); Chinese-language writing assignments (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Continuation of Chinese 3A (Upper Intermediate). Continuing development of Chinese-language literacy through study of texts on a range of social and cultural topics, including some authentic literary texts. Further enhancement of speaking, listening and writing skills through advanced language exercises, including composition and discussion. Upon completion, students should be comfortable with both full-form and simplified characters, use dictionaries and language

registers discerningly, and be confident of their ability to express ideas and arguments effectively in Chinese.

### CHNS3603

#### Chinese 4A (Advanced)

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 or 4 hours per week **Prerequisites:** CHNS1202 or CHNS3602 or CHNS3104 **Prohibitions:** HSC Chinese for Background Speakers or equivalent; CHNS2203; CHNS2204 **Assessment:** (Subject to revision) classwork (20%); two 1-hour tests (20% each); group presentation (10%); Chinese-language writing assignments, at least one of which may be done under test conditions (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Advanced training in modern Chinese language, with a focus on reading. By studying a range of literary and non-literary texts, graded for difficulty, students will acquire the reading skills necessary for advanced work in Chinese Studies. They will enrich their knowledge of Chinese as a vehicle for discussion of important issues, while developing their own skills in oral and written expression of relatively complex subject matter. They will also acquaint themselves with some major Chinese authors.

### CHNS3605

#### Advanced Chinese Studies A

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 class hours per week **Prerequisites:** CHNS3604 or Distinction in CHNS3602. (Note: students who have earned a Distinction in CHNS3602 will be permitted to take this subject either with or instead of Chinese 4A). **Prohibitions:** HSC Chinese for Background Speakers (or equivalent). **Assessment:** Classwork (20%); two 1-hour in-class tests (20% each); one presentation based on research project (10%); one essay of 2250 English words resulting from research project (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Class study of literary and non-literary Chinese-language materials that reflect aspects of modern Chinese society, culture and politics. Students will gain practice in independent library-based research through associated essay work.

### CHNS3606

#### Advanced Chinese Studies B

## Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 class hours per week  
**Prerequisites:** CHNS3605 Advanced Chinese Studies A, or department permission. [Note: students who have earned a Distinction in CHNS3603 Chinese 4A (Advanced) will be permitted to take this subject either with or instead of CHNS3604 Chinese 4B (Advanced)] **Assessment:** Classwork (20%); one presentation based on research project (10%); one essay of 3000 English words (or an equivalent number of Chinese characters) based on an independent research project (40%); 2500 English words (or the equivalent in Chinese characters) of other written assignments (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program, UG Summer/Winter School.

Class study of challenging literary and/or non-literary Chinese-language materials that reflect aspects of modern Chinese society, culture and politics. Students will gain practice in independent library-based research through associated essay work.

### CHNS3608

#### Chinese for Business Purposes (A)

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 class hours per week  
**Prerequisites:** CHNS2602, CHNS1202 or CHNS2102 **Corequisites:** CHNS3601 or CHNS3603 **Prohibitions:** HSC Chinese for Background Speakers or equivalent; CHNS3421 **Assumed knowledge:** Sound intermediate knowledge of Modern Standard Chinese **Assessment:** Classwork (10%); two 90-minute in-class tests (40% in total); two take-home mini-essays in Chinese (about 550 characters each) (20% in total); research-based oral presentation (script should be about 700 characters) (15%); vocabulary quizzes (15%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Introduction to Business Chinese for students with sound intermediate knowledge of Modern Standard Chinese. Basic training in reading Chinese-language newspaper articles, business reports and advertisements, as well as conducting business negotiation, discussion and analysis. Students will gain understanding of the organisation and characteristics of the Chinese economy, using concepts that describe recent changes in government policy, industry, banking, the stock market and import and export trades, as well as the development of consumerism.

### CHNS3633

#### Lu Xun and China's Modern Literature

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Y. Wang **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** HSC Chinese for Background Speakers (or equivalent) plus 12 junior non-language credit points from Table A of the Table of Units of Study in the Faculty of Arts; or CHNS1314; or CHNS3604; or CHNS2204; or department permission. **Prohibitions:** CHNS3533 **Assumed knowledge:** Advanced or native-speaker proficiency in reading Chinese **Assessment:** Classwork (20%); 2,500-word essay (35%); other written assignment(s) (e.g., discussion report) totalling 1,500 words (30%); oral assignment(s) (e.g., presentation plus discussion leadership) (15%). Either the essay or one other piece of written work may be in Chinese (consult instructor for required number of characters). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

Lu Xun was one of the most influential Chinese writers in the early decades of the twentieth century. The works of Lu Xun and his contemporaries marked the emergence of a modern Chinese literature that reflected its proponents' anxiety for sociocultural change and national salvation, absorbed external influences, and was intended to reach a wide readership. This unit of study highlights works by Lu Xun and other major authors in the context of the intellectual history of the time.

### CHNS3634

#### Gender in Modern Chinese Literature

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Y. Wang **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** HSC Chinese for Background Speakers (or equivalent) plus 12 junior non-language credit points from Table A of the Table of Units of Study in the Faculty of Arts; or CHNS1314; or CHNS2204; or CHNS3604; or CHNS3104 plus instructor's permission. **Prohibitions:** CHNS3538 **Assumed knowledge:** Advanced or native-speaker proficiency in reading Chinese. **Assessment:** Classwork (20%); 2,500-word essay (35%); other written assignment(s) totalling 1,500 words (30%); oral assignment(s) (15%). Either the essay or one other piece of written work may be in Chinese (consult instructor for required number of characters). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B Int S, UG Study Abroad Program.

Recent research on gender and related issues in Chinese cultural context has transformed conventional ideas about the roles of women in the Chinese world. This unit of study will illustrate the value of gender-sensitive scholarship by focusing on literary studies. Students will learn fresh approaches to the study of Chinese society and culture by examining the representation of gender and sexuality in (mainly) modern Chinese literature.

### CHNS3642

#### Governing China: The Premodern Heritage

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof H. Dunstan **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** CHNS2612, Classical Chinese B OR CHNS2112, Readings in Classical Chinese OR CHNS2904, Honours Stream Classical Chinese (2) OR CHNS1314, Classical Chinese for Native Speakers (2). **Prohibitions:** CHNS 3452, Readings in Chinese Statecraft; CHNS 3552, Readings in Chinese Statecraft (Adv) **Assessment:** Classwork (20%); one 2000-word essay (30%); One 1-hour test (20%); Additional written assignments, 1500 words (e.g. translation, annotation, analysis), at least part of which may be done under test conditions (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, Dip Lang Stud, UG Study Abroad Program.

How did premodern Chinese governments keep their realms well-organised without computers? What kinds of problem did rulers and their advisors identify, and how did they propose to deal with them? In this unit of study we shall explore how premodern Chinese

statesmen and political philosophers drew on both Confucian and Legalist ideas to address problems such as crime, population growth, social inequality, environmental change, famine, and despotism. We shall read some remarkable documents in the original Classical Chinese.

### CHNS3645 Classical Chinese Prose Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr. D Herforth **Session:** Semester 2  
**Classes:** 3 hours per week **Prerequisites:** CHNS2112 or CHNS1314 or CHNS2904 or CHNS2612 **Prohibitions:** CHNS3547; CHNS3447 **Assessment:** Classwork (20%); two 45-minute tests (15% each); 2,000-word essay (25%); oral presentation based on work for essay (10%); other exercises (15%). Students may choose to write their essay in Chinese (consult instructor for the required number of characters). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

Critical examination of samples of admired nonfictional writing in Classical Chinese from after the foundation of the unified empire in 221 B.C. Students will gain an appreciation of the relationship between style and substance in literary Chinese prose. One or two genres (e.g., travel-related or argumentative essays) or periods (e.g., the Tang dynasty) may be studied in greater depth, and students will be expected to consult relevant secondary scholarship in the selected areas.

### CHNS4011 Chinese Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Bray, Prof Dunstan, Dr Herforth, Dr Wang **Session:** Semester 1, Semester 2 **Prerequisites:** The minimum requirements are as follows: (1) a major in Chinese Studies plus sufficient additional credit points selected from CHNS and ASNS 261x, 361x and 211x units of study to reach 48 senior credit points; and (2) a Credit average in all qualifying units of study. In addition, ASNS3690, Approaches to Research in Asian Studies is strongly recommended and may be counted towards the required 48 senior credit points by all students except those whose qualifying senior credit points include CHNS2601 (or 2101) and/or CHNS2602 (or 2102). Intending Honours students are advised to take as many senior credit points as possible in Chinese language and China-related subjects. **Assessment:** Four coursework components each requiring 5,000 words of essay-type assessment (or equivalent) (two thirds of final mark); 12,000-16,000 word thesis (one third of final mark). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

The heart of the Honours program is the research and writing, over two semesters, of a thesis of 12000 to 16000 words, in English, on a topic in Chinese Studies that is chosen by the student and approved by the department. Chinese-language material must be used. Supervision is available in a wide range of fields, including: contemporary Chinese politics, culture and society; contemporary, modern and classical Chinese literature; Chinese history; Chinese linguistics; and the study of gender in Chinese cultural contexts. If a substantial proportion of the thesis is to consist of translation, the written approval of the chair of department must be obtained in advance. Normally, not more than one third of a thesis may comprise translation. The thesis counts for one third of the final Honours mark. In addition to the Honours thesis, students undertake four coursework components, of which one may comprise supervised reading in an area that especially interests the student and/or participation in a joint thesis research seminar (subject to confirmation). The coursework components will be selected, in consultation with the chair of department (or nominee), according to the student's proficiency in Chinese. Advanced language work will be available for students who have completed only the basic three-year sequence in Chinese language from beginning level. The Honours-level seminars that will be available in 2008 (subject to confirmation) are: Approaches to Research on Modern China; Society and Individual in Post-Mao China; and Society and State in China 1368-1911. Each coursework

component requires 5,000 words of essay-type assessment (or equivalent).

The department will assist individual students to work out an Honours program that is relevant to their needs and interests, within the limits of available resources. It is also positively interested in arranging joint Honours programs for suitably qualified students in accordance with Faculty resolutions.

### CHNS4012 Chinese Honours B Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** See under CHNS4011. **Corequisites:** CHNS4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

### CISS2001 Business in the Global Environment Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2hrs of lectures and 1 x tutorial per week **Prerequisites:** 4 junior units of study **Assessment:** Individual and group quizzes; case-studies; reflective journal summative task; country opportunity/risk report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Com (Liberal Studies), B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit introduces students to doing business in the global environment of the twenty-first century. The broad themes examined are globalisation and the multinational company; the international political and economic environment; development and social change; international law and organisations; trade and investment; technology and innovation, and the new challenges in international security. This inter-disciplinary unit is taught collaboratively, using team-based learning, case-study and country risk analyses. The unit thereby provides students with the opportunity to develop intercultural competency, as well as to reflect on ethics and human rights in business both at home and abroad.

### CIVL0011 Civil Exchange A Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Stuart Reid, Civil Engineering, Room 313, 9351 2121, Fax 9351 3343, s.reid@civil.usyd.edu.au **Session:** Semester 1, Semester 2 **Classes:** A workload one quarter of that a full time student at the exchange university. Meet requirements of the exchange course. **Prerequisites:** Departmental permission required, Students must have a WAM >65 and to have completed one full year of study, that is 48 credit points **Assessment:** As set out by the exchange university. A Pass/Fail mark will be recorded for this subject. The mark obtained from the exchange university will

not be included in University of Sydney WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

Equivalent syllabus of Civil Engineering unit of study/studies. To be approved by relevant unit of study coordinators.

##### Materials Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 52 hours Lectures, 26 Tutorials; one 3-hour lab session **Assessment:** Assignments, Presentation and Report, Mid Semester Exam, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study aims to provide students with the tools necessary to select the adequate materials for a given application and to assess its mechanical behaviour while in use. The knowledge learned during this class will find applications in the following units of study: steel structures, concrete structures and soil mechanics.

#### CIVL2201

##### Structural Mechanics

**Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** lec: 39hrs, tut: 26hrs.  
**Prerequisites:** ENGG1802 Engineering Mechanics **Assessment:** Tutorial submissions, laboratory reports, quizzes and end of semester examination.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The primary objective of this unit is to understand internal actions (forces and moments) in structures (deformable objects) under loads in three key areas: how structures resist external loads by internal actions; the distribution of internal actions within structures; and the deformations, stresses and strains associated with the internal actions.

At the end of this unit, students should be able to understand the basic methods of load transfer in structures - tension, compression, bending, shear and torsion (internal actions); apply the equations of equilibrium to determine the distribution of internal actions in a simple structure by drawing BMDs, SFDs, AFDs, and TMDs; understand the significance and methods of calculation of the geometric properties of structural sections (I, Z, S, J etc); understand the effect of internal forces and deformations of bodies through the concept and calculation of strains and stresses; appreciate the behaviour of structures by analysing structures without numerical calculations; display a knowledge of basic material properties, combined stresses and failure criteria; and demonstrate their hands-on experience of the behaviour of structural members via experiments and the ability to prepare written reports on those experiments.

Emphasis in the assessment scheme will be placed on understanding structural behaviour and solving problems, rather than remembering formulae or performing complex calculations.

The course seeks to utilise and improve the generic skills of students, in areas such as problem solving, neat and logical setting out of solutions, report writing, and team work.

The syllabus comprises introduction; equilibrium; internal actions: BMDs, SFDs, AFDs, and TMDs; elasticity, stress and strain, and basic material properties; axial forces: tension and compression; elastic bending of beams; shear force and shear stresses in beams; torsion; deflection of beams; pipes and pressure vessels; trusses; material properties, combined stresses and yield criteria; advanced bending; introduction to buckling and instability.

**Credit points:** 6 **Session:** Semester 2 **Classes:** 26 hours lectures, 39 hours design and tutorials **Assumed knowledge:** ENGG1802 Engineering Mechanics, CIVL2110 Materials CIVL2201 Structural Mechanics **Assessment:** Design class assignments and one 3 hr closed book exam covering the whole syllabus at the end of the semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The objectives of this unit are to provide an understanding of design concepts and the design of steel and concrete structures; an understanding of limit states design and structural loading. To be aware of different foundation systems and their choice. To provide an introduction to design of steel and concrete elements.

At the end of this unit, students will gain proficiency in the selection of foundation and structural systems including bracing, and floor systems; proficiency in the computation of permanent, imposed, wind and earthquake loads; proficiency in the design of simple structural elements for flexure in concrete and steel.

**CIVL2410****Soil Mechanics****Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 39 hours lectures, 13 hours tutorial, 13 hours laboratory **Assumed knowledge:** CIVL2201 Structural Mechanics **Assessment:** Tutorials, laboratory reports, mid-semester test, final 3 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The objectives of this unit are to develop an understanding of the nature of soils as engineering materials, the common soil classification systems and their uses; the importance of water in the soil and the engineering effects of water movement; the factors controlling soil settlement and the methods of settlement calculation; the concept of soil strength and how this can be used to calculate earth pressures.

At the end of this unit, students will be able to give an engineering classification of any piece of soil, and on this basis predict how it will perform as an engineering material; understand the principle of effective stress, and be able to apply this to calculate the stresses causing soil deformation; calculate quantities of water flowing through the ground, and understand the engineering consequences of water flow; calculate the settlements, and rates of settlement, under structures of various shapes and sizes; explain the advantages and limitations of the different methods of settlement calculation; determine the strength parameters appropriate to a range of stability problems, and understand the difference between total and effective stress approaches; evaluate strength parameters from laboratory data.

The syllabus comprises terminology, soil classification, compaction, effective stress, steady state seepage, one-dimensional compression, stresses beneath loaded areas, 1-D settlement analysis, consolidation, numerical analysis of consolidation, 3-D settlement analysis using elasticity, shear strength, introduction to critical state soil mechanics, earth pressure theories.

**CIVL2511****Instrumentation & Measurement****Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Lectures 20hrs; Tutorials 40hrs **Assumed knowledge:** CIVL2201 Structural Mechanics, ENGG1802 Engineering Mechanics **Assessment:** 1 major project, tutorial assignments, 2-hr final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objectives of this unit are to introduce students to the philosophy and principles of measurement, and its uses in Civil Engineering practice and research. The instrumentation used in practice, the underlying physical principles and the basic electrical/electronic and signal processing issues. It will introduce students to issues in the planning and construction of experiments. Give experience working in groups and in producing reports.

At the end of this unit, students should gain an understanding of the importance of measurement, of the methods and application of measurement; ability to conduct experiments and interpret measurements. The course will reinforce key concepts in Structural Mechanics, Fluid Mechanics, Soil Mechanics and Surveying.

The syllabus comprises principles of measurement, presentation of data, error analysis, stress and strain, sensor types and technologies

wave based techniques and wave analysis, photographic techniques, signal processing, electric circuit theory.

### CIVL2611

#### Fluid Mechanics: Inviscid Flow

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 26 hrs Lectures, 26 hours Tutorials, 4 x 2 hours Laboratories **Assumed knowledge:** MATH1001 Differential Calculus, ENGG1802 Engineering Mechanics, CIVL2201 Structural Mechanics **Assessment:** Laboratory Reports, Leadership in Group Work, Mid-Sem Exam & Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The objectives of this unit of study are to develop an understanding of basic fluid mechanics concepts of incompressible flows. We assume that the physics of the flow can be described by inviscid fluid equations. Further we identify in which flow zones these equations apply and study the physics of irrotational flow, streamlines and velocity potential. Steady and unsteady flow solutions are investigated. Furthermore, flow around fixed and floating cylindrical structures and other objects are studied to estimate the pressures and forces on structures. We further study free-surface water wave models in deep water applications based on the Laplace and Bernoulli equations. Solutions are discussed in relation to waves in tanks, ship stability, oscillations in harbours, offshore platforms and other marine structures. We introduce model scale laws and dimensional analysis for undertaking basic fluid laboratory studies. Conducting classical experiments and corresponding report write-up training, reflecting an understanding of the basic theory and interpretation of flow physics, are important components of this unit of study. Although the unit of study has a focus on a theoretical background to fluid flow, computational as well as experimental approaches in obtaining fluid flow solutions are highlighted in the context of modern engineering analysis and design.

### CIVL2810

#### Engineering Construction and Surveying

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 39 hrs lectures, 42 hours fieldwork & tutorial **Assumed knowledge:** MATH1001, MATH1002, MATH1003, MATH1005 **Assessment:** Regular coursework, fieldwork, reports, tutorials and assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The objectives of this unit are to gain an understanding of the fundamentals of engineering construction including systems and methods in construction of excavation, embankments and other earthworks, hauling and associated operations. To provide basic analogue methods of distance, angle and height measurement. To provide an understanding of three dimensional mapping using basic total station electronic field equipment with associated data capture ability. To give an insight into future trends in the use of GPS and GIS systems.

At the end of this unit, students should develop basic competency in earthwork engineering and economic optimisation of related construction, including proposing and analysing systems and methods, estimation of probable output, unit cost and productivity evaluation. Proficiency in the design and implementation of mapping systems in Civil Engineering, using analogue and electronic field equipment and associated software packages.

The syllabus comprises introduction to the framework under which construction projects are formulated and analysed; construction engineering fundamentals; construction systems related to excavation, hauling and embankment construction, including selection and evaluation of plant and methods as well as the expected output and cost; introduction to construction operations management. Introduction to engineering surveying, distance measurement, angle measurement, levelling, traversing, topographic surveys, electronic surveying equipment, future surveying technologies.

### CIVL3010

#### Engineering and Society

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lecture 26hrs **Assumed knowledge:** ENGG1803 Professional Engineering **Assessment:** Workshop submissions, assignments, projects, 1 hr mid semester exam, 1 hr final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The goals of this unit are to introduce students to major problems of environmental deterioration and to concepts of sustainability and ethics, and show the role of civil engineers in addressing these issues; to develop an appreciation for the impact of civil engineering decisions within the broader economic, environmental and socio-cultural contexts; to develop communication skills through participation in group discussions, oral presentations, and written report writing. Lectures, group discussions, case problems and projects are all used in teaching and learning in this unit of study.

At the end of the unit, students will be able to describe major environmental problems of local air pollution, climate change and water quality and the role civil engineers play in generating, preventing and resolving these problems. Students will have a better ability in designing more sustainable housing developments through the BASIX system. Students will develop a greater social awareness and their capabilities in ethical, moral and social reasoning will be strengthened, hence improving their decision-making abilities.

The syllabus comprises role(s) of Civil Engineers, historical development of profession, air pollution, climate change, water quality; history of the sustainability concept, definitions of sustainability; environment as an economic externality and polluter-pay principle; BASIX design system; theories of ethical behavior - deontology, utilitarianism, virtue ethics, codes of ethics, public interest disclosures, people, leadership and integrity, building ethical organization.

### CIVL3205

#### Concrete Structures 1

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lecturer 39hrs; tutorials 39hrs **Assumed knowledge:** CIVL2110 Materials, CIVL2201 Structural Mechanics, CIVL2230 Intro to Structural Concepts and Design **Assessment:** Assignments, mid semester exam, 3-hr final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The objectives of this unit are to provide a basic understanding of the behaviour of reinforced concrete members and structures; to provide a basic understanding of standard methods of analysis and design of reinforced concrete behaviour (including an understanding of capabilities and limitations); and to provide basic design training in a simulated professional engineering environment.

At the end of this unit students will gain proficiency in basic methods of reinforced concrete analysis and design.

The syllabus comprises the behaviour of reinforced concrete members and structures, including: material properties, 'elastic' analysis (stresses/deformations/time-dependence), ultimate strengths of beams (flexure), ultimate strength of columns (short and slender), behaviour or reinforced concrete slabs. The reinforced concrete truss analogy (shear/torsion/and detailing implications). Design of typical elements of a reinforced concrete building, structural modelling, analysis of load-effects (incl.earthquakes), design criteria (for durability, fire-resistance, serviceability and strength), design calculation procedures, reinforcement detailing, structural drawings.

### CIVL3206

#### Steel Structures 1

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Lectures: 39 hrs; tut/lab/drawing office: 39hrs, lab 6 hrs. **Prohibitions:** CIVL3227 **Assumed knowledge:** CIVL2110 Materials, CIVL2201 Structural Mechanics, CIVL2230 Intro to Structural Concepts and Design **Assessment:** Tutorial submissions, integrated design exercise, laboratory reports, mid-semester quiz, and end of semester examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objective of this unit is to provide a basic understanding of behaviour and design of steel members, connections and structures. At the end of this unit, students should be familiar with the behaviour of steel structures, in particular the various forms of buckling and failure, particularly those associated with tension, bending, shear, compression, combined actions and connections; have a working knowledge of AS 4100, and be competent in designing a simple structure to AS 4100.

The syllabus comprises the behaviour of steel members and structures - properties of cross-sections, local buckling, elastic beams, plastic beams, tension members, compression members, effective lengths and elastic in-plane frame buckling, local and lateral buckling of beams, in-plane bending of beam columns, lateral buckling of beam-columns, biaxial bending of beam-columns, bolted and welded connections.

#### Structural Analysis

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Lectures 52hrs; Tutorials 26hrs **Assumed knowledge:** CIVL2201 Structural Mechanics, CIVL2230 Intro to Structural Concepts and Design, MATH2061 Linear Mathematics and Vector Calculus **Assessment:** 4 quizzes, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objectives of this unit are to provide an understanding of the principles of structural analysis by introducing the strain-displacement, stress-strain and equilibrium relationships for beam members; applying the relationships to the matrix displacement analysis of frame structures; and using computer software to conduct the linear-elastic and buckling analyses of frame structures.

At the end of this unit, students will be able to deduce appropriate structural models for frame structures; and use computer methods and simple hand methods to obtain internal forces and displacements as well as buckling loads for frame structures.

The syllabus comprises theoretical background (strain-displacement, stress-strain and equilibrium relationships), structural analysis software, matrix displacement method, beam theory, introduction to nonlinear analysis, buckling analysis.

### CIVL3411

#### Foundation Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 x 1hr lectures per week 1 x 2hr tutorial session per week **Assumed knowledge:** CIVL2410 Soil Mechanics **Assessment:** 1 quiz, 2 assignments/projects, 1 lab report, final 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The objectives of this unit are to provide an understanding of the factors influencing soil strength, and to give practice in the application of this understanding by exploring the stability of slopes, retaining walls and foundations. At the end of this unit students will be able to: determine the strength parameters appropriate to a range of stability problems, and understand the difference between total and effective stress approaches; evaluate strength parameters from laboratory data; critically analyse foundation stability and slope stability problems; use spreadsheets to perform parametric studies and produce design charts for simple geotechnical design problems; and communicate

the results of experiments and analyses using written methods appropriate for professional geotechnical engineers. The syllabus comprises; methods of analysis for gravity and sheet pile retaining walls; reinforced soil; slope stability, including modes of failure, analysis and computer methods; bearing capacity of shallow foundations under general loading, and axial and lateral capacities of deep pile foundations; the mechanical behaviour of sands and clays; the Cam Clay model and the breakage model.

### CIVL3612

#### Environmental & Fluids Eng: Viscous Flow Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 26 hours Lectures, 26 hours Tutorials, 2 hour laboratory experiments / assignments **Assumed knowledge:** ENGG1802 Engineering Mechanics, MATH2061 - Linear Mathematics and Vector Calculus, CIVL2201 - Structural Mechanics, CIVL2611 - Fluid Mechanics: Inviscid Flow **Assessment:** In-semester tests/project, Assignments, Laboratory reports, Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The objectives of this unit of study are to develop an understanding of the underlying physics of fluid flows and their interaction with engineering structures. Viscous effects are typically important in fluid engineering applications. The resulting fluctuating forces are essential for understanding the process of analysis and design of structures. Dynamic loadings such as wind and waves vary with time and location. This unit of study provides an introduction to incompressible viscous fluid flow. We put CIVL2611 in context and assess when an inviscid model is inadequate. Basic theory and concepts of elementary viscous flows are introduced. Derivation of the Navier-Stokes equations and some exact solutions will be presented. Numerical solution techniques for viscous flow including finite difference approximations and turbulence models are further introduced. Boundary layer theory plays an important role in viscous flow calculations. Vorticity, separated/recirculating flows and vortex shedding are described and discussed in the context of a boundary layer model. Illustrations of the transition from laminar to turbulent flow are shown. In summary, the syllabus comprises theoretical, experimental and computational aspects of viscous flows in pipes, open channels and free-surface flows with reference to applications in ocean and wind engineering, river mechanics and aero-hydrodynamics applications. An important outcome of the course is to be able to demonstrate an understanding of the physics of fluid pressure and force distribution/fluctuations on structures and knowledge of the supporting theory. Classical experiments and corresponding report write-up training are an important component of this unit of study.

### CIVL3613

#### Ocean and Coastal Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 52 hours Lectures, 26 hours Tutorials **Assumed knowledge:** CIVL2611 - Fluid Mechanics: Inviscid Flow **Assessment:** Design Assignment, Tutorial Exercises, Quizzes, Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objectives of this unit of study are to develop an understanding of the physics of ocean waves at any water depth and its application to the analysis and design of marine structures. This unit of study introduces the governing equations for free surface flows, including linear and nonlinear wave theories, wave transformation physics and nearshore hydrodynamics modelling. Furthermore, this unit of study includes the calculation of wave forces based on deterministic and probabilistic wave theories, wave-induced coastal currents and sediments, wind-wave-structure interactions, tides, ocean engineering operational sea state, storm surges (due to cyclones and tsunamis) and various other environmental effects. Many marine structure design

applications are introduced, including jetties, harbours, breakwaters, bridge piers, dams, offshore platforms, turbines and other wind/wave energy devices. The major outcomes of this unit of study are (i) an understanding of wave physics at any water depth and the criteria for choosing the appropriate wave theory, and (ii) the ability to apply this understanding to the analysis and design of engineering marine structures. Although the unit has an analytical focus, the use of model scale, computational techniques and code of practice based design are also discussed.

### CIVL3805

#### Project Scope, Time and Cost Management Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 26 hours Lectures; 26 hours Tutorials **Prerequisites:** 36 Intermediate credit points **Prohibitions:** ECMT3640 **Assumed knowledge:** CIVL2810 - Engineering Construction and Surveying **Assessment:** Individual and Group Assignments, Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study is a second year core course for the Bachelor of Project Engineering & Management (Civil), third year elective for Civil Engineering degree, elective for all other branches of engineering and faculties. The general aim of this unit of study is to offer student the opportunity to develop an understanding of the scope, time and cost management in project environments. Student will engage with some of the key concepts and various activities which underpin project scope, time and cost management. At the end of this unit, students will be able to: develop Work Breakdown Structure (WBS), network diagrams, and undertake Critical Path Analysis (CPA) and Earned Value Analysis (EVA) using the given project information; explain in depth why scope, time and cost management are important to project management; analyze a project situation that involves scope, time and cost management issues; and explain how the components of scope, time and cost management interrelate in project environments. The syllabus comprises the project planning cycle, working with the project sponsor, scope initiation and definition, project scope definition tools, WBS, network scheduling techniques, CPA, Just-in-Time philosophy, estimating and budgeting, cash flow management, EVA and application of project management software.

### CIVL3812

#### Project Appraisal Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 26 hours Lectures, 26 hours Tutorials **Prohibitions:** CIVL4803 Engineering Management **Assumed knowledge:** MATH1005 - Statistics, CIVL3805 Project Scope, Time and Cost Management **Assessment:** Series of quizzes, Final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study is a third-year core unit for students enrolled in any of the undergraduate streams in the School of Civil Engineering and elective for all other branches of engineering and other faculties. The objectives of this unit of study are to develop students' ability to critically analyse issues involved in project appraisal and to equip students with the concepts, tools and analytical processes to effectively carry out project appraisal tasks for businesses, non-profit organisations, and governments. At the end of this unit, students should be able to comprehend and relate to real-life examples the fundamental concepts in project appraisal (e.g. the meaning of time value for money, equivalence); calculate common financial indicators for a given project and explain the relevance of each to the appraisal of the project; rank projects by combining both financial and non-financial indicators (e.g. environmental and social); understand how risks and uncertainties affect evaluation outcomes and be able to deal with uncertainties and risks in analysis; apply techniques to account for the effects of inflation/deflation and exchange rates in analysis; understand the concept and mechanisms for depreciation and carry out pre-tax as well as post-tax analysis; understand the assumptions, pros and cons of each evaluation method and be able to explain why a particular method is appropriate/not appropriate for a given project. The syllabus comprises time value of money, cost of

capital, simple/compound interest, nominal/effective interest, cost/benefit analysis of projects; equivalence, net present worth (value), future worth (value), annual worth (value), internal rate of return, external rate of return, payback period, cost-benefit analysis, cost-utility analysis, identifying and quantifying non-financial benefits/externalities, price changes and exchange rates, techniques for multi-criteria group decision-making, economic analysis of business investment projects, depreciation, capitalisation and valuation studies, replacement of assets, real option, project risk analysis, decision-tree analysis, binomial method, WACC, MARR, equity capital, debt.

### CIVL3813

#### Contracts Formulation and Management Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 26 hours Lectures, 26 hours Tutorials **Prerequisites:** 36 Senior Credit Points **Prohibitions:** LAWS1002 **Assumed knowledge:** CIVL3805 Project Scope, Cost & Time Management **Assessment:** Mid Semester Exam, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objectives of this unit are to give students a fundamental knowledge of the legal system and contract terms under which projects are generally conducted. Emphasis will be on the principles of contract formulation, administration and finalisation, including prevention and/or settlement of disputes. At the end of this unit, students will have both legal and practical knowledge in the field of project management and contract administration, within a legal framework. The syllabus comprises brief overview of the legal system in Australia and comparison with other legal systems introduction to project delivery systems and the running of a typical project, introduction to contract law and the formation of contracts, the principles of standard form contracts as well as bespoke drafting, an understanding of the risks undertaken by the different contracting parties, a detailed review of a standard contract promoting an understanding of major project issues such as time, variations and payment; implementation and administration; potential liabilities associated with project participation; contract conditions and specifications; management of claims for variations and extensions of time; notification requirements including time bar, understanding the commercial significance of issues such as latent conditions, subcontracting, bank guarantees and security of payment legislation.

### CIVL4008

#### Practical Experience Engineering and Information Technologies

**Session:** Semester 1 **Classes:** 12wks practical work experience (420hrs minimum) **Prerequisites:** 30 credit points of third year courses **Assessment:** A written report, employers certificate. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B E.

This is a fourth year core unit of study for the degree in Civil Engineering and Project Engineering and Management (Civil).

The objectives of this unit are to expose students to Engineering Practice and provide working experience in the field of engineering.

At the end of this unit, students will gain first hand experience of working in an Engineering environment, will see how engineering companies are organised and will be exposed to problem solving in a commercial environment.

The syllabus requires each student to work as an employee of an approved engineering organisation and to submit a satisfactory written report of his or her work. Normally 12 weeks of practical work experience (420 hours minimum) is required and this is generally undertaken after the completion of the prescribed third year core courses and before enrolment in the final year of study. The University Careers and Appointments Service is available to assist students to obtain suitable employment.

## CIVL4022

### Honours Thesis A Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly contact with supervisor - typically 1 hour per week **Prerequisites:** 30 credit points of Senior Units of Study, GWAM 65 or over **Assessment:** Literature Review, Plan and Progress Report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study provides an opportunity for students to conduct an original investigation or research in a discipline relevant to civil engineering. Students will gain skills in design, analysis and management by undertaking a research project.

This particular unit of study, which must precede Thesis CIVL4023 - Honours Thesis 2, should cover approximately half the work required for successful completion of a complete 'final year' thesis project. In particular, it should include almost all planning of a research or investigation project, a major proportion of the necessary literature review (unless the entire project is based on a literature review and critical analysis), and a significant proportion of the experimental or analytical work required of the project.

## CIVL4023

### Honours Thesis B Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly contact with supervisor - typically 1 hour per week **Prerequisites:** 30 credit points of Senior units of study and successful completion of CIVL4022 - Honours Thesis A **Assessment:** Oral Presentation, Poster Presentation, Final Thesis **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study provides an opportunity for students to conduct an original investigation or research or major project work in a discipline relevant to civil engineering. Students will gain skills in design, analysis and management by undertaking a research project.

This particular unit of study, which must be preceded by or be conducted concurrently with CIVL4022 - Honours Thesis 1, should cover approximately half the work required for successful completion of a complete 'final year' thesis project. In particular, it should include completion of all components of the research or investigation project planned but not undertaken or completed in CIVL4022 - Honours Thesis 1.

## CIVL4024

### Engineering Project A Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly contact with Supervisor - typically 1 hour per week **Prerequisites:** 30 Credit Points of Senior Units of Study **Assessment:** Literature Review, Plan and Progress Report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study provides an opportunity for students to conduct an original investigation or research or major project work in a discipline relevant to civil engineering. Students will gain skills in design, analysis and management by undertaking a research project.

This particular unit of study, which must precede or be conducted concurrently with CIVL4025 - Engineering Project B, should cover approximately half the work required for successful completion of a complete 'final year' thesis project. In particular, it should include almost all planning of a research or investigation project, a major proportion of the necessary literature review (unless the entire project

is based on a literature review and critical analysis), and a significant proportion of the experimental or analytical work required of the project.

## CIVL4025

### Engineering Project B Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prerequisites:** 30 Credit Points of Senior Units of Study and successful completion of CIVL4024 Engineering Project A **Assessment:** Oral Presentation, Poster Presentation, Final Project Report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

*Note: Weekly contact with supervisor - typically 1 hour per week*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study provides an opportunity for students to conduct an original investigation or research or major project work in a discipline relevant to civil engineering. Students will gain skills in design, analysis and management by undertaking a research project.

This particular unit of study, which must be preceded by or be conducted concurrently with CIVL4024 - Engineering Project A, should cover approximately half the work required for successful completion of a complete 'final year' thesis project. In particular, it should include completion of all components of the research or investigation project planned but not undertaken or completed in CIVL4024 - Engineering Project A.

## CIVL4240

### Concrete Structures 2 Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Lecturers 40hrs; 20 laboratory/tutorials **Prerequisites:** CIVL3205 Concrete Structures 1 **Assumed knowledge:** ENGG1802 Engineering Mechanics; CIVL2201 Structural Mechanics; CIVL3235 Structural Analysis **Assessment:** Assignments, quizzes, 2 hr final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objectives of this unit are to develop a deep understanding of the fundamental behaviour and design of reinforced and prestressed concrete and concrete-steel composite members and structures. By the end of this unit, students will develop sufficient understanding of fundamental concepts and acquire sufficient knowledge and skills to assess strain-softening effects in concrete structures, the effects of prestressing and the effects of interaction of composite materials. Students will be able to apply the relevant design requirements, in accordance with Australian design standards.

## CIVL4241

### Steel Structures 2 Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures per week. 2 hours of tutorials per week where students work on practical problems and assignments. 2 computer laboratory sessions per semester. **Assumed knowledge:** CIVL2201 Structural Mechanics, CIVL3235 Structural Analysis, CIVL3206 Steel Structures 1 **Assessment:** Assignment; final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The primary objectives of this unit are to provide fundamental understanding at advanced level of behaviour and design steel members and connections; to provide fundamental understanding of methods for determining buckling loads of structural members and elements; and to reinforce and complement the content of related units of study. Emphasis will be placed on understanding structural behaviour and solving problems rather than remembering formulae.

At the end of this unit, it is anticipated that students should be familiar with the behaviour of steel structures at advanced level in selected areas, including connection design, design for local buckling and design for flexural-torsional buckling of columns and beams. Have a sound knowledge of AS 4100 in the areas of connection design, section capacity determination of slender cross-sections, and flexural-torsional buckling of beams. Have a sound knowledge of

AS/NZS 4600 in the areas of section capacity determination of slender cross-sections, and flexural-torsional buckling of columns and beams. Have knowledge of the use of software in the design of connections and slender cross-sections. The unit of study seeks to utilise and improve the following generic skills of students: problem solving, neat and logical setting out of solutions, and interpretation and understanding of technical drawings and specifications.

The syllabus comprises local buckling behaviour and design; stability behaviour and design including flexural-torsional buckling behaviour; advanced connections - behaviour, analysis and design.

#### CIVL4412

##### Geotechnical Engineering

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lecture 39hrs; Tutorial 13hrs  
**Assumed knowledge:** CIVL2410 Soil Mechanics; CIVL3411 Foundation Engineering **Assessment:** Quizzes, assignments, 2 hours final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objective of this unit is to teach students practical design skills through problem based learning. Students are asked to design foundations using real data for foundation problems. It also develops communication skills through the writing of engineering reports.

At the end of this unit, students should gain an understanding of the design process in foundation engineering; the role of site investigation and field-testing; the need to deal with uncertainty. In particular, they should develop the ability to interpret the results of a site investigation; to use laboratory and field data to design simple foundations, and develop an appreciation of the interaction between soils, the foundation system and the supported structure.

The syllabus comprises field testing; site characterisation; interpretation of field data; design of pile, raft and surface footings; support of excavations, soil improvement; Geotechnical report writing.

#### CIVL4413

##### Environmental Geotechnics

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Lectures 39hrs; Tutorials 13hrs **Assumed knowledge:** CIVL2410 Soil Mechanics, CIVL3411 Foundation Engineering **Assessment:** Assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objective of this unit is to provide an introduction to Geo-environmental Engineering. It gives an introduction to geotechnical and related problems concerned with the disposal of wastes in landfills and mine tailings impoundments, and to the analytical and numerical techniques available to solve these problems.

At the end of this unit, the student will be able to describe and evaluate the different strategies available for landfill management and waste containment, understand the processes controlling contaminant migration, calculate rates of contaminant migration through the ground using analytical and numerical methods, design effective barriers for waste containment on flat and sloping ground, select appropriate geomembrane and geotextile materials for use in engineered barriers, understand issues related to tailing dams, and carry out basic design work.

The syllabus comprises landfills, waste quantities and composition, waste management, processes occurring in waste, Leachate control, site selection, processes controlling pollutant migration through soil, advection, diffusion, dispersion, sorption, mathematical description of pollutant migration, analytical solutions for pollutant migration, numerical solutions for pollutant migration, technologies for remediation of contaminated ground, engineered clay liners, barriers and covers, clay mineralogy and properties, compaction-permeability relations, barrier systems, stability of liners and slopes, geosynthetics in waste containment, geomembranes, geofilters, composite barrier systems, tailings disposal properties of hazardous wastes, dispersive soils. Disposal techniques, embankment design, filters, seepage barriers, operational control and rehabilitation.

#### CIVL4414

##### Finite Element Analysis

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lectures 26hrs; tutorials 26hrs  
**Prerequisites:** ENGG1802 Engineering Mechanics, CIVL2201 Structural Mechanics **Assessment:** 5 project submissions, 2 large quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objectives of this unit are to provide an opportunity for students to develop an understanding of finite element analysis and how to apply this to the solution of civil engineering problems.

At the end of this unit, students should acquire knowledge of methods of formulating finite element equations, basic element types, the use of finite element methods for solving problems in structural, geotechnical and continuum analysis and the use of finite element software packages.

The syllabus comprises introduction to finite element theory, analysis of bars, beams and columns, and assemblages of these structural elements; analysis of elastic continua; problems of plane strain, plane stress and axial symmetry; use, testing and validation of finite element software packages.

#### CIVL4614

##### Flow-Induced Vibrations

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 36 Lectures; 36 Tutorials; 6 Laboratory, 3 site visit **Assumed knowledge:** CIVL2611 Fluid Mechanics: Inviscid Flow, CIVL3612 Environmental Fluids Engineering: Viscous Flow, CIVL2230 Introduction to Structural Concepts and Design, CIVL3235 Structural Analysis **Assessment:** In-semester tests, Assignments, Project, Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

Large civil engineering structures and structural components are subjected to dynamic environmental loadings. This unit of study focuses on the understanding of hydro- and aerodynamics to analyse and design against wave and/or wind loading on tall buildings, long-span bridges, chimneys, offshore structures, etc. Wave and wind loading are highly nonlinear and usually a detailed mathematical model is necessary. We will through structural dynamics theory and examples decide whether static or dynamic models are appropriate. Furthermore, nonlinear vibration effects are introduced through the description of concepts such as negative damping leading into the topic of vortex-induced vibrations. Having learnt about the loadings which may cause undesirable structural vibrations, methods for suppressing unwanted vibrations are introduced.

The fundamental aim of this course is to be able to design engineering structures using approximate models for analytical dynamic response estimates. A further aim is to understand the importance of the interaction between dynamic loads and structural response, especially the interaction between unsteady fluid dynamics and structural response. Although the course has an analytical focus, the use of model scale, computational techniques and code of practice based design are also discussed.

#### CIVL4615

##### Water Resources and Hydrology

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 52 hours - comprises of lectures, tutorials, laboratories, etc. **Assumed knowledge:** ENGG1802 - Engineering Mechanics, MATH2061 - Linear Mathematics and Vector Calculus, CIVL2611 - Fluid Mechanics: Inviscid Flow, CIVL3612 - Environmental and Fluid Engineering: Viscous Flow **Assessment:** 2 Quizzes, 10 Tutorials, 3 hours Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study covers the basic aspects of water resources and hydrology. The water resources engineering component is separated into two parts: 1. Physical processes in water supplies and discharges, and 2. supply, management, and treatment of water resources. The hydrology component covers: Infiltration and groundwater; evaporation

and transpiration; surface runoff; synthetic hydrographs; flood routing and reservoir design. The unit of study builds on the theory and concepts learnt in CIVL2611 Fluid Mechanics: Inviscid Flow and CIVL3612 Environmental and Fluid Engineering: Viscous Flow.

This unit of study aims to provide an understanding of: reservoir and lake dynamics, dispersion in rivers and the coastal ocean, water supply networks and systems, conservation and management of water resources, wastewater reuse and applications, indicators of water quality, water treatment methods, water treatment plants; surface runoff assessment, calculation of peak flows, hydrographs for various storm durations and intensities, flood routing calculations, design procedures for storage and service reservoirs; reservoir safe yield; and evaporation from reservoirs and evapo-transpiration from catchments.

#### CIVL4810

##### **Mgmt of People, Quality and Risk in PE Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 26 hours Lectures; 26 hours Tutorials **Assumed knowledge:** CIVL3805 Project Scope, Time and Cost Management **Assessment:** 2 Assignments 25% in total, Mid Semester Exam 20%, Final Exam 50%, Attendance 5% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study is a fourth year core unit of study for the Bachelor of Project Engineering & Management (Civil), elective for all other branches of engineering and other faculties. The objectives of this unit are to provide underpinning knowledge and application skills in the project environment for quality, risk and people management. At the end of this unit, students will be able to understand the dynamics of team building and management, conflict resolution processes and techniques, project leadership; and, be able to design and implement plans for quality and risk management on a range of simple generic projects and provide input to these plans for more complex projects. The syllabus comprises team management, conflict resolution and project leadership; modern quality management principles and techniques, quality assurance, preparation of quality plans; risk analysis, planning and risk management throughout a project's life cycle.

##### *Textbooks*

Harold Kerzner, Project Management - Systems Approach to Planning, Scheduling, and Controlling, 9th Ed. (2006), Johns Wiley: New Jersey.

#### CIVL4811

##### **Engineering Design and Construction Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Programmed 39hrs; 26hrs tutorial/workshop; Non program: 12 hrs case study assignment work, 4 hrs voluntary course review **Prohibitions:** CIVL3802 Engineering Construction 2 **Assumed knowledge:** CIVL2810 Engineering Construction and Survey **Assessment:** Design assignments may be submitted; case study assignment (students must submit a case study assignment to pass the course); mid semester exam, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The objectives of this unit are to develop an understanding of construction methods, strategies, equipment and machinery in a range of construction activities and an understanding of the principles involved in the design for those construction activities.

At the end of this unit, students will have developed a familiarity with a variety of construction methods, strategies, equipment and machinery in a range of construction activities such that they will be able, if and when the opportunity arises to participate as site engineers (or similar role) in the planning and execution of those construction activities, albeit with supervision and guidance from experienced professionals. Students will also have developed an understanding of the design principles and techniques involved in the planning for those construction activities such that they are able, if and when the opportunity arises, to participate as design engineers, in the planning and design for those construction activities, with supervision and guidance from experienced professionals. The range of topics covered

in this course is such that the learning outcomes form a basis for later development of more detailed knowledge, dependent on the future career experiences of the student. The course does not prepare a student for immediate, unsupervised participation in construction and design work associated with the topics covered.

The construction topics covered in this course have not been previously addressed in CIVL2810 (Engineering Construction and Survey). The topics may vary dependent on current and planned projects in Sydney, NSW and Australia. At this stage the topics are hard rock tunnelling and general hard rock underground excavation; soft ground tunnelling; underground construction; micro tunnelling; cut and cover (cover and cut) tunnelling; earth retaining systems; piling; formwork and falsework (incl Tilt up, Ultrafloor, Sacrificial form); dewatering; pavement design and construction - rigid and flexible (incl and pavement construction materials); stormwater drainage design and construction; marine construction; civil construction in environmentally sensitive areas; contract administration for construction engineers; general engineering in remote localities (project based); construction methods in bridge engineering; QA documentation on a typical project; insurance in the construction industry occupational health and safety issues in the construction industry.

#### CIVL4814

##### **Project Procurement and Tendering Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 26 hours Lectures, 26 hours Tutorials **Assumed knowledge:** CIVL2810 Engineering Construction and Surveying, CIVL3805 Project Scope, Time and Cost Management **Assessment:** Online quizzes, Group Reports and Presentations, Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study is a fourth year core unit of study for the Bachelor of Project Engineering and Management (Civil), elective for all other branches of engineering and other faculties. The general aim of this unit is to offer student the opportunity to develop an understanding of the procurement of built facilities and the methods of job allocation in project environments. Student will engage with some of the key concepts which underpin job allocations in the construction industry. At the end of this unit of study, students should be able to: evaluate a client's procurement situation and apply an appropriate procurement route; explain how and why a particular procurement route is chosen; undertake procurement assessment exercises; analyze a contractor's strategic responses in tendering (bidding) decision-making; discuss why a particular bidding strategy is chosen in different contexts; and evaluate a contractor's bidding performance using competitor analysis techniques. The syllabus comprises fundamentals of building procurement, assessment of procurement risks, international contracting, competitive bidding, cost estimating, the competitive environment in the construction industry, contractors' competitive positioning, contractors' decision-making in bidding competition, bidding strategies and competitor analysis.

#### CIVL4815

##### **Project Formulation Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 26 hours Lectures, 26 hours Tutorials **Prerequisites:** CIVL3805 Project Scope, Time and Cost Management, CIVL3812 Project Appraisal **Assessment:** Series of team assignments, Presentations moderated by peer evaluations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study is a fourth-year core unit for PEM students and an elective for all other branches of engineering and other faculties. The objective of this unit is, through the integration of areas of project management knowledge learned in various PEM subjects, to develop students' ability to develop project proposals through carrying out a feasibility study and developing a project plan for a real-life engineering project. This unit is relevant for students who intend to pursue a career related to project management. At the end of this unit, students should have developed understanding of the fundamentals of project conceptualisation, appraisal and planning plus the abilities to: model

and analyse basic financing and cash flow requirements; develop risk management plan, marketing and sales plan, stakeholder management and communication plan, operations plan; and design professional documentation and presentation to a board of review. In addition, this unit also develops students' abilities in problem solving, working with other students, conducting independent research, communication in team environment, information need identification and collection, and understanding social and environmental issues. The syllabus comprises feasibility study, project appraisal, risk assessment and management, sensitivity analysis, project planning, project integration management, carbon-trading scheme, global warming, environmental impact assessment, investment capital, venture capital, due diligence, project planning, operational planning, revenue projection, community consultation, communication management, stakeholder management, political environment.

#### CIVL4903

##### Civil Engineering Design

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 13hrs lec and 39hrs of drawing office work **Assumed knowledge:** CIVL3205 Concrete Structures 1 and CIVL3206 Steel Structures 1. **Assessment:** Final examination and a series of assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This is a fourth year core unit of study for the degree in Civil Engineering and fourth year elective for the degree in Project Engineering and Management (Civil).

The objective of this unit is to give students an appreciation of the role of the designer in the development of Civil Engineering projects.

At the end of this unit, students will have developed an understanding of the design philosophy. They will gain this through their involvement in a number of exercises which cover the design sequence from concept to documentation.

The syllabus comprises: design sequence including definition, value and criteria selection; generation of proposals; analysis of proposals; selection of design; development of details of a particular design selected; feasibility studies and examination of existing works; study of design projects by stages, including details of some aspects.

This unit is under the direction of an engineer in professional practice in cooperation with members of the academic staff. Lectures and exercises on architectural design and practice and their relationship to civil engineering are included in the unit.

##### Textbooks

##### Reference books

The unit is of a wide-ranging nature, and all text and reference books previous and current courses have relevance. In addition, reference will be made to many codes and guides to practice, of which the following list covers only the structural field:

Current SAA Codes, Manuals and Specifications, particularly

AS4100 - Steel Structures Code

AS3600 - Concrete Structures Code

AS1554 - Manual Welding, Part I

AS1170 - Loading Code, Parts I and II

AS1511 - High Strength Structural Bolting Code

MAI Steel Structures

Austrroads Bridge Design Specification

AS1720 - Timber Engineering Code

(Purchase of separate codes is recommended)

#### CLAW1001

##### Commercial Transactions A

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Early **Classes:** 2hrs of lectures and 1 tutorial per week **Assessment:** Exam, Mid-Semester Test, Tutorial Assessment, Case Analysis **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

This unit of study is concerned with the fundamental elements of business law. It commences with an overview of the Australian legal system (sources of law, parliament, courts, statutory interpretation,

doctrine of precedent), including an examination of those provisions in the Commonwealth Constitution relevant to business and commercial activities. The unit continues with a detailed study of those aspects of the law of contract that underlie all commercial transactions and are the essence of commercial law (formation of contract, terms of a contract, factors affecting the validity and enforcement of contracts, termination, remedies for breach of contract). Some aspects of the law of agency, criminal law and the law of torts (in particular, negligence and negligent misstatement) are introduced. The unit concludes with an examination of some of the key provisions of the Trade Practices Act 1974 (Cth) including those relating to misleading and deceptive conduct and manufacturers' liability.

##### Commercial Law Exchange

##### Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S.

#### CLAW2201

##### Corporations Law

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2hrs of lectures and 1 tutorial per week **Prerequisites:** Any 4 full semester first year units of study including CLAW1001 **Prohibitions:** CLAW2001 **Assessment:** Class participation, Take home assignment, Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Res Ec, UG Study Abroad Program.

This unit begins with a brief comparison of business entities, especially partnership. The concept and process of incorporation are examined. Company finance, both equity and debt finance, and the maintenance of the company's share capital will be studied as well as the topics of accounts, auditors, and companies in financial difficulty. The management of companies and directors' duties will be explored as well as the rights and remedies of company shareholders. Company takeovers, prospectus provisions and securities regulation are studied in depth in the elective, CLAW2203 Stock Markets and Derivatives Law.

#### CLAW2202

##### Bankruptcy and Insolvency

##### Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three hours of classes per week which may include one or more of the following: lectures; seminars; tutorials or workshops **Prerequisites:** CLAW2201 or CLAW2001 **Prohibitions:** CLAW2002 **Assessment:** Test, Assignment, Tutorial Work, Final Exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit is concerned with the law relating to the bankruptcy of individuals and corporate insolvency. In relation to bankruptcy, it explores the mechanisms by which formal bankruptcy may occur and, the role of the trustee and creditors. It goes on to examine arrangements with creditors outside formal bankruptcy (debt agreements, personal insolvency agreements). In the case of corporate insolvency the areas examined include receivers and other controllers, voluntary administration and deeds of company arrangement, schemes of arrangement and winding up. Other issues discussed include group insolvency and cross border insolvency.

**CLAW2003** **Assessment:** Assignment; Tutorial work and participation; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit begins with a study of the powers of the Australian Securities and Investment Commission with reference to recent ASIC investigations. The functions of the Australian Stock Exchange and those of securities dealers and investment advisers are examined as well as the relationship between broker and client. The market offences of market manipulation and insider trading are explored. Public funding of companies and prospectus provisions are studied along with the liability of officers and independent experts concerning the prospectus. The topic of mergers and acquisitions examines acquisitions, relevant interests, takeover schemes and announcements, and the liability of parties to a takeover. Derivatives will also be studied.

#### **CLAW2204**

##### **Banking and Finance Law Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three hours of classes per week which may include one or more of the following: lectures; seminars; tutorials or workshops **Prerequisites:** CLAW1001 **Prohibitions:** CLAW2004 **Assessment:** Tests; Assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

Students are introduced to the regulatory structure and its impact on banking practice. The relationship between banker and customer and the duties of the parties are analysed. Issues relating to risk management and abuse of banking and financial transactions are discussed. Payment instruments such as bills of exchange, cheques and letters of credit are also examined. Students will become familiar with the legal structure, relationships and liabilities of parties in syndicated lending and securitisation.

#### **CLAW2205**

##### **Trade Practices and Consumer Law Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three hours of classes per week which may include one or more of the following: lectures; seminars; tutorials or workshops **Prerequisites:** CLAW1001 **Prohibitions:** CLAW2005, CLAW3005, MKTG3005 **Assessment:** Test; Assignment; Tutorial work; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit is concerned with the provisions in the Trade Practices Act 1974 (Cwth) dealing with restrictive trade practices, unconscionable conduct and consumer protection. Topics to be studied in depth include: anti-competitive agreements, misuse of market power, exclusive dealing, resale price maintenance, mergers and acquisitions, misleading or deceptive conduct, unfair practices, product safety and product information, conditions and warranties in consumer transactions, liability of manufacturers and importers and unconscionable conduct. Comparable state legislation is also studied.

#### **CLAW2207**

##### **Legal Ethics and the Professions Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three hours of classes per week which may include one or more of the following: lectures; seminars; tutorials or workshops **Prerequisites:** CLAW1001 **Prohibitions:** CLAW2007 **Assessment:** Research Paper, Class work, Examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B C S T, B Com, B E, B Ec, B Ec Soc Sc, B I T, B Res Ec, UG Study Abroad Program.

This unit begins with an analysis of three major ethical philosophies: utilitarianism, duty based ethics and virtue ethics. Practical models based upon these philosophies will be studied here and applied throughout the unit. The significance of ethics to the major professions in the business world is the primary focus of this unit of study. Case

studies will be used to examine the consequences for the stakeholders (those affected directly and indirectly) of decisions made by professionals. The professions studied include: accountants, auditors, business information system managers, lawyers, company officers such as directors and other executives, and marketing managers. The unit aims to assist students understand and apply ethics to their future professional life.

#### **CLAW2551**

##### **Commercial Law Exchange Economics and Business**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc.

#### **CLAW3201**

##### **Australian Taxation System Economics and Business**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2hrs of lectures and 1 tutorial per week **Prerequisites:** CLAW2201 or CLAW2001 **Prohibitions:** CLAW3001 **Assessment:** Tutorial assessment; Mid semester test; Case Analysis; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit is an introduction to taxation law. It commences with an overview of the Australian tax system, discusses contemporary tax issues and then deals with specific topics, viz. basis of liability to Australian income tax, concepts of residence and source of income, meaning of income, tax accounting, statutory concepts of income, taxation of fringe benefits, basis of liability to capital gains tax and

allowable deductions. It concludes with a study of the general antiavoidance sections.

### CLAW3202

#### Tax Strategies in a Business Environment Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three hours of classes per week which may include one or more of the following: lectures; seminars; tutorials or workshops **Prerequisites:** CLAW3201 or CLAW3001 **Prohibitions:** CLAW3002 **Assessment:** Tutorial questions, group essay and presentation, and final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit deals with taxation issues in a business environment. In addition to income tax, the Goods and Services Tax is studied. The following topics are included: trading stock, capital allowances, taxation of partnerships and trusts including the application of capital gains tax to interests in these entities, carry forward of losses, taxation of companies, dividend imputation tax, capital gains tax application to shares and other interests in companies, intellectual property, collection of income tax instalments, amendment of assessments, objections and appeals, taxation of non-residents, withholding tax, foreign tax credits, international tax treaties, profit shifting and tax avoidance. The unit emphasises business tax planning issues.

### CLAW4101

#### Commercial Law Honours A Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** By seminar as arranged **Prerequisites:** By Application- Contact honours coordinator **Assessment:** May include seminar participation; seminar paper; case analysis; research paper; take home examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Requirements for the Pass degree must be completed before entry to level 4000 honours units of study*

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

Honours study is directed at: (i) increasing students' analytical/research skills beyond the level acquired in undergraduate pass level units; (ii) providing a foundation for the conduct of applied research in business law; and (iii) conducting research in the form of a thesis. These skills are developed through the completion of an additional (fourth) year of study.

The Business Law Honours Program consists of two components: the course work component and the writing of a thesis. The course work component is conducted in the form of a reading seminar series covering common key issues in commercial, corporations and taxation law, supported by an intensive training program in legal research and important skills in managing a large research project. The course work component will provide a good foundation for students to undertake independent research on their thesis.

### CLAW4102

#### Commercial Law Honours B Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** CLAW4101 **Assessment:** see CLAW4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

This unit of study is part of the Honours program in Business Law. The unit covers commercial law issues and forms part of the course work component as described in CLAW4101 above.

### CLAW4103

#### Commercial Law Honours C Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** CLAW4102 **Assessment:** see CLAW4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

This unit of study is part of the Business Law Honours program. The unit covers corporations law issues and forms part of the course work component as described in CLAW4101 above.

### CLAW4104

#### Commercial Law Honours D Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** CLAW4103 **Assessment:** see CLAW4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

This unit of study is part of the Business Law Honours program. The unit covers taxation law issues and forms part of the course work component as described in CLAW4101 above.

### CLAW9001

#### Commercial Law Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S.

#### Classical Civilisation Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

### CLCV1802

#### Classical Civilisation Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

**CLIN3001****High Acuity Nursing  
Nursing and Midwifery**

**Credit points:** 8 **Session:** Semester 1 **Classes:** lectures, tutorials, clinical laboratory sessions, clinical placements and a formal assessment of clinical performance. **Prerequisites:** Prerequisite: All Year 1 and Year 2 units of study (additional prerequisites to be advised). **Assessment:** research roundtable activity, essay, exam, clinical performance appraisal (cpa), off-campus clinical performance **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N, B N (I A H), B N, B A, B N, B Sc, UG Study Abroad Program.

This unit will build on the understanding of nursing practice from preceding units, in addressing specific nursing practices that are designed to meet the needs of individuals and families who experience a serious or critical acute health crisis. The unit will use a thematic approach based on the physiological disruption being faced by the individual and the effect on physical, psychological and social functioning by the individual. Physiological impact on multiple body systems is complicated by the rapid onset and uncertain outcomes of critical illness. This unit revisits the integration of digestive, distributive, eliminative and control mechanisms in the body and considers these further within the breadth of the patient's experience in a high acuity area of a hospital. The pathophysiological deviation of disease, natural compensatory responses and specific biomedical interventions will be explored. The technical possibilities of high acuity environments will be explored, as will psychological responses to the high acuity environment. This unit will provide the opportunity for students to explore the management of patients who require advanced nursing care and interventions for their serious or critical illness.

**CLIN3002****Inquiry and Research in Nursing  
Nursing and Midwifery**

**Credit points:** 8 **Session:** Semester 2 **Classes:** study days **Prerequisites:** All Year 1 and Year 2 units of study, CLIN3001, FCNU3001 (additional prerequisites to be advised). **Assessment:** Research proposal, exam and online quiz **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N, B N (I A H), B N, B A, B N, B Sc, UG Study Abroad Program.

This unit of study builds on the tenet throughout the course that research is integral to all aspects of nursing theory, education, application and practice. Students will be encouraged to broaden their understanding of research application to nursing and to examine various ways of knowing that encompass not only qualitative and quantitative methodology but also the esoteric. A critical analysis of various modes of inquiry will be used to investigate aspects of nursing practice and issues pertinent to nursing. A variety of perspectives, methodologies and methods that constitute modes of inquiry will be included. This unit will assist students to develop research knowledge and prepare them for future research activities.

**CLIN3004****Masculinities and Men's Health Nursing  
Nursing and Midwifery**

**Credit points:** 8 **Session:** Semester 1 **Classes:** lectures, tutorials and seminar activities. **Prerequisites:** All Year One and Year Two units of study. **Assessment:** book review, tutorial presentation, essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N, B N, B A, B N, B Sc, UG Study Abroad Program.

This unit focuses on men, masculinities and gender politics. By examining men's bodies and bodily practices and social structures such as gender, class, race, religion and sexuality, patterns of men's health problems can be identified. Issues such as sport, work, violence, and sexual practices will be examined in light of multiple competing masculinities, power relations and men's bodies. The unit will draw on and extend the knowledge gained in previous units addressing the social context, politics and subjectivity of health care and illness. Contemporary films and literature will be used to examine male identity and the contradictory nature of the construction and contestation of

masculinities and the implications it has for men's bodies, as agents and objects, and men's health and illness. This unit uses a gendered approach to link the biomedical with the social, in identifying Australian men's health and illness as a product of the diverse practices of masculinity.

**CLIN3006****Nursing Critically Ill Patients  
Nursing and Midwifery**

**Credit points:** 8 **Session:** Semester 2 **Classes:** lectures, tutorials and seminar activities. **Prerequisites:** All Year 1 and Year 2 units of study, CLIN3001, FCNU3001 (additional prerequisites to be advised). **Assessment:** essay, exam, off-campus clinical performance **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B N, B N, B A, B N, B Sc.

This unit of study provides the opportunity for students to examine the theoretical and professional aspects of critical care nursing practice. The unit will build from the work of High Acuity Nursing to specifically focus on nursing practices for patients with an increased dependence on nursing support in a critical care environment. This unit will foster the development of specific knowledge, skills, and attitudes that will enable you to meet the needs of the critically ill patient. The legal and ethical constraints and frameworks in which critical care nursing practice is conducted will be explored. A period of clinical education within an appropriate critical care setting is also included.

**CLIN3020****Human Biology  
Nursing and Midwifery**

**Credit points:** 6 **Session:** S1 Intensive, S2 Late Int **Classes:** online **Assessment:** online tests and exam **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

*Note: Department permission required for enrolment.*

**Associated degrees:** B N, Nursing UG Non Degree, UG Study Abroad Program.

This unit of study is designed to achieve a familiarity with basic concepts of anatomy and physiology and is offered to students wishing to enrol in the Master of Nursing (Graduate Entry) who have previously not completed tertiary studies in Human Biology. The unit aims to expand students' knowledge of anatomy and physiology and to encourage students to develop a framework within which to investigate the anatomy and physiology underpinning clinical situations. All major body systems are reviewed in the following sequence, their integration via neuro-hormonal control is a major focus: physiology of oxygenation, metabolism, elimination, support and movement, reproduction and neuro-hormonal regulation.

**CLIN3021****Nursing, Knowledge and Practice  
Nursing and Midwifery**

**Credit points:** 6 **Session:** Semester 1 **Classes:** normal day or on-line **Assessment:** essay, exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day or On-line

**Associated degrees:** B N, UG Study Abroad Program.

This unit of study examines the historical background to, and current debates surrounding, how nurses have established their knowledge and practice. In addition to examining the historical records in relation to nursing as a discrete area of knowledge and practice in health care, this unit of study analyses and critiques current trends, ethical considerations, and discourses in nursing and how they impact on understandings of the nature of nursing knowledge and contemporary practice(s).

**CLIN4005****Nursing Indigenous Australian People  
Nursing and Midwifery**

**Credit points:** 8 **Session:** Semester 2 **Classes:** seminars **Assessment:** problem based learning exercises, clinical assessment, clinical portfolio **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B N (I A H).

This senior unit of study will focus on the contemporary nursing practices and delivery of primary health care for Indigenous Australian peoples. Understanding of the nature of Indigenous illness health issues raised by Aboriginal people and how best to ensure appropriate nursing care is the primary focus of this unit. The relationship between Aboriginal communities and the health and well being of individual community members will also be discussed. This unit involves a period of clinical education and assessment of clinical performance as well as the completion of a minor thesis.

### CLNU3020

#### Clinical Experience 1

#### Nursing and Midwifery

**Session:** Semester 1 **Classes:** The unit will consist of two hours of on-campus nursing laboratory-based learning experiences per week (22 hours total) plus three weeks of supervised off-campus clinical experience in an acute care setting. **Assessment:** assignments, clinical placement assessment **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

*Note: Department permission required for enrolment.*

**Associated degrees:** B N.

The aim of this unit of study is to consolidate and extend experiences in clinical nursing practice for selected students undertaking their final year of study in the Bachelor of Nursing course. It is intended for those students who require recent clinical experience prior to registration with the New South Wales Nurses Registration Board in order to ensure competence and public safety.

### CLNU3021

#### Clinical Experience 2

#### Nursing and Midwifery

**Session:** Semester 2 **Classes:** The unit will consist of 18 hours of on-campus nursing laboratory-based learning experiences; four hours of guided learning; and four weeks of supervised off-campus clinical experience. **Assessment:** clinical placement assessment **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

*Note: Department permission required for enrolment.*

**Associated degrees:** B N.

The aim of this unit of study is to consolidate and extend experiences in clinical nursing practice for selected students undertaking their final year of study in the Bachelor of Nursing course. It is intended for those students who require recent clinical experience prior to registration with the New South Wales Nurses Registration Board in order to ensure competence and public safety. The off-campus clinical experience can be in an area of nursing practice chosen by the student from placements made available by the Faculty.

### CLSS2603

#### Greek and Roman Literature - Epic

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Roche **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 18 Junior credit points **Prohibitions:** GRLT2301 **Assessment:** one 1000 word tutorial paper, one 1750 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

Ancient epic helped shape the European cultural imagination. These masterpieces treat issues of universal concern: life, death, love, war, fate, the supernatural, and the journey of experience. Homer's Iliad and Odyssey are both entertainment and serious explorations of social values. Vergil's Aeneid recounts the foundation of Rome, and considers the individual's plight amid unstoppable historical and supernatural forces. Lucan's Civil War presents a disturbing vision of a world descending into chaos. This unit explores in detail these brilliant and influential poems.

#### Textbooks

Homer Odyssey trans. W. Shewring (Oxford U.P.)  
Homer Iliad trans. M. Hammond (Penguin Classics)  
Virgil Aeneid trans. C. Day Lewis (Oxford U.P.)  
Lucan Civil War trans. S. Braund (Oxford U.P.)

### CLST2601

#### Defining the Celts

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof A Ahlqvist **Session:** Semester 1 **Classes:** 2 x 1hr lecture and 1 x 1hr tutorial per week **Prerequisites:** 18 Junior Credit Points **Assessment:** one 2500 word essay and 2 hour (2000

word) exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, UG Study Abroad Program.

The 'Celts' are any of those peoples of Europe who speak or spoke a Celtic language. By the Iron Age the Celtic peoples were spread across Europe, and across the course of millennia have given rise to a number of European nations and cultures-including the Irish, the Welsh and the Bretons. This unit explores definitions of the Celts, examining their history and development, and provides an overview of their languages.

### CLST2602

#### Old Irish 2

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Anders Ahlqvist **Session:** Semester 2 **Classes:** 2 x 1hr lecture per week. 1 x 1hr tutorial per week. **Prerequisites:** CLST2606 **Assessment:** One 2500 wd grammar, metrics and translation exercise. One 2hr/2000 wd exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, UG Study Abroad Program.

The course seeks to give the students further insights about Old Irish, building on those achieved by taking Beginners' Old Irish (or equivalent elsewhere). The main focus remains on the grammar of the language, as well as its phonology and orthography; an outline is provided of the history of Irish. Further key texts are read and explicated; the complex metrical patterns of the magnificent poetry are presented.

### CLST2603

#### Middle Welsh 2

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Anders Ahlqvist **Session:** Semester 2 **Classes:** 2 x 1hr lectures per week; 1 x 1hr tutorial per week. **Prerequisites:** CLST2604 **Assessment:** One 2500 wd grammar, metrics and translation exercise; one 2hr/2000 wd examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, UG Study Abroad Program.

Building on the knowledge acquired by following Beginners' Middle Welsh (or equivalent elsewhere), the course seeks to give the students further insights about Middle Welsh. The main focus remains on the grammar of the language, as well as its phonology and orthography; an outline is provided of the history of Welsh. Further key texts are read and explicated; the complex metrical patterns of the beautiful poetry are presented.

### CLST2604

#### Middle Welsh 1

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof A Ahlqvist **Session:** Semester 1 **Classes:** 2 x hr lecture and 1 x 1hr tutorial per week **Prerequisites:** 18 Junior Credit Points **Assessment:** 2500 word Grammar and translation exercise and 2 hour (2000 word) exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (advanced) degree programme*

**Associated degrees:** B A, UG Study Abroad Program.

Middle Welsh was the language spoken and written in Wales in the Middle Ages (from about the twelfth to the fourteenth century). The most famous text surviving in Middle Welsh is the Mabinogion, a compilation of mythical and legendary material often of much earlier date. In this unit students will develop a knowledge of Middle Welsh grammar and vocabulary, and learn to read texts in Middle Welsh.

### CLST2605

#### Celts in History

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr L Olsen **Session:** Semester 2 **Classes:** 1 x 2hr seminar per week **Prerequisites:** 18 Junior credit points **Assessment:** One 3500 word Seminar Paper and 2500 word Weekly Journal **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, UG Study Abroad Program.

Finding the Celts in History from c.500 B.C. to the present raises issues of the extent of invasion or migration that has occurred in the past and its role in cultural change, indeed the very nature of cultural change itself. These will be addressed from written sources, material remains and genetic evidence. While this unit stands on its own, its topics have been carefully selected to allow students who have done CLST1001 to explore further the Celtic world.

### CLST2606

#### Old Irish 1

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof A Ahlqvist **Session:** Semester 1 **Classes:** 2 x 1hr lecture and 1 x 1hr tutorial per week **Prerequisites:** 18 Junior credit points **Assessment:** 2500 word grammar and translation exercise and 2 hour ( 2000 word) exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (advanced) degree programme*

**Associated degrees:** B A, UG Study Abroad Program.

Old Irish was the language spoken and written in Ireland in the early Middle Ages, and is preserved in a range of records, from Ogham stones to manuscripts. In this unit students will develop a knowledge of Old Irish grammar and vocabulary, and learn to read texts in Old Irish.

### CLST2607

#### Modern Irish Linguistics

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof A Ahlqvist **Session:** Semester 2 **Classes:** Two 2 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 Senior Credit Points **Assessment:** One 2 hour/2000 word exam. One 2000 word end-of-course homework essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (advanced) degree programme*

**Associated degrees:** B A, UG Study Abroad Program.

The unit develops students' knowledge of linguistics through the detailed study of Modern Irish. The grammar and linguistics of Modern Irish form the major focus; students will bring to the unit a background in language study and/or linguistics. The unit will consider the ways in which Modern Irish differs from other Western European languages, studying syntax and phonology.

### CLST4011

#### Celtic Studies Honours A

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Prof A Ahlqvist **Session:** Semester 1, Semester 2 **Prerequisites:** A major in Celtic Studies plus 12 additional credit points, all with a credit average **Assessment:** two units of study each with 6000 words of assessment and an 18-20,000 word thesis **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons).

Celtic Studies IV Honours is a 2-semester programme consisting of: a thesis of 18,000-20,000 words, written under the supervision of a member of staff nominated by the coordinator, and two 1-semester seminar (or equivalent) units of study. Note: It is important that prospective IV-Honours students consult the coordinator to ensure that their choice of Senior-level units of study is appropriate to their intentions for IVth Year. Normally, although this may be varied in individual cases, the coursework is worth 50 per cent of the total mark and the thesis is worth 50 per cent.

### CLST4012

#### Celtic Studies Honours B

##### Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** CLST4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons).

Refer to CLST4011

## CMPN1000

### Composition Through Improvisation 1 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1  
**Classes:** 1hr workshop/wk **Assessment:** Weekly assignments (70%), final recorded composition (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The unit aims, through performance, to help students develop vital aural and improvisational skills which will significantly enhance their compositional capacity. For further information contact the Chair (Composition and Music Technology).

## CMPN1003

### Composition Through Improvisation 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 2  
**Classes:** 1hr workshop/wk **Prerequisites:** CMPN1000 Composition Through Improvisation 1 **Assessment:** Weekly assignments (70%), final recorded composition (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The unit aims through performance to help students develop vital aural and improvisational skills which will significantly enhance their compositional process. For further information contact the Chair (Composition and Music Technology).

## CMPN1007

### Electronic Music 1 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Anthony Hood **Session:** Semester 1  
**Classes:** 2hr lab/studio session/wk **Prerequisites:** MUED1002 Music Technology 1 **Assessment:** Sound examples of processed material (40%), electroacoustic work (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

This unit will explore some current techniques in electroacoustic composition through the completion of small tasks in signal processing and the composing of a small electroacoustic sound work. Students will discuss recent examples of the electroacoustic repertoire to gain and understanding of current practices, and will gain an insight into the recording process leading to the making of their piece.

## CMPN1008

### Electronic Music 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Anthony Hood **Session:** Semester 2  
**Classes:** 2hr lab/studio session/wk **Prerequisites:** CMPN1007 Electronic

Music 1 **Assessment:** Multichannel composition (40%), Multimedia DVD with 5.1 surround sound (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

This unit will explore current techniques in electroacoustic composition with a focus on the realisation and performance of a multichannel electroacoustic sound work. Students will become familiar with historic approaches to this genre through the study of representative pieces. The class will assume a leadership role in the running of an electroacoustic/multimedia concert, and have the opportunity to diffuse stereo works in a surround space. Students will compose two multichannel works to demonstrate an understanding of the compositional process in this medium.

## CMPN1601

### Composition 1 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Matthew Hindson **Session:** Semester 1, Semester 2 **Classes:** 2 hour seminar plus individual tutorials. **Corequisites:** CMPN1611 Compositional Techniques and Analysis **Assumed knowledge:** Students have passed the composition entrance interview. **Assessment:** Portfolio of creative work as directed by the lecturer (90%), attendance and participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

The development of compositional techniques is integral to the ability to best express musical ideas and material. The focus of this unit is the creative work of students which is developed through the study of a range of compositional topics. Aspects of pitch, rhythm, counterpoint, notation, instrumentation and structure are considered both in the abstract and in relation to a variety of music. For further information contact the Chair of Unit.

## CMPN1602

### Composition 2 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Matthew Hindson **Session:** Semester 1, Semester 2 **Classes:** 2 hour seminar plus individual tutorials. **Prerequisites:** CMPN1601 Composition 1 **Corequisites:** CMPN1612 Compositional Techniques and Analysis 2 **Assessment:** Portfolio of creative work as directed by the lecturer (90%), attendance and participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

The development of compositional technique is integral to the ability to best express musical ideas and material. The focus of this unit is the creative work of students which is developed through the study of a range of compositional topics. Aspects of pitch, rhythm, counterpoint, notation, instrumentation and structure are considered both in the abstract and in relation to a variety of music. For more information contact the Chair of Unit.

## CMPN1611

### Compositional Techniques and Analysis 1 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1 **Classes:** 2 hours seminar **Assumed knowledge:** It is strongly recommended that participants have a good grasp of modern and 20th century repertoire. **Assessment:** One short assignment/essay 30% One long essay/analysis 70% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

Studies will fall primarily into the following areas: 1. Overview of music and composition in the 20th century to the current times. The aim is to introduce students to a range of compositional styles, concepts, aesthetics and developments in the

period ranging from the early 20th century to the present. 2. Concepts of notation. This component includes an historical overview of the development of musical notation and will also focus on changing

practices in the 20th century - additions and modifications to traditional notation, time/space and aleatoric notation, musical graphics, notation of electronic music etc, and the ideas which underlie the techniques covered. 3. Aspects of pitch rhythm and form: an introduction to concepts relating to the way musical/sound material is organised ranging from traditional to more contemporary approaches. 4. Introduction to orchestration. Students will look at the development of the orchestra and will examine techniques of orchestration up to, and including, works from the early 20th century repertoire. For further information, contact the Chair of Unit.

### CMPN1612

#### Compositional Techniques and Analysis 2 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 2 **Classes:** 2 hours seminar **Prerequisites:** CMPN1611 Compositional Techniques & Analysis 1 **Assessment:** One short assignment/essay 30% One long essay/analysis 70% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

Studies will focus on the work of specific composers and schools and will fall primarily into the following areas: 1. Overview of music and composition in the 20th century to the current times. The aim is to introduce students to a range of compositional styles, concepts, aesthetics and developments in the period ranging from the early 20th century to the present. 2. Concepts of notation. This component includes an historical overview of the development of musical notation and will also focus on changing practices in the 20th century - additions and modifications to traditional notation, time/space and aleatoric notation, musical graphics, notation of electronic music etc, and the ideas which underlie the techniques

covered. 3. Aspects of pitch rhythm and form: an introduction to concepts relating to the way musical/sound material is organised ranging from traditional to more contemporary approaches. 4. Introduction to orchestration. Students will look at the development of the orchestra and will examine techniques of orchestration up to, and including, works from the early 20th century repertoire. For further information, contact the Chair of Unit.

### CMPN1631

#### Electroacoustic Music 1 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Anthony Hood **Session:** Semester 1 **Classes:** One 2 hr lab/studio class/wk **Prerequisites:** MUED1002 Music Technology **Assessment:** Sound examples demonstrating electroacoustic techniques (40%), Electroacoustic composition (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

This unit will explore current techniques in electroacoustic composition through the completion of small tasks in signal processing and the composing of an electroacoustic sound work. Students will discuss recent examples of the electroacoustic repertoire to gain an understanding of current practices, and will gain an insight into the recording process leading to the making of their piece.

### CMPN1632

#### Electroacoustic Music 2 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Anthony Hood **Session:** Semester 2 **Classes:** One 2 hr lab/studio class/wk **Prerequisites:** CMPN1631 Electroacoustic Music 1 **Assessment:** Composition for solo instrument and 5.1 sound (50%), Multichannel electroacoustic work (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

Electronic music composers have been "diffusing" stereo works in surround spaces for many years. Until recently, there has been no standard to which composers could adhere when mixing their works to multichannel tape. Although it has some limitations for the

electroacoustic composer, sound encoded for 5.1 on DVD now offers the composer a medium through which to share surround sound electroacoustic works. This unit of study explores composing for a surround space, and investigates writing and electroacoustic work that also includes a live instrumental/vocal performer.

### CMPN2000

#### Composition Through Improvisation 3 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Daryl Pratt **Session:** Semester 1 **Classes:** 1hr workshop/wk **Prerequisites:** CMPN1003 Composition Through Improvisation 2, CMPN2004 Composition 4 (Major) or CMPN2604 Composition 4 **Assessment:** Weekly assignments/classroom participation (20%), 2 exams (20% each), Ensemble composition (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The unit aims to introduce students to the instruments and techniques required for composition and performance in percussion. The unit will also focus on the fundamentals of rhythm in order to develop solo and ensemble performance skills.

### CMPN2001

#### Composition Through Improvisation 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Daryl Pratt **Session:** Semester 2 **Classes:** 1hr workshop/wk **Prerequisites:** CMPN2000 Composition Through Improvisation 3 **Assessment:** Weekly assignments/classroom participation (40%), composition and performance of a piece for percussion ensemble (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The aim of this Unit of Study is that students will develop an understanding of percussion composition through the development of basic percussion performance techniques, the creation of percussion ensemble compositions, performing complex rhythms and the experience of ensemble performance.

### CMPN2003

#### Composition 3 (Major) Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3hr class/wk **Prerequisites:** CMPN1006 Composition 2 (Major) **Corequisites:** CMPN2011 Compositional Techniques and Analysis 3, CMPN1007 Electronic Music 1 **Assessment:** Portfolio of compositions (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus Studies, UG Study Abroad Program.

Small classes will be taught by composition staff and, where available, guest composers. Every semester lecturers will offer a number of composition options, including those listed below. Students enrolled in Composition 3-8 (Major) will be required to choose one option offered by a different lecturer each semester. Composition options to be included are: mixed ensemble, radiophonic composition, vocal and/or choral music, electronic media, orchestra, specially constructed performance systems, string quartet, chamber orchestra, audio visual systems, works for solo instrument, film and/or video, chamber opera, music theatre. For further information contact the Chair of Unit.

### CMPN2004

#### Composition 4 (Major) Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3hr class/wk **Prerequisites:** CMPN2003 Composition 3 (Major) **Corequisites:** CMPN2012 Compositional Techniques and Analysis 4, CMPN1008 Electronic Music 2 **Assessment:** Portfolio of compositions

(100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus Studies, UG Study Abroad Program.

Every semester lecturers will offer a number of composition options. Students enrolled in Composition 3 - 8 (Major) will be required to choose one option offered by a different lecturer each semester. Composition options to be included are as follows: mixed ensemble; radiophonic composition; vocal and/or choral music; electronic media; orchestra; specially constructed performance systems; string quartet; chamber orchestra; audio visual systems; works for solo instrument; film and/or video; chamber opera; music theatre. For further information contact the Chair of Unit.

### CMPN2006

#### Sound Recording Fundamentals

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** John Bassett **Session:** Semester 1 **Classes:** 2hr studio class/wk **Prerequisites:** MUED1002 Music Technology 1 **Corequisites:** BMus (Perf) Jazz students only: JAZZ4010 Jazz Performance 7 **Assessment:** Live Stereo Recording (40%), Solo Studio Recording (40%), Web CT Online Exam (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study examines the theory of sound and acoustics, microphone design, stereo microphone techniques, mixing console operation, application of signal modifiers, digital audio recording and CD creation. Students will experience prac-based recording sessions to gain a comprehensive understanding of the recording technology on offer at the Sydney Conservatorium. Jazz students should have completed Jazz Performance 6 before enrolling in this unit of study.

### CMPN2007

#### Sound Recording Advanced

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** John Bassett **Session:** Semester 2 **Classes:** 2hr studio class/wk **Prerequisites:** CMPN2006 Sound Recording Fundamentals **Corequisites:** BMus (Perf) Jazz students only: JAZZ4012 Jazz Performance 8 **Assessment:** Class Attendance and Participation (10%), Recording Project 1 (35%), Recording Project 2 (35%), Web CT Exam (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit follows on from Sound Recording Fundamentals with an in-depth look at frequency-based aural training and its application in the use of equalisation in the recording and mixdown process. Additional topics including frequency response, dynamic range, phase relationships in audio systems, effects processors and analysis of audio mixdowns/mixing techniques will also be discussed.

### CMPN2011

#### Compositional Techniques and Analysis 3

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1 **Classes:** 2 hour seminar **Prerequisites:** CMPN1012 /1612 Compositional Techniques and Analysis 2 **Corequisites:** CMPN2003 Composition 3 (Major) or CMPN2603 Composition 3 **Assessment:** Class exercises, assignments (40%); take home exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

A major components of the unit is the study of variation technique, timbre and texture as well as innovations in ensemble and orchestral writing.

### CMPN2012

#### Compositional Techniques and Analysis 4

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 2 **Classes:** 2 hour seminar **Prerequisites:** CMPN2011 Compositional Techniques and Analysis 3 **Corequisites:** CMPN2004 Composition 4 (Major) or CMPN2604 Composition 4 **Assessment:** Class exercises, two assignments (50% each) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit primarily focuses on the use of diatonicism and other allied modal harmonic and melodic frameworks in recent composition. Various techniques of process construction in pitch, rhythm and form are investigated in conjunction with orchestrational and instrumental applications in such music.

### CMPN2603

#### Composition 3

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3 hour seminar or half hour 1:1 lesson **Prerequisites:** CMPN1602 Composition 2 **Corequisites:** CMPN2011 Compositional Techniques and Analysis 3 and CMPN1631 Electroacoustic Music 1 **Assessment:** Submission of one music composition in hand written or computer made score for a small to medium ensemble and of a duration between six and ten minutes. **Assessment ; Score 100%** **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

Small classes will be taught by composition staff and, where available, guest composers. At the lecturers discretion the 3 hour classes will be divided into half hour; one to one composition lessons. Every semester each lecturer of the composition unit will offer a number of composition options, including those listed below. Students enrolled in Composition 3 to 8 will be required to choose one option offered by a different lecturer each semester. Composition options to be included are: - mixed ensemble, electroacoustic composition , vocal or choral music , electronic media , orchestra - specially constructed performance systems such as string quartet , chamber orchestra, audio visual systems with film and/or video, chamber opera and music theatre. For further information contact the Chair of Unit.

### CMPN3008

#### Interactive and Algorithmic Composition Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Ivan Zavada **Session:** Semester 1 **Classes:** 2hr lab/studio session/wk **Prerequisites:** CMPN1008 Electronic Music 2 or CMPN1632 Electroacoustic Music 2 **Assessment:** Workshop presentation of Max patches (60%); Workshop presentation of interactive MIDI composition (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

Computers now offer composers the opportunity to build software instruments with interactivity and generative elements that can operate in real-time. This can include installations or live performance works. This unit investigates the Max software environment, encouraging the student to explore the creative possibilities of interactive/generative composition.

### CMPN3009

#### Sound Synthesis Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Ivan Zavada **Session:** Semester 2 **Classes:** 2hr lab/studio session/wk **Prerequisites:** CMPN3008 Electronic Music 3/Interactive and Algorithmic Composition **Assessment:** Submission of MSP patch (60%), Workshop performances of interactive/generative work (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

This unit continues from Electronic Music 3, this time looking at interactive/generative composition within the digital audio/multimedia domain. Working within the MSP environment, students will develop an understanding of advanced DSP techniques and will gain experience of writing interactive works for acoustic instruments and installations. Final works will be presented in a concert workshop at the end of semester.

### CMPN3012

#### Compositional Techniques and Analysis 5 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1 **Classes:** 2 hour seminar **Prerequisites:** CMPN2012 Compositional Techniques and Analysis 4 **Corequisites:** CMPN3004 Composition 5 (Major) or CMPN3605 Composition 5 **Assessment:** Class exercises, two assignments (50% each) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit will be an investigation of two diverse areas of composition and a comparison of them through analysis of works and reading and discussion of pertinent published articles. Stochastic techniques such as those employed by composer Iannis Xenakis and their results will be juxtaposed with free, allietoric and graphic notation works, particularly those of Karlheinz Stockhausen.

### CMPN3013

#### Compositional Techniques and Analysis 6 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 2 **Classes:** 2 hour seminar **Prerequisites:** CMPN3012 Compositional Techniques and Analysis 5 **Corequisites:** CMPN3006 Composition 6 (Major) or CMPN3606 Composition 6 **Assessment:** Class exercises, assignments (40%); take home exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit covers the investigation of diverse structural and formal aspects of music written primarily in the second half of the 20th century. Works of many composers from this period will be analysed in some detail with respect to organisation of pitch, rhythm, harmony (vertical pitch organisation), timbre, texture, syntax, orchestration, transformational processes and formal problems. Investigation of influences of various transformational and structural processes, originally developed in electronic/computer music, on orchestration, structure and transformational processes in instrumental music is included. The role of the concepts of time and space in late 20th century compositional thought will also be considered. Some emphasis will be given to class discussion on aesthetics and philosophical backgrounds of various stylistic trends and compositional approaches in the 20th century.

### CMPN3605

#### Composition 5 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3 hours seminar **Prerequisites:** CMPN2604 Composition 4 **Corequisites:** CMPN3000 Composers Performers Workshop 1 or CMPN 3008 Interactive & Algorithmic Composition **Assessment:** Submission of one music composition in hand written or computer made score for a small to large ensemble and of a duration between six and ten minutes. **Assessment ; Score** 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

Small classes will be taught by composition staff and, where available, guest composers. At the lecturers discretion the 3 hour classes will

be divided into half hour; one to one composition lessons. Every semester each lecturer of the composition unit will offer a number of composition options, including those listed below. Students enrolled in Composition 3 to 8 will be required to choose one option offered by a different lecturer each semester. Composition options to be included are: - mixed ensemble, electroacoustic composition , vocal or choral music , electronic media , orchestra - specially constructed performance systems such as string quartet , chamber orchestra, audio visual systems with film and/or video, chamber opera and music theatre. For further information contact the Chair of Unit.

### CMPN3606

#### Composition 6 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3 hours seminar **Prerequisites:** CMPN3605 Composition 5 **Corequisites:** CMPN3001 Composers Performers Workshop 2 or CMPN 3009 Sound Synthesis **Assessment:** Submission of one music composition in hand written or computer made score for a small to large ensemble and of a duration between six and ten minutes. **Assessment ; Score** 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

Small classes will be taught by composition staff and, where available, guest composers. At the lecturers discretion the 3 hour classes will be divided into half hour; one to one composition lessons. Every semester each lecturer of the composition unit will offer a number of composition options, including those listed below. Students enrolled in Composition 3 to 8 will be required to choose one option offered by a different lecturer each semester. ### CMPN3615

#### Composition 5 (Honours) Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3 hours/week **Prerequisites:** CMPN2604 Composition 4, MCGY2011 Harmony & Analysis 4, MCGY2005 Aural Perception 4, CMPN1632 Electroacoustic Music 2, CMPN2012 Compositional Techniques & Analysis 4 **Corequisites:** CMPN3008 Interactive & Algorithmic Composition or CMPN3000 Composer Performer Workshop 1 **Assessment:** Portfolio of compositions, 100%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Mus (Comp), UG Study Abroad Program.

The Honours strand for the B Mus Composition degree allows students to extend their musical knowledge and skill base within a specialised honours program. Students enrolled in Honours units are expected to develop and complete research-based projects which will consist of preparation and development of a composition portfolio and related dissertation/research thesis. Students wishing to enrol in the Composition Honours Program must seek permission of the Chair of Unit.

### CMPN3616

#### Composition 6 (Honours) Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3 hours/week **Prerequisites:** CMPN3615 Composition 5 (Honours) **Corequisites:** CMPN3009 Sound Synthesis or CMPN3001 Composer Performer Workshop 2 **Assessment:** Portfolio of compositions, 90%; thesis proposal, 10%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Mus (Comp), UG Study Abroad Program.

The Honours strand for the B Mus Composition degree allows students to extend their musical knowledge and skill base within a specialised honours program. Students enrolled in Honours units are expected to develop and complete research-based projects which will consist of preparation and development of a composition portfolio and related dissertation/research thesis. Students wishing to enrol in the Composition Honours Program must seek permission of the Chair of Unit.

#### CMPN4000

##### Composer Performer Workshop 3 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 2hr workshop/wk **Prerequisites:** CMPN3001 Composer Performer Workshop 2 **Assessment:** For all students: professional approach in workshops (60%). For composers only: CPW concert attendance, submission of program notes and 2 copies of each score to be played, concert management duties such as stage managing and preparation of programs and publicity (40%). For performers only: performance at the CPW concert(s) (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

The Composer Performer Workshop provides both composers and performers with the opportunity to work together in the performance of new and experimental works. For further information contact the Chair of Unit.

#### CMPN4001

##### Composer Performer Workshop 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 2hr workshop/wk **Prerequisites:** CMPN4000 Composer Performer Workshop 3 **Assessment:** For all students: professional approach in workshops (60%). For composers only: CPW concert attendance, submission of program notes and 2 copies of each score to be played, concert management duties such as stage managing and preparation of programs and publicity (40%). For performers only: performance at the CPW concert(s) (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

The Composer Performer Workshop provides both composers and performers with the opportunity to work together in the performance of new and experimental works. For further information contact the Chair of Unit.

#### CMPN4004

##### Composition 7 (Major) Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3hr class/wk **Prerequisites:** CMPN3006 Composition 6 (Major) **Corequisites:** CMPN4010 Sound & Image **Assessment:** Portfolio of compositions (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed).

Every semester lecturers will offer a number of composition options. Students enrolled in Composition 3 - 8 (Major) will be required to choose one option offered by a different lecturer each semester. Composition options to be included are as follows: mixed ensemble; radiophonic composition; vocal and/or choral music; electronic media; orchestra; specially constructed performance systems; string quartet; chamber orchestra; audio visual systems; works for solo instrument; film and/or video; chamber opera; music theatre. For further information contact the Chair of Unit.

#### CMPN4005

##### Composition 7 (Honours)

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3hr class/wk **Prerequisites:** CMPN3007 Composition 6 (Honours) **Corequisites:** CMPN4010 Sound & Image **Assessment:** Portfolio of compositions (80%), 5,000 word thesis (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Mus (Comp).

Students wishing to enrol in the Composition Honours Program, must seek permission from the Chair of Unit. The Honours Program involves attending specific seminars, producing a portfolio of compositions and completing a thesis on an approved topic.

#### CMPN4006

##### Composition 8 (Major) Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3hr class/wk **Prerequisites:** CMPN4004 Composition 7 (Major) **Corequisites:** CMPN4011 Composition & Multimedia **Assessment:** Portfolio of compositions (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed).

Every semester lecturers will offer a number of composition options. Students enrolled in Composition 3 - 8 (Major) will be required to choose one option offered by a different lecturer each semester. Composition options to be included are as follows: mixed ensemble; radiophonic composition; vocal and/or choral music; electronic media; orchestra; specially constructed performance systems; string quartet; chamber orchestra; audio visual systems; works for solo instrument; film and/or video; chamber opera; music theatre. For further information contact the Chair of Unit.

#### CMPN4007

##### Composition 8 (Honours) Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3hr class/wk **Prerequisites:** CMPN4005 Composition 7 (Honours) **Corequisites:** CMPN4011 Composition & Multimedia **Assessment:** A major work (an orchestral work of 15min or a music theatre work of 20min or an electroacoustic work for 6 instruments and electronics of 15-20 min can be used as benchmarks), or folio of works. The composition(s) will be assessed by a panel of at least three members of the Composition and Music Technology Unit chaired by the Unit Chair (or his/her nominee); the minor thesis will be assessed by a panel of at least two members of the Composition and Music Technology Unit. To achieve a mark in Composition 8 (Honours), students must pass all components of the course. The final honours mark will be an average of the marks for Composition 7 (Honours) and Composition 8 (Honours). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Mus (Comp).

Students wishing to enrol in the Composition Honours Program, must seek permission from the Chair of Unit. The Honours Program involves attending specific seminars, producing a portfolio of compositions and completing a thesis on an approved topic.

#### CMPN4010

##### Sound and Image Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Ivan Zavada **Session:** Semester 1 **Classes:** 2hr lab/studio session/wk **Prerequisites:** CMPN1008 Electronic Music 2 or CMPN1632 Electroacoustic Music 2 **Assessment:** Preliminary exercises (40%), Multimedia Composition (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S.

Audio-visual composition is a predominant mode of practice for many contemporary composers. Electronic Music 5 unit exists to provide students with an introduction to audio-visual composition and to investigate the broader relationship between sound and image. Through project based investigations, students are introduced to

technologies and compositional concepts that influence and shape contemporary audio-visual practice.

### CMPN4011

#### Composition and Multimedia

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Ivan Zavada **Session:** Semester 2  
**Classes:** 2hr lab/studio session/wk **Prerequisites:** CMPN4010 Sound and Image/Electronic Music 5 **Assessment:** Initial Documentation Research 10%, Article Summaries 40%, Final Project 50% **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

This unit will focus on electronic music composition involving new paradigms brought about by real-time performance, installations, network technology, human computer interaction, gestural control and integration with visual arts and video animations. The aim is to encourage students to explore and maximise the possibilities offered by the current lab and studio environments at the Conservatorium. This unit of study will also investigate the available literature on topics such as multimedia, interactive and installation work in the context of contemporary electronic music practice.

### CMPN4607

#### Composition 7

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Michael Smetanin **Session:** Semester 1, Semester 2 **Classes:** 3 hours seminar **Prerequisites:** CMPN3606 Composition 6 **Corequisites:** CMPN4000 Composers Performers Workshop 3 or CMPN4010 Sound & Image **Assessment:** Submission of one music composition in hand written or computer made score for a small to large ensemble and of a duration between eight and twelve minutes. Assessment ; Score 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp).

Small classes will be taught by composition staff and, where available, guest composers. At the lecturers discretion the 3 hour classes will be divided into half hour; one to one composition lessons. Every semester each lecturer of the composition unit will offer a number of composition options, including those listed below. Students enrolled in Composition 3 to 8 will be required to choose one option offered by a different lecturer each semester. Composition options to be included are: - mixed ensemble, electroacoustic composition , vocal or choral music , electronic media , orchestra - specially constructed performance systems such as string quartet , chamber orchestra, audio visual systems with film and/or video, chamber opera and music theatre. For further information contact the Chair of Unit.

### COMM1001

#### Prob Solving & Communication in Science Science

**Credit points:** 6 **Session:** S1 Late Int, S2 Late Int **Classes:** 15hrs lec, 45hrs prac. **Assessment:** Assessment is based on a communication project and a written report of a modelling project. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Science UG Non-Degree, UG Study Abroad Program.

Alongside the specialised knowledge and skills of the various scientific disciplines, it is as important now as ever before that a science graduate be competent in a set of generic skills associated with science. These skills are identified as reasoning, communication and modelling. In the unit students will be introduced to the key elements of these three aspects of the scientific approach. Working in small groups, students will prepare a short piece for print, radio or video aimed at communicating a scientific topic to a non-technical audience. Students will also complete an exercise aimed at developing a theoretical model of a phenomenon and will prepare a technical report on this development.

### COMP2007

#### Algorithms and Complexity

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** COMP (2907 or 3309 or 3609 or 3111 or 3811) **Assumed knowledge:** INFO1105, MATH1004 or MATH1904 Discrete Maths **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

This unit provides an introduction to the design and analysis of algorithms. The main aims are (i) to learn how to develop algorithmic solutions to computational problem and (ii) to develop understanding of algorithm efficiency and the notion of computational hardness.

### COMP2129

#### Operating Systems and Machine Principles Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** SOFT (2130 or 2830 or 2004 or 2904) or COMP (2004 or 2904) **Assumed knowledge:** Programming, as from INFO1103 **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

In this unit of study elementary methods for developing robust, efficient and re-usable software will be covered. The unit is taught in C, in a Unix environment. Specific coding topics include memory management, the pragmatic aspects of implementing data structures such as lists and hash tables and managing concurrent threads. Debugging tools and techniques are discussed and common programming errors are considered along with defensive programming techniques to avoid such errors. Emphasis is placed on using common Unix tools to manage aspects of the software construction process, such as version control and regression testing. The subject is taught from a practical viewpoint and it includes a considerable amount of programming practice, using existing tools as building blocks to complete a large-scale task.

### COMP2555

#### Computer Science Exchange Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Sc, B Sc (Bioinformatics).

This unit of study is for University of Sydney students in the Exchange program studying at an overseas University.

### COMP2556

#### Computer Science Exchange Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Sc, B Sc (Bioinformatics).

This unit of study is for University of Sydney students in the Exchange program studying at an overseas University.

### COMP2557

#### Computer Science Exchange Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Sc, B Sc (Bioinformatics).

This unit of study is for University of Sydney students in the Exchange program studying at an overseas University.

### COMP2558

#### Computer Science Exchange Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange program studying at an overseas University.

### COMP2907

#### Algorithms and Complexity (Advanced) Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prerequisites:** Distinction level result in INFO (1105 or 1905) or SOFT (1002 or 1902) **Prohibitions:** COMP (2007 or 3309 or 3609 or 3111 or 3811) **Assessment:** In-course involvement, assignments, quizzes and written exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

An advanced alternative to COMP2007; covers material at an advanced and challenging level. See the description of COMP2007 for more information.

### COMP3109

#### Programming Languages and Paradigms Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Assumed knowledge:** COMP2007 **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Sc.

This unit provides an introduction to the foundations of programming languages and their implementation. The main aims are to teach what are: grammars, parsers, semantics, programming paradigms and implementation of programming languages.

### COMP3308

#### Introduction to Artificial Intelligence Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs & Tut 2hrs) per week **Prohibitions:** COMP (3608 or 3002 or 3902) **Assumed knowledge:** COMP2007 **Assessment:** Assignments, written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Artificial Intelligence (AI) is all about programming computers to perform tasks normally associated with intelligent behaviour. Classical AI programs have played games, proved theorems, discovered patterns in data, planned complex assembly sequences and so on. This unit of study will introduce representations, techniques and architectures used to build intelligent systems. It will explore selected topics such as heuristic search, game playing, machine learning, and knowledge representation. Students who complete it will have an understanding of some of the fundamental methods and algorithms of AI, and an appreciation of how they can be applied to interesting problems. The unit will involve a practical component in which some simple problems are solved using AI techniques.

Prentice Hall, 0-13-080302-2, 2003

### COMP3419

#### Graphics and Multimedia Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** MULT (3306 or 3606 or 3019 or 3919 or 3004 or 3904) or COMP(3004 or 3904) **Assumed knowledge:** COMP2007, MATH1002 **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

Computer Graphics and Multimedia are core technologies to support an interdisciplinary computing and communication environment. This unit provides a broad introduction to the field of multimedia to meet the diverse requirements of application areas such as entertainment, industrial design, virtual reality, intelligent media management, medical imaging and remote sensing. The unit covers both the underpinning theories and the practices of manipulating and enhancing digital media including image, computer graphics, audio, computer animation, and video. It introduces principles and cutting-edge techniques such as

multimedia data processing, content analysis, media retouching, media coding and compression. It elaborates on various multimedia coding standards. A particular focus is on principles and the state-of-the-art research and development topics of Computer Graphics such as modelling, rendering and shading, and texturing.

**Computational Methods for Life Sciences**  
**Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prerequisites:** INFO1105 and (COMP2007 or INFO2120) and 6 credit points from BIOL or MBLG **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

This unit introduces the algorithmic principles driving advances in the life sciences. It discusses biological and algorithmic ideas together, linking issues in computer science and biology and thus is suitable for students in both disciplines. Students will learn algorithm design and analysis techniques to solve practical problems in biology.

**COMP3520**  
**Operating Systems Internals**  
**Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** NETS (3304 or 3604 or 3009 or 3909) or COMP (3009 or 3909) **Assumed knowledge:** COMP2129, INFO1105 **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Sc.

This unit will provide a comprehensive discussion of relevant OS issues and principles and describe how those principles are put into practice in real operating systems. The contents include internal structure of OS; several ways each major aspect (process scheduling, inter-process communication, memory management, device management, file systems) can be implemented; the performance impact of design choices; case studies of common OS (Linux, MS Windows NT, etc). The contents also include concepts of distributed systems: naming and binding, time in distributed systems, resource sharing, synchronization models (distributed shared memory, message passing), fault-tolerance, and case study of distributed file systems.

**COMP3556**  
**Computer Science Exchange**  
**Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Sc, B Sc (Bioinformatics).

This Unit of Study is for University of Sydney students in the Exchange program studying at an overseas university.

**COMP3557**  
**Computer Science Exchange**  
**Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Sc, B Sc (Bioinformatics).

This Unit of Study is for University of Sydney students in the Exchange program studying at an overseas university.

 Prentice Hall, 0-13-080302-2, 2003

**COMP3615**  
**Software Development Project**  
**Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Meeting with academic supervisor 1hr & Class meeting 1hr) per week **Prerequisites:** INFO3402 **Prohibitions:** INFO3600 or SOFT (3300 or 3600 or 3200 or 3700) **Assessment:** Individual presentation, oral examination and group report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

This unit will provide students an opportunity to apply the knowledge and practise the skills acquired in the prerequisite and qualifying units, in the context of designing and building a substantial software development system in diverse application domains including life sciences. Working in groups students will need to carry out the full range of activities including requirements capture, analysis and design, coding, testing and documentation.

**COMP4011**  
**Computer Science Honours A**  
**Engineering and Information Technologies**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B S T (Hons), B Sc (Hons), UG Study Abroad Program. Students enrolled in the Honours programs study various advanced aspects of Computer Science. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

**COMP4012**

**COSC1001****Computational Science in Matlab****Science**

**Credit points:** 3 **Session:** Semester 2 **Classes:** One 1 hour lecture and one 2 hour practical per week. **Prohibitions:** COSC1901 **Assumed knowledge:** HSC Mathematics **Assessment:** One assignment, practical work, including practical exams, theory exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Sc, B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study focuses on scientific problem solving and data visualisation using computers and is complementary to COSC1002. Students will learn how to solve problems arising in the natural sciences and mathematics using core features of the problem solving environment MATLAB, with a choice of problems from various areas of science at each stage. Emphasis will be placed on graphical display and visualisation of data and solutions to problems. No previous knowledge of programming is assumed.

**COSC1002****Computational Science in C****Science**

**Credit points:** 3 **Session:** Semester 2 **Classes:** One 1 hour lecture and one 2 hour practical per week. **Prohibitions:** COSC1902 **Assumed knowledge:** HSC Mathematics **Assessment:** One assignment, practical work, including practical exams, theory exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Sc, B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study focuses on scientific problem-solving using computers and is complementary to COSC1001. Students will learn how to solve problems arising in the natural sciences and mathematics using core features of the language C, with a choice of problems from various areas of science at each stage. No previous knowledge of programming is assumed.

**COSC1551****Computational Science Exchange****Science**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition).

This unit is for University of Sydney students in the Exchange Program studying at an overseas university.

**COSC1901****Computational Science in Matlab (Adv)****Science**

**Credit points:** 3 **Session:** Semester 2 **Classes:** One 1 hour lecture and one 2 hour practical per week. **Prerequisites:** UAI of at least 90, or COSC1902, or a distinction or better in COSC1002, SOFT (1001, 1002, 1901 or 1902). **Prohibitions:** COSC1001 **Assumed knowledge:** HSC Mathematics **Assessment:** One assignment, practical work, including practical exams, theory exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Sc, B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study is the advanced version of COSC1001 and is complementary to COSC1902. The subject matter is very similar but more challenging problems will be covered and some additional programming and visualisation techniques will be used.

**COSC1902****Computational Science in C (Adv)****Science**

**Credit points:** 3 **Session:** Semester 2 **Classes:** One 1 hour lecture and one 2 hour practical per week. **Prerequisites:** UAI of at least 90, or COSC1901, or a distinction or better in COSC1001, SOFT (1001, 1002, 1901 or 1902). **Prohibitions:** COSC1002 **Assumed knowledge:** HSC Mathematics **Assessment:** One assignment, practical work, including practical exams, theory exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Sc, B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study is the advanced version of COSC1002 and is complementary to COSC1901. The subject matter is very similar, but more challenging problems will be covered and some additional programming techniques will be used.

**COSC3011****Scientific Computing****Science**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour practical per week. **Prerequisites:** 12 credit points chosen from Junior Mathematics and Statistics, 12 credit points of Intermediate units in Science subject areas. **Prohibitions:** COSC3911, COSC3001, COSC3901, PHYS3301, PHYS3901 **Assumed knowledge:** Programming experience in MATLAB **Assessment:** Assignments, lab, project work and written exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit of study provides a senior-level treatment of scientific problem solving using computers. Students will understand and apply a wide range of numerical schemes for solving ordinary and partial differential equations. Linear algebra is used to provide detailed insight into stability analysis, relaxation methods, and implicit integration. A variety

of scientific problems are considered, including planetary motion, population demographics, heat diffusion, traffic flow and quantum mechanics. All coding is performed with MATLAB, and basic programming experience is assumed.

### CPAT3201

#### Pathogenesis of Human Disease 1 Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Bob Bao **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 3 hour tutorial per week. **Prerequisites:** At least 6cp intermediate of one of the following: ANAT or BCHM or MBLG or BIOL or HPSC or MICR or PCOL or PHSI, or as the head of department determines. **Assessment:** One 2 hour exam (60%), one major research essay (1500w) (20%) generation of detractors for MCQ stems with referenced support texts for these (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The Pathological Basis of Human Disease 1 unit of study modules will provide a theoretical background to the scientific basis of the pathogenesis of disease. Areas covered in theoretical modules include: tissue responses to exogenous factors, adaptive responses to foreign agents, cardiovascular/pulmonary/gut responses to disease, forensic science, neuropathology and cancer.

The aim of the course is

- To give students an overall understanding of the fundamental biological mechanisms governing disease pathogenesis in human beings.

- To introduce to students basic concepts of the pathogenesis, natural history and complications of common human diseases.

- To demonstrate and exemplify differences between normality and disease.

- To explain cellular aspects of certain pathological processes.

Together with CPAT3202, the unit of study would be appropriate for those who intend to proceed to Honours research, to professional degrees or to careers in biomedical areas such as hospital science. Together with CPAT3202, it fulfils the Pathology requirements for the Centre for Chiropractic at Macquarie University.

*Textbooks*

Robbins Basic Pathology, Kumar, Cotran & Robbins 7th Edition, 2003, Publ Saunders, Philadelphia, Pennsylvania, USA.

### CPAT3202

#### Pathogenesis of Human Disease 2 Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Bob Bao **Session:** Semester 2 **Classes:** One 2 hour practical per week and one 2 hour museum practical. **Prerequisites:** At least 6cp intermediate of one of the following: ANAT or BCHM or MBLG or BIOL or HPSC or MICR or PCOL or PHSI, or as the head of department determines. **Corequisites:** CPAT3201 **Assessment:** One 2 hour exam (70%), Museum Practical Reports (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The Pathological Basis of Human Disease 2 unit of study modules will provide a practical background to the scientific basis of the

pathogenesis of disease. Areas covered in practical modules include disease specimen evaluation on a macroscopic and microscopic basis. The aim of the course is

- To enable students to gain an understanding of how different organ systems react to injury and to apply basic concepts of disease processes.
- To equip students with skills appropriate for careers in the biomedical sciences and for further training in research or professional degrees. At the end of the course students will:
- Have acquired practical skills in the use of a light microscope.
- Have an understanding of basic investigative techniques for disease detection in pathology.
- Be able to evaluate diseased tissue at the macroscopic and microscopic level.
- Have the ability to describe, synthesise and present information on disease pathogenesis.
- Transfer problem-solving skills to novel situations related to disease pathogenesis.

The unit of study would be appropriate for those who intend to proceed to Honours research, to professional degrees or to careers in biomedical areas such as hospital science. Together with CPAT3201, it fulfils the Pathology requirements for the Centre for Chiropractic at Macquarie University.

### CSCD1030

#### Clinical Linguistics Health Sciences

**Credit points:** 3 **Session:** Semester 1, Summer Main **Classes:** 3hrs lectures, classes/week **Assumed knowledge:** Knowledge of traditional grammar **Assessment:** Theory exam, grammatical analysis applied skill exams (Barrier) (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students must pass this unit in order to enrol in clinical units in Year 2. Students without a sound knowledge of formal traditional grammar are encouraged to undertake the Grammar bridging course*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sci, UG Study Abroad Program, UG Summer/Winter School.

Students will acquire the knowledge and skills to conduct linguistic analysis and apply this knowledge to understanding normal communication. Students will learn about formal and functional linguistic theories and methodologies and acquire the skills of traditional analysis of syntax. This unit of study prepares students to: understand the nature of communication; apply this knowledge in analysis of communication.

#### Textbooks

Hand L, Grammar Handbook; available for purchase from the Faculty. Fromlain, Rodman, Collins & Blair

### CSCD1031

#### Clinical Phonetics & Articulation Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Tricia McCabe **Session:** Semester 1, Summer Main **Classes:** 3hrs/week **Assessment:** Weekly transcription tests (7%), skill based transcription exam- Barrier exam (30%), end semester

case-based assignment (20%), 1hr end semester theory exam (43%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students must pass this unit in order to enrol in clinical units in Year 2*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sci, UG Study Abroad Program, UG Summer/Winter School.

Students will learn skills of phonemic and phonetic transcription of typical and deviant spoken Australian English, using a prescribed transcription system. A focus will be on applying transcription skills to normal and disordered articulation. This unit of study prepares students with the necessary background knowledge to undertake clinical practice units in Year 2. Students will acquire knowledge about normal articulation and disorders of articulation, including techniques for assessment, analysis and intervention of articulation disorders.

#### Textbooks

Phonetics 1 Handbook (Available on enrolment or from the cashier)  
Bernthal J & Bankson J, Articulation and Phonological Disorders (5th ed), Allyn & Bacon, Boston (2004) (Available from the Co-op Bookshop)  
Macquarie Dictionary

### CSCD1032

#### Human Communication Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Tricia McCabe **Session:** Semester 1 **Classes:** 4hrs lectures/week **Assessment:** Mid and end semester exams, written report, Resuscitation Certificate **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students must pass this unit in order to enrol in clinical units in year 2*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sci, UG Study Abroad Program.

Participants will acquire knowledge about typical communication development in English across the lifespan and in cultures relevant to the Australian context. Students will begin accumulating and documenting professional development experiences through involvement professional, clinical and community services. Each student must show evidence of completion of an accredited Resuscitation Course in order to receive a Pass grade in this unit. Participants will learn about the sequence of normal communication development from prelinguistic communication development through adult language; the significance of context and function in the development of language; the universality of communication development, and the effect of gender in communication development. This unit of study prepares students to undertake observation of communication and to demonstrate understanding of the theories and facts in the normal acquisition of communication skills and apply this knowledge to people of different ages. Students will learn about professional communication.

Mohan T et al, Communicating as Professionals (2nd ed), Thomson, Victoria (2008)

### CSCD1033

#### Child Phonology Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Elise Baker **Session:** Semester 2 **Classes:** 5hrs lectures/week **Assumed knowledge:** CSCD1031 Clinical Phonetics and Articulation, CSCD1032 Human Communication **Assessment:** Skill based test, case study assignment, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students must pass this unit in order to enrol in clinical units in year 2*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sci, UG Study Abroad Program.

Students will acquire knowledge about phonology and phonological disorders and will cover techniques for assessment, analysis and intervention of phonological disorders through problem-based and project based learning activities. Participants will learn skills of phonological analysis and critically evaluate the evidence for best practice in assessment, diagnosis and treatment of phonological disorders. This unit of study provides students with the theoretical

background to phonological development and impairment, to equip them to be beginning speech pathology student-clinicians in their clinical practice units in Year 2.

### CSCD2030

#### Voice Science and Disorders Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Ms Cate Madill **Session:** Semester 2 **Classes:** 4hrs/week on-campus **Prerequisites:** BIOS1116 Speech Science I, BIOS1117 Speech Science II **Assumed knowledge:** CSCD2035 Phonetics II **Assessment:** Case report (60%), mid semester exam (20%), final exam (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Current research on respiration and voice; instrumental procedures for measuring respiratory and vocal performance; nature of voice disorders; assessment, management and treatment of individuals with a variety of phonatory disorders.

### CSCD2035

#### Phonetics II Health Sciences

**Credit points:** 2 **Teacher/Coordinator:** Ms Cate Madill **Session:** Semester 1 **Classes:** 2hrs/week on-campus **Assumed knowledge:** CSCD1026 Phonetics I, BIOS1116 Speech Science I, BIOS1117 Speech Science II, BIOS1118 Hearing Science **Assessment:** Mid semester exam (40%), final exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

A study of the relationship between articulatory phonetics, acoustic phonetics and speech perception. An introduction to phonetic applications in communication sciences and disorders.

### CSCD2040

#### Audiology I Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Yetta Abrahams **Session:** Semester 1 **Classes:** 2-3hrs/week on-campus **Assumed knowledge:** BIOS1116 Speech Science I, BIOS1117 Speech Science II, BIOS1118 Hearing Science **Assessment:** Exam (60%), assignment (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

An introduction to types of deafness, pathologies of the ear and treatment; basic audiological tests and clinical procedures for evaluating hearing in children and adults; amplification for the hearing impaired.

### CSCD2041

#### Language Impairments in Children I Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Michelle Lincoln **Session:** Semester 1 **Classes:** 3hrs/week on-campus **Prerequisites:** CSCD1024 Linguistics, CSCD1028 Normal Communication Development **Assessment:** 2 assignments (30% ea), open-book exam (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Language impairments occurring in specific language impaired children. Principles and practices of language evaluation. Developing and carrying out intervention programs.

## CSCD2042

### Language Impairments in Children II Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Michelle Lincoln **Session:** Semester 2 **Classes:** 3hrs/week on-campus **Prerequisites:** CSCD2041 Language Impairments in Children I **Assessment:** 2 assignments (40%, 45%), open-book exam (15%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Language impairments occurring in children at the preverbal stages of development and in primary school aged children and adolescents. Principles and practices of language evaluation in each population. Developing and carrying out language intervention programs.

## CSCD2043

### Stuttering Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Michelle Lincoln **Session:** Semester 1 **Classes:** 3hrs/week on-campus **Assessment:** Online tasks assignment (40%), prolonged speech viva and final exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Management strategies for children and adults who stutter. Consideration and critique of clinically relevant theories and research findings pertaining to the management of stuttering.

## CSCD2046

### Audiological Management I Health Sciences

**Credit points:** 3 **Session:** Semester 2 **Classes:** 2-3hrs/week on-campus **Assumed knowledge:** CSCD2040 Audiology I **Assessment:** Exam (60%), assignment (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Theoretical and clinical issues related to sensory aids for the hearing impaired and assessment and intervention of the communication problems of hearing-impaired adults.

## CSCD2047

### Neurogenics I Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kirrie Ballard **Session:** Semester 2 **Classes:** 3hrs/week on-campus **Assumed knowledge:** BIOS2062 Neurobiology II: Communication Disorders **Assessment:** Exams (50% ea) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Description, evaluation and intervention strategies for speech motor and motor programming disorders such as dysarthria and apraxia.

## CSCD2048

### Introductory Clinical I Health Sciences

**Credit points:** 1 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2 **Classes:** Block mode or weekly placement on and off-campus depending on availability **Prerequisites:** CSCD1024 Linguistics, CSCD1025 Professional Development 1, CSCD1026 Phonetics 1, CSCD1028 Normal Communication Development, CSCD1029 Articulation and Phonology **Assessment:** 2 assignments, clinical paperwork **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), Health Sciences PG Non Award. Introduction to clinical work with child clients in the on-campus clinic. Students undertake structured observations of a client and serve as therapy aides to advanced students or clinical educators. Students

also attend supervisory conferences with their clinical educators and other students. Student may begin to implement some therapy tasks.

## CSCD2049

### Introductory Clinical II Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2, Summer Main **Classes:** Block mode or weekly placement on and off-campus depending on availability **Prerequisites:** CSCD2048 Introductory Clinical I, CSCD2043 Stuttering **Assessment:** Two assignments, clinical paperwork **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), Health Sciences PG Non Award, UG Summer/Winter School.

Students continue in the on-campus clinic or educational setting, eg, preschool working with two or more child clients. Students also attend supervisory conferences with their clinical educators and other students.

## CSCD2051

### Professional Development IIA Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Belinda Kenny **Session:** Semester 1 **Classes:** 1hr/week on-campus **Prerequisites:** CSCD1025 Professional Development I **Assessment:** Critique, case report, assignment, attendance- all assessed on a pass/fail basis **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Students undertake interdisciplinary professional observations. They continue the accumulation of professional development experiences through involvement in relevant professional, community or clinical activities. For speech pathology students these experiences are required to be documented for their portfolio submitted in the fourth year of their course. Students attend lectures and tutorials which consider issues related to their concurrent clinical practice. Recommended co-enrolment in CSCD2048 Introductory Clinical I or CSCD2053 Communication Fieldwork I.

## CSCD2052

### Professional Development IIB Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Belinda Kenny **Session:** Semester 2 **Classes:** 1hr/week on-campus **Prerequisites:** CSCD2051 Professional Development IIA, either CSCD2048 Introductory Clinical I or CSCD2053 Communication Fieldwork I **Corequisites:** CSCD2054 Communication Fieldwork II or CSCD2049 Introductory Clinical II **Assessment:** Report, case presentation, case report, portfolio, attendance, TAM- all assessed on a pass/fail basis **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Students continue to undertake interdisciplinary professional observations. They continue the accumulation of professional development experiences through involvement in relevant professional, community or clinical activities. For speech pathology students these experiences are required to be documented for their portfolio submitted in the fourth year of their course. Students continue to be involved in the running and maintenance of the clinical tests and materials collection. Students attend lectures and tutorials which consider issues related to their concurrent fieldwork or clinical practice, including data collection for workplace and clinical/fieldwork research purposes, with particular attention to single case research. Students must be co-enrolled in clinic or fieldwork to complete the assessment requirements for this unit of study.

## CSCD2053

### Communication Fieldwork I

## Health Sciences

**Credit points:** 1 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2 **Classes:** Block mode or weekly placement, on and off-campus depending on availability **Prerequisites:** CSCD1024 Linguistics, CSCD1025 Professional Development I, CSCD1026 Phonetics I, CSCD1029 Articulation and Phonology, CSCD1028 Normal Communication Development **Assessment:** Project report (100%), paperwork (mandatory) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

Introduction to professional work with communicatively impaired individuals in the on-campus speech and hearing clinic. Students will undertake structured observations and tutorials in the clinic. They will also observe aspects of client management and the management structure of the clinic.

## CSCD2054

### Communication Fieldwork II

#### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2 **Classes:** Block mode or weekly placement, on and off-campus depending on availability **Prerequisites:** CSCD2053 Communication Fieldwork I **Assessment:** Project report (100%), paperwork (mandatory) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hearing&Speech).

Students will begin 'hands on' work with children. Students will observe children communicating in their normal environment, implement appropriate language enrichment activities and develop skills in recording and analysing group interactions.

## CSCD2057

### Child Language

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Kimberley Docking, Dr Natalie Munro **Session:** Semester 1 **Classes:** Five 1hr lectures/week with associated WebCT activities **Prerequisites:** CSCD1030 **Assumed knowledge:** CSCD1032 Human Communication **Assessment:** Case-based assessment and therapy plan, clinical report critique and follow-up assessment plan, end semester case-based exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is a pre-requisite for the 'Phonology, Language and Literacy' unit in Year 3, Semester 2*

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

This unit introduces students to spoken language impairments from birth to the school-aged child. The nature of child language impairments together with principles and practices for assessment, diagnosis, management planning and treatment are covered for the following paediatric clinical populations: pre-linguistic infants, toddlers, preschoolers and school-aged children.

*Textbooks*

Paul R, Language Disorders from Infancy through Adolescence (3rd ed), Mosby Elsevier (2007)

## CSCD2058

### Stuttering

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Michelle Lincoln **Session:** Semester 1 **Classes:** 3hrs lectures, 1hr half group tutorial/week **Assumed knowledge:** CSCD1032 Human Communication **Assessment:** Online tasks, assignment, prolonged speech viva (Barrier task), final exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is a pre-requisite for speech pathology (Intermediate) clinical units in Year 3*

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

Participants will acquire the knowledge and skills to undertake the clinical management of children and adults who stutter. Participants will learn about clinically relevant theories and research findings pertaining to the management of stuttering, how to select, justify and implement clinical interventions, and demonstrate skills in researching and applying evidence-based practice to stuttering management. Students will acquire skills in identifying and counting stuttering and

producing the prolonged speech pattern. This unit of study prepares students to: evaluate research evidence for different assessment and intervention programs in stuttering; consider ethical and service issues related to delivering speech pathology services to culturally diverse populations.

Stuttering Counts - Educational CD-ROM. Cost in 2008 = \$22 (student rate). Available from <http://www.latrobe.edu.au/hcs/resources.htm>

## CSCD2059

### Clinical Processes

#### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Belinda Kenny, clinical educators **Session:** Semester 1 **Classes:** 2hrs/week **Corequisites:** CSCD2060 Introductory Practice: Clinical OR CSCD2061 Introductory Practice: Community **Assessment:** Written assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is a pre-requisite for Year 3 (Intermediate) speech pathology clinical units of study*

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

This unit will consider issues directly related to clinical practice units in the areas of professional relationships with families and other professionals, problem solving strategies for identifying and managing ethical issues involved in being a student, working with children and working with families; indigenous issues in health service delivery; basic report writing and case presentation skills. Students will develop strategies for facilitating client's learning. Students will have knowledge of the on-campus clinic policies and procedures and government legislation

*Textbooks*

## CSCD2060

### Introductory Practice 1: Clinical

#### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Annie Chan, Dr Alison Purcell **Session:** Semester 1, Semester 2 **Prerequisites:** CSCD1030 Clinical Linguistics, CSCD1031 Clinical Phonetics and Articulation, CSCD1032 Human Communication, CSCD1033 Child Phonology **Corequisites:** CSCD2057 Child Language, CSCD2059 Clinical Processes **Prohibitions:** Students must advise the Director of Clinical Education before enrolling in this unit of study if they do not have a current Department of Health Criminal Record Check or are a prohibited person under the NSW Working with Children Act (2001) **Assessment:** Clinical paperwork, clinical checklist (mid and end semester), worksheets, log book **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Attendance at clinic orientation is compulsory. Students must pass this unit before they can enrol in Intermediate speech pathology clinical units. Students undertaking CSCD2060 Introductory Practice 1: Clinical in semester 1 who do not pass will need to discuss their enrolment in CSCD2061 Introductory Practice 1: Community with the Director of Clinical Education prior to the commencement of semester 2.*

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

Students work with a senior student and participate in clinical service delivery in the on-campus clinic. Students must demonstrate competence in the context of direct supervision (novice level), in observing, seeking information about, accurately describing and participating in provision of clinical services to their client; seeking information relevant to their professional development and client care and show awareness of their impact on the client.

*Textbooks*

## CSCD2061

### Introductory Practice 1: Community

#### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Annie Chan, Dr Alison Purcell **Session:** Semester 1, Semester 2 **Prerequisites:** CSCD1030 Clinical Linguistics, CSCD1031 Clinical Phonetics and Articulation, CSCD1032 Human Communication, CSCD1033 Child Phonology **Corequisites:** CSCD2057 Child

Language, CSCD2059 Clinical Processes **Prohibitions:** Students must advise the Director of Clinical Education before enrolling in this unit of study if they do not have a current Department of Health Criminal Record Check or are a prohibited person under the NSW Working with Children Act (2001) **Assessment:** Clinical paperwork, clinical checklist (mid and end semester), worksheets, log book **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Attendance at clinic orientation is compulsory. Students must pass this unit before they can enrol in Intermediate speech pathology clinical units. Students undertaking CSCD2061 Introductory Practice 1: Community in Semester 1 who do not pass will need to discuss their enrolment in CSCD2060 Introductory Practice 1: Clinical with the Director of Clinical Education prior to the commencement of semester 2.*

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

Students do observations and prescribed activities in a preschool, long day care centre or kindergarten with children between 1 and 6 years as well as professional interactions with staff. Students will acquire knowledge of the functions and routines in an early educational setting; develop professional communication skills and confidence in working with other professionals; understand how language is used and targeted as a part of the curriculum in preschool settings; develop skills in carrying out language stimulation activities with preschool age children; and relate observations to relevant theory and research.

## CSCD2062

### Motor Speech and Dysphagia Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Kirrie Ballard, Ms Christine Sheard **Session:** Semester 2 **Classes:** 4hrs/week **Prerequisites:** BIOS1166 Neuroscience **Assumed knowledge:** BIOS1163 Speech Science **Assessment:** MBS assessment, viva, case assignment, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), UG Study Abroad Program.

Students will acquire the knowledge and skills to conduct clinical assessment and management for clients with speech motor and motor programming disorders such as dysarthria and apraxia, as well as assessment and management of feeding and swallowing impairments in children and adults. Students will learn to describe, evaluate and conduct and justify interventions for these populations. A focus on case problem solving will be emphasised to achieve integration of theory and practical skills. This unit of study prepares students to conduct appropriate and evidence based clinical assessment and management for these populations.

### Neurogenetics II Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Ms Christine Sheard **Session:** Semester 1 **Classes:** 4hrs/week on-campus **Assumed knowledge:** CSCD2047 Neurogenetics I **Assessment:** Two assignments (55%, 45%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

Characteristics of acquired aphasia and cognitive language in adults and children; critical review of evaluation and intervention strategies; investigation of communication breakdown and its management in dementia, non-dominant cerebral lesions, closed head injury and memory impairment.

## CSCD3024

### Communication and Lifelong Disability Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Mr David Trembath **Session:** Semester 1 **Classes:** 2-3hrs/week on-campus **Prerequisites:** CSCD1028 Normal Communication Development **Assessment:** Exam, viva, Makaton exam **Practical field work:** Makaton training **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Consideration of the communication issues relevant to children and adults with lifelong disability and those who support them. Topics include intellectual disability, cerebral palsy, multiple sensory impairment, autism and an introduction to alternative and augmentative communication. There will be a focus on a social model of disability. The needs of families, carers and culturally and linguistically diverse populations will be explored. Students will have the opportunity to develop skills in Makaton keyword signing.

## CSCD3032

### Professional Development III Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Bronwyn Hemsley **Session:** Semester 1 **Classes:** 1-2hrs/week on-campus **Prerequisites:** CSCD2048 Introductory Clinical I or CSCD2053 Communication Fieldwork I, CSCD2052 Professional Development IIB **Assumed knowledge:** CSCD2049 Introductory Clinical II or CSCD2054 Communication Fieldwork II **Assessment:** Interdisciplinary report, assignment, TAM, attendance- all assessed on a pass/fail basis **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

This unit of study involves lectures, tutorials and/or workshops on aspects of caseload management and professional issues; communication and counselling skills involved in working with adult clients and caregivers; and computer applications in clinical situations. Students continue with their accumulation of professional development experiences required for their portfolio through involvement in relevant professional, community or clinical activities. Students become involved in the running and maintenance of the clinical tests and materials collection.

## CSCD3034

### Craniofacial Anomalies Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 2 **Classes:** 2hrs/week on-campus **Assumed knowledge:** BIOS1116 Speech Science I and BIOS1117 Speech Science II, or CSCD2030 Voice Science and Disorders **Assessment:** Mid semester assignment (20%), end semester assignment (50%), final exam (30%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Problems of craniofacial anomalies, relevant nose, throat and orthodontic pathologies and their effects on communication;

implications for assessment and management; instrumental assessment of nasality.

### CSCD3036

#### Language Impairments in Children III

##### Health Sciences

**Credit points:** 2 **Session:** Semester 2 **Classes:** 2hrs/week on-campus  
**Prerequisites:** CSCD2041 Language Impairments in Children I, CSCD2042 Language Impairments in Children II **Assumed knowledge:** CSCD2049 Introductory Clinical II **Assessment:** Two assignments (50% ea) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

Advanced concepts in the assessment of and intervention for language impairment in children.

### CSCD3037

#### Swallowing Impairments

##### Health Sciences

**Credit points:** 2 **Teacher/Coordinator:** Ms Christine Sheard **Session:** Semester 1 **Classes:** 3hrs/week on-campus **Prerequisites:** BIOS2062 Neurobiology II: Communication Disorders, BIOS1116 Speech Science I, BIOS1117 Speech Science II **Assessment:** Two exams (50% ea) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

Description, evaluation and intervention considerations related to clinical management of feeding and swallowing impairments in children and adults. A focus on case problem solving will be emphasised to achieve integration of theory and practical skills.

### CSCD3049

#### Audiological Management II

##### Health Sciences

**Credit points:** 2 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 2 **Classes:** 2hrs/week on-campus **Prerequisites:** CSCD2040 Audiology I **Assumed knowledge:** CSCD1029 Articulation and Phonology, CSCD2046 Audiological Management I, CSCD2041 Language Impairments in Children I **Assessment:** Mid semester assignment (30%), final exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path), B App Sc (Sp Path) Hons, B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

Theoretical and clinical issues related to assessment and intervention of the communication problems of children with acquired and congenital hearing loss.

### CSCD3050

#### Intermediate Clinical IH

##### Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2 **Classes:** Block mode or weekly placement, on and off-campus depending on availability **Prerequisites:** CSCD2040 Audiology I, CSCD2049 Introductory Clinical II, CSCD2042 Language Impairments in Children II **Assessment:** Compass, clinical paperwork **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (Sp Path) Hons.

Students work with adult clients with a variety of communication disorders. Students also attend supervisory conferences with their clinical educators and other students. Students are placed in the on-campus clinic for this unit of study. Students may be rostered to complete parts of this unit during the intersemester breaks.

### CSCD3051

#### Honours Research Seminar I

##### Health Sciences

**Credit points:** 2 **Teacher/Coordinator:** Dr Kirrie Ballard **Session:** Semester 1 **Classes:** 1hr/week on-campus **Assessment:** Topic review **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path) Hons, UG Study Abroad Program.

This unit is designed to assist honours students with a survey of the literature relevant to their individual research projects. At the completion of this unit each student will have prepared a written literature review for his/her research project.

### CSCD3052

#### Professional Development IIH

##### Health Sciences

**Credit points:** 1 **Teacher/Coordinator:** Ms Belinda Kenny **Session:** Semester 1 **Classes:** 1-2hrs/week on-campus **Prerequisites:** CSCD2052 Professional Development IIB, CSCD2053 Communication Fieldwork I or CSCD2048 Introductory Clinical I **Assumed knowledge:** CSCD2054 Communication Fieldwork II or CSCD2049 Introductory Clinical II **Assessment:** TAM, attendance- assessed on pass/fail basis **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path) Hons, UG Study Abroad Program.

This unit of study involves lectures, tutorials, and/or workshops on aspects of caseload management and professional issues; communication and counselling skills involved in working with adult clients and caregivers; and computer applications in clinical situations. Students continue with their accumulation of professional development experiences required for their portfolio, through involvement in relevant professional, community or clinical activities. Students are involved in the running and maintenance of the clinical tests and materials collection.

### CSCD3053

#### Intermediate Clinical IHH

##### Health Sciences

**Credit points:** 7 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2 **Prerequisites:** CSCD2030 Voice Science and Disorders, CSCD3023 Neurogenics II, CSCD3037 Swallowing Impairments, CSCD3050 Intermediate Clinical IH, BIOS2062 Neurobiology II: Communication Disorders **Assessment:** Assessment of clinical competency at mid and end of each placement **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Sp Path) Hons.

Students assume greater responsibility for management of children and adults with a variety of communication disorders. Students also attend supervisory conferences with their clinical educators. Students may be rostered to complete some parts of this unit during the intersemester breaks. Students also complete a four days per week, three or four-week block placement in an adult hospital clinic. This placement will occur mid year before Semester 2 and after the student has completed CSCD3023 Neurogenics II, CSCD3037 Swallowing Impairments and their Speech and Language Assessment clinic. Students work with clients, attend supervisory conferences and participate in a variety of clinical experiences.

### CSCD3054

#### Honours Research Seminar II

##### Health Sciences

**Credit points:** 1 **Teacher/Coordinator:** Dr Kirrie Ballard **Session:** Semester 2 **Classes:** 1hr/week on-campus **Prerequisites:** CSCD3051 Honours Research Seminar I **Assessment:** Ethics application (100%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path) Hons.

This unit is designed to assist honours students with the development of a research proposal for their individual research projects. At the completion of this unit each student will have prepared a written proposal for his/her research project.

### CSCD3055

#### Audiology II

##### Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 2-3hrs/week on-campus **Prerequisites:** CSCD2040 Audiology I **Assessment:** Three assignments (25%,

25%, 50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

Introduction to complex audiological assessment and intervention techniques for hearing impaired adults and children. This unit of study may be undertaken as an elective unit with the permission of the program coordinator.

### CSCD3056

#### Communication Fieldwork III Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2, Summer Early **Classes:** Block mode or weekly placement, on and off-campus depending on availability **Prerequisites:** CSCD2040 Audiology I, CSCD2054 Communication Fieldwork II, CSCD2042 Language Impairments in Children II **Assessment:** Project report (100%), paperwork (mandatory) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Hlth Sc (Hearing&Speech), UG Summer/Winter School.

Students will participate in a project based placement either within the on-campus clinic or an outside agency. This placement will provide an opportunity to begin to develop skills in professional communication, professional conduct, observation, data management and professional writing.

### CSCD3057

#### Communication Fieldwork IV Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2, Summer Early **Classes:** Block mode or weekly placement, on and off-campus depending on availability **Prerequisites:** CSCD2046 Audiological Management I, CSCD3056 Communication Fieldwork III **Assessment:** Portfolio and report (100%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Hlth Sc (Hearing&Speech), UG Summer/Winter School.

Students assume increased responsibility in a project based placement either within the on-campus clinic or an outside agency. This unit of study will provide further opportunity to participate in project management and report writing. Some part of this placement may be completed either mid-year before Semester 2 or at the end of year after Semester 2. Students will also develop skills in the development of professional portfolios as they will submit a portfolio which must be deemed satisfactory to be eligible for a pass in this unit of study.

### CSCD3058

#### Auditory Perception and Processing Health Sciences

**Credit points:** 2 **Session:** Semester 1 **Classes:** 1hr/week on-campus **Prerequisites:** BIOS1118 Hearing Science, BIOS1141 Neuroscience II **Assessment:** Assignment (100%), class attendance **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

Development of auditory perception and perceptual capacities of the ear; theories of processing auditory information at both peripheral and central levels. This unit of study may be undertaken as an elective unit with the permission of the program coordinator.

### CSCD3059

#### Communication Studies Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 2hrs/week on-campus **Assessment:** Two assignments (50% ea), class attendance **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hearing&Speech), UG Study Abroad Program.

This unit of study will explore issues in managing communication in the workplace. The unit of study will focus on verbal and written

communication and working with related technology. This unit of study may be undertaken as an elective unit with the permission of the program coordinator.

### CSCD3060

#### Readings 1 Health Sciences

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Classes:** 2-3hrs/week on-campus **Assessment:** Assignment (100%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hearing&Speech), Health Sciences PG Non Award, UG Study Abroad Program.

This unit of study allows students to work with a supervisor exploring a major area of specialty in the program via readings and self directed learning. Students identified for this unit will be of a calibre to proceed to the honours program. This unit of study may be undertaken as an elective unit with the permission of the program coordinator.

### CSCD3061

#### Directed Readings Health Sciences

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Classes:** 1hr/week on-campus **Assessment:** Assignment (100%), class attendance **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hearing&Speech).

This unit of study allows students to work with a supervisor exploring a major area of specialty in the program via readings and self directed learning. This unit of study may be undertaken as an elective unit with the permission of the program coordinator.

### CSCD3063

#### Intermediate Clinical IA Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1, Semester 2 **Classes:** Block mode or weekly placement, on and off-campus depending on availability **Prerequisites:** CSCD2040 Audiology I, CSCD2042 Language Impairments in Children II, CSCD2049 Introductory Clinical II **Assessment:** CBOS, clinical paperwork **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (Sp Path).

Students work with child clients with a variety of communication disorders. Students also attend supervisory conferences with their clinical educators and other students. Students are placed in the on-campus clinic or equivalent for this unit of study. Students may be rostered to complete parts of this unit during the intersemester breaks. Students are rostered through the Speech and Language Assessment Clinic.

### CSCD4026 Advanced Topics A Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Tricia McCabe **Session:** Semester 1 **Classes:** On-campus, variable times depending on topic **Prerequisites:** CSCD3049 Audiological Management II, CSCD3024 Communication and Lifelong Disability, CSCD3034 Craniofacial Anomalies, CSCD3036 Language Impairments in Children III, CSCD3032 Professional Development III, CSCD3023 Neurogenics II, CSCD3037 Swallowing Impairments **Assessment:** Assignment (100%), class attendance **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path).

Students enrolled in this unit of study will be undertaking studies on-campus during Semester 1 and will select a number of separate advanced study topics from among those offered by the program in areas previously studied in speech pathology and audiology. Focus is on advanced thinking and inquiry in each topic area undertaken.

### CSCD4027 Professional Development IVA Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Belinda Kenny **Session:** Semester 1 **Classes:** 2hrs/week on-campus **Prerequisites:** CSCD3032 Professional Development III, CSCD3064 Intermediate Clinical IIA or CSCD3066 Intermediate Clinical IIB **Assessment:** Project contract (10%), progress report (10%), presentation (20%), final report (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path).

Students enrolled in this unit of study will be undertaking studies on-campus during Semester 1 and will select seminars and projects related to topics such as administration, health promotion, quality assurance, casemix, clinical education, rural health issues. Students continue to be involved in the running and maintenance of the Tests and Materials collection.

### CSCD4028 Advanced Clinical IA Health Sciences

**Credit points:** 10 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1 **Prerequisites:** CSCD3064 Intermediate Clinical IIA or CSCD3066 Intermediate Clinical IIB **Assessment:** Assessment of clinical competency at mid and end of each placement **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (Sp Path).

Students manage a varied client caseload and participate in a variety of clinical management and clinical service activities of the on-campus clinic. They participate in supervisory conferences with their clinical educators and other students. Students also participate in the Advanced Assessment Clinic and Intake Clinic.

*Textbooks*

#### Honours Thesis Health Sciences

**Credit points:** 10 **Teacher/Coordinator:** Dr Kirrie Ballard **Session:** Semester 2 **Classes:** Independent learning **Prerequisites:** CSCD3051 Honours Research Seminar I, CSCD3054 Honours Research Seminar II, satisfactory performance in all Year 3 units of study **Assessment:** Thesis (100%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path) Hons.

This unit provides honours students with the opportunity to undertake a supervised research project in an area of human communication sciences or disorders. As part of this and the other honours units, each student designs and implements an approved research project and submits a thesis describing the project and its implications. In completing the research and thesis, each student works closely with an academic staff member who serves as the supervisor.

### CSCD4039

#### Honours Paper I Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Kirrie Ballard **Session:** Semester 1 **Classes:** Independent learning **Corequisites:** CSCD4045 Honours Thesis I **Assessment:** Thesis (100%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hearing&Speech)Hons.

Each student engages in an in-depth literature review related to the area of research and prepares a comprehensive outline of the topic. Seminars support students' work.

### CSCD4040

#### Honours Paper II Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Kirrie Ballard **Session:** Semester 2 **Classes:** Independent learning **Prerequisites:** CSCD4039 Honours Paper I, CSCD4045 Honours Thesis I **Corequisites:** CSCD4046 Honours Thesis II **Assessment:** Thesis (100%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hearing&Speech)Hons.

The student continues the literature review related to the research project and prepares an integrated paper on the topic. Seminars support students' work.

### CSCD4042

#### Clinical Mentoring A Health Sciences

**Credit points:** 2 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 1 **Classes:** Pairing with Yr 2 student in on-campus clinic placement **Corequisites:** CSCD4028 Advanced Clinical IA **Assessment:** Mentoring skills checklist, mid and end semester **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path).

This unit provides students with the opportunity to begin developing supervisory skills. Students participate in a clinical mentoring experience with beginning students in the on-campus clinic. The students are responsible for supporting and facilitating the learning of the beginning students. Students are expected to demonstrate competency in professional communication skills, team work and effective time management.

### CSCD4043

#### Clinical Mentoring B Health Sciences

**Credit points:** 2 **Teacher/Coordinator:** Dr Alison Purcell **Session:** Semester 2 **Classes:** Pairing with Yr 2 student in on-campus clinic placement **Corequisites:** CSCD4032 Advanced Clinical IB **Assessment:** Mentoring skills checklist, mid and end semester **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Sp Path).

This unit provides students with the opportunity to begin developing supervisory skills. Students participate in a clinical mentoring experience with beginning students in the on-campus clinic. The students are responsible for supporting and facilitating the learning of the beginning students. Students are expected to demonstrate competency in professional communication skills, team work and effective time management.

### CSCD4044

# University undergraduate units of study – D

## DAAE2001

### 20th Century Australian Architecture Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mr Trevor Howells **Session:** Semester 2 **Classes:** 3 hrs/wk **Assessment:** One seminar presentation and one 3000 word essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

The unit will introduce students to a range of architectural styles and aspirations in Australia. Lectures and seminars will cover key buildings representative of their period. At the conclusion, students will be familiar with a range of styles and their characteristics. They will undertake individual self-directed research and learn how to record and present the results of this research. Students will also acquire an appreciation of the ideals and aspirations that support the architectural styles examined, and how these are related to wider social and cultural movements.

On successful completion of this unit, students will be able to demonstrate: a familiarity with a range of Australian buildings and styles. Site tours will examine specific buildings, and these will be recorded in a site visit log; the ability to research, record and present a specific building in Sydney; the ability to link a specific building to other works of a similar style and period. This will be assessed in the seminar presentation and in the submitted essay.

This unit is an Architecture Elective in the Bachelor of Design in Architecture and elective in other courses. Contact hours: 3 hours per week. Class preparation: 1 hour per week. Assessment preparation: 26 hours per semester.

## DAAE2002

### Architecture, Place and Society Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Anna Rubbo **Session:** Semester 1 **Classes:** 3 hours per week **Assessment:** two assignments: a) a 1500 word essay and b) a group or individual project requiring a research proposal, fieldwork, presentation, and reflection. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This unit aims to investigate the relationship between architecture, place and society and to explore the meaning of cultural and social sustainability in architectural design. The unit assumes that designers will increasingly work in places where cultures are unfamiliar at home or in a global context, and that an ability to understand, and interpret, diverse cultures, and the way design occurs in diverse locations, is an important area of knowledge for designers. A key aspect of social sustainability is the practice of social responsibility, and the unit explores how this may occur, including involving people in the design process.

On completion of this unit students will be able to demonstrate: an ability to better understand the connections between architecture place and society, and the social, cultural, political and economic factors affecting sustainable environments; skills and knowledge in participatory processes necessary for effective communication about environmental design issues; increased critical awareness about social responsibility in relation to the practice of architecture and the design of the built environment, and an ability to exercise this awareness.

This unit will provide architecture students with knowledge of the relationship between culture and architecture, as well as practical knowledge of the social aspects of design practice. It is intended that students from other disciplines will develop a critical awareness of the

built environment as a form of cultural production, and the possibilities for their participation in its production.

This unit is an Architecture Elective in the Bachelor of Design in Architecture and elective in other courses. Contact hours: 3 hours per week. Class preparation: 1 hour per week. Assessment preparation: 26 hours per semester.

## DAAE2004

### Housing for Health Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mr Col James **Session:** Semester 1 **Classes:** Intensive delivery mode: 12 hours **Assessment:** Assignment 1 - Protocol and question form: 15%. Assignment 2 - Report: 75%. Attendance and participation: 10%. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

Upon successful completion students will demonstrate: evidence of reading recommended texts and reporting on health-housing theory; completion of specific tasks in the measurement performance of household plumbing and electrical services and fittings against stated standards; completion of Healthhabitat data sheets and logging into Healthhabitat analysis programs to deliver work sheets for licensed plumbers and electricians; comprehension through report writing on the analyses of data, house fixing procedures and independent observations of other health risks, specifically for householders' information requiring regular maintenance and user practices.

This unit is an Architecture Elective in the Bachelor of Design in Architecture and elective in other courses. Intensive delivery mode: 12 hours. Fieldwork, reading and preparation: 26 hours. Task research, preparation and documentation.

## DAAE2005

### Designing with Colour 1 Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Terry Purcell **Session:** Semester 1, Summer Early, Winter Main **Classes:** Online delivery through WebCT **Assumed knowledge:** DESA1004 **Assessment:** The assessment for the unit involves an assignment that is divided into three parts each related to the three areas of knowledge presented in the unit. The three parts carry equal weighting in terms of marks. **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program, UG Summer/Winter School.

The aims of the unit are: (1) To make participants aware that any design decision that involves a physical material involves a decision about colour, and the consequences of this fact. This also applies to the design of digital environments. (2) To present participants with research based information about colour and associated topics that can be used in design. This information falls into three main areas. The first relates to the basics of colour vision and includes the structure of the world of colour we experience, colour mixing, colour measurement and specification. The second area deals with relationships between areas of colour and focuses on colour contrast and colour preference and the relationship between contrast and preference. The third area is concerned with the limits on human information processing and how this will effect the response to the number of colours used in a colour design. (3) To demonstrate to participants how that information can be used to understand experiences associated with specific examples of environments and the particular physical attributes of the examples associated with the

experiences. (4) To teach participants basic skills in using the image processing program Photoshop. (5) To have participants use those skills and their knowledge about colour experience in colour design exercises that form the basis for the assignments and the assessment in the unit.

The objectives of the assessment procedure are to have participants demonstrate their understanding of the knowledge presented in each of the areas of the unit and their ability to use that knowledge by: developing designs that achieve defined outcomes by embodying that knowledge in the design; by critically discussing how the designs embody the knowledge to achieve those outcomes; and by specifically linking those outcomes to the attributes of the colours that are used in the design.

To preview the material in the course go to: <http://people.arch.usyd.edu.au/~terry/DAAE2005/>

## DAAE2006

### Designing with Colour 2

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Terry Purcell **Session:** Semester 2 **Classes:** Online through WebCT **Prerequisites:** DAAE2005 **Assessment:** The assessment for the unit involves an assignment that is divided into three parts related to the three areas of knowledge presented in the unit each of which carries equal weighting in terms of marks. **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre.*

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program, UG Summer/Winter School.

Participants are presented with the results of the extensive research into affective responses to colour. These affective experiences can be divided into three main areas. These are first the warmth or coolness of colours, second whether colours are exciting or calming, and third the potency of colours and colour harmony.

The results of this research are related to the colour model developed by the Swedish Colour Institute to allow the use of the research results in the development of colour designs.

As with the other units in this series participants are expected to understand this material and to know how it can be used to analyse the experiences associated with specific examples. This is facilitated by the detailed analysis of examples as a part of the unit content.

The objectives of the assessment procedure are to have participants demonstrate their understanding of the knowledge presented in each of the areas of the unit and their ability to use that knowledge by: developing designs that achieve defined outcomes by embodying that knowledge in the design; by critically discussing how the designs embody the knowledge to achieve those outcomes; and by specifically linking those outcomes to the attributes of the colours that are used in the design.

To preview the material in the course go to: <http://people.arch.usyd.edu.au/~terry/DAAE2006/>

## DAAE2007

### Introduction to Project Management

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr David Leifer **Session:** Semester 2 **Classes:** 3 hours per week **Assessment:** Two assignments and an Examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This unit of study will introduce students to the underpinning knowledge and skills in all 9 areas of project management, viz. the management of project scope, time, cost, quality, human resources, communications, risk, procurement and integration. It will differentiate project life cycles from facility life cycles.

In this unit the application of project management principles to the achievement of different deliverables needed in all phases of the facility life cycle will be addressed. The unit will provide practical examples and opportunities to apply the fundamentals to a range of

simple projects in architecture, design, building and construction fields. The major focus is to obtain an awareness and understanding of the fundamental skills needed by designers to deliver a project. On successful completion of this unit, students will be able to: demonstrate knowledge of project management fundamentals; conceptually apply the project management fundamentals to other project types and endeavors; use tools and techniques of scope, time, cost, quality, human resources, communications, risk, procurement and integration.

Knowledge of project management fundamentals will be assessed through an end of semester examination. Ability to apply project management fundamentals will be assessed by assignments. Student's effectiveness in working within a group and their ability to lead and manage will be assessed through reflective learning assignments where relevant. Group presentation will be demonstrated as part of the communications knowledge area.

This unit is an Architecture Elective in the Bachelor of Design in Architecture and elective in other courses. Contact hours: 3 hours per week. Class preparation: 1 hour per week. Assessment preparation: 26 hours per semester.

## DAAE2008

### Innovative Building Structures

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** D J Gunaratnam **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** DESA2111 **Assessment:** Case Study & Modelling assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

This unit engages students in detailed studies of innovative building structures, both the design and construction, and modelling techniques for structural synthesis. The unit initially investigates a number of innovative building structural designs and construction methods and processes, through case studies, and explores issues and factors that contribute to the innovative solutions. Modelling techniques are then introduced and their uses in the synthesis and analysis of innovative building structures are explored in-depth. Students are provided with experience in the computer and physical modelling of some of the advanced structures arising in the case studies.

The unit is organised around three major topics as follows:

(1) Innovative structural design: Discusses the differences between routine and innovative structural design, and identifies a set of dimensions along which the innovativeness of a structural design can be assessed. These dimensions form the basis for studying the developments in structural design to-date and for evaluating existing structural designs for their innovativeness. It also explores the different design requirements and decision criteria that lead to innovative structural solutions, in building designs, through a number of case studies.

(2) Modelling techniques: Introduces and provides the bases for a number of computer modelling techniques for advanced structures that can be used to analyse and design innovative structures. Discusses some of their limitations and explores the current developments in computational models and techniques, specifically aimed at facilitating innovative designs. Some of the physical modelling techniques and their usefulness in the exploration of innovative structural solutions are also considered.

(3) Innovative Construction: Explores construction requirements and decision criteria that lead to innovation in construction methods and processes, through selected case studies. Discusses the interactions between the innovations in structural design and in construction methods and processes.

Students are expected to be able to demonstrate a high level of competence in investigating and presenting case studies on structural design and construction, to identify and evaluate issues and factors that contribute to innovative structural solutions in case studies, to determine the relevance of the various advanced structural modelling

techniques for a given building design and to demonstrate a high level of competence in computer and physical modelling of structures

A case study assignment is used to assess the student's competence in investigating and presenting case studies and being able to identify and evaluate issues and factors contributing to innovative structural solutions. A two part modelling assignment is used to assess the competence in selecting suitable models for structural synthesis, for a given set of requirements and design criteria.

This unit is an Architecture Elective in the Bachelor of Design in Architecture and elective in other courses. Contact hours: 3 hours per week. Class preparation: 1 hour per week. Assessment preparation: 26 hours per semester.

### DAAE3001

#### Sustainable Architectural Practice Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Prof Richard Hyde **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** DESA2111 **Assessment:** Group study, individual research paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

The unit of study begins by exploring the concept of ecologically sustainable design as it applies to architectural practice and defines those key attributes of buildings which make them sustainable. The second part of the unit discusses the implication of applying sustainable design principles upon contemporary architectural practice. Potential new design paradigms are explored which could lead to more sustainable design practice in the future.

At the end of the unit of study students will be expected to: have explored the form making and space making potential of sustainable design principles by critically examining relevant contemporary architecture; demonstrate their ability to locate relevant published literature on sustainable architecture and to critically examine and discuss it in relation to the themes explored in the unit of study; demonstrate their ability to critique key recent buildings claimed by their designers to be sustainable and to evaluate these claims against established sustainable design principles; enunciate a personal position on the impact on applying sustainable design principles on future design practice.

On the successful completion of this unit of study students will have demonstrated: competence at critically evaluating buildings which their designers have claimed to be sustainable through a series of case studies performed in small groups; their ability to formulate and articulate a written response to a series of propositions developed in lectures addressing the impact of sustainability issues on future architectural practice.

This unit is an Architecture Elective in the Bachelor of Design in Architecture and elective in other courses. Contact hours: 3 hours per week. Class preparation: 1 hour per week. Assessment preparation: 2 hours per week.

### DAAP3001

#### Contemporary Architecture and Theory Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Chris Smith **Session:** Semester 1 **Classes:** 3 hours per week **Corequisites:** DESA3001 **Assessment:** Attendance; submission of text and material engagement assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Arch, UG Study Abroad Program.

The unit will consider architecture as the complex assemblage of material practices and theory. Students will be introduced to some of the key lines of thought that have impacted on architectural processes of the first decade of the 21st Century and the ways in which architectural production has responded and contributed to those lines. Students will become familiar with contemporary theoretical concepts and the architectural design processes associated with those concepts. On successful completion of this unit students will have demonstrated: a familiarity of the relationship between theory and material practices; a familiarity with the concepts and architectures presented, and; an

ability to respond critically to conceptual notions and material practices. The demonstration will take the form of specific material engagements and textual analysis.

This unit is a Master of Architecture prerequisite in Bachelor of Design in Architecture. Contact hours: 3 hours per week. Class preparation: 1 hour per week. Assessment preparation: 26 hours per semester.

### DAAP3002

#### Architectural Technologies Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr D Gunaratnam **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** DESA3001 **Corequisites:** DESA3002 **Assessment:** Assignments (one of which is integral with another assessment task in DESA3002) & examination. Failure in any single module equates to failure in the overall unit of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Arch, UG Study Abroad Program.

The unit of study develops knowledge about structural and environmental control systems for medium scale non domestic buildings.

The environmental module explores sustainable environmental control technologies suitable for medium scale buildings focussing upon the integration of these technologies with constructional and structural systems and the design of the building fabric as an environmental filter. Thermal controls such as heating systems, mechanical ventilation, natural ventilation and air conditioning are studied along with electric lighting and acoustic control systems.

At the end of the unit students will be expected to formulate environmental control requirements for a medium scale building, generate and justify appropriate sustainable environmental control strategies and evaluate the performance of these strategies using appropriate analytical procedures.

The structures module is organised around three major sections: Structural Design Process, Structural Design Codes and Structural Design Information. Under Structural Design Process, the formulation of structural design requirements arising from functional, behavioural and constructional constraints is initially discussed. Then a procedure for systematically generating feasible alternative structural systems is presented. Finally the process for the evaluation of the alternative structural systems based on a set of decision criteria, to arrive at the final optimum design, is discussed. Under structural design codes, the structural design philosophies which form the basis for structural design codes are initially described, and then the provisions in the material codes for the approximate determination of design actions, and procedures for the design of typical structural elements are considered. The Structural Design Information section introduces a number of structural design aids for the selection of structural systems and for the approximate sizing of structural elements.

At the end of the unit students should be able to collect appropriate information and formulate the structural design requirements for a medium-scaled building, generate a number of alternative structural systems that satisfy these design requirements, evaluate them based on a set of decision criteria and arrive at a full description of the final structural design.

On the successful completion of this unit of study students will have demonstrated:

(1) In the environmental module: competence in formulating and justifying appropriate sustainable environmental control strategies via a report based upon, and forming part of the submission for, the major design project in DESA3002; competence in evaluating their chosen strategies utilising model studies, computation and other analytical and evaluative tools.

(2) In the structural module: competence at enunciating and justifying their decision making process in an assignment based on the final design project (DESA3002); their knowledge in making a range of structural decisions for a new building design in an open book examination.

This unit is a Bachelor of Architecture prerequisite in Bachelor of Design in Architecture. Contact hours: 4 hours per week. Class

preparation: 1 hour per week. Assessment preparation: 1 hour per semester.

### DECO1006

#### Understanding Design & Cognition Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Mike Rosenman **Session:** Semester 1 **Classes:** 3 hours per week **Prohibitions:** DECO1004 **Assessment:** 4 written assignments and a protocol analysis report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Arch, B S T, UG Study Abroad Program.

This unit of study aims to give the student an understanding of design as a general activity in its own right, comparative to other activities such as science and art. It aims to stress the importance of design (and its consequences) as an activity concerned with changing the state of the existing environment through a set of conscious and purposeful actions. It aims to demonstrate that the study of the design process can be undertaken in a general manner independent of any discipline through the study of design methodology and design cognition.

On the successful completion of this unit of study, students will have demonstrated: an understanding of the importance and generality of design as an activity by having them reflect on the nature of design across the various disciplines and its relation to other activities such as Science and Art; an awareness of the knowledge and processes involved in design and to apply such knowledge and processes in their approach to design, as for example in the Design Studio. This awareness is reinforced by the assignments that are designed to make students think about design objects in a more analytical fashion as well as assessing their understanding of material presented; an understanding of how designers think and acquire a methodology to study designers. This is reinforced by assignments which require students to study designers and report on their observations; an understanding of the issues involved in design thinking research and gain a knowledge of methods for studying design thinking; an understanding of the need for critical examination and both objective and subjective analysis and judgement through the reports submitted.

This unit is core in the Bachelor of Design Computing and elective in other programs. Student effort expected for an average student to achieve a pass level result: 3 hours per week contact hours; 1.5 hours per week class preparation; 19 hours per semester assessment preparation.

### DECO1008

#### 3D Modelling Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Xiangyu Wang **Session:** Semester 2 **Classes:** Three hours per week **Prohibitions:** DECO2103 **Assessment:** Tutorial exercises and two Project submissions. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is for BDesComp and BST students only. Others may enrol in DECO2103.*

**Associated degrees:** B Des Comp, B S T, UG Study Abroad Program.

This unit aims to give the student an understanding of the basic concepts of modelling and presentation so that they will develop skills in creating and using 3D models for various design tasks.

On the successful completion of this unit of study, students will have: demonstrated an understanding of how physical objects are represented in 3D digital models by modelling various 3D geometric entities and processes required; demonstrated critical judgment, be capable of rigorous and independent thinking and use appropriate information technology techniques to communicate their knowledge through the production of efficient design presentations and documentation; an understanding of boundary representations, solid modelling, parametric models, texture mapping, light sources, camera locations and projections, and model constraints through model development and presentation; acquire skills in using a 3D modelling system for 2D and 3D objects and in creating photorealistic images, movies, VR scenes, and simple animations from 3D models that accurately describe design variations, intent, and structure. These

skills will be assessed through the tutorial exercises and the submission of a portfolio of 3D models.

This unit is core in the Bachelor of Design Computing. Student effort expected for an average student to achieve a pass level result: 3 hours per week contact hours; 1.5 hours per week class preparation; 19 hours per semester assessment preparation.

### DECO1012

#### Design Programming Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Rob Saunders **Session:** Semester 1 **Classes:** Three hours per week. **Prohibitions:** DECO2011, SOFT1001 **Assessment:** Individual assignment using an individual electronic sketchbook API; Group project using Java on a task in a design domain; Quizzes on (1) implementation of software in Java, and (2) Software design and development processes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Comp, UG Study Abroad Program.

This unit aims to teach students an understanding of the stages involved in the development of software for design computation; skills in the design and implementation of software for design tasks and in the team development of software.

On the successful completion of this unit of study, students will have demonstrated: skills in using software tools to build interactive, visual design applications through individual and group programming assignments; knowledge of object-oriented programming concepts through individual and group programming assignments; implementation techniques such as editing, using libraries, team programming, and compilation and runtime environments through individual and group programming assignments; knowledge of the Java programming language including: classes, methods, object creation, instance and local variables, primitive and object types, simple I/O, and control flow through individual and group programming assignments; knowledge of software design and development processes including analysis of requirements, design of classes, software lifecycles, and managing software projects through group programming assignments.

This unit is core of Bachelor of Design Computing. Student effort expected for an average student to achieve a pass level result: Contact hours: 3 hours per week; Class preparation: 3 hours per week; Assessment preparation: 19 hours per semester.

### DECO1013

#### Sound Design and Sonification Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Densil Cabrera **Session:** Semester 2 **Classes:** Three hours per week. **Prohibitions:** DECO2012 **Assessment:** Tutorial exercises, design projects. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment limited by teaching resources. Permission required unless enrolled in the Bachelor of Design Computing or the BST. Other students may apply directly to the Faculty of Architecture, Design and Planning for a place.*

**Associated degrees:** B Des Comp, UG Study Abroad Program.

This unit introduces sound as a design medium, with an emphasis on computer-based implementations; real world acoustical phenomena and psychoacoustics provide an approach for sound design; understanding of conceptual topics, including sound/image interaction, text and speech, auditory display, source streaming and segregation, functions for music and spatial audio are developed; technical and technological issues, e.g. data formats and interfaces will be addressed; students will explore methodologies for abstract information sonification and responsive sonic representations for interactive installation spaces and sensate environments; generative techniques, including evolutionary and genetic algorithms, Artificial Life and stochastic computational processes for creating new sound designs are investigated; this unit considers the contribution of sound design to ambient music, interactive responses and way finding cues in interactive virtual environments.

On the successful completion of this unit of study, students will have demonstrated: knowledge of responsive interaction and sound design to a range of contexts through design projects; application of

conceptual knowledge using current sensate, interactive and virtual environment technologies through design projects; skills in computer-based implementation of sound design key principles through tutorial exercises; understanding of sound design, especially in relation to interactive contexts, links to virtual environment design, the digital design studio and sound utilised in interactive multimedia through design projects; understanding of the transformation of abstract data into sonification (shares a conceptual grounding with information visualization) through design projects.

This is a core unit in the Bachelor of Design Computing. Student effort expected for an average student to achieve a pass level result: contact hours: 3 hours per week; class preparation: 1.5 hours per week; assessment preparation: 19 hours per semester.

### DECO1100

#### Digital Design Studio

##### Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1 **Classes:** Lectures and studio. 12 hours per week. **Prohibitions:** DECO1011 **Assessment:** Tutorial submissions, preliminary design reports, final design presentation and report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Core unit for Bachelor of Design Computing. BST students by permission. Enrolment is limited by teaching resources.*

**Associated degrees:** B Des Comp, B S T, UG Study Abroad Program.

In studying this unit, students will: develop an understanding of how to conceptualise and communicate design concepts through image, shape, lines, colour, composition, morphing, layout, and text; be introduced to digital image representation and technology through design projects; become proficient with the elements of digital design technology including digital images, vector graphics, font, montage, photography; develop skills in digital imaging software such as Photoshop, and graphical layout software such as Illustrator; and develop experience with significant digital design issues.

On the successful completion of this unit of study, students will have demonstrated skills in sourcing, developing, and designing a range of digital media content through a series of tutorial exercises; knowledge of digital design through the incremental development of a series of design projects; knowledge of how to incorporate frame-based animation and morphing with their digital designs through tutorial exercises.

This unit is a core studio in the Bachelor of Design Computing program. This unit is a foundation for knowledge of image design and digital media design techniques. Student effort expected for an average student to achieve a pass level result: Contact hours: 12 hours per week; Class preparation: 9 hours per week; Assessment preparation: 39 hours per semester.

### DECO2010

#### Collaborative Virtual Environments

##### Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** DECO1100 or DECO (2101 and 2102) or INFO (1000 or 1003) **Prohibitions:** DECO2005 **Assessment:** Tutorial exercises, collaborative project, individual written reports, oral presentations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. First preference to Bachelor of Design Computing students.*

**Associated degrees:** B Arch, B Des Arch, B Des Comp, B S T, UG Study Abroad Program.

The aim of this unit is to impart to students an understanding of the similarities and differences of computer-mediated and face-to-face communication; skills in the use of collaborative tools such as email, shared whiteboards, bulletin boards, video conferences and shared modelling environments.

On the successful completion of this unit of study, students will have demonstrated: an understanding of synchronous and asynchronous communication technologies through the collaborative project report; an understanding of communication and representation of design data in a computer mediated collaborative design project in the development

of the collaborative project report; skills in using collaborative technologies in the tutorial exercises.

This unit is core for Bachelor of Design Computing and elective for other programs. Student effort expected for an average student to achieve a pass level result: Contact hours: 3 hours per week; class preparation: 1.5 hours per week; assessment preparation: 19 hours per semester.

### DECO2011

#### Design Programming

##### Architecture, Design and Planning

### DECO2013

#### Generative Design Systems Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three hours per week  
**Prerequisites:** DECO2011 or SOFT1001 **Prohibitions:** DECO2601, DECO2602, DECO2603 **Assessment:** Three programming assignments and reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit will not run beyond 2009. Bachelor of Design Computing students only.*

**Associated degrees:** B Arch, B Des Arch, B Des Comp, B S T, UG Study Abroad Program.

The aim of the unit is to teach students an understanding of a range of algorithms that can automatically generate designs, such as genetic algorithms, simulated annealing, shape grammars, and swarm intelligence.

On the successful completion of this unit of study, students will have demonstrated: knowledge of the use of an existing generative program to generate a family of designs and report on how the algorithm works through the programming assignment and report; knowledge of how to extend a selected program by using scripting to address specific design goals and forms through the programming assignment and report; skills in implementing a generative design system through the programming assignment and report.

This unit is core in the Bachelor of Design Computing. Student effort expected for an average student to achieve a pass level result: contact hours: 3 hours per week; class preparation: 1.5 hours per week; assessment preparation: 19 hours per semester.

### DECO2101

#### Digital Image Design & Representation Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Petra Gemeinboeck **Session:** Semester 1 **Classes:** Lectures and computer labs, 3 hours per week  
**Prohibitions:** DECO1001, DECO1100 **Assessment:** Tutorial submissions, Individual project submissions **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Places in this unit are limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. Bachelor of Design Architecture students will receive preference. Not available in the Bachelor of Design Computing.*

**Associated degrees:** B Arch, B Des Arch, B S T, UG Study Abroad Program.

In studying this unit, students will: be introduced to digital image representation and technology; become proficient with the elements of digital design technology including digital images, vector graphics, font, montage, photography; develop skills in digital imaging software such as Photoshop, and graphical layout software such as Illustrator.

On the successful completion of this unit of study, students will have demonstrated: skills in sourcing, developing, and designing a range of digital media content through a series of tutorial exercises;

knowledge of how to incorporate frame-based animation and morphing with their digital designs through tutorial exercises.

This unit is part of the Digital Architecture stream in the Bachelor of Design in Architecture. Not available in the Bachelor of Design Computing. Elective in other programs. Student effort expected for an average student to achieve a pass level result: contact hours: 3 hours per week; class preparation: 1.5 hours per week; assessment preparation: 19 hours per semester.

### DECO2102

#### Interactive Multimedia Design Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three hours per week  
**Prerequisites:** DECO2101 **Prohibitions:** DECO1002, DECO2002, DECO1200 **Assessment:** Tutorial submissions, preliminary design reports, final design presentation and report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Places in this unit are limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. Bachelor of Design Architecture students will receive preference. Not available in the Bachelor of Design Computing.*

**Associated degrees:** B Arch, B Des Arch, B S T, UG Study Abroad Program.

This unit introduces interactivity and multimedia through design projects; students will develop narrative and storytelling through nonlinear interactive multimedia; elements of interaction design including menus, hotspots, screen design, motion, animation and sound integration will be addressed for various media, including the Internet, CD-ROMs, kiosks, interactive TV, broadcast media and DVD; management and organisation of interaction through storyboarding and prototyping will cultivate methodologies for responding to a brief; software used includes Director, Flash, Dreamweaver.

On the successful completion of this unit of study, students will have demonstrated: the application of knowledge of interaction design to a range of contexts, for the Internet and standalone media, through project submissions; knowledge of narrative and engagement in nonlinear interactive contexts through project submissions; knowledge of scripting and markup languages for enabling dynamic content and interactive designs, e.g. Lingo, ActionScript, HTML, JavaScript through tutorial exercises; understanding of interaction developed using mouse, keyboard, computer and traditional interfaces through tutorial exercises.

This unit is part of the Digital Architecture stream in the Bachelor of Design in Architecture. Not available in the Bachelor of Design Computing. Elective in other programs. Student effort expected for an average student to achieve a pass level result: contact hours: 12 hours per week; class preparation: 9 hours per week; assessment preparation: 39 hours per semester.

### DECO2103

#### 3D Modelling Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Marc Aurel Schnabel **Session:** Semester 2 **Classes:** 3 hours per week **Prohibitions:** DECO1008 **Assessment:** Tutorial exercises and two project submissions. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Places in this unit are limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. Bachelor of Design Architecture students will receive preference. Not available in the Bachelor of Design Computing.*

**Associated degrees:** B Des Arch, UG Study Abroad Program.

This unit aims to give the student an understanding of the basic concepts of modelling and presentation so that they will develop skills in creating and using 3D models for various design tasks.

On the successful completion of this unit of study, students will have demonstrate: an understanding of how physical objects are represented in 3D digital models by modelling various 3D geometric entities and processes required; critical judgment, be capable of rigorous and independent thinking and use appropriate information technology techniques to communicate their knowledge through the

production of efficient design presentations and documentation; an understanding of boundary representations, solid modelling, parametric models, texture mapping, light sources, camera locations and projections, and model constraints through model development and presentation; acquire skills in using a 3D modelling system for 2D and 3D objects and in creating photorealistic images, movies, VR scenes, and simple animations from 3D models that accurately describe design variations, intent, and structure. These skills will be assessed through the tutorial exercises and the submission of a portfolio of 3D models.

This unit is part of the Digital Architecture stream in the Bachelor of Design in Architecture. Not available in the Bachelor of Design Computing. Elective in other programs. Student effort expected for an average student to achieve a pass level result: contact hours: 3 hours per week; class preparation: 1.5 hours per week; assessment preparation: 19 hours per semester.

## DECO2200

### Interaction Design Studio

#### Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** Dr Andy Dong **Session:** Semester 2 **Classes:** 12 hours per week **Prerequisites:** DECO1100 **Prohibitions:** DECO1200 **Assessment:** Tutorial submissions, preliminary design reports, final design presentation and report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Core unit for the Bachelor of Design Computing. BST students by permission. Enrolment is limited by teaching resources.*

**Associated degrees:** B Des Comp, UG Study Abroad Program.

This unit introduces interactivity and multimedia through design projects. Students will develop narrative and storytelling through non-linear interactive multimedia. Elements of interaction design including menus, hotspots, screen design, motion, animation and sound integration will be addressed for various media, including the Internet, CD-ROMs, kiosks, interactive TV, broadcast media and DVD. Management and organisation of interaction through storyboarding and prototyping will cultivate methodologies for responding to a brief. Software used includes Director, Flash, Dreamweaver.

On the successful completion of this unit of study, students will have demonstrated: the application of knowledge of interaction design to a range of contexts, for the Internet and standalone media, through the design project; knowledge of narrative and engagement in non-linear interactive contexts through the design project; knowledge of scripting and markup languages for enabling dynamic content and interactive designs, e.g. Lingo, ActionScript, HTML, JavaScript through tutorial exercises; understanding of interaction developed using mouse, keyboard, computer and traditional interfaces leads to further HCI using innovative methods of interaction in the 3rd year Interface Design Studio.

Contribution to program: this unit is core in the Bachelor of Design Computing program. This UoS builds on knowledge of image design and foundational digital media design techniques introduced in the Digital Design Studio, integrating and applying this knowledge in the context of interactive multimedia, augmenting scripting and interaction design understanding. This unit develops interaction narrative, engagement, curiosity and design methods using the computer interface. This unit lays the groundwork for scripting interactivity using web-based and standalone technologies. It leads on to the subsequent Interface Design Studio which further pursues interaction, moving to mobile, wireless, haptic and spatial sensate interfaces.

Student effort expected for an average student to achieve a pass level result: contact hours: 12 hours per week; class preparation: 9 hours per week; assessment preparation: 39 hours per semester.

## DECO2204

### Principles of AutoCAD

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Murty **Session:** Semester 2 **Classes:** Initiating lecture, with self directed on-line information transfer, augmented by weekly in-lab question and answer sessions, in most weeks. **Assessment:** Basic and advanced CAD tutorials; Personal modeling project. **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

*Note: Places in this unit are limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. Bachelor of Design Architecture students will receive preference.*

**Associated degrees:** B Arch, B Des Arch, B S T, UG Study Abroad Program.

This unit aims to: 1) introduce AutoCAD technology and skills required for computer based production of 2D drawings, 3D models and static or dynamic visualisations, to assist designing, documentation and presentation, of built designs, 2) introduce principles and practice of rational and economical model structuring, production and presentation, using layers and blocks, and 3) develop computing skills in the use of parametric object oriented modeling tools to produce and display accurate and convincing models. 4) develop skills of information acquisition, enquiry, formulation and production, employing on-line media, individually and in collaboration with others. AutoCAD is a widely used application in many design professions, combining both traditional CAD drafting and 3D object oriented functionalities for 2D drawing, 3D modeling, design visualisation and management. This unit of study introduces AutoCAD classic and advanced functions such as Revit and Building Information Modeling (BIM). At the completion of this unit competencies in the use of AutoCAD software will be sufficient for students to produce computer generated: multilayered 2D design and construction drawings, complete with dimensions, notations and conventional drawing graphics - 3D wireframe, surface and solid models - 3D parallel and perspective representations with shaded, coloured or rendered surfaces - static and dynamic presentations, that enhance and extend design communications and management. Students will also have gained an ability to find and utilise on-line information, to refresh, update and extend their CAD knowledge and skills.

## DECO2205

### Principles of ArchiCAD

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Murty **Session:** Semester 1 **Classes:** Initiating lecture, with self directed on-line information transfer, augmented by weekly in-lab question and answer sessions, in most weeks. **Assessment:** Basic and advanced CAD tutorials; personal modeling project. **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

*Note: Places in this unit are limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. Bachelor of Design Architecture students will receive preference.*

**Associated degrees:** B Arch, B Des Arch, B S T, UG Study Abroad Program.

This unit aims to: 1) introduce ArchiCAD technology and skills required for computer based production of 2D drawings, 3D models and static or dynamic visualisations, to assist designing, documentation and presentation, of built designs, 2) introduce principles and practice of rational and economical model structuring, production and presentation, using layers, stories and objects, and 3) develop computing skills in the use of parametric object oriented modeling tools to produce accurate and convincing models. 4) develop skills of information acquisition, enquiry, formulation and production, employing on-line media, individually and in collaboration with others. ArchiCAD is an object-oriented CAD application, developed specifically for documenting and creating 3D models, design visualisations and virtual buildings. This unit of study introduces the use of ArchiCAD basic object tools and advanced functions such as GDL and Building Information Modeling (BIM). At the completion of this unit competencies in the use of ArchiCAD software will be sufficient for students to produce computer generated: multilayered 2D design and construction drawings, complete with dimensions, notations and conventional drawing graphics - 3D parallel and perspective representations with shaded, coloured or rendered surfaces - static and dynamic presentations, that enhance and extend design communications and management. Students will also have gained an ability to find and utilise on-line information, to refresh, update and extend their CAD knowledge and skills.

## DECO2606

### Real Time Multimedia

## Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Rob Saunders **Session:** Semester 2 **Classes:** 1hr lecture and 4hrs comp lab/wk **Prerequisites:** DECO(1008 or 2103) and (SOFT1001 or DECO(1012 or 2011)) **Assessment:** Sketches and participation 30%, research presentation 25%, final demo 45%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. First preference to Bachelor of Design Computing students.*

**Associated degrees:** B Arch, B Des Arch, B Des Comp, B S T, UG Study Abroad Program.

This unit is based on the emerging 'demoscene' field to describe and experience the newest computer graphics methods in compelling visual designs. 'Demo' or game 'intro' design and implementation is a relatively unexplored interdisciplinary artistic field that is capable of exploiting the most novel computer graphics simulation techniques to generate immersive experiences that provoke imagination and engagement. Using new authoring software, dynamic behaviours will be designed and implemented that surpass frame-based animations and instead incorporate unpredictable manipulations by rule-based principles.

In this unit, students will develop a real-time 'demo' animation, containing compelling graphics and music. All used effects are influenced by abstract data sources and emergent principles, in order to create an artistic data representation that present information on an experiential level. The resulting demos can be displayed in real-world physical environments, used as real-time changing screensavers or online worlds. In addition, students will be asked to review and present recent academic research contributions in the fields of real-time multimedia, computer graphics or computer vision. The objectives of the unit are to introduce the principles of real-time multimedia production and authoring; introduce contemporary computer graphics applications, techniques and research directions, including the graphics pipeline, shading, texturing, rendering methods, computer vision, etc; introduce real-time issues in the context of virtual reality technology, game development, human-computer interaction and demo implementation; and introduce the optimised implementation of effects, simulation and rule-based behaviour modelling.

### DECO2660

#### Exchange Collaborative Virtual Environs Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Des Comp.

This unit of study is for Bachelor of Design Computing students undertaking an authorised exchange with an overseas university. The Faculty may approve international exchange for qualified students who have completed at least one full year of study. All students must complete the final semester of third year at the University of Sydney. Exchange will not be considered for Honours.

Exchanges may be for one or two semesters. Students must apply through the Study Abroad and Exchange unit of the International Office. Each student's program must be approved in consultation with the program coordinator of the degree. Exchange students are required to enrol in a full time load at the University of Sydney in each semester of exchange, and will incur the tuition costs associated with that load. No tuition costs will be incurred with the partner university.

Exchange units should be taken as part of the degree, satisfying the requirements that would normally be covered at this university during the same period. Exchange should not be in addition to the degree requirements.

Specially designated units of study will be recorded on the transcript. A result of 'R' for 'Satisfied Requirements' will be recorded by this university against each successfully completed unit. The transcript of the exchange university will be the official detailed record of exactly what was completed during the exchange. Exchange results will not count towards a student's Weighted Average Mark.

For more information please contact either the Study Abroad and Exchange Office or the Faculty of Architecture Student Administration Centre.

### DECO3003

#### Design Computing Research Opportunity Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Mike Rosenman **Session:** Semester 2 **Classes:** Seminars, meetings. **Prerequisites:** 96 credit points and minimum WAM of 65. **Assumed knowledge:** Computer programming. **Assessment:** Two progress reports each 15% and final report worth 70%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Students from other faculties may apply directly to the Faculty of Architecture, Design and Planning.*

**Associated degrees:** B Arch, B Des, B Des Arch, B Des Comp, B S T, UG Study Abroad Program.

The aim of the Design Computing Research Opportunity is to allow a student to participate in each phase of research activity: developing a research plan in conjunction with the staff member; proposal writing; conducting research; analysing data; and presenting results in oral and written form.

At the end of the unit the student will have experience in developing research proposals, conducting research and presenting their results. Design Computing Research Opportunity offers the opportunity for a Bachelor of Design Computing student to work with an academic staff member on research-based intellectual collaborations. The student works on an existing research activity of the staff member. It can be one of the most important means for students to develop an understanding of research as an intellectual endeavour and to foster mentoring research relationships with academic staff.

The research proposal, which is the first progress report, will demonstrate the student's ability to work within an existing research. The second progress report will identify the student's capacity to work on a research project within an existing research program and

becomes a demonstration of the research skills being developed. The final report will take the form of a research paper and is used to develop the student's skills in presenting research results.

### DECO3005

#### Advanced Interactive Multimedia Design Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1 **Classes:** Seminars, online tutorials and reading modules **Prerequisites:** DECO(1200 or 2200 or 2102) **Prohibitions:** DESC9142 **Assessment:** Exercises and major design authoring project demonstrating understanding and implementation of interactive interface design principles. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. First preference to Bachelor of Design Computing students.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp, B S T, UG Study Abroad Program.

The objectives of the unit are to develop a comprehensive understanding of interactive multimedia; to extend fundamentals learned in Interaction Design Studio (DECO1200) or Interactive Multimedia Design (DECO2102); to understand how humans interact with computers; to develop interface design that elicits engagement and interaction; and to develop an advanced knowledge of screen design principles and navigational methodologies.

This unit aims to develop a comprehensive understanding of multimedia authoring, extending fundamentals learned in Interactive Multimedia Design and Web-based Design Information Systems. Students will investigate effective navigational and design strategies for engaging interactive multimedia interface design. Students will develop an understanding of 2D vector-based animation and navigational techniques applied to a project authored with Macromedia Flash. ActionScripting knowledge will be developed to extend the generative, interactive, and external data interfacing capabilities of the authoring environment. Final projects will demonstrate implementation and understanding of aesthetic design principles, design architecture, and effective, efficient interactive interface design. Innovative applications of interactive multimedia, for example generative and real-time design and interactive navigational systems will extend the understanding of interface design. Students will develop further understanding of HCI and develop strategies to apply this understanding to interactive design projects. Delivery, integration of media, controlling audio and video, and a grammatical and conceptual understanding of scripting in Flash will be treated as an extension of these interactive capabilities.

At the conclusion of the unit students should have a well-developed understanding of human-computer interaction demonstrated through the structure and design of an interactive multimedia project; an understanding of efficient navigational and innovative interface design eliciting user interaction and demonstrated knowledge of responsive multimedia; an understanding of technical methods to link content and external data to the multimedia product.

### DECO3006

#### Principles of Animation Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Andy Dong **Session:** Semester 1 **Classes:** Lectures and tutorials. **Prerequisites:** DECO (1003 or 1008 or 2103) **Prohibitions:** DESC9019, DESC9141 **Assessment:** Project work involving design and implementation demonstrating understanding of 3D modelling, motion, lighting, rendering and principles of animation in 3D. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre. First preference to Bachelor of Design Computing students.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp, B S T, UG Study Abroad Program.

The objectives of the unit are to introduce the computer animation process; to understand modelling, texturing, rendering, and lighting;

and to develop an understanding of motion, kinematics and basic animation.

This elective forms an introduction to the computer-based animation process from understanding modelling, texturing, rendering and lighting to developing time-based sequences involving relative motion of objects, character animation, the skeleton, skinning, kinematics and polygons. Students will acquire basic animation skills, transfer traditional animation principles to computer graphics, and develop the skills to create an animated sequence. Basic knowledge will be related to foundational technical skills in AliasWavefront Maya and aims to serve as an introduction to further animation learning.

At the conclusion of this unit a student should have acquired an understanding of animation in relation to computer graphic software; understood the concepts and implementation of modelling principles involving light, texture and polygonal shapes; applied basic knowledge of animation to characters demonstrated in a significant project.

### DECO3008

#### Design Computing Prep Hons Research Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Andy Dong **Session:** Semester 1 **Classes:** Two hour seminar per week. **Prerequisites:** 72 credit points and minimum WAM of 70 **Assessment:** Research area summary report (40%), research proposal report (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Des Comp.

This unit aims to provide: an overview of the Faculty's research projects in design computing; an overview of research methods in design computing; instruction on how to write a preliminary research proposal for a project in design computing.

This is a seminar unit of study in which the academic staff in design computing and cognition will present their research projects to the potential honours students. The students will also be taught how to prepare a preliminary research project proposal and be introduced to some of the research methods used in design computing.

At the conclusion of the unit a preliminary research proposal will demonstrate the student's ability to identify a research area and a preliminary research plan.

### DECO3100

#### Information Visualisation Design Studio Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** Dr Andrew Vande Moere **Session:** Semester 1 **Classes:** 12 hours per week **Prerequisites:** DECO(1100 and 1200) or DECO(1100 and 2200) or DECO(2101 and 2102) or DECO(2012 and 2013) or DECO(1013 and 2013) **Prohibitions:** DECO3001 **Assessment:** Tutorial exercises, design project reports, final design presentation and report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Core unit for Bachelor of Design Computing. BST students by permission. Enrolment is limited by teaching resources.*

**Associated degrees:** B Des Comp, B S T.

The field of information visualization focuses on how non-physical data can be effectively represented to users, in an interactive and automatic way. This unit of study will introduce the principles of information visualization design, with special attention to metaphoric mapping, human-computer interaction, user engagement, and interdisciplinary insights. Topics will include: abstract data visualization (graphical, ambient or non-visual); metaphor creation and evaluation; interdisciplinary influences; server-side programming and client-side scripting.

After successful completion of this unit of study, students will have acquired: an awareness of information visualization issues through reviews of significant research publications; a research methodology by the development of a relevant research paper; design skills required to develop an information visualization prototype using a real-world dataset; relevant knowledge about tools and programming languages that process data on the server-side and present information interactively on the client-side.

This unit is core unit for Bachelor of Design Computing students only. Student effort expected for an average student to achieve a pass level result: contact hours: 12 hours per week; class preparation: 9 hours per week; assessment preparation: 39 hours per semester.

### DECO3200

#### Human-Computer Experience Des Stdo Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** Dr Petra Gemeinboeck **Session:** Semester 2 **Classes:** Lectures and studio. 12 hours per week **Prerequisites:** DECO3100 or (DECO2101 and DECO2102 and (DECO(1012 or 2011 or SOFT1001))) **Prohibitions:** DECO3002 **Assessment:** Comprehensive capstone design project; studio participation; fortnightly design tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Core unit for Bachelor of Design Computing. BST students by permission. Enrolment is limited by teaching resources.*

**Associated degrees:** B Des Comp, B S T.

New technologies in design computing have the potential to not only improve the quality of designs, but to change the way we design and the kinds of design we create. Meanwhile the tethering of humans to machines constructs an intimacy which pushes human-computer interaction (HCI) towards human-computer agency. What new capacity exists when people and machines are brought together in the embodiment of agency? This unit of study will cover designing innovative and novel forms of human computer interaction, and the design of HCI for objects that have information content, embedded computation, and intelligence. The students will explore through designing the evolution of design computing from one in which humans manipulate computing to create objects to one in which humans and computing devices co-create objects that create humanistic experiences.

The unit of study aims to graduate the students from the degree with the confidence to apply their design computing and digital media skills to a wide array of design problems that they may encounter in various industries. Upon completion of this unit of study, students will have demonstrated the capacity to investigate and integrate advanced design computing technologies into the design of objects with novel forms of human computer interaction. The unit of study also reinforces the students' experiences in designing through reflection-in-action of the design process.

This unit of study has three objectives situated in two learning contexts: studio and classroom. The studio context encapsulates the first two objectives. First, the unit of study is operationally focused. The classroom context enables the lecture component of the subject. The lectures will introduce the students to philosophical and technical perspectives on designing products with an emphasis on the human element.

On the successful completion of this unit of study, students will have demonstrated: (1) an understanding of user-centered design (UCD), and through this process, realise an operational prototype of an interactive computing product. The operational prototype is the primary vehicle of assessment. (2) Skills in advanced design computing technologies through the tutorial exercises. These skills will enable the students to complete the design project; the capacity of the students to utilise and extend these skills will be assessed by the embodiment of these skills in the final design. The unit incorporates all of the skills that the students have developed throughout their studies in design computing and digital media not only in the realization of the product for the project but also in the interim submissions. (3) An understanding of philosophical and technical perspectives on designing products with an emphasis on the human element will be assessed through studio critique and commentary, and written essays.

This unit is core for the Bachelor of Design Computing. Student effort expected for an average student to achieve a pass level result: contact hours: 12 hours per week; class preparation: 9 hours per week; assessment preparation: 39 hours per semester.

### DECO3441

#### Design Computing Independent Study A

## Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly meetings by arrangement. **Prerequisites:** 48 credit points and WAM of at least 70. **Assessment:** Report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by your proposed supervisor and program coordinator with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This unit provides an opportunity to high achieving students to develop an interest in a specific Design Computing topic; to develop skills in independent study; and to develop advanced report writing skills.

This elective is undertaken with an agreement between the student and a supervisor on an agreed topic related to Design Computing. The student will meet with the supervisor weekly to discuss progress.

The outcome should be a reflective report on a selected topic demonstrating mastery of the topic.

### DECO3442

#### Design Computing Independent Study B Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly meetings by arrangement. **Prerequisites:** 48 credit points and WAM of at least 70. **Assessment:** Report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by your proposed supervisor and program coordinator with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This unit provides an opportunity to high achieving students to develop an interest in a specific Design Computing topic; to develop skills in independent study; and to develop advanced report writing skills.

This elective is undertaken with an agreement between the student and a supervisor on an agreed topic related to Design Computing. The student will meet with the supervisor weekly to discuss progress.

The outcome should be a reflective report on a selected topic demonstrating mastery of the topic.

### DECO3443

#### Design Computing Independent Study C Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly meetings by arrangement. **Prerequisites:** 48 credit points and WAM of at least 70. **Assessment:** Report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by your proposed supervisor and program coordinator with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This unit provides an opportunity to high achieving students to develop an interest in a specific Design Computing topic; to develop skills in independent study; and to develop advanced report writing skills.

This elective is undertaken with an agreement between the student and a supervisor on an agreed topic related to Design Computing. The student will meet with the supervisor weekly to discuss progress.

The outcome should be a reflective report on a selected topic demonstrating mastery of the topic.

### DECO3444

#### Design Computing Independent Study D Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly meetings by arrangement. **Prerequisites:** 48 credit points and WAM of at least 70. **Assessment:** Report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by your proposed supervisor and program coordinator with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This unit provides an opportunity to high achieving students to develop an interest in a specific Design Computing topic; to develop skills in independent study; and to develop advanced report writing skills.

This elective is undertaken with an agreement between the student and a supervisor on an agreed topic related to Design Computing. The student will meet with the supervisor weekly to discuss progress.

The outcome should be a reflective report on a selected topic demonstrating mastery of the topic.

### DECO3551

#### Design Computing General Elective A Architecture, Design and Planning

**Credit points:** 6 **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Prerequisites:** 48 credit points. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by the elective supervisor, with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This elective allows a group of students to pursue a topic proposed by a member of academic staff in a formal learning environment.

This unit of study is available to a minimum of 10 students to engage in a topic related to Design Computing that is organised by a member of academic staff. This allows a member of staff to teach a topic of special interest or for a visiting academic to teach a subject related to their specialty. Students will participate in lectures, tutorials, or other activities as needed to pursue the elective topic. The topic for this elective is proposed by a member of academic staff and approved by the Associate Dean (Undergraduate).

Students will develop an understanding of a special topic through reports, projects, and tutorial exercises.

### DECO3552

#### Design Computing General Elective B Architecture, Design and Planning

**Credit points:** 6 **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Prerequisites:** 48 credit points. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by the elective supervisor, with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

#### DECO3660

##### Exchange Design Computing Studio 3 Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Des Comp.

This unit of study is for Bachelor of Design Computing students undertaking an authorised exchange with an overseas university. The Faculty may approve international exchange for qualified students who have completed at least one full year of study. All students must complete the final semester of third year at the University of Sydney. Exchange will not be considered for Honours.

Exchanges may be for one or two semesters. Students must apply through the Study Abroad and Exchange unit of the International Office. Each student's program must be approved in consultation with the program coordinator of the degree. Exchange students are required to enrol in a full time load at the University of Sydney in each semester of exchange, and will incur the tuition costs associated with that load. No tuition costs will be incurred with the partner university.

Exchange units should be taken as part of the degree, satisfying the requirements that would normally be covered at this university during the same period. Exchange should not be in addition to the degree requirements.

Specially designated units of study will be recorded on the transcript. A result of 'R' for 'Satisfied Requirements' will be recorded by this university against each successfully completed unit. The transcript of the exchange university will be the official detailed record of exactly what was completed during the exchange. Exchange results will not count towards a student's Weighted Average Mark.

For more information please contact either the Study Abroad and Exchange Office or the Faculty of Architecture Student Administration Centre.

#### DECO3662

##### Design Computing Exchange Elective 3A

#### Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

### DECO4001

#### Design Computing Honours Research A Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** Dr Andy Dong **Session:** Semester 1, Semester 2 **Prerequisites:** Completion of the Pass degree. Students in the Bachelor of Design Computing will require a WAM of at least 70. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Des Comp (Hons).

Students must submit an honours application form. Entry into honours in the Bachelor of Design Computing requires you to have completed your pass degree with a weighted average mark of at least 70.

The honours degree requires full time study over two semesters (DECO4001 and DECO4002 and then DECO4003 and DECO4004). In special cases the Dean may approve a part time enrolment over four semesters. The units are not assessed separately. A single dissertation is required. The appointment of a supervisor will depend on the topic chosen for the dissertation by the student.

The dissertation should be submitted by the end of the first week of the formal examination period in the semester in which DECO4004 Design Computing Honours Research D is taken.

### DECO4002

#### Design Computing Honours Research B Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** DECO4001 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Comp (Hons).

Students must submit an honours application form. Entry into honours in the Bachelor of Design Computing requires you to have completed your pass degree with a weighted average mark of at least 70.

The honours degree requires full time study over two semesters (DECO4001 and DECO4002 and then DECO4003 and DECO4004). In special cases the Dean may approve a part time enrolment over four semesters. The units are not assessed separately. A single

dissertation is required. The appointment of a supervisor will depend on the topic chosen for the dissertation by the student.

The dissertation should be submitted by the end of the first week of the formal examination period in the semester in which DECO4004 Design Computing Honours Research D is taken.

### DECO4003

#### Design Computing Honours Research C Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** DECO4002 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Comp (Hons).

Students must submit an honours application form. Entry into honours in the Bachelor of Design Computing requires you to have completed your pass degree with a weighted average mark of at least 70.

The honours degree requires full time study over two semesters (DECO4001 and DECO4002 and then DECO4003 and DECO4004). In special cases the Dean may approve a part time enrolment over four semesters. The units are not assessed separately. A single dissertation is required. The appointment of a supervisor will depend on the topic chosen for the dissertation by the student.

The dissertation should be submitted by the end of the first week of the formal examination period in the semester in which DECO4004 Design Computing Honours Research D is taken.

### DECO4004

#### Design Computing Honours Research D Architecture, Design and Planning

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** DECO4003 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Comp (Hons).

Students must submit an honours application form. Entry into honours in the Bachelor of Design Computing requires you to have completed your pass degree with a weighted average mark of at least 70.

The honours degree requires full time study over two semesters (DECO4001 and DECO4002 and then DECO4003 and DECO4004). In special cases the Dean may approve a part time enrolment over four semesters. The dissertation should be submitted by the end of the first week of the formal examination period in the semester in which DECO4004 Design Computing Honours Research D is taken.

### DESA1001

#### Design Practice 1A Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** Dr Ross Anderson **Session:** Semester 1 **Classes:** Studio, lectures, seminars, field trips, workshops, laboratories. 12 hours per week **Corequisites:** DESA1101 **Assumed knowledge:** HSC Mathematics, HSC English Standard **Assessment:** This will be in the form of specific, short exercises and attendance, a design proposal presentation to a jury and a record of the design process undertaken. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Progression to DESA1002 requires successful completion of this unit. Students may incur materials costs in this unit.*

**Associated degrees:** B Des, B Des Arch, UG Study Abroad Program.

Designing components of the built environment is a complex process in which all graduates of the Bachelor of Design in Architecture are required to be skilled at a pre-professional level. Design process is complex because a statement of what is to be designed always contains only part of the information needed to produce a design, and also does not specify the required physical form of the object to be designed. Designing therefore involves identifying the issues relevant to each specific design and its context or setting, and undertaking appropriate design processes which interpret, apply and integrate the relevant knowledge into a single design. This knowledge broadly concerns aspects of inhabiting, designing and constructing the built

environment as it relates to the human, environmental, cultural, social and technological contexts, which influence the form of the built environment.

The unit will study the built environment at the scale of towns and suburbs, focussing on the design of an individual element, such as a small building and its associated outdoor places.

The unit will focus on developing your learning, and feedback forms of assessment will be used throughout the unit to inform you of your progress and help your learning. The value of peer and collaborative learning for feedback and development will also be introduced. Learning in this unit will be extended by study of wider aspects of the knowledge in the concurrent unit DESA1101 Design Studies 1A. The unit is also directly linked to the following July Semester unit DESA1002 Design Practice 1B. It will involve a sequential development of learning to apply knowledge and skills in designing at an introductory level.

On the successful completion of this unit you will have demonstrated your ability to: (1) explore and apply at a basic level key aspects of knowledge about the built environment through specific design exercises, including: taking one set of knowledge about the building to a more detailed design development stage, the construction shown in a framing model; using at a basic level, direct precedents of similar buildings, that relate to specific knowledge issues, informing decision making in your design processes; using at a basic level simple methods for starting your design process, and carrying out basic iterative processes for testing, evaluating and developing your designs; gaining basic skills in aspects of knowledge and in basic drawing and modelling conventions demonstrated through mastery tasks; keeping a record of this material. (2) Reflect on your design processes through a daily journal, and through preparing from this and your recorded material a Reflective Process Record, in which you describe and comment on these processes. (3) Make a basic self-assessment of your design processes and design outcomes, and identifying some key ways to improve these, through your Design Review.

This is a core unit of study for the Bachelor of Design in Architecture. It is central to the program, and it relates directly to the practice of the profession of Architecture and all its related forms. To achieve a good Pass level result the effort is 2 hours per credit point (12) per week of semester (13 weeks): contact hours: 12 hours per week = 156 hours per semester; class preparation: 8 hours per week = 104 hours per semester; assessment preparation: 52 hours per semester.

## DESA1002

### Design Practice 1B

#### Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** Dr Ross Anderson **Session:** Semester 2 **Classes:** Studio, lectures, seminars, field trips, workshops, labs, 12 hours per week **Prerequisites:** DESA1001 **Corequisites:** DESA1102 **Assumed knowledge:** DESA1101 **Assessment:** This will be in the form of specific, short exercises and attendance, with the main summative assessment tasks being a major design proposal presentation to a jury and a record of the design process undertaken. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Progression to DESA1002 requires successful completion of DESA1001. Students may incur materials costs in this unit.*

**Associated degrees:** B Des, B Des Arch, UG Study Abroad Program.

The aim of this unit is to build on and extend the skills and knowledge you gained in Design Practice 1A and provide you with more complex design problems in which to apply these. These design problems will require you to resolve a greater number of key design issues and to use new conceptual knowledge as well as that learnt previously. Through this unit of study you will explore and use more complex direct precedents used in urban design and in architecture. You will study the built environment at the scale of a town. You will explore this context in depth, applying the understanding you gain to the process of designing a building and its outdoor places in an urban context. You will also be provided with more sophisticated techniques for design and precedent representations. Through engaging in and reflecting on the iterative learning situations provided in this unit of study and your own response to them, you will develop your ability in

and understanding of architectural design and the process of designing.

On the successful completion of this unit you will have demonstrated your ability to: (1) Analyse and interpret the physical, historical and cultural landscape context of architecture through completing a study and report on the development of a small town. (2) Explore and apply key aspects of knowledge about the built environment through designing a building, its interior and exterior spaces, and its streetscape to 'sketch plan' stage. Through this you will have demonstrated your ability to: take one set of knowledge about the building to a more detailed design development stage, in this case, the interior of one room; use direct precedents of urban contexts, and aspects of buildings with similar purpose, spatial organisation, material use, structure and environmental issues, to inform your decision making in your design processes; test, evaluate and develop your designs through an iterative design process; communicate your ideas and design representations through drawing and modelling conventions and verbally; keep a comprehensive record of your design process. (3) Reflect on your design processes through keeping a daily journal, and through preparing from this and your recorded material a Reflective Process Record, in which you describe and comment on these processes. (4) Evaluate other students design outcomes and evaluate your own design processes and design outcomes, identifying key ways to improve these, through your Design Review.

This is a core unit of study for the Bachelor of Design in Architecture. It is central to the program, and it relates directly to the practice of the profession of Architecture and all its related forms. To achieve a good Pass level result the effort expected is 2 hours per credit point (12) per week of semester (13 weeks): Contact hours: 12 hours per week = 156 hours per Semester; Class preparation: 8 hours per week = 104 hours per Semester; Assessment preparation: 52 hours per Semester.

## DESA1004

### Designing with Surfaces and Light Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Terry Purcell **Session:** Semester 2, Summer Early, Winter Main **Classes:** On-line delivery through WebCT **Assessment:** Two assignments **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

*Note: Enrolment numbers limited by teaching resources. If your attempt to enrol online is unsuccessful, please seek permission from the Faculty of Architecture, Design and Planning Student Administration Centre.*

**Associated degrees:** B Des Arch, UG Study Abroad Program, UG Summer/Winter School.

An essential part of the way we experience the three dimensional world we live in results from the way in which light interacts with the surfaces in the environment. One way of thinking about architectural design is in terms of making decisions about the surfaces that make up both the external forms of buildings and define the spaces within the building and the way they will interact with light. However in making these decisions about these physical properties of the environment designers are also determining how people will experience these environments.

The unit deals with the following: the basic properties of light and the way these properties effect the behaviour of light in a three dimensional environment and the experience of the environment; the basic visual process associated with dealing with change in light intensity within the environment and the perception of detail; surface (micro) structure and the interaction of light and surface structure; the experience of texture and pattern; reflection of light off a surface and effects on perceived surface properties; selective absorption of light by a surface and perceived colour space and colour.

Participants in the unit will demonstrate their understanding of the knowledge presented and the way that it can be used to understand our experience of the environment by finding and analysing their own environmental examples. For students in the Faculty of Architecture this unit introduces them to knowledge about important aspects of the way we experience the built environment and how this knowledge may be used in the design of built environments.

Participants in the unit from other faculties are also introduced to knowledge about our experience of the environment but in addition they obtain insights into the nature of design and how design embodies abstract knowledge in specific physical artefacts.

## DESA1101

### Design Studies 1A

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Chris L Smith **Session:** Semester 1 **Classes:** 6 hours per week (lecture and tutorial) **Corequisites:** DESA1001 **Assumed knowledge:** HSC Mathematics and HSC English Standard or equivalent. **Assessment:** Exercises, assignments, quizzes and examinations. Overall assessment grading will be Pass/Fail result only. Failure in any single module equates to failure in the overall unit of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des, B Des Arch, B Des Comp, UG Study Abroad Program.

This unit introduces conceptual, precedent and procedural knowledge about inhabiting, designing and constructing the built environment focussing upon essential foundation knowledge and skills. These will be drawn upon in the corequisite unit of Design Practice 1A and will be assumed and developed in a number of following core, and elective, units of study. The material is presented in modules: (1) History & Theory: The aim of this module is to establish a basic comprehension of the cultural context, influences on and historical precedents of our present built environment which will allow exploration of other cultural 'histories', including architectural movements and theories, at a later stage. (2) Environment & Sustainability: Introduces fundamentals of the operation of climatic, ecological and energy systems and their impact. The aim of this module is to provide a basic understanding of these issues in order to subsequently study environmental and ecological sustainability issues in relation to the built environment. (3) Structures: The module aims to introduce students to a fundamental understanding of how structures are realised including basic structural knowledge. This includes an understanding of the basic properties of common structural materials, the ability to recognise simple structural types and the behaviour of structural elements to provide a basis for assembling structural systems.

On successful completion of this unit of study each student will have: demonstrated an awareness of core issues in inhabiting, designing and constructing the built environment by attendance and background reading; demonstrated an understanding of key issues and impacts involved with the natural world, including climatic and ecological systems, as a setting for sustainable design through assignment and examination; analysed, evaluated and justified environmental issues of a site and its context, and the environmental impact of a building on its surroundings through exercises in the corequisite unit; demonstrated an understanding of the physical, sensory, behavioural and ergonomic relationship between people and the everyday and designed environments through exercises and examination; demonstrated a basic comprehension of the cultural context, influences on and historical precedent of our present built environment through an assignment; demonstrated an understanding of basic principles of structure including an understanding of the basic properties of common structural materials, the ability to recognise simple structural types and the behaviour of structural elements through quizzes and examination.

This is a core unit for the Bachelor of Design in Architecture. It unit introduces foundation knowledge about the built environment which is required for a wide range of following units in particular those in Design Practice. Contact hours: 6 hours per week (lecture and tutorial); class preparation: 1 hour per week; assessment preparation: 26 hours per semester.

## DESA1102

### Design Studies 1B

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Chris L Smith **Session:** Semester 2 **Classes:** 6 hours per week (lecture and tutorial) **Corequisites:** DESA1002

**Assumed knowledge:** DESA1001 and 1101 **Assessment:** Exercises, assignments, quizzes and examinations. Overall assessment grading will be Pass/Fail result only. Failure in any single module equates to failure in the overall unit of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des, B Des Arch, B Des Comp, UG Study Abroad Program.

Design Studies 1B presents additional conceptual, precedent and procedural knowledge about inhabiting, designing and constructing the built environment to that presented in Design Studies 1A and Design Practice 1A. It extends previously presented knowledge in both depth and breadth and is applied in the corequisite unit, Design Practice 1B. The material is presented in modules: (1) History & Theory: This module commences a survey history of the built environment. The aim of this module is to establish a basic comprehension of major historical developments as a basic component of architectural literacy, in particular historical precedents for design practice. (2) Environment & Sustainability: Introduces applications of ecological sustainability to design practice. Concepts of 'passive' design techniques related to building siting, form and planning are introduced with the aim of providing design knowledge especially for use in the corequisite unit, Design Practice 1B, and later. (3) Structures: This module expands upon the knowledge presented in Design Studies 1A. The repertoire of structural materials elements and systems, to provide a basis for selecting appropriate structural systems for design problems, is expanded.

At the successful completion of this unit each student is expected to have demonstrated: an increased awareness of core issues in inhabiting, designing and constructing the built environment by attendance and background reading; a comprehension of major architectural historical developments, including individual buildings, designers and intellectual context through exercises and examination; a basic understanding of key issues in sustainability in the built environment and their application by exercises including in the corequisite unit; an understanding of environmental cognition and interaction with everyday and designed environments through exercises and assignment; an understanding of more advanced principles of structural behaviour and materials through quizzes and examination; an ability to assemble structural materials, elements and types into a functioning structural system through exercises in the corequisite unit.

This unit is core for the Bachelor of Design in Architecture. The unit introduces additional foundation knowledge about the built environment which is required for a wide range of following units in particular those in Design Practice. Contact hours: 6 hours per week (lecture and tutorial). Student effort expected for an average student to achieve a pass level result: class preparation: 1 hour per week; assessment preparation: 26 hours per semester.

## DESA2001

### Design Practice 2A

#### Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** A/Prof Anna Rubbo & Mr Col James **Session:** Semester 1 **Classes:** Studio, lectures, seminars, field trips, workshops, labs. 12 hours per week **Prerequisites:** DESA1002 **Corequisites:** DESA 2111 **Assumed knowledge:** DESA1101 and DESA1102 **Assessment:** This will be in the form of specific, short exercises and attendance, with the main summative assessment tasks being a major design proposal presentation to a jury including the technical aspects of the design and a record of the design process undertaken. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Progression to DESA2001 requires successful completion of DESA1002. Students may incur materials costs in this unit.*

**Associated degrees:** B Des, B Des Arch, UG Study Abroad Program.

The main aim of this unit of study is to develop of your design understanding and skills. This includes encouraging you in the pursuit of excellence in all aspects of designing the built environment. To do this it requires you to apply, and extend, the knowledge and abilities which you gained in Design Practice 1A and 1B, and Design Studies 1A and 1B. To achieve this aim, there is an increase both in the complexity of a design situation, in terms of the number of key issues, and in the level of resolution expected of you in dealing with these.

You will continue to study the built environment at the scale of the urban form of a neighbourhood in a city. You will focus on the interplay between interior of a building and its context, both physical and cultural. You will explore the formulation of simple environmental, structural and constructional strategies that enhance the environmental and physical quality of the built environment and the experience of those who use it, and support the intent and aims of your design. Your abilities in testing, evaluating and developing your design processes will also be developed, including both physical and digital modelling. Collaborative working within groups will continue to be emphasised as a key way to learn designing. Through engaging in, and reflecting on your design processes within the iterative learning situations provided in this unit of study, you will develop your ability to evaluate those design processes, and develop them to improve your design outcomes.

On the successful completion of this unit you will have demonstrated skill in your ability to: (1) analyse and interpret the relationship between the interior and exterior physical form and fabric of a building, and its physical, historical and cultural context through completing a series of case studies. (2) explore and apply key aspects of knowledge, through designing a building, its interior and exterior spaces, and its streetscape to 'sketch plan' stage. Through this you will have demonstrated your ability to: use appropriate knowledge and strategies from precedents related to specific design issues, including social dimensions; express an understanding of personal and interpersonal interaction; devise appropriate environmental strategies supporting the design intent and the experience of environmental quality, issues, opportunities and impact of a building on its surroundings, including its streetscape; devise appropriate structural and constructional strategies which support the design intent; use appropriate construction and structural systems in the design of a small-scale building; test, evaluate and develop your designs through an iterative design process; communicate your ideas and design representations through skilful manual and digital drawing and modelling, and verbally; keep a comprehensive record of your design process. (3) Reflect on your design processes through keeping a daily journal, and through preparing from this and your recorded material a Reflective Process Record, in which you describe and comment on these processes. (4) Evaluate other students design outcomes, comparing key issues to your own. (5) Evaluate your own design processes and design outcomes, identifying key ways to improve these, through your Design Review.

This is a core unit of study for the Bachelor of Design in Architecture. It is central to the program, and it relates directly to the practice of the profession of Architecture and all its related forms. To achieve a good Pass level result the student effort required is 2 hours per credit point (12) per week of semester (13 weeks): contact hours: 12 hours per week = 156 hours per semester; class preparation: 6 hours per week = 78 hours per semester; assessment preparation: 78 hours per semester.

## DESA2002

### Design Practice 2B

#### Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** A/Prof Anna Rubbo & Mr Col James  
**Session:** Semester 2 **Classes:** Studio, lectures, seminars, field trips, workshops, labs, 12 hours per week **Prerequisites:** DESA2001 **Assumed knowledge:** DESA2111 **Assessment:** This will be in the form of specific, short exercises and attendance, with the main summative assessment tasks being a major design proposal presentation to a critique jury and the technical design development of this design. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Progression to DESA2002 requires successful completion of DESA2001. Progression to DESA3001 requires completion of all preceding Design Practice and Design Studies units. Students may incur materials costs in this unit.*

**Associated degrees:** B Des, B Des Arch, UG Study Abroad Program.

The main aim of this unit of study is to contribute to the progressive development of your design education. This includes encouraging you in the pursuit of excellence in design. You will be required not only to apply understanding you demonstrated previously, but learn new ways of designing. To achieve this aim, there is once again an

increase in the complexity of the design project, in the level of resolution and expertise expected of you in dealing with these. You will be exploring architecture as an expressive language. You will be addressing built form and architectural space on an extensive site, taking into account the adjoining architectural and cultural context. You will be required to research your project, use all your abilities in testing, evaluating and developing your design, and develop to a higher level your presentation skills, manual and computer-aided drawing skills and modelling. You will be required to demonstrate the technical solutions integral to your design.

Collaborative working within groups will continue to be emphasised as a key way to learn designing.

Through engaging in, and reflecting on your design processes within the iterative learning situations provided in this unit of study, you will develop your ability to evaluate those design processes, and develop them to improve your design outcomes.

On the successful completion of this unit you will have demonstrated an advanced skills in your ability to develop and apply knowledge in designing and therefore to: (1) Investigate a site to inform your design. (2) Explore architectural form in a landscape, using architectural elements as an expressive language at a broad scale. (3) Develop the design of a part of the project to a detailed level and demonstrate the use of architectural elements as an expressive language this scale. (4) Demonstrate the technical solution to the design of this detailed section in required areas of environmental design, structure, construction, site planning, ergonomic planning. (5) Explore and apply key aspects of knowledge, demonstrating your ability to: use appropriate knowledge and strategies from precedents related to specific design issues; express an understanding of personal and interpersonal interaction, and planning strategies; devise appropriate environmental strategies supporting the design intent and the experience of environmental quality, issues, opportunities and impact of a building on its surroundings, including its streetscape; devise appropriate structural and constructional strategies and systems which support the design intent; test, evaluate and develop your designs through an iterative design process; communicate your ideas and design representations through skilful manual and digital drawing and modelling, and verbally; keep a comprehensive record of your design process; reflect on your design processes through keeping a daily journal, and through preparing from this and your recorded material a summarised Reflective Process Record, in which you describe and comment on these processes; evaluate other students design outcomes, comparing key issues to your own; evaluate your own design processes and design outcomes, identifying key ways to improve these, through your Design Review.

This is a core unit of study for the Bachelor of Design in Architecture. It is central to the program, and it relates directly to the practice of the profession of Architecture and all its related forms. To achieve a good Pass level result the student effort expected is 2 hours per credit point (12) per week of semester (13 weeks): contact hours: 12 hours per week = 156 hours per semester; class preparation: 6 hours per week = 78 hours per semester; assessment preparation: 78 hours per semester.

## DESA2111

### Design Studies 2

#### Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Dr Chris L Smith **Session:** Semester 1 **Classes:** 6 hours per week (lecture and tutorial) **Corequisites:** DESA2001 **Assumed knowledge:** DESA(1101 and 1102) **Assessment:** Exercises, quizzes, assignments and examinations. Failure in any single module equates to failure in the overall unit of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Progression to DESA3001 requires successful completion of all preceding Design Studies and Design Practice units.*

**Associated degrees:** B Des Arch, UG Study Abroad Program.

Design Studies 2 presents additional conceptual, precedent and procedural knowledge about inhabiting, designing and constructing the built environment to that presented in Design Studies 1A and 1B. It further extends previously presented knowledge in both depth and

breadth. The material is presented in modules: (1) History & Theory: This module concludes a survey history of the built environment started in Design Studies 1B. The aim of this module is to establish a basic comprehension of major historical developments as a basic component of architectural literacy, in particular historical precedents for design practice. (2) Environment & Sustainability: Environmental evaluation, performance and design techniques and are expanded in this module, particularly in relationship to aspects "passive" design and the environmental response of the building envelope with the aim of providing detail design knowledge especially for use in design practice. (3) Structures: This module introduces a greater variety of structural element types available for assembling structural systems and subsystems in buildings to increase the informed range of choice available to students. To this end it introduces behavioural models, for understanding and predicting the behaviour of different structural assemblies. It also explores the relationship between structural form, action and efficiency, especially through the use of physical models, to develop a better understanding structural efficiency in design. (4) Construction: Constructional knowledge is explored through a study of the various systems used for ground, floor, wall, roof and opening construction, including their details, to provide students with constructional literacy for design practice.

At the successful completion of this unit each student is expected to have demonstrated: an increased awareness of core issues in inhabiting, designing and constructing the built environment by attendance and background reading; a comprehension of major architectural historical developments, including individual buildings, designers and intellectual context through exercises and examination; a basic understanding of principles in environmental performance, passive design and sustainability in the built environment through examination; an understanding of the application of issues in environmental performance, passive design and sustainability by exercises including in design practice; an understanding of more advanced principles of structural behaviour, assemblies and efficiency through quizzes and examination; an ability to assemble structural materials, elements and types into a detailed functioning structural system through exercises in design practice; a more advanced understanding of the common construction systems and materials of the major building elements through exercises and assignment; an ability to apply detailed constructional knowledge of small scale buildings through exercises in design practice.

This unit is core in the Bachelor of design in Architecture. Contact hours: 6 hours per week (lecture and tutorial); student effort expected for an average student to achieve a pass level result: class preparation: 1 hour per week; assessment preparation: 26 hours per semester.

### DESA3001

#### Design Practice 3A

##### Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** Ms Kristine Sodersten **Session:** Semester 1 **Classes:** Studio, lectures, seminars, field trips, workshops, laboratories. 12 hours per week **Prerequisites:** DESA1101, DESA1102, DESA2111 and DESA2002 **Assessment:** This will be in the form of specific, short exercises and attendance, with the main summative assessment tasks being a major design proposal presentation to a critique jury and the technical design development of this design. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students may incur materials costs in this unit.*

**Associated degrees:** B Des, B Des Arch.

The aim of this unit of study, together with the following unit, Design Practice 3B, is to develop your architectural design abilities in all areas to a pre-professional level. Consistent with the aims of the course as a whole, you will be required to demonstrate the progressive use of the understanding you have gained in all your previous core units of study. In this unit, and also in Design Practice 3B, you will be engaged in architecture at the scale of the city. In both units of study the emphasis is on complex, medium scale design projects, resolved to increasingly high level of competence as you move from Design Practice 3A to 3B. As projects of this type are usually the result of collaboration between teams of architects and other design professionals, including consultants, there is an increasing emphasis

placed upon collaborative working with consultants, within groups. You will also be required interpret multiple levels of complex interacting design issues, problems and opportunities. These will include site, context and programmatic issues, organisational, formal, spatial and compositional issues, and programming interpretation.

The technical design skill and knowledge you will be required to understand and demonstrate includes the following: the design of key aspects of the internal environment of a medium scale building and impact of design decisions upon aspects of the external environments; the construction and materiality of your designs particularly typical systems of construction for medium scale buildings and their adaptation for particular circumstances; sufficient structural understanding to develop architectural structural strategies for medium scale buildings.

To support this, you will be required to interpret precedent and case studies. You will also be introduced to the basic understanding of the legal and regulatory environment in which buildings are constructed. High skills in communicating your designs in verbal and in graphic and modelled form, manual and digital, will be required to clearly demonstrate your understanding at the high level of pre-professionalism required in this unit.

On the successful completion of this unit you will have demonstrated through the assessment tasks an advanced ability to discover, locate, develop and apply knowledge in designing, and you will have demonstrated: a highly developed ability to reflect upon, evaluate, understand and improve your own designing; a high level of ability in communicating and expressing your design intent, concepts and proposals; your ability at a high level of competence to interpret multiple levels of complex interacting design issues, problems and opportunities; your understanding, at a high level of competence, of required environmental, regulatory, construction, structural, contextual, formal, spatial, organisational, material, programmatic and programming issues, through embodying your knowledge in the proposal and detailed development of your building design; research and scholarship used to inform your design decisions at all levels, including the study of precedents; self-reliance, initiative and resourcefulness in finding information, references, precedents, case studies etc for the project, and self-direction in learning.

This is a core unit of study for the Bachelor of Design in Architecture. It is central to the program, and it relates directly to the practice of the profession of Architecture and all its related forms. To achieve a good Pass level result the expected student effort is 2 hours per credit point (12) per week of semester (13 weeks): contact hours: 12 hours per week = 156 hours per semester; class preparation: 6 hours per week = 78 hours per semester; assessment preparation: 78 hours per semester.

### DESA3002

#### Design Practice 3B

##### Architecture, Design and Planning

**Credit points:** 12 **Teacher/Coordinator:** Ms Kristine Sodersten **Session:** Semester 2 **Classes:** Studio, lectures, seminars, field trips, workshops, 12 hours per week **Prerequisites:** DESA3001 **Assessment:** This will be in the form of specific, short exercises and attendance, with the main summative assessment tasks being a major design proposal presentation to a critique jury and the technical design development of this design. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students may incur materials costs in this unit.*

**Associated degrees:** B Des, B Des Arch.

The aim of this unit of study, together with Design Practice 3A, is to develop your design abilities in all areas, both pragmatic and poetic, to a pre-professional architectural level. Consistent with the aims of the course as a whole, you will be required to use and build on the understanding you have gained in all your previous core units of study. You will be engaged in architecture at the scale of the city in complex, medium scale design projects, resolved to a higher level of complexity and skill in Design Practice 3B than was the case in Design Practice 3A. There is an increasing emphasis placed upon working with consultants, and on collaborative working within groups. You will also be required to use a high level of interpretative skill to address complex

levels of interacting design issues relating to site and context, program, form and composition, spatial issues, strategies for the impacts of design decisions upon internal and external environments, construction and materiality of your designs particularly standard systems of construction and their adaptation to particular circumstances and architectural structural strategies for buildings of this scale. To support this, you will be required to interpret precedent and case studies at a high level. Your highest skills in communicating your designs in verbal and in graphic and modelled form, both manual and digital, will be required to clearly demonstrate your understanding at the high level of pre-professionalism required in this unit.

On the successful completion of this unit you will have demonstrated through the assessment tasks an advanced ability to discover, locate, develop and apply knowledge in designing, and you will have demonstrated: a highly developed ability to reflect upon, evaluate, and improve your own designing; a high level of ability in communicating and expressing your design intent, concepts and proposals; your ability at a high level to interpret multiple levels of complex interacting design issues, problems and opportunities; your high level of understanding of required environmental, constructional and structural issues, and contextual, formal, spatial, organisational and programming issues, through embodying your knowledge in the proposal and in the detailed development of your building design; research and scholarship used to inform your design decisions at all levels, including the study of precedents; self-reliance, initiative and resourcefulness in finding information, references, precedents, case studies etc for the project, and self-direction in learning.

This is a core unit of study for the Bachelor of Design in Architecture. To achieve a good Pass level result the effort expected is 2 hours per credit point (12) per week of semester (13 weeks): contact hours: 12 hours per week = 156 hours per semester; class preparation: 6 hours per week = 78 hours per semester; assessment preparation: 78 hours per semester;

#### DESA3441

##### Design Architecture Independent Study A Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly meetings by arrangement. **Prerequisites:** 48 credit points and WAM of at least 70. **Assessment:** Report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by your proposed supervisor and program coordinator with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This unit provides an opportunity to high achieving students to develop an interest in a specific Design Architecture topic; to develop skills in independent study; and to develop advanced report writing skills.

This elective is undertaken with an agreement between the student and a supervisor on an agreed topic related to Design Architecture. The student will meet with the supervisor weekly to discuss progress. The outcome should be a reflective report on a selected topic demonstrating mastery of the topic.

#### DESA3442

##### Design Architecture Independent Study B Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly meetings by arrangement. **Prerequisites:** 48 credit points and WAM of at least 70. **Assessment:** Report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by your proposed supervisor and program coordinator with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This unit provides an opportunity to high achieving students to develop an interest in a specific Design Architecture topic; to develop skills in independent study; and to develop advanced report writing skills.

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly meetings by arrangement. **Prerequisites:** 48 credit points and WAM of at least 70. **Assessment:** Report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by your proposed supervisor and program coordinator with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This unit provides an opportunity to high achieving students to develop an interest in a specific Design Architecture topic; to develop skills in independent study; and to develop advanced report writing skills.

This elective is undertaken with an agreement between the student and a supervisor on an agreed topic related to Design Architecture. The student will meet with the supervisor weekly to discuss progress. The outcome should be a reflective report on a selected topic demonstrating mastery of the topic.

#### DESA3444

##### Design Architecture Independent Study D Architecture, Design and Planning

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Weekly meetings by arrangement. **Prerequisites:** 48 credit points and WAM of at least 70. **Assessment:** Report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by your proposed supervisor and program coordinator with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This unit provides an opportunity to high achieving students to develop an interest in a specific Design Architecture topic; to develop skills in independent study; and to develop advanced report writing skills.

This elective is undertaken with an agreement between the student and a supervisor on an agreed topic related to Design Architecture. The student will meet with the supervisor weekly to discuss progress. The outcome should be a reflective report on a selected topic demonstrating mastery of the topic.

#### DESA3551

##### Design Architecture General Elective A Architecture, Design and Planning

**Credit points:** 6 **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Prerequisites:** 48 credit points. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by the elective supervisor, with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This elective allows a group of students to pursue a topic proposed by a member of academic staff in a formal learning environment.

This unit of study is available to a minimum of 10 students to engage in a topic related to Design Architecture that is organised by a member of academic staff. This allows a member of staff to teach a topic of special interest or for a visiting academic to teach a subject related to their specialty. Students will participate in lectures, tutorials, or other activities as needed to pursue the elective topic. The topic for this elective is proposed by a member of academic staff and approved by the Associate Dean (Undergraduate).

Students will develop an understanding of a special topic through reports, projects, and tutorial exercises.

## DESA3552

### Design Architecture General Elective B Architecture, Design and Planning

**Credit points:** 6 **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Prerequisites:** 48 credit points. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by the elective supervisor, with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This elective allows a group of students to pursue a topic proposed by a member of academic staff in a formal learning environment.

This unit of study is available to a minimum of 10 students to engage in a topic related to Design Architecture that is organised by a member of academic staff. This allows a member of staff to teach a topic of special interest or for a visiting academic to teach a subject related to their specialty. Students will participate in lectures, tutorials, or other activities as needed to pursue the elective topic. The topic for this elective is proposed by a member of academic staff and approved by the Associate Dean (Undergraduate).

Students will develop an understanding of a special topic through reports, projects, and tutorial exercises.

## DESA3553

### Design Architecture General Elective C Architecture, Design and Planning

**Credit points:** 6 **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Prerequisites:** 48 credit points. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by the elective supervisor, with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This elective allows a group of students to pursue a topic proposed by a member of academic staff in a formal learning environment.

This unit of study is available to a minimum of 10 students to engage in a topic related to Design Architecture that is organised by a member of academic staff. This allows a member of staff to teach a topic of special interest or for a visiting academic to teach a subject related to their specialty. Students will participate in lectures, tutorials, or other activities as needed to pursue the elective topic. The topic for this elective is proposed by a member of academic staff and approved by the Associate Dean (Undergraduate).

Students will develop an understanding of a special topic through reports, projects, and tutorial exercises.

## DESA3554

### Design Architecture General Elective D Architecture, Design and Planning

**Credit points:** 6 **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Prerequisites:** 48 credit points. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Submit an Independent Study Approval Form, signed by the elective supervisor, with your request to enrol.*

**Associated degrees:** B Arch, B Arch, B Des, B Des Arch, B Des Comp.

This elective allows a group of students to pursue a topic proposed by a member of academic staff in a formal learning environment.

This unit of study is available to a minimum of 10 students to engage in a topic related to Design Architecture that is organised by a member of academic staff. This allows a member of staff to teach a topic of special interest or for a visiting academic to teach a subject related to their specialty. Students will participate in lectures, tutorials, or other activities as needed to pursue the elective topic. The topic for this elective is proposed by a member of academic staff and approved by the Associate Dean (Undergraduate).

Students will develop an understanding of a special topic through reports, projects, and tutorial exercises.

## DESP1001

### Introductory Urban Design and Planning Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mr Martin Payne **Session:** Semester 2 **Classes:** 2 hours per week **Assessment:** Assessment is based on a workbook, which will present background studies, a strategic analysis and a reasoned proposal in response to a planning and design problem, besides a review of literature. The literature review will count for 40% of the total mark, and the background studies, strategic analysis and proposal will each count for 20%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Des Arch, UG Study Abroad Program.

Students will develop knowledge of key planning ideas, and be able to appreciate the context relevant to designing the built environment. They will be able to prepare strategic analyses of basic planning situations, and to prepare design proposals with supporting arguments.

On successful completion of this unit, each student will be able to demonstrate their ability: to prepare short documents, using photos, maps, drawings and other illustrations, with annotated comments and supporting text, to present site analyses; to use basic ideas (such as: vistas, viewing and over-viewing, connectivity, legibility, enclosure, uses, activities, environs, links, built form, interest, amenity networks, nodes) in reviewing design situations and preparing simple site analyses; to apply a critical and reflective approach in understanding design situations, and in preparing informative reports.

This is an elective unit, which introduces the Urban Design and Planning stream in the Bachelor of Design in Architecture. Elective in other programs. It is relevant to all architectural design students; it teaches students how to prepare planning studies and basic site plans as preparatory phases of designing buildings and places.

Student effort expected: contact hours: 2 hours per week; class preparation: 2 hours per week; assessment preparation: 26 hours per semester.

## DESP2001

### Planning for the Public Domain Architecture, Design and Planning

**Credit points:** 6 **Teacher/Coordinator:** Mr Martin Payne **Session:** Semester 1 **Classes:** 2 hours week **Assessment:** workbook presenting studies, reviewing materials, envisaging work to be done, demonstrating critical thinking, presenting proposals **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

Students will be able to: undertake background studies to inform designing for various elements of the public domain (streets and roads, open space and public places, car parking, pedestrian networks and centres); formulate and respond to complex planning problems; prepare and present simple proposals; use basic terms, concepts and methods in practical urban design and planning situations.

On successful completion of this unit, each student will be able to demonstrate their ability to: to prepare short documents, using photos, maps, drawings and other illustrations, with annotated comments and supporting text, to present planning studies and proposals; to use basic ideas (such as: vistas, viewing and over-viewing, connectivity, legibility, enclosure, uses, activities, environs, links, built form, interest, amenity networks, nodes) in reviewing design situations and preparing site analyses and proposals; to apply a critical and reflective approach in understanding planning and design situations, and in preparing informative documents which move from planning studies to proposals with supporting arguments; to be able to prepare proposals for built form outcomes and related planning instruments, with supporting studies and arguments.

This unit part of the Urban Design and Planning Stream of the Bachelor of Design in Architecture and an elective in other programs.

Student effort expected: contact hours: 2 hours week; class preparation: 2 hours per week; assessment preparation: 30 hours per semester.

## DESP2002

### Planning for the Built Environment

**Architecture, Design and Planning**

**Credit points:** 6 **Teacher/Coordinator:** Mr Martin Payne **Session:** Semester 2 **Classes:** 2 hours per week **Assessment:** workbook presenting studies, reviewing materials, envisaging work to be done, demonstrating critical thinking, presenting proposals **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Arch, B Des Arch, UG Study Abroad Program.

Students will be able to: undertake background studies to inform designing for various elements of the public domain (streets and roads, open space and public places, car parking, pedestrian networks and centres); formulate and respond to complex planning problems; prepare and present simple proposals; use basic terms, concepts and methods in practical urban design and planning situations.

On satisfactory completion of this unit each student will demonstrate capability: to prepare short documents, using photos, maps, drawings and other illustrations, with annotated comments and supporting text, to present planning studies and proposals; to use basic ideas (such as: vistas, viewing and over-viewing, connectivity, legibility, enclosure, uses, activities, environs, links, built form, interest, amenity networks, nodes) in reviewing design situations and preparing site analyses and proposals; to apply a critical and reflective approach in understanding planning and design situations, and in preparing informative documents which move from planning studies to proposals with supporting arguments; to be able to prepare proposals for built form outcomes and related planning instruments, with supporting studies and arguments.

This unit part of the Urban Design and Planning Stream of the Bachelor of Design in Architecture and an elective in other programs.

Student effort expected: contact hours: 2 hours per week; class preparation: 2 hours per week; assessment preparation: 30 hours per semester.

## ECMT1010

### Business and Economic Statistics A Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** two 1-hour lectures and one 2-hour workshop per week **Prohibitions:** ECMT1011, ECMT1012, ECMT1013, MATH1015, MATH1005, MATH1905, STAT1021 **Assessment:** Workshop participation/homework; Quiz; Assignment; Mid-Semester exam; Final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, B Res Ec, UG Study Abroad Program.

This unit provides an introduction to basic statistics and its applications in economics and business disciplines. Topics include: methods for data management; analysis and interpretation of data; probability; the normal distribution; an introduction to sampling theory and hypothesis testing; and the concepts of regression analysis. A key component is the provision of instruction and experience in the use of computers and statistical software as an aid in the analysis of data. Students are expected to use data resources on the World Wide Web, retrieve data and analyse this data using Excel.

## ECMT1020

### Business and Economic Statistics B Economics and Business

**Credit points:** 6 **Session:** Semester 2, Summer Main **Classes:** 3hrs per week **Corequisites:** ECMT1010 **Prohibitions:** ECMT1021, ECMT1022, ECMT1023 **Assessment:** Two quizzes; Workshop questions/homework; Assignment; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Other than in exceptional circumstances, it is strongly recommended that students do not undertake Business and Economic Statistics B before attempting Business and Economic Statistics A.*

**Associated degrees:** B A, B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

This unit broadens the knowledge gained in the unit, ECMT1010 Business and Economic Statistics A by introducing further tools (and their applications) for use in economics, finance, marketing and accounting. This unit features practical applications. Possible topics include: further aspects of hypothesis testing including goodness-of-fit models; regression analysis including a brief introduction to logit models, time series and its applications to economics and finance; input-output analysis; index numbers and mathematics of finance. The material is further complemented by mathematical topics including matrices and partial differentiation. In addition, students are expected to use data resources on the World Wide Web, retrieve data and analyse this data using Excel.

## ECMT1551

### Econometrics Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Com, B Ec, B Ec Soc Sc, B Int S.

## ECMT2110

### Regression Modelling Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week **Prerequisites:** ECMT1010 **Prohibitions:** ECMT2010 **Assessment:** Tutorial participation/computer work; Project; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

Students undertaking this unit have some background in basic statistics including an introduction to regression analysis. Using this knowledge as a base, an extensive discussion of basic regression theory and some of its extensions is provided. The unit covers how linear regression models can be applied to data to estimate relationships, to forecast, and to test hypotheses that arise in economics and business. Guidelines for using econometric techniques effectively are discussed and students are introduced to the process of model building. It is essential that the discussion of regression modelling be complemented with practice in analysing data. An important task is the computing component using econometric software.

## ECMT2120

### Analysis of Discrete Choice Data Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week **Prerequisites:** ECMT2110 or ECMT2010 **Prohibitions:** ECMT2021 **Assessment:** Assignment; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

Data that are qualitative or discrete present particular problems for data analysts. What influences an individual to work part-time rather than full-time, or use public transport rather than drive to work, or to choose one brand of detergent over another? Why do certain firms choose a particular accounting procedure over another? In these examples of modelling choice data, standard linear regression models are inappropriate. This unit considers the specification, estimation and use of statistical models that are necessary to analyse such questions. These may include the logit, probit and multinomial logit models. Special emphasis is placed on illustrating the appropriate application of such models using case studies and data drawn from marketing, accounting, finance and economics.

## ECMT2130

### Financial Econometrics Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** ECMT2110 or ECMT2010 **Prohibitions:** ECMT2030 **Assessment:** Assignment; Group assignment; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

Over the last decade econometric modelling of financial data has become an important part of the operations of merchant banks and major trading houses and a vibrant area of employment for econometricians. This unit provides an introduction to some of the widely used econometric models for financial data and the procedures used to estimate them. Special emphasis is placed upon empirical work and applied analysis of real market data. Topics covered may include the statistical characteristics of financial data, the specification, estimation and testing of asset pricing models, the analysis of high frequency financial data, and the modelling of volatility in financial returns.

## ECMT2620

### Management Science Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week **Prerequisites:** ECMT1010 and ECMT1020 **Prohibitions:** ECMT2720 **Assessment:** Two

assignments; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

Management science is an approach to decision making that is suitable in areas where the manager has little experience or where the problem for decision is complex. It provides an effective decision-making approach to problems important enough to justify the time and effort of quantitative analysis. This unit considers modelling in areas that practising managers might encounter in their roles as decision makers. The intended outcome of the unit is to increase the effectiveness of management decision making. The focus throughout is on practical solutions using readily available spreadsheet software. Topics may include resource allocation, capacity planning, logistics, and project planning.

### ECMT2630

#### Managerial Decision Making

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** ECMT1010 **Prohibitions:** ECMT2730 **Assessment:** Assignments; Class Tests; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

The course is focused on economic and statistical models of decision analysis and their application in large and small business settings, as well as in a public policy framework. It will be shown how use of the models can improve the decision process by helping the decision-maker understand the structure of the decision; incorporate subjective probabilities as a way to portray risk; measure outcomes in a way that is consistent with attitudes toward risk; and understand the value of information. The importance of sensitivity analysis will be emphasised, as well as the need to combine both quantitative and qualitative considerations in decision-making. Cases will be drawn from small business scenarios, the public policy arena, and corporate settings.

### ECMT2640

#### Operations Management

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** ECMT1010 **Assessment:** Assignments; Mid Semester; Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Com (Liberal Studies), B Ec, UG Study Abroad Program.

The 'operations' of a company or organisation are the direct processes that a company uses to create value, and operations management is the task of managing these processes. This unit is about the fundamentals of operations management, covering both service industries and manufacturing. As a graduate working in the business sector you will certainly be exposed to operations issues - this unit will equip you to approach these issues intelligently, whether or not your role is within the operations function. One focus of the unit will be on processes: considering process organisation, process capacity, and customer service implications. A second focus of the unit will be on the supply chain, looking at the control of inventory and the connections between supply chain partners. We will also consider what it means to have high quality operations and how this can be achieved: both through statistical quality control techniques and the use of lean operations ideas.

### ECMT2901

#### Econometrics Exchange

##### Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc.

### ECMT2902

#### Econometrics Exchange

##### Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc.

### ECMT2903

#### Econometrics Exchange

##### Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc.

### ECMT3110

#### Econometric Models and Methods

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** ECMT2110 or ECMT2010 **Prohibitions:** ECMT3010 **Assessment:** Assignment; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit extends methods of estimation and testing developed in association with regression analysis to cover econometric models involving special aspects of behaviour and of data. In particular, motivating examples are drawn from dynamic models, panel data and simultaneous equation models. In order to provide the statistical tools to be able to compare alternative methods of estimation and testing, both small sample and asymptotic properties are developed and discussed.

### ECMT3120

#### Applied Econometrics

##### Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week **Prerequisites:** ECMT3110 or ECMT3010 **Prohibitions:** ECMT3020 **Assessment:** Group assignment; Group Project; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

Econometric theory provides techniques to quantify the strength and form of relationships between variables. Applied Econometrics is concerned with the appropriate use of these techniques in practical applications in economics and business. General principles for undertaking applied work are discussed and necessary research skills developed. In particular, the links between econometric models and the underlying substantive knowledge or theory for the application are stressed. Topics will include error correction models, unit roots and cointegration and models for cross section data, including limited dependent variables. Research papers involving empirical research are studied and the unit features all students participating in a group project involving econometric modelling.

### ECMT3130

#### Forecasting for Economics and Business

##### Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week **Prerequisites:** ECMT2110 or ECMT2010 **Prohibitions:** ECMT3030 **Assessment:** Assignment; Group assignment; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

The need to forecast or predict future values of economic time series arises frequently in many branches of applied economic and commercial work. It is, moreover, a topic which lends itself naturally to econometric and statistical treatment. The specific feature which

distinguishes time series from other data is that the order in which the sample is recorded is of relevance. As a result of this, a substantial body of statistical methodology has developed. This unit provides an introduction to methods of time series analysis and forecasting. The material covered is primarily time domain methods designed for a single series and includes the building of linear time series models, the theory and practice of univariate forecasting and the use of regression methods for forecasting. Throughout the unit a balance between theory and practical application is maintained.

### ECMT3150

#### The Econometrics of Financial Markets

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** ECMT1010, ECMT2110 (or ECMT2010) and ECMT2130 (or ECMT2030) **Prohibitions:** ECMT3050 **Assessment:** Assignment; Group assignment; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit develops the econometric models and methods employed for the analysis of data arising from the financial markets. It extends and complements the material covered in ECMT2130. The unit will cover econometric models that have proven useful for the analysis of both time series and cross-sectional financial data over the last two decades. Modern statistical methodology will be introduced for the estimation of such models. The econometric models and associated methods of estimation will be applied to the analysis of a number of financial datasets. Students will be encouraged to undertake hands on analysis using an appropriate computing package. Topics covered include continuous time diffusions for financial returns, discrete time financial time series, modelling conditional volatility, multivariate financial econometric models, the econometrics of financial derivatives, modelling of high frequency financial data and contemporary asset pricing. The focus of the unit will be in the econometric models and methods that have been developed recently in the area of financial econometrics.

### ECMT3160

#### Statistical Modelling

##### Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week **Prerequisites:** ECMT2110 or ECMT2010 **Prohibitions:** ECMT3620, ECMT3720, ECMT3210 **Assessment:** Assignments; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Res Ec, UG Study Abroad Program.

This unit provides an accessible foundation in the principles of probability and mathematical statistics that underlie the statistical techniques employed in the fields of econometrics and management science. These principles are applied to various modelling situations and decision making problems in business and economics.

### ECMT3170

#### Computational Econometrics

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** ECMT2110 or ECMT2010 **Assessment:** Assignments; Mid-Semester exam; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, B Res Ec, UG Study Abroad Program.

This unit provides an introduction to modern computationally intensive estimation methodology, its implementation and application for the estimation of econometric models. A key component of the unit will be the instruction in a programming language, and its use to implement computational econometric methods. The computational methods of estimation include Bayesian sampling scheme based approaches and other iterative algorithms for estimation of parameters in complex econometric models.

### ECMT3610

#### Management Science Models and Methods

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** ECMT2620 or ECMT2720 **Prohibitions:** ECMT3710 **Assessment:** Four assignments; Two tests; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit presents formulation guidelines for management science models to provide practical assistance to managerial decision making. Optimisation methods are developed so the complexity and limitations of optimisation model categories can be accounted for in model selection and in the interpretation of results. Linear programming methods are developed and extended to cover variations in the management context to logistics, networks, and strategic planning. Decision analysis and competitive structures including hierarchy structures complete a rounded program for managerial application. The unit covers a variety of case studies incorporating commercial research processes for decision support.

### ECMT3640

#### Project Planning and Management

##### Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week **Prerequisites:** ECMT1010 **Prohibitions:** CIVL3805 **Assessment:** Assignments; Mid Semester; Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Com (Liberal Studies), B Ec, UG Study Abroad Program.

A project is a set of activities that together achieve a particular purpose and need to be carried out within a given time frame with a limited set of resources. Each project is unique and often complex. The challenges of planning and managing projects arise from the complexity and uncertainty that characterise projects. As a graduate working in business you will almost certainly find yourself involved in project teams, and at some stage or another you are likely to take on project management responsibilities. This unit gives an introduction to the planning and management of projects looking at the problems of defining projects; network techniques for project planning and control; methods for estimating activity durations; resource constraints; and modelling methods to understand the impact of uncertainty. At the same time as discussing the techniques of project management, the unit will also use case studies to discuss some of the challenges that project managers face.

### ECMT3901

#### Econometrics Exchange

##### Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc.

### ECMT3902

#### Econometrics Exchange

##### Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc.

### ECMT3903

#### Econometrics Exchange

##### Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc.

### ECMT4101 Econometrics Honours A Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week  
**Prerequisites:** Students who want to take honours in Econometrics have to: (i) qualify for a major in Econometrics, Management Decision Sciences or Management Science; (ii) obtain a Weighted Average Mark (WAM) of at least 65 in all units of study in the degree; (iii) obtain a distinction average or better in ECMT3110 and ECMT3120; (iv) obtain a WAM of at least 75 in the senior units of study in the ECMT or MDS/ Management Science major. Variations on entry requirements are possible only with permission of the Chair of Discipline. Please see the discipline online homepage for entry requirements in detail. Note that Econometrics and Business Statistics encourages joint honours with other disciplines. **Assessment:** Assignments; Final Exams; Dissertation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Requirements for the pass degree must be completed before entry to level 4000 honours units of study*

**Associated degrees:** B Com (Hons), B Ec (Hons).

The honours year provides basic professional expertise in the general area of econometrics through instruction in advanced theory, and experience in independent research. Honours students are required to (a) complete four semester units of instruction, (b) submit a dissertation not exceeding 65 A4 pages of typescript, and (c) attend and participate in Discipline research seminars. The dissertation topic must be approved by the Discipline and progress reports are to be presented every semester. Candidates must enrol in ECMT4101, ECMT4102, ECMT4103 and ECMT4104 to complete the Honours degree. Please consult the discipline website for details before enrolling in honours.

### ECMT4102 Econometrics Honours B Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week  
**Corequisites:** ECMT4101 **Assessment:** See ECMT4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons).

See ECMT4101

### ECMT4103 Econometrics Honours C Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week  
**Corequisites:** ECMT4102 **Assessment:** See ECMT4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons).

See ECMT4101

### ECMT4104 Econometrics Honours D Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week  
**Corequisites:** ECMT4103 **Assessment:** See ECMT4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons).

See ECMT4101

### ECMT4601 Management Decision Sciences Honours A Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week  
**Prerequisites:** Students who want to take honours in Management Decision Sciences have to: (i) qualify for a major in Econometrics, Management Decision Sciences or Management Science; (ii) obtain a Weighted Average Mark (WAM) of at least 65 in all units of study in the degree; (iii) obtain a distinction average or better in ECMT3610; (iv) obtain a WAM of at least 75 in the senior units of study in the ECMT or MDS/ Management Science major. Variations on entry requirements are possible only with permission of the Chair of Discipline. Please see the discipline online homepage for entry requirements in detail. Note that Econometrics and Business Statistics encourages joint honours with other

disciplines. **Assessment:** Assignments; Exams; Dissertation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Requirements for the Pass degree must be completed before entry to level 4000 honours units of study.*

**Associated degrees:** B Com (Hons), B Ec (Hons).

The honours year provides basic professional expertise in the general area of Management Decision Sciences, through instruction in advanced theory and experience in independent research. Honours students are required to (a) complete four semester units of instruction, (b) submit a dissertation not exceeding 65 A4 pages of typescript, and (c) attend and participate in Discipline research seminars. The dissertation topic must be approved by the Discipline and progress reports are to be presented every semester. Students should consult the discipline website before enrolling in honours in Management Decision Sciences.

### ECMT4602 Management Decision Sciences Honours B Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week  
**Corequisites:** ECMT4601 **Assessment:** See ECMT4601 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons).

See ECMT4601

### ECMT4603 Management Decision Sciences Honours C Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week  
**Corequisites:** ECMT4602 **Assessment:** See ECMT4601 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons).

See ECMT4601

### ECMT4604 Management Decision Sciences Honours D Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week  
**Corequisites:** ECMT4603 **Assessment:** See ECMT4601 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons).

**ECOF1001****Communication and Critical Analysis 1A  
Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hr seminar per week  
**Prohibitions:** ECOF1002 **Assessment:** Two essays; Seminar paper; Learning journal; Summary exercise and class participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Com (Liberal Studies), B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit aims to enhance oral and written communication skills and in the process provide a greater understanding of the philosophy underlying academic discourse. Weekly classes are oriented around a progressive series of tasks which consider academic texts in context and require learners to understand, analyse and produce spoken and written texts appropriate to the context of academic English. The contextualisation of these tasks is the philosophical aspects of critical analysis. Themes, such as the difference between convention, fact, opinion and preference; deductive and inductive proof; validity and truth; evidence; and the ethics of persuasion, are the basis on which the skills are taught.

Economics and Business**

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Main **Classes:** 2 hrs of lectures and 1 tutorial hour per week **Prerequisites:** Completed a minimum of 96 credit points in Economics and Business units of study (including ECON1001 and ECON1002) **Assessment:** Test; group case study; exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, UG Summer/Winter School.

Many organisations are faced with fast-paced change. The ability of organisations to develop effective strategic responses to these changes has become central to their survival and success. While the traditional focus of the academic study of business strategy has been on the formulation process, more contemporary analyses suggest that, in a context of fast paced change, effective strategy is a product of well developed strategic thinking throughout the organisation and the ability to rapidly and effectively implement strategic change. This unit of study, which acts as a capstone unit for students undertaking a Bachelor of Commerce, focuses on these two key issues. The first section of the unit of study revisits some of the core economic concepts introduced to students in their first year of study and examines how they can be used to analyse the strategic challenges facing commercial organisations. The second section of the unit of study focuses on the implementation and management of strategic change. Drawing on research on organisational change and strategy implementation, it provides students with insights into the process of managing strategic change.

### Introductory Microeconomics Economics and Business

**Credit points:** 6 **Session:** Semester 1, Summer Main **Classes:** 1 x 2hr lecture and 1 tutorial per week **Assumed knowledge:** Mathematics **Assessment:** Online tests, mid semester exam, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B E, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

Introductory Microeconomics addresses the economic decisions of individual firms and households and how these interact in markets. It is a compulsory core unit for the Bachelor of Economics and Bachelor of Commerce and an alternative core unit for the Bachelor of Economic and Social Science. Economic issues are pervasive in contemporary Australian society. Introductory Microeconomics introduces students to the language and analytical framework adopted in Economics for the examination of social phenomena and public policy issues. Whatever one's career intentions, coming to grips with economic ideas is essential for understanding society, business and government. Students are given a comprehensive introduction to these ideas and are prepared for the advanced study of microeconomics in subsequent years.

## ECON1002

### Introductory Macroeconomics Economics and Business

**Credit points:** 6 **Session:** Semester 2, Summer Main **Classes:** 1 x 2hr lecture and 1 tutorial per week **Assumed knowledge:** Mathematics **Assessment:** 2 in-class tests, Tutorial Assessment, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B E, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

Introductory Macroeconomics addresses the analysis of the level of employment and economic activity in the economy as a whole. It is a compulsory core unit for the Bachelor of Economics (BEc) and for the Bachelor of Commerce and an alternative core unit for the Bachelor of Economic and Social Science. Introductory Macroeconomics examines the main factors that determine the overall levels of production and employment in the economy, including the influence of government policy and international trade. This analysis enables an exploration of money, interest rates and financial markets, and a deeper examination of inflation, unemployment and economic policy.

## ECON4101

### Economics Honours A Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Classes:** 6 hrs per week **Prerequisites:** The prerequisite for entry to Economics Honours is at least 24 credit points at 3000 level Economics, including Advanced Microeconomics: (ECOS3901 or ECON3901) and Advanced Macroeconomics (ECOS3902 or ECON3902) with a Credit average or better in ECOS3901 and 3902; and Regression Modelling (ECMT2110 or ECMT2010) and Applied Economics (ECOS3903). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Requirements for the Pass degree must be completed before entry to 4000 level honours units of study.*

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B Ec (Soc Sc)(Hons), B Int S (Hons).

To complete the requirement for Economics (Honours), students need to complete six semester-length options from a list of options offered and complete a thesis. The list of options available may vary from year to year, but usually include advanced macroeconomics, advanced microeconomics, development economics, economic classics, industrial economics, international economics, labour economics, and public economics. Candidates must enrol in ECON4102, ECON4103 and ECON4104 to complete the honours year.

## ECON4102

#### Economics as a Social Science

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Frank Stilwell **Session:** Semester 1, Summer Main **Classes:** 2 lectures and 1 tutorial per week **Assessment:** Tutorial participation; mini essay; essay; 1 1/2 hour final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program, UG Summer/Winter School.

Economic concerns are central to modern society and politics. Yet economists are deeply divided in their views about how the economy works and how it could be made to work better. This unit of study explores the principal competing currents of economic thought - classical, neo-classical, institutional, Marxian and Keynesian. It looks at how these rival economic theories influence views about economic policy and the future of capitalism. This provides a solid foundation for subsequent study of economics and political economy.

*Textbooks*

F. Stilwell, Political Economy: the Contest of Economic Ideas (Oxford U.P.)

### ECOP1003

#### International Economy and Finance

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr B. Dunn **Session:** Semester 2 **Classes:** 2 lectures and 1 tutorial per week **Assessment:** Tutorial participation; tutorial presentation, essay, 1 1/2 hour final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

The world economy has changed dramatically since World War 2, especially with the renewed 'globalisation' from the 1980s. This unit traces the historical patterns of globalisation. It analyses the debates about whether globalisation has been for the better or worse overall, and who would have been the winners and the losers in this process. The unit explores the changing theories that have been used to explain and evaluate global economic integration. The unit concurrently explores the forms of, and debates about, the regulation of economic activity on a global scale, addressing the development and changing roles of states and international agencies (World Bank, International Monetary Fund, World Trade Organisation), and evaluates their capacity to generate global equity and economic stability.

### ECOP1004

#### Economy and Society

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr D Cahill **Session:** Semester 2 **Classes:** 2 lectures and 1 tutorial per week **Assessment:** tutorial participation; mini essay; essay; 1 and 1/2 hour examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit examines the processes by which economic activity is embedded within a broader social structure. Attention is given to the key institutions that channel economic activity, the processes by which capitalist markets are regulated, and the distinctive features of capitalist economies. The subject is organised around a range of conceptual tools which elaborate these themes, followed by analysis of particular case studies that illustrate the social constitution, dynamics and regulation of particular markets.

### ECOP2011

#### Economics of Modern Capitalism

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr J Halevi **Session:** Semester 1 **Classes:** 2 lectures and 1 tutorial per week **Prerequisites:** ECOP1001 and either (ECOP1002 or ECOP1003) **Prohibitions:** ECOP2001 **Assessment:** Tutorial participation and presentation; Essay; 1 and 1/2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit of study considers the economic foundations of modern capitalism. It explores the central concerns in political economy by looking at classical, Marxian, neo-Marxist and post-Keynesian theories and their applications. It thereby illuminates the connections between the production of goods and services, the distribution of income and economic growth.

### ECOP2012

#### Social Foundations of Modern Capitalism

#### Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 lectures and 1 tutorial per week **Prerequisites:** ECOP1001 and either (ECOP1002 or ECOP1003)

**Prohibitions:** ECOP2002 **Assessment:** Essay; Tutorial presentation/participation; 1 and 1/2 hour examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

Economic activity is 'embedded' within a broader social structure. So it is necessary to understand the institutional fabric by which the economy is constructed. This unit looks at the institutions of capital, labour, the family and the state that channel economic activity and the importance of class and other social struggles in the historical transformations of those institutions. It examines how governments respond to the imperatives for economic and social order and how the state acts to regulate institutions, and socio-economic relations, to establish stability and maintain capital accumulation. Several illustrative case studies and policy areas are studied.

## ECOP2911

### Political Economy Honours II

#### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** Credit average in ECOP1001 and (ECOP1002 or ECOP1003) **Corequisites:** ECOP2011 or ECOP2012 **Prohibitions:** ECOP2901 **Assessment:** Seminar presentation; Seminar paper; Seminar participation; Seminar questions; Good Society paper; Essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S.

This unit of study introduces students to some of the big debates in the social sciences, through an exploration of the meaning and limits of class concepts in social theory. Structure and agency, fact and interpretation, the politics of theory, and the nature of the Good Society are all considered. The unit is both an enrichment program adding breadth to the range of issues you study in Pass units of study, and an advanced program adding depth to your analytical and writing skills in Political Economy, in preparation for a third year studies and for a final honours year.

## ECOP3012

### Global Political Economy

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr B Dunn **Session:** Semester 1 **Classes:** 2 lectures and 1 tutorial per week **Prerequisites:** ECOP1001 and either (ECOP1002 or ECOP1003) **Prohibitions:** ECOP3002 **Assessment:** Presentation; Group Report; Essay; Participation; 1 and 1/2 hour examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit of study presents a historical and institutional perspective on the development of the capitalist world economy since 1945. The analysis starts with a historical and theoretical introduction covering the determinants of profits and accumulation and the role of external markets in economic growth. It then addresses two key issues in this development: including: the formation of the international monetary system and its crisis following the end of the long boom; and the global role of the United States and the formation of two growth poles: Germany in Europe and Japan in Asia.

## ECOP3014

### Political Economy of Development

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr S Engel **Session:** Semester 2, Summer Main **Classes:** 2 lectures and 1 tutorial per week **Prerequisites:** ECOP1001 and either (ECOP1002 or ECOP1003) **Prohibitions:** ECOP3004 **Assessment:** Class participation; Minor Essay; Research essay; 1 and 1/2 hour examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program, UG Summer/Winter School.

This unit of study deals with the structural and cultural problems of poorer countries, and their post-colonial experiences. Students are introduced to particular theories explaining economic growth and the obstacles to development. These theories are applied to a range of contemporary issues in developing countries, such as industrialisation, structural adjustment and poverty, human rights, gender, the role of NGOs, development assistance and credit and debt. Case studies include current development issues in countries including India, Cuba and East Timor.

## ECOP3015

### Political Economy of the Environment

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr S Rosewarne **Session:** Semester 1, Summer Late **Classes:** 2 lectures and 1 tutorial per week **Prerequisites:** ECOP1001 and either (ECOP1002 or ECOP1003) **Prohibitions:** ECOP3005 **Assessment:** Group/individual project; Essay; 1 and 1/2 hour examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program, UG Summer/Winter School.

This unit of study critically examines the environmental foundations of the political economy. Two dimensions are explored: how economists and political economists theorise economic interactions with the environment; and how environmental problems emerge and are managed within the capitalist political economy. Attention is given to developing theories of environmental economics, ecological

economics and range of radical critiques of human interactions with ecological systems. Individual environmental concerns are explored through a series of workshops that focus on the nature of the problems, policy prescriptions and the forces shaping particular environmental management strategies.

### ECOP3017

#### Political Economy of Human Rights

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr T Anderson **Session:** Semester 1 **Classes:** 1 x 2 hr lecture and 1 tutorial per week **Prerequisites:** ECOP1001 and either (ECOP1002 or ECOP1003) **Prohibitions:** ECOP3007 **Assessment:** Class participation; Minor Essay; Research Essay; 1 and 1/2 hour examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

Debates about human rights and democratic legitimacy are linked to structural economic arguments and to cultural and structural debates over the process of socioeconomic change. This unit of study introduces the competing arguments over rights, the distinction between formal and effective rights and the social struggles that have created them. The approach of economic liberalism, emphasising property rights and the role of competition as an arbiter of equal opportunities in society, is discussed. Similarly, a rights analysis of market regulation and social and corporate welfare is pursued, with international and domestic case studies. The unit also includes discussions on indigenous rights and labour rights, the globalisation of capital and citizenship, and structural and cultural arguments over the nature of socioeconomic change.

### ECOP3019

#### Finance: Volatility and Regulation

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof R Bryan **Session:** Semester 2 **Classes:** One 2 hour lecture and 1 hour tutorial per week **Prerequisites:** ECOP1001 and either (ECOP1002 or ECOP1003) **Prohibitions:** ECOP3009 **Assessment:** Long essay, Short essay, 1 and 1/2 hour examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

Foreign exchange, international bond and derivative markets have expanded dramatically over the past 20 years. This unit of study examines reasons for the growth of these markets and their vulnerability to some form of volatility and crisis. Case studies of individual corporate financial crises and national financial crises are considered. The unit also addresses the regulation of financial markets, both on a national and international scale. It looks at the history of regulation, key regulatory and monitoring agencies, and arguments for a new international financial architecture.

### ECOP3620

#### Distribution of Income and Wealth

##### Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** One 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** ECOP1001 and either (ECOP1002 or ECOP1003) **Assessment:** mini essay, essay, tutorial participation, 1 and 1/2 hour examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

The distribution of income and wealth is unequal in all nations, but the extent of inequality varies. What determines the size of these disparities? How have they changed over time? How do governments influence the distribution of income and wealth? Are alternative economic policies feasible? This unit explores how political economic analysis can be applied to the study of these issues of economic inequality.

### ECOP3911

#### Theories in Political Economy

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** One 2 hour class per week **Prerequisites:** Credit average in 4 intermediate or senior ECOP units including (ECOP2911 or (ECOP2901 and ECOP2902)) **Prohibitions:** ECOP3901 **Assessment:** Seminar presentation; Essay; Class participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Third year students who have not completed the prerequisites should consult the Department of Political Economy about alternative requirements.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S.

This unit of study looks at the various theoretical frameworks within which political economic analysis is constructed. It compares the methodologies of the principal schools of economic thought with particular emphasis on the non-neoclassical approaches to the study of economic issues. The unit is required preparation for intending honours students but is also available to pass students with a credit average in previous units.

### ECOP3912

#### Research in Political Economy

##### Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** One 2 hour class per week **Prerequisites:** Credit average in 4 intermediate or senior ECOP units including (ECOP2911 or (ECOP2901 and ECOP2902)) **Prohibitions:** ECOP3902 **Assessment:** Seminar participation; Epistemology paper; Evidence paper; Research plan. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Third year students who have not completed the prerequisites should consult the Department of Political Economy about alternative requirements.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S.

This unit considers the variety of research methods that can be used in Political Economy. Discussion of methodology is a principal focus. Practical consideration is also given to research materials, bibliographical access, quantitative methods, surveys and fieldwork. This is important preparation for students intending to do an honours dissertation, but the unit is also available to pass students with a credit average in previous units.

### ECOP4001

#### Political Economy Honours A

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Assoc Prof R Bryan **Session:** Semester 1, Semester 2 **Prerequisites:** (ECOP2911 or (ECOP2901 and ECOP2902)) and (ECOP3911 or ECOP3901) and (ECOP3912 or ECOP3902) and (ECOP2011 or ECOP2001) and (ECOP2012 or ECOP2002) plus two other

senior level ECOP units. Students who do not meet this requirement may apply to the honours coordinator for a waiver to permit their entry to honours.  
**Corequisites:** ECOP4004, ECOP4003 **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Soc Sc)(Hons), B Int S (Hons).

All students are required to undertake a 20,000 word dissertation and coursework during their final honours year. The dissertation is on a topic of each student's own choice, subject to staff approval: the dissertation proposal is normally developed during the preceding year of studies in Political Economy honours. The coursework requirement is two semester-length units. Students may choose one of these units from among those on offer in other programs in another department, subject to the agreement of the relevant discipline and the Director of the Political Economy honours program.

### Intermediate Microeconomics

#### Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Main **Classes:** 1 x 2hr lecture and 1 tutorial hour per week **Prerequisites:** ECON1001 **Corequisites:** ECMT1010 **Prohibitions:** ECON2001, ECOS2901, ECON2901 **Assessment:** Tutorials, 2 in-class tests, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Certain combinations of Maths/Stats may substitute for Econometrics - consult the Chair of the Discipline of Economics.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

The aim of Intermediate Microeconomics is the development of theoretical and applied skills in economics. It covers applications and extensions of the theory of consumer choice, firm behaviour and market structure. Emphasis is given to the economics of information and choice under uncertainty; industry structures other than monopoly and perfect competition; markets for factors of production; general equilibrium and economic efficiency; market failure and the role of government. This unit provides a basis for the more specialised options that comprise third year economics.

## ECOS2002

### Intermediate Macroeconomics

#### Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Main **Classes:** 1 x 2hr lecture and 1 tutorial hour per week **Prerequisites:** ECON1002 **Corequisites:** ECMT1020 **Prohibitions:** ECON2002, ECOS2902, ECON2902 **Assessment:** 1 Mid Semester exam, Final exam, Assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Certain combinations of Maths/Stats may substitute for Econometrics - consult the Chair of the Discipline of Economics.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

This unit of study develops models of the goods, money and labour markets, examines issues in macroeconomic policy. Macroeconomic relationships, covering consumption, investment, money and employment, are explored in detail. Macro-dynamic relationships, especially those linking inflation and unemployment, are also considered. Exchange rates and open economy macroeconomics are also addressed. In the last part of the unit, topics include the determinants and theories of economic growth, productivity and

technology, the dynamics of the business cycle, counter-cyclical policy and the relationship between micro and macro policy in the context of recent Australian experience.

### ECOS2201

#### Economics of Competition and Strategy Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2hr lecture and 1 tutorial hour per week **Prerequisites:** ECON1001, ECON1002 **Prohibitions:** ECON2201, ECOS3005 **Assessment:** 2 mid-semester exams, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

This course introduces new and comprehensive methods for the analysis and formation of business strategy. The unit analyses strategies for developing competitive advantages, including product differentiation, cost advantages and product life cycles; implementing incentives, control, firm boundaries, and internal firm decision-making mechanisms; implementing pricing, auction and signalling practices; assessing industry attractiveness and the regulatory/trade practices environment; and managing industry cooperation and conflict. Students are taught a set of tools that they can bring to bear on new problems. Understanding competitive dynamics and strategic thinking are emphasised. Case studies and problem-solving form an important part of the teaching method.

### ECOS2306

#### Managerial Firms: Evolution & Attributes Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2hr lecture and 1 tutorial hour per week **Prerequisites:** ECON1001, ECON1002 **Prohibitions:** ECHS2306, ECOS3003, ECON3003 **Assessment:** mid semester tests, assignment, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

The large managerial firm, operating in a number of product and geographic markets and controlled by managers rather than owners, plays a major role in modern economies. Although it is now being challenged by new institutions such as LBOs and strategic alliances, the large managerial firm is itself a recent phenomenon which only began to emerge in the 1880s. This unit of study analyses the development of the large managerial firm since the 1880s, distinguishing between firms in standardised mass production industries and those in industries where technology has changed rapidly since the 1970s. It also distinguishes between managerial firms that emerged in the West with those in Japan. In analysing the attributes of managerial firms in different regimes, the unit focuses on two main issues: the nature of corporate competencies, and the role of imperfect information within managerial firms and markets, alliances, and networks. The unit includes detailed analysis of case studies drawn from the USA, Australia, and Japan.

### ECOS2551

#### Economics Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

### ECOS2552

#### Economics Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

### ECOS2901

#### Intermediate Microeconomics Honours Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2hr lecture and one tutorial per week **Prerequisites:** ECON1001 and ECON1002 with a Credit average or better in the two units of study combined **Corequisites:** ECOS2903 and ECMT1010 **Prohibitions:** ECON2901, ECOS2001, ECON2001 **Assessment:** 2 mid semester exams, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Certain combinations of Maths/Stats may substitute for Econometrics. Consult the Chair of the Discipline of Economics.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

This unit is comprised of lectures based upon the curriculum for ECOS2001 Intermediate Microeconomics, supported by a seminar for one hour a week. The content of lectures reflect a more analytical and critical treatment of the topics than ECOS2001. The topics, which build on the theory of consumer and firm behaviour and market structure, include game theory, oligopoly, general equilibrium and welfare, externalities and public goods and the economics of information.

### ECOS2902

#### Intermediate Macroeconomics Honours Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2hr lecture and 1 tutorial hour per week **Prerequisites:** ECON1001 and ECON1002 with a Credit average or better in the two units of study combined **Corequisites:** ECMT1020 **Prohibitions:** ECON2902, ECOS2002, ECON2002 **Assessment:** Assignments, mid semester exam, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Certain combinations of Maths/Stats may substitute for Econometrics. Consult the Chair of the Discipline of Economics.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

This unit is comprised of lectures based upon the curriculum for ECOS2002 Intermediate Macroeconomics, supported by a seminar for one hour a week. The content of lectures reflects a more intensive treatment of the topics than ECOS2002. Topics covered include: models of the goods, money and labour markets; macro-economic relationships such as consumption, investment, demand for money and labour demand and supply; macro-dynamic relationships, especially those linking inflation and unemployment; exchange rates and open economy macroeconomics; theories of economic growth; productivity and technological change; the dynamics of the business cycle; and the relationship between micro- and macro-economic policy.

### ECOS2903

#### Mathematical Economics A Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2hr lecture and 1 tutorial hour per week **Corequisites:** ECOS2901 **Prohibitions:** ECON2903 **Assessment:** Problem sets/quizzes, 1 mid semester exam, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, B Res Ec.

This unit provides an introduction to mathematical techniques commonly employed by economists. Topics include: limits, continuity, differentiation of single- and multi-variable functions, unconstrained and constrained optimisation.

### ECOS3001

#### Capital and Growth Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** One of (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) or (ECOP2011 or ECOP2001) and one of (ECOS2002 or ECON2002) or (ECOS2902 or ECON2902) or (ECOP2012 or ECOP2002) **Prohibitions:** ECON3001 **Assessment:** 2 mid semester exams,

Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

This unit is an introduction to economic growth including its causes and consequences. The role of capital, technological progress, and other determining factors of the development of economies are studied from the point of view of alternative economic theories. The potential effects of growth and structural change on welfare, income distribution, and employment are looked at in the same contexts with some consideration of the empirical evidence. The role of alternative economic policies and economic institutions in promoting growth is also discussed.

### ECOS3002

#### Development Economics Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** One of (ECOS2001 or ECON2001) or (ECOS2002 or ECON2002) or (ECOS2901 or ECON2901) or (ECOS2902 or ECON2902) **Prohibitions:** ECON3002 **Assessment:** 2 in-class tests, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

This unit examines the role of the state, rationale for planning and market mechanisms in developing economies, and also the sociocultural preconditions and economic requirements for a market economy. It focuses on a wide range of developmental problems and issues from both microeconomic and macroeconomic points of view. It closely studies the integration process of the traditional segment of a developing society into its modern counterpart in countries selected from Asia, Africa, Latin America, the Caribbean, and the Pacific regions.

### ECOS3003

#### Hierarchies, Incentives & Firm Structure Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** Either (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) **Prohibitions:** ECON3003 **Assessment:** 2 mid-semester exams, Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

This unit deals with the coordination and motivation problems faced by firms. More specifically this unit examines: whether firms use price or command mechanisms to allocate resources within firms; the problems associated with designing incentive contracts; the principles of efficient contract design and; the real world applications of those principles. The final section deals with the manner in which the coordination and motivation problems faced by firms determines their financial, vertical and horizontal structure.

### ECOS3004

#### History of Economic Thought Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** 1 of (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) or (ECOS2002 or ECON2002) or (ECOS2902 or ECON2902) or (ECOP2011 or ECOP2001) or (ECOP2012 or ECOP2002) **Prohibitions:** ECON3004 **Assessment:** Essay, 1 mid semester exam, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

Where do the current beliefs - theories, doctrines, postulates and attitudes - of modern economics come from? If current theories and doctrines have a definite historical beginning, what schools of thought

did they supplant? Are there alternative or dissident views which subsisted alongside mainstream economics in the twentieth century - and if so, what are they and where did they originate from? This unit seeks to answer these questions, as well as others. It provides an overview of the development of economic ideas from the seventeenth to the twentieth century, combined with a more intensive focus on the thought of certain key figures in that history. The particular topics covered include: the formation of economics to 1776; Adam Smith; classical economics from Smith to J.S. Mill; the rise of marginalist economics; John Maynard Keynes; and orthodox and heterodox currents in twentieth century economics.

### ECOS3005

#### Industrial Organisation Economics and Business

**Credit points:** 6 **Session:** Semester 2, Summer Main **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** One of (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) **Prohibitions:** ECON3005, ECOS2201 **Assessment:** 1 Mid semester exam, final exam, problem sets **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

This unit of study examines the nature of inter-firm rivalry in industries with market power. It explores the various ways in which firms can increase their market power by: extracting more surplus from consumers, by colluding with rivals or by excluding entrants. The unit also analyses the international competitiveness of industries in the context of industry assistance and the prevalence of foreign multinationals. Competition policy is also discussed.

### ECOS3006

#### International Trade Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** Either (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) **Prohibitions:** ECON3006 **Assessment:** 1 Mid semester exam, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

This unit of study provides a systematic analysis of the theory of international trade and trade policy. Initially differences between countries are emphasised as the source of trade and the gains from trade. Models that are examined include the Classical-Ricardian model, the Heckscher-Ohlin model and the Specific-Factors model. Next economics of scale and imperfect competition are introduced as sources of trade and gains from trade. The unit concludes with an examination of empirical studies aimed at testing trade theories. The analysis of trade policy begins with a discussion of the instruments of trade policy, in particular, tariffs and quotas and their effect on welfare. This discussion is then extended to the case of imperfect competition and strategic trade policy.

### ECOS3007

#### International Macroeconomics Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** One of (ECOS2002 or ECON2002) or (ECOS2902 or ECON2902) **Prohibitions:** ECON3007 **Assessment:** Assignments; 1 Mid-semester exam; Final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

This unit studies macroeconomic theory and policy in a global trading world. The microfoundations of the various sectors are examined in the context of an open economy. The evolution of international money and capital markets is described, the operation of the foreign exchange market is examined, showing how its microstructure affects its macro

performance. Theories and tests of the efficiency of international capital markets are surveyed, as well as core theories and tests of exchange rate and asset price determination. The unit develops the macroeconomic implications of monetary and fiscal policies for small and large open economies for different regimes.

### ECOS3008 Labour Economics Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** One of (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) or (ECOP2011 or ECOP2001) and one of (ECOS2002 or ECON2002) or (ECOS2902 or ECON2902) or (ECOP2012 or ECOP2002) **Prohibitions:** ECON3008 **Assessment:** 1 Essay, mid-semester exam, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

This unit aims to provide an understanding of labour markets and related issues such as work conditions, pay and employment levels. Labour supply and demand, theories of wage determination, labour mobility and discrimination are examined. It also analyses the role of trade unions and labour market contracts. These topics are applied to current issues in Australian labour markets such as enterprise bargaining, the role of centralised wage fixing systems, training and other labour market programs. Policies designed to improve the functioning of the labour market are examined and particular attention is given to the problem of persistent unemployment.

### ECOS3010 Monetary Economics Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** one of (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) or (ECOS2002 or ECON2002) or (ECOS2902 or ECON2902) **Prohibitions:** ECON3010 **Assessment:** 1 Multiple choice exam, written paper, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

This unit provides an overview of the main elements of monetary economics, with emphasis upon macroeconomic issues - analysis of economic processes in which money enters the picture in an essential manner. The content primarily concerns economic principles and theory, but there is also considerable focus on the Australian monetary system and monetary policy in particular. The particular topics covered include: functions of money; the concept of 'liquidity'; money demand; determinants of money supply changes; financial crises and the 'lender of last resort' function of central banking; the Reserve Bank of Australia and the Australian Prudential Regulation Authority; term and risk structures of interest rates; alternative theories of the level of the rate of interest; the monetary policy transmission mechanism; monetary policy instrument choice; central bank credibility; policy reaction functions; the global monetary system; and Reserve Bank market operations.

### ECOS3011 Public Finance Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** Either (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) **Prohibitions:** ECON3010 **Assessment:** 1 mid semester exam, 1 essay, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

Public Finance is about the taxing and spending decisions of governments. The unit covers a wide range of public finance topics. After an introduction to welfare economics and the role of government in the economy, the unit focuses on the revenue side of the budget:

tax incidence, efficient and equitable taxation, the Australian system of revenue raising, issues of tax reform and the theory and practice of public utility pricing. It then focuses on the expenditure side of the government budget: public goods, externalities, and programs aimed at redistribution. It also introduces techniques of policy evaluation.

### ECOS3012 Strategic Behaviour Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** Either (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901). **Prohibitions:** ECON3012, ECOS3901 **Assessment:** 1 mid semester exam, online quizzes, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

To think and act strategically, one needs to evaluate the effect of one's actions on the actions of others. As most economic decisions are strategic, such as the decision to lower a price or introduce a new tax, economics, if it is to avoid simplistic models, requires a theoretical framework capable of illuminating strategic behaviour. This unit offers a comprehensive, critical introduction to the theory which purports, not only to satisfy this theoretical need, but also potentially to unify the social sciences: game theory. After examining important concepts of game theory, the unit investigates the repercussions for the theory of bargaining and for the evolution of social institutions.

### ECOS3016 Experimental and Behavioural Economics Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** ECOS2001 (or ECON2001) OR ECOS2901 (or ECON2901) **Assessment:** Assignments; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Com (Liberal Studies), B Ec, UG Study Abroad Program.

Experimental economics uses experimental methods to evaluate the performance of economic models, institutions and policies. Behavioural economics combines experimental and field evidence with insights from neighbouring disciplines such as psychology, to develop richer economic models of decision-making. This unit will develop the key research methods and major findings of each of these fields, and explore both theoretical and practical implications. Students will read a number of seminal research papers in both experimental and behavioural economics, and will have opportunities to participate in classroom experiments, to analyse experimental data, and to design and program their own research projects.

### ECOS3017 Health Economics Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** ECOS2001 (or ECON2001) OR ECOS2901 (or ECON2901) **Assessment:** Two in-class tests; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Com (Liberal Studies), B Ec, UG Study Abroad Program.

The purpose of this course is to introduce the student to the methods of health economics and demonstrate how these methods can be applied to analyse issues in health policy and management. This course will teach the student to use economic analysis to understand critical issues in health care and health policy. Topics covered include the institutions of the Australian system of health care and health statistics, evaluation techniques, production of health, demand for health care and technology, moral hazard and adverse selection in health insurance markets, health labour markets, including physician-patient interactions, managed care, regulation and payment systems for providers, comparative health systems, the pharmaceutical industry, health policy and social insurance.

## ECOS3020

### Special Topic in Economics Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** ECOS2001 (or ECON2001) and ECOS2002 (or ECON2002) OR ECOS2901 (or ECON2901) and ECOS2902 (or ECON2902) **Assessment:** Assignments, 1 mid semester exam, final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

Study of a special topic in Economics. Topics will vary from semester to semester according to staff availability and the presence of visitors. If taught in both semesters, the topic in Semester 2 will be different to that of Semester 1.

## ECOS3551

### Economics Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Prerequisites:** ECON1001 and ECON1002 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

Students wishing to undertake a Study Abroad program must enrol in this unit to receive credit for a unit equivalent to an ECON2000-level subject

## ECOS3552

### Economics Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Prerequisites:** ECON1001 and ECON1002 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

Students wishing to undertake a Study Abroad program must enrol in this unit to receive credit for a unit equivalent to an ECON2000-level subject

## ECOS3553

### Economics Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Prerequisites:** ECON1001 and ECON1002 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

Students wishing to undertake a Study Abroad program must enrol in this unit to receive credit for a unit equivalent to an ECON2000-level subject

## ECOS3554

### Economics Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Prerequisites:** ECON1001 and ECON1002 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

Students wishing to undertake a Study Abroad program must enrol in this unit to receive credit for a unit equivalent to an ECON2000-level subject

## ECOS3901

### Advanced Microeconomics

## Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** (ECOS2901 or ECON2901) and (ECOS2902 or ECON2902) and (ECOS2903 or ECON2903) with a Credit average or better over the three units combined. **Corequisites:** ECMT2110 or ECMT2010 **Prohibitions:** ECON3901, ECOS3012 **Assessment:** Mid semester exam; final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: NOTE: Students intending to proceed to fourth year economics honours must also complete at least one unit of study from (ECOS3001 or ECON3001) to (ECOS3015 or ECON3015) inclusive*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

ECOS3901 Advanced Microeconomics is the second course in the microeconomics sequence in the Economics Honours program. The goal of the course is to provide a working knowledge and understanding of the most powerful methods of analysis and discourse in modern microeconomic theory. We build on the foundations of ECOS2901 and ECOS2903 to continue progress toward the frontier of microeconomics.

## ECOS3902

### Advanced Macroeconomics Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** (ECOS2901 or ECON2901), (ECOS2902 or ECON2902), (ECOS2903 or ECON2903) and (ECOS3901 or ECON3901) **Corequisites:** ECOS3903 **Prohibitions:** ECON3902 **Assessment:** Mid semester exam; final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: NOTE: Students intending to proceed to fourth year economics honours must also complete at least one unit of study from (ECOS3001 or ECON3001) to (ECOS3015 or ECON3015) inclusive*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, B Res Ec.

ECOS3902 Advanced Macroeconomics is a third year honours course in macroeconomics. Its main objective is to develop a framework for thinking about macroeconomic questions. This course is designed for the students enrolled in the Economics Honours stream. ECOS2901, ECOS2902, ECOS2903 and ECOS3901 are prerequisites and the corequisite is ECOS3903, unless you have received an exemption from it.

## ECOS3903

### Applied Economics Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 2 hr lecture per week and 1 tutorial hour per fortnight **Prerequisites:** ECOS2901 (or ECON2901), ECOS2902 (or ECON2902) and ECOS2903 (or ECON2903) **Corequisites:** ECMT2110 and ECOS3901 or ECOS3902 **Assessment:** Assignments, mid semester exam, final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is compulsory for students intending to proceed to fourth year honours.*

**Associated degrees:** B A, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit is designed to provide students with estimation techniques frequently used in applied microeconomics. It will mainly cover cross section and panel data methods. Various empirical topics in labour economics, international trade, etc., will be discussed.

## EDBT5000

### International Curriculum Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Nigel Bagnall **Session:** Semester 1 **Classes:** 36 hours: 4 hours/week for 9 weeks **Prerequisites:** 144 credit points including 78 credit points of Education **Corequisites:** EDSE5008 and (EDGU2000 and EDGU3000) or EDSE5010 **Assessment:** Assessment will be based on two assignments: (i) a 3000 word curriculum-focused activity, (ii) peer critique/reflection and workshop paper, including workshop participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Teach, PG Coursework Exchange.

This unit of study is designed to meet the needs of prospective teachers of internationally recognised senior secondary school curriculum particularly the International Baccalaureate, and those who aspire to teach in educational jurisdictions outside Australia.

The unit is designed to enable students to develop a knowledge and understanding of: the nature and role of international curricula in the education of secondary school children; international benchmarks in secondary school education; the role of the International Baccalaureate in secondary education in Australia and internationally, teaching and learning for the International Baccalaureate (IB) and other international curricula including Advanced Placement (AP) and Scholastic Aptitude Test (SAT), assessment and evaluation for the International Baccalaureate.

### EDBT5500

#### Introduction to Teaching and Learning Education and Social Work

**Credit points:** 7 **Teacher/Coordinator:** Dr Louise Sutherland **Session:** S1 Intensive, Semester 1 **Assessment:** 1 x 2000 wd essay and 2 x 2500 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study provides an introduction to issues concerning teaching, learning, the curriculum and the social and institutional context of education. It is organised into two themes: examining teaching as a profession and Learning and Schools. This unit provides the theoretical and contextual framework for the other units of study in this program by providing students with opportunities for critical reflection on the nature and purpose of schools, schooling and the educational process in general.

### EDBT5501

#### Information Technology in Education Education and Social Work

**Credit points:** 3 **Teacher/Coordinator:** Vilma Fyfe **Session:** S1 Intensive, Semester 1 **Classes:** large group lectures 3 x 1hr. Tutorials 8 x 1.5 hrs. **Assessment:** 1 assignment, 1 practical examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This course focusses on the instructional designer's task and is motivated by the need for future teachers to be able to analyse student needs for IT support in specific curriculum areas, plan for ICT use in the classroom, choose from available alternatives, configure ICT in supporting specific learning activities, manage the IT enriched classroom and critically evaluate their practice.

### EDBT5502

#### Teachers and Learners in Schools Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Nicole Brunner **Session:** S2 Intensive, Semester 2 **Classes:** seminar 2 hrs per wk x 8 wks, large grp lec 2 hrs per wk x 8 wks **Prerequisites:** EDBT5500 **Corequisites:** EDBT5503 **Assessment:** 1 x 1500 wd essay and 1 x 3000 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is divided into two themes: Managing the Learning Community and Enhancing the Learning Community, which are separated by the first professional experience block session. The first theme focuses on preparation for your work as a teacher in a classroom. The second section provides opportunities to begin to refine your practice by critical reflection on your teaching experiences, through the writing on your teaching experiences, and through the writing and subsequent discussion of case stories or narratives.

### EDBT5503

#### Professional Experiences 1

### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Di Bloomfield/Dr Tony Loughland **Session:** Semester 1, Semester 2 **Classes:** block session (25 days) **Prerequisites:** EDBT5500 AND one of: EDBT5602, EDBT5604, EDBT5605, EDBT5606, EDBT5607, EDBT5608, EDBT5609, EDBT5610, EDBT5611, EDBT5613, EDBT5615, EDBT5617, EDBT5619, EDBT5620, EDBT5622, EDBT5623; OR EDBT5500 and EDBT5532 and EDBT5531 **Assessment:** Satisfies Requirements/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Teach.

Students undertake their first Professional Experience of 25 days in a secondary or primary school (depending on the program they are enrolled in). During the practicum students are assigned to one or more Cooperating Teachers in a single discipline area (or in Primary) and will be responsible for teaching one or more classes for a total of between 10 and 14 lesson periods per week. The Cooperating Teachers will closely support their work in the school and in discussion with the Tertiary Mentor will be responsible for writing the report on the Professional Experience that will form the basis of the assessment in the enrolled unit of study.

### EDBT5504

#### Educational Workplace Practices Education and Social Work

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B Teach.

This unit is not part of the normal program structure. It is ONLY offered as an alternate unit of study for students who have failed Professional Experiences 1, and/or intend to take out the Graduate Diploma in Professional Studies (Education).

### EDBT5530

#### Creative Arts K-6 Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Robyn Gibson **Session:** S2 Intensive, Semester 2 **Classes:** 1hr lec plus 1hr wkshp x 4 wks x 3 components **Assessment:** drama 1 x 1500wd essay (40%), music 2 x 15min lesson plan (30%) and visual arts portfolio (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The Education Act 1990 (NSW) sets out minimum curriculum requirements for primary schools. In particular, the Act states that "courses of study in both art and music are to be included in the key learning area of the Creative and Practical Arts." With the introduction of the Creative Arts K-6 Syllabus in 2000, this requirement has been broadened to include creative arts experiences in drama and dance which became mandatory in 2005. The unit of study, Creative Arts 1, provides students with an understanding of the importance of drama, music, visual arts and dance both as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right.

### EDBT5531

#### English 1 K-6 Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Kathy Rushton **Session:** S1 Intensive, Semester 1 **Classes:** 1 hr lec plus 13 x 2 hr workshop **Assessment:** 3 assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B Teach, PG Coursework Exchange.

In this unit of study you will investigate the development of language in young children. The nature of the interactions between children and those around them will be considered as will the variation in those interactions. The language bases in talking and listening will be investigated, leading to particular focus on a balanced approach to learning to read and write in the early years of schooling.

## EDBT5532

### Mathematics 1 K-6

#### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Janette Bobis **Session:** S1 Intensive, Semester 1 **Classes:** 1hr lec and 8 x 1hr tut and 12 x 2hr planning and teaching tutorials **Assessment:** 2 x assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The focus for this unit is the Number, Patterns and Algebra, Data and Working Mathematically strands of the NSW K-6 Mathematics Syllabus with particular emphasis on the first three years of school. It will explore how children's mathematical thinking strategies develop via a research-based framework of number and will introduce the important connection between assessment and planning for instruction.

## EDBT5533

### Teaching in Multilingual Classrooms

#### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Theodora Lafkas **Session:** S1 Intensive, Semester 1 **Classes:** 6 x 2hrs per wk **Assessment:** 1 assignment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The goal of this course is to provide you with a foundation and a framework for the successful teaching of English as an additional language in the context of multilingual primary classrooms. The course will encourage you to make decisions about appropriate classroom strategies and methods across the curriculum; give insight into current debates within the field; and suggest a direction for future thinking.

## EDBT5534

### Human Society and its Environs K-6

#### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Tony Loughland **Session:** S1 Intensive, Semester 1 **Classes:** 13 x 1 hr lectures and 13 x 1 hr tutorials **Assessment:** 3 assessment tasks **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit will focus on the fundamental principles of the Human Society and its Environment K-6 KLA as well as theories of how children learn in a social setting. This unit will enable the students to design and critically reflect on learning experiences which are planned to achieve the aim of the NSW HSIE K-6 syllabus.

## EDBT5535

### Science and Technology K-6

#### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Louise Sutherland **Session:** S2 Intensive, Semester 2 **Classes:** 7 x 1hr lec and 8 x 2hr wkshp **Assessment:** 1 x 1500 wd essay and 1 x 2500 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed to assist you to develop skills in teaching the learning processes of Investigating, Designing and Making and Using Technology that feature in the NSW K-6 Science and Technology curriculum. Prior to your first professional experience, the focus will be on the distinctive features of the Science and Technology learning area and on planning to promote learning of science concepts and skills by investigation.

## EDBT5536

### Personal Development, Health & PE K-6

#### Education and Social Work

**Credit points:** 4 **Session:** S2 Intensive, Semester 1, Semester 2 **Classes:** 4 x 1hr lec and 12 x 2 hr wkshp **Assessment:** 2 assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Teach, PG Coursework Exchange.

In this unit you will be introduced to the KLA PDHPE. You will be encouraged to examine your own health and fitness status and explore the importance of leading a healthy lifestyle. You will be examining selected content strands from the PDHPE syllabus K-6 from the perspective of various skills, knowledge and teaching strategies necessary to teach these content strands within the context of the health promoting school.

## EDBT5537

### Special Interest Unit 1

#### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Tony Loughland **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Classes:** 3 hrs x 4 wks **Assessment:** 1 x assesment task **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Teach, PG Coursework Exchange.

There will be three special interest options offered each semester this is scheduled. In 2008 these were Koori Kids in the Classroom, Science and Technology with Toys, and Music Education.

## EDBT5538

### Honours 1

#### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Prof Gabrielle Meagher **Session:** Semester 2 **Assessment:** 1 x 2000 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit introduces Honours students to the concepts and skills they need to research and write their Special Study project in Year 2. Seminars provide an overview of the scope of educational research, including the variety of research topics and approaches to research methodology. Seminars blend exploration of conceptual and methodological material with discussion of students' own research ideas and plans. Assessment consists of an essay which aims to help students refine and situate their research question in the context of existing research in their chosen area. By the end of the unit, all students will have been matched with a Supervisor for their Special Study.

## EDBT5550

### Language Arts in Early Childhood

#### Education and Social Work

**Credit points:** 4 **Session:** Semester 1 **Classes:** 2 hrs per wk for 12 wks plus 2 observation days **Assessment:** Picture book presentation, observation task, language activities portfolio, essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study assists students to develop knowledge and skills in the language arts at the early childhood level. It assists students to gain and understanding of different theories about how young children develop language. It helps students to develop skills and knowledge about how to help young children begin to make meaning from the moment they are born through the preschool years in terms of how they learn to talk, listen and interact with those around them. There is a strong emphasis on play as a vehicle for language learning and family involvement in an inclusive and supportive learning environment for young children.

## EDBT5551

### Mathematics in Early Childhood

#### Education and Social Work

**Credit points:** 4 **Session:** Semester 1 **Classes:** 2 hrs per wk for 12 weeks plus 2 observation visits **Assessment:** Critical reflection on a reading task, assessment of child math observation task, mathematics activities portfolio, essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study assists students to develop knowledge, skills and understanding of the development of children's constructions of mathematical concepts and processes at the early childhood level. It provides students with the ability to help young children gain a beginning understanding and knowledge of mathematics and a beginning awareness of the ever-changing technological environment in which we live. Students will explore the issues of assessing children's learning needs and identifying children at risk of underachieving in mathematical understanding and skill. Students will be required to plan developmentally appropriate learning experiences that effectively employ a range of pedagogies and resources (including digital technologies) to enhance children's mathematical thinking and communication.

#### **EDBT5552**

##### **Sociocultural Learning -Early Childhood Education and Social Work**

**Credit points:** 4 **Session:** Semester 1 **Classes:** 2 hrs per wks for 12 wks plus 2 observation visits **Assessment:** Critical reflection on a reading task, observation task, social and cultural understandings activities portfolio, essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study assists students to develop knowledge and skills in the teaching of social and cultural understandings at the early childhood level. It provides students with the ability to help young children gain a beginning understanding of the social and cultural world around them in a way that makes sense to them, a beginning understanding of their membership, roles, and values as a member of the family, community, nation and world, and a beginning understanding of differences and similarities among people in the diverse, complex, always changing, and multi-cultural Australia.

#### **EDBT5553**

##### **Managing an Early Childhood Community Education and Social Work**

**Credit points:** 2 **Session:** Semester 1 **Classes:** 1 hr per wk for 12 wks plus 1 observation visit **Assessment:** Behaviour management plan, observation task **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit provides students with the ability to help guide the social behaviour of young children. Such behaviour is most often developed through the interactions these children have with their immediate environment. They learn social behaviour through interacting with their parents, siblings, peers, and early childhood teachers and caregivers. Understanding the nature of developing social behaviour and how it is influenced by the environment in which young children engage, therefore, is critical for the early childhood educator. This unit will examine the development of social behaviour, strategies for promoting positive social behaviour this challenging, the interaction between communication on behaviour, and collaboration with families and early childhood education and care providers.

#### **EDBT5554**

##### **Child Protection in Early Childhood Education and Social Work**

**Credit points:** 2 **Session:** Semester 1 **Classes:** 1 hr per wk for 12 wks plus 1 observation visit **Assessment:** Learning journal, essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study assists students to better prepare for teaching in diverse and inclusive early childhood environments especially those involving young children "at risk". This is consistent with developing in students the strategies and techniques that consider the integration of young children's needs and the creating of learning environments that foster healthy self-concepts and wellness. The unit also gives students a greater awareness of and experience with the need to recognise and respond to young children and families in need and

working with the community of child development professionals in the interests of young children and families.

#### **EDBT5555**

##### **Creative Arts in Early Childhood Education and Social Work**

**Credit points:** 4 **Session:** Semester 2 **Classes:** 2 hrs per wk for 12 wks plus 2 observation visits **Assessment:** Portfolio of Arts activities, short rationale for the imperative of the Arts in the lives of young children, observation task, essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study assists students to explore their own creativity and imagination alongside developing knowledge and skills in the Creative Arts at the early childhood level. There is a strong emphasis on play and exploring the imagination through music, visual arts, drama and dance. Observing and assessing young children's spontaneous play through immersion in the Creative Arts is an important feature of this unit. The unit also emphasises the centrality of providing rich Creative Arts experiences in early childhood settings.

#### **EDBT5556**

##### **Health and Wellness in Early Childhood Education and Social Work**

**Credit points:** 4 **Session:** Semester 2 **Classes:** 2 hrs per wk x 12 wks plus 2 observation visits **Assessment:** Critical reflection on a reading task, observation task, safety, nutrition and wellness activities portfolio, essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study assists students to develop knowledge and skills in the teaching of health, safety, nutrition, and wellness at the early childhood level. It provides students with the ability to help young children gain a beginning understanding of the world around them in a way that makes sense to them, a beginning understanding of health, safety, nutrition, and wellness behaviours and habits that will help sustain them for a lifetime. Play and family involvement are emphasised in assisting this process. This unit also provides students with the ability to plan and operate healthy and safe early childhood learning and care environments.

#### **EDBT5557**

##### **Early Childhood Prof Experience 1 Education and Social Work**

**Credit points:** 4 **Session:** Semester 2 **Classes:** 20 days **Prerequisites:** EDBT5554 Child Protection in Early Childhood EDBT5626 Teaching & Learning in Early Childhood 1 **Assessment:** Reflective journal including the planning, implementing, and evaluating of learning experiences for young children **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Teach.

This unit is the first of three that provide opportunities for students to gain teaching experience in early childhood education and care settings. It will enable students to apply the theories and strategies covered in other units of study including Teaching and Learning 1 and 2. Initially this experience will consist of observation of practices and routines of the setting, some lesson undertaking with individuals and small groups, and progress to lesson undertaking with larger or whole groups. As part of the process, students will plan and implement strategies and activities relevant to the age, stage, and needs of young children.

#### **EDBT5558**

##### **Science in Early Childhood Education and Social Work**

**Credit points:** 4 **Session:** Semester 2 **Classes:** 2 hrs per wk for 12 wks **Assessment:** Critical reflection on a reading task, observation task, science activities portfolio, essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study assists students to develop knowledge and skills in the teaching of science at the early childhood level. It provides students with the ability to help young children gain a beginning understanding

of the world around them, a beginning understanding of the physical and biological aspects of the world and the universe, and a beginning awareness of the ever-changing technological environment in which we live. An emphasis is upon play as a vehicle for learning and family involvement in an inclusive and supportive learning environment for young children.

### EDBT5559

#### Diversity & Inclusion in Early Childhood Education and Social Work

**Credit points:** 2 **Session:** Semester 2 **Classes:** 1 hr per wk x 12 wks plus 1 observation visit **Assessment:** Personal statement on diversity and inclusion, situational analysis of an early childhood setting **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit explores diversity and inclusion in early childhood settings. Class, ethnicity, culture, disability, gender, religion, and other social categories have an impact upon children's development. For the creation of inclusive classrooms, early childhood educators must have an understanding of the significance of the personal and social attributes that children bring to the setting. The establishment of positive engagement with children and families is essential in creating an inclusive environment and curriculum. This unit will explore current theories and practices surrounding diversity, social education and inclusion in the early childhood context. Throughout this unit of study students will be encouraged to examine their own beliefs and values in the consideration of the issues above, as well as others.

### EDBT5600

#### Professional Studies 2 (Options) Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1, Semester 2 **Classes:** 6 x 1hr lec; professional development option **Assessment:** 1 assessment (Sports and Education) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study consists of a teaching-related community service or professional activity which contributes to the professional development of a teacher together with a coursework addressing the nature and role of sport in the secondary school curriculum.

### EDBT5601

#### Professional Studies 1 (Options) Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1, Semester 2 **Classes:** Lectures (6 x 1 hr) Options Unit: seminars (6 x 1.5 hrs) or 1 day short courses. **Assessment:** 2 assignments: Literacy and Numeracy Across the Curriculum and Options assigned task. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Teach, PG Coursework Exchange.

The unit consists of two components: Literacy and Numeracy Across the Curriculum and an elective ('option') component. These components cover a wide range of educational, philosophical, cultural and sociological contexts and issues, including the teaching of across-curriculum issues within all subject areas that contribute to the professional development of secondary teachers.

### EDBT5602

#### Art Curriculum 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1b **Classes:** lec 2 hrs per week x 8 weeks, tut/seminar/wkshp 1hr per week x 8 wks **Assessment:** visual art reflective journal; collaborative group work; lesson plan development **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit will introduce the nature and scope of Visual Art Education within NSW and in particular the NSW Visual Art 7-10 syllabus. This is followed by a survey of existent pedagogical models of art teaching with a focus on experimental learning through practical activity. The role of reflection within authentic learning contexts will receive special emphasis in the context of the mandatory visual art syllabus. Authentic, practical activities will be utilized to contextualize and ground art education processes. Students will be introduced to organising, planning and managing learning experiences including writing lesson plans for Stages 4 and 5.

### EDBT5603

#### Art Curriculum 1 (Extension) Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1b **Classes:** lec 2hrs per wk x 8 wks, tut/sem/wkshp 1hr per wk x 8 wks **Corequisites:** EDBT5602 Art Curriculum 1 **Assessment:** visual art reflective journal; collaborative group work; unit of work Stage 5. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit aims to further explore issues and perspectives and develop skills in teaching the broad areas of Visual Arts in Stages 4 and 5. The course focuses on the teaching of art education through developing knowledge and understanding using case method teaching. This unit of study acknowledges these links and those demands and seeks to build in-depth understanding and capability in students so as to explore art based approaches in a range of materials reflecting the basic aims and objectives of the Visual Arts 7-10 syllabus.

### EDBT5604

#### Drama Curriculum 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr John Hughes/Dr Michael Anderson **Session:** Semester 1b **Classes:** block mode 2 days x 7 wks **Assessment:** 2 x 2500 wd essays **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B Teach, PG Coursework Exchange.

This course aims to prepare students for the teaching of drama in years 7-12 through the development of theory and practice. This course will mainly focus on drama in years 7-10 (stages 4 & 5). Students will explore a range of teaching,

### EDBT5605

#### Commerce/Economics Curriculum 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 1b **Classes:** 4 hrs per wk for 9 wks **Assessment:** 3 assessment tasks **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study is the first of three which aims to prepare graduates to be teachers of HSIE and Commerce/Economics. It will develop competencies and skills in lesson planning, programming and pedagogy in HSIE teaching. An understanding of the NSW Board of Studies Years 7-10 Commerce Syllabus will be developed and students will develop lesson plans, programs, teaching resources and a range of teaching materials. There will be an emphasis on ICT throughout.

### EDBT5606

#### Computer Studies Curriculum 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1b **Classes:** 3 hr x 8 wks lec/tut/seminars **Assessment:** 3 x 2000 wd essays **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study focuses on the teaching of the NSW Computing Studies syllabus from 7 - 12. The main focus is on design issues and problem solving and on introducing hardware versus software, input

and output, data, using interfaces, instructions, errors, testing and otherwise viewing a computer system.

### EDBT5607

#### English Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Jowen Hillyer **Session:** Semester 1b **Classes:** 1 x 3hr seminar and 1 lec per wk x 8 wks **Assessment:** 2 x assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study is the first in a suite of curriculum methodology units designed to equip you to teach secondary English 7-12. This unit will introduce you to the principles of teaching and learning in subject English, develop your understanding of the theories underpinning the secondary English syllabus documents and raise your awareness of the debates and issues relevant to teaching Secondary English.

### EDBT5608

#### Geography Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 1b **Classes:** 4 hrs per wk for 8 wks **Assessment:** 3 assessment tasks **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study is the first of three which aims to prepare graduates to be teachers of HSIE and Geography. It will develop competencies and skills in lesson planning, programming and pedagogy in HSIE teaching. An understanding of the NSW Board of Studies Years 7-10 Geography Syllabus will be developed and students will develop lesson plans, programs, teaching resources and a range of teaching materials. There will be an emphasis on ICT throughout.

### EDBT5609

#### History Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Tim Allender **Session:** Semester 1b **Classes:** 8 x 1hr lec and 8 x 1hr sem and 8 x 2hr sem **Assessment:** 1 x 2500 wd essay, 2 x 500 wd teaching strategies, 1 x 2500 wd unit of work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to prepare graduates in the theory and practice of teaching history in the secondary school. Students will investigate the nature and purpose of history teaching and learning as well as human society and its environment education across years 7-10. The unit draws on current research, thinking and practice in the field of history education and relates to the realities of history teachers' work and instruction.

### EDBT5610

#### Classical Hebrew & Judaism Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Brian Conyer **Session:** Semester 1b **Classes:** 4 hrs per wk for 9 wks (36 hours) **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 plus 12 Credit points of senior Classical Hebrew or 12 credit points of senior Jewish Civilisation, Thought and Culture **Assessment:** Assessment will consist of lesson plans, Unit of study and Reflective Journal and Resource Folder **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Teach.

This unit of study is the first in a series for students who intend to teach Jewish Studies in Stages 4-5, and corresponds to the Tanakh option in the Board of Studies Years 7-10 Hebrew Syllabus. The unit develops foundational skills for classroom teaching of Judaism. The unit also introduces students to the socio-historic development of Jewish education in Australia, providing an understanding of local context.

### EDBT5611

#### Languages Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 1b **Classes:** 1hr lec per wk x 8 wks and 2hr sem per wk x 8 wks **Assessment:** 1 x 1500 wd essay and 1 x 750-1000 wd portfolio and 3 x 500-1000 wd lesson plans. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed to build pre-service language teachers' awareness, skills and understandings in languages education, to guide and prepare them for School Experience 1. Students will gain broad understandings about the nature and scope of teaching languages education in the New South Wales context, about traditional and more contemporary and innovative classroom practices and particular aspects of policy and Board of Studies documentation.

### EDBT5612

#### Languages Curriculum 1 (Additional)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harborn **Session:** Semester 1b **Classes:** lec 1hr per wk x 9 wks **Corequisites:** EDBT5611 Languages Curriculum 1 **Assessment:** 1 x 1200 wd essay and 1 x 750-1000 wd portfolio and set of 3 lesson plans x 500-1000 wds **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed for pre service language teachers with an additional language other than English. The unit will continue to build pre service language teachers awareness, skills and understandings in languages education, to guide and prepare them for School Experience 1.

### EDBT5613

#### Mathematics Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 1b **Classes:** tut/sem/wkshp 2 x 1.5 hrs per wk x 8 wks **Assessment:** 1 x 3000 wd group project and 1 x 3000 wd individual project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The aim of this unit of study is to introduce students to the teaching of mathematics in years 7-10 for double and single mathematics method. Particular aspects of the teaching and learning of mathematics will be addressed including a detailed examination of the place of mathematics in the Australian school curriculum.

### EDBT5614

#### Mathematics Curriculum 1 (Extension)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 1b **Classes:** tut/sem/wkshp 1 x 3hrs per wk x 8 wks **Corequisites:** EDBT5613 Mathematics Curriculum 1 **Assessment:** 1 x 2500 wd assignment and 1 x 3500 wd assignment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This is the second curriculum unit offered in semester 1 for students doing double mathematics method. This unit of study will enable students to plan for a variety of learning environments, including teacher exposition, problem solving, investigations, practical work, consolidation and practice and discussion. They will explore the difference between planning for classes of students with a smaller range of knowledge and experiences, compared with classes with a wider range and geometry as well as the use of technology.

### EDBT5615

#### Music Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Peter Dunbar-Hall **Session:** Semester 1b **Classes:** 8 x 3hr wkshps **Assessment:** 3 x assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The purpose of this unit of study is to instruct students in teaching methodologies suitable for use in secondary music education in the Yr 7-10 range and to prepare students for their first practicum in schools.

#### EDBT5616

##### Music Curriculum 1 (Extension)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Anthony Hood, A/Prof Peter Dunbar-Hall **Session:** Semester 1b **Classes:** 8 x 3 hrs wkshp **Corequisites:** EDBT5615 Music Curriculum 1 **Assessment:** 2 x assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The Extension unit in semester 1 will be in Technology for Music Education. Students will study music technology relevant to music teaching and learning.

#### EDBT5617

##### Science Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1b **Classes:** series of lec/sem/wkshps **Assessment:** 2 x 1000 wd and 1 x 4000 wd essays/assignments, or equivalent in-class presentation(s). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study is the first in a series of three which aims to prepare graduates for the teaching of Science in high schools as one of their two teaching specialisations. Students will investigate the nature and purpose of science education in the secondary school, contemporary syllabuses in science for 7-12, children's understanding of science, teaching and learning strategies, and the planning of learning activities and lessons.

#### EDBT5618

##### Science Curriculum 1 (Extension)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1b **Classes:** 1 x 3hr pr wk x 8 wks or 1 x 2hr per wk x 8 wks and field work excursions and other tasks **Corequisites:** EDBT5617 Science Curriculum 1 **Assessment:** 2 x 3000 wd assignment or equivalent **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to prepare graduates for the teaching of a science in high schools as their teaching specialisation. Students will investigate the nature and purpose of science education in the stage 6 secondary school, contemporary syllabuses in science for Years 11-12, science teaching and learning strategies and planning of units of work.

#### EDBT5619

##### Social Studies Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 1b **Classes:** 4 hrs per wk for 8 wks **Assessment:** See the assessment details for EDBT5605, EDBT5608, EDSE3040 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study is the first of three which aims to prepare graduates to be teachers of one Year 11-12 HSIE syllabus area (Society & Culture or Legal Studies) and one of Year 7-10 Geography, Commerce or History. It will develop competencies and skills in lesson planning, programming and pedagogy in HSIE teaching. The NSW Board of Studies years 7-10 Geography, Commerce or History syllabuses will be introduced and students will develop lesson plans, programs, teaching resources and a range of teaching materials. There will be an emphasis on ICT throughout.

#### EDBT5620

##### TAS Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Nigel B Goodwin **Session:** Semester 1b **Classes:** 3hrs x 8 weeks **Assessment:** Program of work for Technology Mandatory years 7-8 (40%); Lesson Plan (30%); Design-make-appraise task (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

Schools have been asked to prepare students as active participants in a designed world. This unit of study acknowledges these links and those demands and seeks to build in-depth understanding and capability in students so as to enable them to plan, implement and evaluate design-based approaches to solving authentic problems in a range of contexts reflecting the basic focus and approach of the Technology Mandatory Years 7-8 syllabus. Students will also build their capacity to engage their students using those same processes, and to encourage creative and innovative behaviour.

#### EDBT5621

##### TAS Curriculum 1 (Extension)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Nigel B Goodwin **Session:** Semester 1b **Classes:** 3hrs x 8 weeks **Corequisites:** EDBT5620 TAS Curriculum 1 **Assessment:** Matrix IDEO methods against Technology Mandatory years 7-8 design specialisations (30%); Prepare PDFs of case studies in design (20%); Develop instructional guide on innovative behaviour (20%); Design-make-appraise task (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

Schools have been asked to prepare students as active participants in a designed world. This unit of study acknowledges these links and those demands and seeks to build in-depth understanding and capability in students so as to enable them to plan, implement and evaluate design-based approaches to solving authentic problems in a range of contexts reflecting the basic focus and approach of the Technology Mandatory years 7-8 syllabus. Students will also build capacity to engage their students using those same processes and to encourage creative and innovative behaviour. This unit places special emphasis on the tools and techniques that can be used to support, augment and extend creative behaviour in students in the context of Stage 4 and 5 syllabi.

#### EDBT5622

##### TESOL Curriculum 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Theodora Lafkas **Session:** Semester 1b **Classes:** 6 x 4hrs **Assessment:** 2 x major assignments and 1 minor presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit relates to the overall goal of the TESOL program, which is to provide students with both a foundation and a framework for the successful teaching of English to speakers of other languages. The unit will encourage them to make decisions about appropriate classroom strategies across the curriculum: give insight into the current debates within the field and suggest a direction for future thinking. The unit outlines the background to the teaching of English to speakers of other languages, with a focus on oral skills and design of interactive tasks.

#### EDBT5623

##### School Psychology 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 1 **Classes:** 44 hrs: 12 x 3 hr seminars plus 8 hrs assessment experience **Assessment:** Two protocols and reports (40%); exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit introduces the student to the principles of assessing children, with a specific focus on key cognitive assessment instruments. The relationship between models of intelligence and cognitive assessment techniques is discussed, with particular emphasis placed on the critical

evaluation of commonly used individually administered intelligence tests. The multiplicity of factors contributing to successful assessment is emphasised. The principles of standardised testing and the application of competent, ethical, professional use of intelligence tests are taught using current tools such as the Woodcock-Johnson III Test of Cognitive Abilities, Wechsler Scales and the Stanford Binet (5th Ed). The appropriateness of the assessment of specific groups such as young, developmentally young and culturally different children is critically evaluated. Supervised practice of key tests of intelligence is organised in small group workshop sessions. Competency is expected in the administration and scoring of key cognitive instruments and in the writing of assessable reports.

### EDBT5625

#### Professional Studies 1 (Psychology) Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 1 **Classes:** 12 hrs: 1.5 hrs for 8 wks **Assessment:** 1. Test Review Presentation and Summary Paper (1000 wds) 50%; 2. Casework participation involving assessing a young child with language and/or literacy delays, with report. Prepare a 1000 wd report for the child's parents and teaching staff, with parental permission, 50%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit provides students with an overview of the key issues for school counsellors working with younger children in preschool and primary school settings, and in work with adolescents experiencing academic difficulties, with a specific focus on language and literacy.

### EDBT5626

#### Teaching & Learning in Early Childhood 1 Education and Social Work

**Credit points:** 8 **Session:** Semester 1 **Classes:** 4 hrs per wk x 12 wks plus 4 observation visits **Assessment:** 2 portfolio submissions, case analysis, and child protection workshop **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study provides an introduction to issues concerning learning, teaching, the curriculum and the social and institutional context of education. It examines child development, learning in early childhood settings and teaching as a profession. A set of case studies provides a range of contexts to assist students to link the themes and develop a greater understanding of the complex nature of teachers' work. An introduction to major curriculum areas in early childhood education and care is also provided.

### EDBT5652

#### Art Curriculum 2 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 2 **Classes:** lec 2hrs per wk x 9 wks, tut/sem/wkshp 1hr per wk x 9 wks **Prerequisites:** EDBT5602 Art Curriculum 1 **Assessment:** extended unit of work, including case study 3000 wds; assessment & evaluation guide 2000 wds **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit aims to explore further issues and perspectives raised in EDBT5602. The unit focuses on the teaching of art education through developing knowledge and understanding using case method teaching. This unit is designed to introduce the Stage 6 syllabus and to prepare the student for their first Practicum Experience. A particular emphasis is on developing a program of learning in accordance with the NSW BOS directive that is challenging and informative and empowers pupils to engage in visual forms of communication.

### EDBT5653

#### Art Curriculum 2 (Extension) Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 2 **Classes:** lec 2hrs per wk x 9 wks, tut/sem/wkshp 1 hr per wk x 9 wks **Prerequisites:** EDBT5602 Art Curriculum 1 and EDBT5603 Art Curriculum 1 (Extension) **Corequisites:** EDBT5652 Art Curriculum 2 **Assessment:** peer

assessment exercise; 2 x 2500 wd essays **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit builds further on the in-depth understanding and capability of students and explores art-based approaches in a wider range of media reflecting the aims and outcomes of the Visual Art syllabus for Stage 6. This unit is designed to add a strong focus on critical/historical art analysis and design pedagogy, reflection in and upon learning, and on implementing authentic learning tasks. The main focus is on the use of standards and appropriate assessment strategies for learning to enhance and improve the learning of pupils.

### EDBT5654

#### Drama Curriculum 2 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Anderson **Session:** Semester 2 **Classes:** block mode twice a wk **Prerequisites:** EDBT5604 Drama Curriculum 1 **Assessment:** 1 x 2500 wd essay and 1 x 3500 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit builds on the earlier unit and aims to prepare students for the teaching of drama in years 11-12 (Stage 6) focusing on HSC syllabus and support documents, and the relevant Course Prescriptions. Students will plan and implement a program of work suitable for drama students.

### EDBT5655

#### Commerce/Economics Curriculum 2 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 2 **Classes:** 9 x 1hr lec and 4 x 1hr and 6 x 2hr seminars **Prerequisites:** EDBT5605 Commerce/Economics Curriculum 1 **Assessment:** There will be 3 assessment tasks **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to continue the development of graduates to be teachers of HSIE and Economics/Business Studies. It will develop skills in applying cross curriculum content and perspectives, especially civics and citizenship education, literacy and numeracy, and multiculturalism, to the development of learning strategies and resources. This unit of study provides opportunities for students to achieve outcomes in understanding the curriculum design of commercial education, designing and delivering a range of teaching strategies, evaluating and developing teaching resources and assessing students' achievement in Commerce, Economics and Business Studies. ICT will be emphasised throughout.

### EDBT5656

#### Computer Studies Curriculum 2 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 2 **Classes:** 3 hr per wk x 8 wks lec/tut/wkshps **Prerequisites:** EDBT5606 Computer Studies Curriculum 1 **Assessment:** 3 x 2000 wd essays **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study focuses on the teaching of both Information Technology and Processes and Software Design and Development Higher School Certificate courses.

### EDBT5657

#### English Curriculum 2 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Jowen Hillyer **Session:** Semester 2 **Classes:** 1 x 3 hr seminar and 1 lec per wk x 9 wks **Prerequisites:** EDBT5607 English Curriculum 1 **Assessment:** 2 x assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit will examine in depth the current syllabus documents and explore the ways in which contemporary theoretical perspectives underpin and inform these. The unit will continue to examine the

practical uses of information technology in teaching and learning in English.

### EDBT5658

#### Geography Curriculum 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 2  
**Classes:** 4 hrs per wk for 8 wks **Prerequisites:** EDBT5608 Geography Curriculum 1 **Assessment:** 3 assessment tasks **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to continue the development of graduates to be teachers of HSIE and Geography. It will develop skills in applying cross curriculum content and perspectives, especially civics and citizenship education, literacy and numeracy, and multiculturalism, to the development of learning strategies and resources. This unit of study provides opportunities for students to achieve outcomes in understanding the curriculum design of Geography education, designing and delivering a range of teaching strategies, evaluating and developing teaching resources, and assessing students' achievement in Geography. ICT will be emphasised throughout.

### EDBT5659

#### History Curriculum 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Carmel Fahey/ Dr Tim Allender **Session:** Semester 2 **Classes:** 9 x 1hr lec and 9 x 1hr seminar and 9 x 2hr seminar **Prerequisites:** EDBT5609 History Curriculum 1 **Assessment:** 1 x 2000 wd peer teaching activity, 1 x 4000 wd unit of work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This module aims to introduce students to a range of source-based experimental approaches to history teaching and learning. It is also intended to provide the opportunity for individuals to pursue a topic of historical interest, to consider the ways in which this topic may be represented in the history classroom and work collaboratively in the development of teaching and learning materials. This unit is also designed to develop students' skills in applying cross curriculum content and perspectives especially civics and citizenship, literacy and numeracy and multiculturalism to the development of learning strategies and teaching resources.

### EDBT5660

#### Classical Hebrew & Judaism Curriculum 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Brian Conyer **Session:** Semester 2 **Classes:** 4 hrs per wk for 9 wks (36 hours) **Prerequisites:** EDBT5610 Classical Hebrew & Judaism Curriculum 1 **Assessment:** Assessment will consist of School visit assignment, Vision Statement and Unit of Work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Teach.

This unit of study is the second in a series for students who intend to teach Judaic Studies in Stages 4-5. The unit develops foundational skills for classroom teaching in addition to specialised methods for the teaching of Judaism. The unit also introduces students to the socio-historic development of Jewish education in Australia, providing an understanding of local context.

### EDBT5661

#### Languages Curriculum 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 2 **Classes:** lec 1hr per wk x 9 wks, sem 2hrs per wk x 9 wks, 1 day intensive sem **Prerequisites:** EDBT5611 Languages Curriculum 1 **Assessment:** 1 x stage 6 assessment task design 1000 wds. 1 x portfolio 1000 wds. 1 x set 10 ppt slides **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed to build knowledge, skills and competencies developed in Languages Curriculum 1, and on understandings

developed during the first school experience session with a deepening knowledge of the theories and practices of intercultural languages education and languages classrooms in the Australian context, students will continue to investigate issues in languages curriculum design and development.

### EDBT5662

#### Languages Curriculum 2 (Additional)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 2 **Classes:** lec 1 hr per wk x 9wks **Prerequisites:** EDBT5611 Languages Curriculum 1 and EDBT5612 Languages Curriculum 1 (Additional) **Corequisites:** EDBT5661 Languages Curriculum 2 **Assessment:** 1 x stage 6 assesment task design 1000 words, 1 x portfolio 1000 wds, 1 x 1000 wd interview with a school language learner. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed for pre-service language teachers continuing with their curriculum method study in an additional target language. The unit will continue to build pre-service teachers awareness, skills and understandings in languages education, especially in to Stage 6 Continuers syllabus.

### EDBT5663

#### Mathematics Curriculum 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 2 **Classes:** 2 x 1.5hrs x 9 wk tut/sem/wkshp **Prerequisites:** EDBT5613 Mathematics Curriculum 1 **Assessment:** 1 x 2000wd essay and 1 x 4000wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit follows on from Mathematics Curriculum 1 (Doubles and Singles) and Mathematics Curriculum 1 (Extension) for double method students only. Its focus is on the learning and teaching of Data, Measurement and Space using a range of technologies.

### EDBT5664

#### Mathematics Curriculum 2 (Extension)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 2 **Classes:** 9 x 3hrs lec and sem and wkshp **Prerequisites:** EDBT5613 Mathematics Curriculum 1 and EDBT5614 Mathematics Curriculum 1 (Extension) **Corequisites:** EDBT5663 Mathematics Curriculum 2 **Assessment:** 1 x 2500 wd essay and 1 x 3500 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This is the 2nd curriculum unit offered in S2, for students doing double mathematics method. This unit of study will include assessing students with special needs using a variety of techniques and planning appropriate learning experiences to further develop their mathematical understanding.

### EDBT5665

#### Music Curriculum 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Peter Dunbar-Hall **Session:** Semester 2 **Classes:** 8 x 3hr wkshps **Prerequisites:** EDBT5615 Music Curriculum 1 **Assessment:** 2 x assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The purpose of this unit of study is to instruct students in teaching methodologies suitable for use in secondary music education in the Yr 11-12 range and to prepare students for their second Practicum in schools. As current syllabuses also require music educators to teach from an Australian music perspective, this unit of study focuses attention on developments in Australian music.

### EDBT5666

#### Music Curriculum 2 (Extension)

## Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Gary Watson/ A/Prof Peter Dunbar-Hall  
**Session:** Semester 2 **Classes:** 8 x 3hrs wkshp **Prerequisites:** EDBT5615 Music Curriculum 1 and EDBT5616 Music Curriculum 1 (Extension)  
**Corequisites:** EDBT5665 Music Curriculum 2 **Assessment:** 3 x assessments  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

In Non-Western Music students gain experience in performing in a musical ensemble. They are required to study the teaching and learning styles in use, to gain introductory understanding of ethnomusicological method, and to apply their analysis of the pedagogy experienced to their own understanding of music teaching and learning.

## EDBT5667

### Science Curriculum 2

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 2 **Classes:** 2 x 2hr per wk x 8 wks **Prerequisites:** EDBT5617 Science Curriculum 1 **Assessment:** 1 x 4000 wd essay/assignment (portfolio) and 1 x 2000 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study builds upon the work done in the prerequisite course Science Curriculum 1. The unit is designed to develop students' understanding of the nature of science teaching and children's learning of science. The planning of science teaching and learning activities. The interpretation and implementation of syllabus aims, objectives, outcomes and content guidelines. The integration of individual science disciplines within a multidisciplinary science curriculum.

## EDBT5668

### Science Curriculum 2 (Extension)

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 2 **Classes:** 1 x 3hr per wk x 8 wks or 1 x 2hr per wk x 8 wks and field work **Prerequisites:** EDBT5617 Science Curriculum 1 and EDBT5618 Science Curriculum 1 (Extension) **Corequisites:** EDBT5667 Science Curriculum 2 **Assessment:** 2 x 3000 wd assignments or equivalent **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to prepare graduates for the teaching of a science in high schools as their teaching specialisation. Students will investigate the nature and purpose of science education in the Stage 6 secondary school, contemporary syllabuses in science for years 11 - 12, science teaching and learning strategies and planning of units of work. Students will investigate the nature and purpose of science education, contemporary syllabuses in one of the Year 11 - 12 science syllabuses: Biology, Chemistry, Physics, Earth and Environment Science or Senior Science.

## EDBT5669

### Social Studies Curriculum 2

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 2 **Classes:** 4 hrs per wk for 8 wks **Prerequisites:** EDBT5619 Social Studies Curriculum 1 **Assessment:** See the assessment details for EDBT5655, EDBT5658 and EDSE3058 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to continue the development of graduates to be teachers of HSIE in 7-10 syllabuses and either Society & Culture or Legal Studies. It will develop skills in applying cross curriculum content and perspectives especially civics and citizenship education, literacy and numeracy, and multiculturalism to the development of learning strategies and resources. This unit will address: curriculum design in one of Commerce/Economics, Geography or History education, designing and delivering a range of teaching strategies, evaluating and developing teaching resources and assessing student's

achievement in Geography, Commerce or History. ICT will be emphasised throughout.

## EDBT5670

### TAS Curriculum 2

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Nigel B Goodwin **Session:** Semester 2 **Classes:** 3hrs x 8 weeks **Prerequisites:** EDBT5620 TAS Curriculum 1 **Assessment:** OH&S Risk Assessment (20%); Revised Lesson Plan and Program (20%); Design-make-Appraise tasks (50%); ICT (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B Teach.

This unit extends the concepts and practices introduced in TAS Curriculum 1 and focuses on broader programming, assessing and teaching issues with special emphasis on diversity in learning. OH&S is studied in terms of prevailing risk management models. Classroom management issues are studied in the unique context of administering TAS budgets and material and human resources. Students will undertake design-make-appraise tasks based on selected program of study developed in earlier units of study.

## EDBT5671

### TAS Curriculum 2 (Extension)

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Nigel B Goodwin **Session:** Semester 2 **Classes:** 3hrs x 8 weeks **Prerequisites:** EDBT5620 TAS Curriculum 1 and EDBT5621 TAS Curriculum 1 (Extension) **Corequisites:** EDBT5670 TAS Curriculum 2 **Assessment:** Research report on professional development (20%); DMA tasks (50%); Special needs reports (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit extends and develops understandings on approaches to design-make-appraise tasks in the TAS KLA. There is some coverage of VET industry curriculum frameworks as part of a study of education pathways. The special needs of gifted and talented and learners with special needs are investigated and teaching and learning strategies developed to address those unique needs. Novice learning in Stage 5 syllabi is critically examined by undertaking design-make appraise tasks (DMA). Issues surrounding professional development and developing the TAS KLA are canvased and initiatives worked through.

## EDBT5672

### TESOL Curriculum 2

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Theodora Lafkas **Session:** Semester 2 **Classes:** 16 x 2hr sem and wkshp **Prerequisites:** EDBT5622 TESOL Curriculum 1 **Assessment:** 3 x assessments and grammar test. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

Literacy is a key area in the learning of English as a second language. For students without high level of literacy in the first language this can be a daunting process. There is strong evidence to suggest common underlying proficiencies in literacy between languages. Teachers need knowledge of English grammar in order to help them assess students' spoken and written language and to plan appropriate teaching programs.

## EDBT5673

### School Psychology 2

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 2 **Classes:** 36 hrs: 12 x 3 hr seminars **Prerequisites:** EDBT5623 School Psychology 1 **Assessment:** Seminar presentation and paper (60%); Case study (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The assessment of behaviour problems, both externalising and internalising, is introduced as it applies to children and young people in educational and home settings. Links between the theories, description and classification of problem behaviour and DET practice in NSW will be highlighted. Appropriate strategies for the assessment

of behaviour and mental health problems, programming for behaviour management and mental health support strategies, and the evaluation of intervention programs are discussed as they apply to the educational and other environments in which School Counsellors work. Alternative settings for individuals with behaviour and mental health difficulties are critically evaluated and studied.

### EDBT5675

#### Professional Studies 2 (Psychology)

##### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 2 **Classes:** 14 hrs: 3.5 hrs for 4 wks **Assessment:** 1. Planned Interactive Presentation to peers, with summary handout of a selected topic in the area of professional and personal practice (from a set of provided topics), 50% 750 words; 2. Planned talk to staff and/or parents in a school setting on a topic relevant to the work of school counsellors, 50% 750 words. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study focuses on ethical and professional skills for school psychology. A focus on the components of successful work in schools will be presented, including areas such as collaborative team-work, techniques for consultation, systematic approaches and preventative and proactive approaches within school specific contexts and in relation to work with children and adolescents, and their families.

### EDBT5676

#### Teaching & Learning in Early Childhood 2

##### Education and Social Work

**Credit points:** 6 **Session:** Semester 2 **Classes:** 4 hrs per wk for 8 wks separated by Professional Experience component **Prerequisites:** EDBT5626 Teaching & Learning in Early Childhood 1 **Assessment:** Seminar presentation, report, case writing **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

This unit of study is divided into two parts to support and then consolidate the first professional experience in an early childhood setting. Learning activities in the first four weeks focus on preparation for the Practicum and include information on managing and administering an early learning community. The focus in the second part is on critical reflection of the professional experience and includes case writing.

### EDBT6119

#### Honours 2

##### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Prof Gabrielle Meagher **Session:** Semester 1, Semester 2 **Assessment:** 1 x 2000 wd essay, seminar assignments and presentations **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Teach.

This unit prepares Honours students for researching and writing their Special Study project. Seminars explore the breadth and diversity of approaches to educational research and are designed to help students think through the relationships between existing research, conceptual frameworks, a research question, methodology, and findings. Assessment consists of a critical literature review, which should be reworked for inclusion in the Special Study report, as well as written and classroom exercises linked to the seminar program. During the unit, students are expected to develop a plan for the conduct of their Special Study, including a detailed account of their proposed research method, and to be consulting regularly with their Special Study supervisor.

### EDBT6125

#### Special Education: Inclusive Schools

##### Education and Social Work

**Credit points:** 3 **Session:** S1 Intensive, Semester 1 **Classes:** 1 hr lecture wks 1 - 6, 1 hr tutorial wks 1 - 6 **Prerequisites:** EDBT5500 and EDBT5502 and EDBT5503 **Assessment:** Fieldwork report (1000 wds, including 15 hr fieldwork/school placement), inclusion statement (250 wds), tutorial (equiv. 500

wds) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit addresses mandatory requirements to be met by every graduate pre-service teacher. Issues relating to the education of students with a disability will be addressed through working with a student/s with a disability or learning difficulty, conducting tutorials that highlight evidence-based practices for working with students with special education needs, and engaging in lectures and seminars that promote attitudes, knowledge and beliefs that students with disabilities will access and participate in quality education programs.

### EDBT6500

#### Schools and their Communities

##### Education and Social Work

**Credit points:** 5 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** S1 Intensive, Semester 1 **Classes:** 9 x 1 hr lects, 7 x 1.5 hr tuts, 2 x 2 hr tuts **Prerequisites:** EDBT5500 Introduction to Teaching and Learning; EDBT5502 Teachers and Learners in Schools **Assessment:** 1 x 2000 wd essay, 1 x 1000 wd essay, professional portfolio **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit in Study One builds on the knowledge and skills gained in EDBT5500 and EDBT5502. The unit provides opportunities to investigate the complex and changing nature of school environments and further explores school community relationships. In particular this unit critically examines current debates concerning schooling, education, communities and society. In addition, participants will develop further knowledge and understanding needed for transition into the professional community of teachers. Combined, these insights will foster a deeper appreciation of, and critical insight into numerous factors that impact on the work of teachers as well as one's own practice.

### EDBT6501

#### Professional Experiences 2

##### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Di Bloomfield/Dr Tony Loughland **Session:** Semester 1, Semester 2 **Classes:** block mode (20 days) **Prerequisites:** EDBT5503 and EDBT5500 and EDBT5502 and one of: EDBT5652, EDBT5654, EDBT5655, EDBT5656, EDBT5657, EDBT5658, EDBT5659, EDBT5660, EDBT5661, EDBT5663, EDBT5665, EDBT5667, EDBT5669, EDBT5670, EDBT5672, EDBT5673. OR EDBT5503 and EDBT5500 and EDBT5502 and EDBT5535 and EDBT5536 **Assessment:** Satisfies Requirements/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Teach, PG Coursework Exchange.

Students undertake their second Professional Experience of 20 days in a secondary or primary school in a second year of the program. During the practicum students are assigned to one or more Cooperating Teachers in a single discipline area and will be responsible for teaching one or more classes for a total of between 12 and 16 lesson periods per week. The Cooperating Teachers will closely support their work in the school and in discussion with the Tertiary Mentor will be responsible for writing the report on the Professional Experience that will form the basis of the assessment in the enrolled unit of study. Assessment is aligned with the NSW Institute of Teacher's Professional Teaching Standards for the Graduate Teacher.

### EDBT6531

#### English 2 K-6

##### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Alyson Simpson **Session:** S1 Intensive, Semester 1 **Classes:** sem, tut, wkshp block mode **Prerequisites:** EDBT5531 English 1 K-6 **Assessment:** 800 wd webCT practical discussion, 1200 wd tutorial task, 2000 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed to develop students' understanding of how English K-6 is a core factor in planning for teaching across KLAS in the primary curriculum. Emphasis will be on making connections between prior learning to current syllabus demands and the texts and learners in classrooms today. It is expected that students will continue to expand their theoretical knowledge of principles of English teaching as well as continue to develop explicit knowledge of metalanguage to inform their understandings of text construction. Students will be asked to reflect on key readings to challenge, to make links to their own experiences and to question past and current practice. Students will also develop learning experiences that encourage reading for enjoyment, personal and critical response.

### EDBT6532

#### Mathematics 2 K-6

#### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Jenni Way **Session:** S1 Intensive, Semester 1 **Classes:** 7 x 2 hr tut and 4 wks prac **Prerequisites:** EDBT5532 Mathematics 1 K-6 **Assessment:** 1 x 1500wd essay (50%) article (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

Mathematics Education 2 will draw on the content from 5 different strands in the NSW syllabus. It will focus on the development of concepts and processes from the Data strand, Space and Geometry strand and Measurement strand. It will explore children's understanding of chance and data handling and investigate ways in which concepts from other strands of the syllabus can be taught in an integrated manner. It will also build on content and processes established in Mathematics Education 1 by focusing on Stage 2 and 3 Number Strand. The working mathematically strand will be integrated throughout all content areas.

### EDBT6533

#### Linkages Across the Curriculum K-6

#### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Vilma Fyfe **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Classes:** block mode **Prerequisites:** EDBT5500 and EDBT5502 and EDBT5503 **Assessment:** 1 x 2500 wd situational analysis and report **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study focuses on how to integrate key learning areas in the primary curriculum without losing their integrity. It also allows you to investigate the range of strategies teachers and schools use to integrate the key learning areas so they can try to cover the subject matter and outcomes in the syllabus documents. During your practicum you will investigate how the school and your cooperating teacher manages integration. You will share your findings with your tutorial group members and learn how different schools, systems and teachers plan and implement integration.

### EDBT6537

#### Special Interest Unit 2

#### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Tony Loughland **Session:** S1 Intensive, S2 Intensive, Semester 1, Semester 2 **Classes:** 3 hr wkshps per wk x 4 wks **Prerequisites:** EDBT5537 Special Interest Unit 1 and EDBT5500 **Assessment:** 1 assessment task **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: S2 Intensive, Semester 2.*

**Associated degrees:** B Teach, PG Coursework Exchange.

There will be three special interest options offered each semester this is scheduled. In 2008 these were Koori Kids in the Classroom, Science and Technology with Toys, and Music Education.

### EDBT6602

#### Art Curriculum 3

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1 **Classes:** 2 hrs per wk x 10 wks and 1 hr x 10 wks tut/seminar/wkshp **Prerequisites:** EDBT5602 Art Curriculum 1 and EDBT5652 Art Curriculum 2 **Assessment:** visual art body of work and VAPD; contextualising the body of work in the classroom 2000 wds. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit aims to introduce art education issues and perspectives and develop skills in teaching the broad areas of Visual Arts in Stage 6. This unit will focus on the development and documentation of the processes involved in creating a Body of Work. Through this process the students will further extend their capacity to engage senior high school students using creative processes, in order that they are able to support them in developing their Body of Work.

### EDBT6603

#### Art Curriculum 3 (Extension)

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1 **Classes:** 2 hrs per wk x 10 wks lec and 1 hr per wk x 10 wks tut/seminars/wkshps **Prerequisites:** EDBT5602 Art Curriculum 1; EDBT5603 Art Curriculum 1 (Extension); EDBT5652 Art Curriculum 2; EDBT5653 Art Curriculum 2 (Extension) **Corequisites:** EDBT6602 Art Curriculum 3 **Assessment:** 1 x 2500 wd essay and 1 x 1500 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit aims to explore further issues and perspectives and develop skills in teaching the broad areas of Visual Arts with emphasis placed on continuum of learning in the visual art in stage 6. In particular, the focus will be on the use of digital and computer media in the visual arts by exploring aspects of the photography, video and digital imaging content endorsed course as well as the Visual Design Content Endorsed Course.

### EDBT6604

#### Drama Curriculum 3

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Anderson **Session:** Semester 1 **Classes:** wkshp, lec and sem **Prerequisites:** EDBT5604 Drama Curriculum 1 and EDBT5654 Drama Curriculum 2 **Assessment:** 2 x 3000 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This course focuses on experiential learning in drama education. Building on the experiences of Drama 1 and 2 this course examines through workshops and seminars the demands of developing group devised pieces with a special emphasis on the development of acting performance and character skills in students. In addition this unit will examine strategies for the teacher supervision of self-directed learning in drama education using the HSC individual performance project as a case study.

### EDBT6605

#### Commerce/Economics Curriculum 3

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 1 **Classes:** 4 hrs per wk for 8 wks **Prerequisites:** EDBT5605 Commerce/Economics Curriculum 1 and EDBT5655 Commerce/Economics Curriculum 2 **Assessment:** 3 assessment tasks **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to continue the development of graduates to be teachers of HSIE Commerce and Economics/Business. Students will gain an understanding of the requirements of the HSC, with a focus on teaching strategies, resourcing and assessment in the Preliminary and HSC courses. This unit provides opportunities for students to achieve outcomes in understanding Economics and Business Studies for the HSC and designing and delivering a range of teaching strategies, evaluating and developing teaching resources, and assessing student achievement of the outcomes of these syllabuses. ICT will be emphasised throughout.

## EDBT6606

### Computer Studies Curriculum 3 Education and Social Work

**Credit points:** 6 **Session:** Semester 1 **Classes:** 9 x 3hr lec and tut and wkshps  
**Prerequisites:** EDBT5606 Computer Studies Curriculum 1 and EDBT5656 Computer Studies Curriculum 2 **Assessment:** 2 x 2000 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The Information Technology Curriculum Framework, National Training Framework and AQF certification procedures will be critically examined in the context of VET - Information Technology courses in schools. The second major focus lies in developing skills in the design of learning environments for the classroom.

## EDBT6607

### English Curriculum 3 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Jacqueline Manuel **Session:** Semester 1 **Classes:** 1 x 3hr seminar and 1 lec per wk x 6 wks and 1 module research study (8 hrs) **Prerequisites:** EDBT5607 English Curriculum 1 and EDBT5657 English Curriculum 2 **Assessment:** 2 x assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed to develop your understanding, knowledge and pedagogical skills in teaching literature to adolescents. There is an emphasis on theory in practice, wide reading and literature based units of work, 7-12. The sessions will be approached as workshops, during which you will be expected to contribute to whole class and small group collaborative tasks.

## EDBT6608

### Geography Curriculum 3 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 1 **Classes:** 4hrs per wk x for 8wks **Prerequisites:** EDBT5608 Geography Curriculum 1 and EDBT5658 Geography Curriculum 2 **Assessment:** 3 assessment tasks **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to continue the development of graduates to be teachers of HSIE and Geography. Students will gain an understanding of the requirements of the HSC Geography syllabuses. It will focus on teaching strategies, resourcing and assessment in the Preliminary and HSC Geography courses. This unit of study provides opportunities for students to achieve outcomes in understanding Geography for the HSC and designing and delivering a range of teaching strategies, evaluating and developing teaching resources, and assessing student achievement of the outcomes of these syllabuses. ICT will be emphasised throughout.

## EDBT6609

### History Curriculum 3 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Carmel Fahey/ Dr Tim Allender **Session:** Semester 1 **Classes:** 9 x 1hr lec and 7 x 2hr seminar **Prerequisites:** EDBT5609 History Curriculum 1 and EDBT5659 History Curriculum 2 **Assessment:** 1 x 1500 wd presentation, 1 x 4000 wd unit of work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed to develop the skills and understanding necessary to teach current Board of Studies senior history syllabuses. The course also explores the realities of teaching students at this level and the various ways in which higher-order skills may be developed in response to the demands of the new Extension History Syllabus, Stage 6.

## EDBT6610

### Classical Hebrew & Judaism Curriculum 3 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Brian Conyer **Session:** Semester 1 **Classes:** 3hrs x 9 wks **Prerequisites:** EDBT5660 Classical Hebrew & Judaism

Curriculum 2 **Assessment:** 1 x 3000wd essay and 1 x 2000wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Teach.

This course is the final in a series for students who intend to teach Judaic Studies in stages 4-8. The course develops advanced skills for the classroom teaching in addition to specialised teaching methods for the teaching of Judaism. The course introduces students to foundational principals of curriculum development, specifically within the Jewish educational context.

## EDBT6611

### Languages Curriculum 3 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 1 **Classes:** lec 1hr per wk x 10 wks, sem 2hrs per wk x 10 wks **Prerequisites:** EDBT5611 Languages Curriculum 1 and EDBT5661 Languages Curriculum 2 **Assessment:** 1 x 1500 wd short answer written task and 1 x 1000 wd portfolio and 1 x program 1000 wds. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is designed to build on knowledge, skills and competencies developed in Languages Curriculum 1 and 2 to guide and prepare students for Professional Experiences 2 and the latter internship. Students continue to investigate cases of languages and cultures education, honing skills for understandings and competencies for lifelong professional development.

## EDBT6612

### Languages Curriculum 3 (Additional) Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 1 **Classes:** sem 1hr per wk x 10 wks **Prerequisites:** EDBT5611 Languages Curriculum 1 and EDBT5612 Languages Curriculum 1 (Additional) and EDBT5661 Languages Curriculum 2 and EDBT5662 Languages Curriculum 2 (Additional) **Corequisites:** EDBT6611 Languages Curriculum 3 **Assessment:** 1 x 1200 wd essay and 1 x 1000 wd portfolio and 1 x 1000 wd program. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit is the final unit in a series designed for pre-service language teachers continuing with their curriculum method study in an additional target language. The unit will continue to build pre-service teachers awareness, skills and understandings in languages education, especially in regard to the complete series of Board of Studies Stage 6 courses in languages.

## EDBT6613

### Mathematics Curriculum 3 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 1 **Classes:** 2 x 1.5hrs x 10 wks tut sem and wkshps **Prerequisites:** EDBT5613 Mathematics Curriculum 1 and EDBT5663 Mathematics Curriculum 2 **Assessment:** 1 x 3500wd essay and 1 x 2500wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This is the 3rd curriculum unit for students doing the double and single mathematics method. It is built around effective teaching of the General Mathematics course that was first examined at the 2001 HSC. This unit will focus on planning, learning experiences for the General Mathematics course, including teacher exposition, problem solving, investigations, practical work, consolidation and practice and discussion. Teaching calculus will be examined.

## EDBT6614

### Mathematics Curriculum 3 (Extension) Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 1 **Classes:** 10 x 3hr tut sem and wkshp **Prerequisites:** EDBT5613 Mathematics Curriculum 1 and EDBT5614 Mathematics Curriculum 1 (Extension) and EDBT5663 Mathematics Curriculum 2 and EDBT5664 Mathematics Curriculum 2 (Extension) **Corequisites:** EDBT6613 Mathematics Curriculum 3

**Assessment:** 1 x 2500wd essay and 1 x 3000 wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This is the final curriculum unit offered for students doing double mathematics method. This unit will focus on planning, learning environments for the calculus based courses including teacher exposition, problem solving, investigations, practical work, consolidation and practice, discussion.

### EDBT6615

#### Music Curriculum 3

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Pauline Beston, A/Prof Peter Dunbar-Hall **Session:** Semester 1 **Classes:** 8 x 3hrs wkshps **Prerequisites:** EDBT5615 Music Curriculum 1 and EDBT5665 Music Curriculum 2 **Assessment:** 2 x assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The purpose of this unit is to allow students to investigate a range of issues in music education as a means of extending their understanding of music education, its pedagogic methods and its cultural, historical and social contexts. The unit of study is enquiry based and relies on the application of research and presentation skills.

### EDBT6616

#### Music Curriculum 3 (Extension)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Webb, A/Prof Peter Dunbar-Hall **Session:** Semester 1 **Classes:** 8 x 3hr wkshps **Prerequisites:** EDBT5615 Music Curriculum 1 and EDBT5616 Music Curriculum 1 (Extension) and EDBT5665 Music Curriculum 2 and EDBT5666 Music Curriculum 2 (Extension) **Corequisites:** EDBT6615 Music Curriculum 3 **Assessment:** 3 x assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The purpose of this unit of study is to instruct students in the running of instrumental and/or vocal ensembles in schools. This includes study of instrumentation and orchestration, scoring regulations, the planning and running of rehearsals, conducting techniques and understanding of the roles of ensembles in school music programs.

### EDBT6617

#### Science Curriculum 3

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1 **Classes:** 2 x 2hr seminar per wk for 10 wks **Prerequisites:** EDBT5617 Science Curriculum 1 and EDBT5667 Science Curriculum 2 **Assessment:** 1 x 4000 wd essay and 1 x class presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study is the last in a series of three which aims to prepare graduates for the teaching of science in high schools as one of their two teaching specialisations. Students will investigate contemporary issues in science education research, curriculum design and implementation, assessment and professional development.

### EDBT6618

#### Science Curriculum 3 (Extension)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1 **Prerequisites:** EDBT5617 Science Curriculum 1 and EDBT5618 Science Curriculum 1 (Extension) and EDBT5667 Science Curriculum 2 and EDBT5668 Science Curriculum 2 (Extension) **Corequisites:** EDBT6617 Science Curriculum 3 **Assessment:** 1 x 6000 wd essay or equivalent **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study is the last in a series of three which aims to prepare graduates for the teaching of science in high schools. Students will investigate contemporary issues in science education in one of the following: (i) The role of history and philosophy of science in science curriculum or (ii) specialist studies in one HSC science syllabus area.

### EDBT6619

#### Social Studies Curriculum 3

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Kate Keeley **Session:** Semester 1 **Classes:** 4 hrs per wk for 8 wks **Prerequisites:** EDBT5619 Social Studies Curriculum 1 and EDBT5669 Social Studies Curriculum 2 **Assessment:** See the assessment details for EDBT6605, EDBT6608 and EDSE4023 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study aims to continue the development of graduates to be teachers of HSIE and one of Legal Studies or Society and Culture. Students will gain an understanding of the requirements of the HSC for either Legal Studies or Society and Culture. The unit will focus on teaching strategies, resourcing and assessment in the Preliminary and HSC years for either syllabus area. It provides opportunities for students to achieve outcomes in understanding either Legal Studies or Society and Culture for the HSC, and designing and delivering a range of teaching strategies, evaluating and developing teaching resources, and assessing student achievement of the outcomes of these syllabuses. ICT will be emphasised throughout.

### EDBT6620

#### TAS Curriculum 3

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Nigel B Goodwin **Session:** Semester 1 **Classes:** 3hrs x 8 wks **Prerequisites:** EDBT5620 TAS Curriculum 1 and EDBT5670 TAS Curriculum 2 **Assessment:** Major Design Project & Folio (70%); HSC Exam (20%); Project in-class projects(10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

The Design and Technology curriculum course aims to explore issues, perspectives and relationships in the effective design and practical use of technologies. This course will provide students with the opportunity to apply a design philosophy through creative and analytical exploration, explanation, practice and synthesis applicable in an educational context. The curriculum course will focus on the senior syllabi in the TAS Key Learning Area and culminates in a Major Design Project and Project Folio. Additional in-class workshops/tasks will examine change, management and leadership issues in the TAS KLA.

### EDBT6621

#### TAS Curriculum 3 (Extension)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Nigel B Goodwin **Session:** Semester 1 **Classes:** 3hrs x 8 weeks **Prerequisites:** EDBT5620 TAS Curriculum 1 and EDBT5621 TAS Curriculum 1 (Extension) and EDBT5670 TAS Curriculum 2 and EDBT5671 TAS Curriculum 2 (Extension) **Corequisites:** EDBT6620 TAS Curriculum 3 **Assessment:** Case study of innovative design (30%); ICT Knowledge-Building research task (35%); Individual research report (35%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach.

The Design and Technology curriculum course aims to explore issues, perspectives and relationships in the effective design and practical use of technologies. A section of this unit of study deals with the Case Study within the HSC Course - Senior Design & Technology Yrs 11-12. A second section involves independent research on pedagogical approaches in Technology Education. The third section of this unit of study deals with using ICT to support and augment learning and performance within TAS KLA in a knowledge-building framework.

### EDBT6622

#### TESOL Curriculum 3

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Thodorafa Lafkas **Session:** Semester 1 **Classes:** 14 x 2hr sem/wrkshps **Prerequisites:** EDBT5622 TESOL Curriculum 1 and EDBT5672 TESOL Curriculum 2 **Assessment:** 2 x assessments and bookclub presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

The role of the ESOL teacher has become increasingly complex. Graduates may be working with adults or with teenagers in Australia

or overseas. Traditional career pathways no longer exist as teachers are expected to have the flexibility and knowledge base to adapt to a wide variety of contexts. They need an understanding of students' cultural backgrounds and skills in intercultural communication.

### EDBT6623

#### School Psychology 3 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 1 **Classes:** 36 hrs: 12 x 3hr seminars **Prerequisites:** EDBT5623 School Psychology 1 and EDBT5673 School Psychology 2 **Assessment:** 1. Seminar presentation on Therapeutic Technique 50%; handout paper 1000 wds plus key references, presentation 60 mins; 2. Pamphlet and Resources Folder in specified mental health area 50%; 2000 wds. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Teach, PG Coursework Exchange.

This unit of study is designed to introduce the students to issues and concepts related to counselling children and adolescents within the school setting. The focus will be on accurate assessment of the concerns and the development of intervention plans appropriate for the educational environment.

### EDGU2000

#### Teaching English Internationally 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Theodora Lafkas **Session:** Semester 1 **Classes:** 3 hours per week. **Prerequisites:** 144 credit points including 78 credit points of Education **Corequisites:** EDSE5008 and EDBT5000 **Assessment:** 1 hr exam, seminar presentation (1,500 wds), discussion room (1,000 wds), developing oral/interactive tasks (2,500 wds). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

The rapid expansion of English as a global language has led to a demand for graduates across a range of disciplines to have skills and expertise in English language teaching. This unit aims to introduce theory, concepts and practices in teaching English. The unit will focus on developing participants' knowledge and understanding of English language teaching and learning to international students in Australia and in primary, secondary and tertiary contexts overseas. The unit will develop understanding of second language learning and intercultural skills. It requires an interest in but not a specific background in teaching and languages.

### EDGU3000

#### Teaching English Internationally 2 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Theodora Lafkas **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** 144 credit points including 78 credit points of Education **Corequisites:** EDGU2000, EDSE5008 and EDBT5000 **Assessment:** Seminar presentation (1,500 -2000 wds); reflective report (2,000 wds) and unit of work (2,000 wds) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

The rapid expansion of English as a global language has led to a demand for graduates across a range of disciplines to have an understanding of international Englishes and expertise in English language teaching. This unit aims to extend participants' knowledge and understanding of English language teaching and learning to international students in Australia and in primary, secondary and tertiary contexts overseas. The unit will develop understandings of systems of English grammar, testing and assessment in TESOL and curriculum development and evaluation. It requires an interest in but not a specific background in teaching and languages.

### EDSE2001

#### Craft Knowledge and Prof Practices 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Llian Merritt **Session:** Semester 2 **Classes:** 3 hrs/wk for 10 wks and 1 workshop **Prerequisites:** 48 credit points

including 18 credit points of Education **Assessment:** Three assessment tasks including teacher narrative 1000 words (30%), web-based discussion room 1000 words (30%), and 3000 words assignment (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit of study explores how teachers become more aware of their professional practices and develop and refine craft knowledge. Students examine the evolving roles of teachers in the classroom, identify best teaching practices and analyse and critique a range of teaching styles, methods and strategies (including ICT) to meet the needs of students. Students learn about the roles of teachers in classrooms and examine their own emerging perceptions of self as teacher.

### EDSE3037

#### Teaching Visual Arts 1A Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1b **Classes:** 4 hrs/wk **Prerequisites:** 54 credit points including 24 credit points of Education including EDSE2001 and 12 senior credit pts of Art History and Theory **Corequisites:** Practical art course taken at The Tin Sheds **Assessment:** Visual Art reflective journal; Collaborative Group Work Cse Study; Lesson plan development **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit will introduce the nature and scope of Visual Art Education within NSW and in particular the NSW Visual Art 7-10 syllabus.. This is followed by a survey of existent pedagogical models of art teaching with a focus on experiential learning through practical activity. The role of reflection within authentic learning contexts will receive special emphasis in the context of the mandatory visual art syllabus. Authentic, practical activities will be utilised to contextualise and ground art education processes. Students will be introduced to organising, planning and managing learning experiences based on the assessment for learning for Stages 4 and 5.

### EDSE3038

#### Teaching Visual Arts 1B Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1b **Classes:** 4 hrs/wk **Prerequisites:** 54 credit points including 24 credit points of Education including EDSE2001 & 12 senior credit points of Art History and Theory **Corequisites:** Practical art course taken at The Tin Sheds. **Assessment:** Unit of Work; Collaborative Groupwork Seminar Presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit will further examine the scope and sequence of Visual Art Education within NSW. The unit will critically analyze and evaluate pedagogical models of art teaching with a special emphasis on experiential learning, learning through practical activity. In particular it will address assessment for learning in the Visual Arts 7-10 in order that students collaborate in developing a Unit of Work for Stage 4. This is followed by an introduction of a learning activity from the sequence of learning schedule of that Unit of Work. This group presentation is to be offered as a 45 minute lesson clearly demonstrating the scope and sequence of learning of the Unit of Work.

### EDSE3040

#### Teaching History 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Carmel Fahey, Dr Tim Allender **Session:** Semester 1b **Classes:** 4 hours/week **Prerequisites:** 54 credit pts including 24 credit pts of Education including EDSE2001 and 12 Senior credit pts of History **Assessment:** Task 1- Influences, beliefs and conceptions - 50%; Task 2 - Devising a sequence of four lessons - 350% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit aims to prepare History Curriculum students in the theory and practice of teaching history in the secondary school. The unit draws on current research, thinking and practice in the field of history education, and relates these understandings to the realities and varying contexts of history teachers' work and instruction.

### EDSE3041

#### Teaching Geography 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Kate Keeley **Session:** Semester 1b **Classes:** 4 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education including EDSE2001 and 12 Intermediate credit points of Geography **Assessment:** There will be three assessment tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study aims to make students confident, enthusiastic and competent teachers of HSIE and Geography. This unit has two parts HSIE Core (2 hrs/wk) and Geography (2 hrs/wk). HSIE core develops competencies and skills in lesson planning, programming and pedagogy in HSIE teaching. An understanding of the NSW Board of Studies Years 7-10 Geography Syllabus will be developed and students will develop lesson plans, programs, teaching resources and a range of Commerce teaching materials. There will be an emphasis on ICT throughout.

### EDSE3042

#### Teaching Drama 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr M Anderson **Session:** Semester 1b **Classes:** 4 hrs/wk **Prerequisites:** 48 credit pts including 24 credit pts of Education and EDSE2001 and 12 Senior credit pts of Performance Studies **Assessment:** Assessment is based on the analysis of syllabus and support documents, development of teaching resources for 7-10 drama classes and the analysis of a professional performance. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is the initial Drama Curriculum (method) course unit for prospective secondary Drama teachers who are in the third year of the combined BEd/BA degree program. The unit introduces the teaching Drama 7-12, with a focus on Stages 4 & 5. Students will examine the history of drama education, examine teaching strategies for improvisation and other forms of drama. Students will begin to develop their own personal style of teaching. The emphasis in this course is upon the teaching of Process Drama related to the NSW Year 7 - 10 Drama Syllabus.

### EDSE3043

#### Teaching TESOL 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Theodora Lafkas **Session:** Semester 1b **Classes:** 4 hrs/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 plus 12 Senior credit points of either Linguistics, English, or Languages. **Assessment:** 2 major assignments and 1 minor presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit relates to the overall goal of the TESOL program, which is to provide students with both a foundation and a framework for the successful teaching of English to speakers of other languages. The unit will encourage them to make decisions about appropriate classroom strategies across the curriculum, give insight into the current debates within the field and suggest a direction for future thinking. The unit outlines the background to the teaching of English to speakers

of other languages, with a focus on oral skills and design of interactive tasks.

### EDSE3044

#### Teaching English 1

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Jacqueline Manuel **Session:** Semester 1b **Classes:** 4 hours/week **Prerequisites:** 54 Credit Points including 24 credit points of Education and EDSE2001 and 12 Senior credit pts of English or Australian Literature **Assessment:** (1) Lesson plans for junior English (2) a reflective journal dealing with students' growing understanding of the English teacher's role that will include critiquing of readings and a philosophy of English. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

Designed to increase knowledge and understanding of the theory and practice of teaching Secondary English within the perspective of the K-12 continuum, this unit of study will seek to provide a thorough grounding in the syllabus documents, content and materials used in Year 7 - 10 English classes. The unit will facilitate the development of effective, creative professionals who understand and can implement contemporary theory relevant to teaching and learning English, and who are proficient in a range and variety of teaching strategies appropriate to the class levels and individual needs encountered in secondary English classes.

### EDSE3045

#### Teaching Mathematics 1A

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 1b **Classes:** 3 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 12 credit points of Intermediate Mathematics **Assessment:** 1. Evaluating and planning units and lessons (3000 wds). 2. Developing further lessons (3000 wds). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study, the first in the sequence over Year 3 and 4 of the double degree, allows double and single mathematics method students to become aware of a number of basic issues encountered by mathematics teachers in the secondary school. Emphasis is placed on the design of effective lessons in Years 7-10, focussing on Working Mathematically, Number, and Patterns and Algebra.

### EDSE3046

#### Teaching Mathematics 1B

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 1b **Classes:** 3 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 12 credit points of Intermediate Mathematics. **Corequisites:** EDSE3045 **Assessment:** 1. Identifying and reviewing a selection of journal articles that relate to a specific topic from the syllabus or to a current issue in mathematics education (2500 wds). 2. Designing a portfolio of rich problems for a particular stage (3500 wds). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study focuses on the role of the mathematics teacher in the classroom, with particular emphasis on the junior high school years. It is intended to provide the student with techniques for constructing rich learning environments for students in the early years of high school. Particular types of assessment tasks are examined that focus on problem solving and investigations.

### EDSE3047

#### Teaching Languages 1A

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 1b **Classes:** 3 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 plus 12 credit points of Intermediate

Languages **Assessment:** Assessment will be based on one essay, lesson planning and reflection within a portfolio. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is the initial Languages Curriculum (method) course unit for prospective secondary languages other than English teachers who are in the third year of the combined Bachelor of Education/Bachelor of Arts degree program. The unit is designed to introduce pre-service languages teachers to key concepts and understandings of languages education and build their awareness and skills in preparation for NSW secondary classrooms during School Experience 1. Students will gain broad understandings about the nature and scope of teaching of languages other than English education in the NSW context, about traditional and more contemporary and innovative classroom practices and particular aspects of policy and Board of Studies documentation. Students begin a "journey" of reflection on their knowledge and practice of languages education.

### EDSE3048

#### Teaching Languages 1B

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 1b **Classes:** 1 hour class plus guided reading tasks **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 plus 12 credit points of Intermediate Languages **Corequisites:** EDSE3047 **Assessment:** Assessment will be based on one essay, lesson planning and reflection within a portfolio. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is the initial Languages Curriculum (method) course unit for prospective secondary languages other than English teachers who are in the third year of the combined BEd/BA degree program and who have two languages as teaching methods. The unit is designed to introduce pre-service languages teachers to key concepts and understandings of languages education and build their awareness and skills in preparation for NSW secondary classrooms during School Experience 1. Students will gain broad understandings about the nature and scope of teaching of languages other than English education in the NSW context, about traditional and more contemporary and innovative classroom practices and particular aspects of policy and Board of Studies documentation. Students begin a "journey" of reflection on their knowledge and practice of languages education.

### EDSE3049

#### Teaching Computer Studies 1

##### Education and Social Work

**Credit points:** 6 **Session:** Semester 1b **Classes:** 4 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 12 credit points of Intermediate Computer Studies **Assessment:** Assessment is based on the analysis of syllabus & support documents, development & implementation of teaching resources for 7-10 computing classes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study focuses on the teaching of the NSW Computing Studies syllabi (7 to 12). The main focus is on preparing computing studies lessons which focus on design issues & problem solving, and particularly on introducing hardware versus software, input and output, data (storage and communication), user interfaces, instructions (including "if-then"), errors, testing, and otherwise viewing a computer as a system. This unit focuses on methods of teaching with particular emphasis on activities and projects which wholistically combine sections of the syllabus in a realistic context. Students will begin to develop their own approach to deconstruction of the syllabus and reconstruction into activities, lessons, and projects.

### EDSE3050

#### Teaching Commerce/Economics 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Kate Keeley **Session:** Semester 1b **Classes:** 4 hrs/wk **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 12 intermediate credit points of Economics or Political Economy **Assessment:** There will be three assessment tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study aims to make students confident, enthusiastic and competent teachers of HSIE and Commerce/Economics. This unit has two parts HSIE Core (2 hrs/wk) and Commerce/Economics (2 hrs/wk). The HSIE core develops competencies and skills in lesson planning programming and pedagogy in HSIE teaching. An understanding of the NSW Board of Studies years 7-10 Commerce Syllabus will be developed and students will develop lesson plans, programs, teaching resources and a range of Commerce teaching materials. There will be an emphasis on ICT throughout.

### EDSE3051

#### Teaching Science 1 (Core)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1b **Classes:** 5 hrs/wk **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 12 intermediate credit points in one Science Area (either Chemistry, Biology, Geology or Physics) + 6 credit points in 2nd Science area either Chemistry, Physics, Biology or Geology. **Assessment:** Assessment will be based on a professional portfolio, an assignment and a class presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is the initial Science Curriculum (method) course unit for prospective secondary Science teachers who are in the third year of the combined BEd/BSc degree program. The unit is designed to introduce students to contemporary ideas on the nature and practice of science education in the context of schooling, the aims of secondary science education and their implementation, the nature of the school science curriculum with particular emphasis on Australian secondary science curricula and the research, skills, resources and challenges that provide the contexts for contemporary science teaching and learning.

### EDSE3052

#### Teaching Science Elective (Chemistry)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Mr Tony Sperring **Session:** Semester 2 **Classes:** 4 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 12 intermediate credit points of Chemistry and 12 credit points of Mathematics **Corequisites:** EDSE3051 **Assessment:** Assessment will be based on two assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is a double method Science elective which complements the common ('core') science Curriculum courses, Teaching Science 1 (Core) and Teaching Science 2 (Core), taken by all Science Education students in the third year of the double degree program. In this course unit, students study issues in the teaching and learning of Stage 6 Chemistry.

### EDSE3053

#### Teaching Science Elective (Senior Sci)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Alex Hugman **Session:** Semester 2 **Classes:** 4 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 24 intermediate credit points in two Science areas: either Chemistry, Physics, Biology or Geology. **Corequisites:** EDSE3051 **Assessment:** Assessment will be based on two assignments

**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is a double method Science elective which complements the common ('core') science Curriculum courses, Teaching Science 1 (Core) and Teaching Science 2 (Core), taken by all Science Education students in the third year of the combined degree program. In this course unit, students study issues in the teaching and learning of Stage 6 Senior Science, a multidisciplinary science course for senior school students.

### EDSE3054

#### Teaching Science Elective (Biology)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Mr Ian Stevens **Session:** Semester 1b **Classes:** 4 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 12 intermediate credit points of Biology. **Corequisites:** EDSE3051 **Assessment:** Assessment will be based on two assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is a double method Science elective which complements the common ('core') science Curriculum courses, Teaching Science 1 (Core) and Teaching Science 2 (Core), taken by all Science Education students in the third year of the double degree program. In this course unit, students study issues in the teaching and learning of Stage 6 Biology.

### EDSE3056

#### Teaching Visual Arts 2A

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 2 **Classes:** 36 hrs/semester **Prerequisites:** EDSE3037 and Practical art course taken at The Tin Sheds. **Corequisites:** Advanced practical art course taken at The Tin Sheds. **Assessment:** Reflective Visuals Arts Education Learning Journal (2000 wds); Extended Unit of Work, including case study (3000 wds) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit aims to explore further issues and perspectives raised in Visual Arts 1A and 1B and is designed for Single and Double Method students. This unit addresses the NSW Visual Arts Stage 5 and 6 Syllabuses. The unit focuses on the teaching and learning in the Visual Arts and Stages 5 and 6 and in particular pupils' development of increasingly more autonomous ways of understanding of learning through the study of Visual Arts. This unit closely examines the nature and scope of the Visual Art Stage 6 HSC course with emphasis on the Visual Arts written examination. This is followed by a survey of extant pedagogical models of art teaching with a special emphasis on experiential learning, learning through practical activity. The role of reflection within authentic learning contexts will receive special emphasis in the context of the DET Visual Art Policy Documentation. Students will be introduced to organising, planning and managing teaching experiences

### EDSE3057

#### Teaching Visual Arts 2B

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 2 **Classes:** 4 hrs/wk (36 hours) **Prerequisites:** EDSE3037 and EDSE3038 and Practical art course taken at The Tin Sheds **Corequisites:** Advanced practical art course taken at The Tin Sheds and EDSE3056 **Assessment:** Assessment and evaluation guide; peer assessment exercise **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit builds further on the in-depth understanding and capability of students and explores art-based approaches in a wider range of media reflecting the aims and outcomes of the Visual Art syllabus for Stage 6. This unit is designed to add a strong focus on critical/historical art analysis and design pedagogy, reflection in and upon learning, and on implementing authentic learning tasks. The main focus is on the use of standards and appropriate assessment strategies for learning to enhance and improve the learning of pupils.

### EDSE3058

#### Teaching History 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Carmel Fahey, Dr Tim Allender **Session:** Semester 2 **Classes:** 4 hours/week (36 hours) **Prerequisites:** EDSE3040 plus 12 senior credit points of History. **Assessment:** Assessment will be based on two pieces of work. The first focuses on peer teaching - 30%. The second assessment task requires students to collaboratively develop teaching and learning strategies around a particular approach to history teaching and learning - 70% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This Unit of Study aims to prepare History students to acquire the knowledge, skills and understandings necessary to implement the Years 7 - 10 History Syllabus, Board of Studies, NSW. The unit focuses specifically on developing a range of approaches to history teaching and learning across age and ability groups.

### EDSE3059

#### Teaching Geography 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Kate Keeley **Session:** Semester 2 **Classes:** 4 hrs/wk **Prerequisites:** EDSE3041 Teaching Geography 1 plus 12 intermediate credit points of geography **Assessment:** There will be three assessment tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study consists of HSIE Core 2 (2 hrs/wk) and Geography (2 hrs/wk). The HSIE Core will develop students' skills in applying cross curriculum content and perspectives, especially civics and citizenship education, literacy and numeracy and multiculturalism to the development of learning strategies and resources. This unit of study provides opportunities for students to achieve outcomes in understanding the curriculum design of Geography education, designing and delivering a range of teaching strategies, evaluating and developing teaching resources and assessing students' achievement in Geography. ICT will be emphasised throughout.

### EDSE3060

#### Teaching Drama 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Anderson **Session:** Semester 2 **Classes:** 4 hrs/week for 9 wks (36 hrs) **Prerequisites:** EDSE3042 plus 12 senior credit points of Performance Studies **Assessment:** Assessment is based on an essay on drama learning pedagogies (3000 words) and a 20 minute seminar presentation and accompanying paper relating to a Higher School Certificate topic area in drama. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit continues the preparation for teaching Drama 7-12, with a focus on Stage 6, Higher School Certificate Drama. Students examine the issues relating to individual project work and the collaborative aspects of the drama syllabuses. This unit also explores issues related to assessment and programming of drama as well as exploring quality teaching in drama education. Students will deepen their understanding

of the cognitive/affective development which the study of Drama anticipates, and further develop their own personal style of teaching.

### EDSE3061

#### Teaching TESOL 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Theodora Lafkas **Session:** Semester 2 **Classes:** 4 hrs/wk (36 hrs) **Prerequisites:** EDSE3043 Teaching TESOL 1 plus 12 Senior credit points of either Linguistics, English or Languages **Assessment:** 3 assessments and grammar test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

Literacy is a key area in the learning of English as a second language. For students without a high level of literacy in the first language this can be a daunting process. There is strong evidence to suggest common underlying proficiencies in literacy between languages. Thus, the focus this semester will be on the development of literacy and teachers' knowledge of English grammar in order to help them assess students' spoken and written language and to plan appropriate teaching programs.

### EDSE3062

#### Teaching English 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Jacqueline Manuel **Session:** Semester 2 **Classes:** 4 hours/week (36 hours) **Prerequisites:** EDSE3044 plus 12 senior credit points of English **Assessment:** Assessment will take the form of: (1) a unit of work to be taught to a nominated class level (2000 words); (2) a piece of work relating to either Adolescent Fiction or Senior English (3000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This course will extend the study of the junior secondary English syllabus begun in Teaching English 1. It will in addition offer an in-depth study of approaches to teaching Adolescent Fiction, Years 7 -10. The other major strand of this unit will focus on a thorough examination of the Senior English, Stage 6 syllabus for years 11-12.

### EDSE3063

#### Teaching Mathematics 2A

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 2 **Classes:** 3 hours/week (27 hours) **Prerequisites:** EDSE3045 plus 12 credit points of intermediate mathematics or statistics **Assessment:** 1. Planning three technology lessons (2000 words); 2. Planning a unit of work from either the Data, Measurement, or Space and Geometry strands of the Mathematics Years 7-10 Syllabus and designing appropriate assessment approaches (4000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study focuses on the learning and teaching of Data, Measurement, Space and Geometry in Years 7-10. The nature of geometric proof is explored in detail and the teaching of this notion based on recent research is examined. The place of appropriate technology in the teaching and learning of secondary mathematics is examined. Assessment approaches are explored including formal and informal strategies.

### EDSE3064

#### Teaching Mathematics 2B

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 2 **Classes:** 3 hours/week (27 hours) **Prerequisites:** EDSE3045, EDSE3046 and 12 credit points of intermediate mathematics or statistics **Corequisites:** EDSE3063 **Assessment:** Assessment: 1. Presenting a teaching and learning activity for either Data, Measurement or Space and Geometry (2500 wds). 2. Researching and reviewing appropriate websites for teaching and learning a particular area of mathematics (1000 words). 3. Assessing a student with special learning needs, designing appropriate learning tasks for the student (3500

words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

Assessment strategies for these children are examined closely as part of the learning experience, together with Department of Education and Training policy for measuring and recording formative assessment tasks.

### EDSE3065

#### Teaching Languages 2A

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 2 **Classes:** 3 hours/week for 8 weeks **Prerequisites:** EDSE3047 and 12 senior credit points of languages **Assessment:** Assessment will be based on three assignments: Stage 6 assessment task; design/make/appraise a language teaching resource; portfolio. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit is designed to build on curriculum unit Teaching Languages 1A and on understandings developed during the first school experience practicum session. With their deepening knowledge of the theory and the practices of the languages other than English classroom, pre-service languages teachers will investigate issues in languages curriculum design and development. Students continue on their "journey" of reflection on knowledge and reflection on their profession. With their deepening knowledge of the theory and the practices of the languages other than English classroom, pre-service languages teachers will investigate issues in languages curriculum design and development. Students continue on their "journey" of reflection on knowledge and reflection on their profession.

### EDSE3066

#### Teaching Computer Studies 2

##### Education and Social Work

**Credit points:** 6 **Session:** Semester 2 **Classes:** 4 hours/week (36 hours) **Prerequisites:** EDSE3049 and 12 intermediate credit points of computer studies **Assessment:** Class presentations, report, research, program design. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study focuses on the teaching of both the Information Technology and Processes and Software design and Development Higher School Certificate courses. Content such as the nature of information systems, systems design, project work, transaction processing, algorithms and program code, social and ethical issues in software design, operating systems, and optional modules such as the evolution of programming languages and the software developer's view of hardware will receive extended coverage in the context of designing appropriate learning experiences. Where possible ICT will be used to exemplify concepts, practices, and approaches in the computer classroom.

### EDSE3067

#### Teaching Commerce/Economics 2

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Kate Keeley **Session:** Semester 2 **Classes:** 4 hrs/wk **Prerequisites:** EDSE3050 Teaching Commerce/Economics 1 and 12 intermediate credit points of economics or political economy **Assessment:** There will be three assessment tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study consists of HSIE Core 2 (2 hrs/wk) and Commerce/Economics/Business Studies (2 hrs/wk). The HSIE Core will develop students' skills in applying cross curriculum content and perspectives especially civics and citizenship education, literacy and

numeracy and multiculturalism to the development of learning strategies and resources. This unit of study provides opportunities for students to achieve outcomes in understanding the curriculum design of commercial education, designing and delivering a range of teaching strategies, evaluating and developing teaching resources and assessing students' achievement in Commerce, Economics and Business Studies. ICT will be emphasised throughout.

### EDSE3068

#### Teaching Science 2 (Core)

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Mr Tony Sperring **Session:** Semester 2 **Classes:** 4 hours/week (36 hours) **Prerequisites:** EDSE3051 Teaching Science 1 (Core) and 12 intermediate credit points of science **Assessment:** Assessment will be based on one assignment, a group seminar presentation and a professional portfolio. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study builds upon the work done in the prerequisite course Teaching Science 1 (Core). The unit is designed to develop students' understandings of: i. the nature of science teaching and children's learning of science, in the context of contemporary research and classroom practices, ii. the planning of science teaching and learning activities, in individual lessons and units of work, iii. the interpretation and implementation of syllabus aims, objectives, outcomes and content guidelines as well as school and system policies and regulations, iv. the integration of individual science disciplines within a multidisciplinary science curriculum.

### EDSE3071

#### Teaching Languages 2B

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 2 **Classes:** 1 hour per week plus guided reading tasks **Prerequisites:** EDSE3047 and EDSE3048 and 12 senior credit points of languages **Corequisites:** EDSE3065 **Assessment:** Assessment will be based on three tasks: senior assessment task, portfolio and reflection notes after interview with Stage 4 language learner. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit is designed for pre-service language teachers continuing with their curriculum method study in a second target language. The unit will continue to build pre-service language teachers' awareness, skills and understandings in languages education. Given the opportunity to spend more time on task through online guided readings, pre-service language teachers will develop understandings about languages policy and planning and how it links to school implementation of languages programs and particular aspects of policy.

### EDSE3072

#### Craft Knowledge and Prof Practices 2

##### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Llian Merritt **Session:** Semester 2 **Classes:** 3 hrs/wk for 9 wks **Prerequisites:** 72 credit points including 24 credit points of Education, EDSE2001 and two of the following: EDSE3037, EDSE3038, EDSE3040, EDSE3041, EDSE3042, EDSE3043, EDSE3044, EDSE3045, EDSE3046, EDSE3047, EDSE3048, EDSE3049, EDSE3050, EDSE3051, EDBT5610. **Assessment:** Three assessment tasks including web-based discussion 1000 words (30%), essay 2000 words (40%) and report 1500 words (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit of study builds on the knowledge, understandings, skills and attitudes explored and developed in Craft Knowledge and Professional Practice 1. This unit of study addresses issues and challenges facing schools in relation to access, equity and diversity and how these can be addressed through policy and practice. Through reflection students

are able to examine and interpret their beliefs about students, teachers, learning, teaching, schools and knowledge. Craft knowledge and professional practice is developed and refined as students use their own knowledge and experiences in professional conversations with peers and lecturers to critically analyse their own practice in conjunction with theory and research.

### EDSE3073

#### Professional Experience A

##### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Di Bloomfield **Session:** Semester 2 **Classes:** 20 days in school experience **Prerequisites:** 72 credit points including 24 credit points of Education, EDSE2001 and two of the following: EDSE3037, EDSE3038, EDSE3040, EDSE3041, EDSE3042, EDSE3043, EDSE3044, EDSE3045, EDSE3046, EDSE3047, EDSE3048, EDSE3049, EDSE3050, EDSE3051, EDBT5610 **Assessment:** Satisfies Requirements/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

Professional Experience is a core part of the professional preparation of teachers. It provides students with opportunities to develop their teaching skills and professional understandings. It is a pivotal opportunity for beginning teachers to experiment and to implement a wide range of strategies and pedagogy that they have acquired during their university-based courses. This unit of study provides students with the opportunity to undertake a range of professional experiences in secondary schools, enabling them to explore, enact and reflect upon the links between the theory and practice of their chosen profession.

### EDSE4021

#### Teaching Visual Arts 3A

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1a **Classes:** 4 hrs/wk (36 hrs) **Prerequisites:** EDSE3037 and EDSE3056 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** Visual Art body of work; VAPD; Contextualizing the body of work in the classroom (1000 wd) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit aims to introduce art education issues and perspectives and develop skills in teaching the broad areas of Visual Arts in Stage 6. This unit will focus on the development and documentation of the processes involved in creating a Body of Work. Through this process the students will further extend their capacity to engage senior high school students using creative processes, in order that they are able to support them in developing their Body of Work and prepare them for the written examination.

### EDSE4022

#### Teaching Visual Arts 3B

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1a **Classes:** 4 hrs/wk **Prerequisites:** EDSE3037, EDSE3038, EDSE3056, EDSE3057 and Practical art course taken at The Tin Sheds. **Corequisites:** EDSE4021, EDSE4042, EDSE4043, EDSE4044 and Advanced practical art course taken at The Tin Sheds. **Assessment:** Individual program of learning for Stage 6; Student-teacher reflective learning (2000 wd) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit aims to explore further issues and perspectives and develop skills in teaching the broad areas of Visual Arts with emphasis placed on continuum of assessment for learning in the visual arts in Stage 6. In particular, the focus will be on assessment for learning within the context of Mixed Media. In addition the students are to maintain a reflective diary documenting and critically analyzing and evaluating their learning during their Professional Experiences placement.

**EDSE4023****Teaching History 3****Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Carmel Fahey, Dr Tim Allender  
**Session:** Semester 1a **Classes:** 4 hours/week **Prerequisites:** EDSE3040 and EDSE3058 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044  
**Assessment:** Assessment will be based on a class presentation, planning unit outlines and the mapping of appropriate teaching and assessment strategies  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit aims to equip students to teach the skills and understandings underpinning Board of Studies Stage 6 history syllabuses. The unit also explores the realities of teaching students at this level, and the various ways in which higher-order skills may be developed in response to the demands of the Extension History Syllabus.

**EDSE4024****Teaching Geography 3****Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Ms Kate Keeley **Session:** Semester 1a **Classes:** 4 hrs/wk **Prerequisites:** EDSE3041 Teaching Geography 1 & EDSE3059 Teaching Geography 2 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** There will be three assessment tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study consists of HSIE Core 3 (2 hrs/wk) and Geography (2 hrs/wk). In HSIE 3 students will gain an understanding of the requirements of the HSC. The HSIE Core will focus on teaching strategies, resourcing and assessment in the Preliminary and HSC years. This unit of study provides opportunities for students to achieve outcomes in understanding Geography for the HSC and designing and delivering a range of teaching strategies, evaluating and developing teaching resources and assessing student achievement of the outcomes of these syllabuses. ICT will be emphasised throughout.

**EDSE4025****Teaching Drama 3****Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr M Anderson **Session:** Semester 1a **Classes:** 4 hrs/wk **Prerequisites:** EDSE3042 and EDSE3060 plus 12 credit pts of Performance Studies **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** Assessment is based on the preparation and analysis of their own performance in a public venue and on research based on teaching of an individual project area related to the NSW HSC drama course. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit continues preparing students for the teaching of secondary Drama. The course seeks to extend the students' experience in performing. Students work with critical friends and mentors, collaborating with schools and other educational institutions, critically reflecting on their own and other people's work. Students undergo a group performance project where they learn of the rigorous nature of collaborative drama experientially.

**EDSE4026****Teaching TESOL 3****Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Ms Theodora Laskas **Session:** Semester 1a **Classes:** 14 x 2 hr sem/workshops **Prerequisites:** EDSE3043 and EDSE3061 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** 2 assessments and bookclub presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

The role of the ESOL teacher has become increasingly complex. Graduates may be working with adults or with teenagers in Australia or overseas and across disciplines or curricula. Traditional career pathways no longer exist as teachers are expected to have the flexibility and knowledge base to adapt to a wide variety of contexts. They need an understanding of students' cultural backgrounds and skills in intercultural communication.

**EDSE4027****Teaching English 3****Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jacqueline Manuel **Session:** Semester 1a **Classes:** 4 hours/week **Prerequisites:** EDSE3044 and EDSE3062 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** (1) A piece of work that draws together the theory and practice of teaching English; (2) A practical task requiring the implementation of knowledge and understanding of the Stage 4-5 and Stage 6 syllabus documents. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit will focus intensively on teaching literature, media and other texts in Years 7-12. It will further explore the theory and pedagogy of teaching Stage 6 English. It will also examine the issues relevant to teaching adolescents who may be experiencing difficulties with the reading and wider literacy demands of the curriculum.

**EDSE4028****Teaching Mathematics 3A****Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 1a **Classes:** 3 hours/week **Prerequisites:** EDSE3045 and EDSE3063 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** 1. Researching and presenting a particular aspect of research in mathematics education that relates to the teaching of General Mathematics for HSC (2500 wds); 2. Researching and writing a paper (3500 wds) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit concentrates on the new General Mathematics course which attracts half of the students in Years 11 and 12 and was first examined in the 2001 HSC. The pedagogy for this unit requires teachers to be confident in using graphic calculators and spreadsheets where required. Outcomes Based Assessment is examined in relation to its use in the new HSC. Particular aspects of mathematics education research are explored, including introducing calculus, and the implications of these for teachers in classrooms is considered.

**EDSE4029****Teaching Mathematics 3B****Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr Judy Anderson **Session:** Semester 1a **Classes:** 3 hrs/wk **Prerequisites:** EDSE3045, EDSE3046, EDSE3063 and EDSE3064 **Corequisites:** EDSE4028, EDSE4042, EDSE4043 and EDSE4044 **Assessment:** 1. Researching & presenting a topic from a calculus based course that includes teaching ideas (2500 wds). 2. Interviewing students & teachers and writing a brief report on the findings in relation to the literature (3500 wds). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study focuses on the role of the mathematics teacher in the senior classroom. It is intended to provide the student with techniques for constructing rich learning environments for students in the senior years of high school in preparation for the HSC. Assessment strategies are examined closely as part of the learning experience of students, together with Board of Studies requirements for measuring and recording formative assessment tasks. Technology as a tool for teaching senior mathematics is integrated into the unit.

**EDSE4030****Teaching Languages 3A**

## Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 1a **Classes:** 3 hours/week **Prerequisites:** EDSE3047 and EDSE3065 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** Assessment will be a unit of work programme, a set of short answer research questions and a portfolio. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit is designed to build on curriculum unit EDSE3065 Teaching Languages 2A, to prepare pre-service teachers for, and guide them through, School Experience 2, in preparation for later Internships. Students examine wider related issues for languages education, honing skills, understandings and competencies for future employment and preparing for lifelong learning through continued participation in professional development activities. Students continue on their "journey" of reflection on languages education and prepare for a lifelong professional development in languages education.

## EDSE4031

### Teaching Languages 3B

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 1a **Classes:** 1 hour/week plus guided reading tasks **Prerequisites:** EDSE3047, EDSE3048, EDSE3065 and EDSE3071 **Corequisites:** EDSE4030, EDSE4042, EDSE4043 and EDSE4044 **Assessment:** Assessment will be a unit of work programme, a set of reflections posted on group e-mail and a portfolio. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit is designed for pre-service language teachers continuing with their curriculum method study in a second target language. The unit will continue to build pre-service language teachers' awareness, skills and understandings in languages education, and introduce them to various aspects of research within the languages education arena.

## EDSE4032

### Teaching Computer Studies 3

#### Education and Social Work

**Credit points:** 6 **Session:** Semester 1a **Classes:** 4 hours/week **Prerequisites:** EDSE3049 Teaching Computer Studies 1 and EDSE3066 Teaching Computer Studies 2 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** Class presentations, report, examinations, research, program design. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

The Information Technology Curriculum Framework, National Training Framework, and AQF certification procedures will be critically examined in the context of VET -Information Technology courses in schools. The notion of key competencies and criterion referenced evaluation and assessment will receive detailed attention. Sources of information including professional associations will be delineated and the nature and scope of the ICT industry will also be explored. The second major focus lies in developing skills in the design of learning environments for the VET classroom. Significant time will be given to developing team or group based approaches to learning, the workplace study, workplace assessor training, writing effective and efficient programs and units of study, and developing valid and reliable assessment tasks based on the assessment guidelines in the National Information Training Package.

## EDSE4033

### Teaching Commerce/Economics 3

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Kate Keeley **Session:** Semester 1a **Classes:** 4 hrs/wk **Prerequisites:** EDSE3050 and EDSE3067 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** There will be three assessment tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study consists of HSIE Core 3 (2 hrs/wk) and Economics/Business Studies (2 hrs/wk). In HSIE 3 students will gain an understanding of the requirements of the HSC. The HSIE Core will focus on teaching strategies, resourcing and assessment in the Preliminary and HSC years. This unit of study provides opportunities for students to achieve outcomes in understanding Economics and Business Studies for the HSC and designing and delivering a range of teaching strategies, evaluating and developing teaching resources and assessing student achievement of the outcomes of these syllabuses. ICT will be emphasised throughout.

## EDSE4034

### Teaching Science 3 (Core)

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1a **Classes:** 4 hours/week **Prerequisites:** EDSE3051 and EDSE3068 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** Assessment will be based on an essay and a class presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B Sc (Psych), UG Study Abroad Program.

The unit is designed to enable students to investigate current research in the nature of children's learning in science, contemporary science curricula, the teaching of science in the secondary school, and the relevance and impact of across-curriculum perspectives on the nature and implementation of science curricula. Each student is to investigate and report on a particular issue in science education, teaching and learning.

## EDSE4035

### Teaching Science 4 (Sci Hist & Phil)

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Tony Sperring **Session:** Semester 1 **Classes:** 4 hours/week **Prerequisites:** EDSE3051 and EDSE3068 **Corequisites:** EDSE4042, EDSE4043 and EDSE4044 **Assessment:** Assessment will be based on an essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is a double method course unit. An understanding of the nature of science ought to inform beliefs, practices and policies related to science and technology education in school (and beyond). Teachers of science need to develop an awareness of the pitfalls associated with uninformed views about the history and philosophy of science, particularly as they are now required to focus on both the history of science and the nature and practice of science in the development of teaching programs for the new school science syllabuses in NSW and in other systems' syllabuses. In this unit of study students will examine contemporary from the history, philosophy and sociology of science and their relevance to school science teaching and learning, and science curriculum design and implementation.

## EDSE4041

### Teaching Science Elective (Physics)

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Alex Hugman **Session:** Semester 1 **Classes:** 4 hours/week **Prerequisites:** 54 credit points including 24 credit points of Education and EDSE2001 and 12 credit points of Physics **Assessment:** Assessment will be based on two assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit of study is a double method Science elective which complements the common ("core") Science Curriculum courses, Science Curriculum 1 (Core) and Science Curriculum 2 (Core), taken

by all science Education students in the third year of the combined degree program. In this course unit, students study issues in the teaching and learning of Stage 6 Physics.

#### EDSE4042

##### Craft Knowledge and Prof Practices 3 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Llian Merritt **Session:** Semester 1 **Classes:** 5 hrs/wk for 6 wks and 2 three hr workshops (36 hrs) **Prerequisites:** 108 credit points including 30 credit points of Education, EDSE3073, EDSE2001, EDSE3072 and two of the following EDSE3056, EDSE3057, EDSE3058, EDSE3059, EDSE3060, EDSE3061, EDSE3062, EDSE3063, EDSE3064, EDSE3065, EDSE3071, EDSE3066, EDSE3067, EDSE3068, EDBT5660 **Assessment:** 1. Web-based discussion, 2. Essay: 2000 wds, 3. Evidence-based teaching and journal writing: 2500 wds. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, UG Study Abroad Program.

This unit of study focuses on practice, theory and research for beginning teachers in classrooms, schools and the wider educational community in relationship with the standards of teaching and the importance of evidence-based teaching for individual and collective change and improvement. This unit of study is integrated with professional experience and explores issues, dilemmas and challenges for beginning teachers through journal writing and web-based writing and discussion.

#### EDSE4043

##### Professional Experience B Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Di Bloomfield **Session:** Semester 1 **Classes:** 25 days in-school experience **Prerequisites:** 108 credit points including 30 credit points of Education, EDSE2001, EDSE3072, EDSE3073 and two of the following: EDSE3056, EDSE3057, EDSE3058, EDSE3059, EDSE3060, EDSE3061, EDSE3062, EDSE3063, EDSE3064, EDSE3065, EDSE3071, EDSE3066, EDSE3067, EDSE3068, EDBT5660 **Corequisites:** EDSE4042 and EDSE4044 **Assessment:** Satisfies Requirements / Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, UG Study Abroad Program.

This unit of study provides students with the opportunity to undertake a range of professional experiences in secondary schools, enabling them to explore, enact and reflect upon the links between the theory and practice of their chosen profession. This unit of study is the second school experience in the program, and the final fully supervised practicum before the Internship. In this unit of study, students have a more extended period of time in a school and begin to assume a greater awareness of the diversity of students in their classes. They will be expected to be more aware of the community beyond the school.

#### EDSE4044

##### Information Technology in Schools Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Ms Vilma Fyfe **Session:** Semester 2 **Classes:** 20 hours: 2 hours per week over 10 weeks **Prerequisites:** 108 credit points including 30 credit points of Education, EDSE2001, EDSE3072 and two of EDSE4021, EDSE4022, EDSE4023, EDSE4024, EDSE4025, EDSE4026, EDSE4027, EDSE4028, EDSE4029, EDSE4031, EDSE4032, EDSE4033, EDSE4034, EDSE4035, EDSE4041 and EDBT6610 **Corequisites:** EDSE4042, EDSE4043 **Prohibitions:** EDSE4038 **Assessment:** Assessment will be based on: the creation of a data base and associated activities; creation of a web site; and creation of a PowerPoint presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, UG Study Abroad Program.

The unit will provide students with a conceptual ICT framework based on national and international standards used in accreditation of initial programs for Teacher Education.

The unit focuses on the instructional designer's task involving analysis of needs, use of ICT, and production, implementation and evaluation of classroom resources.

#### EDSE5001

##### TESOL as a Third Teaching Area Education and Social Work

**Credit points:** 12 **Session:** Semester 1 **Classes:** 6 hrs/wk **Prerequisites:** 144 credit points including 78 credit points of Education and 24 credit points of English, Linguistics or a Language other than English **Corequisites:** EDSE5008 and EDSE5009 **Assessment:** 2 presentations; observation report; design of teaching materials; grammar test. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, UG Study Abroad Program.

This unit of study aims to develop students' understanding of second language acquisition research and its implications for the teaching and learning of second language learners. The unit will link fieldwork with an exploration of current language education research. The unit has relevance for teaching in Australia and overseas and focuses on the development of communicative competence. The unit is closely connected with EDSE5009 TESOL Professional Experience.

#### EDSE5008

##### Internship Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Di Bloomfield and Dr Tony Loughland **Session:** Semester 1 **Classes:** 30 days in school experience/18 to 20 periods/week **Prerequisites:** 144 credit points including 78 of Education and (EDSE3055 or EDSE3073) and (EDSE4040 or EDSE4043) **Assessment:** Assessment is based on a satisfactory report from the supervising school and the tertiary mentor (Satisfies requirements/Fail) **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, UG Study Abroad Program.

This final Internship is a bridge between the ending of preservice professional preparation and the first year of teaching. Under the guidance of the Mentor, Internees (Associate Teachers) will gain knowledge and experience of all facets of the role of the teacher in the school and prepare themselves as thoroughly as possible for their first year of teaching. The exact nature of the Internship for each Associate Teacher will be negotiated with the school at the time of the application to the school for Internship and subsequent interview by members of school staff.

#### EDSE5009

##### TESOL Professional Experience Education and Social Work

**Credit points:** 6 **Session:** Semester 1 **Classes:** 12 days in school experience **Prerequisites:** 144 credit points including 78 credit points of Education and 24 Credit Points from English, Linguistics and/or a Language other than English **Corequisites:** EDSE5001 and EDSE5008 **Assessment:** Students will be assessed as satisfactory or unsatisfactory in meeting the requirements of the Practicum. The criteria will include a consideration of planning based on clear principles and a sound grasp of relevant content; preparation taking into account the demands of the syllabus and the nature of the students. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, UG Study Abroad Program.

This unit of study will link fieldwork in schools and intensive language centres with an exploration of current language education research. Students will develop skills in linking their assessment of the abilities and needs of teenage and adult learners of English with programming. This unit aims to develop students' professional understanding and expertise as second language educators. It has relevance for teaching in Australia and overseas and focuses on the development of communicative competence.

#### EDSE5010

##### Meeting the Needs of Cultural Diversity Education and Social Work

**Credit points:** 12 **Teacher/Coordinator:** Ms Kate Keeley **Session:** Semester 1 **Classes:** 12 hrs/wk **Prerequisites:** 144 credit points including 78 credit points of Education **Corequisites:** EDBT5000 and EDSE5008 **Assessment:** There will be three assessment tasks. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec: Maths), B Sc, B Ed (Sec: Science), B Sc, UG Study Abroad Program.

This unit of study will focus on a range of culturally specific teaching and learning strategies aimed at increasing the ability of students to engage and motivate school students from diverse cultures, including Aboriginal culture. The course will involve exploring some of the major issues confronting teachers, schools, communities and involve interaction with appropriate communities as a precursor to working with school students in a range of culturally appropriate settings. The course will involve working with resource staff from the Faculty's partnership regions and schools.

### EDSP3001

#### Teaching Practicum 1

##### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Di Bloomfield **Session:** Semester 2 **Classes:** 10 days in school experience **Prerequisites:** 48 credit points including 18 credit points of Education and EDSP3002 **Assessment:** Evaluation will be through completion of a satisfactory report. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych).

This unit will include a range of professional experiences in schools and other learning contexts - e.g. observing, acting as a teacher's aide, teaching in a classroom and participating in wider school and community activities.

### EDSP4001

#### Psychological and Educational Assessment

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 1 **Classes:** 1 lecture 1.5 hours for 12 weeks; 1 skills based workshop tutorial 1.5 hours for 12 weeks **Prerequisites:** Completed major in Psychology with a Credit average in each of Intermediate and Senior Psychology units; EDSP2001, EDSP3002. **Assessment:** Two protocols and reports (40%); Summative exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych).

This unit introduces the student to the principles of assessing children and the topic of intelligence. Various models of intelligence are studied within an historical framework, including the development of instruments for measuring intelligence. The relationship between models of intelligence and cognitive assessment techniques is discussed, with particular emphasis placed on the critical evaluation of commonly used individually administered intelligence tests. The difference between testing and assessment is discussed, and the multiplicity of factors contributing to successful assessment is emphasised. The principles of standardised testing and the application of competent, ethical, professional use of intelligence tests are taught using current tools such as the Woodcock Johnson Cognitive Test (3rd edition), Wechsler Scales and the Stanford Binet (5th Edition). The psychometric properties of tests are examined. The appropriateness of the assessment of specific groups such as young, developmentally young and culturally different children is critically evaluated. Supervised practice of key tests of intelligence is organised in small group workshop sessions. Competency is expected in the administration and scoring of key IQ tests and in the writing of assessable reports.

### EDSP4002

#### Behaviour Assessment and Interventions

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 2 **Classes:** 1 lecture 1.5 hours for 12 weeks; 1 skills based workshop tutorial 1.5 hours for 12 weeks **Prerequisites:** Completed major in Psychology with a credit average in each of Intermediate & Senior Psychology units; EDSP2001, EDSP4001. **Assessment:** Seminar presentation and paper (60%); Case study (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych).

The assessment of behaviour problems, both externalising and internalising, is introduced as it applies to children and young people

in educational and home settings. Links between the theories, description and classification of problem behaviour and DET practice in NSW will be highlighted. Appropriate strategies for the assessment of behaviour and mental health problems, programming for behaviour management and mental health support strategies, and the evaluation of intervention programs are discussed as they apply to the educational and other environments in which School Counsellors work. Alternative settings for individuals with behaviour and mental health difficulties are studied and critically evaluated.

### EDSP4003

#### Counselling Practicum 2

##### Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 2 **Classes:** 20 days school counselling experience in schools. **Prerequisites:** Completed major in Psychology with a Credit average in each of Intermediate and Senior Psychology units; EDSP2001. **Corequisites:** EDSP4004 **Assessment:** Students will continue to develop a counselling portfolio covering final performance outcomes due at the end of the five years of study. Assessment of the outcomes will be based upon specified criteria for each outcome. The grading will be on a Satisfactory or Unsatisfactory basis. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych).

The counselling practicums are sequenced to allow students the opportunity to learn about the profession of school counselling from the beginning of the training program. Counselling Practicum 2 focuses on the application of assessment skills including test administration, report writing, and completion of a behaviour oriented case study.

### EDSP4004

#### Teaching Practicum 2

##### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Di Bloomfield **Session:** Semester 2 **Classes:** 10 days in school experience **Prerequisites:** 48 credit points including 18 credit points of Education, EDSP3001, EDSP3002 and one of the following: EDSE4021, 4023, 4025, 4026, 4027, 4028, 4030, 4034 **Corequisites:** EDSP4003 Counselling Practicum 2 **Assessment:** Pass/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych).

Professional experience is a core part of the professional preparation of teachers. It provides students with opportunities to develop their teaching skills and professional understandings. It is a pivotal opportunity for beginning teachers to experiment and to implement a wide range of strategies and pedagogy that they have acquired during their university-based courses. This unit of study provides students with the opportunity to undertake a range of professional experiences in secondary schools, enabling them to explore, enact and reflect upon the links between the theory and practice of their chosen profession. This unit of study is the second school experience in the program. In this unit of study, students have a more in depth period of time in a school, and begin to assume a greater awareness of the diversity of students in their classes. They will be expected to be more aware of the community beyond the school.

### EDSP5001

#### Counselling Children and Adolescents

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 1 **Classes:** 1 lecture 1.5 hours for 12 weeks; 1 skills based workshop tutorial 1.5 hours for 12 weeks **Prerequisites:** Completed major in Psychology with a Credit average in each of Intermediate & Senior Psychology units; 50 credit points of Education **Assessment:** Case Study Value: 50%; 2500 words Pamphlet and resource folder Value: 50% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study is designed to introduce the students to issues and concepts related to counselling children and adolescents within the school setting. Key counselling skills and specific therapeutic strategies are introduced. The focus will be on accurate assessment of the concerns and the development of intervention plans appropriate for the educational environment.

## EDSP5002

### Issues in School Counselling Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 2 **Classes:** 1 lecture 1.5 hours for 12 weeks; 1 skills based workshop tutorial 1.5 hours for 9 weeks **Prerequisites:** Completed major in Psychology with a Credit average in each of Intermediate & Senior Psychology units; 50 credit points of Education. **Assessment:** 1. Plan for Leading a Workshop on a topic related to school counselling, including the preparation of an exercise with experiential focus and a summary handout on the selected topic (50%); 2. EITHER (a) Test Review brief presentation and summary paper (1000-1500 wds plus summary)(35%) plus provide 6 hrs of assistance to the PsychoEducational Resources Centre (15%) OR (B) major case study (2000-2500 wds) focussed on a child or adolescent with academic difficulties (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

This unit of study focuses on ethical and professional skills for school counselling and provides an overview of the key issues for school counsellors working in primary school settings, specifically literacy and language research assessments and interventions.

## EDSP5003

### Counselling Practicum 3 Education and Social Work

**Credit points:** 2 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 1 **Classes:** 10 days school counselling experience in NSW DET schools, typically as one day per week attendance, but may include a five day period as a block of country/rural practicum. **Prerequisites:** Completed major in Psychology with a credit average in each of Intermediate and Senior Psychology units; 50 credit points of Education **Assessment:** Students will have developed a school counselling portfolio covering final performance outcomes due at the end of the five years of study. Assessment of the outcomes will be based upon specified criteria for each outcome. The final overall grading will be on a Satisfactory or Unsatisfactory basis, including ratings from the field supervising counsellor and a university supervising counsellor, and the satisfactory completion of a logbook and portfolio items covering the final outcomes listed in Practicum 4. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

The counselling practicums are sequenced to allow students the opportunity to learn about the profession of school counselling from the beginning of the training program. Counselling Practicum 3 focuses on working as a school counsellor under supervision of university staff and school counsellors. The role of the school counsellor includes counselling children and adolescents with problems, assessing children and adolescents with problems, and developing intervention programs for those with learning and behaviour challenges, liaising with teachers to enhance the classroom learning environment, and developing preventative programs for students at risk. This practicum will include a counselling/therapeutic case study.

## EDSP5004

### Counselling Practicum 4 Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Susan Colmar **Session:** Semester 2 **Classes:** 10 days school counselling experience in NSW DET schools, typically as one day per week attendance. **Prerequisites:** Completed major in Psychology with a Credit average in each of Intermediate & Senior Psychology units; 50 credit points of Education. **Assessment:** Students will have developed a school counselling portfolio covering final performance outcomes, fully specified in documentation provided to each student and supervisor, due at the end of the five years of study. Assessment of the outcomes will be based upon specified criteria for each outcome. This practicum is four credit points as it will include a final and full write-up incorporating all four Counselling Practicums in the form of a portfolio, in terms of achievement of final outcomes as specified. The final overall grading will be on a Satisfactory or Unsatisfactory basis, including ratings from the field supervising counsellor and a university supervising counsellor, and the satisfactory completion of a logbook and portfolio items covering the final outcomes listed in Practicum 4. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed, B A (Psych), B Ed, B Sc (Psych), UG Study Abroad Program.

The counselling practicums are sequenced to allow students the opportunity to learn about the profession of school counselling from the beginning of the training program. Counselling Practicum 4 focuses

particularly on professional and ethical issues in working as a school counsellor, under supervision of university staff and school counsellors. The role of the school counsellor includes counselling children and adolescents with problems, assessing children and adolescents with problems, and developing intervention programs for those with learning and behaviour challenges, liaising with teachers to enhance the classroom learning environment, and developing preventative programs for students at risk. This practicum will include a case study, focussed on establishing an intervention program for a child experiencing academic difficulties.

## EDUF1016

### Science Foundations 1 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Armstrong Osborne **Session:** Semester 1 **Classes:** Consists of an introductory week followed by two 4 week modules, one on Living Things and the other on Matter. Each module consists of two 1 hour lectures and a 2 hour workshop session per week. An all day (6 hour) compulsory field activity will be held o **Assessment:** Assessment will be based upon assignments, practical work, and field work (40%) and a semester examination (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

Science Foundations 1 is a unit of study for all students enrolled in the Bachelor of Education Primary. The unit of study will provide students with a background in science and children's understanding of scientific concepts relating to biology and chemistry, relevant to their curriculum studies in K-6 Science and Technology. The coursework will consist of four hours per week, made up of lectures and workshop/seminars, an all-day field excursion and self-directed or assigned activities. The units will be taught using the staff and facilities of both the Faculty of Education and Social Work and the Faculty of Science.

#### Textbooks

Printed workshop notes are produced for the two modules in Science Foundations 1. Students should purchase Volume 1 from the University Copy Centre prior to the commencement of lectures.

## EDUF1017

### Science Foundations 2 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Armstrong Osborne **Session:** Semester 2 **Classes:** Consists of an introductory week followed by two 5-week modules, one on The Earth and its Surroundings and the other on Physical Phenomena. Each module consists of two 1 hour lectures and a 2 hour workshop session per week. An all-day (6 hour) compulsory **Assessment:** Assessment will be based upon assignments, practical work, and field work (40%) and a semester examination (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

Science Foundations 2 is a unit of study for all students enrolled in the Bachelor of Education Primary degree. The unit of study will provide students with a background in science and children's understanding of scientific concepts relating to geoscience and physics, relevant to their curriculum studies in K-6 Science and Technology. The coursework will consist of four hours per week, made up of lectures and workshops/seminars, an all-day field excursion and self-directed field or assigned activities. The units will be taught using the staff and facilities of both the Faculty of Education and Social Work and the Faculty of Science.

#### Textbooks

It is recommended that students purchase: - Skamp, P., 2004, Ed. Teaching Primary Science Constructively, Second Edition, Thomson, Southbank 534 p This text will be used for Science Education in later years. Printed workshop notes are produced for the two modules in Science Foundations 2. Students should purchase Volume 3 from the University Copy Centre prior to the commencement of lectures.

## EDUF1018

### Education, Teachers and Teaching Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Ginns **Session:** Semester 1 **Classes:** Lectures : 2 hrs/wk; Seminars : 1 hr/wk; Workshops : 1 hr/wk for 8 wks **Prohibitions:** EDUF1011 **Assessment:** Seminar presentation, 2000 word

academic essay and final examination (1.5 hours). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B Sc (Psych), B Int S, B S T, UG Study Abroad Program.

This unit of study is the first part of Education I and provides a general introduction to education and teaching. The unit integrates the following themes: knowledge, culture and the curriculum; teaching as a process and way of life; and, teachers as life-long learners and researchers. Within this unit, students are also mentored by more experienced students during their first semester transition to the university. At the conclusion of the unit students should have developed and demonstrated an understanding of the complex character of teachers' work

## EDUF1019

### Human Development and Education Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Stephen Juan **Session:** Semester 2 **Classes:** Lectures: 2 hours/week for 10 weeks; Tutorials: 1 hour/week for 10 weeks; Workshops: 1 hour/week for 10 weeks **Prohibitions:** EDUF1012 **Assessment:** Seminar presentation, 2000 word essay, examination 2 hour. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B Sc (Psych), B Int S, B S T, UG Study Abroad Program.

This unit of study is the second part of Education I. EDUF1019 introduces students to contemporary understandings of human development across the life-span with particular emphasis on childhood and youth. Such understandings are essential for students who intend to work as teachers with young people. They are also of utility to other students who have an interest in human development issues. This unit addresses one of the major goals of Education I, II, and III, that is, the learning of a body of knowledge on "human development (child and adolescent in particular)". The Unit concentrates upon the phases of human development with and across the following domains: physical (including brain development, body growth, and motor development), cognitive, social, psychological, moral, aesthetic, and language development. Contemporary theory and research will be used to examine development across the phases of the life-span and within the various developmental domains. A focus will be on an introduction to issues of relevance to the understanding of human development such as the impact of history and culture upon human development, the impact of technology and social change upon the human development future, implications of recent brain research upon human development and the human development issues faced by children with special developmental/educational needs. In addition, the module Introduction to Computers in Education seeks to give students a beginning knowledge of computers and information technology relevant to their development as educational professionals. The unit also functions to give beginning teachers (1) a knowledge of and respect for the diverse social, cultural, and ethnic and religious backgrounds of students, and the effects of these factors on learning, (2) knowledge of the physical, social and intellectual developmental characteristics of the ages of students from K to year 12, (3) knowledge of students' varied approaches to learning, and (4) knowledge of how the skills, interests, and prior achievements of students affect learning.

## EDUF2006

### Educational Psychology Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Richard Walker **Session:** Semester 1 **Classes:** Lectures: 2 hours/week for 12 weeks; Tutorials: 1 hour/week for 12 weeks **Prerequisites:** (EDUF1018 and EDUF1019) or 30 junior credit points **Assessment:** Tutorial presentations (oral & written), 2000 word essay, examination 2 hours. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B Sc (Psych), B Int S, UG Study Abroad Program.

This unit of study is the first part of Education II. Its aim is to provide a general introduction to educational psychology. The important issues of the unit include constructivist and other approaches to learning, critical thinking skills, problem solving, technologically supported learning and motivation. This unit plays an important role in supporting later teaching and curriculum studies in the Bachelor of Education degree. At the end of this unit of study, students will have made substantial progress towards understanding the utility of research in psychology for educators. They will have the capacity to describe learning and teaching activities in terms of their psychological efficacy, especially as it relates to young people. Similarly they will have been introduced to the theory and practice of assessment and evaluation in educational settings, and the impact of assessment on learning and motivation. They will have had training in two Department of Education and Training policies, Good Discipline and Effective Learning, and Student Welfare.

## EDUF2007

### Social Perspectives on Education Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Associate Professor Debra Hayes **Session:** Semester 2 **Classes:** Lectures: 1 hour/week for 12 weeks; Workshops: 2 hours/week for 11 weeks **Prerequisites:** (EDUF1018 and EDUF1019) or 30 junior credit points **Assessment:** Workshop presentations, 1000 word literature review, 4000 word joint research project, examination 1.5 hours. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, B Ed, B Sc (Psych), B Int S, UG Study Abroad Program.

This unit of study is the second part of Education II. Its aim is to provide a general introduction to the social, political and economic contexts of education. The two themes studied in the Unit are: Schools and communities, and Educational systems, markets and globalisation. At the end of this unit of study, students should have the capacity to discuss the impact of a range of educational practices and policies on communities of students and families. Similarly, students will be familiar with broad movements in contemporary educational reform and their association with national and global economic change. As a result of working collaboratively on a substantial project students will develop a range of research skills. Training is provided in the following Department of Education and Training policies and procedures: Aboriginal Education, Anti-Racism and Gender Equity.

## EDUF2553

### Education Exchange Education and Social Work

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Des and Tech), B Ed, B A (Psych), B Ed, B Sc (Psych).

## EDUF3023

### Sports, Leisure and Youth Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Tim Allender **Session:** Semester 1 **Classes:** Lectures: 1 hr/ wk for 12 wks; Seminar: 2 hrs/wk for 11 wks. **Prerequisites:** 42 credit points **Assessment:** Seminar presentations, 750-1000 word tutorial paper, 2000 word essay & 1.5 hour examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ed (Soc Sc), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit of study deals with the role of schools and other agencies in fostering physical education and the reactive process of societal 'control' over youth, with an emphasis on theories that have emerged regarding these issues. These include how youth, sport and leisure have been socially constructed over time and how each relates to class, gender, ethnicity, sexuality, social identity and age. Also to be explored is how youth, sport and leisure have been associated with

specific educational aims and particular institutions and organisations. Post-modern approaches are incorporated such as the reconfiguration of the work/leisure dichotomy, youth as an ageless phenomenon, adolescent sexuality, the identity of the young and the role of sports sites and organizations such as the beach and surfing clubs. Students are encouraged to develop arguments and ideas through written assignments, seminars and examination. The unit is designed to encourage student-based multi-disciplinary inquiry as is consistent with the Education III rationale. It is designed also to encourage students to become more informed citizens and life-long learners.

### EDUF3026

#### Global Poverty and Education Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Professor Phillip Jones **Session:** Semester 1 **Classes:** Lectures: 1 hour/week for 12 weeks; tutorials: 2 hours/week for 12 weeks **Prerequisites:** 42 credit points. **Assessment:** One 1 hour exam, one 2500 word essay, one 1250 word workshop paper, one 750 word workshop paper. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit of study explores relationships between education, poverty and development in the less-developed parts of the world. It acknowledges the importance of a broad-ranging view of development, including its economic, cultural and technological dimensions. The unit begins with an analysis of the impact of globalisation on poorer regions, moving to consideration of a range of theories of development and how education is viewed in them. The major part of the unit examines key issues facing educational development in poorer countries at the present time, and moves on to country and/or regional case studies, consideration of the Australian foreign aid program in education, and the role of UN agencies in educational development. Students will be assessed on the basis of: workshop participation, examination & essay. The emphasis, in all aspects of assessment, will be on demonstrating a sound understanding of the theories developed within the unit of study and applying these to the less-developed areas of the world. The use of educational research to support students' work, combined with a critical integration of all information used, is an integral component of the unit. The unit is especially designed for those who have an interest in developing countries, who may be teaching or writing about development issues, or who may be interested in careers in international and development education, whether in Australia or overseas.

### EDUF3027

#### International Education Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Nigel Bagnall **Session:** Semester 2 **Classes:** Lectures: 1 hour/week for 12 weeks; tutorials: 2 hours/week for 12 weeks **Prerequisites:** 42 credit points **Assessment:** 1 hour exam, 2500 word essay, two 1000 word workshop papers, workshop participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

The unit emphasis is on the underpinning global education trends of the developed world. A number of themes are dealt with in this global context, in particular youth transition, Indigenous education issues in Australia, USA and New Zealand, the emergence of international curriculum and assessment and a number of education system case studies. These case studies will include the education systems of France, Great Britain, Germany and the United States. The unit will appeal to students who are likely to work in the increasingly global world of teaching and may be involved in latter years in working in organizations such as UNESCO, the OECD or the World Bank.

### EDUF3028

#### Mentoring in Educational Contexts

### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr. Lesley Scanlon **Session:** Semester 1 **Classes:** Lectures: 1 hour/week for 10 weeks; seminars: 2 hours/week for 10 weeks **Prerequisites:** 42 credit points **Assessment:** Seminar presentation, reflective journal and participation in a first year mentor workshop or other approved mentor programme. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

It is increasingly difficult for young people to survive in contemporary risk societies. Particularly problematic is their successful navigation of unfamiliar communities of practice manifest as organisational structures. Subsequently, mentoring has been widely adopted internationally to support young people acquire the organisation know-how essential to organisational survive. Specifically, within an educational context mentoring as theory and practice has assumed critical importance in introducing pre-service teachers to the professional practice of teaching. This unit of study examines mentoring in schools and universities and other organisational structures. Students use a range of sociological theories and constructs in order to develop a critical understanding of mentoring as professional practice.

### EDUF3029

#### Psychology of Learning and Teaching Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Ginns **Session:** Semester 2 **Classes:** Lectures: 1 hr/wk for 12 wks; tutorials: 2 hrs/wk for 12 wks **Prerequisites:** 42 credit points and EDUF2006 **Assessment:** 2000 word essay (35%), collaboratively written 2500 word tutorial paper (20%), individual oral tutorial presentation (15%), 2 hour take home exam (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit of study examines four themes from current research on learning and teaching which have significant implications for enhancing learning outcomes in educational settings: (1) the self-system, learning and achievement; (2) collaborative learning: cognitive and motivational factors; (3) information processing and the design of instruction; and (4) learning from text, illustrations and multimedia. Each of these themes is defined by a central question (e.g. how is the self-system organised and what is its relationship to student achievement?) which is examined through several bodies of related recent research. In addition to lectures on each theme, students present the results of their collaborative self-directed research on one of the themes in a series of presentations held in the last three weeks of the unit of study. At the completion of the unit students should be able to analyse, synthesise, and draw conclusions from theory and research in each of the four themes considered, derive educational implications and applications for an educational level (e.g. primary, secondary), demonstrate the skills involved in collaborative and self-directed learning, and demonstrate competence in oral and written communication skills.

### EDUF3030

#### Australian Secondary Schooling Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Helen Proctor **Session:** Semester 1 **Classes:** Weeks 1 to 6/Lectures: 2 hrs/wk; Tutorials: 1 hr/wk. Weeks 7 to 12/Lectures: 1 hr/wk; Workshops: 2 hrs/wk **Prerequisites:** 42 credit points **Assessment:** Three reading guides (2100 wds), Essay (3000 wds), Exam (1 hr). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

How can we explain the ideas, practices and institutions which form the modern Australian secondary school? This unit looks for the answers in the history of the secondary school. Where did the HSC, prefects, SRCs, school uniforms, the curriculum, the private and the public school, the coed and single sex school, and the church and

public schools all come from? Understanding the history of the present enables a powerful advantage in the process of reforming secondary schools and education. The first part of the unit looks at the inheritance from Europe and North America before concentrating on Australia, and New South Wales in particular. The workshop and assignment program encourages students to work on the experience and history of particular schools in which they may be interested.

### EDUF3031

#### Positive Approaches to Special Education Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Ilektra Spandagou **Session:** Semester 1, Semester 2 **Classes:** Lectures: 1 hr/wk for 12 wks Workshop: 2 hrs/wk for 6 wks, 20 hrs fieldwork placement **Prerequisites:** 42 credit points **Assessment:** Fieldwork report (equiv.4000 wd), tutorial presentation (equiv. 650 wd), three position statements (equiv.1350 wd). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit addresses issues relating to the education of students with special education needs. They include the impact of the philosophy and principles of inclusive education and current legislation, evidence based approaches to curriculum, teaching and learning practices for students with special education needs. A specific focus is given to managing challenging behaviours of students in a range of settings.

### EDUF3032

#### Curriculum and Evaluation Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Associate Professor Robyn Ewing and Dr Lesley Scanlon **Session:** Semester 2 **Classes:** Lectures: 1 hour/week for 12 weeks; Tutorials: 2 hours/week for 12 weeks **Prerequisites:** 42 credit points **Assessment:** Mind Map 10%, Analysis of Curriculum Document 20%, Seminar presentation 30% and related paper on a curriculum phenomenon 40%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

'Curriculum' can mean many things: syllabuses, curriculum documents, policies, plans for teaching by faculties and individual teachers, sets of materials and resources used as the basis for developing learning experiences for learners as well as the learning experiences themselves. In addition curriculum as process includes all of the thinking, talking and interacting between individuals and groups that are necessary to arrive at decisions that are recorded in plans and documents. Evaluation and assessment are often misunderstood concepts. Cultural, social and political influences drive decisions about who, what and how will be evaluated. Evaluation and assessment are often conflated with large scale testing regimes because they can lead to easily quantifiable results. A broader and more accurate understanding of these terms is important for all educators.

### EDUF3034

#### Australian Theatre, Film and Learning Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr John Hughes, Dr Michael Anderson **Session:** Semester 1, Semester 2 **Classes:** 10hrs lectures, 10 hrs seminars, 4 field trips **Prerequisites:** 42 credit points **Assessment:** Essay (2500 words), Film Assignment essay (2500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit of study will examine the nature of theatre and film in Australian cultural and educational settings. A particular focus will be placed on theatre and film for and by young people, and the range of learnings that take place through young people's engagement in, and appreciation of, theatre and film. In addition, the role and nature of Australian film and theatre will be placed within an international context so that students can examine the international forces influencing Australian culture. Indigenous issues in Australian Film and Theatre

will be examined. Australian Theatre, Film and Learning will provide first hand experiences of Australian films and theatre performances through field trips to significant theatre performances and festivals, Australian school performances and the viewing of Australian films.

### EDUF3035

#### Multicultural Learning and Teaching Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 1, Summer Main **Classes:** Lectures: 2 hrs/wk for 9 weeks, Field: 3 hrs/wk for 3 weeks, Seminars: 3 hrs/wk for 3 weeks **Prerequisites:** 42 credit points **Assessment:** Critical reflective diary 40%, Seminar Presentation 60% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program, UG Summer/Winter School.

This unit provides students with a deeper understanding of the historical, cultural and sociological construction of youth in Australia today. This knowledge, as well as the changing experiences of young people, is an important foundation for today's educators. This unit will focus on the Australian educational experience set within the context of multicultural social change.

### EDUF3036

#### Arts-Based Learning and Teaching Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianne Hulsbosch **Session:** Semester 2 **Classes:** Lectures: 2 hrs/wk for 9 weeks; Field Study: 3 hrs/wk for 3 weeks; Seminars: 3 hrs/wk for 3 weeks **Prerequisites:** 42 credit points **Assessment:** Critical reflective diary: 40%, Case Study: 60% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program, UG Summer/Winter School.

This unit provides students with an understanding of the traditions, influences, stylistic and contemporary practices contributing to art and design in Australia and the Pacific. Knowledge of art and design, as well as design traditions and contemporary practices, are an important foundation for both practitioners and art educators. This unit will focus on Indigenous Australian and Pacific Islander art and design education.

### EDUF3554

#### Education Exchange Education and Social Work

**Credit points:** 24 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Des and Tech), B Ed, B A (Psych), B Ed, B Sc (Psych).

### EDUF4005

#### Research Honours A Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Assoc. Prof. Jennifer O'Dea **Session:** Semester 1 **Classes:** 1 lecture, one 1 hr tutorial and one 1 hr seminar per wk for 7 wks **Assessment:** 1. Poster presentation describing research project 500 wd (25%); 2. Location and review of literature 2000 wd (25%); 3. Research proposal including methodology and data collection 3000 wd (50%); **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit of study is designed to assist students undertaking the Honours program to understand and make links between research, teaching and learning and to develop knowledge, understanding and skills to both use research and to undertake research. In particular, this unit of study provides the skills, knowledge and understandings to prepare students to undertake, conduct and present research as part of the Honours program in semester 2. Students will build on their understanding of the research process and, in particular, of research methods used in education. It will provide an understanding of the relationships between research and practice to further develop students as informed professionals who can critically analyse, use published research and conduct research. It will also provide knowledge and skills that are essential for teachers to investigate their own practice and to provide evidence of effective teaching and successful student learning.

#### EDUF4006

##### Research Honours B

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Assoc. Prof. Jennifer O'Dea **Session:** Semester 2 **Classes:** 1 (normal 12 x 2 hr weekly workshops with the supervisor). **Prerequisites:** EDUF4005 **Assessment:** Honours Dissertation 10000 wds **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc, UG Study Abroad Program.

This unit supports students in the Honours program in conducting their Honours research project and reporting it in the form of a 10,000 wd dissertation. Students work in small groups with a supervisor on their Honours research projects. The unit consolidates the knowledge and skills teachers need to investigate their own practice and provide evidence of effective teaching and successful student learning. This unit also aims to prepare eligible students for postgraduate research.

#### EDUF4044

##### Reading and Designing Research

##### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Associate Professor Debra Hayes **Session:** Semester 1, Semester 2 **Classes:** Lectures: 2 x 1 hour/week; Workshops: 2 hours/week; Tutorials: 1 hour/week (Classes are conducted during the first seven weeks of semester). **Prerequisites:** 120 credit points including (EDUF2005 or EDUF2006) and (EDUF2002 or EDUF2007) **Assessment:** Two oral presentations (30%); literature review (20%) and final project (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (H M H E), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Hum Soc Sc), B A, B Ed (Sec:Maths), B Sc, B Ed (Sec:Science), B Sc.

This unit of study is designed to introduce you to the field of research in education. You will develop an appreciation of the broad range of research topics in education and their associated forms of systematic inquiry. The unit will prepare you to read and interpret research, and to conduct small scale investigations in a range of contexts such as classrooms or schools, or within another setting in which learning opportunities are afforded. These settings might include online communication, outdoor education, excursions, coaching, tutoring, and informal learning associated with home and community contexts. The kinds of research questions considered might include pedagogy, curriculum, policy, and organizational issues, and might consider the perspectives of students, teachers, parents, policymakers and/or the broader community. In preparing an individual research proposal, you will draw upon the research literature to develop your topic and to select a form of inquiry that is suited to it.

#### EDUF4215

##### Education Honours 1

##### Education and Social Work

**Credit points:** 24 **Teacher/Coordinator:** Dr Robyn Gibson **Session:** Semester 1 **Classes:** Independent Study **Prerequisites:** 18 credit points from the following: EDUF3023, EDUF3024, EDUF3026, EDUF3027, EDUF3028, EDUF3029, EDUF3030, EDUF3031, EDUF3032 or EDUF3033 **Assessment:** Satisfactory submission of research proposal (start of year); satisfactory submission of draft chapter (end of semester one); 20 minute presentation (semester 2) and successful completion of Honours thesis. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment. Note: Only students undertaking Education Honours from other Faculties are eligible to enrol.*

**Associated degrees:** B A (Hons), B Ec (Soc Sc)(Hons).

There is no coursework per se in the final Honours year, for non-Education students, with the writing of the Honours thesis comprising EDUF4215 and EDUF4216. The Honours thesis involves investigation of a topic chosen by students and relevant to their own interests. The thesis will be based on the proposal due at the commencement of the year, and is supervised directly by an academic within the Faculty. Although the length of the thesis will vary depending on the nature of the investigation, and length does not necessarily indicate quality, the thesis will not normally exceed 20000 -25000 words. Students should note that, although the program of study is carried out over a full year, the units are nevertheless semesterised. A decision to withdraw from the entire Honours program without penalty must therefore be made before the census date in semester one. A progress report will be completed by students and their supervisors in May, providing both students and their supervisors the opportunity to flag any problems related to the project. Three copies of the thesis should be submitted by the last Friday in October, one of which will be returned to the student. Though theses may be submitted in spiral or thermal binding, arrangements should be made by the candidate for one copy of the thesis to be permanently bound by the first Friday in December, and this copy will be retained by the Faculty.

#### EDUF4216

##### Education Honours 2

##### Education and Social Work

**Credit points:** 24 **Teacher/Coordinator:** Dr Robyn Gibson **Session:** Semester 2 **Classes:** Independent Study **Prerequisites:** 18 credit points from the following: EDUF3023, EDUF3024, EDUF3026, EDUF3027, EDUF3028, EDUF3029, EDUF3030, EDUF3031, EDUF3032, EDUF3033 or EDUF4215 **Corequisites:** EDUF4215 **Assessment:** Satisfactory submission of research proposal (start of year); satisfactory submission of draft chapter (end of semester one); 20 minute presentation (semester 2) and successful completion of Honours thesis. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Only students undertaking Education Honours from other Faculties are eligible to enrol.*

**Associated degrees:** B A (Hons), B Ec (Soc Sc)(Hons).

**EDUF4553****Education Exchange  
Education and Social Work**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Primary), B Ed (Sec)(H M H E), B Ed (Sec), B A, B Ed (Sec), B Sc, B Ed (Sec: Des and Tech), B Ed, B A (Psych), B Ed, B Sc (Psych).

**EDUF5556****Education Exchange  
Education and Social Work**

**Credit points:** 24 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Sec), B A, B Ed (Sec), B Sc.

**EDUH1005****Professional Practice in PDHPE 1  
Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr Steve Georgakis **Session:** Semester 1 **Classes:** 3 hrs/wk for 12 wks and 15 days teaching practicum **Assessment:** PDHPE and Me Report (30%); Lesson plans (40%); Lesson support material (30%); Professional experience **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit of study is the first of four which will examine pedagogical and professional practices in K-12 Personal Development Health and Physical Education (PDHPE). This unit of study focuses on a Primary learning and teaching school setting. Students will examine the K-6 syllabus, modules and support documents to develop the necessary skills to design and deliver appropriate teaching experiences for a specific stage of learner. The unit is linked to a 15 day Professional Experience in a Primary school.

**EDUH1006****Identifying Health Determinants  
Education and Social Work**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3hrs/wk for 12 wks **Prerequisites:** EDUH1005 **Assessment:** Health Priority Group Project (30%); Online assessments (30%) and Health Promotion Report (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit of study is the first of five which explore the ways in which health is socially constructed in contemporary Australian society. In line with the NSW Board of Studies rationale for the inclusion of PDHPE in the classroom, this unit will focus on a socio-cultural view of health whilst acknowledging the role of genetic and hereditary factors. The unit will explore how these determinants impact upon individual and community health status. This unit will explore the ways in which meanings of health are constructed, change over time and affect the health status of Australians.

**EDUH1007****Pedagogy for Physical Education 1  
Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr Richard Light **Session:** Semester 2 **Classes:** 3 hrs/wk for 12 wks **Prerequisites:** EDUH1005 **Assessment:** Pedagogy essay (40%), Lesson plan and presentation (30%), Pedagogy exam (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit of study is the first of five units on pedagogy in physical education. The five units move pre-service along a spectrum of teaching styles ranging from teacher-centred to student-centred styles. This journey exposes them to the need for teachers to be able to select and employ the appropriate approach. The unit of study follows on from the introduction to pedagogy delivered in Semester 1 in Professional Practice in PDHPE1 and concentrates on the spectrum of teaching styles used in physical education at the teacher-centred

end of the spectrum. It thus focuses on topics and content that can be seen as requiring more teacher-centred teaching due to safety considerations and the nature of the activities being learnt. To this end pedagogy is studied in relation to motor learning theory as manifested in the Fundamental Motor Skills (FMS) and which is part of the NSW PDHPE syllabus. The unit also examines how less teacher-centred approaches can be employed when teaching track and field and gymnastics. The gymnastics component begins with a traditional directive approach to teaching before moving toward more student-centred approaches to teaching the creative and expressive aspects of gymnastics.

**EDUH1016****Human Bioscience  
Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 lectures, 1 session independent study, 3 prac/week. **Prohibitions:** BIOL1003, BIOL1903 **Assessment:** One 2hr exam, assignments, classwork **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E).

The aim of this unit of study will introduce students to human evolution and genetics, and human structure and function as they apply to future professionals involved in physical education and health education and sport. The unit of study begins with human evolution, human population dynamics and the impact of people on the environment. It includes nutrition, distribution of essential requirements to and from the cells, control of body functions and defence mechanisms. After discussions of reproduction and development it concludes with some controversial aspects of human genetics. This unit of study is offered by staff in the School of Biological Sciences, Faculty of Science.

**Textbooks**

Seeley, R., Stephens, T.D. & Tate, P. 1999. Essentials of Human Anatomy and Physiology, McGraw Hill Book Company. Australia. Pty Ltd.  
 Plus - Chapters 19, 20 and 21 from Benjamin C.L., Garman G.R. and Funston J.H. 1997. Human Biology, McGraw-Hill, which will be produced and shrink-wrapped with Seeley, et al.

**EDUH1017****Sports Mechanics  
Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1hr lectures, one 2hr tutorial, one 2hr practical. **Prohibitions:** PHYS1001, PHYS1002, PHYS1901 **Assumed knowledge:** No assumed knowledge of Physics **Assessment:** Laboratory (20%), report (10%), assignments (5%), progressive test (5%), final exam (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E).

This unit of study at Junior level is designed specifically for BEd(Secondary)(Human Movement and Health Education) students to provide basic knowledge and understanding of concepts in mechanics in preparation for EDUF3013 (Biomechanics). It is presented with a minimum level of mathematics and the mechanics concepts discussed are illustrated with examples from sporting activities. This unit of study is offered by staff in the School of Physics, Faculty of Science.

**EDUH2001****Applied Anatomy and Physiology  
Education and Social Work**

**Credit points:** 4 **Session:** Semester 2 **Classes:** 2 hrs/wk for 12 wks **Prerequisites:** 36 credit points including EDUF1018, EDUF1019 and EDUH1016 **Assessment:** Midsemester (40%) and final (40%) examinations, seminar presentation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit of study will enable students to apply the knowledge and understandings of anatomy and physiology, one of the biophysical foundations of human movement and health education, covered in the unit EDUH1016 Human Bioscience to the PDHPE key learning area. A sound understanding of anatomy and physiology enables the comprehension of humans as living, functioning, homeostatic organisms as well as the intricate processes on which the survival of humans depend and its application to a variety of situations related to human movement and health education.

## EDUH2005

### Determinants of Health

#### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Kate Russell **Session:** Semester 2 **Classes:** 2 hrs/wk for 12 wks **Prerequisites:** 36 credit points including EDUF1018 and EDUF1019 **Assessment:** Seminar presentation (30%), Reflective statement (30%), Essay (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit of study will be the first of four that will examine health issues relevant to today's society. It will provide both the content and processes for teaching Health Education as part of the PDHPE key learning area. This unit will address the areas of social determinants of health, health and lifestyle, disease processes, nutrition, and safety.

## EDUH2008

### Outdoor Education

#### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Mr Wayne Cotton **Session:** Semester 2 **Classes:** 24 hrs: 8 hrs lectures; 16 hrs Residential Camp **Prerequisites:** 36 credit points including EDUF1018 and EDUF1019. **Assessment:** Presentation (40%); Reflective Report (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit of study is an introduction into the field of recreation and leisure from the viewpoint of the individual and investigates various societal agencies as providers of leisure services. Students will develop an understanding of the historical, philosophical, and theoretical contexts that underpin the place of outdoor education in Australian settings. The role of schools as providers of experiences in outdoor education will be examined as will public and private providers of leisure experiences for community members.

## EDUH2009

### Physical Education Pedagogy 2

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Steve Georgakis **Session:** Semester 1 **Classes:** 36 hours; 3 hours per week for 12 weeks **Prerequisites:** 36 credit points including EDUF1018, EDUF1019 and EDUH1004 **Assessment:** Essay (30%), Gymnastics Teaching resource (15%), lesson plans (30%), exam (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

Physical education is an integral part of the PDHPE key learning area. This unit of study is the second of five that will provide practical experience in these aspects of the curriculum. It will reinforce the relationship between physical activity and health status as well as the safety aspects associated with participation in physical activity in a variety of environments. A broad definition of physical activity of which competitive team sport is one aspect will drive the direction of these units. Participation in a variety of physical activities will enable students to develop their physical skills along with a commitment to the value of lifelong physical activity. The opportunity to develop expertise in teaching through learning theory as opposed to coaching physical skills will also ensure that they will be able to encourage others to participate in and value lifelong physical activity. In this unit students will gain experience in gymnastics and games sense.

## EDUH2010

### Professional Experiences in PDHPE 1

## Education and Social Work

**Credit points:** 6 **Session:** Semester 1 **Classes:** 36 hours, 3 hours per week plus a five-week block of teaching practice **Prerequisites:** 36 junior credit points including 12 from Education. **Assessment:** Unit of work (40%), Report (40%), Unit support material (20%), Teaching practice (Pass/Fail) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit is the first of three that will examine curriculum design, learning and teaching from Kindergarten to Year 12 in the PDHPE Key Learning Area (KLA). It will concentrate on the PDHPE (KLA) in the primary school. It provides an opportunity for both the theory and practice of learning and teaching in PDHPE to be explored. Students will undertake a four-week block of teaching practice in primary schools as a part of this unit of study. They will be expected to take an active role as a member of a learning community by planning, implementing and reflecting on units of work relevant to the age and stage of development of pupils in Stages 1-3. Both self-reflection and review by the cooperating teacher and/or tertiary supervisor will enable students to develop their teaching skills during the teaching practice experience.

## EDUH3004

### Psychosocial Health Issues

#### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Jenny O'Dea **Session:** Semester 1 **Classes:** 2 hours/week for 12 weeks **Prerequisites:** 48 credit points of Professional Studies in HMHE including EDUH2005 **Assessment:** Seminar presentation (30%); Exam (40%); Media Literacy test (20%); Discussion board response (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit is the second of four that will examine health issues relevant to today's society. It will provide both the content and process of Health Education as part of the PDHPE key learning area. This unit will address the areas of personal awareness, interpersonal skills, lifespan development, mental health and social health.

## EDUH3007

### Professional Experiences in PDHPE 2

#### Education and Social Work

**Credit points:** 6 **Session:** Semester 1 **Classes:** 36 hours, 3 hours/week plus a four-week block of teaching practice **Prerequisites:** 48 credit points of Professional Studies in HMHE including EDUH2010 **Assessment:** Unit of work (30%), Critical review (25%), Planning Meeting (10%), Resource file (35%), Teaching practice (Pass/Fail). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit is the second of three that will examine curriculum design, learning and teaching from Kindergarten to Year 12 in the PDHPE Key Learning Area (KLA). It will concentrate on the PDHPE (KLA) in the junior high school. It provides an opportunity for both the theory and practice of learning and teaching in PDHPE to be explored. Students will undertake a four-week block of teaching practice in secondary schools as a part of this unit of study. They will be expected to take an active role as a member of a learning community by planning, implementing and reflecting on units of work relevant to the age and stage of development of pupils in Stages 4 and 5. Both self-reflection and review by the cooperating teacher and/or tertiary supervisor will enable students to build on the teaching skills develop during their previous professional experience block.

## EDUH3008

### Physical Education Pedagogy 3

#### Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Steve Georgakis **Session:** Semester 1 **Classes:** 2 hours/week for 12 weeks **Prerequisites:** 48 credit points of Professional Studies in HMHE including EDUH2009 **Assessment:** Peer teaching, (30%), Unit outline (50%), Essay (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

Physical education is an integral part of the PDHPE key learning area. This unit of study is the third of five that will provide practical experience in these aspects of the curriculum. It will reinforce the relationship between physical activity and health status as well as the safety aspects associated with participation in physical activity in a variety of environments. A broad definition of physical activity of which competitive team sport is one aspect will drive the direction of these units. Participation in a variety of physical activities will enable students to develop their physical skills along with a commitment to the value of lifelong physical activity. The opportunity to develop expertise in teaching through learning theory as opposed to coaching physical skills will also ensure that they will be able to encourage others to participate in and value lifelong physical activity. In this unit students will gain experience in dance, target games, net/wall games.

### EDUH3009

#### Physical Education Pedagogy 4 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Steve Georgakis **Session:** Semester 2 **Classes:** 3 hrs/week for 12 weeks **Prerequisites:** 48 credit points of Professional Studies in HMHE including EDUH3008 **Assessment:** Peer teaching and lesson planning (50%), essay (10%), Resource folder (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

Physical education is an integral part of the PDHPE key learning area. This unit of study is the fourth of five that will provide practical experience in these aspects of the curriculum. It will reinforce the relationship between physical activity and health status as well as the safety aspects associated with participation in physical activity in a variety of environments. A broad definition of physical activity of which competitive team sport is one aspect will drive the direction of these units. Participation in a variety of physical activities will enable students to develop their physical skills along with a commitment to the value of lifelong physical activity. The opportunity to develop expertise in teaching through learning theory as opposed to coaching physical skills will also ensure that they will be able to encourage others to participate in and value lifelong physical activity. In this unit students will gain experience in track and field, gymnastics, striking games and court invasion games for primary and secondary school students.

### EDUH3014

#### Assessment and Evaluation in PDHPE Education and Social Work

**Credit points:** 4 **Session:** Semester 2 **Classes:** 2 hours/week for 12 weeks **Prerequisites:** 48 credit points of Professional Studies in HMHE including EDUH2010 **Assessment:** Testing workshop (30%); Essay (40%); Assessment schedule (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit is designed to provide students with the knowledge, understanding and skills to effectively conduct assessment and evaluation as integral parts of PDHPE and sport. There have been significant changes to assessment and evaluation requirements in secondary schools in NSW. Teachers are required to be more accountable for the learning outcomes of students. Practical application of assessment for learning and of learning and evaluation as they relate to the PDHPE key learning area in high schools will be examined as will the construction and implementation of both theory and practical assessment tasks.

### EDUH3027

#### Exercise Physiology Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Donna O'Connor **Session:** Semester 1 **Classes:** 3 hours/week for 12 weeks **Prerequisites:** 48 credit points of Professional Studies in HMHE including EDUH2001 **Assessment:** Assessment will be in the form of online quizzes, responses to labs, group research project and exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This lecture/laboratory unit of study will examine the effects that take place in the body during and after exercise. Related aspects will include cellular physiology, energy production, aerobic and anaerobic metabolism, work capacity, the respiratory and circulatory systems under exercise, effect of altitude, thermoregulation and hydration, body composition and ergogenic aids.

### EDUH3028

#### Adolescent Health Issues Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Jenny O'Dea **Session:** Semester 2 **Classes:** 3 hours/week for 12 weeks **Prerequisites:** 48 credit points of Professional Studies in HMHE including EDUH2005 **Assessment:** Unit outline and lesson plans (35%); Exam (35%); Site visit (20%); Quiz (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit is the third of four that will examine health issues relevant to today's society. It will provide both the content and process of Health Education as part of the PDHPE key learning area. This unit will address the areas of adolescent health, drug use, sexuality and resilience, connectedness and protective behaviours.

### EDUH4002

#### Physical Education Pedagogy 5 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Richard Light **Session:** Semester 1 **Classes:** 36 hours: 3 hours/week for 12 weeks **Prerequisites:** 84 credit points of Professional Studies in HMHE including EDUH3009 **Assessment:** Essay (40%); Reflective essay (20%); Report (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Sec)(H M H E), UG Study Abroad Program.

Physical Education and Sport Pedagogy 5 focuses on student-centred, inquiry-based approaches to teaching and learning games, sport and life-long leisure pursuits. Students will further develop their understanding of Game Sense and similar problem-solving, discovery approaches to teaching in games, sport and leisure activities and apply them in practical workshops. Students will study issues involved in the promotion of life-long active life styles and strategies for encouraging attachment to physical activity that can be initiated in schools and community settings. The leisure activities workshops may include those such as pilates, yoga, martial arts, initiative games and junior surf life saving. The games and sport component of the unit will include practical workshops at university and microteaching experience at a local school.

### EDUH4048

#### Professional Experiences in PDHPE 3 Education and Social Work

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hours/week for 12 weeks and 25 days in school experience **Prerequisites:** 84 credit points of professional studies in HMHE including EDUH3007 **Assessment:** Quality Teaching Response (15%), Exploring Cores and Options (40%), Resource file (45%), Teaching practice (Pass/Fail). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit builds on the introduction to fundamental teaching skills and curriculum design in the PDHPE Key Learning Area (KLA) with particular reference to primary and junior secondary schools. It will concentrate on the PDHPE (KLA) in the senior high school. It provides an opportunity for both the theory and practice of learning and teaching in PDHPE to be explored. Students will undertake a four week block of teaching practice in high schools as a part of this unit of study. They will be expected to take an active role as a member of a learning community by planning, implementing and reflecting on units of work relevant to the age and stage of development of pupils in Years 7 - 12. Both self-reflection and review by the cooperating teacher will enable students to build on the teaching skills developed during previous teaching practice experiences.

### Sports Medicine

#### Education and Social Work

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours/week for 12 weeks **Prerequisites:** 84 credit points of Professional Studies in HMHE **Assessment:** Injury report (40%), Final Exam (40%); Current Sports Medicine Practices (20%); Competency Test (Pas/Fail) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit will introduce students to the pathology, diagnosis and management of injuries commonly sustained during sporting activities. It will assist students to understand their role and the role of various health professionals in recognising and managing sport related injuries. It will also examine ethical issues related to sports medicine.

## EDUH4051

### Community Health Issues

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Kate Russell **Session:** Semester 2 **Classes:** 3 hours/week for 12 weeks **Prerequisites:** 84 credit points of Professional Studies in HMHE including EDUH3028 **Assessment:** Critical Analysis (35%); Review essay and Gala display (65%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

It has been suggested that many of the health-related problems inherent in Australia today are related to humans as social beings, the types of lifestyles individuals lead and their interactions with others. While the ultimate responsibility for health rests with individuals, many factors affect health including environment, life stage and skills. However, there are a number of skills that individuals can learn and incorporate into the way they live as they grow and develop. In this unit students will study issues related to health consumerism, community health and global health as well as their roles in health education and health promotion in schools.

### Learning in Outdoor Education

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** r Wayne Cotton **Session:** Semester 1, Semester 2 **Classes:** 2 hrs/wk for 9 wks plus field trips **Prerequisites:** 84 credit points of Professional Studies in HMHE **Assessment:** Report (50%); Reflective Statement (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

Learning in Outdoor Education examines contemporary theories of learning with a focus on experience and engagement of the body in learning about and within natural environments. In particular, it highlights the differences between learning about the natural environment in the classroom or lecture theatre and the depth and range of interrelated social, cognitive, physical and affective learning that is possible in it. Students will learn about places of natural significance and theories of experiential learning in lectures which is followed by first hand experiences of the places being studied through a two-day field trip and a three-day field trip in uniquely Australian landscapes within NSW. While this unit of study will develop student knowledge and understanding of specific areas of natural significance in NSW it focuses on the nature of learning that takes place through first hand experiences of them. Through this approach students will come to understand and know these places through two different modes of learning that they analyse through the application of educational learning theory.

### Indigenous Sport, Education and Culture

#### Education and Social Work

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2 hours/week for 11 weeks plus field trip **Prerequisites:** 84 credit points of professional studies in HMHE **Assessment:** One seminar presentation on indigenous

education issues, one 1500 word field trip report and a 2500 word reflective essay based on field trips. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

Indigenous Sport, Education and Culture will provide students with a socially critical perspective on indigenous people's participation in sport and education as dynamic aspects of society and the ways in which this positions them in Australian society. This unit of study examines the ways in which sport and education are tied into the reproduction of social, economic and health disadvantage for Indigenous Australians. While sport plays a part in the reproduction of disadvantage it is also a highly visible area in which indigenous people have excelled in Australia. This unit of study also examines the ways in which sport can be, and has been, used to address indigenous disadvantage in contemporary Australian society. These issues are studied within the context of the history of white Australia as viewed from the perspective of indigenous Australians. The unit of study provides students with first-hand experiences of indigenous culture and issues examined through the provision of field trips. Informed by lectures and unit readings, the field trips make an invaluable contribution to a learning journey over the semester.

### Issues in Nutrition Education

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Jennifer O'Dea **Session:** Semester 2 **Classes:** 3 hours/week for 12 weeks **Prerequisites:** 84 credit points of Professional Studies in HMHE **Assessment:** Either develop lesson plans or presentation of a case study (50%), examination (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit of study will provide health educators with a sound knowledge of issues in nutrition and educational strategies for implementation of nutrition education in the secondary classroom. Content includes special nutritional requirements of infants, adolescents, women, vegetarians, athletes, nutrition education strategies, dietary supplements, food faddism, diets, food labelling.

## EDUH4055

### Fitness Training: Theory and Practice

#### Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Donna O'Connor **Session:** Semester 1 **Classes:** 3 hours/week for 12 weeks **Prerequisites:** 84 credit points of Professional Studies in HMHE. **Assessment:** Designing and implementing a 6 week training program (60%), debate (30%), PDHPE lesson plans (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit is designed to provide the skills and knowledge necessary for effective construction and implementation of training programs for health benefits and to improve performance. Emphasis will be on the knowledge and practical understanding of different training methods and their physiological adaptations. At the completion of this unit it is hoped that students are more confident and knowledgeable in this content area, understand the vital link between theory and practice and value the need for them to be research informed teachers.

## EDUH4057

### Administration of PDHPE and Sport

#### Education and Social Work

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs/wk for 12 wks **Prerequisites:** 84 credit points of Professional Studies in HMHE. **Assessment:** Research poster project (30%), Group project presentation (30%), Exam (30%), Resource folder (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day
