The aims of the studio program are: to cultivate a contemporary dialogue of issues informing practice; to promote individual exploration within and between media; and to assist and equip students with the necessary skills for working as professional artists. Students will gain basic understanding of their chosen studio, its staffing, organisation and possible learning paths and directions for their practice and an understanding of how researching ideas can inform their own developing practice.

Students will be required to purchase some materials to complete projects.

Appropriate footwear and clothing will be required at all times.

### MSTD1112

#### Foundation Studio B Sydney College of the Arts

**Credit points:** 8 **Teacher/Coordinator:** Oliver Smith, Foundation Coordinator  
**Session:** Semester 2 **Classes:** Lecturer and directed contact over 12 weeks, plus self-directed study; total student effort of 160 hours. **Corequisites:** MSTD1123, FRES1002, MDRW1012 or MDRW1014, THAP1202 and THAP1212  
**Assessment:** A qualitative assessment grade will be allocated at the end of the semester. Students are expected to successfully complete specified stages within the semester, and the combination of these grades will reflect the final assessment grade. For further information refer to SCA Assessment Criteria. Academic staff will be responsible for end-of-semester assessments and a mid-semester review in Week 7. Where appropriate, guided peer assessment may be employed for some projects. Students are eligible to be assessed if attendance is no less than 90%, and students have submitted all project work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, Visual Arts UG Non-Degree.

Foundation Studio B continues to develop skills gained in Studio A; by the end of the year students will have developed some understanding of studio-based art practice by working in their chosen studio each week. Studio classes will mostly be structured as self-directed learning exercises where students will engage with their peers and develop useful links with other key members of SCA and the wider visual arts community. Students will be given a list of mandatory health and safety equipment that will be required for access to specific studio areas and workshops. Students will also be required to purchase some materials to complete projects. Appropriate footwear and clothing will be required at all times.

### MSTD1121

#### Foundation Studio Concepts A

### Sydney College of the Arts

**Credit points:** 6 **Teacher/Coordinator:** Oliver Smith, Foundation Coordinator  
**Session:** Semester 1 **Classes:** Lecturer and directed contact over 12 weeks, plus self-directed study; total student effort of 120 hours. **Corequisites:** MSTD1111, FRES1001, MDRW1011 or MDRW1013, THAP1201 and THAP1211  
**Assessment:** The assessment of each block is averaged to establish a final grade at the end of the semester. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, Visual Arts UG Non-Degree.

This program is an idea-based, project-style, non-studio-specific program consisting of two 6-week blocks which students rotate through during the semester. Students are encouraged to identify and develop an interdisciplinary practice. The timetable structure enables students to explore a range of approaches between disciplines, facilities and staff, thus providing a more inclusive educational experience. Classes are held in cross-studio groups in a central space, and each student works around broad themes such as time, space and light. This program challenges students to consider the development of ideas and how processes and materials are chosen and utilised in relation to those ideas. Projects vary and are drawn from many elements of the Foundation lecturer's research experience.

By the end of the year students will have developed some generic technical skills and will be able to clearly identify the facilities and equipment, and their purposes, as well as the health and safety requirements that are essential to SCA and current art practice.

#### Ceramics C (Major) Sydney College of the Arts

**Credit points:** 16 **Teacher/Coordinator:** Jan Guy **Session:** Semester 1  
**Classes:** Lecturer and directed contact over 12 weeks, plus self-directed study; total student effort of 320 hours. **Prerequisites:** MSTD1101 or MSTD1111; and MSTD1102 or MSTD1112 **Corequisites:** THAP2411; and THAP2421 or THAP2431 or THAP2441 **Prohibitions:** MSTD2191 **Assessment:** Assessment is based on: quality of performance in the studio throughout the semester; development and application of appropriate skills; and participation in practical and critical class activities and discussions. Assessment will reflect students' conceptual and practical progress, made throughout the semester, as well as demonstrated commitment. Students are eligible to be assessed for this program if attendance is 5 classes per block or over and students have submitted their work folder by the due date. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Practical field work:** Project and individual studio work, clay and glaze tests, drawing, including computer drawing, journals. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A.

This unit introduces students to the concepts and practices, skills and basic technology that comprise contemporary ceramics. Students learn and develop various hand-building skills, identify areas of interest, and develop a basic understanding of ceramic technology. Through a series of open-ended studio projects, students engage with and explore personal concepts and interests. Individual and group sessions help them identify and develop conceptual and critical skills. Through a series of regular classes students become familiar with various properties of clays, learn to set and fire electric kilns, become familiar with the structure of glazes and glaze testing procedures. Students maintain a drawing, including computer drawing, studio journal that documents the development of concepts and ideas, as well as a ceramic technology journal.

##### Sydney College of the Arts

**Credit points:** 16 **Teacher/Coordinator:** Jan Guy **Session:** Semester 2  
**Classes:** Lecturer and directed contact over 12 weeks, plus self-directed study; total student effort of 320 hours. **Prerequisites:** MSTD2211 or MSTD2311 or MSTD2511 **Corequisites:** THAP2412; and one of: THAP2422 or THAP2432 or THAP2442 **Prohibitions:** MSTD2192 **Assessment:** Assessment is based on: quality of performance in the studio throughout the semester; development and application of appropriate skills; and participation in practical and critical class activities and discussions. Assessment will reflect students' conceptual and practical progress, made throughout the semester, as well as demonstrated commitment. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Practical field work:** Project and individual studio work, glaze tests, journal, drawings. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A.

This unit continues to expand and develop ceramic studio skills through studio-based projects, as well as to provide the opportunity for students to identify an area of interest and develop that as a major project. This unit further develops skills in hand-building and wheel-throwing, that were introduced in Semester 1, as well as providing an introduction to casting. Students develop design skills through the planning of their projects. Students continue to develop their understanding of technology (clays and glazes), learn to make their own casting slips, learn about high temperature glazes and learn to fire gas kilns. They identify an individual glaze project and develop it over the period of the semester. Through individual and group discussions, students explore and learn to articulate individual concepts and interests. Drawing, including Form Z, is seen as integral to studio practice, and it is expected that students maintain a drawing / studio journal.

#### Glass C (Major)

### Sydney College of the Arts

**Credit points:** 16 **Teacher/Coordinator:** Jane Gavan, Andrew Lavery  
**Session:** Semester 1 **Classes:** Lecturer and directed contact over 12 weeks, plus self-directed study; total student effort of 320 hours. **Prerequisites:** MSTD1111 and MSTD1112 **Corequisites:** THAP2411; and one of THAP2421 or THAP2431 or THAP2441 **Prohibitions:** MSTD2191 **Assessment:** Students will be required to present projects at nominated dates during the semester. Assessment is in terms of how students' work fulfils the criteria and extends their understanding of their practice and its context. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A.

The unit provides a studio-based approach to glass-working. Throughout this semester students will follow a project-based curriculum that encourages the development of critical and practical skills. Activities include a glass object design project exploring the use of new technologies and an architectural glass project. Technical demonstrations are given, that build on skills introduced in Foundation Year, and are supported with thematic approaches encouraging exploration within studio glass, object making and design and critical awareness of contemporary practice. Students may work exclusively within the medium of glass or in conjunction with other media and processes. In the Second Year students have increased access to the studio in order to complete their projects. Second-Year students also spend time in the first semester researching and organising their professional internship with an Australian glass artist or designer; this experience is usually conducted within the mid-semester break.

### MSTD2222

#### Glass D (Major)

##### Sydney College of the Arts

**Credit points:** 16 **Teacher/Coordinator:** Jane Gavan, Andrew Lavery  
**Session:** Semester 2 **Classes:** 8 hours of contact and a minimum 8 hours of independent, studio-based practice. **Prerequisites:** MSTD2221 or MSTD2521 or MSTD2321 **Corequisites:** THAP2412; and one of: THAP2422 or THAP2432 or THAP2442 **Prohibitions:** MSTD2192 **Assessment:** Students will be required to present projects at nominated dates during the semester. Assessment is in terms of how students' work fulfils the criteria and extends their understanding of their practice and its context. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Practical field work:** Studio fees may apply. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A.

This semester students will begin to elect areas of study of their own choice from approaches and skills acquired in Semester 1. This self-directed approach is combined with ongoing set projects that further develop critical and technical skills. In consultation with academic staff, students will begin to direct a path of exploration relevant to their interest and appropriate level of practical skill. Students may decide to work exclusively within the medium of glass or in conjunction with other media and processes as required. The focus this semester is on: the practice and refinement of hand-skills in glass working and on developing critical abilities; and on researching and articulating the contact of your ideas. A variety of glass-working activities are available for students to develop their skills, including: glass-blowing, cold-working, polishing and cutting, lathe-working, engraving, kiln-working, casting and mould-making, flame-working and glass-painting and sand-blasting.

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A.

The aims and objectives are achieved in the program by the use of a tutorial system. An academic advisor is assigned to a group of combined Second- and Third-Year students. This grouping fulfils the educational function of peer support and learning, allowing the increasing maturity of the students to be a demonstrable outcome. The academic advisor is responsible for the progress of those students. To provide access to different intellectual points of view these groups are remixed and rotated over four semesters. The other important aspect of the unit is the one-to-one studio tutorial, where the particular concerns and needs of the student are discussed, tailoring both technical information and theoretical knowledge in relation to the student's evolving work.

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit is an introduction to ceramics that may be combined with other approved units of study. The unit introduces students to the concepts and practices, skills and basic technology that comprise contemporary ceramics. Students learn and develop various hand-building skills, identify areas of interest, and develop a basic understanding of ceramic technology. Through a series of open-ended studio projects, students engage with and explore personal concepts and interests. Individual and group sessions help them identify and develop conceptual and critical skills. Through a series of regular classes, students become familiar with various properties of clays, learn to set and fire electric kilns, and become familiar with the structure of glazes and glaze testing procedures.

Students maintain a drawing/ studio journal, that documents the development of concepts and ideas, as well as a ceramic technology journal.

**Credit points:** 12 **Teacher/Coordinator:** Jan Guy **Session:** Semester 2 **Classes:** 6 hours of contact and a minimum 6 hours of independent, studio-based practice **Prerequisites:** MSTD2511 **Corequisites:** THAP2612; and one of: THAP2622 or THAP2632 or THAP2642 **Assessment:** Assessment

is based on: quality of performance in the studio throughout the semester; development and application of appropriate skills; and participation in practical and critical class activities and discussions. Assessment will reflect students' conceptual and practical progress, made throughout the semester, as well as demonstrated commitment. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Practical field work:** Project and individual studio work, glaze tests, journal, drawings. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit may be combined with other approved units of study. The unit continues to expand and develop ceramic studio skills, through studio-based projects, as well as to provide the opportunity for students to identify an area of interest and develop that as a major project. This unit further develops skills in hand-building and wheel-throwing, that were introduced in Semester One, as well as providing an introduction to casting. Students develop design skills through the planning of their projects. Students continue to develop their understanding of technology (clays and glazes), learn to make their own casting slips, learn about high temperature glazes and learn to fire gas kilns. They identify an individual glaze project and develop it over the period of the semester. Through individual and group discussions, students explore and learn to articulate individual concepts and interests. Drawing is seen as integral to studio practice, and it is expected that students maintain a drawing/ studio journal.

**Credit points:** 12 **Teacher/Coordinator:** Jane Gavan, Andrew Lavery **Session:** Semester 1 **Classes:** 6 hours of contact and a minimum 6 hours of independent, studio-based practice. **Prerequisites:** MSTD1111 and MSTD1112 **Corequisites:** THAP2611; and one of: THAP2621 or THAP2631 or THAP2641 **Prohibitions:** MSTD2191 **Assessment:** Students will be required to present projects at nominated dates during the semester. Students will be assessed in terms of how their work fulfils the criteria and extends their understanding of their practice. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Practical field work:** Studio fees may apply. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The unit provides a studio-based approach to glass-working. Throughout this semester students will follow a project-based curriculum that encourages the development of critical and practical skills. Technical introductions are supported with thematic approaches encouraging exploration within studio glass, object making and design. A variety of glass-working activities are available for students to develop their skills, including: glass-blowing, cold-working, polishing and cutting, lathe-working, engraving, kiln-working, casting and mould-making, flame-working and glass-painting and sand-blasting.

**Credit points:** 12 **Teacher/Coordinator:** Jane Gavan, Andrew Lavery **Session:** Semester 2 **Classes:** 6 hours of contact and a minimum 6 hours of independent, studio-based practice. **Prerequisites:** MSTD2521 **Corequisites:** THAP2612; and one of: THAP2622 or THAP2632 or THAP2642 **Assessment:** Students will be required to present projects at nominated dates during the semester. Assessment is in terms of how students' work fulfils the criteria and

extends their understanding of their practice and its context. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Practical field work:** Studio fees may apply. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

Students will begin to elect areas of study from approaches and skills acquired in Semester 1. This self-directed approach is combined with ongoing set projects that further develop critical and technical skills. In consultation with academic staff, students will begin to direct a path of exploration relevant to their interest and appropriate level of practical skill. Students may decide to work exclusively within the medium of glass or in conjunction with other media and processes as required. A variety of glass-working activities are available for students to develop their skills, including: glass-blowing, cold-working, polishing and cutting, lathe-working, engraving, kiln-working, casting and mould-making, flame-working and glass-painting and sand-blasting.

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The aims and objectives are achieved in the program by the use of a tutorial system. An academic advisor is assigned to a group of combined Second- and Third-Year students. This grouping fulfils the educational function of peer support and learning, allowing the increasing maturity of the students to be a demonstrable outcome. The academic advisor is responsible for the progress of those students. To provide access to different intellectual points of view these groups are remixed and rotated over four semesters. The other important aspect of the unit is the one-to-one studio tutorial, where the particular concerns and needs of the student are discussed, tailoring both technical information and theoretical knowledge in relation to the student's evolving work.

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

Study in Sculpture Performance and Installation is a unified, studio-based activity addressing the concepts, methodologies and technologies integral to contemporary sculpture. This includes traditional sculptural processes as well as incorporating new media and digital technologies that are currently reshaping contemporary practice. Each student, in consultation with academic staff, develops an outline of their proposed study program at the commencement of the semester and maintains a studio diary. Students present work regularly for review and are encouraged to further develop and refine their individual studio practice. This process is supported by small-group projects, lectures, group and individual tutorials and critiques.

#### Glass E (Major)

##### Sydney College of the Arts

**Credit points:** 16 **Teacher/Coordinator:** Jane Gavan, Andrew Lavery **Session:** Semester 1 **Classes:** 8 hours of contact and a minimum 8 hours of independent, studio-based practice. **Prerequisites:** one of: MSTD2221 or MSTD2321 or MSTD2521; and one of: MSTD2222 or MSTD2322 or MSTD2522 **Corequisites:** THAP3301; and one of: THAP3321 or THAP3331 or THAP3341 **Prohibitions:** MSTD3101 **Assessment:** Students will be required to present evidence of work(s) for discussion at nominated dates during the semester. Students will be assessed in terms of how their work fulfils the criteria and extends their understanding of their practice. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Practical field work:** Studio fees may apply. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A.

Students will commence this unit by developing individual proposals that extend areas of exploration relevant to their interest and appropriate level of practical skill. Emphasis is placed on developing theoretical and relevant skill towards realising set goals. Students are expected to present a body of work that is the realisation of this proposal. Students are introduced to skills related to sustaining a visual arts/crafts practice such as studio set-ups and marketing. A variety of glass-working activities are available for students to develop their skills, including: glass-blowing, cold-working, polishing and cutting, lathe-working, engraving, kiln-working, casting and mould-making, flame-working and glass-painting and sand-blasting. The first semester is characterised by sessions of analysis and feedback in weekly group sessions that develop students' ability to handle an increased workload and a more critically focused and time-limited project.

*Note: Department permission required for enrolment.*

### Associated degrees: B V A.

The unit provides a studio-based approach to glass-working. Students will, in conjunction with staff, develop individual proposals that continue to expand areas of exploration relevant to their interest and appropriate level of practical skill. Emphasis is placed on developing theoretical and relevant skills towards realising set goals. Students are expected to present a body of work that realises these goals and draws in the experience and new understandings gained from the previous semester. The body of work is expected to be cohesive and demonstrate competence in critical and technical terms. A variety of glass-working activities are available for students to develop their skills, including: glass-blowing, cold-working, polishing and cutting, lathe-working, engraving, kiln-working, casting and mould-making, flame-working and glass-painting and sand-blasting. This semester culminates in the professional presentation and documentation of this work in the end-of-year exhibition; therefore, skills are developed this semester that extend on the professional presentation and finishing of objects in glass and other materials.

### Associated degrees: B V A.

The aims and objectives are achieved in the program by the use of a tutorial system. An academic advisor is assigned to a group of combined Second- and Third-Year students. This grouping fulfils the educational function of peer support and learning, allowing the increasing maturity of the students to be a demonstrable outcome, which can be seen, by the students in Second Year. The academic advisor is responsible for the progress of those students. To provide access to different intellectual points of view these groups are remixed and rotated over four semesters. The other important aspect of the unit is the one-to-one studio tutorial, where the particular concerns and needs of the student are discussed, tailoring both technical information and theoretical knowledge in relation to the student's evolving work.

Study in Sculpture Performance and Installation is a unified, studio-based activity addressing the concepts, methodologies and technologies integral to contemporary sculpture. This includes

traditional sculptural processes as well as incorporating new media and digital technologies that are currently reshaping contemporary practice. Each student, in consultation with academic staff, develops an outline of their proposed study program at the commencement of the semester and maintains a studio diary. Students present work regularly for review and are encouraged to further develop and refine their individual studio practice. This process is supported by small-group projects, lectures, group and individual tutorials and critiques.

#### Associated degrees: B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit focuses on the development and refinement of self-directed, studio-based projects. Students meet and discuss their work regularly with staff and are expected to finish work to a professional level, exhibiting it at the end-of-year exhibition. Students are expected to develop a personal language within their ceramic practice. In addition they are asked to develop a professional portfolio of their work.

*Textbooks*

It is expected that students read national and international periodicals, research ideas related to the student's area of interest, as well as accessing appropriate technical information.

### MSTD3521

#### Glass E

**Sydney College of the Arts**

**Credit points:** 12 **Teacher/Coordinator:** Jane Gavan, Andrew Lavery  
**Session:** Semester 1 **Classes:** 6 hours of contact and minimum 6 hours of independent, studio-based practice. **Prerequisites:** MSTD2521 or MSTD2221; and MSTD2522 or MSTD2222 **Corequisites:** THAP3401 and THAP3441  
**Assessment:** Students will be required to present projects at nominated dates during the semester. Students will be assessed in terms of how their work fulfils the criteria and extends their understanding of their practice. For further information refer to SCA Assessment Criteria. Assessment will be commensurate with the credit point value of the unit. **Practical field work:** Studio fees may apply. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

Students will, in conjunction with staff, develop individual proposals that extend areas of exploration relevant to their interest and appropriate level of practical skill. Emphasis is placed on developing theoretical and relevant skill towards realising set goals. Students are expected to present a body of work that is the realisation of this proposal. Students are introduced to business skills related to sustaining a visual arts/crafts practice. A variety of glass-working activities are available for students to develop their skills, including: glass blowing, cold-working, polishing and cutting, lathe-working, engraving, kiln-working, casting and mould-making, flame-working and glass-painting and sand-blasting.

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The unit provides a studio-based approach to glass-working. Students will, in conjunction with staff, develop individual proposals that continue to expand areas of exploration relevant to their interest and appropriate level of practical skill. Emphasis is placed on developing theoretical and relevant skills towards realising set goals. Students are expected to present a body of work that realises these goals. The body of work is expected to be cohesive and demonstrate competence in critical and technical terms. A variety of glass-working activities are available for students to develop their skills, including: glass-blowing, cold-working, polishing and cutting, lathe-working, engraving, kiln-working, casting and mould-making, flame-working and glass-painting and sand-blasting. This semester culminates in the professional presentation and documentation of this work in the end-of-year exhibition; therefore, skills are developed this semester that extend on the professional presentation and finishing of objects in glass and other materials.

Students, in consultation with studio staff, will develop an outline of their proposed study program at the commencement of the semester and maintain a studio diary. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

Study in Sculpture Performance and Installation is a unified, studio-based activity addressing the concepts, methodologies and technologies integral to contemporary sculpture. This includes traditional sculptural processes as well as incorporating new media and digital technologies that are currently reshaping contemporary practice. Each student, in consultation with academic staff, develops an outline of their proposed study program at the commencement of the semester and maintains a studio diary. Students present work regularly for review and are encouraged to further develop and refine their individual studio practice. This process is supported by small-group projects, lectures, group and individual tutorials and critiques.

### Ceramics Elective Introductory Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Jan Guy **Session:** Semester 1, Semester 2 **Classes:** Lecturer and directed contact over 12 weeks, plus self-directed study; total student effort of 60 hours. **Assessment:** Assessment is continuous and culminates with an end-of-semester assessment where works are presented for critical review. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The Introductory unit in Ceramics provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum, addressing concepts, methodologies and technologies integral to ceramic practice.

In this unit students will:

- learn the basics of ceramics construction, surface-finishing and firing techniques; engage with experimental approaches to problem solving;
- develop an awareness of possibilities available to practitioners;
- develop a capacity to express personal aesthetic solutions; and
- understand and apply Occupational Health and Safety procedures to studio practice.

The Advanced unit in Ceramics builds on and enhances information and skills provided in the Introductory unit. The unit provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum, addressing concepts, methodologies and technologies integral to ceramic practice.

In this unit students will:

- enhance ceramics construction skills, surface-finishing and firing techniques;
- engage with experimental approaches to problem solving;
- build an awareness of contemporary practices in ceramics;
- develop their capacity for personal aesthetic solutions; and
- understand and apply Occupational Health and Safety procedures to studio practice.

**MSTD8131****Jewellery & Object Elective Advanced  
Sydney College of the Arts**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** 3 hours of contact and a minimum 3 hours of independent study. **Prerequisites:** MSTD7321 **Assessment:** Assessment is continuous and culminates with an end-of-semester assessment where works are presented for critical review. For further information

refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The Advanced elective unit in Jewellery and Object provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a self-directed curriculum, addressing concepts, methodologies and technologies integral to a student's personal concerns. Students' thematic approaches will be supported by technical methodologies appropriate to the self-directed projects. The elective provides for the development and enhancement of critical skills through group and individual tutorials and critiques. Students are expected to produce a body of work for review at regular intervals during the semester. Work from the semester is to be presented for assessment in Week 15.

Refer to Studio Reading List.

**MSTD8141****Painting Elective Advanced  
Sydney College of the Arts**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** 3 hours of contact and a minimum 3 hours of independent study. **Prerequisites:** MSTD7421 **Assessment:** Assessment is continuous and culminates with an end-of-semester assessment where works are presented for critical review. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The Advanced Elective unit in Drawing provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a self-directed curriculum, addressing concepts, methodologies and technologies integral to a student's personal concerns. Thematic approaches will be supported by technical methodologies appropriate to the self-directed projects. The elective provides for the development and enhancement of critical skills through group and individual tutorials and critiques. Students are expected to produce a body of work for review at regular intervals during the semester. Work from the semester is to be presented for assessment in Week 15.

### MSTD8161

#### Sculpture Elective Advanced Sydney College of the Arts

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** 2 hours of contact and a minimum 2 hours of independent study. **Prerequisites:** MSTD7621 **Assessment:** Students produce a body of work for review at regular intervals during the semester. Assessment is continuous and culminates with an end-of-semester assessment when all works are presented for review. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The Advanced Elective unit in Sculpture provides a studio-based approach to the production of creative work. At the beginning of the semester each student develops an individual work proposal in consultation with an academic staff member. This proposal forms the basis of a self-directed curriculum addressing the concepts, methodologies and technologies integral to the individual student's developing art practice. Each student's creative development will be supported by access to academic staff consultations. These consultations focus on the conceptual and creative aspects of a student's studio work. The elective provides for the development and enhancement of critical skills through group and individual tutorials and critiques.

### MSTD8171

#### Photomedia Elective Advanced Sydney College of the Arts

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** 2 hours of contact and a minimum 2 hours of independent study. **Prerequisites:** MSTD7721 **Assessment:** Assessment is continuous and culminates with an end-of-semester assessment where works are presented for critical review. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The Advanced Elective provides a studio-based approach to the production of self-directed creative work. Throughout the semester students will follow a project-based curriculum, addressing concepts, methodologies and technologies integral to contemporary Photomedia. The elective provides for the further development and enhancement of critical and conceptual skills through group and individual tutorials and critiques and the acquisition of technical skills appropriate to the assigned projects.

*Textbooks*

Refer to Studio Reading List.

### MSTD8181

#### Film & Digital Art Elective Advanced Sydney College of the Arts

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** 3 hours of contact and a minimum 3 hours of independent study. **Prerequisites:** MSTD7821 **Assessment:** Assessment is continuous and culminates with an end-of-semester assessment where works are presented for critical review. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The Advanced Elective unit in Film and Digital Art provides a studio-based approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a self-directed curriculum, addressing concepts, methodologies and technologies integral to a student's personal concerns. Students' thematic approaches will be supported by technical methodologies appropriate to the self-directed projects. The elective provides for the development and enhancement of critical skills through group and individual tutorials and critiques. Students

are expected to produce a body of work for review at regular intervals during the semester. Work from the semester is to be presented for assessment in Week 15.

### MSTD8191

#### Digital Visualisation Advanced Sydney College of the Arts

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** 2 hours of contact and a minimum 3 hours of independent study. **Prerequisites:** MSTD7921 **Assessment:** Assessment is continuous and culminates with an end-of-semester assessment where works are presented for critical review. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

The Advanced Elective unit in Digital Visualisation provides a digital visualisation approach to the production of creative work. Throughout the semester students will, in consultation with an academic staff member, follow a project-based curriculum, addressing concepts, methodologies and technologies integral to digital visualization. Thematic approaches will be supported by technical introductions to encourage exploration with visualisation methodologies. The elective provides for: the development and enhancement of critical skills through group and individual tutorials and critiques; and acquisition of technical skills appropriate to the assigned projects. Students are expected to produce a body of work for review at regular intervals during the semester. Work from all assigned projects is to be presented for assessment in Week 14.

### MTRX1701

#### Mechatronics Engineering Introductory Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (1hr lec, 1hr tut, 3hrs workshop) per week **Prohibitions:** AERO1560, MECH1560 **Assessment:** Assignments, major assignment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

This unit of study aims to introduce students to the fundamental principals that underlie the study of Mechatronic Engineering. Students will appreciate the fundamental components that make up a Mechatronic system, including actuators, sensors, electronic and computing systems. This course lays the foundation for later studies, including advanced Mechatronic Engineering, computing, control and system design courses.

At the end of this unit students should be able to: understand the general principles involved in computer controlled machinery; apply a systematic approach to the design process for Mechatronic systems; analyze and formulate requirements for a Mechatronic system based on a specification; demonstrate a basic understanding of system modelling and approaches to control; understand the practical application of mechatronic systems in applications such as manufacturing, automobile systems and robotics; develop the capacity to think creatively and independently about new design problems; undertake independent research and analysis and to think creatively about engineering problems.

Course content will include introduction to; system modelling and control; design process; actuators; sensors; computers - hardware; computers - software; advanced topics.

### MTRX1702

#### Mechatronics 1 Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (2hrs lec and two 2hr labs) per week. **Prohibitions:** ELEC1101 Foundations of Computer Systems, MECH1802 C Programming, COSC1902 Computational Science in C (Adv), COSC1002 Computational Science in C **Assessment:** Assignments, quizzes,

examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

This unit aims to provide: an introduction to the analysis and design of digital logic circuits; a foundation for the study of systems and embedded programming for the degree in Mechatronic Engineering.

Course content will include: Introductory Digital Systems 3 CR: Number systems and codes; Logic gates and Boolean algebra, universal (nand) logic gates; Digital arithmetic: operations and circuits, Two's complement addition and subtraction, overflow; Combinational logic circuits; Flip-flops and related devices; Counters and registers, shift register applications; sequential circuits, designs of synchronous, cascaded counters (BCD and binary). Integrated circuit logic families and interfacing; practical issues including, fan out, pull-up/down, grounds, power supplies and decoupling; timing issues, race conditions. Tri-state signals and buses; MSI logic circuits, multiplexers, demultiplexers, decoders, magnitude comparators; Introduction to programmable logic devices. The unit of study will include a practical component where students design and implement logic circuits. Purchase of a basic laboratory kit as described in classes will be required. Introductory Software Engineering (3 Cr): This unit of study provides an introduction to software design, implementation, debugging and testing in the context of C programming language. Problem definition and decomposition; the design process; designing for testing and defensive coding methods; modular code structure and abstract data types; best practice in programming. Preprocessor, tokens, storage classes and types. Arithmetic, relational and bit manipulation operators. Constructs for control flow: if, switch, for, do and while. Arrays. Pointers and character strings. Dynamic memory. Functions and parameter passing. Derived storage classes: structures and unions. File I/O.

### MTRX2700

#### Mechatronics 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3hrs lec and 3hr lab per week. **Prerequisites:** MECH1760 or MTRX1702 or (MECH1701 and MECH1702) **Prohibitions:** ELEC2601 **Assessment:** Lab assignments, major assignment, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to teach the fundamental principles of microcontroller system design. This involves a thorough understanding of the interaction between hardware and software at the assembly language level, and of interfacing to external devices. The course will focus each year on a particular microcontroller which is widely used in industry. The unit will introduce students to microprocessor and microcomputer systems, emphasising assembly language programming and building on the digital logic foundations from first year. In particular, the following subjects are addressed: Introduction to microprocessors, stored-program computer architecture, instruction codes and addressing modes, instruction execution cycle; Memory devices; Computer architecture and assembly language programming; Microprocessor and microcontroller systems, memory and IO interfacing, interrupts and interrupt handling; Serial and parallel communications; Systems design, documentation, implementation, debugging and testing.

At the end of this unit students should achieve the following aims: Gain an intimate understanding of the way in which microcontrollers operate; Understand the relationship between the software and hardware used in a Mechatronic system; Learn concepts useful in the design and implementation of simple Mechatronic systems; Apply their knowledge to implement a simple Mechatronic system given a design specification.

### MTRX3700

#### Mechatronics 3

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (2hrs lec and one 3hr lab) per week **Prerequisites:** MECH2701 or MTRX2700 **Prohibitions:** MECH4710 **Assessment:** Group work, presentation, project, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to provide experience, confidence and competence in the design and implementation of microprocessor-based products and instruments; to impart a detailed knowledge of the software and hardware architecture of a typical modern microcontroller, and an understanding of the use of these resources in product design; and to provide experience of working in a project team to prototype a realistic product to meet a specification.

At the end of this unit students will understand microprocessor system organization, and the organization of multiple and distributed processor systems, special purpose architectures (DSPs etc) and their application. The student will have a detailed knowledge of the software and hardware architecture of a modern microcontroller. This knowledge will include an in-depth understanding of the relationship between assembly language, high-level language, and the hardware, of the utilisation and interfacing of microcontroller hardware resources, and of the design and development of software comprised of multiple interrupt-driven processes. The student will have the competence to develop prototype microprocessor-based products.

Course content will include single processor systems, multiple and distributed processing systems, special purpose architectures (DSPs etc) and their application; standard interfacing of sensor and actuation systems; ADC/DAC, SSI, parallel, CAN bus etc.; specific requirements for microprocessor-based products; problem definition and system design; tools for design, development and testing of prototype systems; the unit of study will include a project, where groups of students design, develop and commission a microprocessor-based product.

### MTRX4700

#### Experimental Robotics

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2hrs lec and 3hrs lab) per week. **Prerequisites:** AMME3500 or (MECH3500 and MECH3800); MTRX3700 or MECH3700 **Assessment:** Lab experiments, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to present a broad overview of the technologies associated with industrial and mobile robots. Major topics covered are sensing, mapping, navigation and control of mobile robots and kinematics and control of industrial robots. The subject consists of a series of lectures on robot fundamentals and case studies on practical robot systems. Material covered in lectures is illustrated through experimental laboratory assignments. The objective of the course is to provide students with the essential skills necessary to be able to develop robotic systems for practical applications.

At the end of this unit students will: be familiar with sensor technologies relevant to robotic systems; understand conventions used in robot kinematics and dynamics; understand the dynamics of mobile robotic systems and how they are modeled; have implemented navigation, sensing and control algorithms on a practical robotic system; apply a systematic approach to the design process for robotic systems; understand the practical application of robotic systems in applications such as manufacturing, automobile systems and assembly systems; develop the capacity to think creatively and independently about new design problems; undertake independent research and analysis and to think creatively about engineering problems.

Course content will include: history and philosophy of robotics; hardware components and subsystems; robot kinematics and dynamics; sensors, measurements and perception; robotic architectures, multiple robot systems; localization, navigation and obstacle avoidance, robot planning; robot learning; robot vision and vision processing.

**MUED1001****Composition Studies****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathryn Marsh **Session:** Semester 1 **Classes:** 2hr workshop/wk **Assessment:** Composition for small ensemble 60%; design & assessment of composition tasks (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

In this unit of study, students will gain an understanding of the nature of the creative process and how it might be taught. Australian compositions of the last 25 years will be examined, and these will serve as a model for the student's own compositional explorations. Work to be completed will be for instruments and/or voices available in the seminar groups, and will include documentation and evaluation of the processes of composition. In the last weeks, the unit will focus on assessment. Students will compose short pieces either individually or in small groups appropriate to the school level and targeted task design. Links with aural skills and musicology will be included. Pieces will be performed and assessment possibilities will be explored in seminars. The emphasis will be on learning assessment conventions through participation and exploration of practical solutions.

**MUED1002****Music Technology****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Anthony Hood **Session:** Semester 1, Semester 2 **Classes:** 1 hr lecture and 1hr lab/studio/wk **Assumed knowledge:** Basic computer skills. **Assessment:** Music Technology Project (60%); Recording Fundamentals (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit aims to develop a good understanding of concepts relating to music technology fundamentals, skills in using music software and hardware, and confidence in problem-solving. Students will be introduced to a range of audiovisual technologies through lectures, the website and a series of practical tasks. Students will gain a basic proficiency in sound recording, with a focus on the newer portable devices, sound editing and mixing, and an understanding of digital sound formats and PA systems. There will be an overview of software for notation / theory / aural training / sequencing, and students will have the opportunity to make a small web site that incorporates audio/video content.

**MUED1004****Non Western Music****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathryn Marsh **Session:** Semester 1 **Classes:** 2hr workshop/wk **Assessment:** Attendance at all sessions; performance; regular submission of written reports; major assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies(Hons), B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

An important expectation of all music educators is the ability to teach from a perspective which acknowledges the cultural dimensions of music. To encourage the development of this perspective, this unit provides students with the opportunity to study a musical culture through direct experience of it, and to analyse the implications for teaching and learning that this presents. Issues dealing with methodologies of teaching, learning and research; ethical considerations; and the availability and applications of resources are covered in the unit.

**MUED1006****Significant Methods****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathryn Marsh **Session:** Semester 1 **Classes:** 2 hr workshop/wk **Assessment:** Written assignment; design of

learning experiences which demonstrate an understanding of relevant method(s) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, Dip Mus, UG Study Abroad Program.

This unit will provide students with an opportunity to develop knowledge of, and teaching skills relating to significant music education methods. Students will focus on a number of internationally recognised approaches to teaching music, including those developed by Dalcroze, Kodaly and Orff, as well as more recent innovations from the 20th and 21st centuries. Students will participate in learning experiences which develop their musical knowledge and are suitable for application to a variety of teaching situations, especially classroom teaching.

**MUED2002****Junior Secondary Music Education****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Dr Michael Webb **Session:** Semester 2 **Classes:** 2hr workshop/wk **Prerequisites:** MUED4999 Pre-secondary Music **Corequisites:** MUED3002 Practicum 2 **Assessment:** Unit of work (45%), evaluative report (30%), seminar (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** UG Study Abroad Program.

In this unit students study music education in junior secondary schools. This includes: i. examination of current syllabuses; ii. experience and analysis of strategies for teaching musical skills and understandings; iii. the role of creativity in music teaching and learning; iv. musical concepts and processes and their significance to music education; v. resource selection and development.

**MUED2605****Children, Music and Educational Settings****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathy Marsh **Session:** Semester 2 **Classes:** 2 hours seminar per week + 6 half days and 14 full days practice teaching in schools **Assumed knowledge:** It is strongly recommended that students have completed MUED1006 Significant Methods and GENS1000 Introduction to Teaching **Assessment:** Annotated bibliography and syllabus discussion; planning, teaching and evaluating of music experiences; assessment of teaching competence in relation to stipulated criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed).

This unit develops the knowledge and skills fundamental to the planning, teaching and evaluation of effective music learning experiences for children in the primary school. Students will participate in a range of practical activities in order to acquire a repertoire of developmentally appropriate music experiences for teaching and learning in K-6 settings. Students will become familiar with the approaches of current music and creative arts curriculum documents and resources, and will plan and implement sequential music experiences which facilitate the children's development of musical creativity, skills and concepts and which incorporate cultural diversity. This unit incorporates practical teaching experience in primary schools.

**MUED3000****Choral Pedagogy****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Dr Neil McEwan **Session:** Semester 1 **Classes:** 2hrs/wk **Assessment:** Composition/arrangement for available resources (40%), preparation and conducting of score (30%), assignment (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

This unit uses theory and practice to develop skills in choir training. There will be treatment of specific techniques in the areas of voice production, rehearsal skills and conducting. The various aspects of planning and structuring a rehearsal will be dealt with as separate components. Topics will include voice types, psychology of singing, conducting styles, choral balance and repertoire. Choral repertoire chosen will represent varying music styles.

**MUED3002****Practicum 2****Sydney Conservatorium of Music**

**Credit points:** 12 **Teacher/Coordinator:** Dr Sharon Tindall-Ford **Session:** Semester 2 **Classes:** 7wk block beginning in Week 5 of the semester. **Prerequisites:** MUED2005 Practicum 1 **Corequisites:** MUED2002 Junior Secondary Music Education, GENS2001 Education 4 **Assessment:** Fulfillment of criteria in Practicum Handbook **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), UG Study Abroad Program.

This first secondary practicum is a seven-week block which takes place from Week 5 of Semester 2, Year 3 of the award. The main purposes of the practicum are that students develop the ability to plan and teach lessons to year 7-10 classes and acquire an understanding of the developing adolescent. Details of this unit are contained in the Conservatorium Practicum Handbook. For further information contact the Practicum Coordinator.

**MUED3004****Senior Secondary Music Education****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Dr Peter Dunbar-Hall **Session:** Semester 2 **Classes:** 2hr workshop/week **Prerequisites:** MUED2002 Junior Secondary Music Education **Corequisites:** MUED4003 Practicum 3 **Assessment:** Seminar presentation, assignment. The major assignment will be based on Practicum 3 experience (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** UG Study Abroad Program.

In this unit students investigate the principles of music teaching and learning at the senior secondary level. Topics include: i) music needs and interests of senior students, ii) techniques for teaching and assessing composition, iii) developing student skills in aural perception and performance, iv) methods for teaching musicological understanding, v) analytical techniques suitable for a range of musical styles, vi) curriculum documents and vii) methods of evaluation and assessment.

**MUED3031****Survey of Jazz History****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1 **Classes:** 1 hr lecture, 1 hour workshop **Assessment:** Listening exam (20%); Lead sheet (20%); live jazz gig report (20%); teaching & learning sequence (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is not available for Jazz Performance major students.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, UG Study Abroad Program.

This unit of study provides students with an overview of the development of jazz from its earliest stages to the present. The approach will be one of analysis of stylistic characteristics of the different types of jazz. It is especially designed for students in the BMus(MusEd) degree program for whom it is a core requirement, but is also available to students in other degree programs (apart from Jazz Performance major students). Lecture material will be supplemented by practical workshops involving performance and introduction to improvisation, and soloing techniques.

**MUED3602****Teaching Music: Junior Secondary School****Sydney Conservatorium of Music**

**Credit points:** 12 **Teacher/Coordinator:** Dr Michael Webb **Session:** Semester 2 **Classes:** 12 three hour lecture/seminar sessions and professional experience of 5 single days plus a 4-week block in schools **Prerequisites:** MUED2605 Children, Music & Educational settings **Assessment:** Written discussion of set readings and ideas and principles covered in Unit of Study sessions; development of a classroom management plan; the design and submission of a junior secondary music teaching and learning sequence incorporating the use of technology; and the delivery before peers of a lesson developed according to prescribed teaching and learning principles **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed).

This Unit of Study prepares students for careers in secondary music teaching. Current junior secondary syllabus documents are analysed, pedagogical theories are examined and practical strategies for teaching group listening, performance, creative and musicological skills and understandings are explored. Areas addressed include lesson planning, programming, classroom management, and resource selection and development. Technology and media issues related to music education are also considered. All of these components are studied in the broader context of creating and sustaining a challenging classroom learning environment.

**MUED3603****Composition in Music Education****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Anthony Hood **Session:** Semester 1 **Classes:** 2 hour workshop/week **Prerequisites:** MUED1002 Music Technology **Assessment:** Composition (50%), design of composition task (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed).

This unit of study will examine the teaching and learning of composition in NSW secondary schools. Through the completion of small composition exercises, particularly using recent Australian compositions as a model, students will develop strategies to successfully integrate composition in their teaching. Students will survey sampling, sequencing and notation software, develop skills in software evaluation, and will discuss how technology might enhance the teaching and learning of composition. Assessment strategies will be considered.

**MUED3604****Ensemble Pedagogy****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Webb **Session:** Semester 2 **Classes:** 3 hours lectures per week **Assessment:** Submission of simple arrangement in short score of two pieces of music, for choral and for mixed instrumental ensemble; submission of original composition or arrangement in detailed full score using notation software; planning and conducting of rehearsal session; submission of written rehearsal plan and written self-evaluation based on video of session. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies(Hons), B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

Choral and/or instrumental ensemble programs are a significant component of school music education and commonly involve the music teacher in various musical roles in addition to those of co-ordinator and/or administrator. This Unit of Study is creative and practical in nature and provides students with both a general understanding of the fundamental components of school choral and instrumental work and a more detailed understanding of how to establish, maintain and sustain successful school choral and instrumental music programs. Key pedagogical issues are considered and relevant skills are practised, including creating scores and leading and conducting rehearsals.

**MUED3629****Honours: Research in Music Education 1****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathy Marsh **Session:** Semester 1 **Classes:** 2 hour seminar per week **Assessment:** Bibliography and review of literature; preliminary research proposal. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit is commenced in the third year of the degree program and enrolment is subject to approval of the Chair of Unit and Undergraduate Studies Committee.*

**Associated degrees:** B Mus (Mus Ed).

The aims of this unit of study are to develop an understanding of music education research processes, and to identify research methods suitable for individual students' research topics. It examines a range of music education research paradigms which can broadly be categorised as qualitative and quantitative and introduces students

to related research procedures. Readings and seminar activities are designed to facilitate students' critical analysis of research in terms of the relevant research methodologies. Students will also develop strategies for locating and reviewing literature pertaining to their fields of research interest. As an outcome of this unit, students will submit a preliminary literature review and preliminary research proposal.

### MUED3630

#### Honours: Research in Music Education 2 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathryn Marsh **Session:** Semester 2 **Classes:** 2 hour seminar per week or 1 hour individual consultation per week during part of the course. **Prerequisites:** MUED3629 Honours: Research in Music Education 1 **Assessment:** Initial thesis chapters; ethics documentation. 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed).

This unit of study consolidates and extends skills acquired in Honours: Research in Music Education 1. It broadens students' knowledge of a variety of research methods, concepts and research designs which are useful in answering empirical research questions. Evolving skills will be extended through practical tasks in which students examine and apply a range of qualitative and quantitative data analysis procedures. Through ongoing reading and critical evaluation of related research literature, students will prepare a research proposal for implementation in the final semester of the Honours program. This will be documented in the form of the first three chapters of a thesis. Ethical issues in music education research are an adjunct area of study and students will submit all documentation required for ethics approval of their proposed research. Students will participate in seminars and individual consultation sessions.

### MUED4000

#### Instrumental Pedagogy Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Michael Webb **Session:** Semester 1 **Classes:** 2hr workshop/wk **Assessment:** Composition (30%), rehearsal/conducting techniques (30%), arrangement (20%), seminar presentation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus.

This unit provides students with opportunities to: i. develop knowledge of the conventions of scoring and notating music for instrumental ensembles; ii. study and apply conducting techniques; iii. learn and refine baton technique; iv. compose or arrange a piece of music for an available ensemble; v. observe, plan and run instrumental rehearsals; vi. examine the role of instrumental ensembles in music education.

### MUED4002

#### Technology in Music Education Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Anthony Hood **Session:** Semester 2 **Classes:** 24 hours/semester delivered as two 2hr seminars for 6 weeks. **Prerequisites:** MUED1002 Music Technology 1 **Assessment:** Preparation of teaching resource integrating technology (50%), essay (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

The unit will examine possibilities offered by technology in the music classroom. There will be an examination of how technology can enhance the learning of composition, musicology and performance, and management of students within the computer and keyboard labs will be discussed. Students will work with digital video, learn about various sound file formats, including those used for streaming audio over the internet, and use different digital storage media. The creative possibilities of sampling and the manipulation of sound files on a computer will be explored in a number of software environments. In the studio, the focus will be on the process of making a quality recording of an instrumentalist or ensemble.

### MUED4003

#### Practicum 3 Sydney Conservatorium of Music

**Credit points:** 12 **Teacher/Coordinator:** Dr Sharon Tindall-Ford **Session:** Semester 1, Semester 2 **Classes:** 7wk block beginning in Week 5 of the semester. **Prerequisites:** MUED3002 Practicum 2 or GENS3002 Practicum 2 **Corequisites:** MUED3004 Senior Secondary Music Education, GENS4001 Education 7: Individual Differences **Assessment:** Fulfillment of criteria in Practicum Handbook. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

*Note: NB: This unit is only available in semester 1 if the student has finished all other units.*

**Associated degrees:** B Mus (Mus Ed), UG Study Abroad Program.

This second secondary practicum is a seven-week block which takes place from Week 5 of Semester 2 in the fourth year of the degree. Students will be required initially to teach twelve music periods a week. Some of these periods should be on senior secondary classes. Towards the end of the practicum, it would be expected that, on two days a week, the student would be responsible for a teacher's full day program. Details of this Unit are contained in the Conservatorium Practicum Handbook or for further information contact the Practicum Coordinator.

### MUED4004

#### Multicultural Studies in Music Education Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathy Marsh **Session:** Semester 1 **Classes:** 2hr seminar/wk **Assessment:** Readings assignment, fieldwork assignment and seminar presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus.

This unit prepares students to teach music in a multicultural society. Music of a range of cultures is investigated and techniques are given for transforming these findings into strategies for music education. Provision is made for the collection, evaluation and development of music resources for use in multicultural music education. Culture-specific learning processes are examined, and music is studied in relation to its structure and its cultural context.

### MUED4006

#### Popular Music Studies Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathryn Marsh **Session:** Semester 1 **Classes:** 2hr workshop/wk **Assessment:** Presentation (30%), reports (25%), assignment (45%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, Dip Mus, UG Study Abroad Program.

The purpose of this unit is to examine methods for teaching popular music. This includes study of relevant literature, investigation of the place of popular music in music education, analysis methods suitable for popular music, composition and performance of popular music, and technology aspects of popular music studies.

### MUED4012

#### Music Education Hons 3: Special Study 1 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** James Renwick **Session:** Semester 1 **Classes:** 30 min supervision/wk; group seminars **Prerequisites:** MUED3030 Music Education Honours 2 Research Methods 2 **Assessment:** Draft of first three thesis chapters; oral presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

In this unit students work individually on their Special Study research topic, each under the supervision of a designated supervisor. The focus of research during this semester should be data collection and expansion of the literature review and methodology. To ensure continued progress, students are required to give an oral presentation on their topics and to complete a draft of the first three chapters of their Special Study Report (including an outline of the topic and its

significance, a review of the relevant literature and discussion of the methodology).

### MUED4020

#### Music Education Hons 4: Special Study 2 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** James Renwick **Session:** Semester 2 **Classes:** 30 min supervision/wk; group seminars **Prerequisites:** MUED4012 Music Education Hons 3: Special Study 1 **Assessment:** 12,000 - 15,000 word written Special Study report (100%); oral presentation of Special Study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

Students continue work on their research projects under the individual supervision of Conservatorium staff. During this semester, data collection and analysis should be completed, leading to the submission of the research report by the end of the semester. Toward the end of the semester each student will make an oral presentation on the Special Study, discussing the results of the study and its implications.

### MUSC1501

#### Concepts of Music Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Winsome Evans **Session:** Semester 1 **Classes:** 2 hour lecture & 1 tutorial/wk **Prerequisites:** At least 67% in the NSW HSC Music 2 or 3-unit Music Extension or the equivalent skills as determined by the Chair of Unit **Prohibitions:** MUSC1503, MUSC1504 **Assessment:** Seven composition exercises (60%), two aural tests plus class work assessment in weekly aural tutorials (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The Arts Music Unit holds a diagnostic test in the week before Semester 1 begins for those students who have not passed the prescribed HSC courses yet believe they have the equivalent aural and harmonic skills to attend Concepts of Music. Please phone the Unit for details by the end of February.*

**Associated degrees:** B A, B A, B Mus Studies, B Int S, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

Research-based analysis of fundamental compositional concepts in a wide range of Western and non-Western musical styles (classical, popular, traditional, etc.) in order to complete set exercises in musical composition, complemented by integrated aural tutorials. The course will focus on aspects of melody, harmony and rhythm. All exercises are to be presented in neat, hand-written notation in book format.

### MUSC1503

#### Fundamentals of Music I Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Hindson **Session:** Semester 1 **Classes:** 1 lecture and 2 tutorials (aural and written)/wk **Prohibitions:** MUSC1501 **Assessment:** Written and online music theory assessment (60%), aural assessment (30%), attendance and participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B Mus Studies, B Int S, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

An introduction to basic music literacy skills, including the ability to read and write music and an understanding of fundamental aspects of its structure and composition. The material covered in this course ranges from elementary skills such as the system of Western music notation through to more advanced skills such as melodic harmonization and dictation.

### MUSC1504

#### Fundamentals of Music II Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Hindson **Session:** Semester 2 **Classes:** 1 lecture and 2 tutorials (aural & written)/wk **Prohibitions:** MUSC1501 **Assumed knowledge:** Material covered in MUSC1503. Students interested in taking this course who have not completed MUSC1503 must see the lecturer beforehand to ascertain that they have the required knowledge. **Assessment:** Written and online music theory assessment (60%), aural assessment (30%), attendance and participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B Mus Studies, B Int S, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

A more advanced exploration of music literacy skills. The material covered in this course ranges from the broad to the specific: from an examination of musical elements and the way they are used in a variety of musical genres through to specific compositional aspects such as four-part writing or analysis of melodic writing in different musical cultures.

### MUSC1506

#### Music in Western Culture Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Professor Anne Boyd **Session:** Semester 1 **Classes:** 2 x 1hr lecture and 1 tut/wk **Assumed knowledge:** The ability to follow a musical score while listening to the music and some prior knowledge of elementary music theory. **Assessment:** Tutorial work (40%), 2000 word essay (40%), 60 minute exam (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B Mus Studies, B Int S, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

An historical study of Western music from the Classical Greeks to the present day focussing upon the problems of canon formation and the impact of music notation upon musical performance and composition throughout the ages. Analytical study of a number of works by major composers shows how musical meaning is constructed in relation to the development of tonality and other stylistic conventions.

### MUSC1507

#### Sounds, Screens, Speakers: Music & Media Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Charles Fairchild **Session:** Semester 2 **Classes:** 2hr lecture and 1 tut/wk **Assessment:** One 1,000 word assignment (30%); one 500 word assignment (20%); one 500 word tutorial test (10%); one 2,000 word assignment (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B Mus Studies, B Int S, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

Music has been dramatically shaped and reshaped by every major change in communications technology in the 20th century from vinyl discs to MP3s. In this unit of study we will analyse such issues as the ways in which the early recording industry transformed jazz, the blues and country music, how the presentation of music on radio and television changed how the music industry created new musical celebrities, and the challenges the music industry faces as digital technology transforms the creation, distribution and consumption of music.

### MUSC2612

#### Arts Music Concert Performance 1 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Winsome Evans **Session:** Semester 1 **Classes:** 3 hour tutorials/week **Prerequisites:** 18 junior credit points, AND audition (contact the Unit one week before semester begins) **Assessment:** (1) 40 minute concert performance (repertoire not to be counted in any other performance course); (2) attendance at relevant classes, concerts and rehearsals; (3) programme notes (750 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

Performance on any instrument, in any style (classical, jazz, pop, traditional etc.) in lunch-time concerts in the Great Hall and the Old Darlington School. Students receive a written report, an advisory interview after each concert, peer student critiques and corrections to programme notes (all of which are meant to develop a scholarly, analytical research basis towards the practical performance of music).

It is advised that MUSC2612 and MUSC2613 be taken over two consecutive semesters.

### MUSC2613

#### Arts Music Concert Performance 2 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Winsome Evans **Session:** Semester 2 **Classes:** 3 hour tutorials/week **Prerequisites:** MUSC2612 Arts Music Concert Performance 1 **Assessment:** (1) 45 minute concert performance (repertoire not to be counted in any other performance course); (2) attendance at relevant classes, concerts and rehearsals; (3) programme notes (750 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

Performance on any instrument, in any style (classical, jazz, pop, traditional etc.) in lunch-time concerts in the Great Hall and the Old Darlington School. Students receive a written report, an advisory interview after each concert, peer student critiques and corrections to programme notes (all of which are meant to develop a scholarly, analytical research basis towards the practical performance of music). It is advised that MUSC2612 and MUSC2613 be taken over two consecutive semesters.

### MUSC2614

#### Composition Workshop 1 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Hindson **Session:** Semester 2 **Classes:** 3 hour workshop/week **Prerequisites:** 12 junior credit points in music. **Assessment:** Attendance and participation in classes and concerts (30%), composition portfolio and process diary (60%), aural and/or written presentations (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

An open forum in which students are given an opportunity in a supervised environment to hear their original compositions rehearsed and performed, usually by other participating students. The workshops may be themed around particular genres and musical techniques which vary from semester to semester. eg. music theatre; drone-based compositions; song-writing; sound and rhythm; creating a sound space; media composition etc. The workshop encourages public performance term concerts of new music composed by workshop participants and acts as a forum for lectures from visiting composers and other music industry specialists.

### MUSC2615

#### Advanced Concepts Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Winsome Evans **Session:** Semester 2 **Classes:** 2 hour lecture & 1 tutorial/week **Prerequisites:** MUSC1501 Concepts of Music or MUSC1504 Fundamentals of Music II **Prohibitions:** MUSC2010 **Assessment:** Six composition exercises (60%), two aural tests plus class work assessment in aural tutorials (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

Analysis of fundamental compositional concepts in melody and harmony (demonstrated by students in compositional output presented in neat, hand-written notation). Music from a wide range of Western and non-Western musical styles is studied. Aural training tutorials complement these studies.

### MUSC2618

#### Arts Music Ensemble 1 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Assoc Professor Winsome Evans **Session:** Semester 1 **Classes:** 4 tutorial hours/semester plus rehearsals and

performances. **Prerequisites:** 18 junior credit points in no more than two subject areas. Some ensemble groups require an audition as well. **Assessment:** 1) Weekly tutorials (rehearsals in chosen group plus course tutorial); 2) Concert performance and administrative assistance; 3) A 3,000 word essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

Participation in an approved performance ensemble (where available), such as: the Sydney University Symphony Orchestra, the Gamelan Orchestra 'Langen Suka', the Renaissance Players, the Sydney Chamber Choir, the Sydney University Musical Society, SBS Orchestra, Sydney Youth Orchestra, Sydney Conservatorium Choir, Sydney Philharmonia Choir. Regular weekly rehearsals leading to concerts, supervised by a tutor to improve and develop ensemble performance skills, self-discipline, leadership and administrative prowess. Instruction in section leading, intonation and tone production.

### MUSC2619

#### Arts Music Ensemble 2 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Winsome Evans **Session:** Semester 2 **Classes:** 4 tutorial hours/semester plus rehearsals and performances. **Prerequisites:** MUSC2618 Arts Music Ensemble 1 **Assessment:** 1) Weekly tutorials (rehearsals in chosen group plus course tutorial); 2) Concert performance and administrative assistance; 3) A 3,000 word essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

Advanced performance in an approved performance ensemble (where available), such as: the Sydney University Symphony Orchestra, the Gamelan 'Langen Suka', the Renaissance Players, the Sydney Chamber Choir, the Sydney University Musical Society, SBS Orchestra, Sydney Youth Orchestra, Sydney Con Choir, Sydney Philharmonia Choir. Regular weekly rehearsals leading to concerts, supervised by a tutor to improve and develop ensemble performance skills, self-discipline, leadership and administrative prowess. Instruction in balance, section leading, intonation and tone production.

### MUSC2621

#### The Mediaeval Spanish Melting Pot Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Winsome Evans **Session:** Semester 1 **Classes:** 3 hours/week **Prerequisites:** 18 Junior credit points, including 12 in Music (or advanced facility in reading music). Contact course coordinator for further information. **Prohibitions:** MUSC2009 **Assessment:** 4,500 word essay (or 4,000 word essay and a musical composition arrangement). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

An overview of secular music in mediaeval Spain: song and dance genres, minstrel and courtly traditions (including the dance songs of Martin Codax and the cantigas de Santa Maria of King Alphonso X), Arabic and Jewish influences on genres, styles of performance and structures of poetic texts. This course will consider performance issues and involve analysis of musical and poetic structures.

### MUSC2622

#### Music in the Sixties Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Cecilia Sun **Session:** Semester 2 **Classes:** 3 hours/week **Prerequisites:** 18 junior credit points **Prohibitions:** MUSC2106 **Assessment:** Written assignments of 3,000 words, online journal (1,500 words) and participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

This unit will study a wide range of music from the 1960s. Repertoire will be drawn from both art and vernacular traditions, and will be studied within the context of the social and political upheavals of the period. Music studied will include examples from Experimental Music, Rock & Roll and Folk Music.

### MUSC2631

#### Fieldwork, Ethnography and Transcription Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Charles Fairchild **Session:** Semester 2 **Classes:** 2 hour lecture/week **Prerequisites:** 12 junior music credit points. Students will normally have completed either MUSC1501 Concepts of Music or MUSC1504 Fundamentals of Music II. **Prohibitions:** MUSC2903 **Assessment:** Field project (oral and written presentation - 4500 words); (40%) two transcriptions - 500 words each (30%); critical readings and class participation (500 word analysis) (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

This unit is a prerequisite for MUSC4011 Music Honours A (for BA Hons in Music). It examines a number of approaches to ethnomusicological fieldwork through critical readings on musical ethnography. Students will have the opportunity to apply this knowledge in a fieldwork project of their own choosing. Key ethnomusicological techniques such as audio and video recording, archiving and documentation will be introduced. The uses of transcription and analysis in ethnomusicology, and the latest technological aids to transcription will be introduced and discussed. A number of practical transcription exercises will also be examined.

### MUSC2632

#### Introduction to Stravinsky Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Cecilia Sun **Session:** Semester 2 **Classes:** 2 hours/week **Prerequisites:** 12 junior music credit points. **Assessment:** A 4,000 word essay (50%), listening test (20%), participation (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

An in-depth study of the music of Stravinsky within the vibrant artistic and cultural life of European music in the 20th century. A critical and analytical evaluation of the development of Stravinsky's music from its Russian origins, through cosmopolitan neo-classicism to the advanced serialism of his late works. An examination of reception issues, the interaction of Stravinsky's music with other cultural forms, especially dance, in the contemporary world.

### MUSC2641

#### Twentieth Century Music Techniques Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Hindson **Session:** Semester 2 **Classes:** 2 hr lecture/tutorial per week **Prerequisites:** 12 junior credit points in music-based subjects **Prohibitions:** CMPN1011 or CMPN1611 **Compositional Techniques & Analysis 1** **Assessment:** Written assignments (50% - equivalent to 3,000 words), class presentation (20% - equivalent to 1,200 words), exam (30% - equivalent to 1,800 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

A range of compositional procedures from the 20th century Western music tradition will be examined, with particular emphasis on music of the latter half of the century. Works by a variety of Australian and

international composers will be studied, with the aim to increase students' understanding of some of last century's major developments in Western music. Students will apply these concepts in submitted composition tasks. A good working knowledge of musical notation is essential for this subject.

### MUSC2651

#### Australian and Asian Music 1 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Professor Anne Boyd **Session:** Semester 1 **Classes:** 2 hour lecture and 1 hr tut/week **Prerequisites:** 18 junior credit points **Assessment:** One 3000 word essay, or individual project (60%); a listening test (750 words - 15%); 3 on-line quizzes (15%); attendance and participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

Australian musical culture focussing upon issues of identity and belonging including a study of Aboriginal, Asian and Pacific music and influences on musical composition in Australia since European settlement.

### MUSC2653

#### Introduction to Digital Music Techniques Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Hindson **Session:** Semester 1 **Classes:** 3 hr lecture/demonstration/week **Prerequisites:** 18 Junior credit points **Prohibitions:** MUSC2053 **Assessment:** Sound recording and editing assignment (40%); creative assignment(s) (40%); class presentation, attendance and participation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

This unit is an introduction to the use of digital sound and music in creative and multimedia contexts. It is a practical course in which students are introduced to tools of sound creation and manipulation. In addition, participants will be exposed to a number of approaches to electroacoustic music creation across the 20th and 21st centuries. A basic knowledge of music concepts and ability to follow a piano score is required.

### MUSC2654

#### Popular Music Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Charles Fairchild **Session:** Semester 1 **Classes:** 2 hours/week **Prerequisites:** 18 junior credit points **Assessment:** Short analysis (1,000 words - 30%); tutorial test (500 words - 20%); major essay (4,500 words - 40%); class participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

How did early American blues and country music develop in tandem? How was punk different in the US, the UK and Australia? What are the origins of the DJ culture? This unit of study presents a thematic overview of a wide variety of styles, movements and spectacles. It examines major genres of popular music, their stylistic features and historical antecedents as well as modes of reception and the role of popular music in everyday life. No formal music training is necessary.

### MUSC2662

#### Film Music Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Hindson & Dr Charles Fairchild **Session:** Semester 1 **Classes:** 2 hour lecture/week **Prerequisites:** 18 junior credit points **Assessment:** Written and/or music composition

assignments (5,000 words), Exam (1,000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: An ability to read music at a basic level and an understanding of fundamental musical terminology would be an advantage in this unit of study but is not essential.*

**Associated degrees:** B A, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit will introduce a wide array of aesthetic and compositional approaches to setting music for film, examine interrelations and convergences between the music and film industries, and apply these interrelations and convergences to practical scenarios. Learning will be supported by a wide range of films and scholarly sources.

### MUSC2666

#### A Global Sound: African American Music Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Charles Fairchild **Session:** Semester 2 **Classes:** 2 hours/week **Prerequisites:** 18 junior credit points. **Prohibitions:** SSCP1002 **Assessment:** Two 1000 word assignments; result of individual analysis. One 4,000 word assignment; result of individual research. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

How did the music of enslaved and marginalised people eventually become a dominant force in contemporary popular culture? This unit will examine the local reinvention of a wide variety of African American musics in communities around the world. From soul and funk in West Africa to ska and reggae in the Caribbean, we will examine how music moves around the world and within local communities to make new forms of meaning.

### MUSC2667

#### Shakespeare as Opera Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Halliwell **Session:** Semester 2 **Classes:** One 2hr seminar/wk **Prerequisites:** 18 junior credit points. **Assessment:** 1 mid-semester assignment (1500 words), 1 essay (4500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

This course will study the literary and musical strategies employed by composers and librettists in the adaption of the plays of Shakespeare into opera. Operas to be examined are taken from nearly 400 years of operatic repertoire including the classical, romantic, modernist and postmodernist periods. Recent CD and DVD recordings of both the plays and operas will be used, and current adaption theory as applicable to opera will be investigated.

### MUSC2680

#### Spanish Jews in the Ottoman Empire Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Winsome Evans **Session:** Semester 2 **Classes:** 2 hour lecture & 1 hour tut/week **Prerequisites:** 48 junior credit points. **Assumed knowledge:** The ability to read music. **Assessment:** One 4,500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

An overview of secular traditional genres, musical and poetic, of Spanish Jews, post-1492, in their resettlement in countries of the Mediterranean basin. The main focus will be on traditional song and dance forms in the Ottoman Empire, touching on shared and borrowed fertilisations (Judaic, Arabic, Islamic, Christian), with particular

reference to song genres with Judezmo texts. Other aspects of cross fertilisation will be considered alongside older retained traditions (dress, food, language, religious customs).

### MUSC2686

#### Mozart and his Times Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Cecilia Sun **Session:** Semester 1 **Classes:** 2hr lecture and 1hr tut/week **Prerequisites:** 18 junior credit points. **Assessment:** Written assignments of 300 words (50%), listening test (20%), online journal (20%), participation/reading (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

This course is for students who wish to explore the beautiful and challenging music of Mozart. Through reading and intensive listening, we will study the cultural and musical contexts in which Mozart produced his works. Students will emerge with a sense of what makes Mozart special: the ways in which he is (and is not) typical of his turbulent and fascinating age, and the reasons his music still speaks to us so powerfully today. No formal musical training necessary.

### MUSC2690

#### Music and Gender Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Cecilia Sun **Session:** Semester 1 **Classes:** 2 hr lecture + 1 hr tut/week **Prerequisites:** 18 junior credit points. **Assessment:** Written assignments of 300 words (70%), online journal (20%), participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

This course will study the representations of gender, the body, and sexuality by both male and female musicians in repertoire drawn from a number of different historical and geographic moments. Topics of study will cover a range of popular and art music genres. No previous formal musical training required.

### MUSC2693

#### Advanced Fundamentals of Music Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Winsome Evans **Session:** Semester 1 **Classes:** 2 hr lect/wk and 1 hr tut/week **Prerequisites:** MUSC1504 Fundamentals of Music 2 **Prohibitions:** MUSC1501 Concepts of Music, MUSC2615 Advanced Concepts **Assumed knowledge:** Material covered in MUSC1504 Fundamentals of Music 2 **Assessment:** 7 compositional exercises (sometimes subdivided into smaller components); 3 aural tests. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

A composition course in which research-based analysis of aspects of music from a wide range of Western and non-Western styles (classical, popular, traditional, etc) and periods (mediaeval to modern) leads to composing set exercises in the styles and structures studied, integrated with complementary aural tutorials. Compositions are to be presented for assessment in neat, hand-written notation in a large book format.

### MUSC2810

#### Music Exchange Sydney Conservatorium of Music

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

**MUSC2812****Music Exchange****Sydney Conservatorium of Music**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

**MUSC2813****Music Exchange****Sydney Conservatorium of Music**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

**MUSC3604****Arts Music Concert Performance 3****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Assoc Professor Winsome Evans **Session:** Semester 1 **Classes:** 3 hour tutorials/week **Prerequisites:** MUSC2613 Arts Music Concert Performance 2 **Assessment:** (1) 45 minutes concert performance (repertoire not to be counted in any other performance course); (2) attendance at relevant classes, concerts and rehearsals; (3) programme notes (1,000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus.

Performance on any instrument in any style (classical, jazz, pop, traditional, etc.) in lunch-time concerts in the Great Hall, MacLaurin Hall and the Old Darlington School. Students receive a written report, an advisory interview after each concert, peer student critiques and corrections to programme notes (all of which are meant to develop a scholarly, analytical research basis towards the practical performance of music). It is advised that MUSC3604 and MUSC3605 be taken over two consecutive semesters.

**MUSC3605****Arts Music Concert Performance 4****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Winsome Evans **Session:** Semester 2 **Classes:** 3 hour tutorials/week **Prerequisites:** MUSC3604 Arts Music Concert Performance 3 **Assessment:** (1) 50 minute concert performance (repertoire not to be counted in any other performance course) including ensemble performance; (2) attendance at relevant classes, concerts and rehearsals; (3) programme notes (1,000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus.

Performance on any instrument, in any style (classical, jazz, pop, traditional etc.) in lunch-time concerts in the Great Hall, MacLaurin Hall and the Old Darlington School. Students receive a written report, an advisory interview after each concert, peer student critiques and corrections to programme notes (all of which are meant to develop a scholarly, analytical research basis towards the practical performance of music). It is advised that MUSC3604 and MUSC3605 be taken over two consecutive semesters.

**MUSC3609****Musicology****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Dr Cecilia Sun **Session:** Semester 2 **Classes:** 2 hours/wk **Prerequisites:** 12 junior credit points in music **Assessment:** Written assessments (60%), online journal (20%), participation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad Program.

What do we study when we study music? What kinds of stories do we tell about the history of music? What are the central issues, questions, and concerns that drive the study of music? This course will begin to answer these questions and provide an overview of historical musicology as an academic discipline. In addition, students will also learn and practice the research skills necessary to find and evaluate sources, and to define and develop an area of interest. These skills will provide a solid foundation for the independent research work necessary in the Honours year.

**MUSC3611****Composition Workshop 2****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Hindson **Session:** Semester 2 **Classes:** 3 hr workshop/week **Prerequisites:** MUSC2614 Composition Workshop 1 **Assessment:** Attendance and participation in classes and concerts (30%); composition portfolio and process diary (60%); aural and/or written presentations (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B A, B Mus, B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Arts, Dip Mus, UG Study Abroad.

An open forum in which advanced students are given an opportunity in a supervised environment to hear their original compositions rehearsed and performed, usually by other participating students. The workshops may be themed around particular genres and musical techniques which vary from semester to semester. e.g. music theatre; drone-based compositions; song-writing; sound and rhythm; creating a sound-space; media composition etc. The workshop encourages public performance in twice term concerts of new music composed by workshop participants and acts as a forum for lectures from visiting composers and other music industry specialists. This unit covers areas not already covered in MUSC2614 Composition Workshop 1.

**MUSC4011****Music Honours A****Sydney Conservatorium of Music**

**Credit points:** 12 **Teacher/Coordinator:** Professor Anne Boyd/Dr Cecilia Sun **Session:** Semester 1, Semester 2 **Prerequisites:** Credit results in MUSC3609 Musicology, and either MUSC2631 Fieldwork, Ethnography & Transcription or another advanced music analysis course, plus a Music Major with credit average results in 36 senior music credit points. **Assessment:** 15,000 - 20,000 word thesis (40%); Dissertation Seminar (20%); Performance, Composition or Musicology Special (20%); and a further 12 credit points in Arts or Music (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B A, B Mus Studies, B Mus Studies, B A, Dip Arts(Hons).

The Honours BA in Music is both a completion at a high standard of an academic education in music, and a preparation for postgraduate study in music. Intending Honours students should speak to the Honours co-ordinator before enrolling. Honours requirements are:

Thesis: a thesis on a topic agreed with the course coordinator, but normally negotiated by the end of the previous year in the course of MUSC3609 Musicology. A research-based performance or a major composition up to half the total value of the course may, with permission of the Chair of Unit, be included as an integral part of the thesis. Individual fortnightly supervision throughout the year.

Dissertation Seminar: two hours per week.

Special Project: in either Musicology, Performance or Composition to be negotiated between student and supervisor.

Further 12 credit points in Arts or Music (units of study subject to approval).

**MUSC4012****Music Honours B**

### **Sydney Conservatorium of Music**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** MUSC4011  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal  
(lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B A, B Mus Studies, B Mus Studies, B A,  
Dip Arts(Hons).

## NEUR3001

### Neuroscience: Special Senses Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Dario Protti **Session:** Semester 1 **Classes:** Two 1 hour lectures per week; one 3 hour practical per fortnight and one 3 hour tutorial per fortnight. **Prerequisites:** For BMedSc students: BMED(2801 or 2503) and BMED(2806 or 2505) For other students: (PHSI(2101 or 2001 or 2901 or 2005 or 2905) or ANAT(2003 or 2010)) and 6 credit points of MBLG. **Prohibitions:** PHSI3001, NEUR3901 **Assumed knowledge:** It is strongly recommended that students also take unit NEUR3002. PHSI2005 and ANAT2010 are assumed knowledge. **Assessment:** Two 1 hour exams, one prac report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Nutrition), UG Study Abroad Program.

The aim of this course is to provide students with an introduction to the structure and function of the nervous system and to the main concepts of processing of sensory information. Understanding basic sensory transduction mechanisms and the function of the sensory systems is necessary to understand how perceptual processes work in normal and disease conditions and provides a gateway to unravel the complexity of the mind. Basic aspects of low and high level sensory processing in all sense modalities will be covered, with a special emphasis in the auditory and visual systems. The relationship between sensory systems, perception and higher cognitive functions will be addressed.

Bear, Connors, Paradiso. Neuroscience: Exploring the brain. Baltimore: Williams & Wilkins, 2001

## NEUR3002

### Neuroscience: Motor Systems & Behaviour Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Vladimir Balcar **Session:** Semester 1 **Classes:** Two 1 hour lectures per week, one 3 hour practical per fortnight and one 3 hour tutorial per fortnight. **Prerequisites:** For BMedSc students: BMED(2801 or 2503) and BMED(2806 or 2505) For other students: (PHSI(2101 or 2001 or 2901 or 2005 or 2905) or ANAT(2003 or 2010)) and 6 credit points of MBLG. **Prohibitions:** PHSI3001, NEUR3902 **Assumed knowledge:** It is strongly recommended that students also take unit NEUR3001. ANAT2010 and PHSI2005 is assumed knowledge. **Assessment:** Two 1 hour exams, neuroanatomy practical test, prac report, paper discussion sessions, library essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Nutrition), UG Study Abroad Program.

The aim of this course is to provide students with an introduction to the structure and function of the nervous system. Our current knowledge of how the brain works is based on the analysis of the normal structure of the nervous system and its pathways, the functional effects of lesions and neurological diseases in different parts of the nervous system, and the way that nerve cells work at the molecular, cellular and integrative level. This course focuses on to the neural circuits and the mechanisms that control somatic and autonomic motor systems, motivated behaviours, emotions, and other higher order functions. The lecture series addresses the different topics, each of which offers special insight into the function of the nervous system in health and disease.

## NEUR3003

### Cellular and Developmental Neuroscience Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Kevin Keay and Dr Catherine Leamey **Session:** Semester 2 **Classes:** Three 1 hour lectures plus one 1 hour tutorial or one 2 hour practical per week. **Prerequisites:** For BMedSci: 42 credit points of intermediate BMed units. For others: 18 credit points of Intermediate science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics **Prohibitions:** NEUR3903, PHSI3002, PHSI3902 **Assumed knowledge:** Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain. **Assessment:** One 1 hour exam. Major essay/report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment in NEUR3004 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This second semester unit is designed to introduce students to "cutting edge" issues in the neurosciences. This course is a combination of small lectures on current issues in cellular and developmental neuroscience and a research-based library project. Suitably qualified students may have the option of replacing the library project with a laboratory project. Issues covered in the lecture series will include the role of glial on cerebral blood flow and neural transmission, neurochemistry and psychiatric disorders and the development of central and peripheral nervous system.

Kandell, Schwartz and Jessell. Principles of Neural Science 4th edition.

## NEUR3004

### Integrative Neuroscience Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Kevin Keay and Dr Catherine Leamey **Session:** Semester 2 **Classes:** One 0-1 hour lecture, one 2 hour tutorial plus 1-2 hours small meeting/laboratory session per week. **Prerequisites:** For BMedSci: 42 credit points of intermediate BMed units. For others: 18 credit points of Intermediate science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics. **Prohibitions:** NEUR3904, PHSI3002, PHSI3902 **Assumed knowledge:** Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain. **Assessment:** One mid-semester exam. 1 hour final exam. Major essay/report. Tutorial participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Enrolment in NEUR3003 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This second semester unit is designed to introduce students to "cutting edge" issues in the neurosciences and to be taken in conjunction with NEUR3003. This course is a combination of small group lectures on current issues in neuroscience, seminar groups and a research-based library project. Suitably qualified students may have the option of replacing the library project with a laboratory project. Seminars will be held on topics including imaging pain, emotions, cortical development & plasticity, colour vision, stroke and hypertension, long-term regulation of blood pressure, auditory hallucinations and the "cocktail party effect".

Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Kevin Keay and Dr Catherine Leamey **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial or one 2 hour lab session per week. **Prerequisites:** For BMedSci: 42 credit points of intermediate BMed units. For others: 18 credit points of Intermediate science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics. Plus, students must have a CREDIT (or better) in NEUR3001/3901 and NEUR3002/3902. **Prohibitions:** NEUR3003, PHSI3002, PHSI3902 **Assumed knowledge:** Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain. **Assessment:** One 1 hour exam. Major essay/report. Mini-lecture. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrollment in NEUR3004/3904 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other. Students must receive permission from the coordinators for enrollment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit encompasses the material taught in NEUR3003. Advanced students perform a research project and present a mini-lecture on a current topic in neuroscience.

**Textbooks**

Kandell, Schwartz and Jessell. Principles of Neural Science. 4th edition.

**NEUR3904****Integrative Neuroscience (Advanced)  
Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Kevin Keay and Dr Catherine Leamey **Session:** Semester 2 **Classes:** One 1 hour lecture, one 2 hour tutorial and 1-2 hour small meeting/laboratory per week. **Prerequisites:** For BMedSci: 42 credit points of intermediate BMed units. For others: 18 credit points of Intermediate science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics. Plus, students must have a CREDIT (or better) in NEUR3001/3901 and NEUR3002/3902. **Prohibitions:** NEUR3004, PHSI3002, PHSI3902 **Assumed knowledge:**

Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain. **Assessment:** One mid semester exam. One 1 hour final exam. Major essay/report. Tutorial participation. Mini-Lecture. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment in NEUR3003/3903 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other. Students must receive permission from the coordinators for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit encompasses the material taught in NEUR3004. Advanced students perform a research project and present a mini-lecture on a current topic in neuroscience research.

### NTMP3001

#### Coral Reef Ecosystems Science

**Credit points:** 6 **Teacher/Coordinator:** Professor Maria Byrne **Session:** S2 Intensive **Classes:** Fieldwork, 80 hours block mode. **Prerequisites:** MARS(2005 or 2905), plus 12 credit points from Intermediate Science units of study which must include at least 6 credit points of Biology. **Assumed knowledge:** General concepts in Biology **Assessment:** Participation in field work and submission of a report. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode *Note: Department permission required for enrolment.*

**Associated degrees:** B Sc (Marine Science).

Coral Reef Ecosystems is an intensive unit that will be held at either the Heron Island or One Tree Island Tropical Research Stations on the Great Barrier Reef. The unit focuses on the dominant taxa in reef environments and linkages between them. Emphasis is given to corals, other reef associated invertebrates (eg. echinoderms and plankton) and fishes. Ecological and physiological aspects of key organisms are explored. Aspects covered include: distribution of corals; coral bleaching; coral symbionts and the health of the corals based on photosynthetic activity; predation on corals; the input of plankton to reefs; and, the role of fishes and invertebrates in reef environments.

### NTMP3004

#### Aquaculture Science

**Credit points:** 6 **Teacher/Coordinator:** Professor Maria Byrne **Session:** S2 Intensive **Classes:** Fieldwork, 80 hours block mode. **Prerequisites:** 12 credit points from Intermediate Science units of study which must include at least 6 credit points of Biology. **Assumed knowledge:** General concepts in Biology. **Assessment:** Assignments and report. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B Sc (Marine Science).

Aquaculture is an intensive unit that will be held at the tropical research station on Orpheus Island in the Great Barrier Reef. The unit focuses on approaches to aquaculture in tropical marine environments. Emphasis is given to aquaculture of tropical invertebrates (especially bivalves and clams) and fishes. Some aspects of the unit may also be done using the aquarium system on campus at James Cook University. Aspects covered include: the design of aquarium facilities; water quality; rearing of algae; rearing of planktonic food; stocking densities; and, growth and genetics of the target species.

### NTMP3005

#### Coastal Management Science

**Credit points:** 6 **Teacher/Coordinator:** Belinda McMillen (course contact) **Session:** S2 Intensive **Classes:** Fieldwork, 80 hours block mode. **Prerequisites:** 12 credit points from Intermediate Science units of study which must include at least 6 credit points of Biology. **Assumed knowledge:** General concepts in Biology. **Assessment:** Assignment and report. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: These units are only available to BSc (Marine Science) students. Department permission required for enrolment*

**Associated degrees:** B Sc (Marine Science).

This unit examines the impacts of human activities on coastal and marine environments. It explores the complex relationships among the ecological and social values of these environments and outlines strategies and tools for their management. This is an intensive unit that will be held at the Moreton Bay Research Station.

### NTMP3551

#### NTMP Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc (Marine Science).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### NURS3001

#### Advanced Clinical Nursing Assessment Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** normal day or online **Assessment:** case study, health history, reflective journal, webct participation & community profile **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day or On-line

**Associated degrees:** B N, UG Study Abroad Program.

This unit of study focuses on the advanced clinical abilities required for nursing assessment of patients, families communities in the 21st century. For the nurse to undertake advanced clinical assessment they must use all available sources of evidence including physiological, psychological, spiritual, socio economic and cultural values on an ongoing bases. Students will learn how to assess a patient's condition - physically, socially and mentally and to make insightful nursing observation that can inform practice. At the community level, and in the wider socio-economic context, students will study emerging patterns of disease that may impact on the nature of nursing care in the new millennium such as the emergence of multi resistant bacteria, H5N1 and Dengue Fever.

### NURS3002

#### Health Illness & Care: Int'l Perspective Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** normal day or online **Assessment:** essay, assignments and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day or On-line

**Associated degrees:** B N, UG Study Abroad Program.

This unit critically analyses national and international concepts of health, illness and care. It investigates the ways in which social, cultural and historical forces have shaped ideas and beliefs about health and illness. The unit also examines the structure of contemporary societies, emphasising the relationship between social structures, cultural factors, and the distribution of health and illness. In particular it examines the effects of social inequalities on the health of vulnerable, at-risk, and marginalised groups.

### NURS3003

#### Clinical and Patient Education Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** normal day or online **Assessment:** essays and exam **Campus:** Camperdown/Darlington **Mode of delivery:** On-line or Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N, UG Study Abroad Program.

The field of clinical and patient education is explored in the context of the healthcare environment with emphasis on continuing changes in technologies, information and evidence bases for practice. The unit involves a study of the literature on the nature of learned and performed skills and what factors impact on the delivery of effective education in clinical settings. This unit also explores the role of the

registered nurse in relation to patient education, staff education and student supervision.

### NURS3004

#### Minor Thesis/Practice Project Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** normal day or online  
**Prerequisites:** 24 unspecified credit points **Assessment:** 1x5000wd essay  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day or On-line

**Associated degrees:** B N, UG Study Abroad Program.

Students undertake advanced work on an area of practice, or a particular practice, in nursing. The project will involve three stages: first, conducting a review of the available research literature; second, examining other forms of evidence, such as written policies and protocols or actual practices; and third, composing a written report on the ways in which practice can be enhanced and/or further investigated by original research. This project will be highly suited to currently practising nurses whose professional responsibilities and interests include clinical leadership, management of a clinical service or practice development and/or the use of evidence in practice.

### NURS3005

#### Nursing Management & Clinical Governance Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** normal day or online  
**Assessment:** assignments and exam **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day or On-line

**Associated degrees:** B N, UG Study Abroad Program.

This course provides a forum for experienced practitioners to enhance their skills and knowledge regarding the concept of clinical governance and to develop a framework for its implementation. The structure of the course will enable participants to explore and critique issues surrounding clinical governance in the context of care provision, organisational climate and culture, quality, clinical and professional leadership and financial responsibility. This course utilises a better practice (continuum of care / quality / cost / utilisation and health outcomes) framework.

### NURS3006

#### Current Issues in Nursing Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures and tutorials, online  
**Assessment:** essay, presentation, exam **Campus:** Camperdown/Darlington  
**Mode of delivery:** On-line or Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N.

This unit of study will extend knowledge of professional nursing by focusing on particular issues that currently challenge nurses. Drawing on clinical, technical and sociological research and current media reporting it will examine how and why issues are reported and why some are highly publicized while some are virtually ignored. The unit encourages reflection and awareness of the complexities of nursing practice by examining the culture of the health care sector, nurses' responsibility and accountability for patient outcomes, patient safety and nurses' outcomes. The health care sector is presently experiencing a shortage of registered nurses and is constrained by an ideology favouring economic rationalism. These factors impact on today's nurses, their practice and their professionalisation, and the health of the nation.

### NURS4020

#### Theory, Method and Ethic in Research Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** seminars, workshops  
**Assessment:** literature review **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N (Hons).

This unit of study focuses on the knowledge and skills required for the beginning nurse researcher. It examines (i) research design and research methods, including various data collection and analysis

techniques, ethical considerations in undertaking research; (ii) evaluating and critiquing the literature; students will undertake a critical and analytical literature review of their research topic in 5,000-6,000 words and (iii) written and oral modes of disseminating research findings.

### NURS4021

#### Honours Thesis A Nursing and Midwifery

**Credit points:** 18 **Session:** Semester 1 **Classes:** seminars, workshops  
**Assessment:** seminar presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N (Hons).

This unit provides students with the foundations for undertaking and managing their research project. It explores the practical aspects of managing the honours project, including the supervisory relationship and time management, as well as structuring an honours thesis and developing the thesis argument. Students are also assisted in developing skills for presenting their research, including oral presentation skills. It is expected that students will commence their research project under the guidance of their supervisor during this unit.

### NURS4022

#### Honours Thesis B Nursing and Midwifery

**Credit points:** 12 **Session:** Semester 2 **Classes:** supervised work  
**Assessment:** Thesis **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N (Hons).

In this unit of study students will continue working on their independent research project under the guidance of their supervisor, including undertaking relevant field work, analyzing the data and writing their thesis.

### NURS4023

#### Honours Thesis C Nursing and Midwifery

**Credit points:** 12 **Session:** Semester 2 **Assessment:** Thesis **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N (Hons).

In this unit of study students will complete their independent research project and thesis. Students will complete the 15,000-20,000 words thesis.

### NUTR2551

#### Nutrition Science Exchange Science

**Credit points:** 4 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc (Molecular Biotechnology), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### NUTR2911

#### Food Science Introductory (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Kim Bell-Anderson **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 2.5 hour practical per week. **Prerequisites:** MBLG(1001 or 1901) and CHEM (1001 or 1101 or 1901 or 1903 or 1108) and CHEM (1002 or 1102 or 1902 or 1904 or 1109) and BIOL (1001 or 1911) and BIOL (1002 or 1003 or 1902 or 1903). For Combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) degree completion of all Junior units in the table of units for this course (CHEM1101, BACH1161, BIOS1159, EXSS1018 CHEM1102, BIOS1133, BIOS1160, EXSS1033, MBLG1001) **Prohibitions:** NUTR2901 **Assessment:** One 3 hour exam, one 1 hour theory of practical exam, one assignment and 5 quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B Sc (Nutr), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study aims to give a broad appreciation of foods as commodities; that is, the origin, history, cultural and nutritional importance of the major foods for human use. Further, aspects of food processing and cooking that affect the nutritional quality of these foods will be discussed. Food groups covered include animal foods, seafood, cereals, sugars, fats and oils, dairy products, legumes, nuts, vegetables, fruits, herbs and spices and alcohol.

Topics in food science and technology include the principles of food preservation, aspects of the preparation and processing of cereals, dairy products, fats and oils, sugars and starches and meats. Food legislation is discussed as well as food additives, naturally occurring toxicants in foods, food pollutants, food safety, food hygiene and food microbiology. Practical classes investigate the nutritional and physical composition of food commodities, and demonstrate their behaviour and functional properties during normal culinary processes.

### NUTR2912

#### Nutritional Science Introductory (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Kim Bell-Anderson **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 2.5 hour practical per week. **Prerequisites:** MBLG(1001 or 1901) and CHEM (1001 or 1101 or 1901 or 1903 or 1108) and CHEM (1002 or 1102 or 1902 or 1904 or 1109) and BIOL (1001 or 1911) and BIOL (1002 or 1003 or 1902 or 1903). For Combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) degree completion of all Junior units in the table of units for this course (CHEM1101, BACH1161, BIOS1159, EXSS1018 CHEM1102, BIOS1133, BIOS1160, EXSS1033, MBLG1001). **Prohibitions:** NUTR2902 **Assumed knowledge:** NUTR2911 **Assessment:** One 3 hour exam, one 1 hour theory of practical exam, one assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B Sc (Nutr), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

Information about the major nutrients, vitamins, the major and trace elements is presented with respect to food sources, consumption patterns, requirements for health, absorption, metabolism, nutritional/disease significance, deficiency states and the consequences of excess intakes.

Practical classes cover aspects of food analysis of the student's own diet. The practicals are designed to give students hands-on experience in the determination of major and minor nutrients in foods using procedures and instrumentation used in food research and analytical laboratories. The data obtained in the laboratory will be compared with that obtained with reference to published data in food composition tables. Students will gain an appreciation of the limitations of both methods of data collection and will become competent in the use and interpretation of food composition software packages.

### NUTR3912

#### Community and Public Health Nutrition Science

**Credit points:** 6 **Teacher/Coordinator:** Ms Soumela Amanatidis **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour workshop and tutorial per week. **Prerequisites:** NUTR2911 and NUTR2912 **Prohibitions:** NUTR3902 **Assessment:** One 2 hour exam, 2-3 assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B Sc (Nutr), B Sc (Nutrition), UG Study Abroad Program.

This unit of study covers topics such as nutrition through the Life cycle from infancy to old age; nutrition in vulnerable groups such as low income groups, indigenous populations and homeless youth and theories of food habits. It helps students gain skills and knowledge in planning, implementing and evaluating nutrition health promotion programs for various population groups. Topics covered include, principles of health promotion, effective nutrition promotion strategies, program evaluation and program planning. It also looks at current public health nutrition strategies for promoting health and preventing diet related diseases. The delivery of material involves lectures, tutorials and workshops.

### NUTR3922

#### Nutrition and Chronic Disease Science

**Credit points:** 6 **Teacher/Coordinator:** Ms Soumela Amanatidis **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour workshop/tutorial per week. **Prerequisites:** NUTR2911 and NUTR2912 **Prohibitions:** NUTR3902 **Assessment:** One 2.5 hour exam, two assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B Sc (Nutr), B Sc (Nutrition), UG Study Abroad Program.

This unit of study examines the relationship and evidence for the role of nutrition in the etiology of chronic diseases such as cancer, coronary heart disease, hypertension, obesity, dental caries and osteoporosis. It also investigates the current nutrition policies and guidelines that are aimed at preventing these diseases at a population level. These include National Dietary Guidelines, Nutrition Reference Values, food legislation and Commonwealth and State food policies. Students will also get an opportunity to examine the current popular fad diets on the market. There is also a section on developing communication skills for promoting positive nutrition messages using the media. The delivery of material involves lectures, tutorials and workshops.

### NUTR4001 Clinical Nutritional Science A Science

**Credit points:** 24 **Teacher/Coordinator:** Ms Beth Rohrlach **Session:** Semester 1 **Classes:** 24 hours per week consisting of lectures, practical classes and tutorials. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex &Sp Sc), B Sc (Nutr), B Sc (Nutrition), B Sc (Nutrition)(Hons), UG Study Abroad Program.

Students enrolled in the Honours program study various advanced aspects of clinical nutritional science. The program may include lectures, tutorials, seminars and practicals. Assessment will include projects, examination, assignments, and may include classwork.

### NUTR4002 Clinical Nutritional Science B Science

**Credit points:** 24 **Teacher/Coordinator:** Ms Beth Rohrlach and Ms Margaret Nicholson **Session:** Semester 2 **Classes:** 20 week full time attendance of practical placement at clinical/community/food service sites. **Assessment:** Practical work, assignments and attendance. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit of study will commence prior to the start of semester.*

**Associated degrees:** B App Sc (Ex &Sp Sc), B Sc (Nutr), B Sc (Nutrition), B Sc (Nutrition)(Hons).

All students must achieve competency in the 3 areas of clinical, community and food service dietetics. Students undertake dietetic clinical training at two or more hospitals. Community placements occur at community nutrition centres, public health units and food industry sites. Food service placements are usually part of a hospital food service department or other suitable site. The semester is of 20 weeks duration and placement starts early (usually late June) to accommodate this.

### NUTR4101 Nutrition Research A Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex &Sp Sc), B Sc (Nutr), B Sc (Nutrition).

Students enrolled in the Honours program study various advanced aspects of nutrition research. The program may include lectures, tutorials, seminars and practicals. Students will undertake a research project. Assessment will include the project and may include examination and classwork.

### NUTR4102 Nutrition Research B

### Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** NUTR4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

## OCCP1036

### Human Occupations IB Health Sciences

**Credit points:** 3 **Session:** Semester 2 **Classes:** On-campus, 9 lectures, eleven 2hr tutorials **Assessment:** A combination of assignments, reports, case studies, presentations, participation, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study continues with self-maintenance occupations, addressing the home and the community environment and the nature of self maintenance activities within the context of daily life. Students will explore the effects of physical, psychosocial and cognitive dysfunction on personal care, home and community skills and examine various occupational therapy assessment and intervention strategies.

## OCCP1081

### Human Occupations IA Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** On-campus, 6 lectures, ten 2hr tutorials **Assessment:** A combination of assignments, reports, case studies, presentations, participation, vivas and/or exams **Practical field work:** Tutorials are skills-based **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study introduces students to the concept of purposeful occupation in the area of self-maintenance. Students will explore the impact physical, psychosocial and cognitive dysfunction has upon self-maintenance task performance. They will also be given the opportunity to develop skills in methods used to assess, maintain, restore and enhance mobility and basic self-care skills. Appropriate assessment and intervention strategies are presented and explored.

#### Textbooks

Pedretti LW & Early MB (eds), Occupational Therapy Practice Skills for Physical Dysfunction (5th ed), Mosby, St Louis (2001)

## OCCP1082

### OT Theory and Process I Health Sciences

**Credit points:** 5 **Session:** Semester 1 **Classes:** A combination of lectures, tutorials, seminars, workshops and/or WebCT **Assessment:** A combination of assignments, reports, case studies, presentations, participation, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit aims to introduce students to the concepts and philosophies which are foundations underlying current and future directions of occupational therapy practice. These philosophies and concepts will be explored through different theoretical perspectives as reflected in models of occupational therapy practice and include perspectives from therapists, consumers and community members. Students will critically review models of occupational therapy practice and their influence on the problem solving process in occupational therapy.

## OCCP1083

### Occupations/Roles Across the Lifespan I Health Sciences

**Credit points:** 5 **Session:** Semester 2 **Classes:** 4hr lectures/week **Assessment:** Module A: mid semester exam (50%), module B: end semester exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study introduces the student to lifespan development concepts and to occupational role development. It also focuses on the development of occupations and roles in infancy, childhood, adolescence and young adulthood. Development of skills and abilities necessary for performance of occupations during these groups will be examined from various theoretical perspectives.

#### Textbooks

No textbook required. Core references given in lectures. Book and readings to be purchased

## OCCP1091

### Components of Occ Performance IA Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** On-campus, eleven 2hrs tutorials **Assessment:** A combination of assignments, reports, case studies, presentations, participation, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study introduces students to the principles of intrapersonal and interpersonal components of occupational performance focusing on social interaction and helping skills which underpin person to person occupational therapy assessment and intervention in all areas of practice. Students will explore different theories of communication and counselling as applied in occupational therapy settings.

#### Textbooks

List to be provided in class

## OCCP1094

### Professional Practice I Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** Clinical/fieldwork placement **Assessment:** Presentation, assignments, performance reports **Practical field work:** Off-campus clinical experience **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study provides students with opportunities to interact with clients and relevant others, to demonstrate professional behaviour, to integrate and apply theory and skills acquired in other units and to promote their awareness of the range and scope of occupational therapy services and the roles of team members.

## OCCP1095

### Components of Occ Performance IB Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3hrs lectures, 2hrs tutorial/week **Assessment:** Viva exam (35%) (students must pass this to obtain overall pass in the unit), exam (35%), systematic instruction: 1500 word 'word' plan for instruction (30%), 80% attendance requirement for this module **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

The biomechanical performance component is introduced and examined in order to identify and intervene where human performance deficits exist in this area. Principles of occupational therapy assessment and intervention in the area of biomechanical performance are established in order to restore, maintain and enhance occupational performance. Principles of learning and systematic instruction which underpin occupational therapy assessment and intervention in all

areas of practice will be established. Students will also explore different theoretical models and approaches to the delivery of services in different contexts. Consideration will be given to future practice context and the consequences of theoretical and practice issues for service delivery.

### OCCP1096

#### Understanding Occupation-People-Context Health Sciences

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hr lecture, 2hr tutorial/week and self-directed learning **Assessment:** Assignments, case reports, presentations, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT).

The process of understanding and appreciating people's occupations in context (that is, participation in meaningful and purposeful daily life activities within diverse environments) is a fundamental skill necessary for occupational therapy practice. Using a client-centred perspective to explore participation in day-to-day activities, students will investigate various perspectives of human occupation across the lifespan and develop the therapeutic communication skills to discover where, when, how and why people from different backgrounds occupy their time. In doing so, students will learn: How do I explore how people (with or without health conditions) participate in daily life activities? How do I find out about the activities and routines in which persons of different ages and cultures participate? What processes do I use to understand and appreciate the association between what people do in day-to-day life and their health and quality of life?

### OCCP1097

#### Analysing Occupation and Performance Health Sciences

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2hr lecture, 2hr tutorial/week and self-directed learning **Assessment:** Assignments, case reports, presentations, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT).

The expertise to analyse: a) self-care, mobility, domestic, social, educational, play, leisure, economic, and community activities (i.e., task analysis); b) a person's performance of activities (i.e., activity analysis); and c) the context in which people participate in activities (i.e., environmental analysis) is a fundamental skill for occupational therapy practice. Using various methods of systematic analysis, students will develop the skills to identify and enhance the inherent therapeutic potential of activities for children, youth and adults. In doing so, students will learn: How do I figure out what enables (and hinders) people's participation in and performance of activities? How do I identify environmental factors that influence people's performance in activities? How do I structure and adapt activities so they possess greater therapeutic potential all persons, regardless of the presence of a health condition?

### OCCP1098

#### Teaching Occupations and Performance Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hr lecture, 2hr tutorial/week and self-directed learning **Assessment:** Assignments, case reports, presentations and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT).

Teaching and learning is a fundamental, collaborative process applicable to all areas of occupational therapy practice - whether working in partnership with one person or a group of people, providing direct, indirect or consultative services. Anchored in specific principles of teaching and learning relevant to the provision of occupational therapy, students will develop proficiency in using a range of processes to facilitate people's understanding of activities and routines in everyday life and the performance of day-to-day activities and routines. In doing so, students will learn: How do I help people learn to perform activities and develop new routines where they live, work and play?

What specific methods do I use to foster learning within different contexts? How do I best consider the learning process for persons with or without health conditions?

### OCCP1099

#### Occupational Peerformance: Healthcare 1 Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hr lecture, 2 hr tutorial/week and self-directed learning **Assessment:** Assignments, case reports, presentations, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT).

For adults who experience significant challenges to daily life activities and receive intensive services within physical health (and related) settings, occupational therapy is essential to enhancing, restoring, or maintaining performance of the primary activities necessary for returning to the community (e.g., self-care, mobility) and for helping families and others to address day-to-day challenges that arise. Mindful of a client-centred approach, students will acquire basic assessment, intervention, and evaluation skills necessary for working as an occupational therapist within interdisciplinary healthcare teams. In doing so, students will learn: What occupational therapy processes do I use when a person's performance of self-care and mobility activities is significantly challenged? Within physical health care settings, how do I help enhance, restore, or maintain performance in daily life activities of concern? How do I incorporate a client-centred approach within health care systems? How do I help clients and families address current and future challenges related to daily life?

### OCCP1100

#### Professional Practice I Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 hr lecture, 2hr tutorial/week, 40hr practical and self-directed learning **Assessment:** Assignments, case reports, presentations, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (OT).

Establishing a professional identity and integrating practice with theory is essential to provide quality occupational therapy services. Focusing on professional development in preparation for practice in all areas, during the semester, students will acquire supervisory relationship and elemental teamwork skills; gain basic information literacy skills; cultivate a professional approach to work; enhance communication (written and verbal) skills and reflect critically on professional development. At the end of the semester, students will participate in a supervised one-week, full-time experience within a professional service setting.

### OCCP2041

#### Human Occupations IIA Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** A combination of lectures, tutorials, seminars, workshops and/or WebCT **Assessment:** A combination of assignments, reports, case studies, presentations, participation, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study will focus on two areas; occupations as therapy and leisure. The therapeutic use of meaningful occupations from all performance areas will be examined as part of intervention strategies that may address dysfunction. Students will be given the opportunity to analyse occupations in detail, identifying the therapeutic potential inherent in them, how they may be adapted for different populations and how they may be used as a form of therapeutic intervention is examined. This unit of study will also focus on the individual use and development of satisfying leisure. Students will be given the opportunity to explore the importance of leisure through the lifespan and examine how occupational therapists may assess and facilitate client involvement in positive leisure experiences.

**OCCP2042****Human Occupations IIB  
Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** On-campus, 2-3hrs lectures/week **Assumed knowledge:** Child development **Assessment:** A combination of assignments, reports, case studies, presentations, participation, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

The focus of this unit of study is on play and school occupations of children. Students will be given opportunity to analyse these occupational areas and to develop skills in the selection of occupational therapy intervention strategies to improve a child's occupational performance in play and at school.

*Textbooks*

Recommended readings for each class

**OCCP2044****Components of Occ Performance IIB  
Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** On-campus, 13 lectures, 2hr tutorials (alternate weeks) **Assessment:** A combination of assignments, reports, case studies, presentations, participation, vivas and/or exams **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study will focus on two areas of study: an introduction to group work and mental health practice. Principles of intra-personal and inter-personal practice which underpin occupational therapy assessment and intervention in groupwork practice will be established through experiential learning. Students will also attend a lecture series on interpersonal and intrapersonal practice in the mental health area in order to restore, maintain and enhance human occupational performance.

**OCCP2076****OT Theory and Process II  
Health Sciences**

**Credit points:** 4 **Session:** Semester 1 **Classes:** Six 2hr lectures, five 2hr tutorials **Assessment:** 45min group presentation/discussion & handout (30%), 4000 word group report (50%), peer participation performance (20%), attendance requirements **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study aims to expand students' understanding of occupational therapy theory and process through the exploration of clinical reasoning and decision-making processes. Case studies and problem-based learning will be linked with assessments to explore the application and use of different theories to guide reasoning. Students will also explore different theoretical models and approaches to the delivery of services in different contexts. Consideration will be given to future practice context and the consequences of theoretical and practice issues for service delivery.

**OCCP2077****Occupations/Roles Across the Lifespan II  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1 **Classes:** Ten 2hr lectures, online (WebCT) requirements **Assessment:** 1500 word assignment (60%), 1hr exam (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study focuses on the development of occupations and roles during mid-adulthood and in the elderly. Developmental changes and issues occurring at these stages will be examined as they influence the development of occupations and roles and vice versa. Various developmental perspectives on these changes and issues will be explored.

*Textbooks*

Peterson C, Looking Forward Through the Lifespan (2004)

**OCCP2080****Components of Occ Performance IIA  
Health Sciences**

**Credit points:** 5 **Session:** Semester 1 **Classes:** Thirteen 1hr lectures, six 3hr tutorials **Assessment:** Exam 1 (lecture content Wks 1-7) (40%), exam 2 (lecture content Wks 8-13) (20%), exam 3 (practical exam of tutorial content), audit tasks (20%), 80% attendance requirement for tutorials **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), UG Study Abroad Program.

This unit of study examines sensorimotor component performance in order to identify and intervene for adults and children who have neuromotor disorders resulting in disturbances in muscle tone, motor control and difficulty achieving optimal performance of occupational tasks. Principles of occupational therapy assessment and intervention strategies covered will focus on positioning for function, positioning to prevent deformity, physical guidance to assist occupational performance, physical guidance to improve specific upper limb reach, grasp and release control in order to restore, maintain and enhance human occupational performance.

*Textbooks*

Updated readings assigned yearly

**OCCP2081****Professional Practice II  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** Clinical/fieldwork placement **Prerequisites:** OCCP1094 Professional Practice I, OCCP1091 Components of Occupational Performance 1A **Assessment:** Assignments, performance report **Practical field work:** Clinical practice, 2 weeks **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (OT).

This unit of study provides students with opportunities to demonstrate professional behaviour, integrate and apply theory and skills learned in the previous semesters to occupational therapy practice with guidance/supervision from one or more fieldwork educators. Students will be required to consolidate and expand on previous knowledge and skills.

**OCCP3029****Honours Research Seminar I  
Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** On-campus, 2hrs/week **Assessment:** Ongoing assessments **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Leis&Hlth)Hons, B App Sc (OT) Hons, UG Study Abroad Program.

This seminar is designed to assist honours students with the development of their individual research projects for completion of their thesis in Year 4. At the completion of this unit of study each student will have prepared a written proposal for his/her research project. The development of the research proposal is undertaken in collaboration with an academic supervisor.

**OCCP3032****Occ Therapy Theory and Process III  
Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** 2hr lecture/week, plus WebCT and group work **Assessment:** Peer evaluation, Wks 7 & 11 (25%), industry evaluation, Wk 16 (15%), project presentation, Wk 16 (35%), participation (25%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B App Sc (OT) Hons, UG Study Abroad Program.

This unit of study aims to explore the theory and processes of effective management for current and future occupational therapy practice in varying health care contexts. Consideration will be given to the impact of current and emerging professional issues as well as broader issues in the health care sector and in the community.

## OCCP3050

### Professional Communication and Guidance Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** 3hr tutorial for 4 weeks  
**Assessment:** Two 1500 word essays (50% ea), four reports on activities in placement settings via WebCT **Practical field work:** 3hrs/week during fieldwork placement **Campus:** Cumberland **Mode of delivery:** Distance Education or Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (Leis&Hlth)Hons, UG Study Abroad Program.

This unit is designed to enable students to develop the knowledge, skills and attitudes needed to establish therapeutic helping relationships with clients. Students will complete an independent applied skills assignment during their professional practice placement. They will learn to assess clients' needs and how to best meet these needs through the selection of appropriate strategies. The different helping skills models studied will allow students to develop flexible ways of relating to clients in a variety of context.

## OCCP3052

### Research Project in Leisure and Health Health Sciences

**Credit points:** 4 **Session:** Semester 2 **Classes:** 3hr tutorial for 7 weeks  
**Assessment:** 1500 word essay (40%), 3000 word essay (60%), attendance requirement, presentation (hurdle requirement) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day or Distance Education

*Note: Department permission required for enrolment. Note: This unit is only available to students after completion of 4 semesters (full-time equivalent) of the course*

**Associated degrees:** B App Sc (Leis&Hlth), B Hlth Sc (Hons), B Hlth Sci, UG Study Abroad Program.

This unit of study allows students to research and investigate an area that is of particular professional interest to them. It provides opportunities for students to further develop specialised knowledge and skills through an examination and critical review of the literature and the writing of a research paper which demonstrates an in-depth investigation and integration of information from a variety of sources.

## OCCP3059

### Outdoor Recreation and Education Health Sciences

**Credit points:** 4 **Session:** Semester 2 **Classes:** On-campus mode: four 4hr lecture/week, 4 day camp plus 16hrs study, intensive workshop delivery  
**Assumed knowledge:** Communication skills, basic counselling skills  
**Assessment:** Outdoor education program plan and evaluation. Compulsory attendance on camp **Practical field work:** On-campus mode: 2-4 days camp. Off-campus students: 2-4 days field visits **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day or Distance Education

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth), B Hlth Sci.

This unit's focus is outdoor education in adventure based practice and is comprised of three major components. The first component introduces the notions of experiential education and 'reflection in learning' using associated theories and definitions and the practical application of critical reflection in learning. The second component examines perceptions of skill and risk, the notion of challenge, personal growth and development and moving beyond one's comfort zone. The third component explores the processing of learning through a variety of debriefing methods including the Outward Bound model, frontloading, and metaphoric transference of learning. The third module is taught in block mode, usually over two days at an outdoor education centre where students practise advanced debriefing skills in real adventure experiences. A fee is payable by students for the latter part of the program.

## OCCP3060

### Client Groups II Health Sciences

**Credit points:** 3 **Session:** Semester 2 **Classes:** 2hr lecture/week, WebCT  
**Prerequisites:** OCCP2073 Client Groups 1 or OCCP2061 Client Groups 1  
**Assessment:** 1500 word essay (40%), 1hr group presentation (40%), supporting

report (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day or Distance Education

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (Leis&Hlth)Hons, UG Study Abroad Program.

This unit will continue to develop and integrate expertise in supporting people participating in leisure programs who experience various disabilities. Current legislation and policy related to these client groups will be examined and approaches to policy development discussed. The unit continues to provide students with an understanding of the ways in which clinical and community environments affect participation in leisure and recreation which was commenced in earlier units.

## OCCP3061

### Professional Practice IIIA Health Sciences

**Credit points:** 12 **Teacher/Coordinator:** Ms Nicola Hancock **Session:** Semester 1, Semester 2, Summer Main **Classes:** Clinical/fieldwork placement  
**Prerequisites:** OCCP2081 Professional Practice II **Assessment:** Performance report, presentation, assignment **Practical field work:** Clinical placement, 7 weeks **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (OT), B App Sc (OT) Hons, UG Summer/Winter School.

This unit of study provides students with opportunities to demonstrate professional behaviours, integrate and apply theory and skills learned in the previous four semesters of Professional Practice and other units in the course to occupational therapy service provision; assessing, determining goals, planning, implementing, evaluating, reporting and documenting, with guidance/supervision from one or more fieldwork educators. Students will be consolidating and expanding on previous knowledge and skills.

## OCCP3064

### Human Occupations III Health Sciences

**Credit points:** 3 **Session:** Semester 2 **Classes:** Eleven 1hr lectures, seven 2hr tutorials **Assessment:** 10min presentation (pairs) (10%), 1500 word assignment (pairs) (40%), 1500 word assignment, attendance requirements **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B App Sc (OT) Hons, UG Study Abroad Program.

This unit examines the area of productivity, including occupational choice, paid and non-paid work and productivity throughout the lifespan. Students will be given the opportunity to analyse productivity occupations, study the organisational systems in which they are performed and assess individual functional capabilities for work. The selection of occupational therapy intervention strategies to improve human performance in the area of productivity will be outlined.

## OCCP3065

### Professional Practice IIIB Health Sciences

**Credit points:** 12 **Session:** Semester 1, Semester 2, Summer Main **Classes:** Clinical/fieldwork placement (7 weeks) **Prerequisites:** OCCP2081 Professional Practice II **Assessment:** Presentation, performance reports **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (OT), B App Sc (OT) Hons, UG Summer/Winter School.

This unit of study provides students with opportunities to demonstrate professional behaviours and integrate and apply theory and skills learned in previous units of study in the course to occupational therapy service provision with guidance/supervision from one or more fieldwork educators.

## OCCP3066

### Components of Occ Performance III

## Health Sciences

**Credit points:** 5 **Session:** Semester 2 **Classes:** Unit 1: Twelve 2hr lectures; unit 2: Thirteen 1hr lectures, four 2hr tutorials **Assessment:** Unit 1: 2hr exam (50%); unit 2: 1500 word assignment (30%), independent inquiry tasks (20%). Students must pass both units **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B App Sc (OT) Hons, UG Study Abroad Program.

This unit of study examines the cognitive component in order to identify and intervene when human performance deficits exist in this area to restore, maintain and enhance human occupational performance. The intra-personal and inter-personal components in occupational therapy mental health practice area will also be studied further.

### OCCP3067

#### Professional Practice IIIA

##### Health Sciences

**Credit points:** 18 **Session:** Semester 1 **Classes:** Clinical/fieldwork placement **Prerequisites:** OCCP2083 Professional Practice IIB **Assessment:** Fieldwork performance, WebCT entries, assignments **Practical field work:** Fieldwork (9 weeks fulltime placement) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (Leis&Hlth)Hons.

On campus students will have the opportunity to consolidate their learning through a 9 week placement. During the placement, in the context of a professional relationship with their supervisor, students will integrate academic study with practical experience. The placement will require students, in conjunction with WebCT classes, to implement workplace-based research projects, to further develop their professional identity and to gain mastery of the skills needed in the workplace.

### OCCP3068

#### Professional Practice IIIB

##### Health Sciences

**Credit points:** 4 **Session:** Semester 2 **Classes:** Clinical/fieldwork placement **Prerequisites:** OCCP3067 Professional Practice IIIA **Assessment:** Completion of reports regarding placement performance, placement research evaluation survey **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (Leis&Hlth)Hons.

For on-campus students, this unit completes the requirements for professional practice training in the final year of the course. Within this unit, students are required to submit their end of placement reports on their professional practice placements and reports on the research/evaluation projects that they completed during their placements.

### OCCP3069

#### Professional Practice IIIC

##### Health Sciences

**Credit points:** 5 **Session:** Semester 1 **Classes:** Clinical/fieldwork placement **Assessment:** Fieldwork performance, WebCT entries, assignments **Practical field work:** Fieldwork (9 weeks) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth).

Off-campus students will have the opportunity to consolidate their learning through 315 hours of placement at one agency. Off-campus students will negotiate to take this placement on a full or part-time basis while completing the units OCCP3070 Professional Practice IIID, OCCP3071 Professional Practice IIIE and OCCP3072 Professional Practice IIIF. This placement will require students, in conjunction with WebCT classes, to implement workplace-based research projects, to further develop their professional identity and gain mastery of the skills needed in the workplace.

### OCCP3070

#### Professional Practice IIID

## Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** Clinical/fieldwork placement **Prerequisites:** OCCP3069 Professional Practice IIIC **Assessment:** Fieldwork performance, WebCT entries, assignments **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth).

Off-campus students will have the opportunity to consolidate their learning through 315 hours of placement at one agency. Off-campus students will negotiate to take this placement on a full or part-time basis while completing the units OCCP3070 Professional Practice IIID, OCCP3071 Professional Practice IIIE and OCCP3072 Professional Practice IIIF. This placement will require students, in conjunction with WebCT classes, to implement workplace-based research projects, to further develop their professional identity and gain mastery of the skills needed in the workplace.

### OCCP3071

#### Professional Practice IIIE

##### Health Sciences

**Credit points:** 5 **Session:** Semester 1 **Classes:** Clinical/fieldwork placement **Prerequisites:** OCCP3070 Professional Practice IIID **Assessment:** Fieldwork performance, WebCT entries, assignments **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Leis&Hlth).

Off-campus students will have the opportunity to consolidate their learning through 315 hours of placement at one agency. Off-campus students will negotiate to take this placement on a full or part-time basis while completing the units OCCP3070 Professional Practice IIID, OCCP3071 Professional Practice IIIE and OCCP3072 Professional Practice IIIF. This placement will require students, in conjunction with WebCT classes, to implement workplace-based research projects, to further develop their professional identity and gain mastery of the skills needed in the workplace.

### OCCP3072

#### Professional Practice IIIF

##### Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** Clinical/fieldwork placement **Prerequisites:** OCCP3071 Professional Practice IIIE **Assessment:** Fieldwork performance, WebCT entries, assignments **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment. Note: This unit of study is for off-campus students only*

**Associated degrees:** B App Sc (Leis&Hlth).

Off-campus students will have the opportunity to consolidate their learning through 315 hours of placement at one agency. Off-campus students will negotiate to take this placement on a full or part-time basis while completing the units OCCP3070 Professional Practice IIID, OCCP3071 Professional Practice IIIE and OCCP3072 Professional Practice IIIF. This placement will require students, in conjunction with WebCT classes, to implement workplace-based research projects, to further develop their professional identity and gain mastery of the skills needed in the workplace.

### OCCP4019

#### Honours Research Seminar II

##### Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** On-campus, 2hrs/week **Assessment:** Ongoing assessments **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Leis&Hlth)Hons, B App Sc (OT) Hons.

The seminar is designed to assist and support honours students with their ongoing research project, to enable them to develop problem-solving strategies in the conduct of research and to develop their skills in oral presentation of research projects. This unit of study also provides a continuing opportunity for honours students to discuss, with relevant staff, concerns regarding data analysis and interpretation related to their individual projects.

## OCCP4051

### Professional Practice IV Health Sciences

**Credit points:** 24 **Session:** Semester 1, Semester 2, Summer Main **Classes:** Clinical/fieldwork placement **Prerequisites:** OCCP3061 Professional Practice IIIA, OCCP3065 Professional Practice IIIB **Assessment:** Fieldwork component (performance report, presentation and assignments) and on-campus component (presentation and assignments) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (OT), UG Summer/Winter School.

This unit of study has one 8 week block placement in a professional setting plus briefings and debriefings and an on-campus component, to facilitate integration of on-and off-campus learning. It provides students with the opportunity to consolidate and further develop, with supervision, knowledge, skills and attitudes necessary for safe and effective delivery of occupational therapy services in both traditional and specialised areas of practice.

## OCCP4056

### OT in Learning & Co-ord Difficulties Health Sciences

**Credit points:** 8 **Session:** Semester 1 **Classes:** Thirteen 4hrs lectures **Assessment:** 1500 word assignment, 1000 word report, 3000 word report, attendance requirements **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), B Hlth Sc (OT), UG Study Abroad Program.

This unit will give opportunities for students to study the impact of learning disabilities on children's home and school occupational performance. During the semester, students will study: various explanations of learning disorders; common assessment procedures used by occupational therapists to identify problems; interventions. The focus will be on direct intervention as experienced in private practice occupational therapy for children and consultation with schools. Students will be required to test at least one young child (typical child, rather than children with difficulties) aged between 3-4. Students who participate in this elective will be eligible for fourth year fieldwork placement in a public school in Killara.

## OCCP4062

### Community Based Rehabilitation Health Sciences

**Credit points:** 8 **Session:** Semester 1 **Classes:** Thirteen 2hr lectures **Assessment:** 40min seminar group presentation and handout (40%), 2500 word (per student) manual (group) (60%), attendance requirements **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B Hlth Sc (OT), UG Study Abroad Program.

Many western trained therapists entering community practice (whether in developing countries or developed countries) have little idea of the issues that they will encounter in practice. Developing countries have many years of experience in CBR, therefore we can learn from their experience by firstly reviewing the literature in these areas (most CBR literature is of limited circulation and not easily accessible, if at all, by normal literature review mechanism: this school has an extensive range of literature in the Operation International files to enable people to undertake a review of most pertinent issues). Issues of CBR will be explored and developed to gain a greater understanding of the requirements for working in this area.

## OCCP4063

### Evaluation of OT Programs Health Sciences

**Credit points:** 8 **Session:** Semester 1 **Classes:** Thirteen 4hr lecture/tutorial **Assessment:** 1000 word report (20%), 4000 word report (80%), attendance requirement **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (OT), B Hlth Sc (OT), UG Study Abroad Program.

This unit of study gives students the opportunity to utilise their developing research/evaluation knowledge and learn to apply it to occupational therapy program evaluation, one common use of the research process in professional practice. It is designed to introduce students to some of the issues and practices associated with program and professional activity evaluation. The purpose of this unit of study is to help students develop the knowledge and skills that will allow them to write good, practical project and evaluation proposals, the kind that will get supported and will make a positive contribution to addressing client needs and those of the workplace and profession.

## OCCP4068

### OT in Occ Health, Safety & Rehab Health Sciences

**Credit points:** 8 **Session:** Semester 1 **Classes:** Thirteen 4 hr lecture/tutorial **Prerequisites:** OCCP3064 Human Occupations III **Assessment:** 4000 words report (60%), 2000 word report (40%), satisfactory completion of independent learning tasks, attendance requirements **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B Hlth Sc (OT), UG Study Abroad Program.

This unit of study gives students the opportunity to extend their knowledge and skills of occupational health, safety and rehabilitation developed in OCCP3064 Human Occupations III and other units of study. Students will explore the issues of work-related injuries and disorders and how these impact on the occupational roles of individuals. There is also input from a sociological perspective. Students will learn how to conduct a functional assessment, including writing a report. There will also be content that addresses relevant ergonomic issues in the workplace and consideration of the hierarchy of controls in determining appropriate interventions, including education and training, as well as workplace modifications. Relevant legislation, regulations and competency standards will be used to guide the content and assessment of this unit.

## OCCP4070

### Research Elective Independent Study Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Various **Session:** Semester 1, Semester 2 **Classes:** Independent study **Assumed knowledge:** BACH1141 Analysing Health Research: General, BACH1143 Designing Health Research, BACH1145 Quantitative Health and Social Research or BACH1139 Health and Research Design: General, or equivalent **Assessment:** 2000 word assignment (100%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: For Occupation Therapy honours students only*

**Associated degrees:** B App Sc (Leis&Hlth), B App Sc (Leis&Hlth)Hons, B App Sc (OT) Hons.

This unit will function as an independent study program. As with other research elective units, it allows students to pursue an area of study related to the development of knowledge and skills in a specific area of research methodology in preparation for their research thesis. Students will enrol in this unit if the research methods they wish to study are not covered to the extent required in other research electives.

*Textbooks*

Course notes and readings provided dependent on the research methodology

## OCCP4071

### Professional Practice IV (Hons) Health Sciences

**Credit points:** 20 **Session:** Semester 1 **Classes:** Clinical/fieldwork placement **Prerequisites:** OCCP3061 Professional Practice IIIA, OCCP3065 Professional Practice IIIB **Assessment:** Performance report, presentation, assignments **Practical field work:** Clinical placement (6 weeks) **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (OT) Hons.

This unit of study has one 6 week block placement in a professional setting plus briefings and debriefings to facilitate the integration of on and off-campus learning. It provides students with the opportunity to

consolidate and further develop, with supervision, the knowledge, skills and attitudes necessary for safe and effective delivery of occupational therapy services in both traditional and specialised areas of practice.

### OCCP4072 Honours Thesis Health Sciences

**Credit points:** 24 **Session:** Semester 2 **Classes:** Independent learning **Assessment:** Thesis (100%) **Campus:** Cumberland **Mode of delivery:** Distance Education or Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT) Hons.

This unit of study provides honours students with the opportunity to undertake a supervised research project in an area of occupational therapy. As part of this and the other honours units of study, each student designs and implements an approved research project and submits a thesis describing the project and its implications. In completing the research and thesis, each student works closely with an academic staff member who serves as the supervisor.

### OCCP4075 Mental Health Interventions Health Sciences

**Credit points:** 8 **Session:** Semester 1 **Classes:** Thirteen 2hr lectures, online components **Assumed knowledge:** OCCP1091 Components of Occ Performance IA, OCCP2044 Components of Occ Performance IIB, OCCP3066 Components of Occ Performance III **Assessment:** Viva (50%), ten in-class quizzes (30%), in-class and WebCT participation (20%), attendance requirements **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B Hlth Sc (OT).

This unit of study will extend the students knowledge and practical intervention skills in mental health clinical practice. Intervention skills and strategies developed will be both generic and occupational therapy specific. There will be a large experiential learning component so that students will develop a practical 'how-to' confidence in the clinical application of various techniques with particular consumer populations. In line with current state and national directions, this unit will be guided by principles of wellness and recovery. A range of cognitive focused interventions, psycho-education, family interventions, early intervention, mental health promotion, relapse prevention and strategies to develop effective individual rehabilitation plans are some of the techniques and skills students will develop and practice within this unit.

### OCCP4076 Technology for Living Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Dr Graeme Smith, Ms Gemma McDonald **Session:** Semester 1 **Classes:** Thirteen 4hr lectures **Assessment:** Case study assessment (50%), class test (30%), debate (20%) **Practical field work:** At least one external visit **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Internet activity is required as part of this course*

**Associated degrees:** B App Sc (OT), B Hlth Sc (OT).

This course evaluates various conceptual frameworks that can aid our understanding of the application of this assistive technology. It also examines various assessment tools that are currently in use in different parts of the world. A thorough study of recent literature and research on the application of modern technology will be a key part of the course. Practical aspects of the course will include demonstrations and hands-on use of modern assistive technologies. Visits will also be undertaken to key assistive technology centres in Sydney. Both theoretical and practical aspects of the course will come together in a series of case studies, drawn from the real experiences of people with a disability.

#### Textbooks

Cook A & Polger J, Cook & Hussey's Assistive Technologies- Principles and Practice (3rd ed), Mosby (2007) contains useful material on most aspects of the course. Students will be directed to journal articles, other reference material and research, much of which is available online

### OCCP4077 Professional Elective - General Health Sciences

**Credit points:** 8 **Session:** Semester 1 **Classes:** Classes/modes of delivery will vary depending on the topic chosen **Assessment:** Two to three pieces of assessment equivalent to 8 credit points, attendance requirements **Campus:** Cumberland **Mode of delivery:** Distance Education or Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B Hlth Sc (OT).

This unit of study will present a topic for a professional elective that allows students to explore an area of OT practice in depth. The specific topic will be determined from time to time as teaching staff, visiting scholars and resources are available. The unit will extend the learning students have achieved in the topic in the first three years of the course requiring an increase in the depth of student understanding in the topic area than that required in earlier parts of the course.

### OCCP4078 People with Intellectual Disability Health Sciences

**Credit points:** 8 **Session:** Semester 1 **Classes:** 4hrs/week **Assessment:** 1500 word essay (30%), 500 word site visit report (15%), presentation on fieldwork project (20%), 2000 word report on fieldwork project (35%). Two 250 word individual audit tasks, 85% attendance requirement **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT).

This unit aims to develop students' knowledge, skill and attitudes for working with people with intellectual disability, with a focus mainly on adolescents and adults. Students will study: the definition of intellectual disability; the abilities and support needs of people with intellectual disability; the service settings which people with intellectual disability use, and the role of occupational therapists in those settings. There will be a detailed focus on 'Active Support' as one important approach to supporting people with intellectual disability participate fully (with support) in domestic and community life. Students will learn how to use Active Support techniques when working directly with people with intellectual disability, as well as learning how to train and support carers and direct-care staff in the use of these techniques.

#### Textbooks

Readings will be provided throughout the semester

### ORGN1008 Organ Resources 1 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Philip Swanton **Session:** Semester 1, Semester 2 **Classes:** 1hr tut/wk **Assessment:** Essay (2000w) or prac tests (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific resources classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The unit will focus on the development of essential practical skills for organists.

### ORGN1009 Organ Resources 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Philip Swanton **Session:** Semester 1, Semester 2 **Classes:** 1hr tut/wk **Prerequisites:** ORGN1008 Organ Resources 1 **Assessment:** Essay (2000w) or prac tests (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific resources classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Consolidation of concepts and skills introduced in Organ Resources 1.

### ORGN1601

#### Organ 1

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Philip Swanton **Session:** Semester 1, Semester 2 **Classes:** 14 one hour lessons/semester and performance workshop/wk **Corequisites:** ORGN1008 Organ Resources 1 **Assessment:** Teacher grade 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific organ repertoire in a chosen programme of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire.

### ORGN1602

#### Organ 2

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Philip Swanton **Session:** Semester 1, Semester 2 **Classes:** 14 one hour lessons/semester and performance workshop/wk **Prerequisites:** ORGN1601 Organ 1 **Corequisites:** ORGN1009 Organ Resources 2 **Assessment:** Jury exam assessed by panel of 15-20 mins (instrument specific) 50%. Teacher Grade 50%. Students must pass all assessment components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific organ repertoire in a chosen program of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire.

#### Organ Resources 8

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Philip Swanton **Session:** Semester 1, Semester 2 **Classes:** 1hr tut/wk **Prerequisites:** ORGN4009 Organ Resources 7 **Assessment:** Essay (2000w) or prac tests (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific resources classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

Consolidation of concepts and skills introduced in Organ Resources 7.

### ORGN4607

#### Organ 7

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Philip Swanton **Session:** Semester 1, Semester 2 **Classes:** 14 one hour individual lessons/semester and performance workshop/week **Prerequisites:** ORGN3606 Organ 6 **Corequisites:** ORGN4707 Organ 7 (Adv) **Assessment:** Teacher Grade 100%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Perf), UG Study Abroad Program.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific organ repertoire in a chosen program of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire.

**ORHL1001****Foundations of Oral Health 1****Dentistry**

**Credit points:** 2 **Session:** Semester 1 **Classes:** Clinical work **Assessment:** Report and multiple choice exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Oral anatomy. Dental anatomy. Basics of infection control.

**ORHL1003****Foundations of Oral Health 2****Dentistry**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Clinical work **Prerequisites:** ORHL1001 **Assessment:** Report and assignments, Station test simulation practical **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Introduction to cariology. Introduction to periodontology. Imaging. Extractions. Information systems and clinical record-keeping. Materials science. Clinical reasoning and evidence-based diagnosis.

**ORHL1004****Oral Health Clinical Practice 1****Dentistry**

**Credit points:** 12 **Session:** Semester 2 **Classes:** Clinical work **Assessment:** Report and short answer test, station test and simulation clinical **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Examination, diagnosis and treatment planning. Emergency Introduction to cariology. Introduction to periodontology. Imaging. Extractions. Information systems and clinical record-keeping. Instrumentation. Management of the clinical environment.

**ORHL1005****Oral Health Clinical Practice (Intro)****Dentistry**

**Credit points:** 10 **Session:** Semester 1 **Classes:** Clinical work **Assessment:** Assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Applied infection control. Normal oral health and structure. Recognition of oral diseases. Introduction to the management of oral disease. Impressions and study models. Introduction to assessment, examination, diagnosis and treatment planning. Emergency. Management of clinical environment.

**ORHL2001****Foundations of Oral Health 3****Dentistry**

**Credit points:** 3 **Session:** Semester 1 **Classes:** Clinical work **Prerequisites:** ORHL1003 **Assessment:** Report and multiple choice exam, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Histology, medicine, nutrition, prevention, toxicology, imaging, pain management, tooth restoration

**ORHL2002****Oral Health Clinical Practice II****Dentistry**

**Credit points:** 15 **Session:** Semester 1 **Classes:** Clinical work **Prerequisites:** ORHL1004 **Assessment:** Report and station test, simulation practical, oral **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Assessment, examination, diagnosis and treatment planning. Behavioural science. Biochemistry. Cariology. Clinical reasoning and evidence-based diagnosis. Emergency. Imaging. Impression and study models. Infection control. Information systems. Instrumentation. Management of the clinical environment. Nutrition. Occupational health and safety. Pain management. Periodontal disease. Prevention. Tooth restoration.

**ORHL2003****Oral Health Clinical Practice III****Dentistry**

**Credit points:** 15 **Session:** Semester 2 **Classes:** Clinical work **Corequisites:** ORHL2002 **Assessment:** Report and assignments, station test, clinical practical, oral **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Assessment, examination, diagnosis and treatment planning. Behavioural science. Cariology. Clinical reasoning and evidence-based diagnosis. Extractions. Imaging. Impression and study models. Infection control. Information systems. Instrumentation. Management of the clinical environment. Nutrition. Orthodontics. Pain management. Periodontal disease. Prevention. Pulp disease. Tooth restoration.

**ORHL2004****Clinical - Hygiene and Therapy****Dentistry**

**Session:** S1 Late Int, S2 Late Int **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B O H.

Intensive course in Clinical Work. Practical sessions in Dental Therapy and Hygiene and clinical work. There will be an assessment at the end of the course.

**ORHL3001****Foundations of Oral Health 4**

## Dentistry

**Credit points:** 3 **Session:** Semester 1 **Classes:** Clinical work **Prerequisites:** ORHL2001 **Assessment:** Report and multiple choice test, station test, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Human growth and development. Medicine. Nutrition. Pathology. Toxicology

## ORHL3002

### Oral Health in Society 1 Dentistry

**Credit points:** 3 **Session:** Semester 1 **Classes:** Clinical work **Assessment:** Report and multiple choice test, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Care of the whole patient. Community development. Diet and oral health. Epidemiology and biostatistics. Ethical and legal environment, including informed consent. Health systems and health environment. Marketing and promotion. Occupational health and safety. Oral care needs of identified groups - paediatric, geriatric, special needs (e.g. disabled), medically compromised, ATSI and others. Population health. Public Health Dentistry. Quality assurance. Research methods.

## ORHL3003

### Oral Health Clinical Practice 4 Dentistry

**Credit points:** 18 **Session:** Semester 1 **Classes:** Clinical work **Prerequisites:** ORHL2003 **Assessment:** Report, multiple choice test, station test, clinical practical, oral **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Assessment, examination, diagnosis and treatment planning. Behavioural science. Cariology. Clinical reasoning and evidence-based diagnosis. Emergency procedures. Extractions. Imaging. Impression and study models. Infection control. Information systems. Instrumentation. Management of the clinical environment. Nutrition. Occupational health and safety. Oral care for identified groups - paediatric, geriatric, special needs (e.g. disabled), medically compromised, ATSI and others. Oral prosthesis management. Orthodontics. Pain management. Periodontal disease. Prevention. Pulp disease. Tooth restoration.

## ORHL3004

### Foundations of Oral Health 5 Dentistry

**Credit points:** 3 **Session:** Semester 2 **Classes:** Clinical work **Prerequisites:** ORHL3001 **Assessment:** Report and multiple choice exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Medicine. Nutrition.

## ORHL3005

### Oral Health in Society 2 Dentistry

**Credit points:** 3 **Session:** Semester 2 **Classes:** Clinical work **Prerequisites:** ORHL3002 **Assessment:** Report and multiple choice exam, project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B O H.

Care of the whole patient. Community development. Diet and oral health. Epidemiology and biostatistics. Ethical and legal environment, including informed consent. Health systems and health environment. Marketing and promotion. Occupational health and safety. Oral care needs of identified groups - paediatric, geriatric, special needs (e.g. disabled), medically compromised, ATSI and others. Population health. Public Health Dentistry. Quality assurance. Research methods.

## ORHL3006

### Oral Health Clinical Practice 5

## Dentistry

**Credit points:** 18 **Session:** Semester 1, Semester 2 **Classes:** Clinical work **Prerequisites:** ORHL3002 **Assessment:** Station test, clinical practical, oral, case presentations **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B O H.

Assessment, examination, diagnosis and treatment planning. Behavioural science. Cariology. Clinical reasoning and evidence-based diagnosis. Emergency procedures. Extractions. Imaging. Impression and study models. Infection control. Information systems. Instrumentation. Management of the clinical environment. Nutrition. Occupational health and safety. Periodontal disease. Prevention. Pulp disease. Tooth restoration.

## ORTH2059

### The Eye and Vision Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathryn Rose **Session:** Semester 1 **Classes:** This unit of study will be delivered using varied methods including; face-to-face lectures, tutorials and online learning **Assessment:** Practical skills (30%), community placement and reflection report (10%), written exam, Wks 15-16 (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, M C V S.

In this subject, the normal eye and ocular systems will be introduced. The unit commences with basic anatomy, embryology, physiology and optics of the eye using a systematic approach, followed by sensory visual functions and nourishment and protective systems of the eye. There is an introduction to the specialised methods of testing in a paediatric population. Basic clinical skills and assessment will be introduced, including testing of visual acuity, colour vision and contrast sensitivity. This unit of study is also offered by the discipline of Applied Visual Sciences as an elective to all students enrolled in the Bachelor of Health Sciences.

## ORTH2060

### Disability and Vision Impairment Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Elaine Cornell **Session:** Semester 2 **Classes:** This unit of study will be delivered using varied methods including face-to-face and online delivery **Assessment:** Group work, case studies **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, M C V S.

In this unit of study, the common causes of vision impairment will be introduced, with emphasis on the nature of the rehabilitation process. Students will be encouraged to identify the person's particular needs and be aware of available strategies that can help to meet these needs. This subject is offered as an elective to all students enrolled in the Bachelor of Health Sciences.

*Textbooks*

No set textbooks: students will have access to a wide range of learning materials

## ORTH3050

### Assess and Manage Refractive Errors Health Sciences

**Credit points:** 5 **Teacher/Coordinator:** Mr Nathan Clunas **Session:** Semester 1 **Classes:** Block mode: eight days 9am-3pm and five 4hr tutorials/semester **Corequisites:** ORTH3062 Professional Practice IIIA, ORTH3063 Professional Practice IIIB or ORTH3064 Professional Practice IIHA, ORTH3065 Professional Practice IIIB **Assessment:** Practical exam (45%), 2hr exam (45%), WebCT discussion (5%) workbook, video assessment, refraction autobiography (5%) **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons.

This unit will extend preliminary knowledge of refractive errors to include more complex refractive error topics such as understanding latent

and manifest hypermetropia, aetiology of myopia, progressive myopia and keratoconus. Emphasis will be placed on the clinical evaluation of refractive error including methods of objective and subjective refraction as well as A scan ultrasonography. Correction of refractive errors by both optical and surgical methods will also be a focus of this unit. Aspects of optical dispensing, fitting of contact lenses and surgical correction of refractive errors will be included.

### ORTH3054

#### Orbital & Restrictive Conditions Health Sciences

**Credit points:** 5 **Teacher/Coordinator:** Assoc Prof Elaine Cornell **Session:** Semester 2 **Classes:** 3hr lecture, classroom group work/week **Prerequisites:** ORTH2043 Concomitant Strabismus B **Corequisites:** ORTH3055 Instrumentation III **Assumed knowledge:** Ocular anatomy and physiology of ocular muscles, basic knowledge of the total visual system, sensory and motor, ORTH2047 Concomitant Strabismus A **Assessment:** Class test (30%), 2hr exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons.

The clinical features of recent onset defects of each extraocular muscle will be studied, including the response to clinical tests. The causes, special investigation and management of restrictive/mechanical and orbital defects will be emphasised.

### ORTH3055

#### Instrumentation III Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Assoc Prof Elaine Cornell **Session:** Semester 2 **Classes:** 3hr practical tutorials/week **Corequisites:** ORTH3054 Orbital and Restrictive Conditions **Assumed knowledge:** Incomitant strabismus in a variety of age populations **Assessment:** Practical assessment (50%), ongoing assessment (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons.

The instrumentation techniques for the investigation and management of incomitant strabismus will be taught and practiced in tutorial groups.

### ORTH3056

#### Rehabilitation in Childhood Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathryn Rose **Session:** Semester 2 **Classes:** 3hr lecture/week **Assumed knowledge:** Normal paediatric development, embryology **Assessment:** Online class test (50%), written evaluation (30%), presentation (10%), WebCT contribution (10%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B Hlth Sci, B Hlth Sci, M C V S.

The management of children with permanent visual impairment, learning difficulties and the orthoptist's role in the management of children with developmental delay are studied.

### ORTH3057

#### Orthoptics in Paediatrics Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathryn Rose **Session:** Semester 2 **Classes:** 3hr lecture/week **Assumed knowledge:** ORTH3062 Professional Practice IIIA and ORTH3063 Professional Practice IIIB or ORTH3064 Professional Practice IIIHA and ORTH3065 Professional Practice IIIB **Assessment:** Class presentation (40%), 2hr exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons.

This unit explores testing procedures for the paediatric population with emphasis on their relationship to visual development and vision acuity assessment. Common presenting problems in the paediatric age group resulting in visual disorders are studied. The purpose of vision screening is also reviewed with emphasis on examining current practice and controversies.

### ORTH3058

#### Orthoptics in Neurology Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Mrs Kathryn Thompson **Session:** Semester 2 **Classes:** 3hr lecture, classroom group work/week **Assumed knowledge:** ORTH3062 Professional Practice IIIA, ORTH3063 Professional Practice IIIB or ORTH3064 Professional Practice IIIHA, ORTH3065 Professional Practice IIIB **Assessment:** Class test (30%), 2hr exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons.

This unit of study will consider the principles of neurological investigation including history taking, visual acuity assessment, visual field testing principles (confrontation, Bjerrum, Goldmann, pitfalls of automated perimetry for neurological field defects and colour fields), pupils, colour vision tests, testing of afferent pathways, radiological imaging, electrodiagnostic testing and the efferent testing of non-ocular cranial nerves and states of consciousness. A range of disorders affecting the optic nerve will be studied. Other conditions to be studied include headaches, disorders of the facial nerves and transient visual loss.

### ORTH3059

#### Research Proposal Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Kathryn Rose **Session:** Semester 2 **Classes:** Supervised individual student activity **Assumed knowledge:** Research knowledge and skills introduced by the subject BACH4047 Developing a Research Project **Assessment:** Ethics/literature review (100%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth)Hons.

Through the semester the student will develop their specific research question underpinned by a thorough analysis in the form of a literature review, including appropriate research design, an examination of the implications of the proposed research and the submission of an application for approval to the appropriate University Ethics Committee.

### ORTH3062

#### Professional Practice IIIA Health Sciences

**Credit points:** 10 **Teacher/Coordinator:** Mrs Susan Silveira **Session:** Semester 1 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH2043 Concomitant Strabismus B, ORTH2047 Concomitant Strabismus A, ORTH2054 Professional Practice II, ORTH2057 Instrumentation IIA, ORTH2058 Instrumentation IIB **Assumed knowledge:** ORTH2055 Cataract & Ocular Surface Involvement, ORTH2056 Glaucoma & Ocular Emergencies **Assessment:** Concomitant squint exam (70%), trial concomitant squint investigation (10%), online concomitant case study (20%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), UG Summer/Winter School.

Students will gain clinical experience in the investigation and management of concomitant strabismus. This will include consolidation of theory presented in the program so far. Students will be required to maintain a close liaison with the clinical coordinator and attend case analysis sessions at the School. Students will also carry out a clinical project during this placement.

### ORTH3063

#### Professional Practice IIIB Health Sciences

**Credit points:** 9 **Teacher/Coordinator:** Mrs Susan Silveira **Session:** Semester 1 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH2043 Concomitant Strabismus B, ORTH2047 Concomitant Strabismus A, ORTH2054 Professional Practice II, ORTH2057 Instrumentation IIA, ORTH2058 Instrumentation IIB **Assumed knowledge:** ORTH2055 Cataract & Ocular Surface Involvement, ORTH2056 Glaucoma & Ocular Emergencies **Assessment:** Ophthalmic clinical exam (70%), ophthalmic skills manual (10%), online case study (20%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth).

Students will gain clinical experience in the investigation and management of cataract and glaucoma and other ophthalmic skills. This will include consolidation of theory presented in the program so far. Students will be required to maintain a close liaison with the clinical coordinator and attend case analysis sessions at the School. Students will also carry out a clinical project during this placement.

#### ORTH3064

##### Professional Practice IIIHA Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Mrs Susan Silveira **Session:** Semester 1 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH2054 Professional Practice II, ORTH2057 Instrumentation IIA, ORTH2058 Instrumentation IIB, ORTH2047 Concomitant Strabismus A, ORTH2043 Concomitant Strabismus B **Assumed knowledge:** ORTH2055 Cataract & Ocular Surface Involvement, ORTH2056 Glaucoma & Ocular Emergencies **Assessment:** Concomitant squint exam (70%), trial concomitant squint investigation (10%), online concomitant case study (20%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth)Hons.

Students will gain clinical experience in the investigation and management of concomitant strabismus. This will include consolidation of theory presented in the program so far. Students will be required to maintain a close liaison with the clinical coordinator and attend case analysis sessions at the School. Students will also carry out a clinical project during this placement.

#### ORTH3065

##### Professional Practice IIIHB Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mrs Susan Silveira **Session:** Semester 1 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH2054 Professional Practice II, ORTH2057 Instrumentation IIA, ORTH2058 Instrumentation IIB, ORTH2047 Concomitant Strabismus A, ORTH2043 Concomitant Strabismus B **Assumed knowledge:** ORTH2055 Cataract & Ocular Surface Involvement, ORTH2056 Glaucoma & Ocular Emergencies **Assessment:** Ophthalmic clinical exam (70%), ophthalmic skills manual (10%), online case study (20%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Orth)Hons.

Students will gain clinical experience in the investigation and management of cataract and glaucoma and other ophthalmic skills. This will include consolidation of theory presented in the program so far. Students will be required to maintain a close liaison with the clinical coordinator and attend case analysis sessions at the School. Students will also carry out a clinical project during this placement.

#### ORTH4020

##### Neurological Eye Movement Disorders Health Sciences

**Credit points:** 5 **Teacher/Coordinator:** Assoc Prof Elaine Cornell, Mrs Neryla Jolly **Session:** Semester 1 **Classes:** 3hr lecture/week **Prerequisites:** ORTH3055 Instrumentation III **Assumed knowledge:** Anatomy and physiology of the visual pathway with emphasis on the motor pathway; ORTH3054 Orbital and Restrictive Conditions **Assessment:** Class test (30%), 2hr exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), B App Sc (Orth)Hons.

This unit of study explores the disorders of the cortical, brain stem and infranuclear control of eye movements along with their special assessment procedures and management. On completion of this unit, the student will be able to analyse and select appropriate test procedures and develop management of the complex eye disorders.

#### ORTH4021

##### Orthoptics in Adult Practice Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 3hr lecture/week **Assumed knowledge:** Relevant ocular anatomy and systemic disease processes **Assessment:** Class test (30%), 2hr exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Orth), B App Sc (Orth)Hons.

This unit of study consists of a series of modules which include ageing of body systems and ocular structures; retinal vascular disorders; macular disorders. Complex cases that reflect multifactorial disorders such as patients with glaucoma and cataracts will be used to demonstrate the orthoptist's role in adult practice.

#### ORTH4022

##### Orthoptics in Ophthalmic Practice Health Sciences

**Credit points:** 4 **Session:** Semester 1 **Classes:** 3hr lecture/week **Assessment:** Class test (30%), 2hr exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Orth), B App Sc (Orth)Hons.

Learning in this unit will cover the following key areas: inflammation of the eye; contact lens complications; trauma; surgical asepsis, minor surgical procedures, assisting in surgical procedures; and the orthoptist in ophthalmic practice management. By the end of the unit, the student will be able to identify strongly with the role the orthoptist plays in ophthalmic practice.

#### ORTH4023

##### Professional Studies Health Sciences

**Credit points:** 5 **Teacher/Coordinator:** Mrs Neryla Jolly **Session:** Semester 1 **Classes:** 3hr lecture/week **Assumed knowledge:** All ocular motility/professional units of study **Assessment:** Four case studies (10% ea), oral case analysis (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Orth), B App Sc (Orth)Hons.

In this unit, special issues relating to professional practice are discussed, covering complex case studies, medicolegal issues, ethics and occupational health and safety.

#### ORTH4024

##### Rehabilitation for Vision Impairment Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Elaine Cornell **Session:** Semester 1 **Classes:** 3hr lecture/week **Assumed knowledge:** Relevant ocular anatomy and systemic disease processes **Assessment:** Case study, small group assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day or Distance Education

**Associated degrees:** B App Sc (Orth).

During this unit of study, the nature of the rehabilitation process will be explored in relation to individuals who are visually impaired and those with associated conditions such as motor impairment from stroke. The orthoptist's role beyond the clinical environment will be addressed. By the end of the unit, the student will be able to demonstrate an understanding of the implication of vision impairment on all aspects of an individual's life and show an awareness of appropriate low vision services available in Australia.

#### ORTH4026

##### Clinical Project Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathryn Rose **Session:** Semester 1, Semester 2 **Classes:** Supervised individual student activity **Assumed knowledge:** Principles of research project design **Assessment:** 1500 word written report **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Orth).

This unit of study provides the student with the opportunity to carry out a structured clinical exercise in a professional area.

#### ORTH4027

##### Professional Practice IVHA Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH3064 Professional Practice IIIHA,

ORTH3065 Professional Practice IIIHB, ORTH3054 Orbital and Restrictive Conditions, ORTH3055 Instrumentation III **Assessment:** Written assignments **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (Orth), B App Sc (Orth)Hons.

This unit of study will provide honours students with the opportunity to carry out activities relevant to their area of research, e.g. in the clinical environment.

#### ORTH4028

##### Research Report A Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Orth), B App Sc (Orth)Hons.

This unit will provide the student with the opportunity to begin writing their final research report. Students will attend individual meetings with their supervisor and group research meetings.

#### ORTH4030

##### Research Report B Health Sciences

**Credit points:** 9 **Session:** Semester 2 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Orth), B App Sc (Orth)Hons.

This unit will provide the student with the opportunity to continue writing their final research report. Students will attend individual meetings with their supervisor and group research meetings. The findings from the honours research project will be presented in a research report in a form suitable for submission for publication in a refereed journal.

#### ORTH4035

##### Professional Practice IVA Health Sciences

**Credit points:** 8 **Session:** Semester 1, Semester 2 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH3054 Orbital and Restrictive Conditions, ORTH3055 Instrumentation III, ORTH3062 Professional Practice IIIA, ORTH3063 Professional Practice IIIB, ORTH4020 Neurological Eye Movement Disorders, ORTH4023 Professional Studies **Assessment:** Complex squint exam (70%), online case study (20%), trial exam (10%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth), UG Summer/Winter School.

This unit provides the clinical experiences that consolidate the Year 3, Semester 2 and Year 4, Semester 1 theoretical studies, as well as providing opportunity to integrate all components of the course. Students will gain clinical experience in the investigation and management of complex strabismus.

#### ORTH4036

##### Professional Practice IVB Health Sciences

**Credit points:** 8 **Session:** Semester 1, Semester 2 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH3054 Orbital and Restrictive Conditions, ORTH3055 Instrumentation III, ORTH3062 Professional Practice IIIA, ORTH3063 Professional Practice IIIB, ORTH4020 Neurological Eye Movement Disorders, ORTH4023 Professional Studies **Assessment:** Ophthalmic clinical exam (70%), online case study (20%), supervisors report (10%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth).

This unit provides the clinical experiences that consolidate the Year 3, Semester 2 and Year 4, Semester 1 theoretical studies as well as providing opportunity to integrate all components of the course. Students will gain clinical experience in advanced ophthalmic practice.

#### ORTH4037

##### Professional Practice IVC

#### Health Sciences

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH3054 Orbital and Restrictive Conditions, ORTH3055 Instrumentation III, ORTH3062 Professional Practice IIIA, ORTH3063 Professional Practice IIIB, ORTH4020 Neurological Eye Movement Disorders, ORTH4023 Professional Studies **Assessment:** Online case study (50%), reflection report (50%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Orth), B App Sc (Orth).

This unit provides students with the opportunity to gain clinical experience in an elective area of choice such as refractive surgery, low vision, paediatrics and rehabilitation.

#### ORTH4045

##### Professional Practice IVHBA Health Sciences

**Credit points:** 5 **Session:** Semester 2 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH3064 Professional Practice IIIHA, ORTH3065 Professional Practice IIIHB, ORTH3054 Orbital and Restrictive Conditions, ORTH3055 Instrumentation III, ORTH4027 Professional Practice IVHA, ORTH4020 Neurological Eye Movement Disorders, ORTH4023 Professional Studies **Assessment:** Complex squint exam (70%), online case study (20%), trial exam (10%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (Orth)Hons.

This unit provides the clinical experiences that consolidate the Year 3, Semester 2 and Year 4, Semester 1 theoretical studies as well as providing opportunity to integrate all components of the course. Students will gain clinical experience in the investigation and management of complex strabismus.

#### ORTH4046

##### Professional Practice IVHBB Health Sciences

**Credit points:** 5 **Session:** Semester 2 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH3064 Professional Practice IIIHA, ORTH3065 Professional Practice IIIHB, ORTH3054 Orbital and Restrictive Conditions, ORTH3055 Instrumentation III, ORTH4027 Professional Practice IVHA, ORTH4020 Neurological Eye Movement Disorders, ORTH4023 Professional Studies **Assessment:** Online case study (50%), reflection report (50%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (Orth)Hons.

This unit provides the clinical experiences that consolidate the Year 3, Semester 2 and Year 4, Semester 1 theoretical studies as well as providing opportunity to integrate all components of the course. Students will gain clinical experience in advanced ophthalmic practice.

#### ORTH4047

##### Professional Practice IVHBC Health Sciences

**Credit points:** 5 **Session:** Semester 2 **Classes:** Supervised individual student clinical placement **Prerequisites:** ORTH3064 Professional Practice IIIHA, ORTH3065 Professional Practice IIIHB, ORTH3054 Orbital and Restrictive Conditions, ORTH3055 Instrumentation III, ORTH4027 Professional Practice IVHA, ORTH4020 Neurological Eye Movement Disorders, ORTH4023 Professional Studies **Assessment:** Online case study (50%), reflection report (50%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (Orth)Hons.

This unit provides students with the opportunity to gain clinical experience in an elective area of choice such as refractive surgery, low vision, paediatrics and rehabilitation.

# University undergraduate units of study – P

## PACS2002

### History and Politics of War and Peace

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Wendy Lambourne **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 18 junior credit points, of which 6 must be in either HSTY, GOVT, SCLG or LAWS **Assessment:** tutorial attendance and one oral presentation; one 750 word tutorial exercise; one 3000 word essay; and 1 hour 1000 word in-class exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is taught jointly with the Department of History and can be counted towards a History major.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit will examine the history of the causes of war and the processes and outcomes of peacemaking, with particular emphasis on attempts to limit the frequency and severity of war and the creation of instruments of collective security, notably after the Thirty Years War (Treaty of Westphalia, 1746), the Revolutionary Napoleonic Wars (the Congress of Vienna, 1815), the First World War (the League of Nations, 1919), and the Second World War (the United Nations, 1945).

## PALI1001

### Pali A

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 1 **Classes:** 3 hours per week **Assessment:** Class work and tests (equivalent to 2500 words), 2 hour exam (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

Pali is a major canonical language of Buddhism. The scriptures of the Theravada School of Buddhism, which represent the oldest Buddhist writings preserved in an Indic language, are in Pali as are the commentaries and historical literature of the School. This unit will provide a grounding in the language and enable the student to read simple texts in Pali.

#### Textbooks

Warder, A. K., Introduction to Pali (Pali Text Society, Oxford, 1991)

## PALI1002

### Pali B

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** PALI1001 **Assessment:** Class work and tests (equivalent to 2500 words), 2 hour exam (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of Pali A. By the end of the unit students will have completed Pali grammar and be in a position to read both scriptures and commentaries.

#### Textbooks

Warder, A. K., Introduction to Pali (Pali Text Society, Oxford, 1991)

## PCOL2011

### Pharmacology Fundamentals Medicine

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures per week; tutorials and laboratory sessions. **Prerequisites:** (6 credit points of Junior Chemistry) and (6 credit points of Junior Biology or MBLG (1001 or 1901)). **Prohibitions:** PCOL2001 **Assessment:** One 2 hour exam, in semester quizzes

and reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This unit of study examines four basic areas in Pharmacology: (1) principles of drug action (2) pharmacokinetics and drug metabolism (3) autonomic and endocrine pharmacology, and (4) drug design. The delivery of material involves lectures, practicals, computer-aided learning and problem-based tutorials. Practical classes provide students with the opportunity of acquiring technical experience and teamwork skills. Problem-based tutorials are based on real-life scenarios of drug use in the community. These tutorials require students to integrate information obtained in lectures in order to provide solutions to the problems. Online quizzes accompany each module for self assessment.

## PCOL2012

### Pharmacology: Drugs and People Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr B McParland **Session:** Semester 2 **Classes:** Two 1 hour lectures per week; tutorials and laboratory sessions. **Prerequisites:** (6 credit points of Junior Chemistry) and (6 credit points of Junior Biology or MBLG (1001 or 1901)). **Prohibitions:** PCOL2002, PCOL2003 **Assumed knowledge:** PCOL2011 **Assessment:** One 2 hour exam, in semester quizzes, reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This unit of study examines four important areas of Pharmacology: (1) drug action in the nervous system (2) drug discovery and development (3) pharmacotherapy of inflammation, allergy and gut disorders, and

(4) drugs of recreation, dependence and addiction. The delivery of material involves lectures, practicals, computer-aided learning and problem-based tutorials. Practical classes provide students with the opportunity of acquiring technical experience and teamwork. Problem-based tutorials are based on real-life scenarios of drug use in the community. These tutorials require students to integrate information obtained in lectures in order to provide solutions to the problems. Online quizzes accompany each module.

## PCOL2551

### Pharmacology Exchange Medicine

**Credit points:** 4 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester

2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## PCOL2552

### Pharmacology Exchange Medicine

**Credit points:** 8 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## PCOL2553

### Pharmacology Exchange Medicine

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## PCOL2554

### Pharmacology Exchange Medicine

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## PCOL2555

### Essentials of Pharmacology Medicine

**Credit points:** 6 **Session:** Summer Main **Classes:** On-line lectures and face-to-face tutorial and laboratory classes. **Prohibitions:** PCOL2011, PCOL2012 **Assumed knowledge:** 6cp of Junior Biology, 6 cp of junior Chemistry. **Assessment:** on-line quizzes and a final examination **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

**Associated degrees:** UG Summer/Winter School.

This unit of study introduces students to the principles of drug action and allows them to develop an understanding of the therapeutic applications of drugs based on their underlying pharmacodynamic properties. It covers cardiovascular and renal drugs, chemotherapy, analgesics and anti-inflammatory agents, respiratory and gastro-intestinal drugs, drugs affecting peripheral and central neurotransmission and the principles of chemotherapy.

## PCOL2556

### Pharmacology Exchange

## Medicine

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## PCOL2557

### Pharmacology Exchange Medicine

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## PCOL2605

### Pharmacology for Pharmacy Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Kellie Charles **Session:** Semester 2 **Classes:** 4 lect/wk, 13 hours prac/workshop/tutorial **Prerequisites:** CHEM1611 and CHEM1612 and (BIOL1003 or BIOL1903) and MBLG1001 **Corequisites:** PHSI2601 **Assessment:** 1x2hr exam (70%), continuous assessment (lab reports or assignments) (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

This unit of study provides a basic understanding of drug actions related to physiological and pathological functions. It covers areas of drug-receptor interactions, pharmacodynamics and drug treatment of various physiological systems (e.g. autonomic nervous system, cardiovascular, respiratory and endocrine), management of pain and complementary drug therapy.

*Textbooks*

Rang HP, et al, Pharmacology (6th Ed) Churchill Livingstone, 2007

## PCOL3011

### Toxicology Medicine

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour tutorial/practical per week. **Prerequisites:** PCOL2001 or PCOL2011 and PCOL2012 or 36 credit points from Intermediate BMED units of study. **Prohibitions:** PCOL3001, PCOL3901, PCOL3911 **Assessment:** One 2 hour exam, in class quizzes, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit of study is designed to introduce students with a basic understanding of pharmacology to the discipline of toxicology. The unit considers the toxicology associated with therapeutic drugs (adverse drug reactions) and the associated issue of drug interactions. The pharmacogenetic basis of adverse reactions is also considered. The unit also considers aspects of environmental toxicology, particularly toxic reactions to environmental agents such as asbestos and pesticides. As part of the unit students are introduced to basic ideas about the collection and analysis of data from human populations, both in the structured situation of clinical trials and in analysis of retrospective data.

*Textbooks*

Klaasen, Curtis D. (2001) Casarett and Doull's Toxicology. 6th edition. McGraw Hill.

**PCOL3012****Drug Design and Development  
Medicine**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour tutorial/practical per week. **Prerequisites:** PCOL2001 or PCOL2011 and PCOL2012 or 36 credit points from Intermediate BMED units of study. **Prohibitions:** PCOL3001, PCOL3901, PCOL3912 **Assessment:** One 2 hour exam, in class quizzes, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit of study is designed to introduce students with a basic understanding of pharmacology to the field of medicinal chemistry associated with drug design, development and registration. It covers the main aspects of drug discovery and development by outlining the main considerations, and illustrates these using examples which include COX-2 inhibitors, statins, and viagra. The role of computers in drug design is emphasised by classwork and assignments on molecular modelling and structure-activity relationships. The course also extends to a section on the design of diverse pharmacological agents which include compounds for imaging by positron emission tomography (PET), as well as chemical and biological warfare agents, and riot control agents.

*Textbooks*

Patrick, Graham L. (2005) An Introduction to Medicinal Chemistry. 3rd edition. Oxford University Press.

**PCOL3021****Drug Therapy  
Medicine**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour tutorial/practical per week. **Prerequisites:** PCOL2011 and PCOL2012 or 36 credit points from Intermediate BMED units of study **Prohibitions:** PCOL3002, PCOL3902, PCOL3921 **Assessment:** One 2 hour exam, in class quizzes, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit of study is designed to introduce students with a basic understanding of pharmacology to the theory and practice of drug therapy in the treatment of major disorders such as asthma, cancer and hypertension.

*Textbooks*

Rang, HP. Dale, MM. Ritter, JM and Moore, PK: Pharmacology, 5th ed. Churchill Livingstone. 2003.

**PCOL3022****Neuropharmacology  
Medicine**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour tutorial/practical per week. **Prerequisites:** PCOL2011, PCOL2012 or 36 credit points from Intermediate BMED units of study **Prohibitions:** PCOL3002, PCOL3902, PCOL3922 **Assessment:** One 2 hour exam, in-classes quizzes, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit of study is designed to introduce students with a basic understanding of pharmacology to the theory and practice of neuropharmacology in the treatment of neurological disorders such as Alzheimer's disease, epilepsy, depression, insomnia, pain, schizophrenia and stroke.

*Textbooks*

Rang, HP. Dale, MM. Ritter, JM and Moore, PK: Pharmacology, 5th ed. Churchill Livingstone. 2003.

**PCOL3551****Pharmacology Exchange  
Medicine**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

**PCOL3552****Pharmacology Exchange  
Medicine**

**Credit points:** 12 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

**PCOL3553****Pharmacology Exchange  
Medicine**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

**PCOL3554****Pharmacology Exchange  
Medicine**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

**PCOL3555****Pharmacology Exchange  
Medicine**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

**PCOL3605****Pharmacology 3 (Pharmacy)  
Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr H Lloyd **Session:** Semester 1 **Classes:** Four 1 hour lectures per week for 7 weeks; Three 1 hour lectures per week for 6 weeks, and 18 hours of practicals/tutorials per semester. **Prerequisites:** All first year units; BCHM2613 or (BCHM2611 & BCHM2612); PSPC2601 or (PCOL2603 and PHSI2604); PSPC2602 or (PCOL2604 and PHSI2605). **Assessment:** One 2 hr exam (70 per cent), one 1 hr mid-semester

test (20 per cent), continuous assessment (10 per cent). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This unit of study builds upon the understanding of drug actions related to physiological and pathological functions gained in PSPC2601 and PSPC2602, as well as the therapeutic applications of drugs based on their underlying pharmacology. It covers analgesics and anti-inflammatory agents, respiratory and gastro-intestinal drugs, drugs affecting nutritional and metabolic function, chemotherapy for infectious diseases and cancer, immunosuppressants, drugs of abuse, drugs affecting blood, anaesthetics, hypnotics, sedatives, anticonvulsants, anxiolytics, antidepressants, antipsychotics, drugs used to treat motor disturbances and dementias, and clinical toxicology (adverse drug reactions and drug interactions, drug overdose and poisoning, and development and introduction of new drugs).

### PCOL3911

#### Toxicology (Advanced) Medicine

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour tutorial/practical per week. **Prerequisites:** Distinction average in PCOL2011 and PCOL2012 or Distinction average in 36 credit points from Intermediate BMED units of study. **Prohibitions:** PCOL3001, PCOL3901, PCOL3011 **Assessment:** One 2 hour exam, in class quizzes, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit will consist of the lecture and practical components of PCOL3011. Students will be set special advanced assignments related to the material covered in core areas. These may also involve advanced practical work or detailed investigation of a theoretical problem.

#### Textbooks

Klaasen, Curtis D. (2001) Casarett and Doull's Toxicology. 6th edition. McGraw Hill.

### PCOL3912

#### Drug Design and Development (Adv) Medicine

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour tutorial/practical per week. **Prerequisites:** Distinction average in PCOL2011 and PCOL2012 or Distinction average in 36 credit points from Intermediate BMED units of study. **Prohibitions:** PCOL3001, PCOL3901, PCOL3012 **Assessment:** One 2 hour exam, in class quizzes, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit will consist of the lecture and practical components of PCOL3012. Students will be set special advanced assignments related to the material covered in core areas. These may also involve advanced practical work or detailed investigation of a theoretical problem.

#### Textbooks

Patrick, Graham L. (2005) An Introduction to Medicinal Chemistry. 3rd edition. Oxford University Press.

### PCOL3921

#### Drug Therapy (Advanced) Medicine

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour tutorial/practical per week. **Prerequisites:** Distinction average in PCOL2011 and PCOL2012 or in 36 credit points from Intermediate BMED units of study **Prohibitions:** PCOL3002, PCOL3902, PCOL3021 **Assessment:**

One 2 hour exam, in class quizzes, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as students in PCOL3021 but carry out advanced level elective projects, practicals and tutorials.

#### Textbooks

H.P. Rang, M.M. Dale, J.M. Ritter and P.K. Moore: Pharmacology, 5th edn (Churchill Livingstone, 2003)

### PCOL3922

#### Neuropharmacology (Advanced) Medicine

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour tutorial/practical per week. **Prerequisites:** Distinction average in PCOL2011 and PCOL2012 or in 36 credit points from Intermediate BMED units of study **Prohibitions:** PCOL3002, PCOL3902, PCOL3022 **Assessment:** 2 lectures per week, 3 tutorials/practicals per week **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as PCOL3022 Neuropharmacology but carry out advanced level elective projects, practicals and tutorials.

#### Textbooks

As for PCOL3022

### PCOL4011

#### Pharmacology Honours A Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Hons).

Students enrolled in the Honours program study various advanced aspects of Pharmacology. The program may include lectures, tutorials, seminars and practicals. Students will undertake a research project. Assessment will include the project and may include examinations and classwork.

### PCOL4012

#### Pharmacology Honours B Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** PCOL4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Hons).

See PHAR4011 for information

### PCOL4013

#### Pharmacology Advanced 4A (Pharmacy)

## Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr J Henderson **Session:** Semester 1 **Classes:** Seminar, tutorial/workshop/practical class, project work per week. **Assessment:** Assignments, oral presentations, written reports, exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment. Note: Enrolment is by invitation only.*

**Associated degrees:** B Pharm.

The aim of this unit of study is to develop students' awareness and understanding of the pivotal role of experimental pharmacology in the development of drugs, and to develop their ability to conduct experimental investigations in accordance with established standards of scientific methodology and critical analysis. The experimental pharmacological aspects of the development of selected drug classes is studied by means of enquiry-based learning approaches utilising seminars, workshops, library research and written assignments. Experience in a range of pharmacological experimental techniques is gained in supervised laboratory practical classes by completing a series of experimental pharmacological investigations into the actions of selected classes of drugs whose activity is well established; experience in the practical aspects of experiment design, analysis, interpretation and reporting of pharmacological investigations is also gained. Students will also commence a pharmacology research project to be completed in PCOL4910 Pharmacology Advanced 4B (Pharmacy), by undertaking preliminary laboratory work and preparing a literature review and research proposal for both oral and written presentation.

**Credit points:** 18 **Teacher/Coordinator:** Dr J Henderson **Session:** Semester 2 **Classes:** Seminar, project per week. **Prerequisites:** A credit average in first semester marks, including PCOL4909 **Corequisites:** PHAR4616 **Assessment:** Oral presentation, written dissertation, laboratory placement work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Pharm.

The aim of this unit of study is to develop students' research skills and understanding of how experimental pharmacology influences drug development. Students will conduct experimental investigations in accordance with established standards of scientific methodology and develop their critical analytical thinking and writing. In this unit of study, each student will gain experience in some advanced experimental pharmacological research techniques, through the undertaking of an individual research project under the direct supervision of academic and research staff in the Department, and the preparation of an oral presentation and a written dissertation on the experimental project work. The experimental project work is largely undertaken in Semester 2, during placement in Department research laboratories, following initial preparation in the Semester 1 unit of study, PCOL4909 Pharmacology Advanced 4A (Pharmacy), in which preliminary literature reviews and research proposals were completed.

#### Creative Music Skills

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 3 x 1hr lectures/sem, 1hr tut/wk. **Assessment:** Weekly journal and 600 word report (65%), seminar participation (20%), seminar presentation (15%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

*Note: This is an elective unit of study that may be used to fulfil the core performance requirements of undergraduate courses.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The process of reflection is essential to acquiring an individual critical practice that integrates experiential and conceptual learning in music. The aim of this unit is for students to develop a broader outlook at the beginning of their training as musicians by exploring innovative approaches in performance and communication using improvisation as a tool to understand creative and musical thinking. The following topics will be explored: awareness of performance/audience space, timing in performance, ensemble communication, projecting outwards to the audience as a speaker or performer, coping with stage fright, memory development, listening, response to sound, free and structured improvisation, improvisations that explore musical parameters of dynamics, duration, register, sound envelopes and timbre, and collaborative composition.

Students enrolled in this unit will complete a music performance, research or seminar project. Projects to be undertaken within this unit will be recommended and approved by the relevant Chair of Unit.

**PERF3000****Conducting 1****Sydney Conservatorium of Music**

**Credit points:** 3 **Session:** Semester 1 **Classes:** 1 hr prac workshop/wk  
**Assessment:** Conducting/performance exam (50%), technical test (50%), 15min total duration **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Introduction to basic conducting technique: beating in simple, compound and asymmetric metres; preparatory beats, upbeats, dynamics and changes of tempo. Elementary score reading and instruction in rehearsal techniques. Understanding the difference between orchestral and choral conducting. For further information contact Chair of Conducting Unit.

**PERF3001****Conducting 2****Sydney Conservatorium of Music**

**Credit points:** 3 **Session:** Semester 2 **Classes:** 1 hr prac workshop/wk  
**Prerequisites:** PERF3000 Conducting 1 **Assessment:** Rehearsal exam with the ensemble (50%), performance of two short works (50%), 30min total duration **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Further development of conducting techniques with emphasis on communication of ideas and expressions through gesture. Score preparation. Discussion of rehearsal techniques and practical exercises

with available ensembles. For further information contact Chair of Conducting Unit.

### PERF3002

#### Recital Performance

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Chair of Unit **Session:** Semester 1, Semester 2 **Classes:** 1hour individual lesson and concert practice/wk **Prerequisites:** Principal Study (Major) 5 in instrument or voice **Prohibitions:** Any Principal Study 6 unit of study. **Assessment:** 45 min public recital; plus two 6 min concert practice performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Mus (Mus Ed), B Mus Studies, UG Study Abroad Program.

Recital Performance is taken as an alternative to the relevant Principal Study (Major) 6 for the student's instrument or voice for students who do not plan to progress to Principal Study (Major) 7 and 8. It aims to provide an appropriate performance challenge for students in their last year of Principal Study. A balanced and varied recital program shall be developed in consultation with the individual and must be approved by the Chair of Unit by week 9 of the semester in which the unit of study is taken. Normally music from three distinct styles or eras would be represented. A work by a living composer should also be included, if relevant for the instrument. Please consult the relevant Chair of Unit for further information.

NOTE: Recital Performance does NOT satisfy pre-requisites for Principal Study (Major) 7.

### PERF4000

#### Conducting 3

##### Sydney Conservatorium of Music

**Credit points:** 3 **Session:** Semester 1 **Classes:** 1 hr prac workshop/wk **Prerequisites:** PERF3001 Conducting 2 **Assessment:** Exam: performance of two selected works (80%); viva voce exam (20%); 30min total duration **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

Consolidation of stick and rehearsal techniques with emphasis on gesture and its expression in accordance with the score. Study of styles and interpretation of classical and romantic composers based on scores, recordings and the performance of works in class. For further information contact Chair of Conducting Unit.

### PERF4001

#### Conducting 4

##### Sydney Conservatorium of Music

**Credit points:** 3 **Session:** Semester 2 **Classes:** 1 hr prac workshop/wk **Prerequisites:** PERF4000 Conducting 3 **Assessment:** Exam: performance of two selected works (80%); viva voce exam (20%); 30min total duration **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

Expanding the repertoire through study of works by 19th and 20th century composers. Instructions in conducting opera, ballet and accompanying soloists. Developing skills of conducting and performing contemporary music. For further information contact Chair of Conducting Unit.

### PERF4002

#### Principal Study (Honours) 7

##### Sydney Conservatorium of Music

**Credit points:** 12 **Teacher/Coordinator:** Chair of Unit **Session:** Semester 1, Semester 2 **Classes:** 14 x 1hr one-to-one lessons in the area of Principal Study and up to 5hrs supervision for the Performance Project/sem; 2hrs performance workshop/wk; weekly Honours workshop. **Prerequisites:** JAZZ2624 Jazz Music Skills or MCGY2011 Harm & Analysis 4 or JAZZ2017 Jazz Harm & Arranging 4, MCGY2005 Aural Percept 4 or JAZZ2039 Jazz Ear Training 4, MUED1002 Music Tech, GENS2005 Hist & Cult Studies 2, MCGY3034 Writing

Skills for Music Professions or JAZZ3631 Music Business Skills **Assessment:** Teacher's mark (20%); Performance Project 1 (80% consisting of project 50% and notes 30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students accepted into Honours in Performance enrol in Performance Honours in semester 7 and 8 instead of Principal Study (Major) 7 and 8 or, in the new degree, Principal Study 7 and Principal Study 7 (Advanced).*

**Associated degrees:** B Mus (Perf).

Students must complete requirements for Principal Study 7 in their instrument or voice, and complete Performance Project 1. Normally the Performance Project 1 will display a unified focus on a specialised performance area relating to the candidate's Principal Study in an area such as repertoire, style, performance practice, aesthetic ideology or innovative use of instrumental techniques or technology. The Performance Project must be accompanied by notes which give the aim of the project, background, and critical commentary or analysis. Performance Project 1 may take the form of a recital (40-45 minutes) or lecture recital, a recording or other innovative performance medium. Performance Projects will be developed and workshopped in the Honours Seminar throughout the semester. Performance Project 1 will be assessed according to three broad criteria: exposition of aims and background; originality; musical and technical achievement (as detailed for each instrument in recital assessment).

### PERF4003

#### Principal Study (Honours) 8

##### Sydney Conservatorium of Music

**Credit points:** 12 **Teacher/Coordinator:** Chair of Unit **Session:** Semester 1, Semester 2 **Classes:** 14 x 1hr one-to-one lessons in the area of Principal Study and up to 5hrs supervision for the Performance Project/sem; 2hrs Concert practice/wk; weekly Honours workshop. **Prerequisites:** PERF4002 Principal Study (Honours) 7 **Assessment:** Performance Project 2 (100% consisting of recital 90%; notes 10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Perf).

To progress to Principal Study (Honours) 8, students must obtain a minimum of 65 in Principal Study (Honours) 7, and a minimum of a Pass in all the constituent components of Principal Study (Honours) 7. Students must complete Performance Project 2. Normally Performance Project 2 will be a public recital of 45-50 minutes duration displaying superior performance knowledge and skills. The Performance Project must be accompanied by researched program notes. Performance Project 2 will be assessed according to three broad criteria: appropriate research; creativity; and musical and technical achievement (as detailed for each instrument in recital assessment).

### PERF4601

#### Honours Project 1

##### Sydney Conservatorium of Music

**Credit points:** 12 **Teacher/Coordinator:** Chair of Unit **Session:** Semester 1, Semester 2 **Classes:** 12 one hour individual lessons/small group classes or equivalent as appropriate to project plus weekly honours seminar/workshop **Prerequisites:** 3 year Bachelor of Music Studies degree (or equivalent) in which candidates have obtained a minimum credit average in second and third year units of study and a Distinction average in their Principal Study area. **Assessment:** Preparation for and development of a research-based project (100%) which may consist of a pedagogy-focused project and accompanying dissertation/research essay; a substantial dissertation/research essay and research presentation, a recital and related dissertation/research paper; or a composition project and related dissertation/research paper. Projects and accompanying dissertation/research paper are to be developed in consultation with the Honours Supervisor. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: All students must pass an audition and/or interview and submit a research project proposal to the Undergraduate Studies Committee before November 30 in the year before they wish to enter the Honours program. Students must have completed the B Mus Studies 3 year degree or equivalent or be in their final semester of the three year degree at the time of submitting their proposal. Satisfactory progress in Honours Project 1 is required before students can undertake Honours Project 2.*

**Associated degrees:** B Mus Studies (Hons).

The Honours strand for the B Mus Studies, B Mus Studies/BA and B Mus Studies/MBBS degrees allows students to extend their musical knowledge and skill base within a stand-alone 4th year honours

program. Students enrolled in the Honours Project units are expected to develop and complete research-based projects which may consist of preparation for and development of a pedagogy-focused project and accompanying dissertation/research essay; a substantial dissertation/research essay and research presentation, a recital and related dissertation/research paper; or a composition project and related dissertation/research paper. Projects and accompanying dissertation/research paper are to be developed in consultation with the Honours Supervisor.

### PERF4602

#### Honours Project 2

#### Sydney Conservatorium of Music

**Credit points:** 12 **Teacher/Coordinator:** Chair of Unit **Session:** Semester 1, Semester 2 **Classes:** 12 one hour individual lessons/small group classes or equivalent as appropriate to project plus weekly honours seminar/workshop **Prerequisites:** PERF4601 Honours Project 1 **Assessment:** Completion of a research-based project (100%) which may consist of a pedagogy-focused project and accompanying dissertation/research essay; a substantial dissertation/research essay and research presentation, a recital and related dissertation/research paper; or a composition project and related dissertation/research paper. Projects and accompanying dissertation/research paper are to be developed in consultation with the Honours Supervisor. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Satisfactory completion of Honours Project 1 is required for this unit of study.*

**Associated degrees:** B Mus Studies(Hons).

The Honours strand for the BMus Studies, BMus Studies/BA and BMus Studies/MBBS degrees allows students to extend their musical knowledge and skill base within a stand-alone 4th year honours program. Students enrolled in the Honours Project units are expected to develop and complete research-based projects which may consist of preparation for and development of a pedagogy-focused project and accompanying dissertation/research essay; a substantial dissertation/research essay and research presentation, a recital and related dissertation/research paper; or a composition project and related dissertation/research paper. Projects and accompanying dissertation/research paper are to be developed in consultation with the Honours Supervisor.

### PHAR1616

#### Introductory Pharmaceutical Science Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr L Munoz **Session:** Semester 2 **Classes:** Classes will be arranged as needed **Corequisites:** (PHAR1615 or PHAR1624), CHEM1611 and CHEM1612 **Assumed knowledge:** HSC Chemistry **Assessment:** Theory exam (50%), group assignment (15%), quizzes (20%), poster (15%), and tutorial assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Pharm, B Pharm (Rural).

Introductory Pharmaceutical Science provides an introduction to principles which will be expanded and applied in later years. Topics covered include drugs from plants, pharmaceutical calculations, dosage forms, intermolecular forces in liquids and solids, dissolution and solubility, drugs as acids and bases, partitioning. Small group work in workshop sessions will complement and support the learning of material introduced in lectures.

#### Textbooks

Introductory Pharmaceutical Science Resource Book 2007

#### Social Pharmacy Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr L Smith **Session:** Semester 2 **Classes:** 3 x 1hr lectures/wk, 1 x 2hr workshop/wk. **Corequisites:** PHAR1615 or PHAR1624 **Assessment:** Exam, assignments, presentation and reports **Practical field work:** Externship and teamwork project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Pharm, B Pharm (Rural).

This unit of study consists of 2 major streams, social pharmacy and interprofessional practice. Social pharmacy is designed to provide a

broad perspective of patient health and illness, and encourage a view of the patient as a whole person. Topics include self-regulation, pain, chronic illness and support networks. The emphasis will be on the psychosocial processes that underpin patient behaviour. Interprofessional practice provides an introduction to the working relationships that pharmacists have with other healthcare professionals. Oracy, literacy and teamwork skills are also developed in the context of professional pharmacy issues.

PHAR1617 Social Pharmacy. Prepared by Lorraine Smith for The University of Sydney. McGraw Hill Custom Publishing, Australia Pty Ltd

### PHAR1811

#### Foundations of Pharmacy Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** E Sainsbury **Session:** Semester 1 **Classes:** 3 x lectures/wk, 1 x 2hr workshop/wk, 1 x 2hr workshop/fortnight **Assumed knowledge:** HSC Chemistry **Assessment:** Individual assignments (20%), group reports (30%) and final exam (50%) **Practical field work:** One class will be held in the dispensing laboratory and 4 hours of fieldwork in a community pharmacy are required **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

Foundations of Pharmacy is a broad introduction to the discipline of pharmacy and the roles that pharmacists play in health care as well as the ideas, issues, skills and knowledge base required of a professional pharmacist. A number of topics are introduced but not covered in depth; they will be further developed in subsequent units of study and later years of the degree. Specific skills in research, critical thinking, writing and presenting are developed in the context of activities designed to orient students to their future profession. The intent is that students begin to think and behave as future members of the profession of pharmacy, and reflect upon the attitudes and beliefs that will shape their practice.

### PHAR1812

#### Basic Pharmaceutical Sciences Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr L Munoz **Session:** Semester 1 **Classes:** 4 x lectures/wk, 1 x 2hr tutorial/wk **Corequisites:** PHAR1811, CHEM1611 **Assumed knowledge:** HSC Chemistry **Assessment:** Written exam (50%), group assignments (20%), quizzes (30%) and tutorial assessments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

Basic Pharmaceutical Sciences provides an introduction to principles which will be expanded and applied in later years. Topics covered include: drugs from plants, dosage forms, intermolecular forces in liquids and solids, dissolution and solubility, partitioning and drugs as acids and bases. This unit also includes a mathematical component which is required for other units of study. Small group work in workshop sessions will complement and support the learning of material introduced in lectures.

**Classes:** 3 x lectures/wk, 8 x maths lectures, 5 x 1hr maths tutorials, classes will be arranged as needed **Corequisites:** PHAR1812 **Assumed knowledge:** HSC Chemistry and Mathematics **Assessment:** Exam (70%), minor exam (15%), prac/labs (15%) **Practical field work:** 6 x laboratory sessions **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

This unit of study aims to facilitate an understanding of the physicochemical principles, design, formulation, manufacture and evaluation of pharmaceutical dose forms. The unit starts with an introduction to different dose forms and the importance of route of administration. The formulation of liquid dose forms including parenteral, nasal, ophthalmic and aural products is discussed. Related topics such as diffusion and dissolution of drugs, drug solubilisation, surface and interfacial tension, surface active materials, micelle formation, pharmaceutical complexes and drug-packaging interactions will be covered. Fundamentals of the stability of pharmaceuticals are also presented in this unit. This unit of study also includes mathematical tools required for other units of study.

#### Medicinal Chemistry 2A Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr W Bret Church **Session:** Semester 1  
**Classes:** 3 x lectures/week and tutorials scheduled as required **Prerequisites:** MATH1606 or (MATH1605 and STAT1605); CHEM1611; CHEM1612; either (PHAR1615 or PHAR1624) or (PHAR1613 and PHAR1614); PHAR1616 or PHAR1607 **Corequisites:** BCHM2613 or (BCHM2611 and BCHM2612) **Assessment:** 2.5hr exam (54%), laboratories and workshops (36%), major quiz (10%) **Practical field work:** 3hr workshop/week **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This unit of study aims to relate the physico-chemical properties of drugs to the methods of analysis used in identification of drugs and to the interactions of small molecules (drugs) with biological macromolecules (receptors, enzymes, etc) and cell signalling processes. Students gain experience in a variety of experimental techniques related to drug design and analysis. In addition, students will develop laboratory skills and generic skills including critical thinking and accessing information.

### PHAR2615

#### Microbiology for Pharmacy Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr R Rohanizadeh **Session:** Semester 1  
**Classes:** 2 x lectures/week, workshop classes will be arranged as needed **Prerequisites:** BIOL (1001 or 1101 or 1901 or 1911); either (PHAR1615 or PHAR1624) or (PHAR1613 and PHAR1614); either PHAR1616 or PHAR1607 **Assessment:** Exam & quiz (70%), practicals including workshop (30%) **Practical field work:** Laboratory work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: For repeating students only*

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This unit of study provides information on the biology of micro-organisms with particular reference to the importance of micro-organisms in pharmacy and the pharmaceutical sciences and the application of basic microbiological principles to the production of clean and sterile pharmaceutical products in both community and hospital pharmacy and in industrial manufacture. Topics include the comparison of the structure, function and importance of the major groups of micro-organisms; pathogenicity, epidemiology and growth; principles and methods of sterilisation, aspects of disinfection and disinfectants, preservation and spoilage of pharmaceutical products and an introduction to concepts of good manufacturing practice. The practical component focuses on basic safe and aseptic microbiological technique applicable to pharmacy and the pharmaceutical sciences and is illustrative of the lecture series.

### PHAR2616

#### Physical Pharmaceutics and Formulation A Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr P Young **Session:** Semester 2  
**Classes:** 3 x lectures/week, classes will be arranged as needed **Prerequisites:** MATH1606 or (MATH1605 and STAT1605); CHEM1611; CHEM1612; either (PHAR1615 or PHAR1624) or (PHAR1613 and PHAR1614); PHAR1616 or PHAR1607 **Corequisites:** PHAR2615 **Assessment:** Exam (70%), minor exam (15%), prac/labs (15%) **Practical field work:** 6 x laboratory sessions **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This unit of study aims to facilitate an understanding of the physicochemical principles, design, formulation, manufacture and evaluation of pharmaceutical dose forms. The unit starts with an introduction to different dose forms and the importance of route of administration. The formulation of liquid dose forms including parenteral, nasal, ophthalmic and aural products is discussed. Related topics such as diffusion and dissolution of drugs, drug solubilisation, surface and interfacial tension, surface active materials, micelle formation, pharmaceutical complexes and drug-packaging interactions will be covered. Fundamentals of the stability of pharmaceuticals are also presented in this unit.

#### Pharmacy Practice 2 Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr S Bosnic-Anticevich **Session:** Semester 2  
**Classes:** 3 x lectures/week, tutorials and classes will be scheduled as required **Prerequisites:** Either (PHAR1615 or PHAR1624) or (PHAR1613 and PHAR1614); either PHAR1617 or PHAR1612 **Corequisites:** PSPC2601 or (PCOL2603 and PHSI2604) and PSPC2602 or (PCOL2604 and PHSI2605) **Assessment:** Written exam (40%), oral assessment (35%), and continuous assessment through tutorial participation and contribution (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This course focusses on giving students the knowledge and skills to successfully manage the treatment of patients in the clinical pharmacy setting. It is the first course within the undergraduate B.Pharm curriculum which explores the pathology of diseases and the options for management. It also focusses on methods of delivering patient care that will facilitate improved health outcomes through effective communication. This course is fundamental to clinical pharmacy in all areas of practice. The core areas of respiratory, cardiovascular, endocrinology, infection and primary care are covered in this course.

**Credit points:** 6 **Teacher/Coordinator:** Dr C C Duke **Session:** Semester 2  
**Classes:** 3 x lectures/week, tutorials and workshops **Corequisites:** PSC2602 or PCOL2603 and PCOL2604 and PHAR2609 **Assessment:** 2hr exam (55%), workshops, practical and quizzes (45%) **Practical field work:** 9 hrs practical work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

Drug design; QSAR and molecular modelling; drug metabolism, bioactivation and inactivation; advanced analytical methods for the identification of drugs, their metabolites and degradation products. Introductory toxicology. Workshops consist of the drug design/QSAR computer-based problem-solving workshop, drug action workshop and drug metabolism/toxicology problem based learning workshop. In the drug action workshop, learning is largely given over to the group, which prepares and presents a case study making use of library databases.

**Associated degrees:** B Pharm, UG Study Abroad Program.

This unit of study aims to provide the background to the study of drugs and the important interactions of drugs and their targets. Learning about the molecular bases of such interactions requires discussions of the fundamental macromolecules of life: DNA, RNA and proteins and process as replication, transcription and translation. The course therefore also covers the fundamental mechanisms of the regulation of targets, as well as fundamental molecular interactions important for both detection and diagnostic applications for drugs and metabolites. Metabolism and storage is considered, including metabolic adaptation and disorders of metabolism. Students get experience with a variety of practical techniques to assist learning in the course.

**Credit points:** 6 **Teacher/Coordinator:** Dr R Fois **Session:** Semester 1  
**Classes:** 3 x lectures/wk and 2hr x workshops/wk **Prerequisites:** CHEM1611, CHEM1612, BIOL1003, MBLG1001, PHAR1812, PHAR1822 **Corequisites:** PHSI2601 **Assessment:** Quizzes (summative and formative), workshops (formative), assignments, final examination (summative). All assessments are compulsory. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

This unit of study is intended to provide knowledge in a number of fundamental areas that guide and provide evidence to support the safe, effective and ethical use of medicines. These fundamental areas of knowledge start with an understanding of the relationship between drugs interacting with target sites in the body and the effect produced (i.e. pharmacodynamic principles) and understanding the physiological and physicochemical factors that govern the movement of drugs around the body and the time course of exposure of body tissues and blood to drugs (i.e. pharmacokinetics). These principles involve developing concepts and models to explain drug activity in patients and to guide appropriate drug dosage selection. To support this, relevant mathematical principles involving calculus are introduced during this unit of study.

This unit will also explore reasons behind variability in response to medicines among different individuals. The effects of disease, other drugs, demographics and the genetic basis for variable response will be introduced. Basic pharmacogenetic principles for explaining and predicting pharmacodynamic and pharmacokinetic variability in response will be explored.

Students are also exposed to the notion that medicines may produce adverse effects (as well as beneficial ones). The mechanisms underlying adverse reactions to drugs and how these are classified are explored as are the principles for detecting and avoiding these effects.

Ultimately, many options often exist to manage illness. While the fundamental principles described above assist in understanding how individual drugs should be used, they do not alone provide knowledge to select among alternative options. This unit will introduce students to methods that are used to provide evidence of efficacy and safety of different therapeutic options and to define the place in therapy of these options. To do this, the principles that underpin evidence based medicine (including the clinical trial and pharmacoepidemiology) and the notion of levels of evidence are introduced. Exposure to these principles is intended to develop in students a basic understanding of how to critically evaluate therapeutic options. The evaluation of therapeutic options requires an understanding of statistical methods, which are also introduced during this unit of study.

**PHAR2821****Drug Discovery and Design B****Pharmacy**

**Credit points:** 6 **Teacher/Coordinator:** Dr C C Duke **Session:** Semester 2  
**Classes:** 3 x lectures/wk, tutorials and workshops will be scheduled as required **Corequisites:** PHAR2811 and PCOL2605 **Assessment:** 2hr exam (55%), workshops, practical and quizzes (45%) **Practical field work:** 9 hrs practical

work/workshops **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

Drug design; physicochemical properties of drugs and how this determines the interactions of small molecules (drugs) with biological macromolecules (enzymes and receptors). All stages in the process of drug design and development will be investigated, including computational drug design and the required mathematics for computation and statistical treatment; role of stereochemistry in drug action, structure-activity relationships and molecular modelling; drug metabolism, bioactivation and inactivation; advanced analytical methods for the identification of drugs, their metabolites and degradation products; introductory toxicology, sources of drugs; discovery of new small molecules as leads for drug development. Workshops consist of the drug design/SAR computer-based problem-solving workshop, drug metabolism/toxicology problem-based learning workshop and drug action workshop.

#### Pharmacy Practice Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr S Bosnic-Anticevich **Session:** Semester 2 **Classes:** 3 x lectures/wk, 1.5 hr tutorial/wk **Prerequisites:** PHAR1811 and PHAR1821 **Corequisites:** PHSI2601 and PCOL2605 **Assessment:** Written exam (45%), oral assessment (40%), and continuous assessment through tutorial participation and contribution (15%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

This unit of study is an introduction to Pharmacy Practice. It will integrate previously acquired knowledge in Physiology and Pharmacology with the mechanisms underlying pathological conditions of the cardiovascular, respiratory and endocrine systems, as well as common acute conditions associated with the use of over the counter medications. This unit of study will outline disease processes, treatment and will enable students to gain the knowledge and skills required to manage these conditions utilising effective communication techniques. Different models of health care may be used to demonstrate effective health strategies.

### PHAR2823

#### Formulating and Dispensing Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr P Young **Session:** Semester 2 **Classes:** Lectures and classes will be arranged as required **Prerequisites:** CHEM1611, CHEM1612, PHAR1812, PHAR1822 **Corequisites:** PHAR2812 **Assessment:** Written and practical exam, assignment **Practical field work:** Laboratory work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

This unit of study builds on the material presented in Physical Pharmaceutics. The topics covered in this unit include: solid dose forms and particle science, rheology; dispersion dose forms including suspensions, colloidal dispersions, and emulsions; topical dose forms and semisolids; inhalation pharmaceutical aerosols; protein and peptide drugs and formulations; rectal products; novel drug delivery technologies. Aspects pertaining to the stability of dose forms are also presented in this unit. Practical activities relate to the preparation and dispensing of a range of dosage forms.

### PHAR3602

#### Dispensing

### Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr R Fois **Session:** Semester 2 **Classes:** Periodic lectures throughout semester, weekly 3.5hr workshops **Prerequisites:** A pass in all first year units of study; either PHAR2615 or (MICR2605 and (PHAR2607 or PHAR2627)); either PHAR2616 or (PHAR2613 and (PHAR2614 or PHAR2624)); either PHAR2617 or (PHAR2611 and PHAR2612) **Corequisites:** PHAR3631 **Assessment:** Periodic practical examinations throughout semester (30%), one theory examination (30%), continuous assessment (40%) this may include in-semester assignments, group work and individual work. Satisfactory performance in all areas of this unit of study is required. Compulsory attendance. Consistent adherence to satisfactory standards in laboratory. **Practical field work:** Weekly practical classes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

Introduction to dispensing practice, the importance of accuracy in dispensing, the prescription, approaches to dispensing prescriptions, labelling of dispensed medicines, containers, documentation of dispensing procedures, dispensing of particular formulations, effect of changing formulation variables on the physical properties and efficacy of pharmaceutical products.

A series of practical classes are complemented by workshops. Lectures will provide formative feedback. Students will learn the skills and techniques required to prepare a variety of pharmaceutical products. They will also learn to develop processes in quality assurance and quality control, developing critical skills in minimising errors, maximising the detection of errors and preparing products of consistently high quality.

### PHAR3609

#### Medicinal Chemistry 3A Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr A Ammit **Session:** Semester 1 **Classes:** Lectures each week, tutorial classes will be arranged as needed **Prerequisites:** A pass in all first year units of study; PHAR2609; PHAR2618 or PHAR2610 or PHAR2620 **Assessment:** Mid-term exam (35%), final exam (35%), practical report (30%). **Practical field work:** Laboratory work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This unit of study applies the principles of medicinal chemistry as presented in Medicinal Chemistry 2A and 2B to classes of drugs categorised by their common physiological targets or chemical properties. For each drug class, the chemistry and biochemistry relating to their development, metabolism, toxicology, mode of action and pharmacological application will be examined.

Drug classes examined will include agents acting on the peripheral nervous system including cholinergics, adrenergics and antihistamines; agents acting on the central nervous system including opioids, dopaminergics and serotonergics; agents acting on the cardiovascular system such as antihyperlipidemics, ACE inhibitors and drugs acting on the immune system.

Laboratory work will consist of the preparation of an analytical drug profile for an assigned compound in a format suitable for submission to the TGA. This activity will be undertaken as a group over a period of six weeks.

#### Pharmacy Practice 3A

##### Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr T F Chen **Session:** Semester 1  
**Classes:** 2 x lectures/week, tutorial classes will be arranged as needed  
**Prerequisites:** All first year units of study; PSPC2601 or (PCOL2603 and PHSI2604); PSPC2602 or (PCOL2604 and PHSI2605); PHAR2617 or (PHAR2611 and PHAR2612) **Corequisites:** PCOL3605 or (PCOL3603 and PCOL3604) **Assessment:** Written exam (35%), tutorials (20%), externship (10%), multiple choice question exam (35%) **Practical field work:** 11 x 3hr fieldwork sessions **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

**Therapeutics:** This strand is a continuation of the therapeutics section of Pharmacy Practice 2 (PHAR2617). Topics covered include renal diseases, hepatic diseases, haematology, diseases of the eye and ear, gastrointestinal diseases, rheumatology, and urology. Each of these areas will be covered in terms of epidemiology, pathophysiology, signs and symptoms, and the drug and non-drug management. This unit of study will also explore the role of pharmacists in implementing clinical interventions, medication management review and interprofessional communication.

**Externships:** The externship will integrate lecture and tutorial material with practice. Students will complete patient interviews and report back to tutorials. Problem-solving skills will be enhanced.

**Tutorials:** The tutorials will employ case-based learning techniques. A number of computerised drug information databases will be used. Role-plays will be used to develop students' communication skills in pharmacist/patient and pharmacist/doctor interactions. Familiarisation with drug information software will also take place.

#### Pharmacokinetics and Pharmacogenetics

##### Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr M Bebawy **Session:** Semester 1  
**Classes:** 3 - 5 x lectures/week, 2hr tutorial classes once per fortnight  
**Prerequisites:** All first year units of study; either PHAR2616 or (PHAR2613 and (PHAR2614 or PHAR2624)); either PSPC2601 or (PCOL2603 and PHSI2604); either PSPC2602 or (PCOL2604 and PHSI2605) **Corequisites:** Either PCOL3605 or (PCOL3603 and PCOL3604) **Assessment:** Exam (70%) and quizzes (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This unit of study deals with basic and advanced concepts in pharmacokinetics and pharmacogenetics, followed by the application of these principles to clinical situations. Lecture topics designed for the learning and teaching of basic concepts include: Introduction to pharmacokinetics and pharmacogenetics; Mono-exponential pharmacokinetics; Understanding graphs in pharmacokinetics; Multi-exponential pharmacokinetics; IV infusions; Multiple dosing; Oral dosing; Drug absorption and influencing factors; Drug distribution and protein binding; Renal and hepatic clearance; Metabolite kinetics; Non-linear pharmacokinetics; Bioequivalence and bioavailability; Drug interactions; Pharmacodynamics; Causes and consequences of PK variability and Characterisation of genetic variability and mechanisms responsible for genetic variability. Lecture topics designed for the learning and teaching of advanced concepts include: Factors affecting drug efficacy (drug transporters); Factors affecting drug efficacy (drug metabolism); Factors affecting drug efficacy (drug targets: receptors); Factors affecting drug efficacy (drug targets: signalling pathways). Lecture topics designed for the learning and teaching of applied concepts include: Characterising PK variability and introduction to therapeutic drug monitoring; Therapeutic drug monitoring of various drug classes; Pharmacogenomics in oncology; immunology;

cardiovascular disease; neurology; gastroenterology; respiratory disease, neurodegenerative disease and dermatology; and ethical considerations in pharmacogenomics.

### PHAR4616

#### Pharmacotherapeutics in Practice Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr M Sukkar **Session:** Semester 2 **Classes:** 1 x 2hr lecture/week, 3hrs tutorials/week, 1 x 3hr workshop/fortnight. Classes will be arranged as needed. **Prerequisites:** A pass in all second year units of study. **Corequisites:** PHAR4618 **Assessment:** Tutorial participation (20%), student problem based learning case/problem (20%), written exam (40%) and workshops (20%). Satisfactory performance in all areas of this unit of study is required. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

This unit of study should consolidate previous study units from Year 1 to Semester 1 of Year 4 of the undergraduate curriculum, through the presentation and solving of real-life clinical and ethical problems. It continues a focus on knowledge consolidation, therapeutics, application of knowledge, and medication management review and disease state management within a self-directed learning environment (problem based learning). Lectures will be followed up with tutorials which will be practice-based in order to illustrate specific practice situations. In addition, two ethics workshops and four disease state management workshops will develop student skills in ethical problem solving and delivery of elements of disease state management services for diabetes, asthma, drugs of dependence and heart failure.

### PHAR4618

#### Integrated Pharmacy Practice Pharmacy

**Credit points:** 12 **Teacher/Coordinator:** Dr B Saini & Dr B Chaar **Session:** Semester 1 **Classes:** 1 x 2hr lecture/wk, 2 x 2hr tutorials/week, 2 x 4hr tutorials for orientation and feedback sessions, other classes will be arranged as needed **Prerequisites:** A pass in all second year units of study; PHAR3609 or PHAR3629; PHAR3610; either PHAR3630 or (PHAR3611 and PHAR3612); either PHAR3613 or PHAR3623; PHAR3614 or PHAR3615 or PHAR3624 or PHAR3627; either PCOL3605 or (PCOL3603 and PCOL3604) **Assessment:** Oral presentations - Clinical pathology (10%), PBL tutorial participation (10%),

PBL case presentations (10%), final exam (40%), reflective diaries (10%), medication review cases and portfolios (10%), preceptor assessments (10%). Satisfactory performance in all areas of this unit of study is required. **Practical field work:** 10 x 5hr clinical placement fieldwork **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This unit of study focuses on knowledge consolidation, therapeutics, application of knowledge, medication management review and disease state management within a self-directed learning environment (problem based learning) and supplemented by clinical placements. Lectures will be followed up with tutorials which will be practice-based in order to illustrate specific practice situations. In addition, PBL tutorials will provide the opportunity for further development of students' skills in information gathering, assessment and communication skills. The therapeutic topics to be covered in this unit include cardiovascular, infectious diseases and primary care. The unit of study will expand the role of the pharmacist in monitoring therapeutic outcomes, and in participating in therapeutic decision-making. The principles and practice of clinical chemistry as it is applied to the diagnosis, screening and monitoring of physiological processes in health and disease will be covered, as will the measurement of specific analyses. The clinical interpretation of the results of clinical chemistry investigations in diagnosis, screening and monitoring will also be discussed.

### PHAR4619

#### Drug Development & New Drug Technologies Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr T Grewal **Session:** Semester 1 **Classes:** 1 x 2hr lecture/wk, 1 x 2hr workshop/wk. Classes will be arranged as needed **Prerequisites:** A pass in all Second Year units of study; either PHAR3630 or (PHAR3611 and PHAR3612); either PHAR3631 or (PHAR3607, PHAR3608, PHAR2616 or PHAR2613 and (PHAR2614 or PHAR2624)); PHAR3609 or PHAR3629; PHAR3610 or PHAR3620; either PCOL3605 or (PCOL3603 and PCOL3604). **Assessment:** Final exam (40%), assignment (25%), workshops (35%). All assessments must be passed to satisfy requirements of the course. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

This unit of study consists of two streams: (1) Pharmaceutical Biotechnology stream (lectures) and (2) Design of Biological Drugs stream (workshops). Stream 1 aims to expose students to developing biotechnologies relevant to pharmacy. The course materials will be covered by a series of lectures given by the faculty and specialised lectures/tutorials presented by invited scientific professionals. Stream 2 consists of a series of workshops that focus on the areas involved in protein drug development: native protein purification; gene cloning; cloned gene expression; recombinant protein isolation; recombinant protein dosage form design; preclinical and clinical testing. This unit of study expands on second and third year pharmaceutical science units of study by exposing you to drug development and developing biotechnologies, such as gene therapy, vaccines, DNA arrays, new drug targets and drugs/therapies as well as clinical trials. This unit of study will introduce you to developing biotechnologies, new drug

targets and therapies enabling you to be aware of up and coming biotechnologies and how they will impact on pharmaceutical care. Such knowledge will help you decide your future career direction and give you understanding of practical problems encountered in design and use of biotechnology derived drugs. In addition, this unit of study promotes integration and application of prior knowledge in pharmaceutical science to solving problems in tasks encountered in pharmaceutical research and development as well as allowing students to develop knowledge related to biotechnology derived drugs and skills in obtaining and critically assessing peer-reviewed publications. It also allows students to obtain people skills by participating in group work, resolve conflict management and obtain written and oral communication skills.

### PHAR4620

#### Integrated Dispensing Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** E Sainsbury and Dr P Aslani **Session:** Semester 1 **Classes:** 1 x 2hr lecture and 1 x 2hr workshop/week **Prerequisites:** A pass in all second year units of study; either PHAR3601 or PHAR3602; either PHAR3613 or PHAR3623; either PHAR3614 or PHAR3615 or PHAR3624 or PHAR3627. **Assessment:** Demonstrate adequate performance in practical exams (30%), continuous assessment (30%), written exam (30%) and portfolio presentation (10%) **Practical field work:** 1 x 2hr practical/week **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, B Pharm (Rural), UG Study Abroad Program.

Integrated Dispensing links together the skills and knowledge that students have developed in Dispensing and Pharmacy Practice. The emphasis is on clinical practice and develops the theme that dispensing is not a single event but draws on skills and knowledge from a variety of areas of pharmacy practice, including communication with the patient and prescriber. This is achieved using a simulated practice environment. Students learn to integrate the training they have received in dose form preparation with patient counselling skills, forensic and administrative requirements (including the use of computer-based dispensing programs), as well as the professional aspects of pharmacy to allow them to become competent dispensers of medicines.

#### Textbooks

Australian Medicines Handbook (2008 or 2009) Australian Pharmaceutical Formulary (latest edition) Pharmacy and Poisons legislation is required but is made available in a specific format for the unit

### PHAR4621

#### Clinical Practice Pharmacy

**Credit points:** 12 **Teacher/Coordinator:** Dr L Pont **Session:** Semester 2 **Classes:** On-campus workshops **Prerequisites:** A pass in all second year units of study. **Corequisites:** PHAR4618 **Assessment:** Preceptor assessment (20%), reflective diaries (5%), oral presentation (5%), portfolio tasks (10%), medication management reviews (20%) and written exam (40%). Satisfactory performance in all areas of this unit of study is required. **Practical field work:** Clinical placement and online learning **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

This is an experiential unit of study which allows students to integrate their knowledge and skill-base within a variety of professional placements. Sites may include community and hospital pharmacies as well as professional organisations. In the clinical setting, students gain an awareness of the role of the pharmacist and the interaction between patient, pharmacist and other health professionals. In the non-clinical setting, the focus is on provision of healthcare services within Australia. Students complete a series of placements over a 10-week period. An optional 2-week July block placement may also be undertaken. Students not participating in the optional placement undertake an additional 10-week placement during semester 2.

Additionally students will participate in campus-based workshops that provide a forum for discussion of the various issues experienced during clinical placement.

### PHAR4622

#### Pharmacy Management Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Professor L White **Session:** Semester 2 **Classes:** 1 x 2hr lecture/wk and 1 x 2hr tutorial/wk. Classes will be arranged as required. Self directed/experiential learning required - 1.5 hrs/wk **Prerequisites:** A pass in all second year units of study. **Assessment:** Final exam (40%), mid-semester exam (30%), group assignment (part A) (10%) and group assignment (part B) (20%). Both exams must be passed to satisfy the requirements of the course. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm, UG Study Abroad Program.

This course will introduce management issues that are crucial for understanding pharmacy business operations. It includes finance and accounting, human resources and marketing topics.

### PHAR4650

#### Health and Cultural Issues in Rural Aust Pharmacy

**Credit points:** 6 **Session:** Semester 1 **Classes:** Classes will be arranged as needed. **Prerequisites:** A pass in all second year units of study; either PHAR3613 or PHAR3623, PHAR3625 or PHAR3623. **Prohibitions:** PHAR2626 **Assessment:** Classwork (20%), exam (50%), externship report (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm (Rural).

This unit of study aims to introduce students to the health issues in rural and remote communities which may result from the social, environmental and political underpinnings of those communities. Students will be made aware of diseases which are more prevalent than in the metropolitan setting. Issues relating to cultural diversity and indigenous health in rural and remote areas will be explored and different modes of communication and service delivery will be investigated. The externship will include visits to Aboriginal communities and health settings.

### PHAR4651

#### Clinical Practice (Rural) Pharmacy

**Credit points:** 12 **Session:** Semester 2 **Classes:** Classes will be arranged as needed. **Prerequisites:** A pass in all second year units of study. **Corequisites:** PHAR4618, PHAR4652, PHAR4653. **Assessment:** Preceptor assessment (15%), reflective diary (15%), submission of cases 1-6 (20%), oral presentation (10%) and exam (40%). Students must pass each component to pass the unit of study. **Practical field work:** Clinical placement fieldwork. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm (Rural).

This unit of study requires students to follow the progress of patients by extracting and organising information from patient medication histories and interviews. Literature information relevant to the case will be sought in an attempt to review and propose therapeutic options for management. Aspects of communication, verbal presentation and an ability to discuss the case critically will be developed. Each case study will cover the drugs under review, the disease state, past medical and pharmaceutical history, social and demographic parameters. The students' decision-making ability will be developed. The appropriateness of therapeutic plans will be reviewed.

## PHAR4652

### Pharmacotherapeutics in Rural Practice

#### Pharmacy

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1-2hr lecture/week, 4hr workshop/week. Classes will be arranged as needed. **Prerequisites:** A pass in all second year units of study. **Corequisites:** PHAR4618, PHAR4651 and PHAR4653 (or PHAR4955) **Assessment:** Exam (40%), write up of case studies (20%), student developed PBL case/problem (20%) and tutorial participation (20%). Satisfactory performance in all areas of this unit of study is required. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm (Rural).

This unit of study continues on from Integrated Pharmacy Practice. Therapeutics lectures will be followed up with tutorials which will be practice-based in order to illustrate specific practice situations. Therapeutics topics will be covered in great detail in order to understand how drugs affect different populations, how drugs are used in different situations and how specific drugs are chosen and the dosage regimen which is appropriate for that disease and individual patient. In addition, the ability to communicate such information in an appropriate manner will be discussed. The unit will expand the role of the pharmacist in monitoring therapeutic outcomes and participation in therapeutic decision-making and will enable students to assess and develop an individualised disease state management plan for a patient, effectively counsel and educate patients about medicines and disease state management, use and interpret the output of disease monitoring tools. Furthermore, students will become familiar with the professional code of ethics of pharmacy through case studies and be able to explain the ethical principles underpinning the code.

*Textbooks*

AMH, Therapeutic Guidelines.

## PHAR4653

### Integrated Rural and Remote Health Care

#### Pharmacy

**Credit points:** 6 **Session:** Semester 2 **Classes:** Classes will be arranged as needed. **Prerequisites:** A pass in all second year units of study. **Corequisites:** PHAR4651 and PHAR4652 **Assessment:** IPL workshops (20%), portfolio (20%), oral and written case presentation (20%), exam (40%) **Practical field work:** 5hrs/week **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Pharm (Rural).

This unit of study is undertaken in a rural setting, and aims for students to experience how other current and future health care practitioners operate in a rural or remote setting and to explore potential avenues for future co-operation and collaboration between such practitioners. Interdisciplinary tutorials will be held with other health care students at University Departments of Rural Health and visits will be organised to practice sites. Health promotion activities will be undertaken in the community.

## PHAR4927

### Pharmaceutics Advanced 4A

#### Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr F Zhou **Session:** Semester 1 **Classes:** Seminar, tut/workshop, project/wk. **Assessment:** Oral presentations (30%), seminars and postgraduate presentations (10%), literature review (60%), workshop attendance/contributions, project/report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment. Note: Enrolment is by invitation only.*

**Associated degrees:** B Pharm.

This unit of study is designed to extend the Pharmacy undergraduate's knowledge and skills in research methodology, problem solving and written and oral scientific communication in specialist areas of Pharmaceutics. It provides an important basis in advanced coursework and laboratory research for those who wish to become candidates for the PhD, MSc and MPhil degrees. Advanced students will also retain

essentially all of the professionally based training of the Pass degree and complete in the same time.

## PHAR4928

### Pharmaceutical Chemistry Advanced 4A

#### Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Dr C C Duke **Session:** Semester 1 **Classes:** Seminar, tut/workshop, project/wk **Assessment:** Assignments (5%), oral presentations (45%), written reports (35%), seminar attendance (15%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment is by invitation only.*

**Associated degrees:** B Pharm.

Pharmaceutical Chemistry Advanced 4A is designed to extend the Pharmacy undergraduate's knowledge and skills in research practice and problem solving, and written and oral scientific communication. It provides an important basis for those who wish to become candidates for the PhD, MSc and MPhil degrees. In addition, the unit of study provides extra training in specialised areas and will be particularly useful for those seeking employment in industrial, government and hospital laboratories. Advanced students will also retain essentially all of the professionally based training of the pass degree and complete in the same time.

## PHAR4929

### Pharmacy Practice Advanced 4A

#### Pharmacy

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof I Krass **Session:** Semester 1 **Classes:** Seminar, tut/workshop/wk **Assessment:** Seminar attendance (10%), research diary (30%), literature essay (10%), literature review (30%), assignment (10%), presentation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment is by invitation only.*

**Associated degrees:** B Pharm.

Weekly discussion between students, their supervisors and other pharmacy practice personnel will take place in order to evaluate and formulate possible methodologies for research projects. Students will provide short oral presentations for open discussion with other staff and postgraduate students. Research projects in areas of Pharmacy Practice such as Pharmacoeconomics, Pharmacoepidemiology, Professional Practice, Geriatric Patients, Asthma Management and Clinical Practice will be offered. Advanced students will also retain essentially all of the professionally based training of the Pass degree and complete in the same time.

#### PHCR2101

##### Professional Development 2A Medicine

**Credit points:** 3 **Teacher/Coordinator:** Mr Paul Bennett **Session:** Semester 1 **Classes:** Block/Intensive Mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Active involvement in Learning block activities and completion of your professional journal. (20%), Completion of activities 1 - 8 in workbook. Note activity 7 is worth 10% (30%), Demonstration of cross-cultural learning principles in workplace health education and health promotion activities (10%), Active participation in computer workshop (10%), Completion of two computer assignments during workshop in Blocks 2 and 3 (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

In this unit of study students continue to develop skills and knowledge relevant to their roles and responsibilities as primary health care workers by focusing on issues of literacy and language. It looks at how people learn in different cultural settings and how the health worker is able to use this knowledge for both personal development and in developing community health education/promotion strategies. The impact of language on daily life, both personally and professionally, is examined, including the role of the health worker as an interpreter / translator. Practical skills relating to basic computing continue to be developed.

#### PHCR2102

##### Community Health 4 Medicine

**Credit points:** 6 **Teacher/Coordinator:** Ms Elizabeth Martin **Session:** Semester 1 **Classes:** Block Intensive Mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Active involvement in block activities (10%), Involvement in and development of clinical skills in counselling and mental health care in the community (25%), PART 1 of Workbook (activities related to mental health and illness but not directly to module activities). (25%), Activities 1-6 but not including Activity 2 (15%), Completion of Activity 2 (10%), Completion of Activity 7 (15%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study is designed to assist students understand those factors in daily life that can affect the mental health of community members and to develop skills that will help them be effective community health workers. It begins by providing the theory for developing culturally appropriate counselling skills to deal with individual or family crises; to recognise those situations where their skills can meet presenting needs, when referral is required and what options are available for referral. The clinical skill of mental health assessment is also consolidated. The student also looks at cross-cultural concepts of mental health, factors affecting mental development, care of mental illness in the community, with particular emphasis on the needs of Indigenous Australians and those living in rural/remote areas.

#### PHCR2103

##### Community Health 5A Medicine

**Credit points:** 3 **Teacher/Coordinator:** Mr Tony Kickett **Session:** Semester 1 **Classes:** Block Intensive mode 5 days 9am - 5pm 3 blocks per semester **Assessment:** Active involvement in block activities (10%), Development of clinical skills in nutritional assessment, including routine care of children less than 5 years (10%), Completion of Module 1 activities (1 to 4 and 6) in workbook (20%), Demonstrate competency in handling, preparing and storing food safely in the home environment, and the presentation of a talk (Module 1 activity 5) (10%), Development and presentation of a nutritional education program in your community (Module 2 activity 8) (10%), Completion of Module 2 activities (7 - 11, excluding 8) (20%), Completion of a nutritional assessment of 1-5 year olds in your community (Module 2 activity 12)(10%), Nutritional assessment examination based on a series of studies on nutrition in Aboriginal communities (Module 2 activity 13) (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study is designed to assist students understand how what we eat affects our health. Topics covered include the basics of good nutrition, nutrition in traditional and changing societies, the nutritional needs of special groups, safe food handling, and nutrition and disease. Children are particularly vulnerable to the effects of poor nutrition and the student is encouraged to develop skills in identifying children who are not growing as they should and to carry out culturally appropriate nutrition education and promotion activities.

### PHCR2104 Community Health 6 Medicine

**Credit points:** 6 **Teacher/Coordinator:** Mr Chris Ballantyne **Session:** Semester 1 **Classes:** Block Intensive Mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Completion of module 1 activities in Workbook (activities 1 - 15) (40%), Completion of outbreak exercise in Module 2 (15%), Completion of Module 3 activities in Workbook, (activities 16 - 22) (20%), Prepare and present a talk to adolescents (activity 23, which includes both written work and presentation) (20%), Block participation (5%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study is designed to assist the student understand communicable disease transmission, prevention and control, and their roles and responsibilities as a health worker. The impact communicable disease has had on populations in the past and currently, what it means to be 'at risk', the law and communicable diseases and diseases of public health importance (STIs, HIV, Hepatitis B and C and TB in particular) are examined. The student will use knowledge gained in the previous semester to develop and participate in health promotion projects focusing on sexual health programs in their community.

### PHCR2105 Population Health 1A Medicine

**Credit points:** 3 **Teacher/Coordinator:** Ms Lindy Hunt **Session:** Semester 1 **Classes:** Block Intensive mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Active involvement in block activities (10%), Development of clinical skills in delivering routine antenatal care. This grade will be given following consultation with Registered Nurses in the workplace. Involvement in providing antenatal care and health education and health promotion relevant to pregnancy and pre-pregnancy health will be assessed. (20%), Completion of activities 1- 8 (20%), Development and presentation of a health education program suitable for the parents-to-be in your community (Activity 9). (20%), One hour oral examination on antenatal care, focusing on the antenatal card and presented scenarios (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study is designed to assist the student understand the reasons for giving care during the antenatal period and to develop the skills for supporting the provision of antenatal care in the community. The potential impact on a baby of health related behaviours of the parents prior to conception and in early pregnancy are considered. Preparing the mother for successful breastfeeding is emphasised.

### PHCR2107 Professional Development 2B Medicine

**Credit points:** 3 **Teacher/Coordinator:** Mr Paul Bennett **Session:** Semester 2 **Classes:** Block Intensive mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Active involvement in non-computer block activities (10%), Presentation in Block 11 (20%), Activities related to workforce skills, including maintaining Professional Diary. (20%), Active participation in computer workshop (20%) Completion of one major computer assessment (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

In this unit of study students continue to develop skills and knowledge relevant to their roles and responsibilities as primary health care workers. There is increasing emphasis on computer skills, presentation skills and preparing themselves for the workforce (managing meetings, interviews, CV writing etc.).

#### Textbooks

Microsoft Excel 2000 and Word 2000 Level 3, Watsonia Software Pty Ltd Melbourne

### PHCR2108 Community Development 3 Medicine

**Credit points:** 6 **Teacher/Coordinator:** Mr Chris Ballantyne **Session:** Semester 2 **Classes:** Block Intensive Mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Completion of activities (1-3) relating to module 1: collecting and presenting health information (50%), Completion of activities (4-6) relating to community assessment and planning community development (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study is designed to assist the student enhance their understanding of community development and the process of planning community development. Firstly, the importance of appropriate and accurate health information to support community diagnosis, health planning, and for evaluating the effect of health interventions is addressed. The student then develops the knowledge and skills gained to look at their community profile, undertake a basic situational analysis of their community and begin the process of planning a community development project.

### PHCR2109 Community Health 5B Medicine

**Credit points:** 3 **Teacher/Coordinator:** Ms Deb Jones **Session:** Semester 2 **Classes:** Block Intensive mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Active involvement in block activities (10%), Activities 1-2 (short answer activities on heart disease) (5%), Activity 3: part 1 practical assessment of skills developed using brief interventions for behaviour change with individuals: Part 2: Written summary on the PHC worker's role in tertiary interventions for cardio vascular disease in your community (20%), Activities 4-6 (Shorter answer activities on renal disease) (10%), Activity 7: Literature search and essay (to focus on heart disease OR renal disease) (25%), Activity 8: Complete a critical analysis of two articles on renal and heart conditions in Aboriginal populations; (10%), Activity 9 develop health promotion objectives and strategies relevant for a health promotion program targeting heart disease or renal disease (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study continues the focus on lifestyle and disease. Poor food choices often occur in association with other adverse lifestyle choices (lack of exercise and substance misuse for example), which can result in chronic disease later in life. Both diabetes and heart disease are good examples of current common lifestyle diseases. In a previous unit students focused on diabetes as a lifestyle disease with implications for the individual and the community. In this unit the major focus is on the major cause of mortality and morbidity in Australia today - cardiovascular disease.

There is also a focus on renal disease, which can have a devastating effect on both the individual and the family. There are higher levels of diabetes, hypertension and kidney infection following streptococcal skin infections in some Aboriginal populations and these contribute to the higher rates of renal disease experienced in these populations. Such renal disease can lead to kidney failure later in life if not detected early and appropriately managed. Students are encouraged to develop skills in carrying out culturally appropriate nutrition and lifestyle education and promotion and screening activities that target these chronic diseases.

### PHCR2110 Population Health 1B Medicine

**Credit points:** 3 **Teacher/Coordinator:** Ms Lindy Hunt **Session:** Semester 2 **Classes:** Block Intensive mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Participation in Block activities (10%), Examination on Module 1: Part 1 (Labour) in Block 5. Short answer and multiple choice questions (minimum 30 minutes). (20%), Activity 1: Prepare and deliver a parenting session on a selected aspect of post-natal care (15%), Activity 2: Post -natal case study (15%), Activities 3 - 13 in Module 2: Contraception (20%), Activity 14: Prepare and deliver a talk on contraception to a small group. (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study is designed to assist a student understand the reasons for giving care during delivery and the post-natal period and to develop the skills for supporting the provision of postnatal care in

the community. The issue of family spacing as it affects mother and baby are also included.

### PHCR2111 Population Health 3 Medicine

**Credit points:** 6 **Teacher/Coordinator:** Ms Lindy Hunt, Mr Tony Kickett and Mr Jason Gowin **Session:** Semester 2 **Classes:** Block Intensive mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Active involvement in block activities (10%), Completion of activities 1 - 12 (Women's Health) OR Completion of activities 1 - 24 (Men's Health) (65%), Activities 1-8 in Module 3 (Prison Health) (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study is designed to assist the student understand issues that affect women's and men's health and develop competency in designated skills related to targeting men's and women's health. The differences between gender roles in traditional and contemporary society will be considered and there is an emphasis on health maintenance and routine screening activities related to specific programs. Topical issues are also examined, including parenting, institutionalisation, dealing with anger, stress and grief, rural health and safety, violence and traditional food patterns (bush tucker). Students are encouraged to participate in activities that support women's or men's health programs. This unit of study is sensitive to local cultural values: this usually means that female students will do the activities and assignments associated with women's health and male students will do the activities and assignments associated with men's health but that all students are familiar with the information on both genders.

### PHCR2112 Clinical Skills 2B Medicine

**Credit points:** 3 **Teacher/Coordinator:** Ms Lindy Hunt **Session:** Semester 2 **Classes:** Block Intensive mode 5 days 9am to 5pm 3 blocks per semester **Assessment:** Participation in Block activities (10%), Completion of activities 1-4 in the workbook (10%), Advanced First Aid examination and competency assessment (80%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Associated degrees:** Dip Indig Prim H C.

This unit of study is designed to assist the student further develop their knowledge and skills to provide more comprehensive First Aid and emergency care in their community. Principles of disaster planning and triage are introduced, basic life support in emergency situations is reviewed and advanced first aid care for given emergencies is provided with emphasis on personal safety, on preventing such accidents and potential dangers for each (what not to do).

### PHIL1011 Reality, Ethics and Beauty Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Besch **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prohibitions:** PHIL1003, PHIL1004, PHIL1006, PHIL1008 **Assessment:** tutorial participation, one 2000 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

This unit is an introduction to central issues in metaphysics, ethics and aesthetics. It opens with general questions about reality, God, personal identity and free will. The middle section of the unit will consider questions about values, goodness and responsibility. The final part is concerned with the question "what is art", the nature of aesthetic judgment and the role of art in our lives.

*Textbooks*

Readings will be available from the University Copy Centre.

### PHIL1012 Introductory Logic

### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nicholas Smith **Session:** Semester 2, Summer Late **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Assessment:** two assignments and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

An introduction to modern logic: the investigation of the laws of truth. One essential aspect of good reasoning or argumentation is that it is valid: it cannot lead from true premisses to a false conclusion. In this course we learn how to identify and construct valid arguments, using techniques such as truth tables, models and truth trees. Apart from being a great aid to clear thinking about any subject, knowledge of logic is essential for understanding many areas not only of contemporary philosophy, but also linguistics, mathematics and computing.

*Textbooks*

Garle, R. Introduction to Logic. Prentice Hall 2008.

### PHIL1013 Society, Knowledge and Self Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Besch **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prohibitions:** PHIL1010 **Assessment:** tutorial participation, one 2000 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

This unit is an introduction to central issues in political philosophy, theories of knowledge and philosophical conceptions of the self. The first part will consider the state, freedom and political obligation. The second part will examine some of the major theories of knowledge in the modern philosophical tradition. The final section will look at conceptions of the self as a knowing and acting subject.

*Textbooks*

Readings will be available from the Copy Centre

### PHIL1016 Mind and Morality HSC Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Luke Russell, Dr Michael McDermott **Session:** S1 Late Int, S2 Late Int, Summer Main **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is available to HSC students only*

**Associated degrees:** Arts UG Non-Degree, UG Summer/Winter School.

If a robot told you that it was in pain, would you believe it? If it is wrong to kill animals, should we try to stop animals from killing each other? How do you know what the colour red looks like to your friends? What do these philosophical puzzles reveal about ourselves, our minds, and our responsibilities towards others? This one-unit HSC course focuses on contemporary disputes regarding the nature of the mind, personal identity and ethics. As you engage with these issues, you will be introduced to the philosophical theories that underpin our notion of ourselves and our place in the world, and you will improve your ability to analyse and present complex ideas and arguments.

### PHIL1801 Philosophy Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

### PHIL2600 Twentieth Century Philosophy Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael McDermott **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Prohibitions:** PHIL2000 **Assessment:** tutorial participation, one 2500 word essay, one 2 hour exam

**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

Main developments in philosophical thought in the twentieth century. Topics include: logical atomism; logical positivism and its attack on metaphysics; conceptual analysis; Quine, holism, behaviourism, and the overthrow of positivism; the resurgence of metaphysics; functionalism in the philosophy of mind; modal realism. Essential background for understanding how philosophy is done today in English-speaking countries.

Ayer A.J. *Language, Truth and Logic*. London. Penguin 2001  
Readings will be available from the University Copy Centre.

### PHIL2605

#### Locke and Empiricism

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Anik Waldow **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Prohibitions:** PHIL3005, PHIL2005 **Assessment:** one 1000 word tutorial exercise, one 500 word essay plan, one 2500-3000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

In this unit we will study some of the major philosophical works of the Classical British Empiricists, John Locke (1632-1704), George Berkeley (1685-1753), and David Hume (1711-1776). We shall focus attention on their theoretical philosophy, considering epistemological topics such as the nature, limits and justification of human knowledge; and metaphysical topics such as substance, causation, the primary-secondary quality distinction and personal identity. The unit will also consider the contemporary relevance of these thinkers.

#### Textbooks

John Locke, *An Essay Concerning Human Understanding*, ed. Nidditch. (OUP)  
George Berkeley, *The Principles of Human Knowledge* (Hackett)  
--- *Three Dialogues between Hylas & Philonous* (Hackett)  
David Hume, *A Treatise of Human Nature* (2nd ed.) eds. Selby-Bigge & Nidditch (OUP)

### PHIL2610

#### Exploring Nonclassical Logic

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nicholas Smith **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial **Prerequisites:** 6 Junior credit points in Philosophy AND one of the following: PHIL1012 Introductory Logic OR PHIL2628 Elementary Logic OR MATH1004 OR MATH1904 **Prohibitions:** PHIL3214 **Assessment:** two assignments, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

Classical logic is what you study in introductory units such as PHIL1012, PHIL2628 or MATH1004. This unit covers major extensions of and alternatives to classical logic, such as temporal, modal, intuitionist, relevance, and many-valued logics. As well as looking at the internal workings of these logics, we examine some of their applications, and the philosophical issues surrounding them.

### PHIL2615

#### Intermediate Logic

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael McDermott **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy and PHIL1012 or PHIL2203 or PHIL2628. **Prohibitions:** PHIL2215, PHIL3215 **Assessment:** exam and weekly exercises **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

The axiomatic approach to classical logic. The focus is on proofs of the main metalogical results - consistency completeness, etc - for the propositional and predicate calculi.

### PHIL2617

#### Practical Ethics

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael McDermott **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points in Philosophy. **Prohibitions:** PHIL2517 **Assessment:** one 2000 word essay and one 2500 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit draws on contemporary moral philosophy to shed light on some of the most pressing practical, ethical questions of our time, including euthanasia, abortion, surrogacy, censorship, animal rights, genetic testing and cloning and environmental ethics. By the end of the unit, students should have a good understanding of these practical ethical issues; and, more crucially, be equipped with the conceptual resources to think through new ethical questions and dilemmas as they arise in their personal and professional lives.

#### Textbooks

Readings will be available from the University Copy Centre.

### PHIL2618

#### Aesthetics and Art

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr David Macarthur **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy. **Prohibitions:** PHIL2518 **Assessment:** one 2500 word essay and one 2000 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

Why is art important? What is an aesthetic response? Is there such a thing as objective interpretation? Or is it all a matter of taste? Should we believe in "the death of the author"? What is the relation between aesthetic criticism and philosophy? We shall discuss these and other questions from the perspective of an historical approach to the philosophical study of aesthetics and art.

#### Textbooks

Readings include Plato, Aristotle, Hume, Kant, Tostoy, Collingwood, Danto, Fried, and Cavell. These will be made available from the University Copy Centre.

### PHIL2621

#### Truth, Meaning and Language

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Adrian Heathcote **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Assessment:** one 2500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

This unit covers central issues in contemporary philosophy of language, such as the relationship between language and the world, the nature of meaning and truth, problems involved in interpreting and understanding the speech of others, the role of context in determining meaning, and the nature of metaphor.

### PHIL2622

#### Reality, Time & Possibility: Metaphysics

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Kristie Miller **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Assessment:** one 2000 word essay and

one 2500 word exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This is a course in metaphysics: the discipline that tells us about the nature of the world. The unit carries on from the Reality component of first year. We use philosophical methods to engage with questions like: What is time? What is space? What are the natures of possibility, freedom and identity? What is a cause, and what is a law of nature? Do we have free will? Does the world really exist - and what does "really" mean?

## PHIL2623

### Moral Psychology Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael McDermott **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy. **Prohibitions:** PHIL2513, PHIL3513 **Assessment:** one 2500 word essay and one 2000 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

What is the ultimate good in life? What attitude should we take towards the good? Part I of the unit explores these questions. Part II investigates a range of causal explanations of moral behaviour. Has natural selection designed us to be moral creatures, or do we learn to be good? Part III turns to questions about the foundations of morality and the nature of moral judgements. The final part concerns the possible limits of morality.

#### Textbooks

Readings available from the University Copy Centre.

## PHIL2627

### Philosophy and Psychiatry Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Stephanie Winfield **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy. **Prohibitions:** PHIL2227 **Assessment:** two 2250 word essays **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

Can the concept 'mental illness' be a valid one? What might delusions tell us about the structure of the mind? What assumptions underlie attempts to classify mental disorder? Can we be justified in compelling people to submit to psychiatric treatment? This unit will examine philosophical questions raised by mental disorder and our attempts to understand/treat it, and will connect psychiatry to debates in philosophy such as the mind/body problem, the concept of a person, and the possibility of knowledge.

#### Textbooks

Readings will be available from the University Copy Centre.

## PHIL2629

### Descartes and Continental Philosophy Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Anik Waldow **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Prohibitions:** PHIL2004, PHIL3004 **Assessment:** one 1000 word tutorial exercise, one 500 word essay plan, one 2500-3000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

Descartes is generally regarded as the founder of modern philosophy, and in this unit we look both at his own contribution, and at his influence on the subsequent course of philosophical thought in the

work of Malebranche, Spinoza, and Leibniz. Just over half the unit will be devoted to Descartes' own thought, and we will look at the various stages in the development of his ideas. In the second half of the unit, we will examine the ideas of his successors on selected metaphysical themes, above all on the mind/body question.

#### Textbooks

R. Descartes, Discourse on Method and Other Writings, trans. D. Clarke (Penguin paperback)

R. Descartes, Meditations and Other Metaphysical Writings, trans. D. Clarke (Penguin paperback)

G. Leibniz, Discourse on Metaphysics and other Essays (Hackett paperback)

B. Spinoza, Ethics, Treatise on the Emendation of the Intellect and Selected Letters (Hackett Paperback)

## PHIL2632

### Modernity in Crisis Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr John Grumley **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points in Philosophy **Prohibitions:** PHIL2532, PHIL3532 **Assessment:** one 500 word tutorial paper, one 2000 word essay, one 2500 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

This unit continues the themes developed in Theorising Modernity into the Twentieth Century. We will see how the new realities of free markets, democracy, the state and bureaucracy, individualism and cultural rationalisation presented new problems and opportunities and gave rise to new theoretical frameworks for their comprehension. The unit will focus on the work of Weber, The Frankfurt School, Foucault and Habermas.

#### Textbooks

Readings will be available from the University Copy Centre.

## PHIL2634

### Democratic Theory Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Besch **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points in Philosophy **Prohibitions:** PHIL2514 **Assessment:** one 2000 word essay and one 2500 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

A unit in political philosophy. The unit will examine various theoretical and normative justifications of democracy, as well as the historical foundations of these arguments. It will also examine particular issues in democracy and justice, the tension between democracy and constitutionalism and the challenges of social and cultural pluralism. The unit will also consider the scope and limits of democracy, including the extension of democratic norms and institutions across national boundaries through international law and multinational institutions.

## PHIL2635

### Contemporary Political Philosophy Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Justine McGill **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Prohibitions:** PHIL3535, PHIL2535 **Assessment:** one 2500 word essay and one 2000 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

A critical introduction to the major schools of thought in contemporary political philosophy, organized around the theme of inclusion and exclusion. The inclusive ambitions of liberal political theory will be confronted with objections from thinkers motivated by concern with various facets of social and political exclusion, notably based on the

categories of gender, cultural difference, deviancy and statelessness. Debates relating to refugees and asylum seekers will be considered in the latter part of this unit of study.

#### Textbooks

Kymlicka, W. *Introduction to Contemporary Political Philosophy*, OUP, 2nd edition. Unit reader available from the Copy Centre.

### PHIL2639

#### Heidegger's Phenomenology Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Paul Redding **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Prohibitions:** PHIL2239 **Assessment:** two 2250 word essays **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

Heidegger famously asks what it means to be. We will attempt to determine what he means by this 'question of Being', concentrating on the first division of his work "Being and Time", as well as the discussion of death and authenticity, and of temporality and everydayness, in the second division. Issues to be raised include Heidegger's critique of his teacher, Edmund Husserl, the relevance of Heidegger's work for cognitive science and whether Heidegger can be understood as an existentialist or a pragmatist - or neither.

#### Textbooks

Martin Heidegger, *Being and Time* (trans. J. Macquarrie & E. Robinson).

### PHIL2642

#### Critical Thinking Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Luke Russell **Session:** Semester 2, Winter Main **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in any units within the University **Assessment:** one 2000 word essay, one in-class test and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

An introduction to critical thinking and the analysis of argument. Through examination of arguments drawn from a wide range of sources, including journalism, advertising, science, economics and politics, we will learn to distinguish good from bad arguments, and see why the good arguments are good and the bad ones bad. This makes the unit invaluable not only for philosophy students but for every student at the University. (The approach taken will be informal; very little symbolic notation will be used.)

### PHIL2643

#### Philosophy of Mind Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael McDermott **Session:** Semester 2, Summer Late **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Prohibitions:** PHIL2213, PHIL3213, PHIL2205 **Assessment:** one essay and one take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

An introduction to modern theories of the nature of mind, and some important contemporary issues in the philosophy of mind. Topics will include the problem of mental representation (how can minds think about the world?), the relationship of minds to brains, and the problem of consciousness.

#### Textbooks

The Philosophy of Mind and Cognition, D. Braddon-Mitchell and F. Jackson, Blackwell, Oxford 1997.

### PHIL2644

#### Critical Theory: From Marx to Foucault

### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr John Grumley **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points **Assessment:** one 2000 word essay, one 2000 word take-home exam, one 500 word tutorial paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

The idea of critical theory emerged as an attempt to go beyond the alleged impasses of philosophy and actually challenge the world. This unit will consider various phases in the history of this project: from Marx, the Frankfurt School, to Foucault and Habermas. It will examine both the innovations and weaknesses of these various formulations in their historical context, as well as considering contemporary efforts to reanimate the idea of critical theory.

### PHIL2645

#### Philosophy of Law Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rick Benitez **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Prohibitions:** PHIL2510, PHIL3510 **Assessment:** one 2500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

This unit looks at fundamental issues in the philosophy of law, including the role of law, civil liberties, legal obligation, punishment, responsibility and morality. It considers questions about whether or not a legal system is necessary, arguments for anarchy, and reasons for safeguarding freedoms from the force of law. It considers arguments for obedience to law, and seeks a moral justification of punishment. The discussion of practical issues in law leads to consideration of relation between law and morality.

#### Textbooks

Readings will be available from the University Copy Centre.

### PHIL2647

#### The Philosophy of Happiness Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Caroline West **Session:** Semester 1, Summer Late, Winter Main **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points **Assessment:** one 2500 word essay and one 2000 word (take-home) exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

We all want to be happy and to live a worthwhile life. But what is happiness? Why should we want it? And how do we get it? These are among the most fundamental questions of philosophy. We will evaluate the answers of major thinkers from ancient and modern and eastern and western traditions; and consider the implications of current psychological research into the causes of happiness for the question of how to live well, as individuals and as a society.

#### Textbooks

Readings available from the University Copy Centre

### PHIL2648

#### German Philosophy, Leibniz to Nietzsche Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Paul Redding **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 Junior credit points in Philosophy **Prohibitions:** PHIL2641, PHIL3011 **Assessment:** one 1000 word tutorial exercise, one 500 word essay outline and one 2500-3000 word final essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit surveys German Philosophy from Leibniz via Kant and the German idealists to Nietzsche. The first half of the course examines the main aspects of Kant's "Copernican revolution" as a response to Leibniz's "monadology". The second half of the course examines extensions and transformations of Kant's philosophy by critical appropriators extending from Fichte to Nietzsche. Throughout, the philosophical views involved will be related more generally to questions of science, morals and politics, art, education, and religion.

##### Pragmatism

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr David Macarthur **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points in Philosophy **Prohibitions:** PHIL3015 **Assessment:** one 1000 word tutorial exercise, one 500 word essay outline, one 3000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B Int S, Dip Arts, UG Study Abroad Program.

This unit will consider the emergence and recent developments of the distinctive philosophical outlook known as "American Pragmatism". We shall discuss various pragmatist approaches to central philosophical topics such as truth, mind, knowledge, logic, naturalism, apriority, and the fact/value distinction. A central theme will be the philosophical importance of the appeal to practice and the agent's point of view. Readings will include works by William James, C.S. Pierce, John Dewey, Robert Brandom, Donald Davidson, Hilary Putnam, and Richard Rorty.

#### PHIL3622

##### Philosophy of Modern Physics

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Adrian Heathcote **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points in Philosophy **Prohibitions:** PHIL3223 **Assessment:** exercises and one 2500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

In this unit we will look at quantum mechanics, through a study of its central paradoxes: the EPR situation, Schrödinger's Cat, Wave-Particle duality, etc. We will work through the book by R.I.G. Hughes, using Albert's book for some additional material. The course will involve learning the mathematical basis for QM - though the level of mathematical sophistication required will not exceed ordinary high school mathematics. Relativity theory will be discussed only insofar as it bears upon the problem of interpreting quantum theory.

*Textbooks*

R.I.G. Hughes "The Structure and Interpretation of Quantum Mechanics", Harvard Univ. Press; David Albert "Quantum Mechanics and Experience" Harvard Univ Press.

#### PHIL4011

##### Philosophy Honours A

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Prof Paul Redding **Session:** Semester 1, Semester 2 **Prerequisites:** 48 points of Philosophy at Senior level, with a credit average or better, and including 6 points from each of the three areas (History of Philosophy; Epistemology, Metaphysics & Logic; Moral & Political Philosophy). Intending Honours students are strongly encouraged to discuss their unit choices with the Honours Coordinator at the beginning of their third year. The department places importance on the breadth of the philosophical education of its Honours graduates, and encourages intending Honours students to avoid over-specialisation at Senior level **Assessment:** All of the major components of the Honours year will be assessed **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Ec (Soc Sc)(Hons), Dip Arts(Hons).

Honours consists of a number of seminars, coursework and the completion of a substantial research thesis. For details please contact the Honours Coordinator (Prof Paul Redding) or obtain a copy of the relevant Student Information Guide from the SOPHI Office.

#### PHIL4012

##### Philosophy Honours B

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Prof Paul Redding **Session:** Semester 1, Semester 2 **Corequisites:** PHIL4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**PHSI2005****Integrated Physiology A  
Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Meloni Muir **Session:** Semester 1 **Classes:** Five 1 hour lectures, one 3 hour practical and one 3 hour tutorial per fortnight. **Prerequisites:** 6 credit points of Junior Chemistry plus 30 credit points from any Junior Chemistry, Physics, Mathematics, Biology, Psychology units of study **Prohibitions:** PHSI2905, PHSI2001, PHSI2101, PHSI2901 **Assessment:** Two written exams; group and individual written and oral presentations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG units of study is highly recommended for progression to Senior Physiology. Students taking combined degrees or with passes in units not listed should consult a coordinator if they do not meet the prerequisites.*

**Associated degrees:** B Sc, B Sc (Nutrition).

This unit of study offers a basic introduction to the functions of the nervous system, including excitable cell (nerve and muscle) physiology, sensory and motor systems and central processing. It also incorporates haematology and cardiovascular physiology. The practical component involves experiments on humans and isolated tissues, with an emphasis on hypothesis generation and data analysis. Inquiry-based learning tutorial sessions develop critical thinking and generic skills while demonstrating the integrative nature of physiology. Oral and written communication skills are emphasized, as well as group learning and team work.

**PHSI2905****Integrated Physiology A (Advanced)  
Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr Atomu Sawatari **Session:** Semester 1 **Classes:** Five 1 hour lectures, one 3 hour practical and one 3 hour tutorial per fortnight. Advanced students will be required to attend the designated Advanced Practical and Tutorial sessions. Students will also be exempt from all Inquiry-based learning tutorial **Prerequisites:** 6 credit points of Junior Chemistry plus 30 credit points from any Junior Chemistry, Physics, Mathematics, Biology, Psychology units of study, approval of Coordinator **Prohibitions:** PHSI2005, PHSI2901, PHSI2001, PHSI2101 **Assessment:** One written exam; individual and group oral presentations, 2 practical reports (reports will replace some other assessment items from regular course) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Permission from the coordinators is required for entry into this course. It is available only to selected students who have achieved a WAM of 75 (or higher) in their Junior units of study. Students taking combined degrees or with passes in units not listed should consult a coordinator if they do not meet the prerequisites. The completion of 6 credit points of MBLG units of study is highly recommended for progression to Senior Physiology*

**Associated degrees:** B Sc.

This unit of study is an extension of PHSI2005 for talented students with an interest in Physiology and Physiological research. The lecture component of the course is run in conjunction with PHSI2005. This unit of study gives a basic introduction to the functions of the nervous system, including excitable cell (nerve and muscle) physiology, sensory and motor systems and central processing. It also incorporates haematology and cardiovascular physiology. The practical component involves experiments on humans, isolated tissues, and computer simulations, with an emphasis on hypothesis generation and data analysis. Both oral and written communication skills are emphasized, as well as group learning. The course will provide an opportunity for students to apply and extend their understanding of physiological concepts by designing and conducting actual experiments. Small class sizes will provide a chance for students to interact directly with faculty members mentoring the practical sessions. Assessment for this stream will be based on oral group presentations and two practical reports.

These items will replace some other assessable activities from the regular course.

*Textbooks*

Sherwood, L. Human Physiology: From Cells to Systems. 6th edition 2004.

**PHSI3005****Human Cellular Physiology: Theory  
Medicine**

**Credit points:** 6 **Teacher/Coordinator:** Dr William Phillips **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** Except for BMedSc students: PHSI(2005 or 2905) and PHSI(2006 or 2906) For BMedSc: BMED (2801 and 2802). **Prohibitions:** PHSI3905, PHSI3004, PHSI3904 **Assumed knowledge:** 6 credit points of MBLG **Assessment:** One 2 hour exam and 3-5 quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: It is highly recommended that this unit of study be taken in conjunction with PHSI3006.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The aim of this unit of study is to examine key cellular processes involved in the growth, maintenance and reproduction of human life. Processes to be studied include the regulation of cell division and differentiation in developing and adult tissues, the regulation of body fluids through ion transport across epithelia, mechanisms of hormonal and nervous system signaling. Lectures will relate the molecular underpinnings to physiological functions: our current interpretation of how ion channels, hormone receptors and exocytotic complexes mediate tissue function and human life. The significance of these molecular mechanisms will be highlighted by considering how mutations and other disorders affect key proteins and genes and how this might lead to disease states such as cancer, intestinal and lung transport disorders and osteoporosis.

### PHSI3006

#### Human Cellular Physiology: Research Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr William D. Phillips **Session:** Semester 1 **Classes:** Two small group PBL and one 1 hour lecture per week; one 3 hour practical in some weeks. **Prerequisites:** Except for BMedSc students: PHSI (2005 or 2905) and PHSI(2006 or 2906) For BMedSc: BMED (2801 and 2802). **Corequisites:** PHSI3005 **Prohibitions:** PHSI3906, PHSI3004, PHSI3904 **Assessment:** One 1.5 hour exam, PBL assessments by oral presentations and paper summaries, prac reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit of study complements, and should be taken together with PHSI3005. PHSI3006 focuses deeply upon certain areas of cellular physiology that have particular relevance to human health and disease. In the problem-based learning (PBL) sessions groups of students work together with the support of a tutor to develop and communicate an understanding of mechanisms underlying the physiology and patho-physiology of disorders such as cystic fibrosis and vitamin D resistance. Each problem runs over three weeks with two small group meetings per week. Reading lists are structured to help address written biomedical problems. Lectures provide advice on how to interpret scientific data of the type found in the research papers. Practical classes will emphasize experimental design and interpretation. Collectively, the PBL, lectures and practical classes aim to begin to develop skills and outlook needed to deal with newly emerging biomedical science.

### PHSI3007

#### Heart and Circulation: Normal Function Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Steve Assinder **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour practical or one 2 hour tutorial per week. **Prerequisites:** Except for BMedSc students: PHSI(2005 or 2905) and PHSI(2006 or 2906) plus at least 12 credit points of intermediate Science Units of Study For BMedSc: BMED (2801 and 2803). **Prohibitions:** PHSI3907, PHSI3003, PHSI3903 **Assumed knowledge:** 6 credit points of MBLG **Assessment:** One 2 hour exam, 3 practical assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: It is recommended that students take PHSI3007 ONLY in combination with PHSI3008.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The aim of this unit of study is to examine in depth the structure and function of the cardiovascular system at the organ system, cellular and molecular levels. There is a particular focus on exercise physiology and the way in which the heart, circulation and skeletal muscles contribute to the limits of sporting achievement. The excitability, contractility and energetics of the heart and blood vessels are studied and the regulation of these organs by local (physical and chemical) factors, hormones and the nervous system are discussed, with emphasis on cellular and molecular mechanisms. At the systemic level, short term (neural) mechanisms controlling the blood pressure and how the system behaves during exercise and other stresses is dealt with. Long term (hormonal) mechanisms regulating blood pressure via the renal control of extracellular fluid volume is also discussed. There is an emphasis in this unit of study on recent advances in cellular and molecular aspects of heart and the blood vessels and the regulation of these organs by local (physical and chemical) factors, hormones and the autonomic nervous system. Lectures will be complemented by practical classes and tutorials that reinforce the theory and emphasize experimental design, data interpretation and presentation.

### PHSI3008

#### Heart and Circulation: Dysfunction Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Steve Assinder **Session:** Semester 2 **Classes:** Two 1 hour lectures and two 1 hour PBL sessions per week. **Prerequisites:** Except for BMedSc students: PHSI(2005 or 2905) and PHSI(2006

or 2906) plus at least 12 credit points of intermediate Science Units of Study For BMedSc: BMED (2801 and 2803) **Prohibitions:** PHSI3908, PHSI3003, PHSI3903 **Assumed knowledge:** 6 credit points of MBLG **Assessment:** One 2 hour exam, PBL presentations, 2000wd essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: It is strongly recommended that students take PHSI3008 ONLY in combination with PHSI3007*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit of study complements and should be taken together with PHSI3007, which deals with the normal function of the cardiovascular system. This unit of study focuses on cardiovascular disease which is a major cause of death in western society. Lectures provide the background to understanding (a) the disruption of normal physiological processes, (b) recent advances in cellular and molecular aspects, and (c) the physiological basis of modern approaches to treatment. Example of diseases covered include: heart failure, heart attack, cardiac hypertrophy, atheroma and hypertension. In the seminar sessions, students will work in small groups with a tutor to further extend their understanding of cellular and molecular mechanisms underpinning cardiovascular disease. Reading lists are organized into specific topics related to a particular disease. Through analysis and discussion of the readings students develop skills necessary for interpreting and communicating science.

### PHSI3905

#### Human Cellular Physiology (Adv): Theory Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr William D. Phillips **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** Credit average in PHSI(2005 or 2905) and PHSI(2006 or 2906) or in BMED (2801 and 2802). Students enrolling in this unit should have a WAM of at least 70. **Prohibitions:** PHSI3005, PHSI3004, PHSI3904 **Assumed knowledge:** 6 credit points of MBLG **Assessment:** One 2 hour exam, one 2000 word report based on a mentored research project. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: It is highly recommended that this unit of study be taken in combination with PHSI3906*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The aim of this unit of study is to examine key cellular processes involved in the growth, maintenance and reproduction of human life. Processes to be studied include the regulation of cell division and differentiation in developing and adult tissues, the regulation of body fluids through ion transport across epithelia, mechanisms of hormonal and nervous system signaling and the regulation of muscle contraction. Lectures will relate the molecular underpinnings to physiological functions: our current interpretation of how ion channels, hormone receptors and exocytotic complexes mediate tissue function and human life. The significance of these molecular mechanisms will be highlighted by considering how mutations and other disorders affect key proteins and genes and how this might lead to disease states such as cancer, intestinal and lung transport disorders and osteoporosis. Please see the Physiology website for details of mentored Advanced research topics.

### PHSI3906

#### Human Cellular Physiology (Ad): Research Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr William D. Phillips **Session:** Semester 1 **Classes:** Two small group PBL and one 1 hour lecture per week; one 3 hour practical in some weeks. **Prerequisites:** PHSI (2005 or 2905) and PHSI(2006 or 2906) or in BMED (2801 and 2802). Students enrolling in this unit should have a WAM of at least 70. **Corequisites:** PHSI3905 **Prohibitions:** PHSI3006, PHSI3004, PHSI3904 **Assumed knowledge:** 6 credit points of MBLG **Assessment:** One 1.5 hour exam, PBL assessments by oral presentations and paper summaries, 1500w research report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit of study complements, and should be taken together with PHSI3905. PHSI3906 focuses deeply upon certain areas of cellular physiology that have particular relevance to human health and disease. In the problem-based learning (PBL) sessions groups of students work together with the support of a tutor to develop and communicate an understanding of mechanism underlying the physiology and patho-physiology of disorders such as cystic fibrosis and vitamin D resistance. Each problem runs over three weeks with two small group

meetings per week. Reading lists are structured to help address written biomedical problems. Lectures provide advice on how to interpret scientific data of the type found in the research papers. Practical classes will emphasize experimental design and interpretation. Collectively, the PBL, lectures and practical classes aim to begin to develop skills and outlook needed to deal with newly emerging biomedical science. #### **PHTY1021** **Motor Performance and Learning** **Health Sciences**

**Credit points:** 4 **Teacher/Coordinator:** Dr Roger Adams **Session:** Semester 1 **Classes:** Two 1hr lectures/week, seven 2hr tutorials over the semester **Corequisites:** BACH1132 Foundations of Health Psychology **Assessment:** Seminar presentation, group project report, end semester written exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Phty), B App Sc (Phty), UG Study Abroad Program.

This unit of study consists of 3 modules. The first examines aspects of the perceptual-motor system that underpin motor performance such as capacity limitation, automaticity, lateralisation, motor planning, arousal and stress, and expertise. The second examines features of the learning environment that can be manipulated to promote motor learning, such as goals, motivation, instruction, practice conditions and feedback, and considers normal motor development across the lifespan. The third examines the application of these features of the learning environment to rehabilitation, and includes a project in which a motor skill is trained.

#### **PHTY2046** **Professional Practice** **Health Sciences**

**Credit points:** 4 **Teacher/Coordinator:** Ms Vicki Williams **Session:** Semester 1 **Classes:** 1hr lecture, 2hrs tutorials/week **Prerequisites:** BACH1130 Foundations of Health Sociology, BACH1132 Foundations of Health Psychology **Corequisites:** PHTY2045 Evidence Based Physiotherapy, PHTY2047 Clinical Observation and Measurement **Assessment:** Written assignment, end semester written exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty), UG Study Abroad Program.

This unit introduces the students to broad and specific issues and practices in health care delivery affecting physiotherapists. This includes the roles and responsibilities of physiotherapists and other health professionals in the context of the changing health care environment. Students will explore the New South Wales Physiotherapists Registration Board policy on professional conduct and learn to apply this policy in ethical and clinical decision-making. The importance of communication and respect for cultural differences in professional conduct will be addressed. Communication will include interviewing and the principles and process of professional documentation. The responsibility associated with being a member of a regulated profession, regulation of physiotherapy practice by the Physiotherapists Registration Act of NSW 2001 and by other health acts and the meaning of professional misconduct and other associated behaviours are explored in both lecture and tutorial format. Students will examine the impact of legislation and health policy on service delivery within health care in Australia and the distribution of funding for preventative, palliative and curative care. In addition, students will be assigned to clinical units in the metropolitan region and will undertake structured learning tasks which apply principles taught in this unit of study. Students will complete a workbook of their

experiences which will form part of the assessment of the mentored clinical placement.

### PHTY2047

#### Clinical Observation and Measurement Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Mark Hancock **Session:** Semester 1 **Classes:** 1hr lecture, 2hrs tutorials/week **Prerequisites:** BIOS1136 Functional Anatomy A, BIOS1144 Functional Anatomy B (Physiotherapy), EXSS1026 Biomechanics A, EXSS1027 Biomechanics B **Corequisites:** PHTY2045 Evidence Based Physiotherapy, PHTY2046 Professional Practice **Assessment:** Written assignment (20%), end semester written exam (50%), practical exam (30%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty), UG Study Abroad Program.

This unit examines the observation and measurement of normal movement using methods that are suitable for clinical application. The importance of measurement is emphasised and the validity and reliability of different procedures are studied. There are three modules, the first being 'impairment' which includes the measurement of a range of common impairments such as weakness, pain and decreased range of movement. The second module is 'activity' and it involves observation and description of everyday activities such as standing up, walking and reaching. The mechanics associated with these every day activities will be covered in lectures to provide a background for structuring observation. The third module is 'participation' and this covers types of measures designed to determine the impact of impairments on level of participation. Each module considers the development and change in impairments and activities over the lifespan. The principles and practice of manual handling, including lifting and transfers, will be covered in the context of each tutorial. In addition, students will be assigned to clinical sites in the metropolitan region and will undertake structured learning tasks which apply principles taught in this unit of study. Students will complete a workbook which will form part of the written assessment of the mentored clinical placement.

### PHTY2048

#### Cardiopulmonary Physiotherapy A Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Ms Nia Luxton **Session:** Semester 2 **Classes:** 1hr lecture, 2hrs tutorial/week **Prerequisites:** BIOS1133 Body Systems: Structure and Function I **Corequisites:** BIOS2099 Body Systems II and Pharmacology **Assessment:** Mid semester practical exam (20%), end semester written exam (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty), UG Study Abroad Program.

This unit will introduce students to the knowledge, skills and clinical decision making processes necessary for effective assessment and treatment of patients across the age spectrum with acute and chronic respiratory dysfunction. In particular, students will evaluate the pathophysiological and functional consequences of surgery (abdominal, thoracic and cardiac); infective, inflammatory and restrictive conditions; and airflow limitation on pulmonary function. Additionally, students will develop treatment strategies to effectively manage respiratory problems. The unit will provide students with an opportunity to apply, integrate and extend knowledge gained through the foundation sciences and preclinical physiotherapy units of study.

### PHTY2049

#### Neurological Physiotherapy A Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Angela Stark **Session:** Semester 2 **Classes:** Wks 1-6: 2hrs lectures, 4hrs tutorials/ week; Wks 7, 9-13: 1hr lecture, 2 hrs tutorials/week **Prerequisites:** BIOS2103 Neuroscience for Physiotherapists, PHTY1021 Motor Performance and Learning **Corequisites:** EXSS1028 Muscle Mechanics, PHTY2045 Evidence Based Physiotherapy, PHTY2047 Clinical Observation and Measurement **Assessment:** Mid semester practical exam (25%), end semester written exam (40%), end semester practical exam (35%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty), UG Study Abroad Program.

Neurological physiotherapy aims to develop in students an ability to apply relevant theoretical and data-based scientific findings to clinical practice in the area of motor disability arising from disease and trauma to the nervous system. This unit introduces pathology, impairments, activity limitations and participation restrictions arising from conditions of acute onset across the lifespan, using examples such as stroke, traumatic brain injury, cerebral palsy and Guillain-Barre syndrome. Impairments such as weakness, loss of dexterity, loss of sensation and spasticity as well as secondary adaptations to these impairments, such as the development of contracture, will be studied. Students will learn to assess, train and measure everyday activities such as sitting, standing up, standing, walking, reaching and manipulating objects with the hand, rolling over and getting out of bed. The contribution of other health professionals to the rehabilitation process is also addressed.

### PHTY2050

#### Musculoskeletal Physiotherapy A Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Dr Leslie Nicholson **Session:** Semester 2 **Classes:** 2hrs lectures, 4hrs tutorials/week **Prerequisites:** BIOS1136 Functional Anatomy A, BIOS1144 Functional Anatomy B **Corequisites:** EXSS1028 Muscle Mechanics, PHTY2045 Evidence Based Physiotherapy, PHTY2047 Clinical Observation and Measurement, PHTY2051 Musculoskeletal Physiotherapy B **Assessment:** Mid semester practical exam (20%), end semester practical/viva exam (30%), end semester written exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty), UG Study Abroad Program.

The overall aim of this unit of study is to develop the skills required to assess, diagnose and manage simple musculoskeletal disorders of the lower extremity at a level appropriate to commence physiotherapy practicum. This unit will integrate knowledge from earlier foundation science and physiotherapy subjects. Students will develop the ability to select and implement interventions based on clinical reasoning, principles of evidence based practice and safety. Interventions will include selected electrophysical agents, exercise prescription, taping, manual therapy and the prescription of walking aids. This unit of study complements Musculoskeletal Physiotherapy B and lays the foundation for Musculoskeletal Physiotherapy C, D and E which will further develop skills in disorders of the spine, upper extremity and more complex musculoskeletal conditions.

### PHTY2051

#### Musculoskeletal Physiotherapy B Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Paulo Ferriera **Session:** Semester 2 **Classes:** 21hrs lectures, 36hrs tutorials **Prerequisites:** BIOS1136 Functional Anatomy A, BIOS1144 Functional Anatomy B **Corequisites:** EXSS1028 Muscle Mechanics, PHTY2045 Evidence Based Physiotherapy, PHTY2047 Clinical Observation and Measurement, PHTY2050 Musculoskeletal Physiotherapy A **Assessment:** Practical skill assessment mid and end semester, end semester written exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty), UG Study Abroad Program.

The overall aim of this unit of study is to develop the skills required for primary care management of low back, hip/groin and pelvic pain at a level to commence musculoskeletal practicum. Students learn to "triage" patients to distinguish patients with non-specific pain from those suspected of having underlying disease/pathology. The unit covers the basic epidemiology of spinal pain (risk factors, clinical course, prognostic factors) and the assessment of treatment outcome. The evidence for management options is explored and students learn to apply a range of treatments such as advice, manual therapy, exercise, McKenzie therapy etc. Non-physiotherapy treatments such as surgery and drug therapy are also covered. The unit aims to teach students to integrate a variety of approaches into management of back, hip/groin and pelvic pain. This unit will integrate knowledge from earlier foundation science and physiotherapy subjects. Students will develop the ability to select and implement interventions based on clinical reasoning, principles of evidence based practice and safety.

This unit of study complements Musculoskeletal Physiotherapy A and lays the foundation for Musculoskeletal Physiotherapy C, D and E which will further develop skills in disorders of the spine, upper extremity and more complex musculoskeletal conditions.

### PHTY3051

#### Cardiopulmonary Physiotherapy B Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Lyndal Maxwell **Session:** Semester 1 **Classes:** Wks 1-6: two 1hr lectures, two 2hr tutorials/week; Wks 8-13: 1hr lecture, 2hr tutorial/week **Prerequisites:** EXSS2024 Applied Physiology, PHTY2048 Cardiopulmonary Physiotherapy A **Assessment:** Mid semester presentation, written assignment, end semester written exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty).

The aim of this unit is to continue to develop knowledge and skills in the assessment and treatment of patients across the age spectrum with acute and chronic pulmonary dysfunction. This unit will introduce students to the knowledge, skills and clinical decision making processes necessary for effective treatment of patients across the age spectrum with acute and chronic cardiac dysfunction. This unit will develop the student's knowledge of exercise and aims to apply the principles of exercise testing, prescription and training to patients who have cardiac and pulmonary limitations to exercise and to other special populations. In addition, students will examine specific clinical and professional issues relating to the intensive care and acute care environment. The emphasis will be on appropriate assessment, safe and effective management of intubated and non-intubated patients.

### PHTY3052

#### Neurological Physiotherapy B Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Colleen Canning **Session:** Semester 1 **Classes:** 1hr lecture, 2hr tutorials/week **Prerequisites:** PHTY2049 Neurological Physiotherapy A **Assessment:** End semester practical assessment, end semester written exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty).

This unit consists of two modules. The first module introduces pathology, impairments, activity limitations and participation restrictions arising from conditions of acute onset which do not recover and require adaptation such as spinal cord injury and spina bifida. Impairments such as spasm, overactive cutaneous reflexes, skin breakdown, as well as adaptations to these impairments such as the development of contracture and loss of fitness will be studied. Students will learn to assess, train and measure outcome of everyday activities for these populations such as mobility via aided gait or wheelchair and hand function using a tenodesis grasp. The second module examines the pathology, impairments, activity limitations and participation restrictions arising from degenerative conditions which require adaptation such as Parkinsonism, multiple sclerosis and motor neuron disease. Impairments such as bradykinesia, dyskinesia, rigidity, tremor, ataxia and fatigue as well as adaptations to impairments such as the development of contracture and loss of fitness will be studied. Students will learn to assess and train or prescribe appropriate aids to enable activities such as rolling over, sitting, mobility, transferring and reaching and manipulating objects to be carried out.

### PHTY3053

#### Musculoskeletal Physiotherapy C Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Dr Bronwen Ackermann **Session:** Semester 1 **Classes:** 2hr lectures, 4hrs practicals, tutorials/week **Prerequisites:** PHTY2050 Musculoskeletal Physiotherapy A, PHTY2051 Musculoskeletal Physiotherapy B **Corequisites:** PHTY3054 Musculoskeletal Physiotherapy D **Assessment:** Mid semester practical assessment, end semester practical assessment, end semester written exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty).

The overall aim of this unit is to further develop skills for assessment, diagnosis and management of musculoskeletal conditions with a focus on the upper extremity across the lifespan. The unit will cover selected

musculoskeletal conditions of the upper extremity including fractures, surgery and soft tissue injury. Students will develop their existing ability to select and implement physiotherapy interventions based on principles of clinical reasoning, evidence based practice and safety for the management of such conditions. Interventions will include exercise prescription, manual therapy, selected electrophysical agents and advice. This unit of study integrates knowledge from earlier foundation science and physiotherapy subjects (particularly Musculoskeletal Physiotherapy A and Musculoskeletal Physiotherapy B). This unit will complement Musculoskeletal Physiotherapy D and contribute to the foundations of Musculoskeletal Physiotherapy E which integrates Musculoskeletal Physiotherapy A, B, C and D to further develop skills in the management of more complex musculoskeletal conditions.

### PHTY3054

#### Musculoskeletal Physiotherapy D Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Susan Coulson **Session:** Semester 1 **Classes:** Wks 1-6: 1hr lecture, 2hr tutorial/week; Wks 7, 9-13: 2hrs lectures, two 2hrs tutorials/week **Prerequisites:** PHTY2050 Musculoskeletal Physiotherapy A, PHTY2051 Musculoskeletal Physiotherapy B **Corequisites:** PHTY3053 Musculoskeletal Physiotherapy C **Assessment:** Mid semester practical assessment, end semester written exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty).

This module aims to provide a detailed approach to history taking and performance of the physical examination of a patient with neck pain or thoracic spine pain. With the integration of communication and listening skills, application of sound physical testing procedures and clinical reasoning, the aim is to enable students to be able to diagnose/triage and manage neck pain or thoracic spine pain patients presenting to primary care and with a more complex presentation. Students will learn how to assess, manage and monitor cervical and thoracic spine conditions using evidence-based practice strategies and to understand how to differentiate symptoms arising from different regions, e.g., shoulder vs cervical spine and monitor the outcomes of treatment. This unit also includes modules on chronic pain cognitive behaviour therapy and common disorders of the face, head and neck including TMJ. This unit of study complements Musculoskeletal Physiotherapy C and lays the foundations for Musculoskeletal Physiotherapy E which will further develop skills in the management of more complex musculoskeletal conditions.

### PHTY3055

#### Physiotherapy Practicum A Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Ms Julia Patrick **Session:** Semester 1, Semester 2 **Classes:** Clinical placement **Prerequisites:** PHTY2046 Professional Practice, PHTY2047 Clinical Observation and Measurement, PHTY2048 Cardiopulmonary Physiotherapy A, PHTY2049 Neurological Physiotherapy A, PHTY2050 Musculoskeletal Physiotherapy A, PHTY2051 Musculoskeletal Physiotherapy B, PHTY3051 Cardiopulmonary Physiotherapy B, PHTY3052 Neurological Physiotherapy B, PHTY3053 Musculoskeletal Physiotherapy C, PHTY3054 Musculoskeletal Physiotherapy D **Assessment:** 100% assessment based on clinical performance, written material, communication skills, organisational skills and professionalism **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Phty).

This unit of study involves clinical placements in one of the following areas: rehabilitation, acute care, ambulatory/outpatients, community health and an elective unit such as paediatrics, private practice, burns or hand therapy. Students will be required to demonstrate competence in both the specific clinical skills for each area as well as the generic skills and attributes of physiotherapy professionals. During practicums there will be opportunities for interprofessional learning. In addition, students will be responsible for individual and group training sessions such as strength and fitness programs. Physiotherapy practicums A, B, C, D, E are all five week placements which require full attendance (37 hours per week) at clinical facilities. In addition, at least one of the placements will be in a rural or regional setting.

**PHTY4092****Musculoskeletal Physiotherapy E****Health Sciences**

**Credit points:** 4 **Teacher/Coordinator:** Dr Debra Shirley **Session:** Semester 1 **Classes:** Wks 1-5: 2-3hrs lectures, 4-6hrs tutorials/week **Prerequisites:** PHTY3053 Musculoskeletal Physiotherapy C, PHTY3054 Musculoskeletal Physiotherapy D **Assessment:** Practical exam (30%), written exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty).

This unit will focus on the development of advanced skills in assessment and management of the musculoskeletal system. This unit covers: spinal manipulation, physiotherapy and emerging technology, the changing role of the physiotherapist in the health care system and musculoskeletal complex cases. Students will be expected

to demonstrate competence in performance of spinal manipulative skills as well as demonstrate clinical reasoning in the application of these skills. Emerging technologies will be explored in relation to physiotherapy practice and students will evaluate the role of the physiotherapist in a changing health environment and explore future directions. In the complex cases module, the emphasis will be on multi-system complex problems, understanding the relevance of coexisting pathologies and integration with other core areas, e.g., depression/low back pain.

**PHTY4093****Cardiopulmonary & Neurological Physio****Health Sciences**

**Credit points:** 4 **Teacher/Coordinator:** Dr Lyndal Maxwell, Dr Louise Ada **Session:** Semester 1 **Classes:** Two 1hr lectures, two 2hr tutorials/week **Prerequisites:** PHTY3051 Cardiopulmonary Physiotherapy B, PHTY3052 Neurological Physiotherapy B **Assessment:** Two written assignments (50% ea) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty).

This unit examines the theoretical basis for clinical intervention in cardiopulmonary and neurological physiotherapy. The cardiopulmonary module will examine a range of complex clinical issues organised on a case-basis including multi-system dysfunction (physiological, psychological and social) across the age spectrum. The neurological module will examine the history of neurological rehabilitation, acute neuromedical and neurosurgical interventions and the management of some less common neurological conditions. Students will be expected to evaluate the scientific basis and ethical, legal and practical implications of current physiotherapy interventions in relation to both cardiopulmonary and neurological conditions.

**PHTY4094****Physiotherapy Practicum D****Health Sciences**

**Credit points:** 8 **Teacher/Coordinator:** Ms Julia Patrick **Session:** Semester 1 **Classes:** Clinical placement **Prerequisites:** PHTY2046 Professional Practice, PHTY2047 Clinical Observation and Measurement, PHTY3051 Cardiopulmonary Physiotherapy B, PHTY3052 Neurological Physiotherapy B, PHTY3053 Musculoskeletal Physiotherapy C, PHTY3054 Musculoskeletal Physiotherapy D **Corequisites:** PHTY4092 Musculoskeletal Physiotherapy E, PHTY4093 Cardiopulmonary & Neurological Physio **Assessment:** 100% assessment based on clinical performance, written material, communication skills, organisational skills and professionalism **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty).

These units of study (PHTY4094 and PHTY4095) involve clinical placement in two of the following areas not previously covered in physiotherapy practicum A, B or C: rehabilitation, acute care, ambulatory/outpatients, community health and an elective unit such as paediatrics, private practice, burns or hand therapy. Students will be required to demonstrate competence in both the specific clinical skills for each area as well as the generic skills and attributes of physiotherapy professionals. During practicums there will be opportunities for interprofessional learning. Physiotherapy practicums A, B, C, D, E are all five week placements which require full-time attendance (37 hours per week) at clinical facilities. In addition, at least one of the placements will be in a rural or regional setting.

**PHTY4095****Physiotherapy Practicum E****Health Sciences**

**Credit points:** 8 **Teacher/Coordinator:** Ms Julia Patrick **Session:** Semester 1 **Classes:** Clinical placement **Prerequisites:** PHTY2046 Professional Practice, PHTY2047 Clinical Observation and Measurement, PHTY3051 Cardiopulmonary Physiotherapy B, PHTY3052 Neurological Physiotherapy B, PHTY3053 Musculoskeletal Physiotherapy C, PHTY3054 Musculoskeletal Physiotherapy D **Corequisites:** PHTY4092 Musculoskeletal Physiotherapy E, PHTY4093 Cardiopulmonary & Neurological Physio **Assessment:** 100% assessment based on clinical performance, written material, communication skills, organisational skills and professionalism **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty).

These units of study (PHTY4094 and PHTY4095) involve clinical placement in two of the following areas not previously covered in physiotherapy practicum A, B or C: rehabilitation, acute care, ambulatory/outpatients, community health and an elective unit such as paediatrics, private practice, burns or hand therapy. Students will be required to demonstrate competence in both the specific clinical skills for each area as well as the generic skills and attributes of physiotherapy professionals. During practicums there will be opportunities for interprofessional learning. In addition, at least one of the placements will be in a rural or regional setting.

### PHTY4096

#### Physiotherapy in Childhood

##### Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Ms Jane Butler **Session:** Semester 2 **Classes:** 1hr lecture/week, 2hr tutorials every 2nd week plus structured independent learning activities **Prerequisites:** PHTY4092 Musculoskeletal Physiotherapy E, PHTY4093 Cardiopulmonary and Neurological Physio **Corequisites:** PHTY4094 Physiotherapy Practicum D, PHTY4095 Physiotherapy Practicum E **Assessment:** Mid semester group assignment (40%), end semester written exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty), B Hlth Sc (Phty).

This unit of study aims to prepare the student as a competent entry-level practitioner in the area of paediatric physiotherapy. The student will become aware of the changes which occur from infancy through to maturity in neuromotor, musculoskeletal and cardiopulmonary development and will address issues related to assessment and training strategies in children with potential dysfunction in those systems. The emphasis of teaching strategy will be on problem solving for paediatric clinical scenarios via an approach of clinical reasoning. This learning approach will emphasise the importance of teamwork that will prepare the student for the health care setting. The unit will provide opportunity for the students to incorporate information gained from other units of study in order to achieve the learning outcomes of each clinical scenario.

### PHTY4097

#### Physiotherapy in the Workplace

##### Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Martin Mackey **Session:** Semester 2 **Classes:** 1hr lecture/week, 2hr tutorials every 2nd week plus directed independent learning activities **Prerequisites:** PHTY4092 Musculoskeletal Physiotherapy E **Corequisites:** PHTY4094 Physiotherapy Practicum D, PHTY4095 Physiotherapy Practicum E **Assessment:** Poster presentation (40%), written report (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty), B Hlth Sc (Phty).

This unit provides a framework for exploring a broad and emerging role of physiotherapy in the field of occupational health and safety with a focus on work injury prevention and early injury assessment and management. An evidence-based, risk management approach will be used to explore the patterns, causation and control of workplace injury and illness in Australia with particular emphasis on spinal, shoulder and upper limb disorders. Students will gain an understanding of the principles of ergonomics and task analysis and how these can be applied to work injury prevention. To this effect, the role of the physiotherapist in workplace consultancy will be evaluated. Assessment and management of work related disability will be explored. The unit will explore theoretical sociological perspectives on work and organisations in relation to injury causation and rehabilitation and examine the legislative and regulatory framework underpinning the process of injury assessment and management. Specific injury assessment and management strategies such as functional capacity evaluations and functional restoration programs will also be addressed.

### PHTY4098

#### Physiotherapy in Recreation

### Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Debra Shirley **Session:** Semester 2 **Classes:** 1hr lecture, 2hr tutorials/week including directed independent learning activities **Prerequisites:** PHTY4092 Musculoskeletal Physiotherapy E, PHTY4093 Cardiopulmonary and Neurological Physio **Corequisites:** PHTY4094 Physiotherapy Practicum D, PHTY4095 Physiotherapy Practicum E **Assessment:** Mid semester group assignment (40%), end semester written exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty), B Hlth Sc (Phty).

The aim of this unit of study is for participants to apply the knowledge, skills and reasoning gained during coursework and clinical practicums to recreational activities. Participants will integrate this knowledge to design injury prevention/screening programs for people participating in recreational activities, to develop injury management programs for all recreation groups to facilitate their return to recreation and to plan and implement activity modification programs for those who are unable to participate in standard recreational activities. The relationship of public health issues, e.g., osteoporosis and childhood obesity, to recreation will also be explored. This unit of study will equip participants to manage complex and coexisting problems across the lifespan.

### PHTY4099

#### Physiotherapy in the Community

##### Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Zoe McKeough **Session:** Semester 2 **Classes:** 1hr lecture, 2hr tutorials/week including directed independent learning activities **Prerequisites:** PHTY4092 Musculoskeletal Physiotherapy E, PHTY4093 Cardiopulmonary and Neurological Physio **Corequisites:** PHTY4094 Physiotherapy Practicum D, PHTY4095 Physiotherapy Practicum E **Assessment:** Mid semester group seminar (40%), end semester written assignment (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty), B Hlth Sc (Phty).

This unit covers the topic of community physiotherapy under two main themes. The first theme addresses the contribution of physiotherapy to the management of particular population groups who receive health care in community settings as a consequence of either personal choice or due to the nature of their chronic disease state; for example, individuals with diabetes, mental illness, and cancer. Health care issues specific to women, to men and to indigenous people will also be addressed. The second major theme will address physiotherapy service delivery in various community-based settings. This aspect of the unit will cover the process of developing a physiotherapy service, including issues such as strategic planning, quality management, health promotion and how to adapt physiotherapy services in the community according to cultural and socio-economic need. Teaching and learning methods will consist of lectures, tutorials and independent learning with student seminars covering some of the topics.

### PHTY4100

#### Physiotherapy for Older People

##### Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Ms Gemma Lloyd **Session:** Semester 2 **Classes:** 3hrs/week plus structured independent learning activities **Prerequisites:** PHTY4092 Musculoskeletal Physiotherapy E, PHTY4093 Cardiopulmonary and Neurological Physio **Corequisites:** PHTY4094 Physiotherapy Practicum D, PHTY4095 Physiotherapy Practicum E **Assessment:** Mid semester group seminar (40%), end semester written assignment (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty) Hons, B App Sc (Phty), B Hlth Sc (Phty).

This unit of study is designed to enable students to examine the physiological, psychological and social changes associated with healthy ageing and the more common impairments, disabilities and handicap that arise in an older population. Integration of material from core areas of musculoskeletal, neurological and cardiopulmonary physiotherapy will be required in order to plan management and modify physiotherapy intervention for older persons. The role of the physiotherapist in a variety of environments and in conjunction with other health care resources will be discussed.

## PHTY4101

### Honours Research Dissertation Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Assoc Prof Sharon Kilbreath **Session:** Semester 2 **Classes:** 6hrs/week **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty) Hons.

The overall aim of this unit of study is to provide an opportunity for students of outstanding ability to develop research skills, and specifically, to participate in an investigative study of an aspect of the theoretical or clinical basis of physiotherapy. This unit of study comprises lectures on issues related to conduct of research and fieldwork in which the student participates in a research project. For the fieldwork component, the student will work under the supervision of an academic staff member on a project in which ethical approval has been obtained. The student will also gain experience in scientific writing by the completion of their dissertation. The dissertation will be on a topic broadly related to the project on which the student works.

## PHTY4109

### Elective Studies Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Dr Susan Coulson **Session:** Semester 2 **Corequisites:** PHTY4094 Physiotherapy Practicum D, PHTY4095 Physiotherapy Practicum E **Assessment:** A variety of assessment methods will be employed dependent upon the nature of the elective topic selected by the student **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phty), B Hlth Sc (Phty).

Students will select an approved topic from a list of non-physiotherapy topics offered by the discipline of Physiotherapy.

## PHTY5164

### Ultrasound for Physiotherapists Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Debra Shirley **Session:** Semester 1 **Classes:** Flexible delivery mode with 2 intensive block attendances **Assessment:** 1500 word written assignment (30%), written exam (50%), practical exam (20%) **Campus:** Cumberland **Mode of delivery:** Block Mode   
*Note: Department permission required for enrolment.*

**Associated degrees:** Health Sciences PG Cross-Inst, Health Sciences PG Non Award, M Hlth Sc (Phty).

This unit of study aims to introduce graduate physiotherapists to the use of real time ultrasound in the visualisation and assessment of musculoskeletal structures. Students will be assisted in learning by the integration of the principles of real time scanning, appearances of anatomy as displayed in ultrasound images and instruction in equipment controls. While the emphasis will be on the use of ultrasound for biofeedback, some common diagnostic procedures such as rotator cuff sonography will be introduced to provide a basic appreciation of normal and pathological findings. Students will be expected to undertake some independent learning. Practical sessions will provide the opportunity for hands-on scanning with experienced tutors.

## PHYS1001

### Physics 1 (Regular) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week. **Corequisites:** Recommended concurrent Units of Study: MATH (1001/1901, 1002/1902) **Prohibitions:** PHYS1002, PHYS1901 **Assumed knowledge:** HSC Physics **Assessment:** 3 hour exam plus laboratories, tutorials, assignments and mid-semester tests **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Com, M B, B S, B E, B Ed, B Sc (Psych), B Med Sc, B Sc, B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is for students who gained 65 marks or better in HSC Physics or equivalent. The lecture series contains three modules

on the topics of mechanics, thermal physics, and oscillations and waves.

#### Textbooks

Young & Freedman. University Physics. 12th edition, with Mastering Physics, Addison-Wesley. 2008  
Experimental Physics Laboratory Manual - School of Physics Publication.

## PHYS1002

### Physics 1 (Fundamentals) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week. **Corequisites:** Recommended concurrent Units of Study: MATH (1001/1901, 1002/1902) **Prohibitions:** PHYS1001, PHYS1901 **Assumed knowledge:** No assumed knowledge of Physics **Assessment:** 3 hour exam plus laboratories, tutorials, assignments and mid-semester tests **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Com, M B, B S, B E, B Ed, B Sc (Psych), B Med Sc, B Sc, B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is designed for students who have not studied Physics previously or scored below 65 in HSC Physics. The lecture series contains modules on the language of physics, mechanics, and oscillations and waves.

#### Textbooks

College Physics: A Strategic Approach by Knight, Jones and Field, including Mastering Physics access key.

## PHYS1003

### Physics 1 (Technological) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 3 hour laboratory, one 1 hour tutorial per week. **Corequisites:** Recommended concurrent Units of Study: MATH (1003/1903), MATH (1005/1905). **Prohibitions:** PHYS1004, PHYS1902 **Assumed knowledge:** HSC Physics or PHYS (1001 or 1002 or 1901) or equivalent. **Assessment:** 3 hour exam plus laboratories, tutorials, and assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: It is recommended that PHYS (1001 or 1002 or 1901) be completed before this unit*

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Com, M B, B S, B E, B Ed, B Sc (Psych), B Med Sc, B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is designed for students majoring in physical and engineering sciences and emphasis is placed on applications of physical principles to the technological world. The lecture series contains modules on the topics of fluids, electromagnetism, and quantum physics.

#### Textbooks

Young & Freedman. University Physics. 12th edition, with Mastering Physics, Addison-Wesley. 2008  
Experimental Physics Laboratory Manual - School of Physics Publication.

## PHYS1004

### Physics 1 (Environmental & Life Science) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week. **Corequisites:** Recommended concurrent Units of Study: MATH (1003/1903), MATH (1005/1905). **Prohibitions:** PHYS1003, PHYS1902 **Assumed knowledge:** HSC Physics or PHYS (1001 or 1002 or 1901) or equivalent. **Assessment:** 3 hour exam plus laboratories, tutorials, and assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: It is recommended that PHYS (1001 or 1002 or 1901) be completed before this unit*

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Com, M B, B S, B E, B Ed, B Sc (Psych), B Med Sc, B Sc, B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study has been designed specifically for students interested in further study in environmental and life sciences. The lecture series

contains modules on the topics of properties of matter, electromagnetism, and radiation and its interactions with matter.

#### Textbooks

College Physics: A Strategic Approach by Knight, Jones and Field, including Mastering Physics access key.

### PHYS1500 Astronomy Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 2 hour laboratory and one 1 hour tutorial per week. **Assumed knowledge:** No assumed knowledge of Physics. **Assessment:** 2 hour exam plus laboratories, assignments and night-viewing project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study provides a broad understanding of the structure, scale and diversity of the universe and an appreciation of the scientific methods used to achieve this understanding. Current areas of investigation, new ideas and concepts which often receive wide media attention will be used to demonstrate how science attempts to understand new and remote phenomena and how our ideas of our place in the universe are changing. The range of topics includes the planets, the solar system and its origin, spacecraft discoveries, stars, supernovas, black holes, galaxies, quasars, cosmology and the Big Bang. It also includes day and night sky observing sessions. This unit of study cannot be counted as part of the 12 credit points of Junior Physics necessary for enrolment in Intermediate Physics.

#### Textbooks

Bennett, J.O. et al. The Essential Cosmic Perspective. 4th edition, with Mastering Astronomy. Addison Wesley. 2006

### PHYS1551 Physics Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### PHYS1552 Physics Exchange Science

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### PHYS1901 Physics 1A (Advanced) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week. **Prerequisites:** UAI of at least 96, or HSC Physics result in Band 6, or PHYS1902, or Distinction or better in PHYS (1003 or 1004) or an equivalent unit. **Corequisites:** Recommended concurrent Units of Study: MATH (1001/1901,1002/1902). **Prohibitions:** PHYS1001, PHYS1002 **Assessment:** 3 hour exam plus laboratories, tutorials, assignments and mid-semester tests **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Com, M B, B S, B E, B Ed, B Sc (Psych), B Med Sc, B Sc, B Sc (Environmental), B Sc (Marine

Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is intended for students who have a strong background in Physics and an interest in studying more advanced topics. It proceeds faster than Physics 1 (Regular), covering further and more difficult material. The lecture series contains modules on the topics of mechanics, thermal physics, oscillations and waves and chaos. The laboratory work also provides an introduction to computational physics using chaos theory as the topic of study.

#### Textbooks

Young and Freedman. University Physics, 12th edition, with Mastering Physics. Addison-Wesley. 2008.

Experimental Physics Laboratory Manual - School of Physics Publication.

### PHYS1902 Physics 1B (Advanced) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week. **Prerequisites:** UAI of at least 96, or HSC Physics result in Band 6, or PHYS1901, or Distinction or better in PHYS (1001 or 1002) or an equivalent unit. **Corequisites:** Recommended concurrent unit of study: MATH (1003/1903), MATH (1005/1905). **Prohibitions:** PHYS1003, PHYS1004 **Assessment:** 3 hour exam plus laboratories, tutorials, and assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: It is recommended that PHYS (1001 or 1002 or 1901) be completed before this unit*

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B Com, M B, B S, B E, B Ed, B Sc (Psych), B Med Sc, B Sc, B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is a continuation of the more advanced treatment of Physics 1A (Advanced). Students who have completed PHYS1001 or PHYS1002 at Distinction level may enrol. It proceeds faster than Physics 1 (Technological), covering further and more difficult material. The lecture series contains modules on the topics of fluids, electricity and magnetism, and quantum physics.

Experimental Physics Laboratory Manual - School of Physics Publication.

### PHYS2011 Physics 2A Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures per week for 11 weeks; one 2 hour computational laboratory and one 3 hour laboratory per week for 9 weeks. **Prerequisites:** 12 credit points of Junior Physics (excluding PHYS1500) **Prohibitions:** PHYS2001, PHYS2901, PHYS2911, PHYS2101, PHYS2103, PHYS2213, PHYS2203 **Assumed knowledge:** MATH (1001/1901 and 1002/1902 and 1003/1903). MATH (1005/1905) would also be useful **Assessment:** One 2 hour exam, one 1 hour computational test, practical work, practical report and oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), UG Study Abroad Program.

In combination with two semesters of Junior Physics, this unit of study continues a first pass through the major branches of classical and modern physics, providing students with a sound basis for later Physics units or for studies in other areas of science or technology. Hence, this unit suits students continuing with the study of physics at the general Intermediate level, and those wishing to round out their knowledge of physics before continuing in other fields.

The major topics in this unit of study are:

Optics: The wave nature of light, and its interactions with matter. Applications including spectroscopy and fibre optics.

Nuclear Physics: The fundamental structure of matter.

Computational Physics: In a PC-based computing laboratory students use simulation software to conduct virtual experiments in optics, which illustrate and extend the relevant lectures. Students also gain experience in the use of computers to solve problems in physics. An introductory session is held at the beginning of semester for students who are not familiar with personal computers.

Practical: Experimental Physics is taught as a laboratory module and includes experiments in the areas of optics, nuclear decay and particles, properties of matter, and other topics. Assessment is based on mastery of each attempted experiment. At the end of the semester students prepare a short report on one experiment and make an oral presentation on it.

## PHYS2012

### Physics 2B

#### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures per week; one 2 hour computational laboratory per week for 11 weeks. **Prerequisites:** PHYS (1003 or 1004 or 1902) and PHYS (1001 or 1002 or 1901 or 2001 or 2901 or 2011 or 2911) **Prohibitions:** PHYS2102, PHYS2104, PHYS2902, PHYS2002, PHYS2912, PHYS2213, PHYS2203 **Assumed knowledge:** MATH (1001/1901 and 1002/1902 and 1003/1903). MATH (1005/1905) would also be useful **Assessment:** One 3 hour exam, one 1 hour computational test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), UG Study Abroad Program.

This unit of study is designed for students continuing with the study of physics at the general Intermediate level, and represents the beginning of a more in-depth study of the main topics of classical and modern physics. The lecture topics are:

Quantum physics: The behaviour of matter and radiation at the microscopic level, modelled by the Schrodinger equation. Application to 1-dimensional systems including solid state physics.

Electromagnetic properties of matter: Electric and magnetic effects in materials; the combination of electric and magnetic fields to produce light and other electromagnetic waves; the effects of matter on electromagnetic waves.

Computational Physics: The computational physics component is similar to that of PHYS2011, except that the material illustrates topics in the quantum physics module.

## PHYS2013

### Astrophysics and Relativity

#### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures per week for 11 weeks and one 3 hour laboratory per week for 12 weeks. **Prerequisites:** PHYS (1003 or 1004 or 1902) and PHYS (1001 or 1002 or 1901 or 2011 or 2911) **Corequisites:** PHYS (2012 or 2912) **Prohibitions:** PHYS2001, PHYS2901, PHYS2913, PHYS2101, PHYS2103 **Assumed knowledge:** MATH (1001/1901 and 1002/1902 and 1003/1903). MATH 1005/1905 would also be useful **Assessment:** One 2 hour exam, practical work, practical report and oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, UG Study Abroad Program.

This unit of study builds on the foundation provided by Junior Physics and first semester of Intermediate Physics, to provide an introduction to Astrophysics (Structure and evolution of stars), and Special Relativity (Space and time at high velocities).

Practical: Experimental Physics is taught as a laboratory module and includes experiments in the areas of analysis of stellar images, electromagnetic phenomena, electronic instrumentation, quantum physics, and other topics. Assessment is based on mastery of each attempted experiment. At the end of the semester students may work in teams on a project. Students prepare a written report and oral presentation on their project or one experiment.

## PHYS2213

### Physics 2EE

## Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures per week; one 2 hour computational laboratory per week for 10 weeks. **Prerequisites:** PHYS (1001 or 1901) and PHYS (1003 or 1902) **Prohibitions:** PHYS2203, PHYS2001, PHYS2901, PHYS2011, PHYS2911, PHYS2002, PHYS2902, PHYS2012, PHYS2912 **Assumed knowledge:** MATH (1001/1901 and 1002/1902 and 1003/1903). MATH (1005/1905) would also be useful **Assessment:** One 3 hour exam, one 1 hour computational test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

This unit of study is designed to build on the knowledge gained in Junior Physics, to provide Electrical Engineering students with the knowledge of relevant topics of Physics at the Intermediate level, and with associated skills. Completion of the unit provides a solid foundation for further studies in Electrical Engineering and related engineering areas. The aims of this unit are linked to the generic attributes required of graduates of the University in knowledge skills, thinking skills, personal skills and attributes, and practical skills.

By the end of this unit of study, students will be able to describe and apply concepts in optics, electromagnetism and basic solid state physics and technology at the intermediate level. They will be able to use computational techniques to analyze optics problems.

The major topics in this unit of study are:

Optics (13 lectures): The wave nature of light, optical phenomena and the interaction of light with matter: interference and diffraction effects; fundamental limits to resolution of optical instruments; polarisation; dispersion; coherence; These are presented within the context of several key optical technologies including lasers, CD/DVD players, optical fibre communication systems, gratings and Mach Zehnder modulation.

Electromagnetic properties of matter (12 lectures): Electric and magnetic effects in materials; the combination of electric and magnetic fields to produce light and other electromagnetic waves in vacuum and matter.

Solid State and Device Physics (13 lectures): Introduction to quantum mechanics, Fermi-Dirac statistics, electronic properties of solids (metal, semiconductors & insulators), doping and the semiconductor PN junction;

Introduction to nanotechnology; fabrication technologies, nano-imaging technologies, nanoelectronics.

Computational Physics (10 sessions of 2 hours each): In a computing laboratory students use Matlab-based simulation software to conduct virtual experiments in optics, which illustrate and extend the relevant lectures. Students also gain experience in the use of computers to solve problems in physics.

### PHYS2911

#### Physics 2A (Advanced) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1 hour lectures per week for 11 weeks; one 2 hour computational laboratory and one 3 hour laboratory per week for 9 weeks. **Prerequisites:** Credit or better in PHYS (1901 or 1001 or 1002) and Credit or better in PHYS (1902 or 1003 or 1004). **Prohibitions:** PHYS2901, PHYS2001, PHYS2011, PHYS2101, PHYS2103, PHYS2213,

PHYS2203 **Assumed knowledge:** MATH (1901/1001 and 1902/1002 and 1903/1003). MATH (1905/1005) would also be useful **Assessment:** One 2 hour exam, one 1 hour computational test, practical work, practical report and oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, B Sc (Environmental), UG Study Abroad Program.

This unit of study is designed for students with a strong interest in Physics. The lecture topics are as for PHYS2011. They are treated in greater depth and with more rigorous attention to derivations than in PHYS2011. The assessment reflects the more challenging nature of the material presented.

Computational Physics: As for PHYS2011, but at a more advanced level.

Practical: As for PHYS2011.

### PHYS3015

#### Topics in Senior Physics A Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** 40 hours per semester. **Prerequisites:** 12 credit points of Intermediate Physics **Assumed knowledge:** 6 credit points of Intermediate Mathematics **Assessment:** Exams and/or practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, UG Study Abroad Program.

This unit is normally restricted to students not majoring in Physics, giving them the flexibility to take a combination of modules that is not

offered in the standard units. Please obtain permission from the Senior Physics Coordinator.

### PHYS3025

#### Topics in Senior Physics B Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** 40 hours per semester. **Prerequisites:** 12 credit points of Intermediate Physics **Assumed knowledge:** 6 credit points of Intermediate Mathematics **Assessment:** Exams and/or practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, UG Study Abroad Program.

This unit is normally restricted to students not majoring in Physics, giving them the flexibility to take a combination of modules that is not offered in the standard units. Please obtain permission from the Senior Physics Coordinator.

### PHYS3040

#### Electromagnetism & Physics Lab Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Nineteen 1 hour lectures and twelve 4 hour practicals. **Prerequisites:** PHYS(2011 or 2911 or 2001 or 2901), PHYS(2012 or 2912 or 2002 or 2902), MATH(2061 or 2961 or 2067) **Prohibitions:** PHYS3940, PHYS3941, PHYS3011, PHYS3014, PHYS3016, PHYS3017, PHYS3911, PHYS3914, PHYS3916, PHYS3917 **Assessment:** One 1.5 hour exam, practical reports and oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The lectures cover the theory of electromagnetism, one of the cornerstones of classical physics. They introduce Maxwell's equations in their differential form, using the power of vector calculus. The main application will be to electromagnetic waves, including reflection and absorption, which have application in fields such as optics, plasma physics and astrophysics. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

#### Textbooks

Griffiths, DJ. Introduction to Electrodynamics. Third Edition.

### PHYS3051

#### Thermodynamics/Biol. Physics & Lab Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902) **Prohibitions:** PHYS3951, PHYS3052, PHYS3952, PHYS3053, PHYS3953, PHYS3055, PHYS3955, PHYS3056, PHYS3956, PHYS3057, PHYS3957, PHYS3058, PHYS3958, PHYS3059, PHYS3959 **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The lectures on Thermodynamics provide an introduction to the subject, emphasising the use of entropy, chemical potential, and free energy. They also introduce statistical mechanics, including the classical Boltzmann distribution and some quantum statistical mechanics. The Biological Physics component will cover applications of physics to biological systems, including topics such as molecular biology, structure and properties of polymers and proteins, thermodynamics of cells, transport of biomolecules, excitation of nerve impulses, and computer simulations of biological systems. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

#### Textbooks

Schroeder, DV. An Introduction to Thermal Physics. Addison-Wesley. 2000

### PHYS3052

#### Nanoscience/Thermodynamics & Lab Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902) **Prohibitions:** PHYS3952, PHYS3050, PHYS3051, PHYS3053, PHYS3056, PHYS3950, PHYS3951, PHYS3953, PHYS3956, PHYS3013, PHYS3021, PHYS3913, PHYS3921, PHYS3057, PHYS3957, PHYS3058, PHYS3958 **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Med Sc, M B, B S, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

Nanoscience is the study of the behaviour of light and matter as they interact with structures that have features on nanometre scales. This part of the course will cover the fundamental physics of nanoscience and the methods used for manipulating matter and creating structures on these scales. The lectures on Thermodynamics provide an introduction to the subject, emphasising the use of entropy, chemical potential, and free energy. They also introduce statistical mechanics, including the classical Boltzmann distribution and some quantum statistical mechanics. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

#### Nanoscience/Plasma Physics & Physics Lab Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902) **Prohibitions:** PHYS3954, PHYS3050, PHYS3950, PHYS3052, PHYS3952, PHYS3055, PHYS3955, PHYS3056, PHYS3956, PHYS3057, PHYS3957, PHYS3059, PHYS3959, PHYS3070, PHYS3970, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978 **Assumed knowledge:** Electromagnetism at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

Nanoscience is the study of the behaviour of light and matter as they interact with structures that have features on nanometre scales. This part of the course will cover the fundamental physics of nanoscience and the methods used for manipulating matter and creating structures on these scales. Plasma Physics is the study of ionised gases, which are collections of charged and neutral particles and form the main constituent of the Universe. The lectures cover the properties of plasmas and their applications, including nuclear fusion energy, materials synthesis and modification, environmental remediation, aerospace, nano and biomedical technologies. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

#### Nanoscience/Thermodynamic/Biol.Phys Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Fifty-seven 1 hour lectures. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902) **Prohibitions:** PHYS3957, PHYS3050, PHYS3950, PHYS3051, PHYS3951, PHYS3052, PHYS3952, PHYS3053, PHYS3953, PHYS3054, PHYS3954, PHYS3055, PHYS3955, PHYS3056, PHYS3956, PHYS3058, PHYS3958, PHYS3059, PHYS3959 **Assessment:** One 3 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

Nanoscience is the study of the behaviour of light and matter as they interact with structures that have features on nanometre scales. This part of the course will cover the fundamental physics of nanoscience and the methods used for manipulating matter and creating structures on these scales. The lectures on Thermodynamics provide an introduction to the subject, emphasising the use of entropy, chemical potential, and free energy. They also introduce statistical mechanics, including the classical Boltzmann distribution and some quantum statistical mechanics. The Biological Physics component will cover applications of physics to biological systems, including topics such as molecular biology, structure and properties of polymers and proteins, thermodynamics of cells, transport of biomolecules, excitation of nerve impulses, and computer simulations of biological systems.

### PHYS3059

#### Plasma/Thermodynamics/Biol. Physics Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Fifty-seven 1 hour lectures. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902) **Prohibitions:** PHYS3959, PHYS3051, PHYS3951, PHYS3052, PHYS3952, PHYS3053, PHYS3953, PHYS3054, PHYS3954, PHYS3055, PHYS3955, PHYS3056, PHYS3956, PHYS3057, PHYS3957, PHYS3058, PHYS3958, PHYS3070, PHYS3970, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978 **Assumed knowledge:** Electromagnetism at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 3 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

Plasma Physics is the study of ionised gases, which are collections of charged and neutral particles and form the main constituent of the Universe. The lectures cover the properties of plasmas and their applications, including nuclear fusion energy, materials synthesis and modification, environmental remediation, aerospace, nano and biomedical technologies. The lectures on Thermodynamics provide

an introduction to the subject, emphasising the use of entropy, chemical potential, and free energy. They also introduce statistical mechanics, including the classical Boltzmann distribution and some quantum statistical mechanics. The Biological Physics component will cover applications of physics to biological systems, including topics such as molecular biology, structure and properties of polymers and proteins, thermodynamics of cells, transport of biomolecules, excitation of nerve impulses, and computer simulations of biological systems.

### PHYS3060

#### Quantum Mechanics & Physics Lab Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Nineteen 1 hour lectures and six 4 hour practicals. **Prerequisites:** PHYS(2011 or 2911 or 2001 or 2901); PHYS(2012 or 2912 or 2002 or 2902); MATH(2061 or 2961 or 2067) **Prohibitions:** PHYS3960, PHYS3961, PHYS3011, PHYS3024, PHYS3026, PHYS3027, PHYS3911, PHYS3924, PHYS3926, PHYS3927 **Assessment:** One 1.5 hour exam, practical reports and oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The lectures cover the fundamental concepts and formalism of quantum dynamics, and the application to angular momentum and symmetry in quantum mechanics. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

Eisberg, R and Resnick, R. Quantum Physics of Atoms, Molecules, Solids, Nuclei, and Particles. Second Edition.

### PHYS3062

#### Quantum/Cond Matter Physics & Lab Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures plus six 4 hour practicals **Prerequisites:** PHYS2012 or PHYS2912 **Prohibitions:** PHYS3060, PHYS3960, PHYS3961, PHYS3962, PHYS3068, PHYS3968, PHYS3070, PHYS3970, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981 **Assessment:** one 1.5 hour exam, one 1hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit of study is intended for students majoring in Nanoscience and Technology. It should not be taken by students majoring in Physics. The lectures on Quantum Mechanics cover the fundamental concepts and formalism of quantum dynamics, and the application to angular momentum and symmetry in quantum mechanics. The lectures on Condensed Matter Physics cover the theoretical underpinning and properties of condensed matter, specifically the physics of solids. Semiconductors are investigated in detail, considering recent discoveries and new developments in nanotechnology and lattice dynamics. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

Eisberg, R and Resnick, R. Quantum Physics of Atoms, Molecules, Solids, Nuclei, and Particles. Second Edition.

### PHYS3068

#### Optics/Cond. Matter & Lab Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902) **Prohibitions:** PHYS3968, PHYS3050, PHYS3950, PHYS3053, PHYS3953, PHYS3056, PHYS3956, PHYS3058, PHYS3958, PHYS3062, PHYS3962, PHYS3069, PHYS3969, PHYS3070,

PHYS3970, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assumed knowledge:** Electromagnetism and Quantum Mechanics at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The lectures on Optics introduce students to modern optics, using the laser to illustrate the applications in studying the properties of matter and many important optical phenomena. The lectures on Condensed Matter Physics cover the theoretical underpinning and properties of condensed matter, specifically the physics of solids. Semiconductors are investigated in detail, considering recent discoveries and new developments in nanotechnology and lattice dynamics. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

### PHYS3069

#### Optics/High Energy Physics & Lab Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902); PHYS (2013 or 2913 or 2001 or 2901) **Prohibitions:** PHYS3969, PHYS3050, PHYS3950, PHYS3053, PHYS3953, PHYS3056, PHYS3956, PHYS3058, PHYS3958, PHYS3068, PHYS3968, PHYS3071, PHYS3971, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3076, PHYS3976, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assumed knowledge:** Electromagnetism at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The lectures on Optics introduce students to modern optics, using the laser to illustrate the applications in studying the properties of matter and many important optical phenomena. The lectures on High Energy Physics cover the basic constituents of matter, such as quarks and leptons, examining their fundamental properties and interactions, and their origin at the creation of the universe. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

### PHYS3071

#### High Energy/Astrophysics & Lab Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902); PHYS (2013 or 2913 or 2001 or 2901) **Prohibitions:** PHYS3971, PHYS3069, PHYS3969, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The lectures on High Energy Physics cover the basic constituents of matter, such as quarks and leptons, examining their fundamental properties and interactions, and their origin at the creation of the universe. The lectures on Astrophysics explore astrophysical environments inside stars and beyond (e.g. the interstellar medium, the intergalactic medium and galaxies themselves) and focus on one of the most important physical processes in astrophysics: the transport of radiative energy. In the practical laboratory classes, students will

choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

### PHYS3074

#### High Energy/Cond. Matter Physics & Lab Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902); PHYS (2013 or 2913 or 2001 or 2901) **Prohibitions:** PHYS3974, PHYS3062, PHYS3962, PHYS3068, PHYS3968, PHYS3069, PHYS3969, PHYS3070, PHYS3970, PHYS3071, PHYS3971, PHYS3073, PHYS3973, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assumed knowledge:** Quantum Mechanics at Senior Physics level; MATH (2061 or 2961) **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

Plasma Physics is the study of ionized gases, which are collections of charged and neutral particles and form the main constituent of the Universe. The lectures cover the properties of plasmas and their applications, including nuclear fusion energy, materials synthesis and modification, environmental remediation, aerospace, nano- and biomedical technologies. The lectures on High Energy Physics cover the basic constituents of matter, such as quarks and leptons, examining their fundamental properties and interactions, and their origin at the creation of the universe. *Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### PHYS3915 Topics in Senior Physics A (Advanced) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** 40 hours per semester **Prerequisites:** 12 credit points of Intermediate Physics. **Assumed knowledge:** 6 credit points of Intermediate Mathematics **Assessment:** Exams and/or laboratory reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, UG Study Abroad Program.

This unit of study covers the same topics as PHYS3015, with some more challenging material.

### PHYS3925 Topics in Senior Physics B (Advanced) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** 40 hours per semester **Prerequisites:** 12 credit points of Intermediate Physics with a Credit average and 6 credit points of Intermediate Mathematics. **Assessment:** Exams and/or laboratory reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Ed, B Sc (Psych), B Sc, UG Study Abroad Program.

This unit of study covers the same topics as PHYS3025, with some more challenging material.

### PHYS3940 Electromagnetism & Physics Lab (Adv) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Nineteen 1 hour lectures and twelve 4 hour practicals. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with a grade of at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with a grade of at least Credit; MATH (2061 or 2961 or 2067) **Prohibitions:** PHYS3040, PHYS3941, PHYS3011, PHYS3014, PHYS3016, PHYS3017, PHYS3911, PHYS3914, PHYS3916, PHYS3917 **Assessment:** One 1.5 hour exam, practical reports and oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3040, but with greater depth and some more challenging material.

*Textbooks*  
Griffiths, DJ. Introduction to Electrodynamics. Third Edition.

### PHYS3941 Electromagnetism & Special Project (Adv) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Nineteen 1 hour lectures, 4 hours per week with a research group. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; MATH (2061 or 2961 or 2067) **Prohibitions:** PHYS3040, PHYS3940, PHYS3961, PHYS3011, PHYS3911, PHYS3918, PHYS3928 **Assessment:** One 1.5 hour exam, project report and talk **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Approval for this unit must be obtained from the School of Physics Senior Coordinator.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The lectures cover the theory of electromagnetism, one of the cornerstones of classical physics. They introduce Maxwell's equations in their differential form, using the power of vector calculus. The main application will be to electromagnetic waves, including reflection and absorption, which have application in fields such as optics, plasma physics and astrophysics. The project is carried out in a research group within the School of Physics, working on a research experiment or theoretical project supervised by a researcher. The aim is for students to acquire an understanding of the nature of research, to apply their knowledge of physics and scientific practice, and to serve as preparation for a research project at Honours level and beyond.

*Textbooks*  
Griffiths, DJ. Introduction to Electrodynamics. Third Edition.

### PHYS3951 Thermodynamics/Biol. Physics & Lab (Adv) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit **Prohibitions:** PHYS3951, PHYS3052, PHYS3952, PHYS3053, PHYS3953,

PHYS3055, PHYS3955, PHYS3056, PHYS3956, PHYS3057, PHYS3957, PHYS3058, PHYS3958, PHYS3059, PHYS3959 **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3051, but with greater depth and some more challenging material.

This unit covers the same topics as PHYS3059, but with greater depth and some more challenging material.

#### Textbooks

Schroeder, DV. An Introduction to Thermal Physics. Addison-Wesley. 2000

### PHYS3960

#### Quantum Mechanics & Physics Lab (Adv)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Nineteen 1 hour lectures and twelve 4 hour practicals **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; MATH (2061 or 2961 or 2067) **Prohibitions:** PHYS3060, PHYS3961, PHYS3011, PHYS3024, PHYS3026, PHYS3027, PHYS3911, PHYS3924, PHYS3926, PHYS3927 **Assessment:** One 1.5 hour exam, practical reports and oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3060, but with greater depth and some more challenging material.

#### Textbooks

Liboff, RL. Introductory Quantum Mechanics. Fourth Edition.

### PHYS3961

#### Quantum Mechanics & Special Project(Adv)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Nineteen 1 hour lectures and 4 hours per week with a research group. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; MATH (2061 or 2961 or 2067) **Prohibitions:** PHYS3060, PHYS3960, PHYS3941, PHYS3011, PHYS3911, PHYS3918, PHYS3928 **Assessment:** One 1.5 hour exam, project report and oral presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Approval for this unit must be obtained from the School of Physics Senior Coordinator*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The lectures cover the fundamental concepts and formalism of quantum dynamics, and the application to angular momentum and symmetry in quantum mechanics. The project is carried out in a research group within the School of Physics, working on a research experiment or theoretical project supervised by a researcher. The aim is for students to acquire an understanding of the nature of research, to apply their knowledge of physics and scientific practice, and to serve as preparation for a research project at Honours level and beyond.

*Textbooks*

Liboff, RL. Introductory Quantum Mechanics. Fourth Edition.

### PHYS3962

#### Quantum/Cond Matter Physics & Lab (Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures plus six 4 hour practicals **Prerequisites:** PHYS2012 or PHYS2912 with result of credit or better **Prohibitions:** PHYS3060, PHYS3960, PHYS3961, PHYS3062, PHYS3068, PHYS3968, PHYS3070, PHYS3970, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981 **Assessment:** One 1.5 hour exam, one 1 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit of study is intended for students majoring in Nanoscience and Technology. It should not be taken by students majoring in Physics. This unit of study covers the same topics as PHYS3062, but with greater depth and some more challenging material.

*Textbooks*

Liboff, RL. Introductory Quantum Mechanics. Fourth Edition.

### PHYS3968

#### Optics/Cond. Matter & Lab (Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit **Prohibitions:** PHYS3068, PHYS3050, PHYS3950, PHYS3053, PHYS3953, PHYS3056, PHYS3956, PHYS3058, PHYS3958, PHYS3062, PHYS3962, PHYS3069, PHYS3969, PHYS3070, PHYS3970, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assumed knowledge:** Electromagnetism and Quantum Mechanics at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3068, but with greater depth and some more challenging material.

### PHYS3969

#### Optics/High Energy Physics & Lab (Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit **Prohibitions:** PHYS3069, PHYS3050, PHYS3950, PHYS3053, PHYS3953, PHYS3056, PHYS3956, PHYS3058, PHYS3958, PHYS3068, PHYS3968, PHYS3071, PHYS3971, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3076, PHYS3976, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assumed knowledge:** Electromagnetism at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed

(Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3069, but with greater depth and some more challenging material.

### PHYS3971

#### High Energy/Astrophysics & Lab (Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit **Prohibitions:** PHYS3071, PHYS3069, PHYS3969, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3071, but with greater depth and some more challenging material.

### PHYS3974

#### High Energy/Cond. Matter Phys.& Lab(Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Thirty-eight 1 hour lectures and six 4 hour practicals. **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit ; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit **Prohibitions:** PHYS3074, PHYS3062, PHYS3962, PHYS3068, PHYS3968, PHYS3069, PHYS3969, PHYS3070, PHYS3970, PHYS3071, PHYS3971, PHYS3073, PHYS3973, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assumed knowledge:** Quantum Mechanics at Senior Physics level; MATH (2061 or 2961) **Assessment:** One 2 hour exam, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3074, but with greater depth and some more challenging material.

### PHYS3979

#### Cond. Matter/High Energy/Astrophys (Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Fifty-seven 1 hour lectures **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit **Prohibitions:** PHYS3079, PHYS3062, PHYS3962, PHYS3068, PHYS3968, PHYS3069, PHYS3969, PHYS3070, PHYS3970, PHYS3071, PHYS3971, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assumed knowledge:** Quantum Mechanics at Senior Physics level; MATH (2061 or 2961) **Assessment:** One 3 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3079, but with greater depth and some more challenging material.

### PHYS3980

#### Optics/Cond.Matter/High Energy Phys(Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Fifty-seven 1 hour lectures **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit **Prohibitions:** PHYS3080, PHYS3050, PHYS3950, PHYS3053, PHYS3953, PHYS3056, PHYS3956, PHYS3058, PHYS3958, PHYS3062, PHYS3962, PHYS3068, PHYS3968, PHYS3069,

PHYS3969, PHYS3070, PHYS3970, PHYS3071, PHYS3971, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3081, PHYS3981, PHYS3082, PHYS3982 **Assumed knowledge:** Electromagnetism and Quantum Mechanics at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 3 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3080, but with greater depth and some more challenging material.

### PHYS3981

#### Optics/Cond. Matter/Astrophysics (Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Fifty-seven 1 hour lectures **Prerequisites:** PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit **Prohibitions:** PHYS3081, PHYS3050, PHYS3950, PHYS3053, PHYS3953, PHYS3056, PHYS3956, PHYS3058, PHYS3958, PHYS3062, PHYS3962, PHYS3068, PHYS3968, PHYS3069, PHYS3969, PHYS3070, PHYS3970, PHYS3071, PHYS3971, PHYS3072, PHYS3972, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3082, PHYS3982 **Assumed knowledge:** Electromagnetism and Quantum Mechanics at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 3 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3081, but with greater depth and some more challenging material.

### PHYS3982

#### Optics/High Energy/Astrophysics (Adv) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Fifty-seven 1 hour lectures **Prerequisites:** PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit **Prohibitions:** PHYS3082, PHYS3050, PHYS3950, PHYS3053, PHYS3953, PHYS3056, PHYS3956, PHYS3058, PHYS3958, PHYS3068, PHYS3968, PHYS3069, PHYS3969, PHYS3071, PHYS3971, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981 **Assumed knowledge:** Electromagnetism at Senior Physics level; MATH (2061 or 2961 or 2067) **Assessment:** One 3 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

This unit covers the same topics as PHYS3082, but with greater depth and some more challenging material.

### PHYS4011

#### Physics Honours A Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B S T (Hons), B Sc (Hons).

Students enrolled in the Honours programs study various advanced aspects of Physics. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

### PHYS4012

#### Physics Honours B

### Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** PHYS4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons).

See PHYS4011

### PHYS4013

#### Physics Honours C Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** PHYS4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons).

See PHYS4011

### PHYS4014

#### Physics Honours D Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** PHYS4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons).

See PHYS4011

### PLNT2001

#### Plant Biochemistry and Molecular Biology Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Meredith Wilkes, Prof Les Copeland, Dr Rosanne Quinell **Session:** Semester 1 **Classes:** 2-3 lec/week, 32 hrs total; tutorials: 5 hrs total; laboratories: 36 hrs total **Prerequisites:** 12 credit points of Junior Chemistry and 12 credit points of Junior Biology (or with the Dean's permission BIOL1201 and BIOL1202) **Prohibitions:** PLNT2901, AGCH2001 **Assessment:** One 2hr exam, practical reports, practical quizzes, theory of practical exam, 400 word writing assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc Agr, UG Study Abroad Program.

This unit of study is designed to develop an understanding of the molecular principles that underlie the structure and function of plants and how these principles relate to the use of plants by humans as a source of food and fibre.

The unit is a core unit for BScAgr and BHortSc students and an elective for BSc and other degree programs. It recognizes the specialized nature of plant biochemistry and molecular biology and is a platform for students who wish to gain a sound knowledge of plant growth and development.

This unit covers the biochemistry of the main carbohydrate, lipid, protein and nucleic acid constituents of plants, metabolic pathways that regulate plant growth and development, the mobilization and deposition of storage reserves, storage and expression of genetic information and plant responses to environmental influences. The role of molecular biology in the manipulation of plant growth and development will also be explored.

At the completion of this unit students will be able to demonstrate theoretical knowledge of the biochemical structure and function of plants and how molecular biology can enhance our use of plants as food and fibres. Students will also be able to demonstrate abilities in the practice of laboratory methods used to analyse plants and the effective communication of experimental findings.

Students enrolled in this unit will gain research and enquiry skills through attendance at lectures and participation in laboratory classes and tutorials, information literacy and communication skills through the synthesis of information used to prepare practical reports, social and professional understanding by participation in groupwork and assessments that seek to understand the role of agriculture in the broader community.

*Textbooks*

No recommended text. A study guide/laboratory manual will be available for purchase from the Copy Centre during the first week of semester. Lecture notes and readings will be available through WebCT.

## PLNT2002

### Aust Flora: Ecology and Conservation Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Glenda Wardle, Dr Murray Henwood.  
**Session:** Semester 1 **Classes:** (2 hrs lec & 3 hrs prac)/wk, audiovisual.  
**Prerequisites:** 6 credit points of a Junior unit of study **Prohibitions:** PLNT2902  
**Assessment:** One 2-hr exam (40%), laboratory reports (20%) herbarium (20%), one 2-hr practical exam (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc Agr, UG.

This unit provides a broad understanding of the evolution, classification and diversity of terrestrial plants, and the principles of plant ecology in an Australian context. The major types of Australian vegetation are discussed across a range of temporal and spatial scales, and their current distribution related to their environment and origins. Selected contemporary issues in plant conservation from Australian natural and managed systems are explored. There is a strong emphasis on practical skills such as phylogenetic inference, plant identification and the collection and analysis of ecological data. The practical component of the unit of study uses examples taken from the Australian flora (including plants of horticultural significance) and major crop plants. Important elements of this unit are half-day field trips to the Royal National Park, and the construction of student herbaria. The practical sessions and interactions with staff encourage students to develop their own learning style and enhance a strong sense of self-reliance. Critical thinking, effective communication and other vocational and generic skills are emphasized. The content is well suited to students with interests in botany, plant science and ecology, and is often combined with units of study offered through the School of Biological Sciences and the Faculty of Agriculture, Food and Natural Resources. This unit of study also complements a wide range of units of study from: science (e.g. plant science, earth and environmental science, animal science, bioinformatics, molecular and cell biology, genetics and biotechnology); agriculture (e.g. horticulture, land and water science, and natural resources); and broader disciplines (e.g. education, arts, and environmental law).

#### Textbooks

A Laboratory Manual for the unit will be available for purchase from the Copy Centre during the first week of Semester.

## PLNT2003

### Plant Form and Function Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Robyn Overall, Dr Lindsay Campbell **Session:** Semester 2 **Classes:** 24 lectures; 10 tutorials; 8 x 2 hr and 2x3hr labs; 2x6 hr field trips **Prohibitions:** PLNT2903, BIOL2003, BIOL2903, CROP2001 **Assumed knowledge:** 12 credit points of Junior Biology, or equivalent eg BIOL (1001 or 1101 or 1901 or 1911) and BIOL (1002 or 1902 or 1003 or 1903) **Assessment:** One 2hr theory exam (40%), prac exam (20%), anatomy project (10%), quizzes (5%), physiology report (10%), field report (15%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc Agr, UG.

This unit of study investigates the structure of cells, tissues and organs of flowering plants and relates them to function. Topics include; how photosynthesis, translocation, water transport and nutrition relate to the structures that carry out these processes. Most of the information on plant structure will be provided in self-instructional audio-visual sessions augmented by small group discussions. This is integrated with experiments carried out in the laboratory or on field excursions to investigate the physiological aspects of plant structures. There is a focus on recent advances in plant molecular biology where they have been critical in enhancing our understanding of the form and function of plants. The physiological and anatomical responses of

plants to extreme environments such as drought and salinity will also be addressed. Attention will be paid to the anatomy and physiology of crop, horticultural and Australian native plants. This unit of study complements Plant Biochemistry and Molecular Biology, Australian Flora: ecology and conservation and Cell Biology and leads onto senior units of study in plant sciences, including Plant Growth and Development. It is essential for those seeking a career in plant molecular biology.

## PLNT2901

### Plant Biochem & Molecular Biology (Adv) Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Meredith Wilkes, Prof Les Copeland, Dr Rosanne Quinell **Session:** Semester 1 **Classes:** 2-3 lec/week, 32 hrs total; tutorials: 5 hrs total; research project: 36 hrs total **Prerequisites:** A Distinction average in 12 credit points of Junior Chemistry and 12 credit points of Junior Biology (or with the Dean's permission BIOL1201 and BIOL1202) **Prohibitions:** PLNT2001, AGCH2001 **Assessment:** One 2hr exam, practical report, 400 word writing assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc Agr, UG Study Abroad Program.

This unit of study is designed to develop an understanding of the molecular principles that underlie the structure and function of plants and how these principles relate to the use of plants by humans as a source of food and fibre.

This unit is offered at an advanced level and is available to students in BScAgr, BHortSc, BSc and other degree programs. This unit recognizes the specialized nature of plant biochemistry and is of interest to students who wish to gain a more advanced knowledge of plant growth and development.

This unit covers the biochemistry of the main carbohydrate, lipid, protein and nucleic acid constituents of plants, metabolic pathways that regulate plant growth and development, the mobilization and deposition of storage reserves, storage and expression of genetic information and plant responses to environmental influences. The role of molecular biology in the manipulation of plant growth and development will also be explored.

At the completion of this unit students will be able to demonstrate theoretical knowledge of the biochemical structure and function of plants and how molecular biology can enhance our use of plants as food and fibres. Students will also be able to demonstrate abilities in the practice of laboratory methods used to analyse plants and the effective communication of experimental findings by completing a short research project.

Students enrolled in this unit will gain research and enquiry skills through attendance at lectures and tutorials and by completing a small research project and information literacy and communication skills through the synthesis of information used to prepare a report on the findings of the research project.

#### Textbooks

No recommended text. A study guide/laboratory manual will be available for purchase from the Copy Centre during the first week of semester. Lecture notes and readings will be available through WebCT.

## PLNT2902

### Aust Flora: Ecology & Conservation (Adv) Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Glenda Wardle, Dr Murray Henwood **Session:** Semester 1 **Classes:** (2 lec & 3 prac)/wk, audiovisual **Prerequisites:** Distinction average in 6 credit points of Junior units of study **Prohibitions:** PLNT2002 **Assumed knowledge:** The contents of BIOL(1002 or 1902) is assumed knowledge. Students wishing to enroll in Intermediate Biology (BIOL)

and Plant Science (PLNT) units of study using BIOL(1003 or 1903) will need to do some preparatory reading **Assessment:** One 2-hr exam (40%), laboratory reports (20%) research project (20%), one 2-hr practical exam (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc Agr, UG Study Abroad Program.

Qualified students will participate in alternative components of PLNT2002. The content and nature of these components may vary from year to year. See prerequisites for Senior units of study in Biology.

#### Textbooks

A Laboratory Manual for the unit will be available for purchase from the Copy Centre during the first week of Semester.

### PLNT2903

#### Plant Form and Function (Advanced)

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Robyn Overall, Dr Lindsay Campbell **Session:** Semester 2 **Classes:** 24 lectures; 10 tutorials; 8 x 2 hr and 2x3hr labs; 2x6 hr field trips **Prohibitions:** PLNT2003, BIOL2003, BIOL2903, CROP2001 **Assumed knowledge:** 12 credit points of Junior Biology, or equivalent eg BIOL (1001 or 1101 or 1901 or 1911) and BIOL (1002 or 1902 or 1003 or 1903) **Assessment:** One 2hr theory exam (40%), prac exam (20%), research project oral and written presentation (25%), field report (15%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc Agr, UG Study Abroad Program.

The content will be based on PLNT2003 but qualified students will participate in alternative components at a more advanced level. The content and nature of these components may vary from year to year.

### PLNT3001

#### Plant, Cell and Environment

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Rosanne Quinell, A/Prof Robyn McConchie, Dr Charles Warren **Session:** Semester 2 **Classes:** Workshops and discussions 2 hr/wk; laboratories: alternate weeks 30 hr total (6 pracs; 5 hr each) **Prerequisites:** 12 credit points of Intermediate Biology, Plant Science, Molecular Biology and Genetics or equivalent **Prohibitions:** PLNT3901 **Assessment:** One 2hr exam, 3 reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biotechnology), B Sc Agr, UG Study Abroad Program.

This unit of study of comprises workshops and practical sessions that will be guided largely by current directions in plant science research in Australia. Three theme areas will be identified and used to direct the workshops and discussions conducted throughout the semester. We expect students to be able to span levels of plant organisation: molecular, cellular, tissues, organs, whole organism physiology and ecology. Theme areas for discussion will consider the Australian flora and the areas currently under investigation at the University of Sydney such as post-harvest physiology. Students will need to draw on knowledge from Intermediate units of study and will be expected to explore in the published literature in order to successfully integrate information from areas unfamiliar to themselves so as to participate in workshops and discussions. This unit of study provides opportunities for students to develop their skills in research and enquiry, information literacy, and communication.

The practical component of this unit of study has sufficient flexibility for students to design their own group experiments to answer questions raised during the workshops. A range of equipment for

student experiments will be available including: pulse amplitude modulated (PAM) fluorometer; oxygen electrodes; Scholander bomb, gel electrophoresis (PAGE).

The purpose of this Unit of Study is to develop an understanding of current directions in Plant Science at an advanced level.

When you have successfully completed this unit of study, you should be able to:

be familiar with modern approaches of physiology, biophysics and molecular biology in the study of plant function;

understand how domains of knowledge interact to describe plant function;

understand how plants function in stressful environments;

carryout a small research project;

draft a manuscript for publication in a peer-reviewed journal.

#### Textbooks

Students will be drawing on the current research literature for content. A Study Guide for the unit will be available for purchase during the first week of semester from the Copy Centre at a cost to be advised.

### PLNT3002

#### Plant Growth and Development

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Jan Marc (Executive Officer), Prof Robyn Overall, Prof David Guest, Dr Lindsay Campbell **Session:** Semester 2 **Classes:** 2-3 lec per wk, one 4 hr practical (6 weeks only), one 3 hr presentation of research project in week 13 **Prerequisites:** 12 credit points of intermediate PLNT, BIOL, AGCH or CROP units of study including at least one of PLNT2001, PLNT2901, PLNT2003, PLNT2903, BIOL2016, BIOL2916, BIOL2003, BIOL2903, BIOL2006, BIOL2906, CROP2001, AGCH2002 or equivalent **Prohibitions:** PLNT3902, BIOL3021, BIOL3931 **Assessment:** One 2 hr exam (60%), project presentation and report (20%), laboratory quizzes, report and book (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

This unit explores the fundamental mechanisms underlying plant growth and development from seed to maturity. It builds on the knowledge gained in intermediate units in biology and plant sciences. The unit covers the process of building the plant body from embryogenesis, development and operation of meristems, polarity, patterning, control of flowering and fruit development to programmed cell death and senescence. Students will investigate the role of hormonal signals in coordinating plant growth and development, and the cellular and molecular mechanisms underlying plant responses to environmental signals such as gravity, light, and salinity. Students will explore aspects of recent plant molecular biology that have been critical in enhancing our current understanding of plant growth and development, using examples from crop, horticultural and native plants as well as the model plant Arabidopsis. Lectures are augmented by experimental work in which students will identify fundamental mechanisms in plant development using plant tissue culture, protoplast production and modern cell biological techniques. Students will be able to articulate novel findings by conducting an independent research project. An excursion to the ANU and the CSIRO Plant Industry in Canberra will provide an opportunity to explore world-class research facilities for plant molecular biology. The students will gain research and inquiry skills through individual and group-based projects, communication skills through group discussions and laboratory reports, and presentation skills and personal and intellectual autonomy through working in groups. This unit of study complements other senior units of study in the Plant Science Major and is essential for those seeking a career in plant molecular biology.

**PLNT3003****Systematics and Evolution of Plants Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Murray Henwood **Session:** Semester 1 **Classes:** 2 lectures, one 3 hour practical per week, 2-day field-trip. **Prerequisites:** 6 credit points of any Intermediate unit of study from BIOL, PLNT, LWSC, HORT, GEOS, GEOG, ENVI, SOIL. **Prohibitions:** PLNT3903, BIOL3015/3915. **Assessment:** One 2 hr take-home exam (45%), oral presentation (5%), nomenclature exercise (15%), research project (35%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Adv), M B, B S, B Sc Agr, UG Study Abroad Program.

This unit of study introduces students to the practical aspects of Plant Systematics and Evolution. Students will gain a working knowledge of the general techniques and approaches used in Plant Systematics (including an understanding of plant taxonomy, phylogenetics and evolutionary processes). A range of data sources (nucleotide sequences and morphology) will be used to address questions concerning the evolution, classification and historical biogeography of various plant groups. A two-day field trip will provide tuition in plant identification and an opportunity to acquire skills in field-botany. This unit of study is recommended for students with an interest in the areas of: botany, plant science, horticulture, fungal biology (including plant pathology), environmental science, bioinformatics and ecology. It is often combined with units of study offered through the School of Biological Sciences and the Faculty of Agriculture, Food and Natural Resources.

**PLNT3902****Plant Growth and Development (Advanced) Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jan Marc (Executive Officer), Prof Robyn Overall, Prof David Guest, Dr Lindsay Campbell **Session:** Semester 2 **Classes:** 2-3 lec per wk, one 4 hr practical (6 weeks only), one 3 hr presentation of research project in week 13 **Prerequisites:** 12 credit points of intermediate PLNT, BIOL, AGCH or CROP units of study including at least one of PLNT2001, PLNT2901, PLNT2003, PLNT2903, BIOL2016, BIOL2916, BIOL2003, BIOL2903, BIOL2006, BIOL2906, CROP2001, AGCH2002 or equivalent. These requirements may be varied and students with lower averages should consult the unit Executive Officer. **Prohibitions:** PLNT3002, BIOL3021, BIOL3931 **Assessment:** One 2 hr exam (60%), project presentation and report (20%), laboratory quizzes and book (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

Qualified students will participate in alternative components of PLNT3002 Plant Growth and Development, representing 30% of the total assessment, as follows: the students will be exempt from one standard laboratory report and the standard independent group project. Instead, the students will conduct an advanced independent individual practical or theoretical research project under the supervision of a member of the academic staff. The program includes a formal presentation of the results of the project in verbal and written reports.

Same as PLNT3003.

**PPAT3003****Plant Disease****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Prof David Guest **Session:** Semester 1 **Classes:** (2 lec, 3 hr prac)/wk **Prerequisites:** MICR2024 **Assessment:** One 2hr end of semester exam (60%), one prac exam (25%), six take-home quizzes (15%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

This unit introduces plant disease and the pathogens that limit agricultural and horticultural production. The unit is core to the BScAgr and BHortSc degrees and is available as an elective to BLWS and BSc students. It builds on the material introduced in MICR2024. The lecture component of the unit discusses the aetiology of plant disease and symptom development; diagnosis of plant disease; the biology, epidemiology and management of fungi and other microbes that cause plant disease; breeding for disease resistance; plant-parasite relationships; and disease resistance in plants. The practical component introduces techniques used in handling and identifying fungi and in studying plant disease, and develops skills in experimental design, execution and interpretation of experimental data. At the completion of this unit, students will be able to exercise problem-solving skills (developed through practical experiments and lecture discussions), think critically, and organise knowledge (from consideration of the lecture material and preparation of practical reports), expand from theoretical principles to practical explanations (through observing and reporting on practical work), use certain computer software for analysing data and reporting on laboratory projects. Students learn to work in a research team, plan effective work schedules (to meet deadlines for submission of assessable work), use statistical analysis in research, keep appropriate records of laboratory research, work safely in a research laboratory and operate a range of scientific equipment. Students will gain research and inquiry skills through research based group projects, information literacy and communication skills through assessment tasks and personal and intellectual autonomy through working in groups.

#### Advanced Mycology and Plant Pathology Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Prof David Guest **Session:** Semester 1 **Classes:** (2 tut, 3 hrs prac)/wk **Prerequisites:** PPAT3003 **Assessment:** Two hour end of semester exam (70%), 1500-word review paper (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

This unit investigates evolution, systematics, taxonomy and biology of fungi and their role as plant pathogens; plant disease epidemiology and understanding fungal populations; infection processes and plant defence. The unit is an elective for BScAgr, BHortSc and BSc students. It builds on the material introduced in PPAT3003 and BIOL3017. Undertaking this unit will develop skills in isolating and identifying plant pathogenic fungi, diagnosing plant diseases, designing, conducting and analysing experiments. At the completion of this unit, students will be able to exercise problem-solving skills (developed through practical experiments, projects and tutorial discussions), think critically, and organise knowledge (from consideration of the lecture material and preparation of project reports), and expand from theoretical principles to practical explanations (through observing and reporting on project work). Students will consolidate their teamworking skills, develop self-directed study skills and plan effective work schedules, use statistical analysis in research, keep appropriate records of laboratory research, work safely in a research laboratory and operate a range of scientific equipment. Students will gain research and inquiry skills through individual and group research projects, information literacy and communication skills through assessment tasks and personal and intellectual autonomy through working in groups.

### PPAT4005

#### Soil Biology Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Prof David Guest **Session:** Semester 1 **Classes:** (2 tut, 3 hrs prac)/wk **Prerequisites:** MICR2024 or 6cp intermediate microbiology **Assessment:** Tutorial papers (30%), project proposal (10%), project report (50%), peer review (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

This unit investigates the diversity of organisms living in the soil, their biology, interactions and ecology, and their roles in maintaining and improving soil function. The unit is an elective for BScAgr, BHortSc and BSc students. It builds on the material introduced in MICR2024, PPAT3003 and BIOL3017. Undertaking this unit will develop skills in monitoring soil microbes, designing, conducting and analysing experiments. At the completion of this unit, students will be able to exercise problem-solving skills (developed through practical experiments, projects and tutorial discussions), think critically, and organise knowledge (from consideration of the lecture material and preparation of project reports), and expand from theoretical principles to practical explanations (through observing and reporting on project work). Students will consolidate their teamworking skills, develop self-directed study skills and plan effective work schedules, use statistical analysis in research, keep appropriate records of laboratory research, work safely in a research laboratory and operate a range of scientific equipment. Students will gain research and inquiry skills through group research projects, information literacy and communication skills through assessment tasks and personal and intellectual autonomy through working in groups.

#### Percussion Ensemble 1 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Daryl Pratt **Session:** Semester 1, Semester 2 **Classes:** 2hr rehearsal/wk **Corequisites:** Enrolment in one of Percussion 1-8 or Percussion 1 - 8 (Major) **Assessment:** Demonstrated personal commitment to improve skills, weekly preparation and disciplined and cooperative behaviour (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B A, B Mus Studies, B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Percussion Ensemble 1 provides the opportunity for Percussion students to study, workshop, rehearse and perform works ranging from small chamber pieces to large conducted works for percussion. The repertoire, focusing on 20th and 21st century pieces, may also include transcriptions arranged for percussion. Students will be introduced to the essential aspects of ensemble playing including rehearsal techniques, pre-rehearsal preparations, musical issues such as ensemble coordination, balance, rhythm and sound, public performance skills and program development and design. Students may be required to perform with the Sydney Conservatorium of Music Percussion Ensemble in public concerts.

### PRCN1003

#### Percussion Ensemble 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Daryl Pratt **Session:** Semester 1, Semester 2 **Classes:** 2hr rehearsal/wk **Prerequisites:** PRCN1002 Percussion Ensemble 1 **Corequisites:** Enrolment in one of Percussion 1-8 or Percussion 1 - 8 (Major) **Assessment:** Demonstrated personal commitment to improve skills, weekly preparation and disciplined and cooperative behaviour (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B A, B Mus Studies, B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Percussion Ensemble 2 provides the opportunity for Percussion students to study, workshop, rehearse and perform works ranging from small chamber pieces to large conducted works for percussion. The repertoire, focusing on 20th and 21st century pieces, may also include transcriptions arranged for percussion. Building on foundations established in Percussion Ensemble 1, students will continue the development of essential aspects of ensemble playing including rehearsal techniques, pre-rehearsal preparations, musical issues such as ensemble coordination, balance, rhythm and sound, public performance skills and program development and design. Students may be required to perform with the Sydney Conservatorium of Music Percussion Ensemble in public concerts.

Weekly classes give students frequent opportunity for performance with a view to developing professional competencies on stage. Classes include constructive feedback from peers and lecturers on performance issues.

The curriculum is determined according to the student's individual instrumental and artistic progression and in a student centered manner. Assessment is relative to the student's semester goals and includes aspects of self-assessment. Students need to be familiar with the use of recording technology at a basic level.

### PRDU1001

#### Nursing Fieldwork in Australia

##### Nursing and Midwifery

**Credit points:** 6 **Session:** S1 Late Int, S2 Late Int, Semester 2b **Classes:** clinical practice **Assessment:** clinical performance reports **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

**Associated degrees:** Nursing UG Non Degree, UG Study Abroad Program.

This unit will provide students with clinical learning opportunities supported by the development of a negotiated project. Students will attend on campus seminars and workshops followed by a supernumerary placement in a chosen clinical environment. The unit is designed to provide opportunities for students to integrate theoretical studies with practice experience and to create a depth of understanding in their chosen practice area. Opportunities will be

provided for students to experience nursing in a different professional environment and culture utilising the English language.

### PRFM1801

#### Performance Studies Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit point junior unit of study in Performance Studies at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Chair of Department.

### PRFM2601

#### Being There: Theories of Performance

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr I Maxwell **Session:** Semester 2 **Classes:** Two 1hour lectures and one 1hour tutorial per week **Prerequisites:** 18 junior credit points in no more than two subject areas including at least 12 from Part A of the Table of Units of Study. **Prohibitions:** PRFM2001 **Assessment:** One 1500 word take-home exam, one 1000 word mid-semester essay, tutorial assignment and continuous assessment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

What is performance, and how can we understand what it is that performance does? This unit of study will introduce students to the study of performance, and the particular problems associated with approaching a phenomenon that is often ephemeral, experiential in nature, and frequently shrouded in mystery. Students will learn key theoretical and methodological approaches to the study and practice of a range of performance genres, including, but not limited to theatre and other artistic practices.

#### An Audience Prepares

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr P Dwyer **Session:** Semester 1, Summer Main **Classes:** One 1 hour lecture and one 2 hour workshop/tutorial per week **Prerequisites:** 18 junior credit points in no more than two subject areas including at least 12 from Part A of the Table of Units of Study. **Prohibitions:** PRFM2002 **Assessment:** One 500 word performance questionnaire; one 1000 word extended essay plan; 3000 word performance analysis essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

How do the members of an audience make meaning from the complex weave of words, movements, costumes, lighting, sound and other effects that fill the stage? To what extent are these meanings shaped by the context in which the performance event takes place? In this unit, students will develop a technical/critical language and a 'feel' for analysing live performance through lectures, practical workshops and by attending events at a number of Sydney theatres.

### PRFM2603

#### Between Impro & Text: Making Performance

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr P Dwyer **Session:** Semester 2 **Classes:** One 1 hour lecture and one 2 hour workshop per week **Prerequisites:** 18 junior credit points in no more than two subject areas including at least 12 from Part A of the Table of Units of Study in the Faculty Handbook. **Prohibitions:** PRFM3005 **Assessment:** 1200-1500 word tutorial paper (related to group

performance work); 2500 word essay on rehearsal practices; some continuous, formative tasks **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

Some performances seem firmly text-based (a David Williamson play; the libretto/score of a Wagnerian opera). Others involve more or less spontaneous "composition-in-performance" (Commedia dell' Arte, Theatresports, "free jazz"). Yet, whatever the form, performance is always the thing you get when skilled artisans "assume a responsibility to an audience and to tradition as they understand it" (Dell Hymes). In this unit, we analyse the interactions between literary and primarily oral traditions of performance, questioning assumptions about the historical primacy of texts.

### Sociology of Theatre

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr I Maxwell **Session:** Semester 1 **Classes:** 3 hours per week in seminar mode **Prerequisites:** 18 junior credit points in no more than two subject areas including at least 12 from Part A of the Table of Units of Study. **Prohibitions:** PRFM3012 **Assessment:** One 1500 word take-home exam, one group presentation and 1500 word portfolio and 1000 word formative literature summary. **Practical field work:** Fieldwork **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Theatre and performance as artistic practices are not autonomous: they take place in a complex cultural field, the effects of which necessarily influence and shape the practice itself. In this unit of study, we will develop an understanding of the field of theatrical production in contemporary Australia, both theoretically, using the sociological theory of Pierre Bourdieu, and practically, as we create our own, viable, performing arts company.

### Playing Politics

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr P Dwyer **Session:** Semester 2 **Classes:** 3 hours per week in seminar mode **Prerequisites:** (PRFM2601 and PRFM2602) or (PRFM2001 and PRFM2002) **Prohibitions:** PRFM3015, PRFM3026 **Assessment:** Tutorial/reading tasks equivalent to 500 words in total; one 2000 word essay; contribution of approximately 2000 words to a group research dossier. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

Many theatre practitioners and performance artists have sought to make their work an explicit cultural intervention into movements of social and political change. Here we will critique in detail, and to some extent explore practically, the strategies adopted by a number of key artists and companies, both past and present: from Brecht to Boal, from 'community theatre' to 'contemporary performance'. We will also consider the way protest actions and, indeed, mainstream processes of parliamentary democracy appear to have become increasingly theatricalised.

### Embodied Histories

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr A Card **Session:** Semester 1 **Classes:** 3 hours per week in seminar mode **Prerequisites:** (PRFM2601 and PRFM2602) or (PRFM2001 and PRFM2002) **Prohibitions:** PRFM3021 **Assessment:** One 3000 word essay and one 1500 word literature summary

**Campus:** Camperdown/Darlington (lecture/lab/tutorial) Day **Mode of delivery:** Normal

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Can we investigate and understand historical moments and social movements through a study of dancing bodies? In this unit we will be looking at popular dance practices in western cultures over time. From the Charleston, the Lindy & Jive, through musical comedy & jazz, to gogo, disco and hip hop we will develop an understanding of the relationship between movement, music, time and place. This will be done through a combination of observation and practical participation. No previous dance training is required.

### PRFM3606

#### Theories of Acting Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr G McGillivray **Session:** Semester 2 **Classes:** 3 hours per week in seminar mode **Prerequisites:** (PRFM2601 and PRFM2602) or (PRFM2001 and PRFM2002) **Prohibitions:** PRFM3022 **Assessment:** One 3000 word essay; one group presentation plus write up (1000 words) and one 500 word formative literature summary **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

All theories of acting are grounded in implicit theories about the human self: to Stanislavsky, for example, the self is a repository of memories; while for Meyerhold, the self is a biomechanical resource. We will survey - and experiment with - a range of theories of acting, from Quintilian to Mamet, Zeami to Suzuki, uncovering the assumptions about human being underlying each. The unit involves a workshop component, although no experience is necessary: you will not be assessed on your acting ability.

Zarrilli, Phillip B Acting (Re)Considered: Theories and practices

### PRFM3611

#### The Secret Art of the Dramaturg Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr L Ginters **Session:** Semester 1 **Classes:** 3hrs per week lecture/seminar/workshop. **Prerequisites:** (PRFM2601 and PRFM2602) or (PRFM2001 and PRFM2002) **Prohibitions:** PRFM3010 **Assessment:** One 500 word performance analysis. One 1500 word group project. One 2500 word script assessment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

What is a dramaturg? How do you read a play? Write a non-text based performance? Prepare a production of a classic play? This course will investigate the various roles of the dramaturg, focusing on new play dramaturgy, background research for historical texts, translation and

the role of the dramaturg as co-creator in non-text-based work. This course will include practical exercises in analysing and workshopping a new Australian play or text for performance.

### PRFM3619

#### Performance Analysis and Documentation Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr L Ginters **Session:** Semester 2 **Classes:** 3 hours per week. **Prerequisites:** (PRFM2001 and PRFM2002) or (PRFM2601 and PRFM2602) **Prohibitions:** PRFM3002, PRFM3019 **Assessment:** Group performance analysis project (500 words equivalent); documentation project (1500 word equivalent); 2500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

This unit of study deals with two of the tasks which are fundamental to the developing discipline of Performance Studies: performance analysis and the documentation of performance. Students attend theatrical performances, develop and refine their analytical skills and explore the semiotic theories which underpin the analytical practice. Video recordings and photographs of live performance are also analysed, and the opportunities and new problems that video poses for performance practitioners and scholars are discussed: aesthetic, political and ethical questions in relation to the recording of live performance are explored, students gain 'hands-on' experience in using both video and still photography to document performance, and assess the value of different modes of documentation for archival and analytical purposes.

Selected readings available through Copy Centre

### PRFM3961

#### Rehearsal Studies Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr L Ginters **Session:** Semester 1 **Classes:** One 3 hour seminar per week **Prerequisites:** (Credit results in PRFM2601 and PRFM2602) or (credit results in PRFM2001 and PRFM2002) **Corequisites:** PRFM3962 and sufficient units for a major in Performance Studies. **Assessment:** One 3000 word essay; homework tasks equivalent to 1500 words in total as preparation for weekly seminar discussions **Practical field work:** Full time attendance for 2 weeks in the mid-year break **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study is structured around a performance project involving professional actors and a director. Students observe and analyse a rehearsal process, which will take place during the mid year break. In this unit, the theoretical and methodological groundwork is laid: accounts of rehearsal by participants and observers, ethnographic theory, video recordings of rehearsal, prompt books and other materials are examined with a view to establishing an appropriate level of awareness of the task and a methodological approach.

*Textbooks*

Reader will be available from Week 1.

### PRFM3962

#### Rehearsal to Performance Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr L Ginters **Session:** Semester 2 **Classes:** One 3 hour class a week for six weeks **Prerequisites:** (Credit results in PRFM2601 and PRFM2602) or (credit results in PRFM2001 and PRFM2002) **Corequisites:** PRFM3961 and sufficient units for a major in Performance Studies. **Assessment:** One 4500 word casebook of rehearsal process **Practical field work:** Full-time attendance at rehearsals of a performance project during 2 weeks of July mid-year break **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

In the July break students observe professional actors and director in rehearsal, they document and record the process with a view to

writing a casebook about it. The classes in the first part of the session provide an opportunity to unpack the experience, to undertake some analysis of the resulting performance, and to rethink the theoretical and methodological issues in light of the practical experience.

### PRFM4011

#### Performance Studies Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr L Ginters **Session:** Semester 1, Semester 2 **Prerequisites:** Credit results in PRFM3961 and PRFM3962 (or PRFM3901 and PRFM3902) and credit average in a further 36 credit points of PRFM units. **Assessment:** 4500 words (in essays and papers) for each of the two coursework seminars listed below; 12000 -15000 word casebook reflecting on fieldwork experience; 12000-15000 word thesis. Before enrolling, intending Honours students should speak to the Honours co-ordinator as early as possible about thesis topics and fieldwork possibilities. **Practical field work:** Workshops and placement in a theatre company to observe a creative process in progress; group supervision meeting. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons).

The Fourth Year course in Performance Studies involves the completion of two coursework seminars (in Semester 1) plus two major research tasks: a thesis and a 'casebook' based on participant-observation fieldwork. Fourth year students also attend the departmental postgraduate research seminar in Semester 1 and have group supervision meetings throughout the year which focus on research methods. Students who are interested in doing Honours are advised to make contact with the Coordinator, Dr Ginters, or the Chair of Department, Dr Paul Dwyer, at the earliest possible opportunity to discuss thesis topics, fieldwork opportunities and supervision.

The structure of the Fourth Year program involves a complex braid of theoretical and practical assignments and is outlined below (please note, this structure assumes a full-time enrolment; where there are compelling reasons, part-time enrolment may be possible, in which case the sequence and pacing of the course would be negotiated with the Honours Coordinator.

Coursework Seminars (Semester 1)

oCritical Theory and Performance (Dr Ian Maxwell)

oContemporary Performance (Dr Paul Dwyer)

Each of these seminars entails the equivalent of 4,500 words of written assessment

Postgraduate Research Seminar (Semester 1)

Fourth Year students audit the research presentations of postgraduates and academic staff before presenting a brief overview of their own thesis project towards the end of semester. This oral presentation is for formative assessment purposes only.

Supervision and Research Methods (Semesters 1 and 2)

In consultation with the 4th Year Honours Coordinator, Dr Ginters, students will be matched as early as possible with an individual academic supervisor who will support the thesis research. In addition, the Honours Coordinator convenes a regular group supervision meeting to look at general aspects of thesis writing and to review the ethnographic research methods applicable to the 'casebook' assignment

Thesis (Semesters 1 and 2)

By the end of Semester 1, each student will have worked with the Honours Coordinator and their individual supervisor to prepare a thesis research proposal, a preliminary review of relevant scholarly literature and, where relevant, some primary documentation (eg. interviews, photographs). During Semester 2, a major focus of the course is the drafting and re-drafting of a 12,000 to 15,000 word thesis demonstrating the student's aptitude for independent research and their ability to structure a coherent theoretical argument.

Fieldwork Placement and Casebook (Semesters 1 and 2)

A key part of the Honours course is for students to undertake some participant-observation fieldwork with a professional performance

group or an equivalent organisation or project. These fieldwork placements will be negotiated with the Honours Coordinator and locked in as early as possible in Semester 1 (though the participant-observation does not normally begin till mid-year or later). The placements will involve sustained engagement with the some of the preparation phases for a performance, on the basis of which the student will produce a 12,000 to 15,000 word casebook (essentially a small-scale ethnography), describing and analysing salient features of the training, rehearsal, development or

### PSYC2011

#### Brain and Behaviour Science

**Credit points:** 6 **Teacher/Coordinator:** Prof Iain McGregor **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** PSYC (1001 and 1002). **Prohibitions:** PSYC2111 **Assessment:** One 2 hour exam, major assignment (1500-2000 word essay/report), minor assignment (short written practical exercise and/or tutorial quizzes) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B Sc (Psych), B Psych, B Sc, B Sc (Molecular Biology & Genetics), Grad Dip Psych, UG Study Abroad Program.

This unit of study examines a range of phenomena and principles in learning and perception and their relations to underlying neural substrates. The emphasis in learning is on instrumental conditioning and the principle of reinforcement, ranging from applications of this principle to its neural substrates. Also covered are analyses of aversive-based learning, such as punishment and avoidance, and anxiety, together with related neurochemical mechanisms and the effects of various psychopharmacological agents on these processes. A number of perceptual phenomena will be studied (e.g., motion detection, recognition of faces, identification of emotion). A series of practical classes and demonstrations allow students to gain hands-on

experience of how some of these principles and phenomena may be studied experimentally.

### PSYC2012

#### Statistics & Research Methods for Psych Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Margaret Charles **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week, plus one 1 hour lecture and one 1 hour tutorial per fortnight. **Prerequisites:** PSYC (1001 and 1002). **Prohibitions:** PSYC2112 **Assumed knowledge:** Recommended: HSC Mathematics, any level **Assessment:** One 2 hour exam, class tests, online quizzes, one 1500 word group project, one 45 minute mid-semester exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B A (Psych), B Ed, B Sc (Psych), B Psych, B Sc, B Sc (Molecular Biology & Genetics), Grad Dip Psych, UG Study Abroad Program.

The aim is to introduce students to fundamental concepts in statistics as applied to psychological research. These include summary descriptive statistics, an introduction to the principles and practice of research design, and the use of inferential statistics. Building upon this framework, the unit of study aims to develop each student's expertise in understanding the rationale for, and application of, a variety of statistical tests to the sorts of data typically obtained in psychological research.

### PSYC2013

#### Cognitive and Social Psychology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Bruce Burns **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** PSYC (1001 and 1002). **Prohibitions:** PSYC2113 **Assessment:** One 2 hour exam, major assignment (1500-2000 word essay/report), minor assignment (short written practical exercise and/or tutorial quizzes). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B A (Psych), B Ed, B Sc (Psych), B Psych, B Sc, B Sc (Molecular Biology & Genetics), Grad Dip Psych, UG Study Abroad Program.

This unit expands the depth and range of topics introduced in the first year lectures on Cognitive Processes, Developmental Psychology and Social Psychology. The first section (16 lectures) on Cognitive Processes focuses on current theories of memory, attention, problem solving and decision making and discusses the methods and issues involved in investigating these processes in both healthy individuals and people with cognitive dysfunctions. The second section (6 lectures) on Developmental Psychology presents and evaluates evidence about the early influences on children's social and cognitive development. The final section (16 lectures) on Social Psychology continues an examination of social development across the lifespan from adolescence to late adulthood, followed by an examination of salient social constructs such as prejudice, group processes, altruism, affiliation and attraction.

### PSYC2014

#### Personality and Differential Psychology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Niko Tiliopoulos **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** PSYC (1001 and 1002) **Prohibitions:** PSYC2114 **Assessment:** One 2 hour exam, major assignment (1500-2000 word essay/report), minor assignment (short written practical exercise and/or tutorial quizzes) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B Sc (Psych), B Psych, B Sc, B Sc (Molecular Biology & Genetics), Grad Dip Psych, UG Study Abroad Program.

PSYC2014 is made up of two conceptual components: Theories of Personality and Differential Psychology (Individual Differences). The aim of the Personality component is to introduce students to a number of influential theories of personality. Students will be exposed to some conceptual analysis and expected to examine critically the various theories covered. The aim of the Differential Psychology component is to introduce key topics in the study and assessment of individual differences in personality and intelligence. Students are expected to gain an understanding about the major theories of intelligence, associated research methods, and the traditional areas of group differences.

### PSYC3010

#### Advanced Statistics for Psychology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Sabina Kleitman **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour tutorial per week. **Prerequisites:** PSYC (2012 or 2112) plus at least one other Intermediate Psychology Unit of Study from PSYC (2011 or 2111), PSYC (2013 or 2113), PSYC (2014 or 2114). **Prohibitions:** PSYC3201 **Assessment:** One 2 hour exam, class test, 1500 word assignment, practical exercises. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B A (Psych), B Ed, B Sc (Psych), B Psych, B Sc, Grad Dip Psych, UG Study Abroad Program.

This unit of study expands upon students' knowledge of the general linear model and its applications in the analysis of data from psychological research. The first half of the course is focused on research for which analysis of variance would be appropriate, and develops students' ability to test more focused questions than can be answered by omnibus F tests. Issues that arise in testing contrasts, such as inflation of Type I error, will also be considered. In the second half of the course, students will further their understanding of multivariate techniques, such as multiple regression analysis.

See School website

### PSYC3011

#### Learning and Behaviour Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Justin Harris **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour tutorial per week. **Prerequisites:** PSYC (2011 or 2111) and at least one other Intermediate Psychology Unit from

PSYC (2012 or 2112), PSYC (2013 or 2113), PSYC (2014 or 2114).  
**Prohibitions:** PSYC3209 **Assumed knowledge:** PSYC (2012 or 2112)  
**Assessment:** One 2 hour exam, one 2000 word prac report, tutorial assessment.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B Sc (Psych), B Sc, Grad Dip Psych, UG Study Abroad Program.

This unit addresses the fundamental concepts and more important research findings related to contemporary theories of associative learning in animals and humans. It examines the application of such fundamental research to issues such as drug use, food choice, and learned helplessness. It is designed to foster skills in reading primary sources in this area, and provide the opportunity for hands-on experience in carrying out a research project.

*Textbooks*  
 See School webpage

### PSYC3012 Cognition, Language and Thought Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Karen Croot **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** PSYC (2013 or 2113) and at least one other Intermediate Psychology unit from PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2014 or 2114). **Prohibitions:** PSYC3205 **Assumed knowledge:** PSYC (2012 or 2112) **Assessment:** One 2 hour exam, 2000 word prac report, practical exercise(s). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B Sc (Psych), B Sc, Grad Dip Psych, UG Study Abroad Program.

This unit extends the theories and methods of investigating memory and attentional processes discussed in PSYC2013 to consider a number of domains of higher cognitive processing. One strand of the course will focus on language processing and consider how children learn language, the processes involved in speech perception and production, language comprehension and reading. The remainder of the course will deal with the cognitive processes involved in reasoning and decision-making. The practical program will expose students to a variety of the research methods used to investigate higher cognitive processes, develop their understanding of how these methods can be used to investigate hypotheses about mental processes and consider applications of cognitive research to real-world problems and issues.

*Textbooks*  
 See School website

### PSYC3013 Perceptual Systems Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Alex Holcombe **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour tutorial per week. **Prerequisites:** PSYC (2011 or 2111) and at least one other Intermediate Psychology Unit from PSYC (2012 or 2112), PSYC (2013 or 2113), PSYC (2014 or 2114) or ANAT2010 **Prohibitions:** PSYC3210 **Assumed knowledge:** PSYC2012 **Assessment:** One 2 hour exam, one 2500 word report, tutorial quiz, group presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B Sc (Psych), B Sc, Grad Dip Psych, UG Study Abroad Program.

The unit covers at an advanced level selected topics in perception from the psychophysical, physiological and neuropsychological perspectives. Students are expected to gain an understanding of developing knowledge at current frontiers of research, appreciate the significance of basic perceptual research for perception in the office and on the pitch, and be able to evaluate the empirical and conceptual worth of research contributions. Topics covered include spatial and temporal limits of vision, form completion and the resolution of ambiguity, multisensory integration and neural mechanisms.

*Textbooks*  
 See School website

### PSYC3014 Behavioural and Cognitive Neuroscience Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Ian Johnston **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** (PSYC (2011 or 2111) and at least one other Intermediate Psychology Unit from PSYC (2012 or 2112), PSYC (2013 or 2113), PSYC (2014 or 2114)) OR (ANAT2010 plus PCOL2011) **Prohibitions:** PSYC3204, PSYC3215 **Assumed knowledge:** PSYC (2113 or 213) **Assessment:** One 2 hour exam, one major essay/report 2000-2500 words, tutorial quiz and participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B Sc (Psych), B Sc, Grad Dip Psych, UG Study Abroad Program.

This unit of study will focus on approaches to studying neurosciences incorporating molecular, pre-clinical and clinical models of brain function. These biological models of brain function will be linked with behavioural, affective and cognitive function and dysfunction. The implications of focal cognitive deficits in neurological patients for models of normal cognitive function will also be explored. Specific topics to be covered will be selected from the following areas: appetite psychoneuroimmunology, sensorimotor integration, and the neural and molecular basis of learning and memory, attention, language, visual cognition and praxis. In addition to lectures, a practical component will cover basic neuroanatomy, histology and neuropharmacology, and will introduce students to experimental and case-study approaches to studying neurosciences.

*Textbooks*  
 See School website

### PSYC3015 Intelligence and Differential Psychology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Damian Birney **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour tutorial per week. **Prerequisites:** PSYC(2014 or 2114) and PSYC(2011 or 2111 or 2012 or 2112 or 2013 or 2113) **Assumed knowledge:** PSYC(2012 or 2112); PSYC(2013 or 2113) **Assessment:** One 2 hour exam; one 2000 word essay; tutorial quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B A (Psych), B Ed, B Sc (Psych), B Sc, Grad Dip Psych, UG Study Abroad Program.

The aim of this unit of study is to provide an overview of different perspectives on the construct of personality, intelligence, and metacognitive abilities to build a critical platform from which both empirical evidence and theoretical propositions can be evaluated. Two broad methodological approaches will be considered, compared, and contrasted in relation to cognitive and non-cognitive attributes and their potential overlap. (a) The individual differences approach to the study of personality and intelligence broadly defined which serves as the basis of much of contemporary psychological assessment in clinical, educational, and organizational settings and (b) the experimental approach to cognitive abilities which use experimental methods to study the information-processing components that underlie intellectual performance. Metacognitive abilities will be studied through differential psychology and decision-making paradigms.

 See school website.

### PSYC3016 Developmental Psychology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Pauline Howie **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour tutorial per week. **Prerequisites:** PSYC (2013 or 2113) and at least one other Intermediate Psychology unit from PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2014 or 2114). **Prohibitions:** PSYC3206 **Assessment:** One 2 hour exam, one 2000 word report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B A (Psych), B Ed, B Sc (Psych), B Sc, Grad Dip Psych, UG Study Abroad Program.

This unit examines various theoretical approaches to human development and selected issues within Developmental Psychology. The major issues/controversies in developmental theory are examined in relation to a number of the more influential theoretical approaches. Students are expected to gain an understanding of the main theoretical influences upon current developmental research and to be able to compare and contrast theories of development. The unit introduces students to a range of issues in selected areas of contemporary Developmental Psychology. Students are expected to gain knowledge of these areas, and to develop a critical approach to the analysis of current research and theoretical issues. They are also expected to apply their knowledge in practical exercises involving observations of children.

White, Hayes & Livesey (2005) *Developmental Psychology*. Pearson Edn.

### PSYC3017

#### Social Psychology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Lisa Zadro **Session:** Semester 1  
**Classes:** Two 1 hour lectures and one 2 hour tutorial per week. **Prerequisites:** PSYC (2013 or 2113) and at least one other Intermediate Psychology Unit of Study from PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2014 or 2114). **Prohibitions:** PSYC3212 **Assumed knowledge:** PSYC (2012 or 2112). **Assessment:** One 2 hour exam, one 2500 word research report, tutorial presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B Sc (Psych), B Sc, Grad Dip Psych, UG Study Abroad Program.

This unit continues the coverage of topics in Social Psychology begun in PSYC1001 and PSYC2013. The unit is divided into topic areas, where the emphasis is on evaluating theories and the relevant evidence. Topics areas include social relationships, antisocial behaviours, applied social psychology (effects of the physical environment on social behaviour; jury decision making), social cognition, leadership, and cross cultural psychology. Tutorials provide first hand experience of research by involving students in a range of research projects on the topics covered in the lectures. The tutorials also provide an opportunity for discussion of issues associated with these topics.

#### Textbooks

See School website.

### PSYC3018

#### Abnormal Psychology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Marianna Szabo **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour tutorial per week. **Prerequisites:** PSYC (2014 or 2114) and at least one other Intermediate Psychology unit of study from PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2013 or 2113). **Prohibitions:** PSYC3203 **Assumed knowledge:** PSYC2012 **Assessment:** One 2 hour exam, one 2000 word essay, quiz, tutorial presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Ed, B A (Psych), B Ed, B Sc (Psych), B Sc, Grad Dip Psych, UG Study Abroad Program.

This unit of study critically examines core issues in Abnormal Psychology, concerning the description, explanation and treatment of psychological disorders. The unit of study will include topics such as:

- (a) Adult abnormal psychology: Anxiety disorders (specific phobias, panic disorder, generalised anxiety disorder, OCD); Addictive disorders (drug, alcohol, gambling); Eating disorders (anorexia nervosa, bulimia nervosa); Mood disorders (dysthymia, major depressive disorder, cyclothymia, bipolar disorder); Schizophrenia, Personality disorders.
- (b) Child abnormal psychology: Attention Deficit Hyperactivity disorder; Conduct disorder; Anxiety disorders, Depression.

See School website.

### PSYC3020

#### Applications of Psychological Science Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Barbara Mullan **Session:** Semester 2 **Classes:** two 1 hour lectures and one 2 hour tutorial per week **Prerequisites:** 12 credit points of junior psychology and 12 credit points in Intermediate Psychology **Prohibitions:** PSYC3019 **Assessment:** one 2 hour examination and one 2500 word written assignment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Med Sc, B Sc, Grad Dip Psych, UG Study Abroad Program.

The main focus of this unit will be on Health Psychology, but other applied areas such as Forensic and Organizational Psychology will also be introduced. The aim of the Health Psychology component is to define health within a biopsychosocial framework and to present some of the current issues in the area. It will provide an introduction to key areas in health psychology, and demonstrate how they relate to other disciplines. Issues such as the context within which treatment takes place, the psychosocial factors involved in dealing with physical disease, the application of psychological theory to illness and preparation for hospitalization, the management of adverse psychological sequelae arising from hospitalisation and rehabilitation will be considered. Also considered are the key models and theories in health Psychology which are seen by many to be the foundations of the subject area.

## REHB2026

### Fundamentals of Rehabilitation Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Trevor Hawkins **Session:** Semester 1, Semester 2 **Classes:** 2hrs lectures/week **Assessment:** Take home exam (20%), 2000 word essay (40%), 2000 word practical exercise (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, B Hlth Sci, M Rehab Cng, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit introduces students to broad definitions pertinent to both disability/disadvantage and rehabilitation. It outlines the major categories of disability. It looks at the primary causes of disability and disadvantage and repercussions (physical, social and psychological) of disability and disadvantage. The interventions, physical and psychological, to redress disability and disadvantage problems and issues will also be canvassed. The unit outlines the rehabilitation process. The stages in the process, aims and objectives of each stage and key professionals associated with the provision of a comprehensive rehabilitation service. The nature of specific services provided and the ways in which clients of rehabilitation are managed through the rehabilitation process. The unit considers vocational and avocational rehabilitation and community re-entry aspects of disability and disadvantage.

## REHB3037

### Vocational Rehabilitation IIIA Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Mr Trevor Hawkins **Session:** Semester 1 **Classes:** On-campus, 2hrs/week **Assessment:** Exercise, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

Students are introduced to the placement process and the issues involved in securing meaningful work for persons with disabilities. Students also become aware of the problems faced by individuals when they return to work following injury or disability. Students are introduced to an approach of 'marketing' clients in the workplace in order to increase the job options that are made available to them. Post-placement services that can be offered in order to encourage long term mutually beneficial relationships between employers and rehabilitation counsellors/providers are outlined.

## REHB3038

### Vocational Rehabilitation IIIB Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 2 **Classes:** 2hrs lecture/week **Assessment:** Assignment (50%), VAC report (15%), exam (35%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

Students are exposed to methods of assisting clients to seek their own employment. Job seeking and job maintenance skills are discussed. The program has a practical focus.

## REHB3039

### Avocational Rehabilitation Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Caroline Howe **Session:** Semester 1 **Classes:** 1hr lecture/week **Assessment:** Critical case evaluation (60%),

report and folder (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

This unit introduces and explores key issues in the provision of non-vocational programs and long-term case management for people with disability. The range of non-vocational options, including recreation and leisure, sport and social skills programs are investigated. Students have opportunities to identify the need for non-vocational programs through case studies, and develop rehabilitation counselling skills to facilitate access to client specific options.

## REHB3040

### Psychiatric Rehabilitation Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Lynda Matthews **Session:** Semester 2 **Classes:** On-campus, 1hr/week, students provided with study guide, notes, readings **Prerequisites:** REHB1007 Rehabilitation Counselling I, REHB2011 Rehabilitation Counselling IIA, REHB2012 Rehabilitation Counselling IIB **Assessment:** Assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

This unit examines goals, values and guiding principles and methodology of psychiatric rehabilitation and its application to the rehabilitation of people with severe and persistent symptoms of mental illness. Current practice in rehabilitation is evaluated.

## REHB3042

### Rehabilitation Counselling IIIA Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Sandra Bentley **Session:** Semester 1 **Classes:** Six 2hr lectures **Prerequisites:** REHB2012 Rehabilitation Counselling IIB **Assessment:** 1hr exam (50%), report (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

This unit covers adjustment to disability theory and the application of counselling skills in a rehabilitation counselling context. The unit also provides a group leadership learning opportunity via the application of group counselling skills to address adjustment and transition issues.

## REHB3043

### Rehabilitation Counselling IIIB Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Sandra Bentley **Session:** Semester 2 **Classes:** 2hr lecture/week **Prerequisites:** REHB3042 Rehabilitation Counselling IIIA **Assessment:** 1hr exam (40%), assignment (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

This unit provides students with introduction to the theory and practice in solution-focused brief therapy. Students also gain skills in assessment and interventions session planning using this counselling approach.

## REHB3044

### Medical Aspects of Disability

## Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 1, Semester 2 **Classes:** 1hr lecture/week **Assessment:** 1hr exam (50%), short answers (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

This unit aims to provide a background of information and knowledge which is essential for effective rehabilitation practice. It develops the students' general knowledge of the medical basis of disability as well as giving them the opportunity to acquire specialised expertise in particular areas.

### REHB3049

#### Professional Practice IIIA

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 1 **Classes:** Fieldwork placement **Assessment:** Assessment based on clinical performance, written material **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons.

Students will participate in regular professional development workshops and lectures aimed at enhancing their professional knowledge and skill base across the rehabilitation and disability fields.

### REHB3050

#### Professional Practice IIIB

##### Health Sciences

**Credit points:** 9 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 2 **Classes:** Fieldwork placement **Assessment:** Assessment based on clinical performance, written material **Practical field work:** Fieldwork placement (5 weeks) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons.

Students are required to complete a supervised five-week full-time placement in a rehabilitation or related program. Students are expected to put into practice their knowledge and skills in rehabilitation counselling through case management and rehabilitation planning in a supervised setting.

### REHB3056

#### Rehab of Persons with Hearing Loss

##### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Mr Trevor Hawkins **Session:** Semester 1, Semester 2 **Classes:** Students are required to attend Deaf Education Network (DEN) Auslan courses **Assessment:** Credit transfer granted to students who successfully complete Auslan Certificates 1 and 2 at Deaf Education Network (DEN) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

Students are exposed to a method of communication with persons with hearing impairment.

### REHB3062

#### Public Offenders: Criminality & Rehab

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Rodd Rothwell **Session:** Semester 1, Semester 2 **Classes:** Distance only **Prohibitions:** REHB3051 Rehabilitation of Public Offenders **Assessment:** Mid semester exam (40%), 2000 word essay (60%) **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, B Hlth Sci, UG Study Abroad Program.

This unit introduces students to issues relating to the rehabilitation of public offenders including adults (males and females) and youth offenders. Students will study the major theories of criminality and community attitudes impacting on government approaches to rehabilitation and incarceration policy. The unit will examine the

different approaches and policies to the incarceration of adult males and females and young people and the goals of these approaches. Special attention will be paid to examining the nature of the objectives and desired outcomes of incarceration. Students will analyse the roles and functions of personnel employed within the prison system, including that of custodial personnel and professional workers. In particular the unit will look at the various health issues associated with public offender rehabilitation, including drug addiction, mental illness and HIV/AIDS, the health services available within the prisons and the role played by the various health professionals employed to deal with such problems. Students will also be introduced to the probation and parole system and to the various alternative to full-time incarceration, including community service, day release, work release, and weekend detention. They will examine the aims and objectives of these alternatives and the roles and functions of professional workers (including health workers) employed to administer these programs.

*Textbooks*

Course will be supplied with study notes and readings

### REHB3063

#### Disability, Work and Quality of Life

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week **Assessment:** Multiple choice and short answer class exercise (25%), group presentation and 500 word summary report (25%), 2000 word logbook (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This is a faculty wide elective for Semester 1, and a core unit for Semester 2 for the BHS/MRC*

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, B Hlth Sci, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit will provide students with a sound understanding and awareness of disability and social disadvantage issues in today's society, viewed from the perspective of the consumer, the health professional and society. It will explore the primary causes of the major categories of disability and social disadvantage together with indicators and research findings of social and vocational alienation within communities. The subject will further investigate the role of rehabilitation in light of the physical, social and psychological consequences and impacts of disability and social disadvantage (both positive and negative) particularly in relation to work, education, quality of life and community integration. We will explore the stages of change and the significance of attitude, perceptions, group norms and the role of significant others.

*Textbooks*

Course will be supplied with study notes and readings

### REHB3064

#### Alcohol and Drug Misuse Rehabilitation

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Rodd Rothwell **Session:** Semester 1, Semester 2 **Classes:** Distance education **Prohibitions:** REHB3061 Rehabilitation and Substance Abuse **Assessment:** 1500 word mid semester essay (40%), 2000 word essay (60%) **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, B Hlth Sci, UG Study Abroad Program.

This unit introduces students to issues relating to a major public health problem: the misuse of alcohol and other addictive drugs. The unit introduces students to two major aspects of this area: issues relating to the development of health prevention/health promotion policy, covering the philosophies of harm minimisation and zero tolerance; approaches to rehabilitation and treatment of those overusing both alcohol and other drugs. The unit commences with an analysis of public health policy approaches to the rehabilitation and treatment of people overusing alcohol and other harmful drugs. Students will be required to undertake an exercise involving an analysis of the effectiveness of the two major policy approaches to the problem of drug overuse and abuse: harm reduction and zero tolerance. They will be required to examine the evidence supporting these two

approaches to public health policy. In the second part of the unit students will study the major therapeutic approaches to treatment and rehabilitation. This will include familiarisation with Alcoholics Anonymous, clinically based approaches including transactional analysis and other group therapy oriented approaches, the various behavioural therapies, therapeutic communities, methadone maintenance, needle exchange and recent trials in safe injection facilities. They will become familiar with the nature of services offered, the role of the various health professionals in these services and the nature of effective treatment and rehabilitation outcomes.

### REHB3065

#### PTSD and Rehabilitation

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Lynda Matthews **Session:** Semester 1 **Classes:** Distance education students will be provided with module notes, readings and exercises **Prohibitions:** REHB3059 Rehabilitation and PTSD **Assessment:** Take home exam (40%), 2000 word research report (60%) **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, B Hlth Sci, UG Study Abroad Program.

This unit introduces the clinical entity of posttraumatic stress disorder (PTSD). Students will learn about the history, nature and presentation of the disorder. Major theoretical approaches to treatment and rehabilitation are examined with interventions for both acute and persisting forms of the disorder being presented. Students will examine the contributions of a range of health care/rehab professionals to the case management of people with PTSD. Students will have the opportunity to extend their knowledge of PTSD through the completion of a specialised research report.

### REHB3066

#### Chronic Pain: Disability and Rehab

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mrs Caroline Howe **Session:** Semester 2 **Classes:** Online **Prohibitions:** REHB3060 Chronic Pain and Rehabilitation **Assessment:** Multiple choice and short answer exam (20%), 4 discussion group entries (2000 words) (30%), 2000 word research report (50%) **Campus:** Cumberland **Mode of delivery:** On-line

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, B Hlth Sci, M C V S, UG Study Abroad Program.

Chronic non-cancer pain is a disabling phenomenon and a significant challenge for health professionals. Theories of chronic pain will be presented and students will engage in contemporary research relating to chronic pain management. Current innovations in treatment in this area will be explored. Students will also look at different outcome measures including quality of life. Interdisciplinary team approaches to planning client management will be investigated. The unit will also look at the importance of self management for the health professional to reduce the risks of burnout in working with this population of clients.

MacLellan, Management of Pain. A Practical Approach for Health Professionals (1st ed), Nelson Thomas (2006)

### REHB3067

#### Acquired Brain Injury Rehabilitation

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Trevor Hawkins **Session:** Semester 1 **Classes:** 1hr lecture/week **Prohibitions:** REHB3053 Acquired Brain Injury Rehabilitation **Assumed knowledge:** Basic understanding of anatomy of the brain and human behaviour and cognition patterns **Assessment:** Mid semester exam (30%), resource folder (30%), 1500 word essay (40%) **Practical field work:** Contact with rehabilitation agencies will form part of the resource folder assignment as will accessing information through other sources (e.g., internet) on the services provided for persons with acquired brain injury **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

This unit introduces students to a particular disability population, namely those persons with an acquired brain injury. The unit commences with an examination of different areas of the brain

specifically in terms of the specific actions and thought processes associated with those different areas. How brain injuries are acquired, the different types of brain injuries that occur and their effects on individual client functioning in cognitive, physical, psychological and behavioural domains will also be examined. The unit also focuses in on the impact of brain injury on significant others. The epidemiology of brain injury and the risk factors associated with those who most frequently acquire such injuries are explored. The rehabilitation process, the types of services offered, how they are offered, the roles of different health professionals in providing these services and how long and involved the rehabilitation process is will be for individual clients is also outlined. Analysis of the current range of service providers will be undertaken by students. The range of possible outcomes (community, avocational and work) for this client population will be explored, as will the client and family response to these potential outcomes. Finally the impact of legislation on service provision will also be examined.

### REHB3069

#### HIV/AIDS: Developments in Rehabilitation

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Elias Mpofu **Session:** Semester 2 **Classes:** Distance education students will be provided with module notes, readings and exercises **Assessment:** Take home exam (40%), 2000 word research report (60%) **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

This unit presents the epidemiology, health impacts, interventions and rehabilitation of HIV disease. Latest research that examines medical, health and psychosocial aspects will be explored. Current and innovative approaches to treatment and rehabilitation will be examined. Issues for counselling and counsellors who are working with people with HIV as well as personal perspectives of people with HIV will be discussed. Students will explore the consequences of this disease on quality of life for people with HIV who are living and working in the community.

### REHB4009

#### Rehabilitation Counselling IV

##### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Elias Mpofu **Session:** Semester 1 **Classes:** On-campus, 2hrs/week **Prerequisites:** REHB3043 Rehabilitation Counselling IIIB **Assessment:** Interview demonstration **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Rehab Cng), B Hlth Sc (Rehab Cng) Hons, UG Study Abroad Program.

Counselling interview practice which focuses on the application of solution-focused brief therapy to facilitate the rehabilitation process of case study clients.

### REHB4019

#### Thesis A

##### Health Sciences

**Credit points:** 7 **Teacher/Coordinator:** Dr Lynda Matthews **Session:** Semester 1 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Rehab Cng) Hons.

Honours students undertake a supervised research project in one of the range of areas of rehabilitation and/or disability. Students choose a research topic, conduct a literature review, develop a research design and prepare an ethics submission under the supervision of an academic staff member.

### REHB4021

#### Professional Practice IVA

##### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 1 **Classes:** Fieldwork placement **Assessment:** Assessment based on clinical performance, written material **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B Hlth Sc (Rehab Cng).

Students will participate in advanced professional development workshops and lectures which will be offered at a higher level of skill development to reflect the advanced competencies and range of experience of students nearing completion of their studies.

#### REHB4022

##### Professional Practice IVB

##### Health Sciences

**Credit points:** 24 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 1, Semester 2 **Classes:** Fieldwork placement **Assessment:** Assessment based on clinical performance, written material **Practical field work:** Fieldwork (10 weeks) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Hlth Sc (Rehab Cng).

Students are required to complete a supervised 10-week full time block (or equivalent) placement in a rehabilitation or related program. As the final practicum of the four-year professional practice program, students are expected to put into practice their knowledge and skills in rehabilitation counselling through case management and rehabilitation planning in a supervised setting.

#### REHB4023

##### Honours Workshop

##### Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Lynda Matthews **Session:** Semester 2 **Classes:** 1hr/week **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Rehab Cng) Hons.

Honours students are assisted with the development of their individual research projects for the completion of thesis in Year 4. At the conclusion of this unit, each student will have prepared a written proposal for their research project.

#### REHB4024

##### Professional Practice IVHA

##### Health Sciences

**Credit points:** 8 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 1 **Classes:** Fieldwork placement **Prerequisites:** Either REHB1006, or REHB1008 Professional Practice IA and REHB1009 Professional Practice IB; either REHB2018, or REHB2021 Professional Practice IIA and REHB2025 Professional Practice IIB; REHB3049 Professional Practice IIIA, REHB3050 Professional Practice IIIB **Assessment:** Assessment based on clinical performance, written material **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B Hlth Sc (Rehab Cng) Hons.

Students will participate in advanced professional development workshops and lectures which will be offered at a higher level of skill development to reflect the advanced competencies and range of experience of students nearing completion of their studies.

#### REHB4025

##### Professional Practice IVHB

##### Health Sciences

**Credit points:** 16 **Teacher/Coordinator:** Ms Marcia Underwood **Session:** Semester 2 **Classes:** Fieldwork placement **Prerequisites:** REHB1006 Professional Practice 1, or REHB1008 Professional Practice IA and REHB1009 Professional Practice IB, REHB2018 Professional Practice IIB, or REHB2021 Professional Practice IIA and REHB2025 Professional Practice IIB, REHB3049 Professional Practice IIIA, REHB3050 Professional Practice IIIB **Assessment:** Assessment based on clinical performance, written material **Practical field work:** Supervised placement (10 weeks) **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B Hlth Sc (Rehab Cng) Hons.

Students are required to complete a 10 week supervised full-time block placement (or equivalent) in a rehabilitation or related program. As the final practicum of the four-year professional practice program, students are expected to put into practice their knowledge and skills

in rehabilitation counselling through case management and rehabilitation planning in a supervised setting.

#### REHB4026

**Associated degrees:** B A, B Ec (Soc Sc), B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit is a general introduction to the emergence of the great religious traditions in the ancient world, with specific reference to the West Asia and Mediterranean regions. The unit of study includes the ancient religions of Egypt, Persia, Greece and Rome, as well as the foundations of Judaism, Christianity and Islam. Special attention is given to the tensions between monetheism (one god) and polytheism (many gods). Students are expected to specialise in traditions and themes of their own choice in writing essays.

The twentieth century faced an unprecedented range of near-global crises - wars, depressions, communist-capitalist confrontation, ethnic conflict, epidemics, ecological disasters, extraordinary technological advances, the radical questioning of traditional values (along with secularisation) followed by reactive fundamentalisms, as well as serious tensions between modern science and religious conservatism. This unit considers how these crises have been addressed in religious thought and action. It will discuss popular mentalities and new spiritualities together with responses in the thought and praxis of leading religious figures.

**Credit points:** 6 **Teacher/Coordinator:** Dr C Hartney **Session:** Semester 2 **Classes:** One 2 hour lecture and one 1 hour tutorial per week **Prohibitions:** RLST2025 **Assumed knowledge:** 12 junior credit points of Religion Studies, or equivalent as assessed by the Department **Assessment:** One 3000 word essay and one tutorial presentation and 1000 word tutorial paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

An investigation into the various ways in which the arts - music, dance, literature and visual art - relate to religious life. Lectures and tutorials will introduce students to the world of religion and art in the traditions of China, India, the Middle East and Europe. The interpretation will particularly focus upon the way a people's understanding of the sacred shapes the significance they give to the arts.

**RLST2627****Religion in Multicultural Australia**  
**Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr C Cusack **Session:** Semester 1, Summer Early **Classes:** One 2 hour lecture and one 1 hour tutorial per week **Prohibitions:** RLST2027 **Assumed knowledge:** 12 junior credit points of Religion Studies, or equivalent as assessed by the Department **Assessment:** Take home exam (1250 words) 30% Essay (2500 words) 50% Tutorial oral participation and 750 word presentation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit introduces the role played by religion in Australian culture, covering the indigenous Aboriginal religions and the introduced religions of migrants. Contrasting the place of Christianity in the foundation of convict colonies with that of the communities founded by the Pilgrim Fathers in America; considering minority religions (notably Judaism and Islam) in nineteenth century Australia; noting political factors (e.g., Constitutional protection of religious freedom, White Australia Policy); and finally assessing the multicultural and multi-faith community which is contemporary Australia.

#### Sex, Desire and the Sacred

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr J Johnston **Session:** Semester 2  
**Classes:** One 2hour lecture and one 1hour tutorial per week. **Assumed knowledge:** 12 junior credit points of Religion Studies, or equivalent as assessed by the Department **Assessment:** 2500 word essay (50%), 1250 word tutorial presentation (30%), WebCT presentation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit examines relations between sexuality, desire, gender and the sacred as presented in the major faith traditions, including their esoteric currents, and in New Age religion. It is designed to introduce students to conceptualisations of the self and divine and their interrelation, and covers core philosophy of religion topics such as ontology and ethics. Topics include tantra, the commercialisation of 'sacred sex', eroto-mysticism, cults of virginity and abstinence. Significant attention is given to issues of cultural difference and gender.

#### Ancient Egyptian Religion and Magic

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr J Johnston **Session:** Semester 1  
**Classes:** One 2 hour lecture and one 1 hour tutorial per week. **Assumed knowledge:** 12 junior credit points of Religion or equivalent as assessed by the Department **Assessment:** One 2500 word essay and one 1500 word tutorial paper. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit will introduce the cosmologies, gods and religious structures of Pharaonic Egypt, including the imperial cult, sacred language, popular religion and magic. It will then consider the legacy of ancient Egyptian religion and magic in late antiquity, including the cult of Isis, Hermetic and Gnostic movements, the spiritual influence of the city of Alexandria, and the persistence of Coptic magic. Finally, there will be discussion of the abiding fascination with all things Egyptian in modern esotericism and popular culture.

### RLST2637

#### Engaged Buddhism: Politics and Justice

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr P Fuller **Session:** Semester 2  
**Classes:** One 2 hour lecture and one 1 hour tutorial per week **Assumed knowledge:** 12 junior credit points of Religion or equivalent as assessed by the Department **Assessment:** Tutorial Presentation (1,000 words) Essay (2,000 words) Take Home Exam (1,500 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit explores Socially Engaged Buddhism which is a significant new form of practice in world Buddhism, associated with the Dalai Lama, Thich Nhat Hanh and Buddhadasa. The unit explores the origins of engaged Buddhism and considers the arguments as to whether Engaged Buddhism is a new phenomenon, or whether Buddhism has

always been engaged in social issues. Emphasis is placed upon engaged Buddhism in the West, and how modern Buddhists have influenced and adapted traditional Buddhist ideas and practices.

### RSEC1031

#### Resource Economics 1

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Fredoun Ahmadi Esfahani  
**Session:** Semester 2 **Classes:** (2 lec & 1 tut)/wk **Prohibitions:** AGE1031  
**Assessment:** One mid semester exam (1 hour), one final exam (2 hours), tutorial papers, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Ec, B Ec Soc Sc, B Int S, B L W Sc, B Res Ec, UG Study Abroad Program.

This unit provides a comprehensive introduction to resource and environmental economics, and how particular concepts in economics are used to provide insights into efficient and sustainable natural resource management. Some descriptive content regarding Australia's natural resource assets and industries is included, but the primary

focus is analytical. Emphasis is placed on the importance of property rights structures, cost-effective regulations and dynamic considerations in managing natural resource stocks and environmental assets. Some material on economic valuation of environmental assets and benefit-cost analysis is included.

### RSEC4131

#### Benefit-Cost Analysis

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Fredoun Ahmadi-Esfahani  
**Session:** Semester 1 **Classes:** (2 lec & 1 tut)/wk **Prerequisites:** (ECON2001 or ECOS2001) and (AGEC2103 or AGE1031) **Prohibitions:** AGE1037  
**Assessment:** 20% written essay, 20% mid semester exam, 60% final exam.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

This unit provides a detailed treatment of benefit-cost analysis and its use in public sector decision making and project evaluation. The underpinning concepts in welfare economics are analysed in detail, such as economic efficiency, criteria for assessing social welfare improvements, and economic surplus measures. Procedures of undertaking a benefit-cost analysis are presented, and tools of non-market valuation for environmental assets are covered in detail. These techniques include both stated and revealed preference techniques, including contingent valuation, choice modeling, hedonic pricing and travel cost methods.

### RSEC4132

#### Environmental Economics

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Tihomir Ancev **Session:** Semester 1 **Classes:** (2 lec & 1 tut)/wk **Prerequisites:** ECON2001 or ECOS2001 or AGE1031 or AGE1037 **Prohibitions:** ECON3013, AGE1035 **Assumed knowledge:** (ECON2001 or ECOS2001), (ECON2002 or ECOS2002), AGE1031, AGE1032, AGE1033 **Assessment:** One 1hr midterm exam, practical report, an essay paper, one 2 hr end of semester exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Only available to 4th year students in the FAFNR. Available to 3rd year students in the FEB. Available to students that have completed RSEC1031 or ENVI3013 with permission from the unit coordinator*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

The course provides theoretical and empirical background necessary for a resource economist to be able to successfully function when faced with various environmental problems. The unit investigates economic aspects of a range of environmental issues. The studied concepts are exemplified with environmental problems related to agriculture (soil salinity, algal blooms, overgrazing etc.) as well as with environmental problems typical to Australia. The guiding economic themes are: competing uses of the environment / externalities, market failure, the importance of property rights, optimal allocation of pollution abatement, technical issues in non-market valuation methods (measuring benefits without commodities), and the processes for making choices relating to non-market goods. Some social issues with environmental impacts are studied through exploration of the problems of population size and distribution, economic growth, and environmental regulation.

### RSEC4133

#### Economics of Mineral & Energy Industries

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Tihomir Ancev **Session:** Semester 2 **Classes:** (2 lec & 1 tut)/wk **Prerequisites:** (ECON2001 or ECOS2001) and

(AGEC2103 or AGE2003) **Prohibitions:** ECON3013 **Assumed knowledge:** (ECON2002 or ECOS2002), AGE2001, AGE2101, AGE2105 **Assessment:** One 1hr midterm exam, an essay paper, one 2 hr end of semester exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Only available to 4th year students in the FAFNR. Available to 3rd year students in the FEB. Available to students that have completed RSEC1031 or ENVI3013 with permission from the unit coordinator*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, B Res Ec, UG Study Abroad Program.

The unit provides theoretical and empirical background in the economics of minerals exploration, extraction and marketing and in the economics of energy generation, distribution and use. The economics of minerals and energy commodity markets will be discussed and analyzed. The interactions of mineral extraction and energy generation activities with other natural resources and the environment will be of particular interest (e.g. mine site remediation, land use conflicts). Sustainability and prospects for long term efficient use of these resources, as well as the development and use of alternative technologies will also be discussed. In addition, institutional and policy issues (e.g. regulatory reform), will be analyzed. The unit will discuss the main aspects of the markets for minerals and energy, market structure, business environment and price movements. The unit will also provide an introductory discussion on the markets for derivatives (options, futures, forward, swaps) on minerals and energy commodities.

Available to 3rd year students in the FEB. Available to students that have completed RSEC1031 or ENVI3113 with permission from the unit coordinator.

#### Economics of Water & Bio-resources Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Tihomir Ancew **Session:** Semester 2 **Classes:** (2 lec & 1 tut)/wk **Prerequisites:** (ECON2001 or ECOS2001) and (AGEC2103 or AGE2003) **Prohibitions:** ECON3013 **Assumed knowledge:** (ECON2002 or ECOS2002), AGE2001, AGE2101, AGE2105 **Assessment:** One 1hr midterm exam, an essay paper, one 2 hr end of semester exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Only available to 4th year students in the FAFNR. Available to 3rd year students in the FEB. Available to students that have completed RSEC1031 or ENVI3013 with permission from the unit coordinator*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Hort Sc, B Int S, B L W Sc, B Res Ec, B Sc Agr, UG Study Abroad Program.

The unit consists of two complementary parts: water economics and economics of biological resources (fisheries, forestry, other wildlife). The main objective of the water economic component is to investigate the economic aspects of water use and water quality. In particular approaches toward efficient use of the water resource over time, optimal allocation of water among competing uses and achievement of the socially optimal level of water quality will be discussed. The demand for water from various sectors will be analysed in both static and dynamic settings. Issues considered include the selection and construction of water storages, aquifer water extraction and alternative water sources. The issues of waste water disposal and water quality, changing water technologies, and water pollution will be also discussed. Particular attention will be devoted to the economic mechanisms for managing the water resources including property

rights, water allocation and water markets. The key policy instruments (taxes, quotas, standards) in these areas will be analyzed and discussed. The institutional and policy aspects will also be considered through analysis of water policy reform in Australia and elsewhere. The main objective of the economics of biological resources will be to introduce students to the bio-economic modelling of the resources that experience biological growth. This will be prominently exemplified through various aspects of fishery economics. The unit will also discuss the economics of wildlife preservation and protection, as well as the economics of biodiversity.

Available to 3rd year students in the FEB. Available to students that have completed RSEC1031 or ENVI3113 with permission from the unit coordinator.

## SANS1001

### Sanskrit Introductory 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 1  
**Classes:** 3 hours per week **Assessment:** Classwork, assignments, tests (equivalent to 2000 words), 2.5 hour exam (equivalent to 2500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit provides an introduction to Sanskrit. It is intended for students who have little or no previous knowledge of the language. Emphasis will be given to understanding the basic grammatical structures and the Devanagari script. Pronunciation will be given attention. There will be exercises in translation from Sanskrit to English and English to Sanskrit.

#### Textbooks

Egenes, T., Introduction to Sanskrit, Part One. Delhi. Motilal Banarsidass 1996

## SANS1002

### Sanskrit Introductory 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2  
**Classes:** 3 hours per week **Prerequisites:** SANS1001 **Assessment:** Classwork, assignments, tests (equivalent to 2000 words), 2.5 hour exam (equivalent to 2500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of work done in SANS1001. By the end of the unit students will have covered the grammar necessary for reading simple Sanskrit texts.

#### Textbooks

Egenes, T., Introduction to Sanskrit, Part Two. Delhi. Motilal Banarsidass 2000

### Sanskrit Intermediate 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2  
**Classes:** 3 hours per week **Prerequisites:** SANS2001 or SANS2601 or equivalent **Prohibitions:** SANS2002 **Assessment:** Classwork, assignments, tests (equivalent to 2000 words), 2.5 hour exam (equivalent to 2500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will be devoted to reading classical Sanskrit literature, especially selections relevant to the study of Indian religion and culture.

Readings will be drawn from texts such as the Bhagavadgita, Mahabharata and Jatakamala.

#### Textbooks

Lanman, C.R., A Sanskrit Reader 2nd edn. (Satguru Publications, 1983)

## SANS3601

### Sanskrit Advanced 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 1  
**Classes:** 3 hours per week **Prerequisites:** SANS2002 or SANS2602 or equivalent **Prohibitions:** SANS3001 **Assessment:** 2 assignments (equivalent to 2000 words), 2.5 hour exam (equivalent to 2500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will be devoted to reading a range of Sanskrit literature including more advanced poetical and philosophical texts. Readings will be drawn from texts such as the Ramayana, Buddhacarita and Yogasutras.

## SANS3602

### Sanskrit Advanced 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2  
**Classes:** 3 hours per week **Prerequisites:** SANS3001 or SANS3601 or equivalent **Prohibitions:** SANS3002 **Assessment:** 2 assignments (equivalent to 2000 words), 2.5 hour exam (equivalent to 2500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will be devoted to reading a range of Sanskrit literature including more advanced poetical and philosophical texts. Readings will be drawn from texts such as the Ramayana, Buddhacarita and the Yogasutras.

## SANS3612

### Sanskrit Research Preparation 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2  
**Classes:** 3 hours per week **Prerequisites:** Credit result in SANS2001 or SANS2601 **Assessment:** 3 assignments (equivalent to 4500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

Designed for students hoping to specialise in Indian and/or Buddhist Studies, this unit focuses on the classical languages of India, with a view to providing students with the ability to read and conduct research into Sanskrit texts in their original language.

## SANS4001

### Sanskrit IV Honours A

#### Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 1, Semester 2 **Prerequisites:** credit average in 48 senior credit points in Sanskrit units **Assessment:** 2 coursework components (includes translation work and essays) (25% each), 12000-15000 word thesis (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B Int S (Hons), Dip Lang Studs (Hons).

Honours IV in Sanskrit comprises three components: 1. Old and Middle Indo-Aryan Language Study, involving elements from the Sanskrit 2900 and 3900 units and Sanskrit 3000 units arranged in consultation

with the department. Assessment will involve two three-hour examinations. 2. Research methodology in Indology and related disciplines. This will involve independent reading, discussion with research supervisor and attendance at seminars and lectures as arranged in consultation with the department. Assessment will involve two essays of approximately 3000 words. 3. A thesis of approximately 15000 words to be presented at the end of second semester on a research topic chosen in consultation with the department.

#### SCEL2102

##### Science Elective 1 Science

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2103

##### Science Elective 5 Science

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular

Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2104

##### Science Elective 9 Science

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2202

##### Science Elective 2 Science

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2203

##### Science Elective 6 Science

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points

for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2204

##### Science Elective 10 Science

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2302

##### Science Elective 3 Science

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Classes:** As for associated 6cp Intermediate unit or by negotiation with School offering 6cp Intermediate unit **Prerequisites:** Relevant Junior units as for associated unit. **Assessment:** Proportional to associated unit as determined by coordinator. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form. Students other than faculty of science students should seek permission from their own faculty before attempting to enrol in SCEL units.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2303

##### Science Elective 7 Science

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit

related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2304

##### Science Elective 11 Science

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Classes:** As for associated 6cp unit or by negotiation with School offering 6cp Intermediate unit. **Prerequisites:** Relevant Junior units as for associated unit. **Assessment:** Proportional to associated unit as determined by coordinator. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form. Students other than faculty of science students should seek permission from their own faculty before attempting to enrol in SCEL units.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2402

##### Science Elective 4 Science

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

#### SCEL2403

##### Science Elective 8 Science

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available

to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

### **SCEL2404**

#### **Science Elective 12**

##### **Science**

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Faculty approval required. Students must complete a SCEL form.*

**Associated degrees:** B C S T, B I T, B Med Sc, B Psych, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Media Commun.

Science Elective units were created to assist students manage the transition to 6 cp units in 2006. A SCEL unit is used for students who need 2, 3 or 4 additional credit points to complete a Science major, a compulsory or pre-requisite Science unit of study or 144 credit points for a degree. The content and assessment of the SCEL unit must be decided in consultation with the academic coordinator of the unit related to the SCEL unit. A SCEL unit will only be approved where an existing alternative unit cannot be selected. SCEL units are available to students enrolled in combined Science degrees or degrees offered by the Faculty of Science.

### SCLG1001

#### Introduction to Sociology 1 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Catriona Elder **Session:** Semester 1, Summer Early **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Assessment:** one essay (40%), one 2 hour exam (40%) and other work as assigned by coordinator (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B S W, B Ec (Soc Sc), B Ec (Soc Sc), LL B, B Int S, B S W, Dip Soc Sc, UG Study Abroad Program, UG Summer/Winter School.

This unit introduces students to the study of sociology through an analysis of contemporary Australian society. Using a range of sociological concepts and theories, we will analyse society in the period known as 'modernity'. Students will be encouraged to analyse existing social phenomena through the prisms of gender, sexuality, ethnicity, class, multiculturalism and indigeneity.

*Textbooks*

Readings will be available at the University Copy Centre

**SCLG1002****Introduction to Sociology 2****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Catriona Elder **Session:** Semester 2, Winter Main **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Assessment:** one essay (40%), one 2 hour exam (40%) and other work as assigned by coordinator (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A, B S W, B Ec (Soc Sc), B Int S, B S W, Dip Soc Sc, UG Study Abroad Program, UG Summer/Winter School.

Students will continue to be introduced to sociology through the analysis of contemporary society. Through a focus on the sociology of everyday life, we will explore the relationships between various social and cultural forms, institutional sites and the practices of everyday life. Topics such as fame and celebrity, fashion and consumption, globalization community and belonging will be explored.

**Textbooks**

Readings will be available at the University Copy Centre

**SCLG1801****Sociology Exchange****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Soc Sc.

**SCLG2601****Sociological Theory****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Craig Browne **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2001, SCLG2520 **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

In this unit of study we will examine the main strands of sociological thought and identify the key concepts, debates and issues in the development of sociological theory. It will focus on the writings of leading social theorists and sociologists, their contribution to the development of a distinctly sociological theory, and their continuing impact on current theoretical debates in sociology. Topics covered will include: the origins of sociology; industrialism; classical theorists; sociology of urban society; interactionism and everyday life; psychoanalysis; sociology of knowledge and culture; feminist challenges to sociological paradigms; postmodernity and the future of society. This unit is mandatory for Sociology majors.

**SCLG2602****Social Inquiry: Research Methods****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Salvatore Babones **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** Either SCLG1001 and SCLG1002 or SCWK2003 or SSC1003 **Prohibitions:** SCLG2002, SCLG2521 **Assessment:** 4500 words of written work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit of study introduces students to a range of qualitative and quantitative research methods in common usage throughout the social sciences. The course has both analytical and practical components. With regard to the former, students are introduced to the methodological issues in contemporary sociology and their impact on the research process. An emphasis will be placed on developing a critical ability to read sociological research, with an eye to the methodological adequacy of social research, the use of theory in the research process, the political and ethical issues that arise whilst

conducting research, and the classical and contemporary debates over interpretation and the production of knowledge. With regard to the latter component, students will undertake practical exercises in order to learn to appreciate and use a selection of research approaches, methods and techniques. This unit is mandatory for Sociology majors.

**SCLG2604****Social Inequality in Australia****Arts**

**Credit points:** 6 **Session:** Semester 1, Summer Late **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2010, SCLG2529 **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program, UG Summer/Winter School.

This unit examines sociological approaches to social inequality. Questions about social inequality are integral to contemporary notions of equality, citizenship, human rights, social justice and emancipation. A central theme of the unit (and a central preoccupation of sociologists) is ways in which social relations of inequality are shaped, represented, experienced, negotiated and challenged in everyday life. Some important questions for this unit are: How do sociologists understand and explain patterns of inequality? What are the enabling and constraining factors shaping people's 'life chances'? How are social relations of inequality, experienced, challenged and disrupted? Is social inequality an inevitable condition of human existence?

Unit reader will be available through the Copy Centre

**SCLG2605****Social Justice Law and Society****Arts**

**Credit points:** 6 **Session:** Semester 1 **Classes:** one 2 hour lecture and 1 one hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2017, SCLG2536 **Assessment:** one 2500 word research paper (60%) and one 1800 word essay (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit of study examines a range of approaches to social justice, including distributive and recognition or identity theories. We ask how one works out what a socially just society would look like, considering guiding principles such as desert, need, merit and equality of

resources, opportunity or capabilities. We then link these ideas with principles and practices of legal equality and human rights law and specific contemporary social justice topics such as racial, gender, environmental and international justice.

### SCLG2606

#### Media in Contemporary Society Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Annette Falahey **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2018, SCLG2537 **Assumed knowledge:** Ability to access internet and basic web browsing skills **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit will examine key issues and debates within current sociological writings on media in contemporary society. The tutorial discussions focus on media, including radio, film, television, video, print, news, current affairs programmes and advertising, all of which are considered in relation to media audiences. We will consider the research literature on the sociology of media in order to investigate methods of carrying out media research, particularly of media audience research. The aim is to encourage students to develop an informed understanding of media, including their own engagement with media in contemporary society, and to explore computer based technology as an educational tool for studying media in contemporary society.

### SCLG2607

#### Social Movements and Policy Making Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Annette Falahey **Session:** Semester 1 **Classes:** 2 hrs of lecture and 1 hr of tutorial **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2570 **Assessment:** one 2000 word essay, participation and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

Drawing on contemporary sociological analysis this unit critically explores participation, organization and outcomes of social movements. The unit explores the intersections between citizenship and democracy in relation to social movements and policy making. Moreover, the unit addresses links between societal and cultural arrangements and social movements for change. Students will have the opportunity to explore the theoretical ideas introduced in this unit by investigating a range of social movements, such as, anti-global movements, environmentalism and feminist movements.

### SCLG2608

#### Social Construction of Difference Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Karl Maton **Session:** Semester 1, Winter Main **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2004, SCLG2523 **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program, UG Summer/Winter School.

The focus of this unit of study is on the dynamics of the identification of 'difference' in society, including the processes of stigmatisation and demonisation of 'deviants'. The unit focuses on areas such as the debates surrounding the 'welfare underclass', unruly youth, refugees and asylum seekers, trans-gendered persons, the care of the mentally ill, etc. Significant theoretical debates will be addressed, including 'realism' vs. 'social construction', 'defining deviance down' (Moynihan;

Hendershott), the 'Broken Windows' thesis (Wilson and Kelling) and Jock Young's theory of 'Essentialising the Other'.

### SCLG2609

#### Contemporary Cultural Issues Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Annette Falahey **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2501 **Assessment:** 2500 words of written work (60%) one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit of study will examine key issues and debates within current sociological writings on culture. It will assess critically a range of cultural issues pertinent to structuralist, poststructuralist, deconstructionist as well as postmodern accounts of contemporary culture. An aim of this unit is to link concepts of culture to specific case studies, in order to facilitate the joining of theory with research. This aim will be achieved through addressing various issues, including analysis of cultural representations, popular culture, as well as the role of agency within cultural formations.

Unit reader will be available through the Copy Centre

### SCLG2610

#### Science, Technology and Social Change Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Melinda Cooper **Session:** Semester 1 **Classes:** 2 hrs of lecture and 1 hr of tutorial **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2504 **Assessment:** 2,500 words of written work (60%) and 2 hours of examination (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit examines a range of sociological theories and debates concerning science and technology. Students will investigate the two-way relationship between science/technology and society, ie., the social shaping of science and technology, and the impact of science and technology on society. Issues to be examined include the social production of science and technology, the science-technology relationship, the politics and economics of science and technology, science and technology in medicine, in reproduction, in the workplace, and the role of science and technology in environmentalism and the environmental movement.

### SCLG2611

#### Comparative Sociology of Welfare States Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Gyu-Jin Hwang **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2509 **Assessment:** 4500 words of written work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, M A L P, UG Study Abroad Program.

Contemporary developments and debates concerning welfare in Australia are put into a new perspective when considered in comparison with welfare states throughout the world. In this unit of study, students will have the opportunity to compare Australian welfare arrangements and social policies with those in other industrialised countries. How do other countries conceptualise and make arrangements for people who are unemployed, or pregnant or sick, or old? What are the principles that underpin these arrangements and how can we account for the differences between countries? The unit

will focus on social policies concerned with health, employment and unemployment, work and family, disability, ageing and childhood. Students will develop comparative analyses with both Western industrialised welfare states and the emerging Asian welfare states. In addition to developing knowledge of particular social policies in particular countries, students will explore the theoretical frameworks that have underpinned comparative welfare state analysis. They will also have the opportunity to interrogate the dominant discourses that have informed social policy development including those concerning rights, citizenship, obligations, reciprocity and social capital.

## SCLG2612

### Self and Society

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Robert van Krieken  
**Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2510  
**Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%)  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

The nature of human subjectivity has fascinated and drawn the attention of thinkers from many different fields. While the questions, who are we? how do we become individual? are often asked, the ways of answering these questions constantly change. In this unit, the discursive construction of the self will be examined in the light of the political, technological and social changes which constantly influence the meanings and histories of self, subjectivity and identity. The unit will explore questions such as whether there is a human 'nature' which precedes or exists beyond society; whether historical circumstances determine human emotional response; whether new forms of technology and modes of communication influence self-knowledge; whether consumerism and materialism commodify identity; whether the roles played in everyday life and the management of social interactions produce or conceal who we are. The unit begins with commonsensical views on identity and proceeds to deconstruct them.

Unit reader will be available through the Copy Centre

## SCLG2613

### Sociology of Childhood and Youth

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Amanda Elliot **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2522 **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit of study examines the main sociological approaches to childhood and youth in modern industrial societies, as well as the ways in which particular perspectives on childhood are central to all social theory. It will examine the debates surrounding the historical development of childhood, and the various approaches to the impact of state intervention and social policies on both the experiences of childhood and youth and the transition to adulthood. Specific topics discussed include; the social construction of child abuse, youth homelessness and youth criminality as social problems, the stolen generations, children and the law, the fertility decline, and the differentiation of childhood experience along lines of class, gender, race and ethnicity.

## SCLG2615

### Law and Social Theory

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Robert van Krieken  
**Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per

week **Prerequisites:** SCLG1001 and SCLG1002 and (SCLG2601 or SCLG2001 or SCLG2520) **Prohibitions:** SCLG2535 **Assessment:** tutorial participation (10%), one 2500 word essay (60%), one 2000 word take-home exam (30%)  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, M A L P, UG Study Abroad Program.

This unit provides a detailed understanding of how the work of a broad range of social theorists contributes to a specifically sociological understanding of legal ideas, institutions and practices. After beginning with classical sociology - Durkheim, Marx and Weber, the unit will then discuss the contributions of the Frankfurt School, Habermas, Foucault, Bourdieu, Luhmann, Elias, and Selznick, as well as the more recent perspectives of postmodern and feminist social theory.

## SCLG2616

### Global Transformations

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Salvatore Babones **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2560  
**Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%)  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit examines contemporary processes of globalisation. It investigates the personal and technological networks that constitute transnational forms of social organisation, the hybrid identities that emerge from population movements across borders and cultural interchanges, the mobilities of travel and exchange that alter the spatial context of social relations. These key developments are explored in relation to migration, multiculturalism, travel, human rights and in terms of the effects of globally orientated institutions on collective identities, citizenship, civil society and democracy.

### Violence, Imaginaries and Symbolic Power

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Craig Browne **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG2566 **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit examines the operation of symbolic power and diverse social manifestations of violence, from revolution through to eroticism. Of particular interest are social imaginaries and the way collective representations embody social creativity, legitimate social structures and inform projects of violent social reconstruction, including war, terrorism, nationalism and genocide. Social imaginaries are constitutive of nationalist visions of self-determining communities, capitalist wealth and social utopias. Different modes of critical analysis are introduced, like critical social theory, discourse analysis, and psychoanalysis.

## SCLG2621

### Power, Politics and Society

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Karl Maton **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Assessment:** one 1500 word take-home exam,

one 3000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B S W, Dip Soc Sc, M A L P, UG Study Abroad Program.

This unit will examine the core theoretical perspectives in the sociology of power, political action and political structures (Weber, Michels, Lukes, Mills etc.) and the central empirical issues in political sociology. These issues include state formation and governance, political ideas and ideologies in a "knowledge society", political parties, social movements and interest groups, globalisation, modernity and post-modern politics. It will engage with these concerns in relation to a selection of contemporary Australian and global issues in political sociology.

## SCLG2622

### Sociology of Knowledge

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Fran Collyer **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Assessment:** one research essay (60%), group work and class participation (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B S W, Dip Soc Sc, UG Study Abroad Program.

This unit explores the formation, transmission and ownership of knowledge through several historical epochs. It highlights the way knowledge, in both oral and written form, reflects and expresses social structures and social processes. Students will be introduced to a range of theories about the relationship between knowledge and society, and to illustrative case studies (e.g. the patenting of diagnostic tests, the funding of research institutes and 'Think Tanks', and the buying and selling of 'expert knowledge').

### Sociology of Terror

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Michael Humphrey **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Assessment:** one 1500 workbook, one 3000 word essay and class participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B S W, Dip Soc Sc, UG Study Abroad Program.

This unit examines the relationship between terrorism and globalization. Explores themes of massacre, ethnic cleansing, and terrorism in the context of social uncertainty and crises in nation states. Examines the production of victims and the process of cultural symbolization of the body and the new social and political imaginaries emerging. Examines the uses of victimhood in trying to escape terror and achieve reconciliation. Draws on the work of Scarry, Kristeva, Appadurai, Nordstrom, Foucault, Zulaika and Taussig.

### Human Rights and Social Protest

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Michael Humphrey **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Assessment:** one 1500 workbook, one 3000 word essay and class participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B S W, Dip Soc Sc, UG Study Abroad Program.

Explores the rise of human rights discourse and its relationship to moral and religious discourses on suffering and social justice across

cultures. Focuses on victims of human rights abuse, the formation of communities of suffering and social movements around victimhood. Examines 'rights talk' as a global discourse and language of protest against social injustice and claims. Examines global human rights machinery and the ethics of humanitarian intervention. Cases studies from Latin America, Africa and the Middle East.

## SCLG2625

### Sociology of Friendship

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Jennifer Wilkinson **Session:** Semester 1 **Classes:** One 1 hour lecture and one 2 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Assessment:** 1 x tutorial presentation, 500 words (equiv.); 1 x short essay, 1000 words; and 1 x research essay, 3000 words. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B S W, Dip Soc Sc, UG Study Abroad Program.

This unit examines the sociology of friendship, its place within theories of late modern society and its significance for the individual. Students will gain a foundation in key debates about friendship across the social sciences and key theories in the field, both classical and contemporary. It explores the relevance of friendship to other sociological categories, including the public sphere, the family, community and the self. Students will learn to apply this knowledge to an understanding of society and social change.

## SCLG2634

### Crime, Punishment and Society

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Rebecca Scott Bray **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** Two of: SCLG1001, SCLG1002, SLSS1001, SLSS1002 and LAWS1100. **Prohibitions:** SCLG2566 **Assessment:** one 3000 word essay, class participation and one 1500 word written exercise **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

The unit introduces students to the analysis of crime, detection and punishment in their historical, social, political and cultural contexts. It discusses the major theoretical perspectives on the explanation of crime as well as the role and functions of punishment. It examines a range of issues in understanding crime and criminal justice, including the cultural life of crime, the history and sociology of criminal detection practices, forensic knowledges, policing and prisons, and also considers specific aspects of medico-legal criminology.

**SCLG3601****Contemporary Sociological Theory  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Melinda Cooper **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour seminar per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG3002 **Assessment:** 2500 words of written work (60%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit provides a detailed introduction to key social theorists whose ideas are being used extensively in contemporary sociological theory and research. These theorists include: Irving Goffman, Michel Foucault and Pierre Bourdieu. A particular focus is on approaches to human action in its various structural and cultural contexts, the possibilities and limits of human agency, and questions of social change.

**SCLG3602****Empirical Sociological Methods  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Fran Collyer **Session:** Semester 2 **Classes:** one 3 hour seminar **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCLG3003 **Assessment:** interview exercise, class participation and one written research proposal **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Ec (Soc Sc), B S W, Dip Soc Sc, UG Study Abroad Program.

This unit addresses the political, ethical and practical problems that may arise during the process of conducting research. It will also examine the social and logical links between theory, method, data and analysis. In the seminars we will critically examine the work of other researchers to identify the strengths and weaknesses of their approaches. For assessment, students will select a topic of their own choosing and develop a theoretically informed research proposal. This unit assumes a basic knowledge of social research methods.

### Contesting Social Policies Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Gyu-Jin Hwang **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SCLG1001 and SCLG1002 **Prohibitions:** SCPL3002 **Assessment:** one 2000 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B S W, Dip Soc Sc, UG Study Abroad Program.

The focus of this unit of study is on the concepts and principles underpinning the allocation of welfare, in the context of policy-making in Australia's complex society. Current debates on principles of allocation will be addressed, such as debates about social justice, welfare rights and social and economic needs. Australia's future policy directions are considered in relation to the parameters of international models of welfare.

## SCPL2603

### Development and Welfare in East Asia Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Gyu-Jin Hwang **Session:** Semester 1 **Classes:** 6000 words of written work **Prerequisites:** SCLG1001 and SCLG1002 **Assessment:** 6000 words of written work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B S W, Dip Soc Sc, UG Study Abroad Program.

This unit explores social development and its transformation in East Asia by introducing key concepts and ideas associated with them. It then tests the universality of theories about social development by making comparisons within a specific country context as well as between countries in order to provide a wide range of possible ways of looking at more than one situation separated by time, space, and/or policy issue. It takes a state-market-society nexus as an organising theme and examines the various roles the state, market and civil society play in social development.

### SCWK2004

#### Psychology for Social Work 201 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Agi O'Hara **Session:** Semester 1 **Classes:** 2 lectures plus 1 tutorial/week **Prerequisites:** 48 junior credit points **Assessment:** one 1000-1500 word tutorial process diary, one 2 hour exam, online tutorial participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is only available to students enrolled in the Bachelor of Social Work and combined Bachelor of Arts/Bachelor of Social Work degrees.*

**Associated degrees:** B A, B S W, B S W, UG Study Abroad Program.

This unit of study focuses on theories and research in psychology that have most relevance to the practice of social work. Areas covered will be (i) Counselling Psychology, critically examining the theoretical foundations of counselling processes; (ii) Human Development, indicating the main patterns of development.

### SCWK2005

#### Psychology for Social Work 202 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Agi O'Hara **Session:** Semester 2 **Classes:** 2 lectures plus 1 tutorial/week **Prerequisites:** 48 junior credit points.

**Assessment:** one 1000-1500 word tutorial process diary, one 2 hour exam, online tutorial participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is only available to students enrolled in the Bachelor of Social Work and combined Bachelor of Arts/Bachelor of Social Work degrees.*

**Associated degrees:** B A, B S W, B S W, UG Study Abroad Program.

The unit of study focuses on psychological theories and research associated with mental health and several contemporary issues of particular relevance to the practice of social work. Strategies are introduced to assist in an understanding of the complex factors involved in experiences of child abuse, domestic violence, psychosocial aspects of HIV/AIDS, suicide awareness and prevention, drug and alcohol addiction, gambling, living with mental illness, and grief.

## SCWK2006

### Research Skills for Social Work Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Ms Margot Rawsthorne **Session:** Semester 2 **Classes:** 1 x 2 hr lecture weekly; 1 x 1 hr tutorial weekly. **Prerequisites:** 48 junior credit points **Prohibitions:** SCLG2602 **Assessment:** Library search exercise ((25%); presentation and 1000 wd essay (30%); essay (45%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S W, UG Study Abroad Program.

Social workers are increasingly required to understand and communicate the research base of their practice, and to become practitioner-researchers in their own right. This unit aims to help students develop an understanding of the ways social workers use research in different practice contexts: assessing community needs, formulating policies, developing new services, evaluating programs, enhancing social work practice, and developing theory. Students are introduced to quantitative and qualitative approaches and methods in social work research, in the context of specific practice fields including mental health, domestic violence, community development, and policy advocacy.

## SCWK3005

### Field Education 1 Education and Social Work

**Credit points:** 24 **Teacher/Coordinator:** Professor Barbara Fawcett **Session:** Semester 2 **Classes:** 2 hours/fortnight **Prerequisites:** SCWK3006, SCWK3007, SCWK3008 **Prohibitions:** SCWK3009, SCWK3010 **Assessment:** Pass/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B S W.

This unit is a compulsory, full time field education practicum of 60 days (Tuesday to Friday). In negotiation with the field educator, students produce a learning contract that sets out what they hope to learn, how this learning will happen and how, with their field educator, they will monitor and evaluate their learning. In addition, students attend fortnightly placement classes and peer support and accountability groups. These provide a forum in which to explore issues concerning the integration of practice and theory, as well as opportunities for support and consultation with other students and social work staff. Written assignments and oral presentations allow students to demonstrate their placement learning.

## SCWK3006

### Issue Based Learning Unit 1 Education and Social Work

**Credit points:** 8 **Teacher/Coordinator:** Dr Margot Rawsthorne **Session:** Semester 1 **Classes:** 4 hours/week **Prerequisites:** 96 Credit points to include SCPL2601; KOCR2600; SCLG2602 or SCWK2006; Either SCWK2004 and SCWK2005 or 12 intermediate Psychology credit points. **Corequisites:** SCWK3007, SCWK3008 **Assessment:** Essay (40%); group project (40%); presentation (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S W, UG Study Abroad Program.

The title and content of the unit will be selected from the following: Illness, inequality and intervention; Social justice, social citizenship and social work; Caring and citizenship; the case of disability; Families,

children and young people; Drugs and alcohol; the social work response.

## SCWK3007

### Issue Based Learning Unit 2 Education and Social Work

**Credit points:** 8 **Teacher/Coordinator:** Dr Sue Goodwin **Session:** Semester 1 **Classes:** 4 hours/week. **Prerequisites:** 96 Credit points to include SCPL2601; KOCR2600; SCLG2602 or SCWK2006; Either SCWK2004 and SCWK2005 or 12 intermediate Psychology credit points. **Corequisites:** SCWK3006, SCWK3008 **Assessment:** In-class exam (35%), tutorial presentation (25%), essay (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S W, UG Study Abroad Program.

The title and content of the unit will be selected from the following: Illness, inequality and intervention; Social justice, social citizenship and social work; Caring and citizenship: the case of disability; Families, children and young people; Drugs and alcohol; the social work response.

## SCWK3008

### Professional Practice Education and Social Work

**Credit points:** 8 **Teacher/Coordinator:** Ms Denise Lynch **Session:** Semester 1 **Classes:** 4 hours/week. **Prerequisites:** 96 Credit points to include SCPL2601; KOCR2600; SCLG2602 or SCWK2006; Either SCWK2004 and SCWK2005 or 12 intermediate Psychology credit points. **Corequisites:** SCWK3006, SCWK3007 **Assessment:** Assessment plan (15%), assessment report (35%), take home exam (30%), reflective journal (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S W, UG Study Abroad Program.

This unit of study addresses the theory-practice relationship and provides students with opportunities to engage with reflexive practice. It provides an introduction to the diversity of the professional practice of social work and aims to develop the capability of students to practise generic skills in social work practice and policy. There is an emphasis on understanding social work values and the fundamentals of ethical practice. Students are encouraged to recognise and build upon skills and knowledge they already have, and to develop their capabilities for acquiring further knowledge and skills.

## SCWK3009

### Social Work Preliminary Honours Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Ruth Phillips **Session:** Semester 2 **Classes:** 1x 3 hr seminar or 12 wks **Prerequisites:** SCWK3006, SCWK3007 and SCWK3008 **Corequisites:** SCWK3010 **Prohibitions:** SCWK3005 **Assessment:** Essay (25%); Literature review (35%); Research proposal (25%); Group presentation (15%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B S W, UG Study Abroad Program.

This unit assists students undertaking the Honours program in Social Work to further develop understanding of the role that research plays in social work practice and to develop knowledge, understanding and skills to both use and undertake research. As it is taken concurrently with the first field education placement, students apply their learning to the context of their social work field placement. They identify a research topic relevant to their placement context, conduct a literature review, explore ethical issues and develop a research proposal. Policies, ethical issues and critical debates in social work research will also be examined,

## SCWK3010

### Field Education 1 Honours Education and Social Work

**Credit points:** 18 **Teacher/Coordinator:** Ms Ros Giles **Session:** Semester 2 **Classes:** 2 hrs/fortnight **Prerequisites:** SCWK3006, SCWK3007 and SCWK3008 **Corequisites:** SCWK3009 **Prohibitions:** SCWK3005 **Assessment:** Pass/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B S W, UG Study Abroad Program.

This unit is a compulsory, full time field education practicum of 60 days (Tuesday to Friday). In negotiation with the field educator, students produce a learning contract that sets out what they hope to learn, how this learning will happen and how they will monitor and evaluate their learning. In addition, students attend fortnightly placement classes and peer support and accountability groups. These provide a forum in which to explore issues concerning the integration of practice and theory, approaches to investigating one's practice, as well as opportunities for support and consultation with other students and Social Work staff. Written assignments and oral presentations allow students to demonstrate their placement learning.

### SCWK4002 Integrative Studies 402 Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Zita Weber **Session:** Semester 2b **Classes:** 12 hours/week **Prerequisites:** SCWK4003; SCWK4005 **Corequisites:** SCWK4004, SCWK4006 **Assessment:** Journal article (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S W.

This is the final unit of study in the Bachelor of Social Work program and is of four weeks' duration. Through processes of critical reflection, students have an opportunity to look back on and consolidate knowledge and skills developed over the four years of the Bachelor of Social Work degree.

### SCWK4003 Issue Based Learning Unit 3 Education and Social Work

**Credit points:** 9 **Teacher/Coordinator:** Dr Lesley Laing **Session:** Semester 1a **Classes:** 12 hours/week (seminars and lectures) **Prerequisites:** SCWK3005; SCWK3006; SCWK3007; SCWK3008 **Assessment:** In class essay (15%), group development and presentation of a research proposal (35%); class participation statement (10%); essay (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S W.

This unit is the third of a sequence of four Issue Based Learning units. It is of five weeks duration and is intended to develop further students' capabilities in the transfer of knowledge and independent work. It builds on the knowledge and skills gained in Field Education I and includes preparation for Field Education IIA & IIB.

### SCWK4004 Issue Based Learning Unit 4 Education and Social Work

**Credit points:** 9 **Teacher/Coordinator:** Dr Lindsey Napier **Session:** Semester 2a **Classes:** 12 hours/week (seminars and lectures) **Prerequisites:** SCWK4003; SCWK4005 **Corequisites:** SCWK4002, SCWK4006 **Assessment:** Group project and presentation (40%), essay (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S W.

This unit is the fourth of a sequence of four Issue Based Learning units. It is of five weeks duration and is intended to develop further students' capabilities in the transfer of knowledge and independent work. It builds on the knowledge and includes skills gained in Field Education IIA & IIB.

### SCWK4005 Field Education 2A Education and Social Work

**Credit points:** 15 **Teacher/Coordinator:** Dr Fran Waugh **Session:** Semester 1b **Classes:** 2 hours/fortnight **Prerequisites:** SCWK4003 **Assessment:** Pass/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B S W.

This is the first part of a full time field education practicum of 80 days. In negotiation with the field educator, students produce a learning contract that sets out what they hope to learn, how this learning will happen, and how, with their field educator, they will monitor and

evaluate their learning. In addition, students attend fortnightly placement classes and peer support and accountability groups. These provide a forum in which to explore issues concerning the integration of practice and theory, as well as opportunities for support and consultation with other students and social work staff. Written assignments and oral presentations allow students to demonstrate their placement learning. Those students on placement outside the Sydney metropolitan area participate in weekly online classes and make a presentation at the end of placement.

### SCWK4006 Field Education 2B Education and Social Work

**Credit points:** 9 **Teacher/Coordinator:** Dr Fran Waugh **Session:** Semester 2a **Classes:** 2 hours/fortnight **Prerequisites:** SCWK4005 **Prohibitions:** SCWK4007, SCWK4008 **Assessment:** Pass/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B S W.

This is the second part of a field education practicum of 80 days.

### SCWK4007 Field Education 2B Honours Education and Social Work

**Credit points:** 3 **Teacher/Coordinator:** Dr Fran Waugh **Session:** Semester 2 **Classes:** 2 hrs/fortnight **Prerequisites:** SCWK3009, SCWK3010, SCWK4003 and SCWK4005 **Corequisites:** SCWK4002 and SCWK4004 **Prohibitions:** SCWK4006 **Assessment:** Pass/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B S W, UG Study Abroad Program.

This is the second part of a compulsory, full time field education practicum of 80 days (Monday to Friday). In negotiation with the field educator, student produce a learning contract that sets out what they hope to learn, how this learning will happen and how they will monitor and evaluate their learning. In addition students attend fortnightly placement classes and peer support and accountability groups.

### SCWK4008 Social Work Research Dissertation Education and Social Work

**Credit points:** 6 **Teacher/Coordinator:** Dr Ruth Phillips **Session:** Semester 2 **Classes:** 4 x 3 hrs seminar groups; 24 hrs participation in a social work research project. **Prerequisites:** SCWK3009, SCWK3010, SCWK4003 and SCWK4005 **Corequisites:** SCWK4002, SCWK4004 and SCWK4007 **Prohibitions:** SCWK4006 **Assessment:** Research report - 5000 wds; seminar presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B S W, UG Study Abroad Program.

In this unit students participate in a social work research project under the supervision of an academic staff member. Students will become familiar with the process of developing a research proposal and obtaining ethical approval for a study. Students will apply data collection processes as appropriate to the project and undertake analysis of this data. They develop the skills required to present the findings of their research project both orally and through a research dissertation. Ethical issues and critical debates in social work research will also be examined.

### SING4052 Topics in Physiotherapy Management Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** SIM: block mode **Assessment:** Presentation (50%), written report (50%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Phy).

This unit of study module provides the student with knowledge and skills in quality management and health promotion appropriate for physiotherapy practice. It consists of two discrete components related to the delivery of physiotherapy services: the first component focuses on quality management and the second on health promotion. The

quality management component aims to explore the principles and procedures of quality management specifically in relation to evaluation of patient outcomes. Prior knowledge is built up in such a way as to ensure that the student will be able to evaluate physiotherapy services using valid and reliable criteria. This component provides the student with the opportunity to identify areas in which evaluation can be used to direct physiotherapy intervention; to discuss practical aspects as well as philosophical issues related to measurement of outcome; and to investigate the variety of measures used to assess clinical outcomes. The student will also explore these issues in the student's own workplace and develop a project proposal. Factors considered in determining the effectiveness of a physiotherapy service will include the direct and indirect costs of the service and the benefits gained by both individuals and the community. The health promotion component will provide the student with an overview of the principles and practice of health promotion which is explored within a community based framework. These principles relate to the skills a physiotherapist can offer in delivering a well planned health promotion project for a specific community group such as ageing and or working populations. The student will critique a health promotion program that has been implemented in the student's community. This will provide a discussion with the other students. In analysing the health promotion program the student will develop critical skills giving due consideration to the program's appropriateness for the specific group being targeted and the health problem the program is attempting to prevent.

#### **SING4054**

##### **Community Based Programs Development Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: block mode **Assessment:** Presentation and writeup (30%), written proposal (70%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (OT).

This unit provides students with the opportunity to understand the issues of service provision within a community context and to explore a range of strategies which underpin the development of community based programs relevant to the needs of the Singapore population. Students will have the opportunity to attend and participate in workshops which focus on microskills appropriate for use in community occupational therapy.

#### **SING4055**

##### **Managing Occupational Therapy Services Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode **Assessment:** Presentation and writeup (30%), written proposal (70%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (OT).

This unit provides students with the opportunity to review current managerial theories and practice which can be applied to the planning, organising, staffing, leading and continuous quality improvement of occupational therapy services in the Singapore context. Emphasis will be placed on the use of evidence-based health care, and the use of an evidence-based approach to making management decisions at micro and macro levels and in related clinical service delivery.

#### **SING4056**

##### **Cognitive & Perceptual Components of OT Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode **Assessment:** 3000 word written assignment (100%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (OT).

This unit will extend students' knowledge and skills relative to occupational therapy management of children and adults who have neurological conditions which affect their occupational performance. The emphasis will be on the assessment and treatment of cognitive/perceptual disorders that interfere with the performance of everyday tasks and routines.

#### **SING4057**

##### **Advanced Communication Techniques in OT Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode **Assessment:** Reflective writing exercise (30%), 2000 word written assignment (70%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (OT).

This unit introduces students to a range of advanced communication techniques for the development of self, clients and significant others. Identification of own and others' learning styles, conflict resolution, negotiation, assertive, neurolinguistic and summarising techniques will be addressed, with specific reference to their application in cognitive, intra- and interpersonal components of performance.

#### **SING4059**

##### **Computer Communication in MRT Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** SIM: Block mode **Assessment:** Class test (20%), assignment (40%), exam (40%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT).

This module provides students with an understanding of the design implications of digital image management and the communication systems needed to facilitate patient care. Concepts involving Picture Archival and Communication Systems (PACS), DICOM, Radiology Information System (RIS), tele-radiology and record and verify systems will be discussed. Guidelines concerning information security and confidentiality will be discussed. The impact of image matrix size on image quality, information storage, data transfer rates, display capability and the need for storage compression will be examined. This module also provides the student with the opportunity to examine a range of computer methods to efficiently utilise staff time and resources within a medical radiation department. Within this module special attention will be given to either diagnostic radiography or radiation therapy as appropriate to the student.

#### **SING4061**

##### **The Quality Perspective Applied to MRT Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** SIM: Block mode **Assessment:** Presentation (25%), two written assignments (35% and 40%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT).

This unit of study introduces the experienced radiographer and therapist to many of the current aspects of the quality perspective. It gives a foundation in the development of the quality perspective and its application to MRT and encourages the experienced radiographer and therapist to examine the management of quality in their work place. The application of quality monitoring to important routine tasks in the MRT environment is explored.

#### **SING4062**

##### **Health Care Ethics Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode **Assessment:** Group presentation work (20%), exam (80%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing), B Hlth Sc (OT), B Hlth Sc (Phy).

In this module students will be introduced to some major ethical theories and consider ethical issues which are central to the delivery of good health care. Students will be expected to contribute to the case study discussions, and to reflect on the ethical nature of health care practice in general, and their own practice in particular.

#### **SING4063**

##### **Legal Perspectives and Health Care**

**Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Court report (20%), exam (80%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing), B Hlth Sc (OT), B Hlth Sc (Phy).

The aim of this module is to provide an overview of basic principles of law relating to health care. It involves an examination of the structure and process of law and the legal system, together with a discussion of case law and legislation relevant to health care. It is becoming increasingly important for health professionals to know and understand the legal context within which they live and work, the rights of health consumers and the obligations of health care providers.

**SING4064****Patient/Client Education  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Pre-module work (15%), assignment (85%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing), B Hlth Sc (Phy).

The primary focus of this unit is to nurture the confidence and skills that will motivate health professionals to undertake teaching in their work environment. Thus the emphasis of the unit is on the teacher as planner and teacher as facilitator of learning. Embedded throughout are the three themes of thinking like a teacher, the learner as active participant and learning as change. Participants are prompted to explore some of the microskills of teaching and in so doing also come to recognise what is 'personally distinctive' about their own style of teaching.

**SING4065****Managing Resources in Health Services  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Assignment (25%), exam (75%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing), B Hlth Sc (OT), B Hlth Sc (Phy).

This unit has been designed to provide students with an appreciation of their ability, as health professionals, to influence the costs of healthcare. Topics include health economics, accounting, budgeting, goal setting, time management and decision making. The implications of casemix and other funding systems for patients and health professionals will also be studied.

**SING4066****Pathophysiology A  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Worksheet (15%), exam (85%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing), B Hlth Sc (OT), B Hlth Sc (Phy).

Pathophysiology A examines the pathophysiological processes underlying certain disease conditions. A body systems approach is used, and the major systems covered in this module are the immune system, the cardiovascular system, the renal system and the pulmonary system. A case study approach is used to illustrate the features of disease, the signs and symptoms, risk factors and causative factors. The pathophysiological processes underlying the breakdown of the functional integrity of the system and anomalies that contribute to the disease condition are emphasised. Relevant clinical tests for the diagnosis and monitoring of disease and the treatment rationales are also presented. The relationship between clinical pathways and basic pathophysiological processes will be considered. Where appropriate, the normal structure and functions of the relevant body system are covered.

**SING4067****Pathophysiology B  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Worksheet (15%), exam (85%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing), B Hlth Sc (OT), B Hlth Sc (Phy).

Pathophysiology B complements SING4066 Pathophysiology A by further examining the pathophysiological processes underlying disease conditions. In this module the major systems covered are the immune system, the endocrine system, the digestive system and the nervous system. Neoplasia is also a major concept covered within this module. Case studies are used to illustrate the features of disease, the signs and symptoms, risk factors and causative factors. The underlying pathophysiological processes are emphasised. Relevant clinical tests for the diagnosis and monitoring of disease and the treatment rationales are also presented. The relationship between clinical pathways and basic pathophysiological processes will be considered. Where appropriate, the normal structure and functions of the relevant body system are covered.

**SING4068****Research Methods: Design  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Exam (80%), research proposal (20%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing).

This unit introduces students to the concept of scientific research by defining the key approaches, methods and designs used in carrying out research, particularly within the health professions and health care settings. It incorporates an outline of the research process which will guide students through the completion of a simple descriptive study. Students will develop basic skills related to instrument design, data collection and data analysis. SPSS software will be used to facilitate achievement of the objectives.

**SING4069****Research Methods: Analysis  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Research report (20%), exam (80%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing).

The unit examines issues related to research design and how best to analyse and interpret data collected using a variety of experimental and non-experimental designs. Students are given the opportunity to apply the various skills in the conduct of a clinical-focused group research project.

**SING4070****Sociology of Work and Organisations  
Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Mini-poster (30%), exam (70%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing), B Hlth Sc (OT), B Hlth Sc (Phy).

This unit of study examines sociological perspectives relating to work and organisations. It includes the study of the nature of work and occupational structures in modern societies, occupational choice and professionalism. Also included is an examination of the structural aspects of organisations with an emphasis on the hospital as the major work place of health care professionals.

**SING4071****Patient-Practitioner Relationships**

**Health Sciences**

**Credit points:** 3 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Class presentation (20%), exam (80%) **Campus:** Cumberland  
**Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT), B Hlth Sc (Nursing), B Hlth Sc (Phy).

This unit of study examines sociological perspectives relating to the patient-practitioner relationship. It includes the study of the generic professional-client model, the sick role and other models of patient-practitioner relationships, and the key interpersonal aspects of the work of health care professionals. Consideration will be given to the nature of health care as emotion work; aspects of sociology of the body and the stigma associated with illness, disease and disability; and the skills required to facilitate communication and interaction in the patient-practitioner relationship.

**SING4072**
**Nursing Knowledge and Health Care**  
**Health Sciences**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Exam (50%), assignment (50%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Nursing).

This unit will provide the student with an overview of the way in which society provides health care for its members. It will explore definitions of health and factors contributing to health and illness. The unit will examine the development and operation of the Singapore health care system, focusing particularly on the role of nursing. The unit will examine the development of nursing knowledge and the way research provides evidence for practice in health care and nursing.

**SING4075**
**Integrated Diagnosis and Treatment**  
**Health Sciences**

**Credit points:** 3 **Session:** Semester 1 **Classes:** SIM: Block mode  
**Assessment:** Presentation (25%), written assignment (25%), exam (50%)  
**Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (MRT).

This unit of study will allow students to gain an understanding of the interrelationship of imaging and treatment paradigms for selected regions of the body and disease processes. The regions addressed will be selected from the central nervous system, the gastrointestinal tract, skeletal system, thyroid, breast, chest, pelvis and lymphatics. The processes discussed will be specific to a region.

**SING4076**
**Radiographic Interpretation of Pathology**  
**Health Sciences**

**Credit points:** 3 **Session:** Semester 1 **Classes:** SIM: Block mode  
**Assessment:** Presentation (20%), two written assignments (40% ea) **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: For diagnostic radiography students only*

**Associated degrees:** B Hlth Sc (MRT).

This module will introduce the diagnostic radiographer to the radiographic interpretation of disease processes such as neoplasms, abnormalities of the respiratory system and central nervous system, emergency trauma radiology and congenital disorders, malformations and diseases in the paediatric patient.

**SING4077**
**Imaging Applications in RT**  
**Health Sciences**

**Credit points:** 3 **Session:** Semester 1 **Classes:** SIM: Block mode  
**Assessment:** Group presentation (20%), two written assignments (40% ea)  
**Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: For radiation therapy students only*

**Associated degrees:** B Hlth Sc (MRT).

This unit provides an introduction and understanding of the key role played by the various imaging modalities used in the diagnosis and treatment planning of malignant disease. These modalities include

planar radiographs, CT, MRI, NM Imaging, PET, Ultrasound and Portal Imaging including EPI. The advantages of using each in the practice of radiation therapy will be addressed as well as their limitations.

**SING4083**
**Evidence Based Practice**  
**Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Written report (40%), exam (60%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Phy).

This unit of study provides students with the knowledge and skills needed to critically evaluate clinical epidemiology research; ie, research investigating treatment effectiveness, the utility of diagnostic tests and the causes and prognosis of disease. This knowledge and these skills can be used to improve clinical practice.

**SING4084**
**Advanced Musculoskeletal Physiotherapy**  
**Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Written assignment (50%), exam (50%) **Campus:** Cumberland  
**Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Phy).

The aim of this module is to assist the student in developing clinical reasoning skills and to apply these skills in identifying priorities in the treatment of complex cases in the area of musculoskeletal physiotherapy. Where appropriate, the student will be encouraged to integrate clinical management skills across other areas of physiotherapy management. The student will be asked to apply clinical reasoning skills to develop treatment strategies to address priorities.

**SING4085**
**Advanced Cardiopulmonary Physiotherapy**  
**Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Two group exercises (30%), individual written assignment (70%)  
**Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Phy).

The aim of this module is to assist the student in developing clinical reasoning skills and to apply these skills in identifying priorities in the treatment of complex cases in the area of cardiopulmonary physiotherapy. Where appropriate, the student will be encouraged to integrate clinical management skills across other areas of physiotherapy management. The student will be asked to apply clinical reasoning skills to develop treatment strategies to address priorities.

**SING4086**
**Advanced Neurological Physiotherapy**  
**Health Sciences**

**Credit points:** 3 **Session:** Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Presentation (30%), written assignment (70%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Phy).

The aim of this module is to assist the student in developing clinical reasoning skills and to apply these skills in identifying priorities in the treatment of complex cases in the area of neurological physiotherapy. Where appropriate, the student will be encouraged to integrate clinical management skills across other areas of physiotherapy management. The student will be asked to apply clinical reasoning skills to develop treatment strategies to address priorities.

**SING4087**
**Nursing and Health Assessment**  
**Health Sciences**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode  
**Assessment:** Exam (50%), assignment (50%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Nursing).

This unit will examine aspects of nursing practice, with special emphasis on patient/client assessment and the planning of nursing care. The unit utilises a clinical case study approach through the use of clinical case studies that focus on the nursing management of patients with varying degrees of clinical and social complexity. Students are expected to apply knowledge and skills encountered in previous units of study in the analysis of the case studies.

### SING4088

#### Nursing in Complex Clinical Situations Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** SIM: Block mode **Assessment:** Assignment (60%), interview (10%), assignment (30%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B Hlth Sc (Nursing).

This unit will examine aspects of nursing practice, with special emphasis on the pharmacological aspects of patient/client management. The unit utilises a clinical case study approach through the use of clinical case studies that focus on the nursing management of patients with varying degrees of management and social complexity. Students may apply knowledge and skills encountered in previous units of study in the analysis of the case studies.

### SLSS1001

#### Introduction to Socio-Legal Studies Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Deirdre Howard-Wagner **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Assessment:** class participation (10%), one 1500 word take-home exam (40%), one 3000 word essay (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to Bachelor of Arts and Sciences and Bachelor of Socio-Legal Studies only*

**Associated degrees:** B A S, B S L S, B S T, UG Study Abroad Program.

This unit provides students with an introduction to the understanding of legal ideas, institutions and practices in their social and historical contexts. It will provide an historical overview of legal institutions and forms of law in Australia, the place of the idea of the rule of law in state-formation, liberalism, processes of civilization and colonialism, law and the public/private distinction, changing conceptions of human rights, as well as outlining the central features of the various fields of law.

*Textbooks*

Unit reader will be available through the Copy Centre

### SLSS1003

#### Law and Contemporary Society Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Rebecca Scott Bray **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Assessment:** one 500 word tutorial presentation, one 1500 word take-home exam, one 3000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to Bachelor of Arts and Sciences and Bachelor of Socio-Legal Studies only*

**Associated degrees:** B A S, UG Study Abroad Program.

This unit provides an understanding of the central themes and issues in social scientific analyses of the operation of law in society. After briefly outlining the various ways in which social life is organised in terms of law, the unit will examine a range of key concerns in the development of legal ideas, institutions and processes today, including the increasing legal regulation of private life, law and science, human rights, the globalisation of law, terrorism, risk and security, law and social inequality and citizenship.

*Textbooks*

Unit reader will be available through the Copy Centre

### SLSS2601

#### Socio-Legal Research

### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Deirdre Howard-Wagner **Session:** Semester 1 **Classes:** one 1 hour lecture and one 2 hour tutorial per week **Prerequisites:** SLSS1001 and SLSS1003 or SLSS1001 and SLSS1002 **Assessment:** one tutorial presentation, one 2000 word content analysis exercise and one 2000 word research essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to Bachelor of Socio-Legal Studies only*

**Associated degrees:** B A S, B S L S, B S T.

This unit will develop an understanding of social science research methods as they apply to socio-legal studies. It will therefore discuss the theoretical aspects of research design and methodology and provide an overview of the main research methods applicable in socio-legal studies. These will include the development of research questions; examination of statutes, legislation, case law and law reform debates; library and archive research; content analysis and discourse analysis; interviewing; participant observation; data recording, coding and analysis; and research ethics.

*Textbooks*

Unit reader available through the University Copy Centre

### SLSS2603

#### Medico-Legal and Forensic Criminology Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Rebecca Scott Bray **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** SLSS1001 and SLSS1003 or SLSS1001 and SLSS1002 **Assessment:** 4500 words of written work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to Bachelor of Socio-Legal Studies only*

**Associated degrees:** B A S, B S L S, B S T.

This unit of study explores the relationship between crime, law, medicine and science in society by specifically examining the history of criminal detection practices, death investigation systems and the coroner's office, the role of medicine and science in criminal justice and socio-legal management of the dead. Students will be introduced to developing areas in medico-legal and forensic criminology, such as DNA, and will explore specific issues and case studies such as euthanasia/end of life and human tissue and organ controversies.

*Textbooks*

readings will be available at the University Copy Centre

### SMTP1000

#### Communicating Effectively in Teams Medicine

**Session:** Semester 1 **Classes:** 3 small group sessions of 90 minutes **Assessment:** Attendance, short written formative test **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Adv)(Hons), M B B S, B Com, M B, B S, B Ec, M B, B S, B Med Sc, M B, B S, B Mus Studies, M B, B S, B Sc (Adv), M B, B S.

This unit will enable students to develop the skills that will prepare them for the medical program.

### SMTP2000

#### Introduction to Clinical Research Ethics Medicine

**Session:** Semester 2 **Classes:** 3 small group sessions of 90 minutes plus attendance at 2 Research Ethics Committee meetings (University and hospital). **Assessment:** Attendance, short written formative test **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Adv)(Hons), M B B S, B Com, M B, B S, B Ec, M B, B S, B Med Sc, M B, B S, B Mus Studies, M B, B S, B Sc (Adv), M B, B S.

This unit will enable the students to develop the skills that will prepare them for the medical program.

### SMTP3007

#### SMTP Elective I

## Medicine

**Session:** S1 Late Int, S2 Late Int **Classes:** project work **Assessment:** Report describing the elective topic or activities **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Adv)(Hons), M B B S, B Com, M B, B S, B Ec, M B, B S, B Med Sc, M B, B S, B Mus Studies, M B, B S, B Sc (Adv), M B, B S.

The unit will enable the students to develop the skills that will prepare them for the medical program. Students must obtain approval for their project work from the coordinator of the combined medical degree program.

### SNGP3001

#### Advanced Clinical Nursing Assessment Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures/tutorials, and independent learning/online **Assessment:** case study health history, reflective journal, WebCT participation and community profile **Campus:** Singapore **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit of study focuses on the advanced clinical abilities required for nursing assessment of patients, families and communities in the 21st century. Students will learn how to assess a patient's condition, physically and mentally, and to make insightful nursing observation that can inform practice. At the community level, and in the wider socio-economic context, students will study emerging patterns of disease.

### SNGP3002

#### Health Illness & Care: Int'l Perspective Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** lectures/tutorials, and independent learning/online **Assessment:** assignments, exam **Campus:** United Arab Emirates **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit critically analyses international concepts of health, illness, and care. It investigates the ways in which historical forces have shaped ideas and beliefs about health and illness. The unit also examines the structure of contemporary societies, emphasising the relationship between social structures, cultural factors, and the distribution of health and illness. In particular it examines the effects of social inequalities on the health of vulnerable, at-risk, and marginalised groups.

### SNGP3003

#### Clinical and Patient Education Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures/tutorials, and independent learning/online **Assessment:** essay and exam **Campus:** Singapore **Mode of delivery:** Block Mode

**Associated degrees:** B N.

The field of clinical and patient education is explored in the context of the practice professions and continuing changes in technologies, information and evidence bases for practice. The unit involves a study of the literature on the nature of learned and performed skills, what factors affect changing understandings, beliefs, dogma and practice(s) in clinical settings and subsequently clinical and patient education. The unit is interdisciplinary in approach and has a fieldwork/practice component.

### SNGP3004

#### Minor Thesis/Practice Project Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** lectures/tutorials, and independent learning/online **Prerequisites:** 24 unspecified credit points **Assessment:** 1x5000wd essay **Campus:** Singapore **Mode of delivery:** Block Mode

**Associated degrees:** B N.

Students undertake advanced work on an area of practice, or a particular practice, in nursing. The project will involve three stages: first, conducting a review of the available research literature; second,

examining other forms of evidence, such as written policies and protocols or actual practices; and third, composing a written report on the ways in which practice can be enhanced and/or further investigated by original research. This project will be highly suited to currently practising nurses whose professional responsibilities and interests include clinical leadership, management of a clinical service or practice development and/or the use of evidence in practice.

### SNGP3005

#### Nursing Management & Clinical Governance Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** lectures/tutorials, and independent learning/online **Assessment:** assignments, exam **Campus:** Singapore **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This course provides a forum for experienced practitioners to enhance their skills and knowledge of nursing management and clinical governance and to develop a framework for their implementation. The structure of the course will enable participants to explore and critique issues surrounding clinical governance in the context of care provision, organisational climate and culture, quality, clinical and professional leadership and financial responsibility. This course utilises a better practice (continuum of care / quality / cost / utilisation and health outcomes) framework.

### SNGP3007

#### Inquiry and Research in Nursing Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** lectures/tutorials, and independent learning/online **Assessment:** research proposal, exam **Campus:** United Arab Emirates **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit of study builds on the tenet throughout the course that research is integral to all aspects of nursing theory, education, application and practice. Nursing (and midwifery) research will be the focus of examination and critique. A critical analysis of various modes of inquiry will be used to investigate aspects of nursing practice and relevant nursing issues. A variety of perspectives, methodologies and methods that constitute modes of inquiry will be included. This unit will assist students to develop research knowledge and prepare them for future research activities. Opportunities will be provided to experience the inquiry process with reference to clinically related situations or to areas that have an implication for nurses (and midwives) and their practice.

### SNGP3008

#### Applied Pharmacology in Nursing Practice Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures/tutorials, and independent learning/online **Assessment:** assignments and exam **Campus:** Singapore **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit of study is designed to provide students with the opportunity to consolidate and extend their knowledge and skills in relation to the therapeutic applications of drugs based on their underlying pharmacology. Students will review fundamental definitions of pharmacological terms, including drug absorption, distribution, metabolism, and excretion and review the basic principles of pharmacokinetic and pharmacodynamic drug handling. The major focus of this unit is on the pharmacological aspects of medical therapy in various populations, including neonatal/paediatric, adult and geriatric patients. Students will learn how to apply specific pharmacological knowledge in the clinical management of special patient groups. A problem-based learning approach is used in this unit of study in a quality of care / safe medication administration framework.

### SNGP3009

#### Nursing, Knowledge and Practice

**Nursing and Midwifery**

**Credit points:** 6 **Session:** Semester 1 **Classes:** lectures/tutorials, and independent learning/online **Assessment:** essay and exam **Campus:** United Arab Emirates **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit of study examines the historical background to, and current debates surrounding, how nurses have established their knowledge and practice. In addition to examining the historical records in relation to nursing as a discrete area of knowledge and practice in health care, this unit of study analyses and critiques current trends, ethical considerations, and discourses in nursing and how they impact on understandings of the nature of nursing knowledge and contemporary practice(s).

**SNGP3010****Law and Ethics in Health Care Nursing and Midwifery**

**Credit points:** 6 **Session:** Semester 2 **Classes:** lectures/tutorials, online **Assessment:** essay and exam **Campus:** Singapore **Mode of delivery:** Block Mode

**Associated degrees:** B N.

This unit of study explores the legal and ethical dimensions in health and social care, with a particular focus on nursing. This module will enable students to gain a critical understanding and applied appreciation of health-related law and ethics, whilst exploring its application and affect on nursing practice. Topics covered in this unit include government regulation of health care, including resource-allocation and professional practice, as well as legal issues relating to professional liability (consent, negligence, confidentiality and autonomy). This unit of study also considers traditional and contemporary ethical theory, moral decision making, articulating moral arguments, critiquing arguments, and exploring values in ethical decision-making. In doing so, this unit of study also explores the values held by professionals, as the concepts of rights and responsibilities increasingly impact on professional nursing practice.

**SOIL2003****Soil Properties and Processes****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Balwant Singh (Coordinator), Prof Alex McBratney, Dr Stephen Cattle **Session:** Semester 1 **Classes:** (3 lec & 3hr prac)/wk **Assessment:** Prac book and fieldtrip report (15%), 3 Quizzes (15%), essay (5%), practical exam (25%), written exam (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Environmental), B Sc Agr, UG Study Abroad Program.

This unit of study is designed to introduce students to the fundamental concepts within pedology, soil physics and soil chemistry. These concepts are part of the grounding principles that underpin crop and animal production, nutrient and water cycling, and environmental sustainability taught by other units of study in the Faculty. Students will participate in a two-day field excursion in the first week of semester to examine some common soils of the Sydney Basin, they will also learn to describe soil, and measure soil chemical and physical properties in the field. Referring to common soil profiles of the Sydney Basin, students will concentrate on factors affecting soil formation, the rudiments of soil description, and analysis of soil properties that are used in soil classification. Students will also develop knowledge of the physics of water and gas movement, soil strength, soil chemical properties, inorganic and organic components, nutrient cycles and soil acidity in an agricultural context. At the end of this unit students will become familiar with the factors that determine a soil's composition and behaviour, and will have an understanding of the most important soil physical and chemical properties. Students will develop communication skills through essay, report and practical exercises. The final report and laboratory exercise questions are designed to develop team work and collaborative efforts.

**SOIL2004****The Soil Resource****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Stephen Cattle (Coordinator), Prof Alex McBratney, A/Prof Balwant Singh **Session:** Semester 2 **Classes:** (2 lec, 2 pracs)/wk, 24 hr (5 days) field work out of semester time **Assessment:** Literature review exercise (10%), soil description and mapping report (20%), laboratory report (15%), 2 hr exam (50%), field excursion participation (5%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Environmental), B Sc Agr, UG Study Abroad Program.

This unit will familiarize students with the description and mapping of soil types in the Australian landscape, with common analytical methods for soil and with the various forms of degradation that may alter the quality and function of soil. It is an applied soil science unit which builds on the fundamental soil science concepts learned in the SOIL2003 unit. The first practical component of the unit, a five-day soil survey, will give students experience in soil description and classification in the field, and soil samples collected during this survey will be subsequently analysed for a variety of attributes by the students in laboratory practicals. In the lecture series, topics including soil type distribution, soil quality, soil function, soil fertility and soil degradation will be discussed and linked to practical sessions. By the end of this unit, students will be able to construct maps of soil properties and soil type distribution, describe primary soil functions, soil attributes and types of soil degradation in an agricultural context, and be able to recognize and communicate the ability of a soil profile to sustain plant growth. Students will gain research and inquiry skills by collecting, analyzing and interpreting soil survey data. They will improve their information literacy skills by carrying out a literature review exercise, and will gain communication skills by having to prepare and present a poster.

**SOIL3009****Contemporary Field and Lab Soil Science****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Prof Alex McBratney (coordinator), A/Prof Balwant Singh, Dr Stephen Cattle, Dr Budiman Minasny **Session:** Semester 1 **Classes:** (2 lec, 2 prac)/wk, 6-day field excursion **Prerequisites:** SOIL2003 **Assessment:** One 2hr exam; pedology, soil physics and soil chemistry written assessments; group presentation, synthesis paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

This is a theoretical and empirical unit providing specialised training in three important areas of contemporary soil science, namely pedology, soil chemistry and soil physics. The key concepts of these sub-disciplines will be outlined and strengthened by hands-on training in essential field and laboratory techniques. All of this is synthesized by placing it in the context of soil distribution and use in North-Western New South Wales. The unit is motivated by the teaching team's research in this locale. It builds on students existing soil science knowledge gained in SOIL2003. After completion of the unit, students should be able to articulate the advantages and disadvantages of current field & laboratory techniques for gathering necessary soil information, and simultaneously recognise key concepts and principles that guide contemporary thought in soil science. Students will be able to synthesise soil information from a multiplicity of sources and have

an appreciation of the cutting edge areas of soil research. By investigating the contemporary nature of key concepts, students will develop their skills in research and inquiry. Students will develop their communication skills through report writing and oral presentations and will also articulate an openness to new ways of thinking which augments intellectual autonomy. Teamwork and collaborative efforts are encouraged in this unit.

### SOIL3010

#### The Soil at Work

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Prof Alex McBratney (coordinator) A/Prof Balwant Singh, Dr Stephen Cattle (facilitators) plus research-only academics **Session:** Semester 2 **Classes:** Problem-based unit: each student completes 2 problems; 4 x 3 hr workshops per problem (each student attends 8 workshops in total) **Prerequisites:** SOIL2003 or SOIL2004 **Assessment:** For each of two scenarios: Statement of the problem report (12.5%) - shared info, but two team reports; How to tackle problem seminar (12.5%) - team seminars, before fieldwork, analyses done; Results seminar (12.5%) - team seminars; Final report (12.5%) - individual work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

This is a problem-based applied soil science unit. It is designed to allow students to identify soil-related problems in the real-world and by working in a group and with an end-user to suggest short and long-term solutions to such problems. This is a core unit for students majoring or specializing in soil science and an elective unit for those wishing to gain an understanding of environmental problem-solving. It utilises and reinforces soil-science knowledge gained in SOIL2003 and/or SOIL2004 and problem-solving skills gained during the degree program. This unit will address real-world scenarios which involve soil-related problems such as carbon management, structural decline, acidification, salinisation and contamination. Students will gain some understanding of the concept of sustainability, and will be able to identify the causes of problems by reference to the literature, discussion with landusers and by the design and execution of key experiments and surveys. They will gain a focused knowledge of the key soil drivers to environmental problems and will have some understanding on the constraints surrounding potential solutions. By designing and administering strategies to tackle real-world soil issues students will develop their research and inquiry skills and enhance their intellectual autonomy. By producing reports and seminars that enables understanding by an end-user students will improve the breadth of their communication skills.

"Rumbos" (Alternate edition) by Pellettieri et al. (Thomson Heinle)

**SPAN2621****Spanish Culture 1****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathryn Crameri **Session:** Semester 1 **Classes:** One 2 hour seminar per week **Prerequisites:** SPAN1002 or SPAN1602 **Assumed knowledge:** SPAN2601, SPAN2602 **Assessment:** 3000 word essay, oral presentation (equivalent to 1500 words), short written tasks (equivalent to 1500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit, taught in Spanish, presents students with a variety of texts of mainstream Spanish literature and film, discussing major cultural trends in the context of the history of Spain in the twentieth century.

**SPAN2622****Latin American Culture 1****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Vek Lewis **Session:** Semester 2 **Classes:** One 2 hour seminar per week **Prerequisites:** SPAN1002 or SPAN1602 **Assessment:** 3000 word essay, oral presentation (equivalent to 1500 words), short written tasks (equivalent to 1500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit, taught in Spanish, presents students with a variety of Latin American texts from modern and contemporary popular culture. Students are exposed to a range of different traditions and approaches to reading popular forms in the context of the history and culture of Latin America.

**SPAN2631****Cultural and Social Change in Spain****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathryn Crameri **Session:** Semester 1 **Classes:** One 1 hour lecture and one 1 hour seminar per week **Prerequisites:** 12 junior credit points **Assessment:** In-class oral presentation in a small group (equivalent to 1000 words), individual written memorandum on research for the presentation (1000 words, to be submitted at the time of the presentation), mid-semester in-class test (1000 words), researched essay (3000 words) to be handed in at the end of the course. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Lang Stud, UG Study Abroad Program.

Spanish society has changed dramatically over the last half century. The restrictions on personal freedoms that were part of the Franco regime have been lifted to reveal a liberal, tolerant European society that nevertheless still shows some elements of its conservative heritage. This unit (taught in English) explores contemporary Spanish society and culture to show the reasons for the changes, and their effects. The areas under discussion will be family, sexuality and gender; class, money and consumerism; and mass/popular culture.

**SPAN3601****Advanced Spanish 1****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathryn Crameri **Session:** Semester 1 **Classes:** 3 hours of language tutorials per week **Prerequisites:** SPAN2002 or SPAN2602 **Prohibitions:** 3rd year language units completed at UNSW **Assessment:** Short oral tasks (equivalent to 500 words), essay (1500 words), listening test (500 words), written exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit allows students to further develop the language skills they have already acquired and reach a high level of competence in speaking, understanding, reading and writing Spanish. It also aims to increase students' cultural awareness of the Spanish-speaking world through the study of topics relating to contemporary issues.

### SPAN3621

#### Latin American Film and Literature Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Vek Lewis **Session:** Semester 1  
**Classes:** One 2 hour seminar per week **Prerequisites:** SPAN2002 or SPAN2602 **Prohibitions:** SPAN3006 **Assessment:** Short written tasks (1500 words), in-class presentation (equivalent to 1500 words), final 3000 word essay.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

In this unit (taught in Spanish) students are exposed to a range of literary and filmic works from Latin America. The unit examines how these two modes of cultural production have interacted and reshaped one another. Literary narratives have changed formally, stylistically and thematically due to the influence of several genres of Mexican, Brazilian and Argentinean cinema, as well as those of Hollywood and European cinema. The unit provides grounding in literary and film theory and familiarises students with debates around industry, audience reception and reading codes.

### SPAN3622

#### Introduction to Spanish Translation Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** One 2 hour seminar per week  
**Prerequisites:** SPAN3601 **Assessment:** Translation tasks (equivalent to 2000 words), group work in class, presentation and research paper (equivalent to 1500 words), translation analysis (1500 words), final in-class test (equivalent to 1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit presents an introduction to various aspects of translation and provides practical work in both English and Spanish, translating from a wide range of materials. It will explore modes, techniques and genres in a variety of texts.

### SPAN3623

#### Argentina for Export Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Fernanda Peñaloza **Session:** Semester 2 **Classes:** One 1 hour lecture and one 1 hour tutorial per week  
**Prerequisites:** SPAN 2602 Intermediate Spanish 2 or equivalent level of Spanish language **Assessment:** one essay (3000 words), one research journal (1500 words), group presentation written plan (500 words), 10 minute group presentation (equivalent to 1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit (taught in Spanish) explores the images associated with figures such as Eva Perón and Ernesto Che Guevara, the musical genre of tango and the seemingly boundless landscape of Patagonia. We will focus on the way in which different cultural elements frequently perceived as part of Argentina's cultural history have been created, appropriated and commodified within and beyond the country's national boundaries, giving special attention to globalisation as a framework for approaching the relationship between identity representation and commodification.

**SPAN4011****Spanish & Latin American Studies Hons A  
Arts**

**Credit points:** 12 **Teacher/Coordinator:** Dr Vek Lewis **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per week per seminar course (2 seminar courses in each semester), one language tutorial per week and dissertation supervisions **Prerequisites:** 48 senior credit points in Spanish and Latin American Studies with at least a credit average. At least 24 credit points must be in language units of study. **Assessment:** 12000-15000 word thesis written either in English or Spanish (50%); essays and assessed presentations relating to the seminar courses taken in each semester (4000-5000 words or equivalent for each course). (12.5% each.) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B A (Lang)(Hons), Dip Lang Studs (Hons).

The Spanish and Latin American Studies honours program is designed to extend both the linguistic and cultural competencies of students who already have an advanced knowledge of the Spanish language. Honours involves four semester-length seminar courses on different topics in Latin American and Spanish culture and society, an advanced language course, and a dissertation of 12000-15000 words on a topic of interest to the student, prepared with the guidance of a member of staff.

**SSCI2601****Social, Political and Economic Thought 1  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jennifer Wilkinson **Session:** Semester 1 **Classes:** one 1 hour lecture and one 2 hour tutorial per week **Prerequisites:** SSCI1003 **Prohibitions:** SSCI1001, SSCI2001 **Assessment:** one 2500 word essay (40%), class presentation and discussion (30%), one 2000 word take-home exam (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Bachelor of Social Sciences only*

**Associated degrees:** B Soc Sci.

This is a core theory unit for the Bachelor of Social Sciences. The unit explores the theme of the social sciences and society by critically examining debates across the social sciences about the development of modernity in the arenas of society, politics and economics. Attempts will be made to highlight the historical context in which forms of social and political and economic thought developed. This unit will also examine the significance of key debates about post modernity, globalisation and difference in transforming the world context in which social sciences are practised today and their implications for changes

within the social sciences. In keeping with current debates about the nature of social sciences theory and the changing status of rationality, a key concern of this unit is to give students an understanding of the social sciences as theories embedded in society.

*Textbooks*

Readings will be available through the University Copy Centre

**SSCI2602****Social, Political and Economic Thought 2  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jennifer Wilkinson **Session:** Semester 2 **Classes:** one 1 hour lecture and one 2 hour tutorial per week **Prerequisites:** SSCI1003 or SSCI1001 or SSCI2601 or SSCI2001 **Prohibitions:** SSCI2002 **Assessment:** one 2500 word essay (40%), one class presentation (20%), one take-home exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Bachelor of Social Sciences only*

**Associated degrees:** B Soc Sci.

This unit is a core unit for the Bachelor of Social Sciences, following on from Social, Political and Economic Thought 1. The unit explores the theme of the social sciences, humanity and ethics through an examination of central debates about democracy, justice, social welfare, social inclusion, human rights, shame, public goods, human capabilities, social capital, civility, tolerance and care. In contrast with traditional conceptions of the social sciences as 'objective and value neutral', a key concern of this unit is to provide an understanding of the context of human relations and moral problems in which the social sciences are practised in contemporary settings. Thus, wherever possible, the treatment of theories is examined in the context of real case studies of social science in practice.

*Textbooks*

Unit reader will be available through the Copy Centre

**SSCI3601****Social Sciences Internship  
Arts**

**Credit points:** 12 **Teacher/Coordinator:** Dr Jennifer Wilkinson **Session:** Semester 1, Semester 2 **Classes:** minimum 210 hours of monitored work place experience, plus supervisory consultations **Prerequisites:** SSCI1001 or SSCI2001 or SSCI2601 and SSCI2002 or SSCI2602 and STAT1021 and SCLG2602 or SCLG2521 **Prohibitions:** SSCI3001 **Assessment:** will be determined on the basis of meeting the requirements/or failing to meet the requirements of the course. In order to meet these requirements, you need to attend the internship and receive a satisfactory report by your internship supervisor within your placement. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Bachelor of Social Sciences only*

**Associated degrees:** B Soc Sci.

The internship provides an opportunity for students to gain practical experience in a professional setting as part of their academic training. Students undertake a minimum of 30 working days in a social sciences environment, from 3 to 5 days per week. They will be assisted and supervised by both the workplace and the department. Placements may include government departments, non-governmental organizations, community organizations, corporations, private consultancies, etc.

**SSCI3602****Internship Research Paper  
Arts**

**Credit points:** 12 **Teacher/Coordinator:** Dr Jennifer Wilkinson **Session:** Semester 1, Semester 2 **Classes:** independent research with compulsory supervisory consultations **Prerequisites:** SSCI1001 or SSCI2001 or SSCI2601 and SSCI2002 or SSCI2602 and STAT1021 and SCLG2602 or SCLG2521 **Corequisites:** SSCI3001 or SSCI3601 **Prohibitions:** SSCI3002 **Assessment:** one 4500 word (or equivalent) Internship research essay and one 6000 word (or equivalent) professional journal **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Bachelor of Social Sciences only*

**Associated degrees:** B Soc Sci.

The Internship Research Paper provides an opportunity for students to reflect on their research experiences during the internship in a social sciences environment (SSCI3601). Students will keep a reflective

journal about their research experiences during the internship, which will form the basis of a research report to be submitted for assessment. Students, in consultation with a supervisor from the Bachelor of Social Sciences program, will formulate a topic for their research essay which should demonstrate the ability to reflect critically on the relation between their practical experience in their particular placement and social science theory more generally.

### STAT1021

#### General Statistical Methods 1 Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1005, MATH1015, MATH1905, ECMT1010 **Assumed knowledge:** HSC General Mathematics **Assessment:** Assignments and 3 hour examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A.

STAT1021 provides basic methodology necessary for the use of statistics in humanities courses, up to simple testing and inference procedures. This unit does not form part of a major sequence, and is not available to students enrolled in the Faculties of Science or Engineering.

*Textbooks*

Purves, Freedman and Pisani: Statistics (Norton)

### STAT1551

#### Statistics Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### STAT2011

#### Statistical Models Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory week. **Prerequisites:** MATH (1001 or 1901 or 1906 or 1011) and [MATH (1005 or 1905 or 1015) or STAT1021] **Prohibitions:** STAT2901, STAT2001, STAT2911 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Res Ec, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit provides an introduction to univariate techniques in data analysis and the most common statistical distributions that are used to model patterns of variability. Common discrete random models like the binomial, Poisson and geometric and continuous models including the normal and exponential will be studied. The method of moments and maximum likelihood techniques for fitting statistical distributions to data will be explored. The unit will have weekly computer classes where candidates will learn to use a statistical computing package to perform simulations and carry out computer intensive estimation techniques like the bootstrap method.

### STAT2012

#### Statistical Tests Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** MATH (1005 or 1905 or 1015) **Prohibitions:** STAT2004, STAT2912 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, B E, B Res Ec, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit provides an introduction to the standard methods of statistical analysis of data: Tests of hypotheses and confidence intervals, including t-tests, analysis of variance, regression - least squares and robust methods, power of tests, non-parametric tests, non-parametric smoothing, tests for count data, goodness of fit, contingency tables. Graphical methods and diagnostic methods are used throughout with all analyses discussed in the context of computation with real data using an interactive statistical package.

### STAT2911

#### Probability and Statistical Models (Adv) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** MATH (1903 or 1907 or Credit in 1003) and MATH (1905 or 1904 or Credit in 1005) **Prohibitions:** STAT2001, STAT2011, STAT2901 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit is essentially an advanced version of STAT2011, with an emphasis being on the mathematical techniques used to manipulate random variables and probability models. Common random variables including the Poisson, normal, beta and gamma families are introduced. Probability generating functions and convolution methods are used to understand the behaviour of sums of random variables. The method of moments and maximum likelihood techniques for fitting statistical distributions to data will be explored. The unit will have weekly computer classes where candidates will learn to use a statistical computing package to perform simulations and carry out computer intensive estimation techniques like the bootstrap method.

### STAT2912

#### Statistical Tests (Advanced) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** MATH1905 or Credit in MATH1005 **Prohibitions:** STAT2004, STAT2012 **Assumed knowledge:** STAT (2911 or 2901) **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit is essentially an advanced version of STAT2012 with an emphasis on both methods and the mathematical derivation of these methods: Tests of hypotheses and confidence intervals, including

t-tests, analysis of variance, regression - least squares and robust methods, power of tests, non-parametric methods, non-parametric smoothing, tests for count data, goodness of fit, contingency tables. Graphical methods and diagnostic methods are used throughout with all analyses discussed in the context of computation with real data using an interactive statistical package.

### STAT3011

#### Stochastic Processes and Time Series Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week; ten 1 hour computer laboratories per semester. **Prerequisites:** STAT (2011 or 2911 or 2001 or 2901) and MATH (1003 or 1903 or 1907). **Prohibitions:** STAT3911, STAT3003, STAT3903, STAT3005, STAT3905 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

Section I of this course will introduce the fundamental concepts of applied stochastic processes and Markov chains used in financial mathematics, mathematical statistics, applied mathematics and physics. Section II of the course establishes some methods of modeling and analysing situations which depend on time. Fitting ARMA models for certain time series are considered from both theoretical and practical points of view. Throughout the course we will use the S-PLUS (or R) statistical packages to give analyses and graphical displays.

### STAT3012

#### Applied Linear Methods Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratories per week. **Prerequisites:** STAT(2012 or 2912 or 2004) and MATH(1002 or 1014 or 1902). **Prohibitions:** STAT3912, STAT3002, STAT3902, STAT3004, STAT3904 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This course will introduce the fundamental concepts of analysis of data from both observational studies and experimental designs using classical linear methods, together with concepts of collection of data and design of experiments. First we will consider linear models and regression methods with diagnostics for checking appropriateness of models. We will look briefly at robust regression methods here. Then we will consider the design and analysis of experiments considering notions of replication, randomization and ideas of factorial designs. Throughout the course we will use the R statistical package to give analyses and graphical displays.

### STAT3013

#### Statistical Inference Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** STAT(2012 or 2912 or 2003 or 2903) and STAT (2011 or 2911) **Prohibitions:** STAT3913, STAT3001, STAT3901 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

In this course we will study basic topics in modern statistical inference. This will include traditional concepts of mathematical statistics: likelihood estimation, method of moments, properties of estimators, exponential families, decision-theory approach to hypothesis testing, likelihood ratio test as well as more recent approaches such as Bayes estimation, Empirical Bayes and nonparametric estimation. During the computer classes (using R software package) we will illustrate the various estimation techniques and give an introduction to computationally intensive methods like Monte Carlo, Gibbs sampling and EM-algorithm.

## STAT3014

### Applied Statistics Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** STAT(2012 or 2912 or 2004). **Prohibitions:** STAT3914, STAT3002, STAT3902, STAT3006 **Assumed knowledge:** STAT(3012 or 3912). **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit has three distinct but related components: Multivariate analysis; sampling and surveys; and generalised linear models. The first component deals with multivariate data covering simple data reduction techniques like principal components analysis and core multivariate tests including Hotelling's  $T^2$ , Mahalanobis' distance and Multivariate Analysis of Variance (MANOVA). The sampling section includes sampling without replacement, stratified sampling, ratio estimation, and cluster sampling. The final section looks at the analysis of categorical data via generalized linear models. Logistic regression and log-linear models will be looked at in some detail along with special techniques for analyzing discrete data with special structure.

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

**STAT3911****Stochastic Processes and Time Series Adv Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lecture, one 1 hour tutorial per week, plus an extra 1 hour lecture per week on advanced material in the first half of the semester. Seven 1 hour computer laboratories (on time series) in the second half of the semester (one 1 hour class per **Prerequisites:** (STAT2911 or credit in STAT2011) and MATH(1003 or 1903 or 1907). **Prohibitions:** STAT3011, STAT3003, STAT3903, STAT3005, STAT3905 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This is an Advanced version of STAT3011. There will be 3 lectures in common with STAT3011. In addition to STAT3011 material, theory on branching processes and birth and death processes will be covered. There will be more advanced tutorial and assessment work associated with this unit.

**STAT3912****Applied Linear Methods Advanced Science**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** (STAT2912 or Credit in STAT2004 or Credit in STAT2012) and MATH(2061 or 2961 or 1902). **Prohibitions:** STAT3012, STAT3002, STAT3902, STAT3004, STAT3904 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit is essentially an Advanced version of STAT3012, with emphasis on the mathematical techniques underlying applied linear models together with proofs of distribution theory based on vector space methods. There will be 3 lectures per week in common with STAT3012 and some advanced material given in a separate advanced tutorial together with more advanced assessment work.

**STAT3913****Statistical Inference Advanced Science**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** STAT(2911 or 2903). **Prohibitions:** STAT3013, STAT3001, STAT3901 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit is essentially an Advanced version of STAT3013, with emphasis on the mathematical techniques underlying statistical inference together with proofs based on distribution theory. There will be 3 lectures per week in common with some material required only in this advanced course and some advanced material given in a separate advanced tutorial together with more advanced assessment work.

**STAT3914****Applied Statistics Advanced****Science**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour computer laboratory per week plus an extra hour each week which will alternate between lectures and tutorials. **Prerequisites:** STAT2912 or credit or better in (STAT2004 or STAT2012). **Prohibitions:** STAT3014, STAT3002, STAT3902, STAT3006, STAT3907 **Assumed knowledge:** STAT3912 **Assessment:** One 2 hour exam, assignments and/or quizzes, and computer practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit is an Advanced version of STAT3014. There will be 3 lectures per week in common with STAT3014. The unit will have extra lectures focusing on multivariate distribution theory developing results for the multivariate normal, partial correlation, the Wishart distribution and Hotelling's  $T^2$ . There will also be more advanced tutorial and assessment work associated with this unit.

**STAT4201****Mathematical Statistics Honours A Science**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B S T (Hons), B Sc (Hons).

Students enrolled in the Honours programs study various advanced aspects of Mathematical Statistics. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

**STAT4202****Mathematical Statistics Honours B Science**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** STAT 4201 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B S T (Hons), B Sc (Hons).

See STAT4011

**STAT4203****Mathematical Statistics Honours C Science**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** STAT 4202 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B S T (Hons), B Sc (Hons).

See STAT4011

**STAT4204****Mathematical Statistics Honours D Science**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** STAT 4203 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B S T (Hons), B Sc (Hons).

See STAT4011

**STAT4205****Mathematical Statistics (STABEX) Science**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** UG Study Abroad Program.

This unit is available to Study Abroad and Exchange students coming to the University of Sydney. The unit is part of the Honours year program. Students enrolled in the Honours program study various advanced aspects of Mathematical Statistics. The program may include lectures, tutorials and seminars. Assessment may include research, examination and classwork. Intending students should contact the Honours coordinator in this School.

### STAT4206

#### Mathematical Statistics (STABEX) Science

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** UG Study Abroad Program.

### STRG1000

#### Cello Ensemble 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Georg Pedersen **Session:** Semester 1, Semester 2 **Classes:** One 2hr rehearsal/wk **Prerequisites:** A final grade will be compiled from continual assessment of ensemble skills demonstrated during weekly rehearsals (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Cello Ensemble 1-8 provides advanced cellists with repertoire and performance challenges surpassing cello parts in many chamber and orchestral work. This unit of study focuses on the improvement of aural and performance skills and ensemble awareness, strategies for achieving cohesion and refinement of sound and the development of professionalism. The ensemble performs regular showcase concerts and features special arrangements in its repertoire.

### STRG1001

#### Cello Ensemble 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Georg Pedersen **Session:** Semester 1, Semester 2 **Classes:** One 2hr rehearsal/wk **Prerequisites:** STRG1000 Cello Ensemble 1 **Assessment:** A final grade will be compiled from continual assessment of ensemble skills demonstrated during weekly rehearsals (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

### STRG1015

#### Strings Performance Class 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Gregory Pickler **Session:** Semester 1, Semester 2 **Classes:** One 2hr class/wk **Assessment:** 1. Reflective journal demonstrating the student's increased understanding and development (max 1500 words) (50%); 2. Recording project (CD) with accompanying descriptive analysis of technical and musical aims of the recorded material (max 500 words)

(50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific performance classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The study of string performance requires frequent exposure to performance opportunity. Strings Performance Class offers the opportunity for students to perform work in progress and receive qualified feedback from their peers, lecturers and guests specially invited to the class. The class aims to create a focused and supportive environment in which students can take performance risks. In response to performances the class is invited to discuss technical and musical observations relevant to string playing. All students enrolling in Strings Performance Class must be concurrently enrolled in Principal Study in a string instrument.

### STRG1016

#### Strings Performance Class 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Gregory Pickler **Session:** Semester 1, Semester 2 **Classes:** One 2hr class/wk **Prerequisites:** STRG1015 Strings Performance Class 1 **Assessment:** 1. Reflective journal demonstrating the student's increased understanding and development (max 1500 words) (50%); 2. Recording project (CD) with accompanying descriptive analysis of technical and musical aims of the recorded material (max 500 words) (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific performance classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

### STRG1039

#### Guitar Ensemble 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 1, Semester 2 **Classes:** 2hr rehearsal/wk. **Assessment:** A final grade will be compiled from continual assessment of ensemble skills demonstrated during weekly rehearsals and all ensemble performances (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

Students from both major and minor level guitar and postgraduate students will attend a weekly rehearsal/seminar involving sight-reading, new repertoire and preparation towards one or more guitar ensemble performances in the semester. Students will be required to attend all rehearsals/seminars within the semester and they will prepare and perform repertoire with the ensemble working under the direction of an ensemble leader.

### STRG1040

#### Guitar Ensemble 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 1, Semester 2 **Classes:** 2hr rehearsal/wk. **Prerequisites:** STRG1039 Guitar Ensemble 1 **Assessment:** A final grade will be compiled from continual assessment of ensemble skills demonstrated during weekly rehearsals and all ensemble performances (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

Undergraduate and postgraduate students will attend a weekly rehearsal/seminar involving sight-reading, new repertoire and preparation towards one or more guitar ensemble performances in the semester. Students will be required to attend all rehearsals/seminars within the semester and they will prepare and perform repertoire with the ensemble working under the direction of an ensemble leader.

### STRG1601

#### Double Bass 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 1, Semester 2 **Classes:** 14 one hour lessons/semester and performance workshops/week **Assessment:** Teacher Assessment 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Principal Study Double Bass 1-8 provides the opportunity to study double bass performance in accordance with internationally recognized standards of performance excellence.

Performers who are enrolled in the Diploma of Music or Bachelor of Music Performance degree will have an opportunity to develop instrumental, musical and artistic skills and personal attributes essential to a career as a performer in this unit of study. Achieving excellence in instrumental performance requires a natural and effortless technical facility, profound understanding of interpretative concepts, a developed aural and artistic imagination and performance experience of a wide range of stylistically diverse repertoire. Students develop these skill areas under the guidance of individual teachers. It is expected that students make a consistent commitment towards a minimum of 4 hours of individual practice per day.

Students enrolled in all other relevant degrees will be able to refine instrumental foundations, build musical and artistic skills and personal attributes essential to a flexible and broad engagement with musical performance as a teacher, performer or in related fields of the music industry. At this level of study students are expected to commit around 2 hours per day to their daily instrumental practice.

### STRG1602

#### Double Bass 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 1, Semester 2 **Classes:** 14 one hour lessons/semester and performance workshops/week **Prerequisites:** STRG1601 Double Bass 1 **Assessment:** 10-15 minute jury recital (50%); Teacher assessment of semester work (50%). Students must pass both assessment components. **Assessment Criteria:** - technical and musical progress achieved - commitment and effectiveness of practice - quality of performance in regard to: instrumental technique, intonation, sound production and bow technique, interpretative conception, projection and confidence **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

At this level of study students are expected to commit around 2 hours per day to their daily instrumental practice.

### STRG1672

#### Violoncello 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 1, Semester 2 **Classes:** 14 one hour lessons/semester and performance workshops/week **Prerequisites:** STRG1671 Violoncello 1 **Assessment:** 10-15 minute jury recital (50%); Teacher assessment of semester work (50%). Students must pass both assessed components. **Assessment Criteria:** - technical and musical progress achieved - commitment and effectiveness of practice - quality of performance in regard to: instrumental technique, intonation, sound production and bow technique, interpretative conception, projection and confidence **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Principal Study Violoncello 1-8 provides the opportunity to study cello performance in accordance with internationally recognized standards of performance excellence.

Performers who are enrolled in the Diploma of Music or Bachelor of Music Performance degree will have an opportunity to develop instrumental, musical and artistic skills and personal attributes essential to a career as a performer in this unit of study. Achieving excellence in instrumental performance requires a natural and effortless technical facility, profound understanding of interpretative concepts, a developed aural and artistic imagination and performance experience of a wide range of stylistically diverse repertoire. Students develop these skill areas under the guidance of individual teachers. It is expected that students make a consistent commitment towards a minimum of 4 hours of individual practice per day.

Students enrolled in all other relevant degrees will be able to refine instrumental foundations, build musical and artistic skills and personal attributes essential to a flexible and broad engagement with musical performance as a teacher, performer or in related fields of the music industry. At this level of study students are expected to commit around 2 hours per day to their daily instrumental practice.

### STRG2000

#### Cello Ensemble 3

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Georg Pedersen **Session:** Semester 1, Semester 2 **Classes:** One 2hr rehearsal/wk **Prerequisites:** STRG1001 Cello Ensemble 2 **Assessment:** A final grade will be compiled from continual assessment of ensemble skills demonstrated during weekly rehearsals (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Cello Ensemble 1-8 provides advanced cellists with repertoire and performance challenges surpassing cello parts in many chamber and orchestral work. This unit of study focuses on the improvement of aural and performance skills and ensemble awareness, strategies for achieving cohesion and refinement of sound and the development of professionalism. The ensemble performs regular showcase concerts and features special arrangements in its repertoire.

### Strings Performance Class 3

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Gregory Pickler **Session:** Semester 1, Semester 2 **Classes:** One 2hr class/wk **Prerequisites:** STRG1016 Strings Performance Class 2 **Assessment:** 1. Reflective journal demonstrating the student's increased understanding and development (max 1500 words) (50%); 2. Recording project (CD) with accompanying descriptive analysis of technical and musical aims of the recorded material (max 500 words) (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific performance classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The study of string performance requires frequent exposure to performance opportunity. Strings Performance Class offers the opportunity for students to perform work in progress and receive qualified feedback from their peers, lecturers and guests specially invited to the class. The class aims to create a focused and supportive environment in which students can take performance risks. In response to performances the class is invited to discuss technical and musical observations relevant to string playing. All students enrolling in Strings Performance Class must be concurrently enrolled in Principal Study in a string instrument.

## STRG2015

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 1, Semester 2 **Classes:** 6-14 1-hour lessons and/or 4-6 master or small ensemble classes (or equivalent)/semester and performance workshop/week **Prerequisites:** STRG1662 Violin 2 **Corequisites:** STRG 2763 Violin 3 (Adv) - Dip Mus only **Assessment:** Teacher Assessment 100% **Assessment Criteria:** - technical and musical progress achieved - commitment and effectiveness of practice - quality of performance in regard to: instrumental technique, intonation, sound production and bow technique, interpretative conception, projection and confidence **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Principal Study Violin 1-8 provides the opportunity to study violin performance in accordance with internationally recognized standards of performance excellence.

Performers who are enrolled in the Diploma of Music or Bachelor of Music Performance degree will have an opportunity to develop instrumental, musical and artistic skills and personal attributes essential to a career as a performer in this unit of study. Achieving excellence in instrumental performance requires a natural and effortless technical facility, profound understanding of interpretative concepts, a developed aural and artistic imagination and performance experience of a wide range of stylistically diverse repertoire. Students develop these skill areas under the guidance of individual teachers. It is expected that students make a consistent commitment towards a minimum of 4 hours of individual practice per day.

Students enrolled in all other relevant degrees will be able to refine instrumental foundations, build musical and artistic skills and personal attributes essential to a flexible and broad engagement with musical performance as a teacher, performer or in related fields of the music industry. At this level of study students are expected to commit around 2 hours per day to their daily instrumental practice.

This unit introduces players to the art and craft of instrumental teaching through the analysis of various pedagogical methods and approaches. Topics covered include: philosophies underlying some important and innovative teaching methods; repertoire and resources for beginning students; integration of aural training, note reading and memory training. For further information contact G. Pikler (Strings).

**STRG3012****Pedagogy Strings 1****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 1 **Classes:** One 1hr lect/week plus four practical sessions as assigned. **Assessment:** One essay (50%); curriculum outline (30%), viva voce exam (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study offers an introduction to the basic principles of teaching and learning bowed instruments. Topics covered include the of principles of movement, posture and set-up, bow hold, bow strokes, principles of left hand development and coordination. The emphasis is on pedagogical practices and methods and the development of foundational instrumental and interpretative skills. Students are expected to research some main teaching methods, literature and pedagogical repertoire relevant to topics covered. Opportunity for supervised teaching and lesson observation may be provided and will be part of the semester workload.

**STRG3013****Pedagogy Strings 2****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 2 **Classes:** One 1hr lect/wk and up to 4 hours of assigned mentoring practice per semester. **Prerequisites:** STRG3012 Pedagogy Strings 1 **Assessment:** One 2000 word essay (50%), a short mentoring report (20%) and examination (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Instrumental and didactic concepts introduced in Pedagogy Strings 1 will be further developed. Advanced technical and interpretative issues will be explored and theoretical teaching literature will be researched. In addition, historical analysis of string teaching and teaching methodology will be considered. Some of the technical issues covered in detail include shifting, vibrato, martele, spiccato and

staccato, practice techniques and development of advanced interpretative skills. Students will be expected to present one demonstration lesson or alternatively participate in a mentoring program of primary or secondary level string players.

**STRG3016****Guitar 5 (Minor)****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Gregory Pikler **Session:** Semester 1, Semester 2 **Classes:** 1hr lesson or equivalent and performance workshop/wk **Prerequisites:** STRG2013 Guitar 4 (Minor) **Assessment:** Teacher Grade 100%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus Studies, UG Study Abroad Program.

Development of appropriate repertoire, technical skills, musical expression, concert practice and presentation. For more information contact the Chair of Unit.

**STRG3017****Guitar 6 (Minor)****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Gregory Pikler **Session:** Semester 1, Semester 2 **Classes:** 1hr lesson or equivalent and performance workshop/wk **Prerequisites:** STRG3016 Guitar 5 (Minor) **Assessment:** Jury exam: 20 mins (instrument specific). Teacher Grade 20%, Panel Grade 80%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus Studies, UG Study Abroad Program.

Development of appropriate repertoire, technical skills, musical expression, concert practice and presentation. For more information contact the Chair of Unit.

**STRG3018****Strings Performance Class 5****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Gregory Pickler **Session:** Semester 1, Semester 2 **Classes:** One 2hr class/wk **Prerequisites:** STRG2015 Strings Performance Class 4 **Assessment:** 1. Reflective journal demonstrating the student's increased understanding and development (max 1500 words) (50%); 2. Recording project (CD) with accompanying descriptive analysis of technical and musical aims of the recorded material (max 500 words) (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific performance classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The study of string performance requires frequent exposure to performance opportunity. Strings Performance Class offers the opportunity for students to perform work in progress and receive qualified feedback from their peers, lecturers and guests specially invited to the class. The class aims to create a focused and supportive environment in which students can take performance risks. In response to performances the class is invited to discuss technical and musical observations relevant to string playing. All students enrolling in Strings Performance Class must be concurrently enrolled in Principal Study in a string instrument.

### Double Bass 5

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Goetz Richter **Session:** Semester 1, Semester 2 **Classes:** 6-14 1-hour lessons and/or 4-6 master or small ensemble classes (or equivalent)/semester and performance workshop/week **Prerequisites:** STRG2604 Double Bass 4 **Assessment:** Teacher Assessment 100% Assessment Criteria: - technical and musical progress achieved - commitment and effectiveness of practice - quality of performance in regard to: instrumental technique, intonation, sound production and bow technique, interpretative conception, projection and confidence **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, UG Study Abroad Program.

Principal Study Double Bass 1-8 provides the opportunity to study double bass performance in accordance with internationally recognized standards of performance excellence.

Performers who are enrolled in the Diploma of Music or Bachelor of Music Performance degree will have an opportunity to develop instrumental, musical and artistic skills and personal attributes essential to a career as a performer in this unit of study. Achieving excellence in instrumental performance requires a natural and effortless technical facility, profound understanding of interpretative concepts, a developed aural and artistic imagination and performance experience of a wide range of stylistically diverse repertoire. Students develop these skill areas under the guidance of individual teachers. It is expected that students make a consistent commitment towards a minimum of 4 hours of individual practice per day.

Students enrolled in all other relevant degrees will be able to refine instrumental foundations, build musical and artistic skills and personal attributes essential to a flexible and broad engagement with musical performance as a teacher, performer or in related fields of the music industry. At this level of study students are expected to commit around 2 hours per day to their daily instrumental practice.

### Strings Performance Class 7

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Gregory Pickler **Session:** Semester 1, Semester 2 **Classes:** One 2hr class/wk **Prerequisites:** STRG3019 Strings Performance Class 6 **Assessment:** 1. Reflective journal demonstrating the student's increased understanding and development (max 1500 words) (50%); 2. Recording project (CD) with accompanying descriptive analysis of technical and musical aims of the recorded material (max 500 words) (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific performance classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

The study of string performance requires frequent exposure to performance opportunity. Strings Performance Class offers the opportunity for students to perform work in progress and receive

qualified feedback from their peers, lecturers and guests specially invited to the class. The class aims to create a focused and supportive environment in which students can take performance risks. In response to performances the class is invited to discuss technical and musical observations relevant to string playing. All students enrolling in Strings Performance Class must be concurrently enrolled in Principal Study in a string instrument.

Assessment Criteria: - technical and musical progress achieved - commitment and effectiveness of practice - quality of performance in regard to: instrumental technique, intonation, sound production and bow technique, interpretative conception, projection and confidence **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Perf).

Principal Study Viola 1-8 provides the opportunity to study viola performance in accordance with internationally recognized standards of performance excellence.

Performers who are enrolled in the Diploma of Music or Bachelor of Music Performance degree will have an opportunity to develop instrumental, musical and artistic skills and personal attributes essential to a career as a performer in this unit of study. Achieving excellence in instrumental performance requires a natural and effortless technical facility, profound understanding of interpretative concepts, a developed aural and artistic imagination and performance experience of a wide range of stylistically diverse repertoire. Students develop these skill areas under the guidance of individual teachers. It is expected that students make a consistent commitment towards a minimum of 4 hours of individual practice per day.

## THAP1201

### Theories of Art Practice A Sydney College of the Arts

**Credit points:** 4 **Teacher/Coordinator:** Dr Ann Elias **Session:** Semester 1  
**Classes:** 2 hours contact and minimum 2 hours for research and study.  
**Corequisites:** MSTD1111, MSTD1121, FRES1001, MDRW1013 or MDRW1011, and THAP1211 **Assessment:** Assessment: 500 word essay (30%); 1,500 word essay (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, Visual Arts UG Non-Degree.

#### Contemporary Art: Themes and Theories

This unit of study is designed to enthuse students about contemporary art. We want to show you the exciting work that artists and theorists produce and the breadth and scope of contemporary art on an international scale. While the term 'contemporary' can be interpreted in a variety of ways, this unit encompasses art and ideas most pertinent to the last thirty years. This unit addresses ideas and practices that we consider fundamental knowledge for visual arts practitioners: the concept of the 'everyday', the relevance of disciplines such as philosophy to art criticism, the importance of identity in the practices of artists, the central place of the Body and theories of perception to the work that artists produce, and the many theoretical ideas that emanate from a close study of objects.

#### Textbooks

### Theories of Art Practice B Sydney College of the Arts

**Credit points:** 4 **Teacher/Coordinator:** Dr Ann Elias **Session:** Semester 2  
**Classes:** 2 hours contact and minimum 2 hours for research and study.  
**Corequisites:** MSTD1112, MSTD1123, FRES1002, MDRW1014 or MDRW1012, and THAP1212 **Assessment:** Assessment: 500 word essay (30%); 1,500 word essay (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, Visual Arts UG Non-Degree.

#### Looking Back: Nineteenth century origins of Contemporary Art

This unit of study is designed to inform students about the nineteenth century origins of contemporary art. We consider the cultural period known as Modernity and the art movement known as Modernism. This unit addresses ideas and practices that we consider fundamental knowledge for visual arts practitioners: the concept of modern art and the modern artist; the modern world and the impact on art of the city, travel, and colonization; the influence of the Romantic Movement; the impact of modern technologies on art; the politics of vision in relation to landscape and the female body; the gendering of aesthetics and divisions in the social roles and practices of men and women.

## THAP1211

### Studio Theory A Sydney College of the Arts

**Credit points:** 4 **Teacher/Coordinator:** Mr Oliver Smith **Session:** Semester 1  
**Classes:** 2 hours contact and minimum 2 hours for research and study  
**Corequisites:** MSTD1111, MSTD1121, FRES1001, MDRW1011 or MDRW1013, and THAP1201 **Assessment:** Students are eligible to be assessed for this unit of study if attendance and submission of work requirements are met. For further

information refer to Studio and SCA assessment criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, Visual Arts UG Non-Degree.

This Unit of Study investigates the development of contemporary practice in specific art/craft, aiming to explore historical contexts, the meaning of artworks and contradictory attitudes of artists. Issues inherent to art/craft practices will be explored, from the Industrial Revolution to the present day. Students will be encouraged to investigate historical context and models of practice relating to specific practitioners. Group tutorials/lectures are designed to provide a context for considering particular artists and their work, in order that students can situate their own work in relation to others. Group activities and learning experiences vary from gallery visits to writing and talking projects and presentations to fellow students in your studio area. Involves lectures, seminars and essays from a list of topics. This unit is currently studio based.

#### Painting

The focus in this studio is to examine the fundamentals of painting throughout history. Changing forms of pictorial and constructed space in painting in relation to the relevant historical contexts will be addressed.

#### Sculpture

Ideas dealing with space, the object and the body will be introduced. Themes include the fabricated and the found object, 'objecthood', space and installation, and the nature of performativity.

#### Printmedia

The Gallery: the role of print and drawing within the development of modern art will be looked at. A number of key nineteenth and twentieth century artists will be surveyed and the links between these historical precedents and the practices of a range of contemporary artists will be explored. A series of formal lectures and an extensive programme of gallery visits is included.

#### Photomedia

The focus in this studio is to examine the aesthetic, socio-political and economic ideologies surrounding photography's inception and development in the 19th century. Issues surrounding photographic truth and archives, collective memory, and the many roles of the portrait will be explored. In tandem with photography's early historical developments, how contemporary artists revisit and respond to these ideas within the present day will be examined.

#### Film and Digital Art

Interpreting moving image: beginning with the auteur theory and genre analyses (noir, New Wave, experimental, science fiction) the default interpretative system cinema and media arts inherited from literature will be examined, including the influence which psychoanalysis was to bring to theories of subjectivity, the unconscious, dreaming and the gaze. These developments in moving image parallel those in modernism, particularly painting (Surrealism). More recent shifts track the evolution from reading cinema as a language (the literary model) to Deleuze's philosophically-grounded image-types (affection-image, impulse image, perception-image, large and small forms) and include an analysis of emergent forms of music video and Dogme.

#### Glass

The focus in this studio will be to introduce students to the expressive range of glass, providing a broad overview of how this remarkable medium is used in contemporary art, craft, design and architecture. This is achieved through slide lectures, seminars, group discussion and relevant museum/gallery/studio visits.

#### Ceramics

The focus in this studio will be to provide an overview of key events, movements and innovation in contemporary ceramics praxis after 1945 and identify leading artists, designers and theorists within the field. Differing views of what constitutes a ceramic object will be investigated.

#### Jewellery and Object

The focus in this studio will be to introduce the area of Jewellery and Object making through a broad overview of current practice. Students will explore and examine terms in which work from this discipline area are encountered and can be evaluated, critiqued and how such terminology informs and is informed by the object.

Issues inherent to art/craft practices will be explored, from the Industrial Revolution to the present day. Students will be encouraged to investigate historical context and models of practice relating to specific practitioners. Group tutorials/lectures are designed to provide a context for considering particular artists and their work, in order that students can situate their own work in relation to others. Group activities and learning experiences vary from gallery visits to writing and talking projects and presentations to fellow students in your studio area. Involves lectures, seminars and essays from a list of topics. This unit is currently studio based.

#### Painting

The focus in this studio is to analyse painting as object and includes a critique of its exhibition and display particularly within the context of contemporary art. The work of arts in both the international and local contexts will be examined to provide an understanding of the 'extended' field of painting.

#### Sculpture

Expands on themes from the previous semester while interrogating such themes as the role of the object within institutionalised space; different forms and theories of performance practice; the relationship between object, culture and context; the cross-relationship between the object, the subject and the institution.

#### Printmedia

The Street: The historical role of print as a communications medium will be examined. The part this has played in instigating cultural and political change over the past 150 years will be explored. Focusing on early modernism through to pop art, the way in which artists used posters, magazines other public media as vehicles for their ideas and cultural interventions will be explored. These historical precedents are then linked to the work of recent artists.

#### Photomedia

The focus in this studio is on a major Sydney art exhibition (such as the Sydney Biennale) to consider current directions in photomedia practice in light of contemporary art debates. Drawing on and expanding the themes of semester one, we continue our enquiry into dialogues between past and present manifestations of the medium.

#### Film and Digital Art

The Study of Narratology provides the vocabulary and conceptual structures through which to analyse continuing experimentation and evolution in narrative across multiple fields in digital arts. Beginning with Propp and his analysis of plot-functions, core shifts in narrative

practice in the twentieth century with emphasis on intermedia borrowings and practices will be signposted. Hypertext, soft video and database works are traced back to their antecedents in the cultural and social upheavals of the 1960s, in happenings and the cut-ups of modernist prose; metafiction is revisioned in 1950s animated cartoons, and again in contemporary machinemas; emergent narratives of new science are mediated through digital technologies; the function-pairs Propp analysed in Russian folk tales come to shape computer-gaming narratives of MMORPGs; rhizomatic structure provides a platform for cyberfeminist narratives; Deleuze and Guattari's paradigm of becoming-molecular establishes a framework for microsound and works of digital dust.

#### Glass

The use of glass in art, design, craft and architecture will be explored from the industrial revolution into the twentieth century and the inception of the studio glass movement. The focus will be on the impact of technological, cultural and political change during the early part of the twentieth century. Knowledge will be gained and applied in class discussions, seminars, relevant museum/gallery/studio visits and via assessment tasks.

#### Ceramics

The focus in this studio will be to provide the student with the historical precedents to the development of the Studio Ceramics Movement and contemporary Design. This will be achieved through comparative analysis of nineteenth century objects and contemporary ceramic practice. This study will include topics such as the impact of the industrial revolution on the traditional artisan; the resurrection of guilds and the rise of the Arts and Crafts Movement; the relationship of hand and machine; colonization, trade and the impact of Asia-Pacific indigenous craft traditions on Western ceramics.

#### Jewellery and Object

In this studio we will link with core theory by concentrating on understanding historical precedents of the 19th century and how they impact on the critical development of contemporary practice in jewellery and object. Philosophical issues, as well as technological, cultural and social/political contexts impacting on the development of the arts and crafts movement in particular will be explored.

#### Theories of Art Practice C

#### Sydney College of the Arts

**Credit points:** 4 **Teacher/Coordinator:** Dr Eril Bailly, Dr Ann Elias, Danie Mellor **Session:** Semester 1 **Classes:** 2 hours of contact and a minimum 2 hours of research and study. **Prerequisites:** THAP1201 and THAP1202 **Assessment:** Refer to unit outline and SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day **Note:** Department permission required for enrolment.

**Associated degrees:** B V A.

'The Historical Avant-garde of the Twentieth Century' looks at the period 1900-1950 in Europe, the U.S.A. and Australia. It considers the material and conceptual challenges posed by abstraction, collage, montage and ready-mades to mainstream art and canonical notions of art. Attention is given to the social and cultural factors and forces that influenced a concept of the avant-garde artist and avant-garde culture.

Studio Theory investigates the development of contemporary object art and design practices within the contexts of developments in the last 100 years. The focus will be on developing an understanding of the link between craft/design practices and movements and development in the visual arts as a whole. We will look closely at how various avant-garde movements impacted and continue to influence object-making practices. The aim in focusing on the avant-garde is to develop an understanding of the complex relationships that exist between the various art practices and how they developed. We will investigate and expand on existing understandings of historical developments, connections and precedents, philosophical and social/political issues. The unit will also provide a link with core art theory, which this semester investigates the concept of avant-garde art and culture.

*Textbooks*

**Credit points:** 6 **Teacher/Coordinator:** Dr Eril Bailly **Session:** Semester 1 **Classes:** 2 hours of contact and a minimum 2 hours of research and study. **Prerequisites:** THAP1201 and THAP1202 **Prohibitions:** THAP2411 **Assessment:** Minor essay 1,000 words (30%); major essay 2,000 words (70%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

#### The Historical Avant-Garde and Contemporary Practice

This unit continues the enquiry into the antecedents to contemporary visual arts as discussed in 1st Year, 2nd Semester. However, this semester there is detailed discussion of the concept of Avant-Garde art and culture, and presents the ambitions of the Historical Avant-Garde in Western Society in the first half of the Twentieth century. It investigates the material and conceptual challenges posed by advances in technology (the new media of that time), World War 1, and the rise of mass production to mainstream art and canonical notions of art. Of major importance are the claims made by the Avant-Garde to radicality, rupture and revolution and their impact on contemporary visual culture.

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

#### Postmodernity and Critical Practices

This unit critically examines the conditions and context of postmodern culture and theory as they emerged through a growing critique of Western modernity. By radically questioning the concepts of history, progress and the Subject, Postmodernism gives voice to 'The Other' and foregrounds the politics of gender, and ethnicity and positions contemporary cultural practices as discourses of intervention and change. These concerns are situated within the context of the growing influence of information technology on the development of contemporary visual arts. The course encourages a critical perspective to postmodernity and asks the question 'What was the Postmodern?'

#### Studio Theory Media Arts C Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Photmedia: Ms Anne Ferran Film and Digital Art: Ms Josephine Starrs **Session:** Semester 1 **Classes:** 2 hours contact and minimum 2 hours for research and study **Prerequisites:** THAP1211 and THAP1212 **Prohibitions:** THAP2421 **Assessment:** Assessment is based on the successful completion of coursework, written and/or seminar assignments as are given throughout the unit, and participation and engagement. For further

information refer to Studio and SCA assessment criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Unit of Study is split into two areas: Photomedia; Film and Digital Art.

#### Photomedia

The focus in this Studio is the exploration of ways of critically interpreting photographs and of understanding a range of photographic practices. Topics such as memory, time, evidence, and the everyday, are selected to provide windows into both photographic history and key aspects of photo-criticism.

#### Film and Digital Art

##### The Electronic Image: Unpredictable Encounters

Across a wide range of electronic imaging platforms and issues students will study the interplay between technological possibilities, chance and manifestation of the idea (social, philosophical, cultural, aesthetic). As such students will come to a deeper understanding of the artistic process; also the history of the unpredictable encounters of the electronic image in its mediation of personal and public concerns.

#### Studio Theory Media Arts D Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Photmedia: Anne Ferran Film and Digital Art: Josephine Starrs **Session:** Semester 2 **Classes:** 2 hours contact and minimum 2 hours for research and study **Prerequisites:** THAP2621 **Prohibitions:** THAP2422 **Assessment:** Assessment is based on the successful completion of coursework, written and/or seminar assignments as are given throughout the unit, and participation and engagement. For further information refer to Studio and SCA assessment criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Unit of Study is split into two areas: Photomedia; Film and Digital Art.

#### Photomedia

The focus in this studio will be to approach photography via the work of selected contemporary and historical practitioners, in order to understand photography's key place in contemporary art practice. We will consider photography's role in relationship to themes such as: new documentary practices, identity politics, and performance.

#### Film and Digital Art

This module is designed in two parts: the study of documentary and non fiction forms, and television as an everyday phenomena, including its expansions into the internet and mobile media forms. The first part traces the complex history of documentary as it evolved from the late nineteenth and twentieth century, including its critical reception and theoretical, cultural and technical considerations. The second part examines the 'box' as a regulatory and programmable force through psychological, philosophical and cultural theorizations, including television's hyped liveness, its manipulation of desire and subjectivity, and postmodern schizophrenia as a manifestation of its induced crisis in temporality.

**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Unit of Study is split into three areas: Painting; Sculpture; Printmedia

##### Painting

The focus in this studio is to address some of the critical moments of change in the visual arts from the early to later part of the 20th Century, by considering the key Modernist movements in the broader political, social, and gender, and racial context from the early Russian Avant Garde, De Stijl, Dada, Fluxus, Conceptualism, Minimalism, High Pop and on into the 80s

##### Sculpture

The focus in this studio is to identify and critically evaluate a number of the issues, methodologies and artists that have been instrumental in defining the key moments of Modernism within contemporary sculptural practice. The study format combines formal presentations, reading group discussions and student seminar presentations.

##### Printmedia

Contemporary Art: Focusing on the art of the last past ten years, in the the first semester the idea of contemporary art in its broadest sense is explored, developing an appreciation of its breadth and diversity as well as establishing a clearer understanding of its connections to modernist art. Connections between art, technology and cultural change are a key theme.

##### Textbooks

##### Painting

This is a studio - driven program focusing on the practices of artists as primary research and supported with the relevant theoretical frameworks. Consequently these references are subject to change and will be advised in the UoS outline at the beginning of semester.

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Unit of Study is split into three areas: Painting; Sculpture; Printmedia

##### Painting

Significant issues in art and related critical writing that have refashioned avant-garde practices since the 60s will be examined, with the primary focus on artists working within a discursive field. The aim is to provide students with an understanding of the connection between the object, that is the creative work, and the theoretical premise in related texts.

##### Sculpture

An investigation into multi-media and trans-media practices. A primary concern will be a sound understanding of conceptual art since the 1960s and its redefinition of the object as a vector of an idea as opposed to an artifact. Another will be the ways in which technology has moulded our expectations of the art object/experience, particularly in relation to ideas such as interactivity and immersion.

##### Printmedia

Here and Now: Using the broad understanding of contemporary art established in semester one, we move on to look at the way in which a range of print and drawing based artists have developed their own practices in both local and international contexts. The way in which local art practices are connected to international cultural movements is explored; and we look at how individual artists and designers have responded to the emergence of global culture.

Modernism and its Discontents: Old Stories, New Tales

This Unit of Study is split into three areas: Ceramics; Glass; Jewellery and Object

Various specifics are dealt with for students within each studio area.

The unit of study investigates the development of contemporary Object Art and Design within the context of historical precedents and developments in the last hundred years. The focus is on developing an understanding of the link between craft/design practices and movements in the visual arts as a whole.

(Please note due to changes in class sizes course content may be modified)

##### Glass

In this studio we will work our way forward, focusing on the effect of the Historical Avant-garde and the emergence of design cultures and the studio glass movement. The course provides a broad exploration and interrogation of discipline specific glass in these movements/genres and cultures through to contemporary practice.

#### Ceramics

The focus in this studio will be to examine ceramics praxis and craft and design theories in relation to mainstream Modernism with a specific focus on the parallels and dichotomies found between craft and the Historical Avantgarde. The influence of early twentieth century practitioners and the theories and philosophies pertaining to their work on contemporary ceramics practice will be established. A range of issues will be discussed including: what is non-art? what is non-craft? - modernist definitions and paradoxes; definitions of craft - materiality, process and aesthetics; craft as foundation of modernism; craft as subversion in contemporary art practice.

#### Jewellery and Object

In this studio we will look at the complex relationship between the various art practices, and will investigate and expand on existing understandings of historical developments, connections and precedents of contemporary practice. A link will also be provided to core art theory, which this semester investigates avant-garde art and culture.

#### The Virtual and Handmade

This Unit of Study combines three areas: Ceramics; Glass; Jewellery and Object

The unit of study aims to introduce practitioners to philosophies and praxis surrounding the relationship between traditional craft and design models and our engagement with virtual technologies and recent innovations in materials and methods. This will be achieved by specifically focusing investigations upon new technologies, materials and process, the representation and dissemination of objects through various media, the work of contemporary practitioners and a variety of theoretical material that explores some aspect of the virtual.

Students will be encouraged to investigate how issues of virtuality engage with and enable contemporary practice.

**Associated degrees:** B V A.

This unit is split into two streams: Photomedia; and Film and Digital Art.

Photomedia: In this stream we approach photography via the work of selected contemporary and historical practitioners, in order to understand photography's key place in contemporary art practice.

Film and Digital Art: In the Film and Digital Art stream we examine the historical and theoretical frameworks of digital video, film, multimedia and web-art.

Virtual and handmade

This class will develop various notions associated with 'the virtual' of relevance within contemporary craft practice. Students will be encouraged to investigate how issues of virtuality engage with and enable contemporary studio practice. This will be achieved by specifically focusing investigation upon new materials and processes, the representation and dissemination of objects through various media, the work of contemporary practitioners and a variety of theoretical material.

**Credit points:** 6 **Teacher/Coordinator:** Dr Danie Mellor **Session:** Semester 1 **Classes:** 2 hours of contact and a minimum 2 hours of research and study. **Prerequisites:** THAP2612 or both THAP2412 and THAP1202 **Prohibitions:** THAP3301 **Assessment:** 1 team presentation (30%); 1 major essay 2,500 words (70%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

Cultural Contexts and Production of Contemporary Art focuses on an investigation of the dynamics and relationships that link a broad variety of contemporary art practices within Australia, the Asia-Pacific region and beyond. Australia's relations with aspects of its own cultures and those of the Asia-Pacific region are examined as is a re-evaluation of the Western Canon and its role in cultural and artistic practice. This unit analyses and debates a range of issues related to concepts including centre-periphery, identity, cultural exchange and commodification.

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

**Note:** In Third Year, 2nd Semester one or other (not both) of the following two Units of Study is offered

#### (i) Technology, Time and Memory

This Unit of Study traces some of the histories, issues and speculations about technology and its impact on humans. It looks at changes in cultural practices, specifically those of the visual arts, and how artists engage with contemporary technology and speculate about its impact on ourselves and culture. Different technologies have the capacity to change the way we think, the way we experience living and the way we understand what it means to be a Subject, as for instance the change from an oral tradition to the written discourse. Students are encouraged to find innovative ways to demonstrate the impact of technology on society and how it is implicated in their own practice.

#### (ii) Theories of the Object for Artists: Visual Culture and Interpretation

This Unit of Study is designed to be relevant to students working across all disciplines, and includes investigation of the Everyday, the politics of beauty, the question of originality and the nature of the 'real' in contemporary Western culture. In this course the term 'the object' refers to any work of art in any medium, and also to any cultural item or artifact that attracts theoretical discussion. The Unit of Study may at times have expanded research fields, and this would be reflected in its structure and delivery. Its primary orientation is towards the social context in which contemporary art is produced and received.

#### Textbooks

(i) A selection of focus papers is prepared for the Unit of Study, for example Could the Soul be Software? by John Haldane; a lecture given in the 1996-7

C P T S Public Lecture Series .

(ii) Barthes, Roland 'The World as Object' in Calligram Bryson, N (ed), Cambridge University Press, 1988.  
Baudrillard, Jean 'The Object as Strange Attractor' in The Transparency of Evil - essays on Extreme Phenomena Verso, London, 1993.

#### THAP3421

##### Studio Theory Media Arts E Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Photomedia: Tanya Peterson Film and Digital Art: John Conomos **Session:** Semester 1 **Classes:** 2 hours contact and minimum 2 hours for research and study **Prerequisites:** THAP2422 or THAP2622 **Prohibitions:** THAP3321 **Assessment:** Assessment is based on the successful completion of coursework, written and/or seminar assignments and participation and engagement. For further information refer to Studio and SCA assessment criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Unit of Study is split into two areas: Photomedia; Film and Digital Art.

Photomedia:

In this studio we will primarily focus on key aspects of photomedia in relation to contemporary art theories and practices. Emphasis will be placed on exploring photography's "discursive spaces", and developing a more complex understanding of the role between theory and praxis. In particular, we will examine how individual practices contribute and respond to issues of globalisation, cultural memory and identity, and new technologies.

Film and Digital Art

The Virtual Subject in Postmodern Culture Part 1: In this studio we will examine the historical, cultural and theoretical frameworks of the virtual in late-capitalist digital media culture. The student will be introduced to contemporary debates concerning the evolution of the virtual in today's audiovisual culture from modernism to recent times. Students will be encouraged to examine the shifting complexities of the virtual in cultural and media theory and their implications for their own art practice.

##### Studio Theory Media Arts F Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Photomedia: Tanya Peterson Film and Digital Art: John Conomos **Session:** Semester 2 **Classes:** 2 hours contact and minimum 2 hours for research and study **Prerequisites:** THAP3421 **Prohibitions:** THAP3322 **Assessment:** Assessment is based on the successful completion of coursework, written and/or seminar assignments as are given throughout the unit, and participation and engagement. For further information refer to Studio and SCA assessment criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This unit of study is split into two areas: Photomedia; Film and Digital Art.

Photomedia

In this studio the focus will be to extend our enquiry into contemporary art and photomedia. We will further explore the question "What is photography?" in light of the medium's slippage across the realms of art and popular culture. Drawing on key contemporary philosophers, theorists, and practitioners, we will continue to consider how you might

locate and interpret your own emerging research in relation to contemporary art practices.

Film and Digital Art

The Virtual Subject in Postmodern Culture Part 2: recent theories of the new digital sublime in postcinema and the new image technologies will be explored and certain critical, literary and experimental audiovisual traditions from modernism to present times will be traced. Part 2 is structured in two connecting modules. The student will be examining fundamental issues of contemporary literary and media aesthetics and related genres of postmodern techno-creativity

#### THAP3431

##### Studio Theory Fine Arts E Sydney College of the Arts

**Credit points:** 3 **Teacher/Coordinator:** Painting: Dr Debra Dawes Sculpture: Mr Michael Goldberg Printmedia: Mr Justin Trendall **Session:** Semester 1 **Classes:** 2 hours contact and minimum 2 hours for research and study **Prerequisites:** THAP2632 or THAP2432 **Prohibitions:** THAP3331 **Assessment:** Assessment is based on the successful completion of coursework, written and/or seminar assignments as are given throughout the unit, and participation and engagement. For further information refer to Studio and SCA assessment criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Unit of Study is split into three areas: Painting; Sculpture; Printmedia

Painting

The focus in this studio is to investigate the key moments that shaped Australian Contemporary Painting beginning with The Field, the first exhibition of Abstract Painting in Australia in 1968 to the present. We will primarily focus on Australian painters to provide students with an understanding of their local context and history.

Sculpture

Imaginary, Natural and Institutionalised Spaces: the overarching concern of this semester will be to get students to co-ordinate their imaginative ambitions relating to the object with regard to culture, place, space and architecture. What objects or performances work best where? A reflection on modes of display and the rhetoric of reception particularly in relation to museums, public spaces, and the technologies of television, film and the internet will be encouraged.

Printmedia

The Gallery: the focus in this studio will be to look at role of print and drawing within the development of modern art. We will survey a number of key nineteenth and twentieth century artists and explores links between these historical precedents and the practices of a range of contemporary artists. A series of formal lectures and an extensive program of gallery visits will be included.

*Textbooks*

Painting

This is a studio - driven program focusing on the practices of artists as primary research and supported with the relevant theoretical frameworks. Consequently these references are subject to change and will be advised on the UoS outline at the beginning of semester.

**THAP3432****Studio Theory Fine Arts F  
Sydney College of the Arts**

**Credit points:** 3 **Teacher/Coordinator:** Painting: Assoc Professor Brad Buckley  
Sculpture: Dr Adam Geczy Printmedia: Mr Justin Trendall **Session:** Semester 2  
**Classes:** 2 hours contact and minimum 2 hours for research and study  
**Prerequisites:** THAP3431 **Prohibitions:** THAP3332 **Assessment:**  
Assessment is based on the successful completion of coursework, written and/or seminar assignments, as are given throughout the unit, and participation and engagement. For further information refer to Studio and SCA assessment criteria.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

This Unit of Study is split into three areas: Painting; Sculpture; Printmedia

**Painting**

The aim in this studio is to consolidate the student's understanding of the critical

debates surrounding painting at the beginning of the twentieth first century

and to assist in developing a clearer understanding of the place of their

own work in this history.

**Sculpture**

The last module concentrates on personal presentation, promotion and professional practice with special emphasis on sculpture, performance and installation: appropriate avenues of exhibition, good grant writing, effective artist talks, publication facilitation (journals and catalogues), websites and attendance at festivals and other events. The module is geared at maximizing the potential of the artist as a professional in the public sphere.

**Printmedia**

Professional Practice: using a combination of formal lectures, student seminars and gallery visits, the aim is to help students to develop a clearer understanding of the relationship between their own art practice and the professional and public domains in which they intend to work. The roles of galleries, public funding, the internet and other vocational contexts are surveyed.

**Textbooks****Painting**

**THAP3441****Studio Theory Object Art and Design E  
Sydney College of the Arts**

**Credit points:** 3 **Teacher/Coordinator:** Glass: Mr Andrew Lavery Ceramics: Ms Jan Guy Jewellery and Object: Ms Joyce Hinterding **Session:** Semester 1  
**Classes:** 2 hours contact and minimum 2 hours for research and study  
**Prerequisites:** THAP2642 or THAP2442 **Prohibitions:** THAP3341  
**Assessment:** Assessment is based on the successful completion of coursework, written and/or seminar assignments, as are given throughout the unit, participation and engagement. For further information refer to SCA assessment criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

**Locating practice**

This Unit of Study is split into three areas: Ceramics; Glass; Jewellery and Object

Various specifics are dealt with for students within each studio area.

The unit of study explores the notion on 'inter-disciplinary' practice, what it might mean and entail through various readings on

contemporary art and craft practice. Students will be asked to explore the many and varied fields of interest a practitioner may be engaging with. Throughout the unit students will be expected to be critically analysing what their own area of continuing research within their own practice may be.

(Please note due to changes in class sizes course content may be modified)

**Glass**

Contemporary studio glass engages with a wide variety of materials and processes. We will expand the dialogue in respect of the interdisciplinary nature inherent in this activity. Through discussion on appropriate genres, styles, syntax and classification, methodologies for articulating and critiquing practice will be explored.

**Ceramics**

The focus in this studio will be to consolidate the learning outcomes of previous TEO units undertaken in first and second year and to provide a framework for the student studying ceramics to situate their practice within an expanded field of contemporary art practice. This will be achieved through critical examination and analysis of the processes and strategies used by the contemporary ceramicist and the theoretical dialogue that informs and surrounds their work.

A range of issues relevant to contemporary practice will be addressed including: the affects of new technologies on the production of the physical object; globalisation and the survival of the studio ceramics movement; cross cultural production and the status of craft today; where am I? - an investigation of the ways contemporary ceramicists engage in interdisciplinary and hybrid praxis across traditional visual art disciplines, the humanities and sciences.

**Jewellery and Object**

In this studio we will expand the dialogue in respect to the interdisciplinary nature inherent in the Jewellery and Object studio. Through investigation of genres, styles, syntax and classification, methodologies for articulating and critiquing practice will be explored.

**THAP3442****Studio Theory Object Art and Design F  
Sydney College of the Arts**

**Credit points:** 3 **Teacher/Coordinator:** Ms Jan Guy, Mr Andrew Lavery, Ms Karin Findeis **Session:** Semester 2 **Classes:** 2 hours contact and minimum 2 hours for research and study **Prerequisites:** THAP3441 **Prohibitions:** THAP3342 **Assessment:** Assessment is based on the successful completion of coursework, written and/or seminar assignments, as are given throughout the unit, participation and engagement. For further information refer to SCA assessment criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

**Understanding Professional Practice**

This Unit of Study combines three areas: Ceramics; Glass; Jewellery and Object

The unit of study serves to locate a student's ceramics practice in a professional context. Through participating in a series of workshops and lectures you will develop and apply strategies fundamental to sound visual arts business practice. Relevant topics such as arts law, copyright, contracts, exhibiting, photographing work, writing of proposals and curriculum vitae and defining a market will be examined. You will be asked to consider and formulate how you want to present yourself publicly as an artist. Knowledge of these areas will establish

the solid foundation necessary to facilitate your ability as an artist to sustain a strong business ethic that will enhance and extend your creative working life. These issues will enable you to understand the arts / crafts industry and prepare you for a range of possible career options within the visual arts.

(Please note due to changes in class sizes course content may be modified)

The elective unit in Theories of Art Practice, 'Contemporary Art', is designed for students who are interested in an extended analysis and discussion of current visual arts practices. The unit develops material introduced in Year 1 and Year 3 units of study. Areas of enquiry include: the position of art in a global society; the impact of new media on art practices; and the changing roles of the artist and their influence on our culture. Students are encouraged to develop independent thinking and research their particular areas of interest.

For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V A, UG Study Abroad Program, Visual Arts UG Non-Degree.

'The History of Australian Art' recognises the artistic production of Indigenous and non-Indigenous artists of the past and their impact on contemporary art in Australia. It considers how Indigenous and non-Indigenous Australian artists influence each other and addresses concepts such as hybridity and purity. It addresses the discourse of nationalism and its impact on the production and reception of art. It also considers Australian art in relation to other areas of the world, including the Asia-Pacific region, Europe, Britain and the United States.

**Associated degrees:** B A, UG Study Abroad Program.

This unit of study introduces students to the key global transformations of the contemporary era, focusing on the role of the United States amid the challenges posed by: globalisation, the rise of Islamic extremism, nuclear proliferation, and the emergence of China and India as world powers. The unit is designed to give students the ability to look behind today's news headlines to understand the underlying forces driving them, particularly the behaviour and views of key policy makers and opinion leaders.

## VETS1006

### Animal Husbandry 1A Veterinary Science

**Credit points:** 5 **Teacher/Coordinator:** Dr Paul McGreevy **Session:** Semester 1 **Classes:** Lectures: 43 hours. Practicals: 24 hours. **Assessment:** Intramsemester: Three (3) items of written assessment totalling 1,000 words (45%). End-of-semester: Two (2) hour examination (55%). Other: Non-barrier assessment of cat and dog handling also horse and pig handling. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B V Sc.

This unit of study covers aspects of animal husbandry, welfare and management of: horses - their characteristics and management; the pig and poultry industries in Australia and production of meat and eggs; cats, dogs and cage and aviary birds - breeds and their management.

A series of practical classes including animal training, urban animal management as well as handling of pigs, horses, pocket pets, dogs and cats.

#### Textbooks

The Animal Husbandry 1A Handbook will be available on-line or may be purchased in the first week of semester. Students should inspect copies of the following books in the library before purchasing those that suit them best.  
Gardner JAA. et al. ed. Pig Production in Australia. 2nd edn. Butterworths, 1990.  
Houghton-Brown J. Powell-Smith VV. Pilliner S. Horse and Stable Management. Blackwell Publishing, Oxford, 1997.  
Page S. Cat Owners Manual. Fog City Press.  
McGreevy P. ed. Dog Lovers Companion. Herron Books, Brisbane  
Reid RL. A Manual of Australian Agriculture. 5th edn. Heinemann, 1990.  
Sainsbury D. Animal Health. 2nd edn. Blackwell Science, 1998.

## VETS1013

### Cell Biology 1A Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr Paul Sheehy **Session:** Semester 1 **Classes:** lectures: 47 hrs practicals: 10 hrs tutorials: 7hrs **Assumed knowledge:** HSC level chemistry and/or biology would be an advantage **Assessment:** intra-semester: 1 x Mid-semester exam (20%) end of semester: 1 x 2 hr written exam (65%) other: 1 x Cytology Group Learning Exercise (15%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B V Sc.

This unit will introduce students to the biology of the cell. Topics include cell structure and cellular metabolism. The cell structure component includes a description of cell membranes and organelles and the cellular metabolism component includes a discussion of metabolic pathways. An introduction to the contribution of the endocrine system to homeostasis of animals via their effects on animal metabolism and physiology will also be described. An understanding of commonly occurring disturbances to the production or action of hormones will be developed with clinical material being used to illustrate normal structure and function.

## VETS1014

### Veterinary Anatomy and Physiology 1A Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Rachael Gray **Session:** Semester 1 **Classes:** lectures: 38 hrs practicals: 35 hrs tutorials: 6 hrs **Assessment:** intra-semester: April (15%) Anatomy; May (10%) Physiology; Practical work (5%) Anatomy. end of semester: June 1 x Written examination: Anatomy and

Physiology (50%); 1 x Anatomy Practical (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Anatomy and histology refer to the study of the structure of cells, tissues and organs. Physiology refers to processes involved in normal cell, tissue or body function, and biological pathways involved in the maintenance of a healthy animal.

In this unit the gross anatomy and histology of the musculoskeletal system of the dog is studied together with the histology of epithelial tissue, connective tissue including blood, and the endocrine system. Basic principles of physiological control, water and electrolyte balance and the physiology of nerve and muscle cells complete the course. Clinical materials, for example, radiographic images, are used to illustrate normal structure and function. Examples of structural and physiological abnormalities that cause dysfunction and disease in animals are included. Computer based resources and formative assessments will also be used.

## VETS1017

### Professional Practice 1B Veterinary Science

**Credit points:** 3 **Teacher/Coordinator:** Dr John Baguley **Session:** Semester 2 **Classes:** Lectures: 10 x 3 hour presentations and workshops Practicals: 3 x 3 hour visits to Educational Support Practices. **Prerequisites:** VETS1021, VETS1006 **Assessment:** Intramsemester: Newsletter article (250 words 20%). Essay (1,500 words 50%). Oral Presentation (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B V Sc.

This unit of study focuses upon human animal interactions as a mechanism for further exploration of professional practice themes (communication, ethics and professionalism, practice management, personal development and animal welfare). There are three scheduled visits to local veterinary practices and these provide opportunities for further development and integration of these themes within a veterinary practice setting. Assessment tasks emphasise communication skills which are vital for success in veterinary practice.

## VETS1019

### Animal Husbandry 1B Veterinary Science

**Credit points:** 7 **Teacher/Coordinator:** Dr Pietro Celi **Session:** Semester 2 **Classes:** Lectures: 32 hours. Practical classes: 60 hours. **Prerequisites:** VETS1006 **Assumed knowledge:** A basic understanding of biological principles. **Assessment:** Intrasemester: Practical animal handling skills examination (10%), quiz (20%). End of Semester: Three (3) hour written paper (60%). Other: Plant collections (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V Sc.

This unit of study covers aspects of ruminant management and production, especially sheep, beef and dairy cattle. The agronomic and ecological principles of the production and utilisation of native and sown pastures are also covered.

Full day practical handling classes are conducted at the University Farms, Camden, with horses, pigs, poultry, sheep, beef and dairy cattle and pastures. Practical classes must be attended by all students and are assessed.

## VETS1021

### Professional Practice 1A Veterinary Science

**Credit points:** 3 **Teacher/Coordinator:** Dr Rhondda Canfield **Session:** Semester 1 **Classes:** 9 workshop sessions of 2 hours and 18 lectures of 1 hour **Assessment:** Intrasemester only: Assignments and quiz **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V Sc.

This course aims to introduce students to the veterinary profession and adjust to life in the faculty. The unit should enhance the ability to use libraries, information technology and other resources and enable students to acquire the skills and knowledge necessary for becoming an effective, reflective and self-motivated learner. Students will develop communication skills and an understanding of team work activities.

Students will learn about the history of veterinary science and its major achievements and the wide diversity of occupations and opportunities within the profession. Students will learn how to perform a basic physical examination. Animal Welfare is introduced and the main issues for veterinary students and veterinarians identified. This unit emphasises and encourages collaborative learning, clear communication, professional behaviour and self-care, and provides a background for other units in Year 1.

Unit of Study Handbook

## VETS1030

### Animal Husbandry 1A Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Peter Knight **Session:** Semester 1 **Classes:** lectures: 43 hrs practicals: 30 hrs **Assessment:** intra-semester: 2 x Items of written assessment (maximum 500 words each) (35%); Pig handling practical (5%) end-of-semester: 1 x 2 hr examination (60%) other: Non-barrier assessment of small animal handling **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

The aim of this unit is to introduce students to management of some of the standard animals in the BVSc (dogs, cats, horses, birds, pigs), as well as "pocket pets". Animal Husbandry includes housing, handling, and basic aspects of nutrition of animals. The structure of the relevant production animal industries will be described. The physical characteristics of the breeds are included, as well their roles as production and companion animals. Ways in which animal welfare can be compromised by producers and companion animal owners will be discussed. The pig and poultry industries in Australia are described, and production of meat and eggs is outlined. Aviary bird breeds and their management are also included. A library class in Information Source Evaluation is also provided. A series of practical classes in animal handling is administered, using small animals, "pocket pets", pigs and horses.

##### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Pietro Celi **Session:** Semester 2 **Classes:** Lectures: 28 hrs, practicals: 47 hrs **Prerequisites:** VETS1030 or VETS1006 **Assumed knowledge:** A basic understanding of biological principles **Assessment:** Intra-semester: Practical animal handling skills exams (10%), 1 x essay (25%). End of semester: 1 x 2.5 hr written paper (55%) other: plant collections (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This unit of study covers aspects of ruminant management and production, especially sheep, beef and dairy cattle. Basic fish, alpaca and crocodile husbandry is covered in the new animal industry section. The agronomic and ecological principles of the production and utilisation of native and sown pastures are also covered.

On successful completion of this Unit of Study students will be able to: Understand the characteristics of the Australian Livestock Industry; Appreciate the role of veterinarians in the livestock industries; Understand how the various husbandry and management techniques can impact on animal welfare and animal production; Consistently display safe and systematic competence in large animal handling; Communicate and interact competently with primary producers.

Full day practical handling classes are conducted at the University Farms, Camden, with poultry, sheep, beef and dairy cattle and pastures. Practical classes must be attended by all students and are assessed.

**Credit points:** 4 **Teacher/Coordinator:** Dr Christine Hawke **Session:** Semester 1 **Classes:** lectures: 10 x 2 hr presentations practicals: 3 x 2 hr visits to Educational Support Practices other: Independent Learning Project (24 hrs) **Prerequisites:** Either VETS1031 or both VETS1021 and VETS1017 **Assessment:** intrasemester: participation, 1 x quiz, 1 x oral presentation, 1 x written report end of semester: 1 x examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This unit provides opportunities for the student to understand and apply basic principles in veterinary practice management. The focus is upon small animal practice and this is enhanced through continued Education Support Practice visits. In addition, students will further explore professional practice themes of animal welfare, communication and personal development.

During this unit of study, students are also required to successfully complete an Independent Learning Project which must be submitted by the end of semester teaching.

### VETS2009

#### Genetics and Biometry

##### Veterinary Science

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Peter Thomson **Session:** Semester 1 **Classes:** lectures: 26 hrs (Genetics) , 26 hrs (Biometry) practicals: 13 hrs (Biometry) tutorials: 13 hrs (Genetics) **Assumed knowledge:** HSC Mathematics, VETS1018 **Assessment:** intra-semester: Genetics: 1 x 0.5 hr half-way exam (17%) Biometry: regular quizzes (15%), practical assignment (15%) end of semester: 1 x 1 hr Genetics exam (33%), 1 x 1 hr Biometry exam (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This Unit of Study presents an introduction to those aspects of genetics and statistics that are relevant to veterinarians. The genetics section covers the creation and use of genetic maps; single-locus disorders; chromosomal abnormalities; non-Mendelian familial disorders; immunogenetics; pharmacogenetics; genetic variation in pests, parasites and pathogens; genetic and environmental control of inherited diseases; relationship and inbreeding; heritability; breed history and structure; selection and crossing. The biometry section covers biological variability; descriptive statistics (numerical and graphical summaries); probability concepts; samples and populations; the normal distribution; hypothesis tests (one- and two-sample tests); confidence intervals; analysis of variance; regression and correlation; experimental design (basic principles, specific design types); and contingency tables.

**VETS2011****Veterinary Anatomy and Physiology 2A  
Veterinary Science**

**Credit points:** 7 **Teacher/Coordinator:** Assoc Prof Rosanne Taylor **Session:** Semester 1 **Classes:** lectures: 46 hrs practicals: 30 hrs tutorials: 22 hrs **Assumed knowledge:** Veterinary Science Year 1, VETS2010 **Assessment:** intrasemester: 1 x 40 min assessment (total 25%) end of semester: 1 x 90 min exam (45%) other: 1 x 45 min practical exam (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This unit has been designed to extend knowledge obtained during Year 1 units in Veterinary Anatomy and Physiology and explore some mechanisms of animal dysfunction. It also deals with new topics in animal structure and function, particularly the nervous system, and covers the anatomy of common domestic bird species, with an emphasis on the chicken.

The unit focuses on the nervous system and senses, how loss of structure and function causes signs of dysfunction, and development of skills used to recognize normal and abnormal animals. Students will learn through dissection, problem solving and will be assessed on ability to apply and use their knowledge and development of generic skills. Neurophysiology and neuroanatomy are integrated, and students will learn how neural function is determined by the neural structures and their connections. Students will apply the principles covered in these topics to examine, describe, interpret and explain how animals perceive their environment, process and store information and respond with voluntary and involuntary activities. The primary focus will be on normal animals, however specific lesions will be used to demonstrate the role of components of the nervous system in normal function. The skills and knowledge acquired during this unit will be further used and developed in units of study in years 2-5 of the course and will provide a basis for analysis of animals with abnormal neurological function in medicine. The unit also covers avian anatomy and aspects of applied cardiovascular and exercise physiology, thermoregulation and integument. Tutorials and formative assessments on webct will be used to assist learning.

Veterinary Science**

**Credit points:** 4 **Teacher/Coordinator:** Dr Glenn Shea **Session:** Semester 2 **Classes:** lectures: 13 hrs practicals: 52 hrs **Prerequisites:** VETS1014, VETS1034, VETS2011, VETS2010 **Assessment:** intra-semester: 2 x 1 hr written papers (one in-semester) (each 20%); 1 x practical examination (40%); 1 x assignment (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

In this unit of study, the topographic and regional anatomy of the horse, a large domestic animal, is studied by sequential dissection of entire preserved horses. This unit of study also involves integration of knowledge of systemic anatomy, acquired from VETS1014, 1020, 2010 and 2011, allowing the student to develop an understanding of the regional anatomy of a domestic mammal, knowledge necessary for surgery units of study in later years. Clinically relevant regions are emphasized, and the relevance illustrated by reference to common clinical conditions.

Mid-Semester Practical; Mid-semester Quiz end of semester: 1 x Written exam. other: 1 x Practical exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

The overarching theme for this unit of study is the concept of disease as the result of the interaction between the host, the agent of disease and environmental factors (HPEI). Diseases encountered in veterinary practice are used to illustrate these concepts. Critical underpinning of this approach to disease, is the understanding of the five fundamental pathological processes (general pathology) as host response to disease or the direct effect of agents of disease. Physical, chemical, genetic and infectious agents of disease are introduced.

Previous subjects including anatomy, histology, physiology and cell biology, lay the groundwork for this unit of study because it is essential to understand normal structure and function before we can recognize and understand the implications of the disease state (abnormal structure and/or function).

Principles of Disease is vital in preparing the student for the specific disciplines studied in systemic pathology, and studies of agents of disease (microbiology and parasitology), as well as for some components of pharmacology, in Semester 5 of the course.

#### Veterinary Conservation Biology Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Assoc Prof David Phalen **Session:** Semester 2 **Classes:** lectures: 45 hrs practicals: 6 hrs tutorials: 3 hrs (Taronga Zoo) **Assessment:** intra-semester: 1 x Research Plan (5%), 1 x Essay (2,000 words) (25%) end of semester: 1 x 90min exam (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Veterinary Conservation Biology covers the identification, anatomy, and physiology of Australia's unique native birds, reptiles, amphibians, and mammals. The second section of this course details the threatening processes that are impacting Australia's environment and ecosystems. Processes discussed include climate change, urbanization, drought, agricultural practices, bush fires, invasive animal species, and disease. The last section of this course focuses on the roles that veterinarians and biologists can play in in situ and ex situ conservation of Australian wildlife. Experts in each of these fields will contribute to the teaching so that students can learn from people with first hand experiences in each specialty.

#### Veterinary Anatomy and Physiology 2B Veterinary Science

**Credit points:** 8 **Teacher/Coordinator:** Dr Liisa Ahlstrom **Session:** Semester 2 **Classes:** lectures: 58 hrs practicals: 39 hrs tutorials: 4 hrs **Prerequisites:** VETS2011 **Assumed knowledge:** VETS1014, VETS1034, VETS2010 **Assessment:** intrasemester: 1 x 1 hr exam (25%) end of semester: 1 x 2 hrs theory, 1 x 0.5 hr practical (57%) other: 1 x 5 minute oral presentation (5%), 2

x written assignments, work in pairs (total 1,200 words) (13%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Topics studied in this unit of study include the gross anatomy, histology and physiology of the reproductive system and mammary glands of domestic animals, fertility, pregnancy, parturition and prenatal and postnatal development. Students are introduced to clinically relevant material. Classes other than lectures will include tutorials, laboratory work, library research and small group projects. Incorporated into this unit are two sessions on the surface anatomy of the horse and cow - the focus is on clinically relevant structures.

### VETS3011

#### Veterinary Pathology Veterinary Science

**Credit points:** 7 **Teacher/Coordinator:** Dr Mark Krockenberger **Session:** Semester 1 **Classes:** Lectures: 58 hrs Practicals: 20 hrs gross and microscopic pathology plus 6 hrs necropsy technique, description and interpretation. Case-based learning activities including tutorials: 32 hrs timetabled for these activities - 24 for group discussions and **Prerequisites:** VETS2013 **Assumed knowledge:** Veterinary Science Years 1 - 2 **Assessment:** intra-semester: ICAPs (20%), Prac Exam (10%) end of semester: Theory (60%), Practical (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Veterinary Pathology is the study of disease and disease processes in animals and includes learning skills to understand and recognise disease in a range of animal species. Pathology is one of the core knowledge areas for veterinarians and additional training in the area would be required for those aspiring to become a specialist veterinary pathologist.

The course is a practically-orientated systemic pathology unit that builds on the knowledge of normal structure and function, general pathology and agents of disease, developed in Years 1, 2 and 3 of the degree.

The Integrative Case-based Applied Pathology (ICAP) exercises strongly integrate preclinical and paraclinical knowledge in a relevant clinical diagnostic setting.

### VETS3013

#### Veterinary Pharmacology and Toxicology Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr Merran Govendir **Session:** Semester 1 **Classes:** lectures: 36 hrs tutorials: 16 hrs **Prerequisites:** VETS2013 **Assumed knowledge:** Veterinary Science Years 1 - 2 **Assessment:** intrasemester: Quizzes, 1 x assignment end of semester: 1 x 1 hr exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Pharmacology is the study of the safe use of drugs in the therapy and prevention of animal diseases. Toxicology refers to pharmacologically active toxins which adversely affect animals. These subjects build on knowledge learnt in Chemistry, Cell Biology and Veterinary Physiology and provide the basis to understand how pharmacological agents work at their site of action and how they behave in the body. In order to link the diseases of animals and their therapy the course runs parallel with Units of Study in Veterinary Pathology, Veterinary Microbiology and Veterinary Parasitology. The application of knowledge learnt in Veterinary Pharmacology and Toxicology is a major component of clinical veterinary science.

The Unit covers the principles of drug action and then deals with a range of drug classes pertinent to veterinary science and the peculiarities of drugs in the core species.

#### Animal Behaviour and Animal Welfare Sci Veterinary Science

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof Paul McGreevy **Session:** Semester 1 **Classes:** lectures: 16 hrs practicals: 26 hrs **Assumed knowledge:** Veterinary Science Years 1 - 2 **Assessment:** intrasemester: 2 x 2 written assignments (50%) end of semester: 1 x 1.5 hr examination (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Animal Behaviour and Animal Welfare Science is the study of normal and abnormal behaviours in domestic and captive species. Animal Behaviour is one of the core knowledge areas for veterinarians because it facilitates the recognition of disease states and helps veterinarians to make informed comment on animal welfare issues. Additional training in the area would be required for those aspiring to become specialist veterinary behaviour therapists. The Unit of Study draws on knowledge of many aspects of animal husbandry, evolutionary biology and physiology, pharmacology and psychology. The course focuses on the importance of understanding ethology, learning theory and trainers' techniques and includes demonstrations from expert animal handlers and trainers.

#### Veterinary Public Health Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr Jenny-Ann Toribio **Session:** Semester 2 **Classes:** lectures: 38 hrs tutorials: 4 hrs Abattoir experience practicals: 8 hrs **Assumed knowledge:** Veterinary Science Years 1 - 2 **Assessment:** intra-semester: 1 x epidemiology assignment (20%) end of semester: 1 x final written examination (65%) other: Abattoir experience week assessment (15%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V Sc.

Veterinary Public Health encompasses 3 topics: veterinary epidemiology, food safety and zoonoses. Knowledge of these allows veterinarians to play a vital role in maintaining human health. Veterinary Epidemiology which is the study of disease patterns provides understanding of the occurrence of human and animal disease necessary for effective control. Veterinarians have an increased role in Food Safety from clinical practice to food standards regulation. There will be a number of practical classes to prepare students for their compulsory extramural visit to an abattoir during the following 12 months. Zoonoses are important for veterinary occupational health and safety and for the health of our clients. The course in Veterinary Public Health builds on Veterinary Pathology, Veterinary Microbiology and Veterinary Parasitology and runs concurrently with Animal Disease and Professional Practice 3. Topics are dealt with in the context provided by the Animal Disease cases.

**Associated degrees:** B V Sc.

This unit extends and integrates knowledge in Veterinary Parasitology, Veterinary Microbiology, Veterinary Pathology and Veterinary Pharmacology. The Unit is presented in a series of disease cases in a herd or individual animal. For each case students work through causative agents, differential diagnosis, diagnostic techniques and arrive at treatment and control solutions. The course includes diseases caused by a wide range of infectious organisms, as well as nutritional and genetic disease in a range of animals of veterinary interest. Linked to each case is a major topic which is one theme in Veterinary Public Health (epidemiology, zoonoses, hygiene) or therapy. The cases are also linked to Professional Practice themes.

#### Textbooks

Unit of Study Handbook

Recommended Reading: Varies between cases. Reading lists provided at the start of each case.

#### Professional Practice 3 Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr John Baguley **Session:** Semester 2 **Classes:** lectures: 20 x 1 hr presentations tutorials: 11 x 1 hr tutorials group work: 11 x 1 hr **Assumed knowledge:** VETS1021, VETS1017, VETS2008 **Assessment:** intra-semester: Group Presentation, Individual Reflection end of semester: 1 x examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This unit provides students with material to aid their understanding of financial and legal perspectives in the management of cases and scenarios typical of veterinary practice life. There is a focus upon the legislative environment through a preliminary study of the various Acts and other legislation pertaining to the practice of veterinary science.

Other perspectives such as implications for practice management and finance are also developed through scenarios linked to clinical material presented in other units of study this semester. Classes comprise student presentations supported by talks from appropriate authorities, lectures and tutorials. The majority of learning for this unit of study is completed in groups and hence there is an additional emphasis upon the development of teamwork skills and their application to veterinary practice.

### VETS3040

#### Veterinary Microbiology Veterinary Science

**Credit points:** 5 **Teacher/Coordinator:** Dr Jacqui Norris **Session:** Semester 1 **Classes:** lectures: 56 hrs practicals: 9 hrs **Prerequisites:** VETS2013 **Assumed knowledge:** Veterinary Science Years 1 - 2 **Assessment:** intra-semester: 1 x Case-based quiz (15%), 1 x Practical exam: identifying an unknown bacteria (5%) end of semester: 1 x Theory exam (45%), 1 x Practical exam (20%). assignments: Development of a visual learning tool for microbiology (15%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Veterinary Microbiology encompasses veterinary bacteriology, virology, and mycology. This unit of study uses clinical cases and research studies to 1) explore the unique features of these infectious agents, 2) explore their role in the development of animal disease; 2) critically analyse the strategies used for their diagnosis, treatment and control; and 3) encourage an evidence based approach to investigating clinical problems. Veterinary microbiology is based on an understanding of the structure and function of bacteria, viruses and fungi of veterinary significance as well as the pathological and immunological processes taught in Principles of Disease VETS2013. Veterinary Microbiology helps to prepare students for Animal Disease VETS3242, clinical subjects and life in veterinary practice.

#### Veterinary Parasitology Veterinary Science

**Credit points:** 5 **Teacher/Coordinator:** Dr Jan Slapeta **Session:** Semester 1 **Classes:** lectures: 39 hrs practicals: 24 hrs tutorials: 8 hrs **Assumed knowledge:** Veterinary Science Years 1 - 2 **Assessment:** Intra-semester: 1 x exam (10%), 5 x practical exercises (10%), 1 x group project on a topical area of parasitology (15%) End of Semester: 1 x practical examination (10%) which will require some identification of parasites of veterinary importance. 1 x written examination (55%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Veterinary Parasitology is a study of the common diseases of companion and commercial animals caused by protozoan, nematode, platyhelminth, insect and acarine parasites. The course includes the biology of parasites, with emphasis on principles of the pathogenesis, diagnosis, epidemiology, treatment and control of parasitic diseases. Veterinary Parasitology assumes an understanding of basic biological principles and knowledge of the anatomy and physiology of animals. The unit is a preparation for Animal Disease VETS3242.

#### Veterinary Clinical Pathology Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Professor Paul Canfield **Session:** Semester 2 **Classes:** Lectures: 36 x 1hr Practical/tutorials: 6 x 2 hrs **Prerequisites:** Veterinary Science Years 1 - 2, Semester 1 Year 3. **Prohibitions:** VETS3025 **Assumed knowledge:** Semesters 1 to 5 of the BVSc. **Assessment:** Intra-semester: Continual tutorial / Practical evaluation (20%) End of Semester: 1 x 2hr Open book written exam (80%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Veterinary Clinical Pathology involves the application of pathological, biochemical, haematological, microbiological and parasitological techniques and test results to clinical aspects of veterinary science. Practical work includes the examination of specimens taken from living animals by techniques in the above fields. Special attention, throughout the course, is given to the application and interpretation of tests used in the diagnosis, prognosis and management of clinical disease. Material on disease is provided for companion and farm animals as well as wildlife. This course builds on Veterinary Pathology, Veterinary Microbiology, Veterinary Parasitology; integrates horizontally with Small Animal Medicine and Animal Disease taught within the same semester; and prepares students for both small animal practice and large animal health and production and clinical practice.

#### Textbooks

A Unit of Study Handbook and WEBCT e-learning site contains detailed information and notes for Veterinary Clinical Pathology.

## VETS3244

### Small Animal Medicine and Therapeutics 1 Veterinary Science

**Credit points:** 8 **Teacher/Coordinator:** Dr Linda Fleeman **Session:** Semester 2 **Classes:** Lectures: 72 x 1 hr Tutorials: 24 x 1 hr **Prerequisites:** Semesters 1 to 5 of the BVSc **Assumed knowledge:** Semesters 1 to 5 of the BVSc **Assessment:** Intra-semester: Assignments (10%), 1 x Examination (40%) End of Semester: 1 x Final Examination (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

Small Animal Medicine & Therapeutics 1 is the foundational unit of small animal veterinary medicine and expands on the application of the fundamental principles of Veterinary Pharmacology (VETS3013).

This unit builds upon concepts of problem-solving and pathological processes explored earlier in the curriculum. It enables integration and application of knowledge learnt in Veterinary Anatomy & Physiology 1A, 1B, 2A and 2B

(VETS1014, VETS1034, VETS2011, VETS2016), Principles of Disease (VETS2013), Veterinary Microbiology (VETS3040), Animal Disease (VETS3038), Veterinary Pathology (VETS3011) & Veterinary Pharmacology and Toxicology (VETS3013).

Through predominantly case-based teaching, this unit of study enables undergraduate veterinary students to develop clinical reasoning frameworks using the problem-oriented approach to medicine and lays the foundation for practicing as a small animal clinician. Further, this unit integrates veterinary pharmacology, enabling the development of specific therapeutic plans for small animal patients based on fundamental principles and evidence-based medicine.

Assessment: Small Animal Medicine & Therapeutics 1 includes assignment/s that provide students with the opportunity to develop foundational skills in clinical examination of the small animal patient, intra-semester evaluations and an end of semester examination.

## VETS4042

### Veterinary Research A Veterinary Science

**Credit points:** 24 **Teacher/Coordinator:** Dr Glenn Shea **Session:** Semester 1 **Classes:** No lectures or classes. **Prerequisites:** Veterinary Science Years 1, 2 and 3. **Corequisites:** VETS4043 **Assessment:** Thesis, executive summary, oral presentation and oral examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Sc (Vet).

In this unit students undertake a period of supervised research in a topic in Veterinary Science.

## VETS4043

### Veterinary Research B Veterinary Science

**Credit points:** 24 **Teacher/Coordinator:** Dr Glenn Shea **Session:** Semester 2 **Classes:** No lectures or classes. **Prerequisites:** VETS4042 **Assessment:** Thesis, executive summary, oral presentation and oral examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Sc (Vet).

This unit of study is a continuation of VETS4042.

## VETS4111

### Veterinary Anaesthesia Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr Sanaa Zaki **Session:** Semester 1 **Classes:** Lectures: 30 hrs practicals/tutorials: 14 hrs **Prerequisites:** Veterinary Science Years 1 - 3 **Assessment:** Intra-semester: A combination of assignments, quizzes and practical assessment (40%) end of semester: 1 x 90 min written examination (60%) other: Formative assessment throughout semester **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

This course teaches students about the planning and implementation of safe anaesthesia for small and large animals. Where possible case material from both Veterinary Teaching Hospitals is incorporated to highlight the clinical application of this unit of study. The focus is primarily on dogs, cats, horses and production animals; however discussion of other species is included.

Within the scope of Veterinary Anaesthesia the course will cover: different anaesthetic agents and techniques for different species; anaesthesia for common disease conditions; equipment used in anaesthesia; pain management; and resuscitation techniques for cardio-pulmonary arrest.

Lectures introduce the theory that underpins safe and humane anaesthetic practice. Tutorial classes reinforce and develop further the concepts discussed in lectures. Practical classes demonstrate to students the techniques and procedures performed routinely during clinical anaesthesia as well as life saving procedures that may be required in an emergency. Clinical Learning sessions introduce students to the Anaesthesia Unit at the UVTH-S and provide opportunity for them to observe anaesthetic procedures and participate in clinical rounds.

**VETS4112****Veterinary Medicine & Clinical Pathology  
Veterinary Science**

**Credit points:** 8 **Teacher/Coordinator:** Dr Linda Fleeman **Session:** Semester 1 **Classes:** lectures: 61 hrs approx practicals: 9 hrs tutorials: 34 hrs approx **Prerequisites:** Veterinary Science Years 1 - 3 **Assessment:** intra-semester: 1 x Clinical Pathology and Veterinary Medicine Exam (30%) end of semester: 1 x Veterinary Clinical Pathology Exam (20%), 1 x Veterinary Medicine Exam (50%). See the VETS4112 UoS Handbook for details. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

Medicine commenced in third year as part of clinical sciences, and now continues through the first semester of fourth year. Resource sessions on diseases of various organ systems constitute the didactic component. Case based material will be utilized for tutorials and practical classes. Veterinary Clinical Pathology is integrated into the course and assists in the diagnostic process by providing laboratory information, which may also be utilized in monitoring response to treatment. Laboratory data analysis will form the major part of lectures and tutorials. The unit of study is based on the study of dogs and cats with reference to other animal species as necessary.

*Textbooks*

See the VETS4112 UoS Handbook

**VETS4113****Veterinary Radiology  
Veterinary Science**

**Credit points:** 4 **Teacher/Coordinator:** Prof Robert Wrigley **Session:** Semester 1 **Classes:** lectures: 26 hrs tutorials: 26 hrs **Prerequisites:** Veterinary Science Years 1 - 3 **Assessment:** intrasemester: Formative assessment using Multiple Choice Questions and/or Web CT (30%). end of semester: Written examination (70%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

The course covers the radiographic appearance of the normal structure and function of the various organ systems commonly investigated by radiology. Students will be taught to recognise, describe and diagnose the changes in structure and function related to diseases that are commonly found in radiographs. There will be an introduction to the special radiological techniques, including radiological contrast studies that are commonly used to further demonstrate diseases. The role of diagnostic ultrasound in the diagnosis of the common diseases of soft tissues will also be covered.

**VETS4114****Veterinary Surgery  
Veterinary Science**

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Geraldine Hunt **Session:** Semester 1 **Classes:** lectures: 44 hrs practicals: 24 hrs **Prerequisites:** Veterinary Science Years 1 - 3 **Assessment:** intra-semester: MCQ week 7 or 8 (25%) end of semester: 1 x written final exam (60%) other: 1 x 1,000 word essay (15%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

Lectures, demonstrations and practical classes address the principles and practice of soft tissue and orthopaedic surgery in companion animals using an integrated, systems and problem-orientated approach. Practical classes provide instruction and practice in basic procedures such as desexing, cystotomy, gastrointestinal biopsy and resection, fracture fixation, surgery for cruciate ligament rupture, ophthalmic surgery, and other common surgical procedures.

**VETS4221****Bird Health and Production  
Veterinary Science**

**Credit points:** 4 **Teacher/Coordinator:** Dr Patricia Holyoake, Prof Richard Whittington. **Session:** Semester 2 **Classes:** lectures: 34 hrs (14 chickens + 15 caged birds, reptiles & pocket pets + 5 fish). practicals: 18 hrs (5 chickens + 10 caged birds + 3 fish). **Prerequisites:** Veterinary Science Years 1 - 3 **Assessment:** Intra-semester: 1 x Fish assignment (10%); Chicken/Caged bird/pocket pet mid-semester assignment (40%). End of semester: 1 x Written exam (50%). Other: Formative assessment of animal handling during practical class sessions. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

The aim is to develop knowledge and skill in medicine of birds (including poultry). Emphasis is placed on the epidemiology, management and preventive medicine of chickens (commercial broiler and layer operations) and diagnostics, medicine and surgery of caged birds.

For poultry, there is a large focus on how to approach a production or health-limiting problem on-farm to resolve any performance-limiting issues.

The cage bird component covers a wide range of avian species including waterfowl, psittacine and passerine birds. It will address the collection and analysis of clinical, necropsy and clinicopathologic information to investigate individual bird and flock problems. It will cover individual bird and flock therapy.

This unit of study also includes medicine of reptiles, "pocket pets" (rabbits, guinea pigs etc.) and aquatic animals. The reptile and "pocket pets" component will cover anatomy and physiology applicable to clinical examination and common problems encountered in practice in Australia. The diagnosis and treatment of common conditions affecting aquarium fish and aquaculture enterprises will also be presented. This will include epidemiological approaches to production limiting problems. Students will gain experience handling representatives of the common species and performing common clinical procedures.

**VETS4222****Horse Medicine and Surgery  
Veterinary Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Tony D. Mogg **Session:** Semester 2 **Classes:** lectures: 40 hrs practicals: 36 hrs tutorials: 2 hrs **Prerequisites:** Veterinary Science Years 1 - 3 **Assessment:** intrasemester: 1 x Written exam; Scenario based assignment; Horse handling practical exam end of semester: 1 x Written exam other: 1 x Practical exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

Horse Medicine and Surgery is designed to provide a foundation whereby students become competent to deal with a horse or horses experiencing common medical or surgical problems as would be encountered in mixed practice. Much of the lecture course utilises problem-based learning using a case-based approach. This approach is designed to augment skills developed in other disciplines including anatomy, pathology, microbiology, pharmacology and small animal medicine and surgery. The course is designed to assist the student in learning effective problem solving skills, determination of differential diagnoses and the judicious use of appropriate diagnostic aids when attempting to reach a diagnosis. Options and approaches to commonly used therapeutic measures are included. Areas of emphasis in the course include lameness, respiratory diseases, abdominal pain (colic), weight loss, diseases of foals, ophthalmology, reproductive

management, dermatology and various other aspects of equine surgery and internal medicine. There are a series of practical classes designed to augment and expand the student's experiences in equine medicine, surgery and reproduction.

### VETS4223

#### Pig Health and Production

##### Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr Trish Holyoake **Session:** Semester 2 **Classes:** lectures: 20 hrs practical: 5 hrs tutorial: 2 hrs independent learning: 12 hrs **Prerequisites:** Veterinary Science Years 1 - 3 **Assessment:** intra-semester: Group WebCT exercise, 1 x individual multiple choice exam end of semester: 1 x 1 hr written exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

The aim of this unit of study is to provide students with an understanding of the major factors driving the profitability and sustainability of the commercial pig industry. Students will be provided with the basic skills to resolve production and profit-limiting problems on pork production units. The emphasis is on managing endemic disease and preventive medicine, with consideration given to welfare and biosecurity aspects of intensively housed animals. There is some exposure given to pet pigs and use of pigs as models for biomedical research. Practical classes are designed to provide students with the opportunity to observe and participate in specialized husbandry and diagnostic practices undertaken on pig farms. Students will have the opportunity to practice problem-solving in a pig production setting during a tutorial.

### VETS4224

#### Ruminant Health and Production

##### Veterinary Science

**Credit points:** 10 **Teacher/Coordinator:** Assoc Prof John House **Session:** Semester 2 **Classes:** lectures: 58 hrs practicals: 85 hrs tutorials: 12 hrs TILHAP's **Prerequisites:** Veterinary Science Years 1 - 3 **Assessment:** intrasemester: TILHAP's (15%), 1 x mid-semester exam (35%), end of semester: 1 x final exam (50%) other: Practical classes: Pass/Fail **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

This course aims to facilitate deeper learning approaches to gain an understanding of diseases of ruminants within various livestock production systems. It uses a case-based approach with TILHAP's (Teaching Innovations in Livestock Health & Production) to demonstrate how systematic problem investigations provide an 'evidence basis' for implementing rational disease control by management at the herd and flock level on-farm. This process is extended to problem management at the regional, national and international levels, illustrating the numerous career paths for veterinarians in servicing the food and fibre industries, and preparing students for their extramural training as interns in rural mixed and public practice. The aim is for our graduates to:

Use systematic pathological and epidemiological principles in the conduct of investigations to diagnose the common management and disease problems of ruminants;

Readily obtain information from numerous knowledge resources that can lead to constructive advice, facilitating farm animal production and welfare;

Develop skills in animal handling, clinical examination, pregnancy diagnosis, specimen collection, necropsy procedures, use of diagnostic laboratories and farm animal medicine and surgery;

Apply their skills and knowledge in problem solving to design applied research and extension programs that promote disease control and prevention programs to assist optimal farm animal production.

### VETS4331

#### Animal Husbandry Practical Report

##### Veterinary Science

**Credit points:** 2 **Teacher/Coordinator:** Dr Pietro Celi **Session:** Semester 1 **Assumed knowledge:** Veterinary Science Years 1-2 before extramural placements commence **Assessment:** 1. Assignments that address issues related to nutrition, reproduction, animal welfare, or scope for veterinary involvement on the farm are to be submitted in the second week of semester one in fourth year of the course. One assignment of 500 words must be submitted for each of the following species; sheep, horse, dairy cattle, beef cattle, pigs and poultry. 2. A test of basic skills used for handling sheep and cattle will be administered at the Camden farms during semester 1, Year 4. Students must pass this assessment to pass the unit of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc, Grad Dip Vet Sc.

Students are required to undertake periods of time on farms to learn aspects of farm management and the roles of veterinarians on farms. Students may have opportunities to practice their animal handling skills during these placements. After completing VETS4331 students will be able to 1) Consistently display safe and systematic competence in large animal handling; 2) identify how the various husbandry and management techniques can impact on animal welfare and animal production and recommend procedures to minimize these impacts; 3) appreciate the significance of the role of veterinarians in the livestock industries; 4) communicate and interact competently with primary producers; 5) develop effective professional standards. The minimum compulsory period of extramural experience in Animal Husbandry is 25 days and is to be done after commencing the course. The number of days required for placement at each farm type is: horse 5 days, dairy 5 days, beef 5 days, sheep 5 days, pig 3 days, poultry 2 days. Students will undertake 5 days of practical classes at the University's Camden farms to develop handling skills with cattle, horses, pigs, sheep and poultry. Students can commence extramural farm placements only after successful completion of animal handling practical classes at Camden and completion of enrolment in all units of study in Years 1 and 2. Students may also undertake an optional 4 weeks of elective placements, which do not carry any assignment requirements.

### VETS5331

#### Preparation Veterinary Practice

##### Veterinary Science

**Credit points:** 2 **Teacher/Coordinator:** Dr John Baguley **Session:** Semester 1, Semester 2 **Classes:** lectures: 14 hrs tutorials: 4 hrs **Prerequisites:** Veterinary Science Years 1 - 4 completed. **Assessment:** intrasemester: Required submissions. end of semester: 1 x exam other: Competency testing in animal handling. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This unit of study will prepare students as Veterinary Interns for their Intramural and Extramural Clinical Rotations during Year 5. Students will be instructed in practice management, financial management, skills marketing, insurance for practice and human resources, communication with colleagues and clients, time management and

distance learning resources, accessing Virtual Clinical Campus and VEIN, self and stress management and job seeking skills.

There will be focus sessions for each Year 5 Unit of Study. Professional ethical behaviour will be discussed throughout the course. Preparation and delivery of assignments and all formal requirements for the Extramural Rotations will be presented. Learning activities include lecture presentations, seminars, small group tutorials, self-completion tasks and skills checks.

*Textbooks*  
Unit of Study Handbook

### VETS5335

#### Small Animal Practice (Extramural)

##### Veterinary Science

**Credit points:** 5 **Teacher/Coordinator:** Dr John Baguley **Session:** Semester 1, Semester 2 **Classes:** practicals: 24 day practicum **Prerequisites:** Veterinary Science Years 1 - 4 **Assessment:** intra-semester: 4 x case logs (4 cases: 2,500 words), 1 x communication task, 1 x Supervisor Report Form. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Departmental permission required*

**Associated degrees:** B V Sc.

The core small animal practice extramural rotation builds upon skills, knowledge and attitudes, developed throughout the entire course and is designed to enable final year students or veterinary interns to gain a holistic understanding and experience of small animal practice prior to graduation. Veterinary interns are placed at a Faculty of Veterinary Science approved small animal practice of their choice for a 24 day rotation. During this time interns are expected to negotiate workplace tasks with their Extramural Supervisor that enable the achievement of learning outcomes linked to the development of graduate attributes.

Interns are expected to fully participate in agreed activities whilst attending the practice, typically taking on the role and schedule of a full time supervised associate. The requirements for this rotation include the completion of the following documents: an Introductory Letter to the placement at least four weeks prior to the rotation; a Site Contract; Learning Agreement Form; Skills Report Form; and Rotation Feedback Form. During the rotation interns are expected to participate in three meetings with the extramural supervisor and complete a communication task.

*Textbooks*  
Handbook for Extramural Rotations.

### VETS5336

#### Rural Mixed Practice 1 (UVCC)

##### Veterinary Science

**Credit points:** 5 **Teacher/Coordinator:** Dr Tony D. Mogg **Session:** Semester 1, Semester 2 **Classes:** practicals: 26 day practicum **Prerequisites:** Veterinary Science Years 1 - 4 completed **Assessment:** intra-semester: 3 x Supervisor Report Forms; Written Reports; Oral Communication Tasks; Unit of Study Examinations **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Departmental permission required*

**Associated degrees:** B V Sc.

This unit of study provides students with an opportunity to practically apply the knowledge and skills they have developed during years 1 to 4. Through participation in professional activities students are expected to develop their communication skills with the public, staff and colleagues.

Veterinary Interns must achieve a satisfactory grade in all three services (anaesthesia, equine and ruminant health and production) to fulfil the requirements of this unit of study (including passing examinations in all three services). Interns are also required to complete Written Reports and oral Communication Tasks which will be evaluated by the UVCC Supervisor or nominee. Forms to be completed and submitted to the Faculty: 1. Site Contract; 2. Rotation Feedback Forms for each service; and 3. Skills Report Forms for each service.

*Textbooks*  
Handbook for Intramural Rotations.

### VETS5337

#### Rural Mixed Practice 2 (Extramural)

##### Veterinary Science

**Credit points:** 5 **Teacher/Coordinator:** Assoc Prof John House **Session:** Semester 1, Semester 2 **Classes:** practicals: 24 day practicum **Prerequisites:** Veterinary Science Years 1 - 4 completed. **Assessment:** intrasemester: Case Log (4 large animal cases: 2,500 words), 1 x communication task, 1 x Supervisor Report Form. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Departmental permission required*

**Associated degrees:** B V Sc.

This unit of study provides students with an opportunity to practically apply the knowledge and skills they have developed during years 1 to 4. In particular, they will gain experience in livestock and equine practice. Through participation in professional activities students are expected to develop their communication skills with the rural community, staff and colleagues.

Interns are expected to fully participate in agreed activities whilst attending the practice, typically taking on the role and schedule of a full time supervised associate. The requirements for this rotation include the completion of the following documents: an Introductory Letter to the placement at least four weeks prior to the rotation; a Site Contract; Learning Agreement Form; Skills Report Form; and Rotation Feedback Form. During the rotation interns are expected to participate in three meetings with the extramural supervisor and complete a communication task.

### VETS5345

#### Primary Accession Med & Surgery (UVTHS)

##### Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr Vanessa Barrs **Session:** Semester 1, Semester 2 **Prerequisites:** Veterinary Sciences Years 1-4 **Assessment:** Intrasemester: Supervisor report form. Case presentations at Clinical Rounds. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This 3 week rotation at the University Veterinary Teaching Hospital Sydney, is designed to give student interns hands-on experience in general practice and exposure to the types of cases they will encounter most commonly after graduation. Interns will have the opportunity to practice clinically-relevant techniques such as history taking, physical examination, diagnostic sample collection, radiology and ultrasound, medical record keeping, critical analysis of case-related information, development and implementation of treatment plans and evaluation of outcomes. A major focus of the rotation will be developing clinical competency in preventative health care programs for small animals, including vaccination and worming protocols. In addition, interns should gain an appreciation of the holistic nature of veterinary practice, the importance of client-veterinarian, veterinarian-patient and collegial interactions, from the moment the client makes an appointment through resolution of the presenting problem and beyond. Students will participate in other University Veterinary Teaching Hospital activities including management of patients in hospital, intensive care duty and weekend duty.

*Textbooks*  
Handbook for Intramural Rotations  
Nelson RW. Couto CG. eds. Small Animal Internal Medicine. 4th edn. Mosby 2003

### VETS5346

#### Referral Medicine (UVTHS)

##### Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr Vanessa Barrs **Session:** Semester 1, Semester 2 **Classes:** See description **Prerequisites:** Veterinary Sciences Years 1-4 **Assessment:** Intrasemester: Supervisor Report Form. Case-log. Case-record submission. Case-presentation at clinical rounds. Veterinary

literature exercise. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

In this unit of study interns will consolidate the theory of small animal internal medicine (as learnt in V3027 Veterinary Clinical Sciences and V4112 Veterinary Medicine) and apply it to the diagnosis and treatment of disease in small animal patients. Abundant case-material will be provided to enable hands-on application of the problem-orientated approach to veterinary medicine.

In this rotation emphasis will be placed on acquiring excellent skills in history taking and advanced physical examination. Interns will be given ample opportunities to hone their client communication skills and will participate in a variety of interactive tutorials with referral medicine clinicians. Interpretation of diagnostic imaging scans and clinicopathological test results will be an integral part of the rotation. Cases will form the basis of interactive collegiate discussions on identification and assessment of problems and construction of treatment plans on a patient-by-patient basis. Interns will become proficient in professional case-handover procedures through daily presentation of cases at clinical rounds.

As in other UVTHS rotations interns will participate in other hospital activities including collection of samples for diagnostic tests, developing treatment plans, routine health management, disease management, management of patients in hospital, medical record keeping, intensive care duty and weekend duty.

### VETS5347

#### Anaesthesia and Intensive Care (UVTHS) Veterinary Science

**Credit points:** 4 **Teacher/Coordinator:** Dr Sanaa Zaki, Dr Kim Ticehurst **Session:** Semester 1, Semester 2 **Classes:** practicals: 15-day practicum including rostered ICU duty, anaesthesia rounds twice weekly and journal club once weekly tutorials: 5 hrs **Prerequisites:** Veterinary Sciences Years 1-4 **Assessment:** intra-semester: Supervisor Report Form (continuous); communication task (oral); competency based practical skills assessment other: Formative self evaluation task **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This Unit of Study provides student interns with an opportunity to apply the principles and practices of veterinary anaesthesia introduced to them in VETS3027 and VETS4111 in the clinical setting of a large veterinary hospital. This unit of study is designed to give student interns exposure and experience in clinical anaesthesia to help develop a deeper understanding of this discipline and prepare them for veterinary practice. Student interns are involved in the management of a wide variety of cases from the time the patient is admitted for anaesthesia up until the patient has fully recovered. This unit of study aims to foster a culture of shared leadership, team work, professional conduct, compassion and open communication in the work environment. Student interns participate in all activities undertaken by the UVTHS Anaesthesia Unit including (but not restricted to) pre-anaesthetic examination, formulation of anaesthesia and analgesia plans, induction and maintenance of anaesthesia, record keeping, post-operative care (including pain management) and ICU duty. Student interns will learn and practice the many technical skills required to perform general anaesthesia including intravenous catheterisation, endotracheal intubation, collection of blood and urine for diagnostic testing. After completing this unit of study student interns will be able to safely and humanely anaesthetise and recover an ASA health status '1' or '2' small animal patient with a degree of proficiency acceptable for a new graduate (refer to the Faculty of Veterinary Science Graduate Attributes).

#### Small Animal Surgery (UVTHS)

### Veterinary Science

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Prerequisites:** Veterinary Sciences Years 1-4 **Assessment:** other: Ongoing assessment using supervisor report form, and assessment of communications tasks including written medical records and oral presentation in Surgery Rounds. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

The UVTHS rotations are designed to give veterinary interns experience in general practice and exposure to the kinds of clients and cases they will encounter upon graduation. In addition, rotation through the referral services will provide students with the opportunity to manage more complex cases and, be exposed to scenarios where referral to a person or practice with more advanced knowledge, training or equipment is indicated. Students will participate in all UVTHS activities, including (but not restricted to) client communication, history taking, physical examination, collection of samples for basic diagnostic tests, radiography, developing treatment plans, routine health management, disease management, medical, surgical and anaesthetic procedures, management of patients in hospital, medical record keeping, intensive care duty and weekend duty.

### VETS5349

#### Rural Public Practice Veterinary Science

**Credit points:** 5 **Teacher/Coordinator:** Assoc Prof Peter Windsor **Session:** Semester 1, Semester 2 **Classes:** practicals: 24 day practicum **Prerequisites:** Veterinary Sciences Years 1-4 **Assessment:** intrasemester: 1 x written report (max. 2,000 words); 1 x reflective journal (max. 500 words); 1 x communication task; 1 x Supervisor Report Form **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Departmental permission required*

**Associated degrees:** B V Sc.

This unit of study involves a 24-day rotation with a public agency or company involved in servicing the rural industries and supporting the food and fire sector. In Australia, the majority of placements are with the NSW Rural Lands Protection Board (RLPB), NSW or other state government Department of Primary Industry (DPI), Australian Department of Agriculture, Fisheries and Forestry (DAFF), CSIRO or other Faculty approved livestock health and production agency servicing the rural livestock industries. This includes research and diagnostic laboratories and pre-approved overseas locations are encouraged, particularly for overseas students in their home state or country. The rotation offers practical opportunities to build on and apply knowledge of livestock production industries acquired in semester 8, particularly in herd management and health, legislation and quarantine, food production and hygiene, disease control and prevention, animal welfare and relevant basic and clinical science disciplines.

Students will be under the supervision of District Veterinarians, Veterinary Officers or their equivalent and as veterinary interns, can be involved in ongoing projects, including implementation of regional animal health plans, applied research activities or veterinary surveillance, extension and regulatory programs.

Interns are expected to fully participate in agreed activities whilst attending this placement, typically taking on the role and schedule of a full time supervised associate. The requirements for this rotation include the completion of the following documents: an Introductory Letter to the placement at least four weeks prior to the rotation; a Site Contract; Learning Agreement Form; Skills Report Form; and Rotation Feedback Form. During the rotation interns are expected to participate in three meetings with the extramural supervisor, complete a communication task under the supervision of the associate veterinarian, contribute a reflective journal and comments to the VETS5335 website, and compile a 'journal standard' written report on

an applied research or extension project or disease investigation conducted during the rotation and of relevance to the placement.

#### Elective Rotation 1 Veterinary Science

**Credit points:** 5 **Teacher/Coordinator:** Dr John Baguley **Session:** Semester 1, Semester 2 **Classes:** practicals: 18-day practicum **Prerequisites:** Veterinary Sciences Years 1-4 **Assessment:** intra-semester: Supervisor Report (S/U); Written assignment (S/U); Communication Task (S/U) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This Unit of Study involves placement at a Faculty approved location linked to the veterinary student intern's career interest area. Suitability of locations will be negotiated between the veterinary intern and elective rotation coordinator. In addition to the more traditional elective rotations e.g., small animal practice, equine practice, rural mixed practice and wildlife experience, veterinary interns may wish to undertake novel forms of elective rotation. Examples may include production of educational or scientific resources for use by the profession or animal owners, and promotion of new ideas to the public. Interns will be under the supervision of an extramural supervisor who will liaise with Faculty, review the aims of the rotation with the intern, and assess the performance of the intern via a standard report form. Interns are expected to fully participate in agreed activities whilst attending the placement, typically taking on the role and schedule of a full time, supervised veterinary associate. The requirements of this rotation include the completion of the following documents: and introductory letter to the placement at least four weeks prior to the rotation; a site contract; learning agreement form; skills report form; and rotation feedback form. During the rotation interns are expected to participate in three meetings with the extramural supervisor and complete a communication task.

### VETS5355

#### Honours Elective Veterinary Science

**Credit points:** 10 **Teacher/Coordinator:** Dr John Baguley **Session:** Semester 1, Semester 2 **Classes:** Practical: 36 day practicum **Prerequisites:** Veterinary Sciences Years 1-4 VETS5331 Preparation for Veterinary Practice. WAM => 70 **Corequisites:** Permission from Faculty to Enrol. **Assessment:** Supervisor Report (S/U) and Communication Task Intra-semester: (S/U) for each placement. Research Supervisor Report (S/U); Oral defence (S/U); and Dissertation (5,000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B V Sc.

This unit of study provides veterinary student interns who have attained a suitable WAM based upon academic achievements in years 1-4 with the opportunity to develop greater proficiency in research within a veterinary related discipline of their choice. Eligible students may enrol in the honours unit of study instead of the two standard elective rotations offered in final year.

### VETS5356

#### Rural Mixed Practice Intramural Veterinary Science

**Credit points:** 10 **Teacher/Coordinator:** Dr Tony D. Mogg **Session:** Semester 1, Semester 2 **Classes:** 54-day practicum **Prerequisites:** Veterinary Science Years 1 - 4 completed **Prohibitions:** VETS4336 **Assessment:** Intra-semester: Supervisor Report Forms; Written Reports; Oral Communication Tasks; Unit of Study Examinations **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This unit of study provides students with an opportunity to practically apply the knowledge and skills they have developed during years 1 to 4 in a university rural mixed practice. Through participation in professional activities students are expected to develop their communication skills with the public, staff and colleagues. Student interns must achieve a satisfactory grade in all six services (anaesthesia, equine, livestock, small animals, pathology and dermatology) to fulfil the requirements of this unit of study (including passing all unit of study examinations).

*Textbooks*

A course handbook will be available for students. It contains details of clinical rotations, learning objectives, reference lists, assessment, staffing as well as other relevant class material.

### VETS5357

#### Rural Mixed Practice Extramural Veterinary Science

**Credit points:** 3 **Teacher/Coordinator:** Assoc Prof John House **Session:** Semester 1, Semester 2 **Classes:** 18-day Practicum **Prerequisites:** Veterinary Science Years 1 - 4 completed. **Prohibitions:** VETS5337 **Assessment:** Intra-semester: Assignment/s: Supervisor Report (S/U); Case Log (S/U); Communication Task (S/U) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

This unit of study provides students with an opportunity to practically apply the knowledge and skills they have developed during years 1 to 4. In particular, they will gain experience in livestock and equine practice. Through participation in professional activities students are expected to develop their communication skills with the rural community, staff and colleagues, and gain an insight into the career opportunities of a Rural Mixed Practice. Student interns are expected to fully participate in agreed activities whilst attending the practice, typically taking on the role and schedule of a full time supervised associate.

## VETS5359

### Small Animal Practice Extramural Veterinary Science

**Credit points:** 3 **Teacher/Coordinator:** Dr John Baguley / Dr Christine Hawke **Session:** Semester 1, Semester 2 **Classes:** practicals: 18-day practicum **Prerequisites:** Veterinary Science Years 1 - 4 **Prohibitions:** VETS5335 **Assessment:** intra-semester: Assignments; Supervisor Report (S/U); Case Log (S/U); Communication Task (S/U) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V Sc.

The small animal practice extramural rotation builds on skills, knowledge and attitudes, developed throughout the entire course and is designed to enable veterinary student interns to gain a holistic understanding and experience of small animal practice prior to graduation. Veterinary student interns are placed at a Faculty of Veterinary Science approved small animal practice of their choice for a one month rotation. During this time interns are expected to negotiate workplace tasks with their extramural supervisor that enable the achievement of learning outcomes linked to the development of graduate attributes. Interns are expected to fully participate in agreed activities whilst attending the practice, typically taking on the role and schedule of a full time, supervised veterinary associate. The requirements of this rotation include the completion of the following documents: an introductory letter to the placement at least four weeks prior to the rotation; a site contract; learning agreement form; skills report form; and rotation feedback form. During the rotation interns are expected to participate in three meetings with the extramural supervisor and complete a communication task.

## VIRO3001

### Virology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Tim Newsome **Session:** Semester 1 **Classes:** Two 1 hour lectures per week, five 2 hour tutorials and six 4 hour practicals per semester. **Prerequisites:** At least 6 credit points of MBLG units

and at least 6 credit points in Intermediate MICR or BCHM or BIOL or IMMU or PCOL or PHSI or PLNT units. For BMedSc students: 42 credit points of Intermediate BMED units including BMED2802. For BScAgr students: PLNT (2001 or 2901) and MICR2024. **Prohibitions:** VIRO3901 **Assumed knowledge:** MICR (2021 or 2921 or 2022 or 2922) **Assessment:** One 2 hour exam, practical work, group presentations **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students are very strongly advised to complete VIRO (3001 or 3901) before enrolling in VIRO3002 Medical and Applied Virology in Session 2.*

**Associated degrees:** B Hort Sc, B L W Sc, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biotechnology), B Sc (Nutrition), B Sc Agr, UG Study Abroad Program.

Viruses are some of the simplest biological machinery known, being completely dependent on hosts for their replication, yet they are also the etiological agents for some of the most important diseases in humans. New technologies that have revolutionised the discovery of new viruses are also revealing a hitherto unappreciated abundance and diversity in the ecosphere, and a wider role in human health and disease. Developing gene technologies have enabled the use of viruses as therapeutic agents, in novel vaccine approaches, gene delivery and in the treatment of cancer. This unit of study is designed to introduce students who have a basic understanding of molecular biology to the rapidly evolving field of virology. Viral infection in plant and animal cells and bacteria is covered by an examination of virus structure, genomes, gene expression and replication. Building upon these foundations, this unit then progresses to examine host-virus interactions, pathogenesis, cell injury, the immune response and the prevention and control of infection. The structure and replication of sub-viral agents: viroids and prions, and their role in disease are also covered. The practical component provides hands-on experience in current diagnostic and research techniques such as molecular biology, cell culture, ELISA and immunoblot and is designed to enhance the students' practical skills and complement the lecture series. Tutorials and case studies cover a range of topical issues and provide a forum for students to develop their communication skills.

Will be advised

## VIRO3002

### Medical and Applied Virology Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Belinda Herring **Session:** Semester 2 **Classes:** One 2 hour lecture per week; one 2 hour tutorial and one 4 hour practical per fortnight. **Prerequisites:** 6 CP MBLG units and at least 6 CP from Intermediate MICR or BCHM or BIOL or IMMU or PCOL or PHSI units. For BMedSc Students: 42 credit points of Intermediate BMED units including BMED2807. **Assumed knowledge:** Intermediate microbiology, immunology, molecular biology and genetics. **Assessment:** Formal examination, progressive assessment, presentation, 2000 word essay, practical assignment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students are very strongly recommended to complete VIRO(3001 or 3901) before enrolling in VIRO3002 Medical and Applied Virology in Semester 2.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study explores the way viruses invade cells, infect individual patients and spread in the community. Host/Virus interactions will also be described with a focus on the viral mechanisms that have evolved to combat and/or evade host defence systems. These features will be used to explain the symptoms, spread and control of particular human diseases ranging from the common cold to HIV. The unit will be taught by the Infectious Diseases and Immunology Unit of the Department of Medicine with the involvement of associated clinical and research experts who will contribute lectures on their own special interests and with contributions from the discipline of Microbiology. In the practical classes students will have the opportunity to develop their skills in performing and interpreting the methods currently used in diagnostic and research virology. In the tutorials emerging problems as diverse as SARS and liver cancer will be analysed in the light of the concepts and knowledge being studied in the course.

### Vocal Performance Class 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Barry Ryan **Session:** Semester 1, Semester 2 **Classes:** 2hr tutorial/wk **Assessment:** 3 performances per semester; class attendance and discussion. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific performance classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Classes in this series of units take the form of workshops to develop performance skills and awareness. Posture, breathing, presentation, body language and interpretative elements are given attention. For more information, contact the Chair of Unit.

## VSAO1018

### Vocal Performance Class 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Barry Ryan **Session:** Semester 1, Semester 2 **Classes:** 2hr tutorial/wk **Prerequisites:** VSAO1017 Vocal Performance Class 1 **Assessment:** 3 performances per semester; class attendance and discussion. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students enrolled in Principal Study (Advanced) units may not concurrently enrol in unit specific performance classes.*

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Classes in this series of units take the form of workshops to develop performance skills and awareness. Posture, breathing, presentation, body language and interpretative elements are given attention. For more information, contact the Chair of Unit.

## VSAO1044

### Opera French 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** N. Dorigo (Vocal Studies and Opera) **Session:** Semester 1 **Classes:** 2hr workshop/wk **Prerequisites:** VSAO1043 Opera French 1 **Assessment:** Continuing assessment (20%), written and oral examination (40%), recital (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** Dip Op, UG Study Abroad Program.

The aim of this series of units is to concentrate on the language specific to the needs of singers. Opera French 2 presents the basic principles of French lyric diction, with an introduction to using International Phonetic Alphabet (IPA) and its application to the performance of classical operatic repertoire and melody. Knowledge and skills are cumulative, and material taught is determined by the needs of individual students and the requirements of current French vocal repertoire. For further information, contact Nicole Dorigo (Vocal Studies and Opera).

## VSAO1047

### Opera Ensemble 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 2hr workshop/wk **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op, Dip Op, UG Study Abroad Program.

The development of ensemble skills is an essential part of an opera student's study. The aim of this series of units is for the singer to learn how to follow a conductor, to listen to others, to learn roles quickly and to be able to sing in various styles. For more information, contact the Chair of Unit.

## VSAO1048

### Opera Ensemble 2

## Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 2hr workshop/wk **Prerequisites:** VSAO1047 Opera Ensemble 1 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op, Dip Op, UG Study Abroad Program.

The development of ensemble skills is an essential part of an opera student's study. The aim of this series of units is for the singer to learn how to follow a conductor, to listen to others, to learn roles quickly and to be able to sing in various styles. For more information, contact the Chair of Unit.

## VSAO1611

### Voice 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 14 one-hour individual lessons a semester plus performance workshop **Corequisites:** VSAO1008 Italian Diction for Singers 1 or VSAO1009 German Diction for Singers 1 **Assessment:** Teacher grade 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

Development of appropriate repertoire, technical skills, musical expression, performance workshop and presentation. For more information contact the Chair of Unit.

## VSAO1621

### Opera Diction 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Nicole Dorigo **Session:** Semester 1, Semester 2 **Classes:** 6 hours/week **Assessment:** Students are required to pass all assessment tasks: Continuous assessment 20%; examination 50%; recital 30%. Students will perform a recitative and aria demonstrating the ability to understand the literary text with an emphasis on an accurate and fluent pronunciation of the specific language. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op.

The aim of this series of units of study is to concentrate on the language specific to the needs of singers in standard classical operatic repertoire. The rules of pronunciation and diction, including the IPA, and basic grammar such as syntax as aids to comprehension, translation, poetic appreciation and exploration of the word-music relationship will be covered. Throughout the course, knowledge and skills are cumulative, and material taught is determined by the needs of individual students and the requirements of current vocal repertoire, both solo and ensemble. For more information contact Nicole Dorigo (Vocal Studies and Opera).

## VSAO1622

### Opera Diction 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Nicole Dorigo **Session:** Semester 1, Semester 2 **Classes:** 6 hours/week **Prerequisites:** VSAO1621 Opera Diction 1 **Assessment:** Students are required to pass all assessment tasks: Continuous

assessment 20%; examination 50%; recital 30%. Students will perform a recitative and aria demonstrating the ability to understand the literary text with an emphasis on an accurate and fluent pronunciation of the specific language. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op.

The objective is to demonstrate their ability to assimilate all knowledge accumulated throughout the course, and to understand the literary text with an emphasis on pronunciation and interpretation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op.

The aim of this series of units of study is to concentrate on the language specific to the needs of singers in standard classical operatic repertoire. The rules of pronunciation and diction, including the IPA, and basic grammar as syntax as aids to comprehension, translation, poetic appreciation and exploration of the word-music relationship will be covered. Throughout the course, knowledge and skills are cumulative, and material taught is determined by the needs of individual students and the requirements of current vocal repertoire, both solo and ensemble. For further information contact Nicole Dorigo, (Vocal Studies and Opera).

### VSAO2633

#### Movement and Production 3

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 7 hours of classes per week (in production, acting, dance, movement & stagecraft) **Prerequisites:** VSAO1632 Movement & Production 2 **Assessment:** Progressive assessment based on class/workshop activities and performance (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op.

This unit introduces students to the processes involved in bringing a scene to dramatic life, through practical workshops, seminars, demonstrations and visits to performances and rehearsals. As these subjects are production based units, students must understand that

as performances/ special programmes approach, additional hours may be involved. For further information contact the Chair (Vocal Studies and Opera).

#### **VSAO2713**

##### **Voice 3 (Advanced)**

##### **Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** One-hour unit-specific performance class/week and/or unit-based concerts. **Prerequisites:** VSAO1612 Voice 2 **Corequisites:** VSAO2613 Voice 3 **Assessment:** Practice journal, performance journal including proposal for presentations, performances and/or other participation in unit; 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is open only to DipMus students.*

**Associated degrees:** Dip Mus.

Advanced Units of Study develop skills in analytical thinking and confidence in performance. Through maintaining practice journals of their own work and that of their peers, students gain insight into performance practice.

#### **VSAO2714**

##### **Voice 4 (Advanced)**

##### **Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** One-hour specific performance class/week and/or unit-based concerts **Prerequisites:** VSAO2713 Voice 3 (Adv) **Corequisites:** VSAO2614 Voice 4 **Assessment:** Practice journal, performance journal; presentations, performance participation in unit classes as required; 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is open only to Dip.Mus students.*

**Associated degrees:** Dip Mus.

Advanced Units of Study develop skills in analytical thinking and confidence in performance. Through maintaining practice journals of their own work and that of their peers, students gain insight into their own performance

#### **VSAO3001**

##### **Production 3**

##### **Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 36hrs/sem maximum **Prerequisites:** VSAO2010 Production 2 **Assessment:** Progressive assessment based on class/workshop activities, and in operatic productions (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** Dip Op, UG Study Abroad Program.

Classes consist of acting and dance classes, workshops, rehearsals and masterclasses. As this is a production based unit, students must understand that as performances/special programs approach additional hours may be involved. The experience students have gained enables them to continue their development and consolidate their

competencies. Students are also introduced to rehearsal methods, rehearsal structure and opera production history. For further information contact the Chair (Vocal Studies & Opera).

#### **VSAO3006**

##### **Movement and Stagecraft 5**

##### **Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 2hrs/wk **Prerequisites:** VSAO2009 Movement and Stagecraft 4 **Corequisites:** VSAO3018 Voice 5 (Major), VSAO3017 Voice 5 (Minor) or VSAO3010 Opera Voice 5 **Assessment:** Progressive assessment based on class/workshop activities (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Mus Studies, Dip Op, UG Study Abroad Program.

This series of units develops techniques of stage presence, gesture, characterisation and voice/body harmony. The basic principles of movement are studied: strength, flexibility and stamina are increased and a wide vocabulary of movement is developed. The body and mind are trained to memorise movement phrases and patterns. For more information, contact the Chair of Unit.

#### **VSAO3007**

##### **Movement and Stagecraft 6**

##### **Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 2hrs/wk **Prerequisites:** VSAO3006 Movement and Stagecraft 5 **Corequisites:** VSAO3019 Voice 6 (Major), VSAO3020 Voice 6 (Minor) or VSAO3011 Opera Voice 6 **Assessment:** Progressive assessment based on class/workshop activities (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Mus Studies, Dip Op, UG Study Abroad Program.

##### **Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 36hrs/semester maximum **Prerequisites:** VSAO3001 Production 3 **Assessment:** Progressive assessment based on class/workshop activities (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** Dip Op, UG Study Abroad Program.

Classes consist of acting and dance classes, workshops, rehearsals, and masterclasses. As this is a production based unit, students must understand that as performances/special programs approach additional hours may be involved. Students continue to work in character and role building, acting and performance styles with more challenging and complex tasks. For further information contact the Chair (Opera Studies).

#### **VSAO3010**

##### **Opera Voice 5**

##### **Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 1hr individual lesson and two concert practices/wk. **Prerequisites:** VSAO2013 Opera Voice 4 **Assessment:** Teacher grade 100%. Two Performance Workshop performances. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** Adv Dip Op, Dip Op, UG Study Abroad Program.

The aim of this series of units is to develop the voice as an operatic instrument through work on style, phrasing, diction, enunciation, and interpretation. For further information, contact the Chair (Vocal Studies and Opera).

### VSAO3011

#### Opera Voice 6

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 1hr individual lesson and two concert practices/wk. **Prerequisites:** VSAO3010 Opera Voice 5 **Assessment:** 20-25 minute recital with substantial operatic content. Two performance Workshop performances. Panel-Unit members 80%, Teacher grade 20%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op, Dip Op, UG Study Abroad Program.

The aim of this series of units is to develop the voice as an operatic instrument through work on style, phrasing, diction, enunciation, and interpretation. For further information, contact the Chair (Vocal Studies and Opera).

### VSAO3012

#### Opera Repertoire 4

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Sharon Kimmorley **Session:** Semester 1, Semester 2 **Classes:** 1hr coaching/wk, plus ensemble workshops and rehearsals **Prerequisites:** VSAO2015 Opera Repertoire 3 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op, Dip Op, UG Study Abroad Program.

This series of units covers the study of operatic repertoire. Aspects of musical detail, phrasing and language and interpretation will be developed and expanded. Appropriate characterisation will also be introduced and encouraged. For more information contact the Chair of Unit.

### VSAO3014

#### Pedagogy Voice 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Rowena Cowley **Session:** Semester 1 **Classes:** 1 hr/wk **Assessment:** Oral work (40%), written work (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This course aims to promote awareness of the main elements of the pedagogy of voice. It provides a basis for learning about the physiology and acoustics of the singing voice, approaches to posture, breathing, and phonation (onset, range and tessitura, dynamic controls, vibrato, register/voice quality and articulation). Learning strategies, stages of vocal development, bases for vocal health and the process of performance preparation are discussed. Assessment includes micro-teaching modules, readings, round table discussions, comparative reports and written tests.

### VSAO3015

#### Pedagogy Voice 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Rowena Cowley **Session:** Semester 2 **Classes:** 2hrs/wk **Prerequisites:** VSAO3014 Pedagogy Voice 1 **Assessment:** Oral work (40%), written work (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This course aims to promote awareness of the main elements of the pedagogy of voice and the variety of approaches to each of the major arias of learning about singing. It encourages students to explore approaches to singing based on awareness of the processes of learning and the physiology and acoustics of the singing voice. In the

second semester, the course covers voice quality, resonance, articulation, vocal health and development, repertoire sources and bases for choice, performance practice with reference to voice use, and performance preparation. Assessment includes micro-teaching modules, readings, round table discussions, comparative reports and written tests.

### VSAO3017

#### Voice 5 (Minor)

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 1hr lesson or equivalent and performance workshop/wk **Prerequisites:** VSAO2016 Voice 4 (Minor) **Assessment:** Teacher Grade 100%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students are strongly recommended to enrol concurrently in VSAO3645 Diction for Performance 1.*

**Associated degrees:** B Mus (Mus Ed), B Mus Studies, UG Study Abroad Program.

Development of appropriate repertoire, technical skills, musical expression, concert practice and presentation. For more information contact the Chair of Unit.

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Classes in this series of units take the form of workshops to develop performance skills and awareness. Posture, breathing, presentation, body language and interpretative elements are given attention. For more information, contact the Chair of Unit.

## VSAO3041

### Opera Italian 5

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Nicole Dorigo **Session:** Semester 1 **Classes:** 2 hr workshop/wk **Prerequisites:** VSAO2042 Opera Italian 4 or VSAO2007 Italian for Singers 4 **Assessment:** Continuing assessment (10%), written and oral examination (30%), recital (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Dip Op, UG Study Abroad Program.

Bringing together units previously undertaken in Opera Italian 1 - 4, this course concentrates on the language specific to the needs of singers and includes the art of recitative. Students continue their focus on Italian lyric grammar, as aids to comprehension, translation, poetic appreciation and exploration of the word-music relationship. As with previous units, knowledge and skills are cumulative, and material taught is determined by the needs of individual students and the requirements of current vocal repertoire. Individual and small group Italian language coachings remain a feature of this unit. For further information, contact Nicole Dorigo (Vocal Studies and Opera).

## VSAO3042

### Opera Italian 6

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Nicole Dorigo **Session:** Semester 2 **Classes:** 2hr workshop/wk **Prerequisites:** VSAO3041 Opera Italian 5 or VSAO3004 Italian for Singers 5 **Assessment:** Continuing assessment (10%), written and oral examination (30%), recital (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Dip Op, UG Study Abroad Program.

#### Movement and Production 6

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Maree Ryan **Session:** Semester 1, Semester 2 **Classes:** 7 hours of classes per week (in production, acting, dance, movement & stagecraft). **Prerequisites:** VSAO3635 Movement & Production 5 **Assessment:** Progressive assessment based on class/workshop activities and performance (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Adv Dip Op.

This unit introduces students to the processes involved in bringing a scene to dramatic life through practical workshops, seminars, demonstration and visits to performances and rehearsals. As these subjects are performance based units, students must understand that as performance/special programmes approach, additional hours may be involved. For additional information contact the Chair (Vocal Studies and Opera).

### VSAO3645

#### Diction for Performance 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Nicole Dorigo **Session:** Semester 1, Semester 2 **Classes:** 2 hours/week **Prerequisites:** VSAO2028 Italian Diction for Singers 2 and VSAO2029 German Diction for Singers 2 **Assessment:** Students are required to pass all assessment tasks. Continuous assessment (20%), examination (30%), recital (50%). At the end of semester, students will perform to demonstrate their ability to assimilate all knowledge accumulated through the course, to understand the literary text with emphasis on pronunciation and interpretation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S.

The aim of this series of units is to concentrate on the specialist language needs of singers, including the IPA, and with the objective of students achieving a professional command of diction in French, German and Italian. The focus in these units is producing performance in song repertoire that results from the appreciation of the text-music relationship. Throughout the course, knowledge and skills are cumulative, and material taught is determined by the needs of individual students and the requirements of classical vocal repertoire, both solo and ensemble. For further information, contact Nicole Dorigo (Vocal Studies and Opera).

### VSAO3646

#### Diction for Performance 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Nicole Dorigo **Session:** Semester 1, Semester 2 **Classes:** 2 hours/week **Prerequisites:** VSAO3645 Diction for Performance 1 **Assessment:** Students are required to pass all assessment tasks. Continuous assessment (20%), examination (30%), recital (50%). At the end of semester, students will perform. The objective is to demonstrate their ability to assimilate all knowledge accumulated throughout the semester, and

to understand the literary text with an emphasis on pronunciation and interpretation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S.

Development of appropriate repertoire, technical skills, musical expression, concert practice and presentation. For more information contact the Chair of Unit.

## WIND2016

### Saxophone Orchestra 3

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alexa Still **Session:** Semester 1, Semester 2 **Classes:** 2hr rehearsal/wk **Prerequisites:** WIND1017 Saxophone Orchestra 2 **Assessment:** A final grade will be compiled from continual

assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This Unit will help to develop ensemble skills that are essential for saxophonists playing in any conducted ensemble. The aim of this series of units is that the saxophonist will learn how to follow a conductor, listen to others, learn how to blend with other saxophonists and be able to play in a variety of styles. For information, contact the Chair of Woodwind.

## WIND2017

### Saxophone Orchestra 4

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alexa Still **Session:** Semester 1, Semester 2 **Classes:** 2 hr rehearsal/wk **Prerequisites:** WIND2016 Saxophone Orchestra 3 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

#### WORK1003

##### Foundations of Work and Employment

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2 lectures and 1 seminar per week **Assessment:** Participation, short essay, major essay, exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This is the compulsory unit of study for the Industrial Relations/Human Resource Management major.*

**Associated degrees:** B A, B Agr Ec, B Com, B E, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit draws on concepts from industrial relations and human resource management to examine the interests and strategies of workers, unions, managers, employers and the state. It explores the relationships between these parties as they seek to manage their environments and workplaces and to exercise control over each other. The unit enables students to understand how and why the organisation, regulation and management of work are changing in Australia and globally. As well as providing an introduction to all aspects of the study of the employment relationship, this is the foundation unit for a major in industrial relations and human resource management.

#### WORK1551

##### Industrial Relations & HRM Exchange

##### Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S.

#### WORK2201

##### Foundations of Management

##### Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 24 credit points of junior units of study **Prohibitions:** IREL2001, WORK2001 **Assessment:** Assignment, essay and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This is the compulsory unit of study for the Management major.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit serves both as a stand-alone unit for students who wish to obtain an overview of management methods and approaches and as the basis of study for advanced and specialised undergraduate units listed in the Management major. It examines management as a process of planning, organising, leading and controlling the efforts of

organisational members and discusses how recent trends such as globalisation, economic change and the effects of new technology have led to profound changes in how organisations are managed. It explores these issues with respect to both large and small, public and private, and domestic and foreign organisations.

### **WORK2203** **Industrial Relations Policy** **Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hrs of lectures and 1 seminar per week **Prerequisites:** 24 credit points of junior units of study including (WORK1003 or WORK1001 or IREL1001) **Prohibitions:** IREL2003, WORK2003 **Assessment:** Tutorial presentation, essay, participation, journal or exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This is the compulsory unit of study for the Industrial Relations/Human Resource Management major.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit introduces the institutions and processes of Australian industrial relations with an emphasis on laws, institutions and social processes. It combines theoretical and historical understandings of Australian industrial relations with a detailed examination of the current problems and strategies of the key industrial relations players. The topics studied include: the regulatory framework of industrial relations; policies of federal and state governments; the history and policies of unions and employer associations; the practices of Australia's arbitral tribunals; the development of wage determination; and emerging patterns of dispute resolution and bargaining.

### **WORK2204** **Sociology of Work** **Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hrs of lectures and 1 seminar per week **Prerequisites:** 48 credit points **Prohibitions:** IREL2004; WORK2004 **Assessment:** Assignment, essay and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit begins with a brief introduction to sociology as a field of study and to the organising principles of Australian and other societies in a global context. The focus of the unit is on patterns of change and stability in the structure of work and how work is experienced, with an emphasis on the organisational and occupational foundations of working life. Bureaucratic and flexible forms of work organisation are considered, as well as the sociological characteristics of a range of occupational groups. Macro-sociological issues such as the relationship between work and other institutions such as the family and education are considered, as well as the micro-sociological foundations of relations at work.

### **WORK2205** **Human Resource Processes** **Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 Lectures and 1 seminar per week **Prerequisites:** 24 credit points of junior units of study including WORK1003 (or WORK1002 or IREL1002) **Prohibitions:** IREL2005, WORK2005 **Assessment:** Continuous: case study practical, essay and/or exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This is the compulsory unit of study for the Industrial Relations/Human Resource Management major.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

Building on the foundational coverage of Human Resource Management (HRM) issues and concepts provided in WORK1003, this unit provides an advanced understanding of key HRM concepts, processes and practices, including the employee psychological contract; engagement, motivation and satisfaction; recruitment and selection; learning and development; career planning and development; mentoring and coaching, performance management;

reward management; high involvement management, employee wellbeing; HRM and ethics; international HRM; and HRM system evaluation and change. The unit's 'micro'/psychological focus is designed to complement and support the 'macro'/strategic focus taken in the advanced elective unit WORK2211 Human Resource Strategies.

### **WORK2207** **Labour Law** **Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lectures and seminar **Prerequisites:** 40 credit points including WORK1003 (or WORK1001 or IREL1001) **Prohibitions:** IREL2007; WORK2007 **Assessment:** Continuous: Essays, case studies and/or exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit examines the legal framework with respect to labour relations in Australia. In particular it examines the scope of industrial law, the employment relationship, the Federal-State division of legislative power in industrial relations and the industrial arbitration systems, courts tribunals and awards. Current developments in the law and politics of the systems will be referred to throughout the course.

### **WORK2209** **Organisational Analysis and Behaviour** **Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 40 credit points worth of units of study **Prohibitions:** IREL2009, WORK2009 **Assessment:** Participation, essay and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

The aim of this unit is to provide an understanding of the actual processes and structures that influence the way people behave in organisations. It examines different approaches beginning with the individual (micro) level through to the organisational (macro) level. It takes students through a range of topics including attitudes, perceptions, organisational citizenship, workaholism, humour at work, rumour/gossip, romance/sex in organisations, bullying and violence, group dynamics, organisational power and politics and organisational culture. At the end of the unit students have developed the ability to reason, debate and critically examine a range of topical organisational issues.

### **WORK2210** **Strategic Management** **Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 40 credit points worth of units of study **Prohibitions:** IREL2010, WORK2010 **Assessment:** Test, tutorial presentation, case study, exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

The aim of this unit is to critically examine the concept of strategy in the management of organisations. It examines different approaches to strategy and strategic management and traces the development of strategic management as an academic discipline. It takes students through the classical strategic management process as it is presented in most textbooks and it also introduces students to a range of current debates in strategic management. This unit can be taken as a stand alone introduction to strategy or as part of a broader program of study in management.

### **WORK2211** **Human Resource Strategies** **Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 40 credit points of units of study including WORK1003 (or WORK1002 or IREL1002) **Prohibitions:** IREL2011, WORK2011

**Assessment:** Tutorial paper, participation, essay and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit examines the links between human resource management and strategic management in different kinds of organisations, both in Australia and overseas. It provides a critical and in-depth analysis of the human resource management theories, paying particular attention to the concepts of strategy, people management and organisational performance. The unit considers contemporary and controversial issues in human resource management, which may include downsizing, outsourcing, knowledge management, governance and social responsibility.

## WORK2215

### IR and HRM Practice Economics and Business

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Intensive mode during mid year break and in semester 2 **Prerequisites:** WORK1003 or (WORK1001 and WORK1002) plus 12 senior credit points in WOS units of study **Prohibitions:** IREL2015, WORK2015 **Assessment:** Role play, essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Entry to the unit is by application to the Discipline of Work and Organisational Studies Office and is on a merit basis. The application can be downloaded from <http://www.econ.usyd.edu.au/work2215/>*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit is intended to go some way towards bridging the gap between theory and professional life. The unit examines the theoretical basis of labour negotiation. It goes on to examine the process of bargaining drawing upon both literature and experience of industrial relations and human resource management practitioners. The process of advocacy and role of advocacy in Australian industrial relations is also examined. Much of the unit is devoted to role-play negotiation exercises where students apply the techniques that have been taught. Students also undertake a period of work experience.

## WORK2216

### Voice and Representation Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** (WORK1003) OR (WORK1001 and WORK1002) **Assessment:** Assessment drawn from a menu of case studies, tutorial papers, essays and examinations **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

Focusing mainly on unions in Australia, this unit explores the nature of workers' collective action in and beyond the workplace. It examines debates about the origins and purposes of collective action, the development of union structure and strategy and asks about the future of unionism. Particular issues to be addressed may include: ideology and politics in unions; democracy and the role of the union official; the gendered construction of unionism; 'solidarity' and 'difference' in unions; the economic impact of unions; international and local unionism; and comparisons with overseas forms of worker organisation.

## WORK2217

### International Human Resource Management Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 40 credit points worth of units of study including either (WORK1003 or WORK1001 or IREL1001) OR (IBUS2101 or IBUS2001) **Prohibitions:** WORK2017 **Assessment:** Group presentation, journal and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit considers the opportunities and challenges associated with managing employees in international and cross-cultural contexts, with specific emphasis on international recruitment, selection, preparation, placement, management development, performance management, reward and remuneration in the international, multi-national and trans-national corporation. Within the context of global labour markets, the unit considers the implications of internationalisation and globalisation for human resource management (HRM), the difference between domestic and international HRM, and the challenges of cross-cultural management. This unit will provide students with a theoretical understanding of IHRM and cross-cultural management, as well as a practical understanding of the issues and challenges associated with managing employees in international, global and cross-cultural contexts.

## WORK2218

### People and Organisations Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 24 junior credit points **Assessment:** Assignment, group case study and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

Contemporary organisations are characterised by a high degree of change. One of the most pervasive, and widely debated, changes in organisations has been the growing use of various forms of teamwork. Contemporary forms of teamwork include project based teams, virtual teams, and self managing teams and are found across a broad spectrum of organisational types- from manufacturing to professional service organisations. This unit of study introduces students to theories about the impact of individual, group and organisational factors on people and organisations and uses these concepts and theories to examine the factors that can make working in and managing teams more effective. As such, People and Organisations is designed to provide students majoring in Business insight into a set of critical issues that will impact their professional and business careers. Because of the increasing significance of teamwork, this unit of study also provides an important foundation for further study in Management and Industrial Relations and Human Resource Management.

## WORK2219

### Management and Organisational Ethics Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 40 credit points worth of units of study **Assessment:** Essay, group project and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

Ethical issues are occupying an increasingly prominent place in work, organisation and management studies. This unit of study focuses on ethical aspects of management and organisational practice. By applying relevant ethical frameworks, students will be encouraged to enhance their understanding of the role and responsibilities of management, the impact of organisations on employees and the ethical implications of contemporary trends in employment. This unit builds on foundational units of study in Management, Industrial Relations and Human Resource Management.

## WORK2220

### Managing Knowledge Work Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 48 credit points **Assessment:** Continuous: Essays, case studies and/or exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Agr Ec, B C S T, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec (Soc Sc), B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B I T, B Int S, B Sc, B Com, UG Study Abroad Program.

Knowledge management is designed to increase the ability of firms to exploit knowledge as a resource. However designing and acknowledging strategies to exploit knowledge does little to advance our understanding of the characteristics of knowledge work or the challenges it throws up for management. This subject aims to ground abstract notions of knowledge and knowledge management within an understanding of the different behavioural and organisational contexts of workplaces. The unit analyses the meaning of knowledge and knowledge work and recognizes the importance of knowledge management as a response to wider changes in contemporary advanced economies.

#### WORK2221

##### Organisational Communication Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 lectures and 1 seminar per week **Prerequisites:** 40 credit points worth of units of study **Assessment:** Participation, group project and exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

Communication is integral to many organisational processes; for instance, effective planning, decision-making, negotiation, conflict management, change management and leadership all rely upon effective communication by organisational actors. At the same time, organisational communication has become more complex due to increasing levels of diversity in the workplace and an increasing reliance on emergent and rapidly changing communication technologies. Drawing on communication research models, theories and case studies, the unit will provide students with insight into how to manage the complexities of contemporary organisational communication. The unit will focus primarily on internal organisational communication and will examine communication processes at various levels: interpersonal (dyadic), group and organisation.

#### WORK2222

##### Leadership in Organisations Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** 40 credit points worth of units of study **Assumed knowledge:** WORK2201 or WORK2218 **Assessment:** Leader or Leadership Case Study Profile Assignment; Exam; Seminar Attendance and Participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Com (Liberal Studies), B Ec, UG Study Abroad Program.

Leadership is increasingly seen to be a key factor affecting the performance of contemporary organisations and is an important area of study in the fields of management and organisational behaviour. While leadership principles are often associated with the work of senior management, they also have potential application to all members of organisations. This unit explores conventional and alternative perspectives on leadership and also examines the practice of leadership in diverse organisational contexts. Practitioner perspectives, experiences and case studies of business leaders are also presented. The unit builds on foundational units of study in Management, IR and HRM and International Business.

#### WORK2223

##### Work and Globalisation Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** WORK1003 **Assessment:** Quizzes; Team problem exercises; Written assignment; Final assessment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com, B Com (Liberal Studies), B Ec, UG Study Abroad Program.

In an era of globalisation, the regional and national prospects of welfare and growth are continuously contested. This course offers a comprehensive framework for understanding how work, workers, organisations and management are influenced by (and in turn influence) economic, social, cultural and organisational processes in

an era of global capitalism. Applying three fundamental geographical concepts - place, space and scale - Work and Globalisation analyses the paradoxes and dilemmas which workers and managers face, the changing dynamic of the regulatory and industrial relations environment, and avenues and effects of worker action.

This unit forms part of the Work and Organisational Studies honours program. It introduces students to the roles of theory in science, particularly social sciences and examines the development of different models of theory development in the social sciences. The unit also examines a selection of different theoretical approaches to explaining work and organisations. This is done so by identifying several different issues or themes that have emerged in work and organisational studies and discussing the manner in which these themes have been studied and the consequent explanations that have emerged.

### WORK3922

#### Researching Work and Organisations Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hrs per week **Prerequisites:** (WORK3921 or IREL3901) or (IREL2901 and IREL2902) **Prohibitions:** IREL3902, WORK3902 **Assessment:** Please consult the Discipline of Work and Organisational Studies for details **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Com (Liberal Studies), B E, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit seeks to develop the skills, practices and understandings necessary to undertake a research-based thesis in work and organisational studies. Students gain an understanding of the theoretical basis and design requirements of the main qualitative and quantitative approaches to research, as well as the techniques of questionnaire design, interviewing, observation and documentary analysis. There is an emphasis on the development of methodological expertise relevant to the students anticipated dissertation topic and the preparation of a viable research proposal.

### WORK4101

#### Industrial Relations & HRM Honours A Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** 36 credit points of senior level WORK units of study inclusive of WORK3921 and WORK3922. All WORK units of study must be passed at a credit level or above. Requirements for the Pass degree must be completed before entry to level 4000 honours units of study. **Prohibitions:** IREL4101 **Assessment:** Coursework; Dissertation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

The primary focus is on an original dissertation of approximately 20,000 words to be submitted at the end of Part B. In addition, students must undertake coursework as specified. Candidates must enrol in WORK4102, WORK4103 and WORK4104 to complete the honours year.

### WORK4102

#### Industrial Relations & HRM Honours B Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** WORK4101 **Prohibitions:** IREL4102 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

See WORK4101

### WORK4103

#### Industrial Relations & HRM Honours C

### Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** WORK4102 **Prohibitions:** IREL4103 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

See WORK4101

### WORK4104

#### Industrial Relations & HRM Honours D Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** WORK4103 **Prohibitions:** IREL4104 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

See WORK4101

### WORK9001

#### Industrial Relations & HRM Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S.

### WORK9002

#### Industrial Relations & HRM Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S.

### WORK9003

#### Industrial Relations & HRM Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S.

### WORK9004

#### Industrial Relations & HRM Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S.

### WRIT1001

#### Academic English Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Bill Foley / Dr Susan Thomas **Session:** Semester 1, Semester 2 **Classes:** Two 1hour lectures and one 1hour tutorial per week. **Prerequisites:** Upon registration for this unit students will be directed to an online diagnostic exercise. **Assessment:** 10 x short written assignments of 300 words each and one 1500 word essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Int S, B S T, UG Study Abroad Program.

The persuasive power of the English language emerges from its richness and variation. This unit teaches students to recognize these complexities as resources for the creative construction of meaning. Students will learn to communicate effectively and clearly in oral and written mediums and critically appraise the variable forms of English in regional, gender and cultural groups. In addition to lectures and

tutorials, students will engage with variations in the English language through film, television, technology and music.

**WRIT1002****Academic Writing****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr R Johnke **Session:** Semester 1, Semester 2, Summer Late, Winter Main **Classes:** One 1hour lecture per week (includes some online lectures) and one 1hour tutorial per week. **Prerequisites:** This unit is available to all enrolled students and across all faculties. There are no specific prerequisites but students will be required to complete a diagnostic exercise in their first tutorial. Students in this unit are assumed to have native or near native competence in written English. Students who do not have this competence would benefit from completing WRIT1001 before enrolling in WRIT1002 but WRIT1001 is NOT a pre-requisite for WRIT1002. **Assessment:** One 1500 word annotated bibliography and essay outline, one 1500 word essay, one 2hour exam and one 1000 word online discussion and debate postings. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Int S, B S T, UG Study Abroad Program, UG Summer/Winter School.

This unit, taught by the Department of English, introduces students to rhetorical studies and communication theory. It is designed to improve writing at all undergraduate levels in a variety of formats across a range of disciplines. It teaches students to construct persuasive arguments that are logical, ethical and engaging. Students are encouraged to think critically about the production and reception of a variety of texts and to view writing as a process involving research, drafting, revising, editing and collaboration.

# University undergraduate units of study – Y

## YDDH1101

### Yiddish 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Dowling **Session:** Semester 1  
**Classes:** 4 hours per week **Assessment:** 2 hour final exam (60%), written work (homework and quizzes) (20%), continuous assessment, preparation and participation (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit introduces students to Yiddish through a study of its grammar, as well as exercises in conversation and reading. In addition, discussions on the history, linguistics and dialectology of Yiddish will be given in order to prepare students for readings at the senior level.

## YDDH1102

### Yiddish 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Dowling **Session:** Semester 2  
**Classes:** 4 hours per week **Prerequisites:** YDDH1101 or permission from the department **Assessment:** 2 hour final exam (60%), written work (homework and quizzes) (20%), continuous assessment, preparation and participation (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit further develops the study of Yiddish language, building upon the foundations set in YDDH1101. Students continue to learn grammar and vocabulary, through exercises in conversation and reading. As with YDDH1101, discussions on history as well as Yiddish culture and literature will be given in order to prepare students for readings at the senior level.

## YDDH2603

### Yiddish 3

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Dowling **Session:** Semester 1  
**Classes:** 4 hours per week **Prerequisites:** YDDH1102 or permission from the department **Prohibitions:** YDDH2103, YDDH2104 **Assessment:** 2 hour exam (equivalent to 2000 words, 50%), written work (homework and quizzes) (equivalent to 1500 words, 30%), continuous assessment, participation and preparation (equivalent to 1000 words, 20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will continue to develop the language foundations built in Yiddish 1 and 2. The unit will focus upon conversation and composition, and includes the reading of selected texts from modern Yiddish literature, as well as an introduction to various media sources. The unit consists of: practical language skills including conversation, composition and comprehension exercises (3 hours per week) and readings from modern literature (1 hour per week).

Recommended:  
 Weinreich, Uriel, Modern English-Yiddish/Yiddish-English Dictionary. NY:Schocken

## YDDH2604

### Yiddish 4

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Dowling **Session:** Semester 2  
**Classes:** 4 hours per week **Prerequisites:** YDDH2103 or YDDH2603 **Prohibitions:** YDDH2104 **Assessment:** 2 hour exam (equivalent to 2000 words, 50%), written work (homework and quizzes) (equivalent to 1500 words, 30%), continuous assessment, participation and preparation (equivalent to 1000 words, 20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit continues the program outlined in Yiddish 3: conversation, composition, readings from Yiddish literature, as well as discussion of material gleaned from various media sources. As with other senior Yiddish units, Yiddish 4 consists of practical language skills (3 hours per week) and readings from modern literature (1 hour per week).

 Weinreich, Uriel, Modern English-Yiddish/Yiddish-English Dictionary. NY:Schocken

## YDDH3605

### Yiddish 5

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Dowling **Session:** Semester 1  
**Classes:** 4 hours per week **Prerequisites:** YDDH2104 or YDDH2604 **Prohibitions:** YDDH3105, YDDH3106 **Assessment:** 2 hour exam (equivalent to 2000 words, 50%), written work (homework and quizzes) (equivalent to 1500 words, 30%), continuous assessment, participation and preparation (equivalent to 1000 words, 20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is designed to strengthen the language foundations built in Yiddish 3 and 4. The unit will continue to focus upon conversation and composition, and includes a reading of selected texts from Yiddish literature, as well as discussion of topics presented in various media sources; each semester's emphasis will vary. The unit of study consists of: practical language skills including conversation, composition and comprehension exercises (3 hours per week) and readings from modern literature (1 hour per week).

## YDDH3606

### Yiddish 6

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Dowling **Session:** Semester 2  
**Classes:** 4 hours per week **Prerequisites:** YDDH3605 or YDDH3105 **Prohibitions:** YDDH3106 **Assessment:** 2 hour exam (equivalent to 2000 words, 50%), written work (homework and quizzes) (equivalent to 1500 words, 30%) and continuous assessment, participation and preparation (equivalent to 1000 words, 20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit focuses on the developing proficiency of the student. Discussion around current events, historical enquiry and linguistic issues (historical and dialectology) will augment the unit's textual studies. As with other senior Yiddish units, Yiddish 6 consists of: practical language skills including conversation, composition and comprehension (3 hours per week) and readings from modern literature (1 hour per week).
