*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

This unit of study is designed to examine the principles of administration and administrative techniques and procedures appropriate for PDHPE and sport in schools. The unit of study will move from a base of administrative theory to precise issues and skills required for administering programs and projects in both school and community settings.

#### EDUH4058

##### **Sport and Learning in Australian Culture Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr Richard Light **Session:** Semester 1, Semester 2 **Classes:** 2 hours/week for 11 weeks plus field trips **Prerequisites:** 84 credit points of Professional Studies in HMHE **Assessment:** Two analytic field trip reports of 1000 words (40%), one final research essay of 3000 words (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (H M H E), B Ed (Sec)(H M H E), UG Study Abroad Program.

Meaningful educational experiences involve learning that effects a lasting change and involves some degree of personal transformation. As Dewey suggests learning and the realization of our humanity arises, not from any direct teaching but from the learning environment and the stimulation that it generates. This subject is structured around the provision of students' first hand experiences of Australian sport culture ranging from school and community-based sport to commercial, commodified sport played at the highest levels. Lectures and the provision of relevant readings are structured around these experiences to help them interpret, make sense of the subject content in a meaningful and relevant way. The provision of experience of Australian sport culture, its culture-specific meanings and practices informed by a socially critical examination of sport and its impact constitutes a holistic approach to learning about sport in a setting that is culturally distinct from that of backgrounds of most students who will undertake the course. While it will provide understanding of a new cultural context it will also encourage a more socially critical view of sport in their own societies, an understanding of global forces in sport and their impact on local cultures.

#### EDUP1001

##### **Creative Arts 1**

##### **Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr Robyn Gibson **Session:** Semester 2 **Classes:** 1 hour lecture, 2 hour workshops for 13 weeks. **Assessment:** Arts learning experiences assignment & VAPD/Portfolio **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit comprises four Creative Arts components: Visual Arts, Music, Drama and Dance. It combines both theoretical and practical/studio work across a range of art forms appropriate for K - 6 classrooms..

#### EDUP1002

##### **Language, the Learner and the School**

##### **Education and Social Work**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jon Callow **Session:** Semester 1 **Classes:** 36 hours contact time including lectures, tutorials and online learning experiences; 8 days professional experience. **Assessment:** Professional experience; Seminar presentation and discussion activities for weekly readings - 15-20 minutes (20%); Beginning your professional portfolio 1800 - 2000 word (40%); Report : Teaching Literacy and Classroom Practice - 2500 word (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study begins the exploration of children's language learning. The unit provides an introduction to professional experience in the primary classroom through exploring K-3 literacy development and teaching practice. Students will become familiar with the fundamental components of literacy, supported through observation of teachers and children in classrooms and interaction with small groups of children emerging in literacy.

#### EDUP2002

##### **English: Learning to be Literate**

##### **Education and Social Work**

**Credit points:** 4 **Teacher/Coordinator:** Dr Angela Thomas **Session:** Semester 1 **Classes:** 24 hours contact time including lectures, tutorials and online learning experiences. **Prerequisites:** EDUP1002 **Assessment:** Understanding how to choose literature for the classroom 2,000 wd (50%); Using text resources in the literacy session 2,000 wd (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

In this unit you will develop understandings about the teaching of reading, writing, listening and speaking to students in the early years of schooling. A balanced approach to the development of literacy and the teaching of English will be exemplified by a focus on the use of quality children's literature and factual texts relevant to this stage of learning. You will develop understandings about how young children learn and how to assess their learning in the context of an engaging English program.

#### EDUP2004

##### **PDHPE1: Physical Activity**

##### **Education and Social Work**

**Credit points:** 4 **Teacher/Coordinator:** Dr Steve Georgakis **Session:** Semester 1 **Classes:** 3 hours/week for 9 weeks **Prerequisites:** EDUP1002 **Assessment:** Essay 2000 word (50%); Unit outline and lesson plans 2000 word (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study is the first of two units aimed at assisting students to develop their teaching skills in Physical Education. It is focused on the development of Physical Education pedagogy for generalist primary school teachers aimed at making children's experiences of physical activity enjoyable, rewarding and educationally valuable. Students will study the theory and practice of teaching physical activity in primary schools with a focus on student-centred pedagogy and on sport and teaching games in particular. Through reading, active participation in lectures, sport and workshops, students will engage with the latest developments in physical education pedagogy and apply it in practical contexts. This will involve exposure to contemporary theories of learning in and through physical education, management and organisational issues specific to physical education, practical workshops and team teaching in a primary school. Drawing on experiences of lectures and workshops students will work collaboratively in planning for learning, organising, managing and teaching physical education with a clear focus on student learning and achievement.

#### EDUP2005

##### **Mathematics 1: Exploring Early Number**

##### **Education and Social Work**

**Credit points:** 4 **Teacher/Coordinator:** Dr Jennifer Way **Session:** Semester 2 **Classes:** 2 hours/week for 12 weeks **Prerequisites:** EDUP1002 **Assessment:** Assessing and analysing a child's level of thinking using the Schedule for Early Number Assessment (SENA) and the Learning Framework in Number (LFIN) (80%); designing follow-up teaching activities based on the results of the assessment (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This is the first unit of study in Mathematics and students will be introduced to key issues associated with how children acquire early mathematical concepts, processes and knowledge. The Learning Framework in Number will be a major focus of content for this unit of study. As part of this study students will be required to assess a child from the K-2 grades using an interview schedule and to use the results to plan activities that demonstrate knowledge of worthwhile mathematical tasks.

#### EDUP2006

##### **Indigenous Australian Education**

##### **Education and Social Work**

**Credit points:** 4 **Teacher/Coordinator:** Ms Sharon Galleguillos **Session:** Semester 1 **Classes:** 2 hours/week for 10 weeks **Prerequisites:** EDUP1002

**Assessment:** My Community - presentation and report (30%); Reconciliation in our Primary Schools - 1,000 words (30%); essay - 1,500 words (40%).  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Within New South Wales public schools it is mandatory to implement the Department of Education and Training (DET) Aboriginal Education Policy (1996) and ensure Aboriginal perspectives are provided in all key-learning areas*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

N.B. Within New South Wales public schools it is mandatory to implement the Department of Education and Training (DET) Aboriginal Education Policy (1996) and ensure Aboriginal perspectives are provided in all key-learning areas. This Indigenous Australian Education unit of study focuses on contemporary issues in Indigenous Education. Students will also develop an understanding of the historical backgrounds of Indigenous Australians and how these experiences impacted upon their schooling. Students will increase their current levels of knowledge in relation to some of the broader social topics that are relevant to Indigenous Australians.

## EDUP2027

### Beginning Professional Experiences Education and Social Work

**Credit points:** 8 **Teacher/Coordinator:** Ms Christine Preston **Session:** Semester 2 **Classes:** 2 hours/week for 12 weeks plus 1 hour lecture for 4 weeks  
**Prerequisites:** EDUP1002, EDUF1018 and EDUF1019 **Prohibitions:** EDUP2003 **Assessment:** A successful completion of professional experience placement and the following exercises: a lesson plan (1000 wd); One group presentation (750 word); a reflection on the Professional Experience (2500 word). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit incorporates the year's professional experience and continues students' development as reflective practitioners. It examines various ways in which the concepts of curriculum and evaluation and quality teaching have been defined in current literature. The phases of planning, development, implementation and evaluating quality lesson plans will be examined along with the importance of reflective practices. Classroom management issues will also be further explored, building on the initial discussions in EDUP1002 in Year One. Students will develop an understanding of the interrelationship between quality teaching dimensions and management of the classroom learning community. They will demonstrate their understanding and expertise of quality teaching and learning principles through peer teaching and during their professional experiences in schools.

## EDUP3001

### PDHPE 2: Active Healthy Primary Schools Education and Social Work

**Credit points:** 4 **Session:** Semester 1 **Classes:** A 1 hour lecture for 5 weeks and a 2 hour workshop for 12 weeks **Prerequisites:** 36 credit points of professional studies in Primary Education including EDUP2004 **Assessment:** A PDHPE and me report (1500 wd) (50%) and a peer teaching and written task (1,500 wd equivalent) (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

In this second unit of study students will continue to gain experience in a variety of physical activities as well as being introduced to health and personal development content strands from the Personal Development Health and Physical Education (PDHPE) Key Learning Area (KLA), K-6. Students will be encouraged to examine their own health and fitness status and explore the importance of leading active and healthy lives. Emphasis will be placed upon developing teaching skills and programming strategies necessary for the effective implementation of the syllabus. Participation in a variety of dance and gymnastic activities will enable students to develop their confidence and physical skills to teach children. Particular attention will be given to teaching an integrated PDHPE curriculum within the health promoting school context.

## EDUP3002

### Human Society and its Environment

## Education and Social Work

**Credit points:** 4 **Session:** Semester 1 **Classes:** 24 hours lecture and tutorial mode. **Prerequisites:** 36 credit points of professional studies in Primary Education **Assessment:** Classroom responses to a social issue (30%); Development of an excursion (30%); Critique and enhancements of unit of work (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit will focus on the fundamental principles of the Human Society and Its Environment K-6 key learning area as well as theories of how children learn in a social setting. This unit will enable the students to design and critically reflect on learning experiences which are planned to achieve the aim of the NSW HSIE K-6 Syllabus.

## EDUP3003

### Teaching in Multilingual Classrooms Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Paul Dufficy **Session:** Semester 1 **Classes:** 2 hours/week for 10 weeks **Prerequisites:** 36 credit points of professional studies in Primary Education **Assessment:** There is a range of linked assessment tasks in this unit. These include activity design tasks; a written paper analysing classroom talk; the design of a substantial learning sequence; and introducing and reading a novel. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

The content of this introductory unit of study is based around teaching principles derived from current sociocultural thinking. Four key principles are challenge, engagement, assisted performance, and handover. With these in mind, and after an introduction to the social and political context of TESOL, the unit covers oral language development, literacy and the integration of newly-arrived children.

## EDUP3004

### Mathematics 2: Space and Measurement Education and Social Work

**Credit points:** 4 **Session:** Semester 2 **Classes:** 2 hours/week for 11 weeks **Prerequisites:** 36 credit points of professional studies in Primary Education including EDUP2005 **Assessment:** Written paper providing evidence of knowledge of content and pedagogy of mathematics (40%) and a folder of work containing 3 - 4 lesson plans and lesson evaluations (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

In this unit students will focus on the content strands of Space & Geometry, and Measurement, and the process strand, Working Mathematically. The role mathematics plays in developing numeracy will be examined in the light of the content areas covered in this unit.

## EDUP3005

### Investigating in Science and Technology Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Louise Sutherland **Session:** Semester 2 **Classes:** 1 hour lectures (Weeks 1, 2, 3, 4 & 5); 2 hour workshops (Weeks 2, 3, 4, 5, 6, 7, 8 & 9) **Prerequisites:** 36 credit points of professional studies in Primary Education including EDUF1016, EDUF1017 and EDUP2027 **Assessment:** Assessment will be based on assignments involving teaching activities, the development of a teaching guide and lesson planning. Group work will be a feature of one of these assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit is the first of two dealing with issues, strategies and resources relevant to the teaching of Science and Technology in the K-6 curriculum. It builds upon foundation studies in science undertaken by students in the Science Foundations units EDUF1016 and EDUF1017.

## EDUP3006

### English: Becoming Literate Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Jon Callow **Session:** Semester 2 **Classes:** 26 hours mixed mode delivery lectures, tutorials and online work. **Prerequisites:** 36 credit points of professional studies in Primary Education including EDUP1002 and EDUP2002 **Assessment:** Analysis of child's writing

sample (50%); Artefact collection and lesson sequence (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

In this unit students will continue to reflect on their theoretical knowledge of the principles of English teaching. They will critique key readings to challenge, make links to their own practices and to question past and current practice. Students will examine literacy assessment tools, identify the literacy demands of factual texts and plan lessons to encourage pupil engagement through explicit teaching in stages one and two. As a result of working in this unit, students should be prepared to justify their own approach to teaching English and literacy across the curriculum areas in the primary classroom.

### EDUP3007

#### Professional Experiences 2 (Primary) Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Robyn Gibson **Session:** Semester 2 **Classes:** 2 hours/week for 7 weeks **Prerequisites:** 36 credit points of professional studies in Primary Education including EDUP2027 **Prohibitions:** EDUP2003 **Assessment:** There is a range of linked assessment tasks in this unit of study. These include weekly presentations, a critical reflection about learning during in-school experience, and the successful completion of 15 days in-school experience. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study builds upon the work completed in Professional Experiences 1 by maintaining a reflective orientation and introducing students to more detailed aspects of grouping strategies, communication, management and assessment. The twin themes of 'making links' and 'quality learning for children' will be central.

### EDUP3008

#### Creative Arts 2 Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Robyn Gibson **Session:** Semester 1 **Classes:** 2 hours/week for 13 weeks **Prerequisites:** 36 credit points of professional studies in Primary Education including EDUP1001 **Assessment:** Unit of work or Resource Kit and continuation of VAPD/Portfolio **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit comprises four Creative Arts components: Visual Arts, Music, Drama and Dance. It continues to develop both theoretical and practical/studio work across a range of art forms appropriate for primary age children.

### EDUP3034

#### PDHPE 3: The Health Promoting School Education and Social Work

**Credit points:** 4 **Session:** Semester 2 **Classes:** 1 1hr lecture for 2 weeks and 2 hr workshop for 8 weeks **Prerequisites:** 36 credit points of professional studies in Primary Education including EDUP2004 and EDUP3001 **Assessment:** A letter to parents and a referenced rationale (1500 wds) worth 40% justifying the importance of the chosen PDHPE topic. A unit of work (2500 wds) worth 60% on the chosen PDHPE topic including useful websites. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

In this unit of study, additional content strands from the Personal Development Health and Physical Education Syllabus, K - 6 will be examined and further emphasis will be placed upon refining teaching skills and developing programming strategies necessary for the effective implementation of the syllabus. Particular attention will be given to sensitive issues in the syllabus. The role of the school as a health promoting environment will be examined further.

### EDUP4007

#### Primary Languages A Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 1 **Classes:** 2 hours per week over 10 weeks **Prerequisites:** 72 credit points of Professional Studies in Primary Education **Assessment:** An academic essay (50%) and a set of three lesson plans (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary).

This unit of study will enable students to prepare to implement a languages program in a primary school context. Through an examination of policy and syllabus documents, suitable teaching methods and pedagogy, students will focus on what is required for establishing and sustaining a primary languages program. Students will also develop language lesson planning skills, and become familiar with materials that are suitable for the primary languages classroom.

### EDUP4008

#### Primary Languages B Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Lesley Harbon **Session:** Semester 2 **Classes:** 2 hours/week over 10 weeks (20 hours) **Prerequisites:** EDUP4007 **Assessment:** An intercultural task, parts a and b (75%) and a set of PowerPoint slides (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary).

This unit of study allows students to continue their understandings of how best to deliver a languages program in a primary school context. Through an examination of intercultural languages education theory, and the syllabus directives as regards planning to use ICT as a vehicle for lesson delivery as well as a tool for teacher student teaching/learning, students will continue to focus on what is required for establishing and sustaining a primary languages program.

### EDUP4009

#### Special Education (A) Special Course Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Associate Professor David Evans **Session:** Semester 1 **Classes:** 2 hours/week over 11 wks (22 hrs) **Prerequisites:** 72 credit points of Professional Studies in Primary Education and EDUP3031 **Assessment:** Theory to Practice paper (40%); Application Task (40%); and Tutorial (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary).

The education of students with additional learning needs is a challenge for all teachers. Given the introduction of the Disability Standards for Education (2005) all teachers are required to be knowledgeable about curriculum and instructional adjustments that will assist them to cater for students with special educational needs. This unit will address issues around current legislation and policy, review current literatures about effective practices in catering for students with special needs, and develop skills in reviewing literature and policy. The remainder of the unit will be spent examining practices that will assist teachers to meet the additional learning needs of students experiencing difficulty in learning literacy and numeracy through school based experiences.

### EDUP4010

#### Special Education (B) Special Course Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Associate Professor David Evans **Session:** Semester 2 **Classes:** 2 hours/week for 11 wks (22 hrs) **Prerequisites:** EDUP4009 **Assessment:** Theory to Instruction Paper (40%); In-school Collaboration Project (30%); Programming Task (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary).

The education of students with special education needs is the business of all teachers. This unit will further the study of policy and practices that assist teachers to cater for students with special needs through (a) examining strategies of how teachers can work together to address student need, and (b) how they can adjust their classroom practices to manage challenging and difficult social behaviour. At the completion of the unit students will be familiar with problem based approaches and whole school strategies for addressing the education outcomes for students with special education needs.

## EDUP4017

### Professional Experiences 4 (Primary) Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Tony Loughland **Session:** Semester 2 **Classes:** 5 lectures and tutorials; 30 days in school experience **Prerequisites:** 72 credit points of Professional Studies in Primary Education including EDUP1002, EDUP2027, EDUP3007, EDUP4079 **Assessment:** Assessment will be in the form of a satisfactory practice teaching and action learning report. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed (Primary).

This unit of study is the final professional experience in the Bachelor of Education Primary degree. Students act in the role of graduate teacher in a 30 day internship that is the culmination of this unit of study. In preparation for this internship, students will prepare an action learning task that will build upon the professional learning undertaken in EDUP4079 in semester 1. This action learning task will be framed by the graduate teacher standards of the NSW Institute of Teachers.

## EDUP4062

### Gifted and Talented Education A Education and Social Work

**Credit points:** 4 **Session:** Semester 1 **Classes:** 2 hrs/wk for 10 wks **Prerequisites:** 72 credit points of professional studies in Primary Education **Assessment:** Peer Teaching Task (1200w); Written Task (1500 words), Lesson (1200 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

Understanding and responding to the needs of gifted children is an integral part of teaching all key learning areas. This unit of study is the first of two that will provide practical and theoretical experience in these aspects of the curriculum. It will link recommended practice for gifted children with actual practice in the classroom and across the school. Definitions and identification of giftedness will underpin the unit's emphasis on real provisions to motivate and challenge gifted children. Participation in a variety of activities will enable students to design lessons and programs to teach children with differing capabilities while developing the knowledge, skills and attitudes that will lead to the commitment to the value of lifelong learning. In this unit students will gain experience in making opportunities real for gifted children.

## EDUP4063

### Gifted and Talented Education B Education and Social Work

**Credit points:** 4 **Session:** Semester 2 **Classes:** 2 hrs/wk for 10 wks **Prerequisites:** EDUP4062 Gifted and Talented Education A **Assessment:** Peer Teaching Task (1500 words); Written Task (1000 words), Lesson Plan (1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

Understanding and responding to the needs of gifted children is an integral part of teaching all key learning areas. This unit of study is the second of two that will provide practical and theoretical experience in these aspects of the curriculum. Building on work done in Gifted and Talented A, this Unit will continue to link recommended practice for gifted children with actual practice in the classroom and across the school. Definitions and identification of giftedness will underpin the unit's emphasis on real provisions to motivate and challenge gifted children. Participation in a variety of activities will enable students to design lessons and programs to teach children with differing capabilities while developing the knowledge, skills and attitudes that will lead to the commitment to the value of lifelong learning, an experience in making opportunities real for gifted children.

## EDUP4066

### IT in the Primary Classroom A Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Ms Vilma Fyfe **Session:** Semester 1 **Classes:** 20 hours or 2 hours/week for 10 weeks **Prerequisites:** 72 credit points of Professional Studies in Primary Education including EDUP3003 and

EDUP3007 **Assessment:** Assessment will be based on school based IT projects (3000 wd equivalent) and workshop presentation (1000 wd equivalent). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit builds upon earlier computer based experiences in Education 1 in order to develop students' understanding of, and skills in, the application of contemporary information and communication technologies in the Primary classroom. Technical aspects will be drawn from database design and construction, presentation software, Website design, and desktop publishing. The unit will deal with aspects of technology that impinge on teachers' own professional and administrative practice, the evaluation of IT related resources and the integration of IT into classroom activities.

## EDUP4067

### IT in the Primary Classroom B Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Ms Vilma Fyfe **Session:** Semester 2 **Classes:** 20 hours or 2 hours/week for 10 weeks **Prerequisites:** EDUP4066 **Assessment:** Assessment will be based on school based IT projects (3000 wd equivalent) and class presentations (1000 wd equivalent). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit builds upon earlier computer based experiences in Education 1 and IT in the Primary Classroom (A) in order to develop students' understanding of, and skills in, the application of contemporary information and communication technologies in the Primary Classroom (A) in order to develop students' understanding of, and skills in, the application of contemporary information and communication technologies in the Primary classroom. Technical aspects will be drawn from presentation software, digital video production and low cost graphic techniques. The unit will deal with aspects of technology that impinge on teachers' own professional and administrative practice, the evaluation of IT related resources and the integration of IT into classroom activities.

## EDUP4068

### TESOL (A) Special Course Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** D Paul Dufficy **Session:** Semester 1 **Classes:** 2 hrs/wk for 10 wks **Prerequisites:** 72 credit points of Professional Studies in Primary Education including EDUP3003 & EDUP3007 **Assessment:** There is a range of linked assessment tasks in this unit. These include activity design tasks: a grammar test; the assessment of a piece of children's writing; the design of a substantial learning sequence; development of a program for teaching a novel. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

The content of this unit builds upon previous work completed in EDUP3003 and is based around teaching principles derived from current socio-cultural thinking. Four key principles are challenge, engagement, assisted performance, and handover. With these in mind, and after an introduction to the social and political context of TESOL, the unit covers oral language development, literacy and the integration of newly-arrived children, and grammar across the KLA.

## EDUP4069

### TESOL (B) Special Course Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Paul Dufficy **Session:** Semester 2 **Classes:** 2 hours/week for 10 weeks **Prerequisites:** EDUP4068 **Assessment:** There are three assessment tasks in this unit. They are: a vocabulary design task; a research project; and an oral review of a current journal article. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

The content of this unit builds upon previous work completed in EDUP3003 and EDUP4068. The focus for this unit will be vocabulary

development, the teaching of literature in multilingual classrooms, analysis of ESL implementation, and the carrying out of a small-scale research project.

#### EDUP4070

##### Integrated Arts (A) Special Course Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Robyn Gibson **Session:** Semester 1 **Classes:** 2 hours/week for 12 weeks **Prerequisites:** 72 credit points of Professional Studies in Primary Education and EDUP1001 and EDUP3008 **Assessment:** A reflective portfolio derived from the in-school experience including planning processes for the work undertaken and a written critical reflection. Length and complexity appropriate for a final year unit of study. Criteria will be negotiated. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study provides students with the opportunity to further their knowledge, skills, techniques and understandings in the Creative Arts, building on earlier units in the Bachelor of Education (Primary) program. It also involves teaching creative arts in a school context. Integrated Arts Special Course comprises Integrated Arts A (Semester 1) and Integrated Arts B (Semester 2).

#### EDUP4071

##### Integrated Arts (B) Special Course Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** A/Prof Robyn Ewing, Dr Robyn Gibson **Session:** Semester 2 **Classes:** 2 hours/week for 12 weeks **Prerequisites:** EDUP4070 **Assessment:** Assessment options will be negotiated with the students but are linked to unit outcomes and reflect the 4 credit point loading. Possible examples include: reflective scrapbook/portfolio; rationale for using Creative Arts in the primary school; critical responses to 'Arts' experiences **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study will further develop students' knowledge, skills, techniques and understandings in the Creative Arts, building on the unit of study undertaken in Semester 1.

#### EDUP4072

##### Koori Kids in School A (Special Course) Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Sharon Galleguillos **Session:** Semester 1 **Classes:** 2 hrs/wk for 10 wks **Prerequisites:** 72 credit points of Professional Studies in Primary Education **Assessment:** My Practicum School and Community (1000 wd report and Powerpoint presentation); Resource Evaluation and Presentation (1000 wd report and oral presentation); NAIDOC Week Lesson Plans (Two lesson plans in preparation for Practicum) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study aims to develop skills and knowledge that will enable students to address the many issues that face Indigenous pupils in the school environment. The unit focuses on the application of Aboriginal Studies in primary education and builds on the knowledge and skills gained in EDUP2006 Indigenous Australian Education. It is structured so that students, through lectures and workshops throughout Semester 1, are prepared to undertake their Practicum at a primary school with a significant cohort of Indigenous students and an Aboriginal Education Assistant (AEA). Students will be guided in the application of more extensive consultative mechanisms with Aboriginal communities, organisations and individuals.

#### EDUP4073

##### Koori Kids in School B (Special Course) Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Sharon Galleguillos **Session:** Semester 2 **Classes:** 2 hrs/wk for 10 wks **Prerequisites:** EDUP4072 **Assessment:** The role of the Aboriginal Education Assistant (1000 wd report and Powerpoint presentation); The role of the District Office (1000 wd report); Excursion resource (1500 wds) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study will build on the knowledge gained in Koori Kids in School A. The focus of this unit will be to further develop skills in preparation for their final practicum (internship) at a primary school with a significant cohort of indigenous students and an Aboriginal Education Assistant (AEA). Students will participate in workshops given by Department of Education and Training personnel concerning Indigenous education within districts throughout NSW. This unit of study will deepen the understanding of contemporary and traditional Indigenous Australian culture, skills and knowledge and how this affects learning through practical engagement with Indigenous students, educators and communities.

#### EDUP4074

##### Mathematics Education 3 Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Jennifer Way **Session:** Semester 1 **Classes:** 2 hours/week for 12 weeks **Prerequisites:** 72 credit points of Professional Studies in Primary Education including EDUP2005 and EDUP3004 **Assessment:** Assessment will include: the assessment and analysis of a child's mathematics ability (50%) (2000 words equivalent); an assessment based teaching plan (2000 words equivalent) (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study is designed to build on the content and ideas introduced in Mathematics Education 1 and 2 and reflects the growing international emphasis on the development of efficient mental computational strategies to enhance numeracy levels in Australia. The unit will explore how children's mathematical thinking strategies develop via research-based frameworks. Students will be introduced to suitable assessment instruments and a range of teaching/learning strategies suitable for enhancing the thinking strategies of children.

#### EDUP4075

##### Science & Technology (Designing/Making) Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Ms Christine Preston **Session:** Semester 1 **Classes:** 2 hrs/wk for 12 wks plus 1 hour lecture for 5 wks **Prerequisites:** 72 credit points of professional studies in Primary Education including EDUP2027, EDUP3005, EDUF1016 and EDUF 1017 **Assessment:** Individual evaluation of published mini unit of work (1000 wds) and group work redesign and expansion of the unit of work (2000 wds per student). Individual discussion of constructivist approaches to teaching science (1000 wds per student) and individual critical review of research into teaching about design and technology (1000 wds per student). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

Through an examination of the learning processes Designing & Making and Using Technology, this unit focuses on developing children's interest and skills in understanding and using technology. In particular, it considers design as a creative process, founded on an understanding of the natural and physical world which promotes science conceptual understanding. Teaching of these learning processes is supported by exploring the content strands of Built Environments, Information & Communications and Products and services. It considers aspects of curriculum planning, classroom management, development/selection of activities and resources relevant to the teaching of technology. It also emphasises the linking of science and technology to other areas of the K-6 curriculum.

#### EDUP4076

##### English: Being Critically Literate Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Alyson Simpson **Session:** Semester 1 **Classes:** 1 hr lecture plus 1 hr workshop per week for 11 wks plus 4 hr online component **Prerequisites:** 72 credit points of professional studies in Primary Education including EDUP2002 and EDUP3006 **Assessment:** Child literacy profile 1000 wds (25%); Scenario responses 1000 wds (25%); literature based unit of work 2000 wds (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study is focussed on work with the strands of Reading, Writing, Talking and Listening through the use of literary texts in the classroom. Literary texts such as picture books, novels, biographies, plays and poetry as well as other texts of popular culture will be used as the basis for preparation for teaching English to children in the middle years (NSW Stages 2 and 3, grades 3,4,5 and 6). The emphasis will be on developing children's critical comprehension and creative composition of a range of literary texts. Understanding how to assess a child's strengths and needs in reading, writing, speaking and listening will also be an important component of this unit.

#### EDUP4077

##### Teaching Children with Special Needs Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Assoc Prof David Evans **Session:** Semester 2 **Classes:** 1 one hr lecture; 2 three hr in-school sessions for 10 wks **Prerequisites:** 72 credit points of Professional Studies in Education including EDUP3004 and EDUP3006 **Assessment:** Complete sequence of tutoring sessions in schools, including planning a literacy/numeracy program, implementing an evaluation plan. In addition, keep journal of experiences with links to literature. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

Under the supervision of tutors, students will complete a series of tutoring sessions in schools. During this time, students will develop individualised literacy and numeracy plans, implement plans with a child, evaluate teaching outcomes and plan for ongoing sessions. During this experience, students will keep a journal of teaching experiences, including making links between practice and the research literature, and critique current literature that relates to their school-based work.

#### EDUP4079

##### Professional Experiences 3 (Primary) Education and Social Work

**Credit points:** 4 **Teacher/Coordinator:** Dr Tony Loughland **Session:** Semester 1 **Classes:** Six lectures and tutorials; 20 day practicum **Prerequisites:** 72 credit points of Professional Studies in Primary Education including EDU1002, EDUP2027 and EDUP3007 **Assessment:** Assessment will be in the form of a satisfactory practice teaching report and a professional portfolio **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study incorporates the year's final professional experience before the internship and continues students' development as reflective practitioners building on Professional Experiences 1 and 2. Students will synthesise their professional learning to create their graduate teacher portfolio and complete a 20 day practicum in a school.

#### EDUP4080

##### Human Society and its Environment 2 Education and Social Work

**Credit points:** 4 **Session:** Semester 2 **Classes:** 2 hours/week for 10 weeks **Prerequisites:** 72 credit points of Professional Studies in Education including EDUP3002 **Assessment:** Development of community resources for teaching (40%); Appraisal of school HSIE curriculum materials (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Ed (Primary), UG Study Abroad Program.

This unit of study allows students to demonstrate their understanding of how to develop and use HSIE resources at several levels, including global, national, statewide, community, and school resources. Students will be required to demonstrate both the critical and imaginative use of a global or community resource for the teaching of HSIE. Students will also be required to investigate, critique and enhance the use of school resources for the teaching of HSIE. In particular, students will explore the resources from their professional experience school and reflect on how such resources might be developed to maximise the effective HSIE learning for students in their own classrooms.

#### ELEC1103

##### Fundamentals of Elec and Electronic Eng

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and an average of 2 hours lab, 2 hours tutorial per week. **Prohibitions:** ELEC1102 Foundations of Electronic Circuits. **Assumed knowledge:** HSC Physics, HSC Mathematics extension 1. **Assessment:** Tutorial participation 5%, laboratory performance and notebook 5%, laboratory exam 10%, mid-term exam 25% and end of semester examination 55%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study aims to develop knowledge of the fundamental concepts and building blocks of electrical and electronics circuits. The following specific topics are covered: Basic electrical and electronic circuit components and electric circuits. Circuit voltage and current laws, node and mesh analysis theorems, circuit theorems. The operational amplifier, energy storage, capacitors and inductors, circuits with switches, transient response, sinusoidal waveforms and complex analysis, phasors, impedance, ac power.

#### ELEC1601

##### Foundations of Computer Systems Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures, a 2 hours tutorial and a 2 hours lab per week. **Prohibitions:** NETS2008 Computer System Organisation, NETS2908 Computer System Organisation (Adv), COMP2001 Computer Systems, COMP2901 Computer Systems (Adv). **Assumed knowledge:** HSC Mathematics extension 1 **Assessment:** Laboratory performance and laboratory exam 20%, tutorial attendance, performance and report 5%, end of semester examination (closed book) 75%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study introduces the fundamental digital concepts upon which the design and operation of modern digital computers are based. A prime aim of the unit is to develop a professional view of, and a capacity for inquiry into, the field of computing.

The unit covers the fundamental digital concepts upon which the design and operation of modern digital computers are based. Topics covered include: data representation, basic computer organisation, the CPU, elementary gates and logic, peripheral devices, software organisation, machine language, assembly language, operating systems, data communications and computer networks.

#### ELEC2004

##### Electrical Engineering: Foundations Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and an average of 1 hour of tutorial and 1 hour of lab per week. **Prerequisites:** 36 credit points **Prohibitions:** ELEC1001 Introductory Electrical Engineering, ELEC1101 Foundations of Computer Systems, ELEC1102 Foundations of Electronic Circuits, ELEC2001 Electrical and Electronic Engineering, ELEC2003 Electrical and Electronic Engineering A, ELEC1103 Professional Electronic Engineering, ELEC1601 Professional Computer Engineering. **Assessment:** Tutorials and quizzes 10%, lab performance and notebook 10%, assignment 5%, closed book exam 75%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study assumes a degree of basic research skills and ability to grasp engineering principles; information literacy; personal and intellectual autonomy; communication skills.

The following topics are covered. Introduction to circuits: current and voltage, power, Kirchhoff's Laws, sources and resistors, Ohm's Law, series and parallel connections, voltage divider, equivalent circuits. Inductors and capacitors: capacitance, inductance, inductors in series/parallel, RC circuits, RL circuits, transient and steady state, introduction to RLC circuits. Power transmission: sinusoidal signals, phasors, power in ac circuits, balanced 3-phase circuits. Transformers: characteristics of ideal transformers, introduction to magnetisation and non-ideal behaviour. Electromechanical energy conversion: machine types, DC machines, field connections, introduction to ac and induction machines. Operational amplifiers: ideal op amp, inverting amplifier, noninverting amplifier, design and gain-bandwidth product, simple filters. Logic circuits: basic concepts, number representations, combinatorial logic circuits, sequential logic circuits, introduction to

CMOS digital circuits. Introduction to microprocessors: organization, memory, process control, instruction sets, addressing and interfacing.

### ELEC2103

#### Simulation & Numerical Solutions in Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 hour lecture, 3 hours of computer lab per week **Prohibitions:** ELEC2102 Engineering Computing, COSC1001 Computational Science in Matlab, COSC1901 Computational Science in Matlab (Advanced). **Assumed knowledge:** 36 credit points including ELEC1102 Foundations of Electronic Engineering or ELEC1103 Professional Electronic Engineering. **Assessment:** Mid-semester test 12%, lab performance and notebook 8%, assignment 8%, end of semester closed book exam 72%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit assumes an understanding of the fundamental concepts and building blocks of electrical and electronics circuits. As well as covering the specific topics described in the following paragraphs, it aims to develop skills in professional project management and teamwork and promote an understanding of ethics.

Basic features of Matlab. The Matlab desktop. Interactive use with the command window. Performing arithmetic, using complex numbers and mathematical functions. Writing script and function m-files. Matrix manipulations. Control flow. Two dimensional graphics. Application of Matlab to simple problems from circuit theory, electronics, signals and systems and control. Investigation of the steady state and transient behaviour of LCR circuits.

Matlab based numerical solutions applicable to numerical optimization, ordinary differential equations, and data fitting. Introduction to symbolic mathematics in Matlab. Applications, including the derivation of network functions for simple problems in circuit analysis. Introduction to the use of Simulink for system modelling and simulation.

### ELEC2104

#### Electronic Devices and Circuits Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures per week, and a 2 hours tutorial and 2 hours lab per fortnight. **Prohibitions:** ELEC2401 Introductory Electronics. **Assumed knowledge:** ELEC1102 Foundations of Electronic Circuits or ELEC1103 Professional Electronic Engineering. **Assessment:** Laboratory work 15%, on-line exercises 5%, mid-semester quiz 10%, end of semester examination 70%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The purpose of this unit of study is to provide a working knowledge of fundamental principles of electronic engineering. The topics covered include circuit theory and microelectronics. A background in introductory circuit theory is assumed.

The following specific topics are covered. Semiconductor diodes: junction diodes, special purpose diodes. Transistors: field effect and bipolar transistors. Large signal amplifiers: practical amplifiers, differential amplifiers, biasing circuits. Operational amplifiers: circuit applications.

### ELEC2302

#### Signals and Systems Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures and a 2.5 hours lab/tutorial per week. **Prohibitions:** ELEC2301 Signals & Systems, MATH3019 Signal Processing, MATH3919 Signal Processing (Adv). **Assumed knowledge:** MATH1001 Differential Calculus and MATH1002 Linear Algebra and MATH1003 Integral Calculus and Modelling. **Assessment:** Weekly quizzes 10%, mid-semester exam 25%, end of semester exam 65%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to teach some of the basic properties of many engineering signals and systems and the necessary mathematical tools that aid in this process. The particular emphasis is on the time and frequency domain modeling of linear time invariant systems. The concepts learnt in this unit will be heavily used in many units of study (in later years) in the areas of communication, control, power systems

and signal processing. A basic knowledge of differentiation and integration, differential equations, and linear algebra is assumed.

The following topics are covered. Continuous-time signals: classification and properties. Basic properties of systems: linearity, time-invariance, causality, and stability. Linear time-invariant (LTI) systems: characterization by differential equations (including state space formulation), and the convolution integral. Fourier series and Fourier Transform: definition, properties, frequency response and analysis of LTI systems based on Fourier transform. Sampling. Correlation and Power Spectral Density. Laplace transform: definition, properties, and analysis of LTI systems based on Laplace transform. Solution of state space equations using Laplace transform.

### ELEC2602

#### Digital System Design Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 hour of lectures per week and 9 three hours labs. **Prohibitions:** ELEC3601 Digital Systems Design, ELEC3608 Digital Systems Design. **Assumed knowledge:** ELEC1101 Foundations of Computer Systems or ELEC1601 Professional Computer Engineering. **Assessment:** Homework 10%, Laboratory 20%, Mid-semester exam 10%, a 2 hour end of semester exam 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study assumes some knowledge of digital data representation and basic computer organisation.

The following topics are covered: logic operations, theorems and Boolean algebra, number operations (binary, hex, integers and floating point), combinational logic analysis and synthesis, sequential logic, registers, counters, bus systems, state machines, simple CAD tools for logic design, and the design of a simple computer.

### ELEC3104

#### Engineering Electromagnetics Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and a 2 hours tutorial per week. **Prohibitions:** ELEC3102 Engineering Electromagnetics. **Assumed knowledge:** PHYS2213 Physics 2EE (or PHYS2203 Physics 2EE) and MATH2061 Linear Algebra and Vector Calculus (or MATH2001 Vector Calculus and Complex Variables) and ELEC1103 Professional Electronic Engineering (or ELEC1102 Foundations of Electronic Circuits). **Assessment:** Assignments 30%, end of semester exam 70%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit builds upon the knowledge of differential calculus, integral calculus, vector integral calculus (line integrals and surface integrals); electrical circuit theory and analysis using lumped elements; fundamental electromagnetic laws and their use in the calculation of static fields. It introduces students to the broad spectrum of engineering electromagnetics and helps students to develop theoretical and analytical skills in the area of electrical and telecommunications engineering and develop understanding of the basic electromagnetic theory underpinning optical communications, wireless communications and electrical engineering.

Topic areas include: static electric fields; static magnetic fields; time-varying fields and Maxwell's equations; plane electromagnetic waves; transmission lines; antennas and arrays.

### ELEC3105

#### Circuit Theory and Design Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures and a 2 hours laboratory/tutorial per week. **Prohibitions:** ELEC3101 Circuit Theory and Design. **Assumed knowledge:** (ELEC2101 Circuit Analysis or ELEC2104 Electronic Devices and Basic Circuits) and (ELEC2301 Signals and Systems or ELEC2302 Signals and Systems). **Assessment:** Assignments 30%, a 2 hour exam at end of semester 70%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study assumes a basic knowledge of elementary circuit theory and operational amplifiers provided by earlier units. One aim of the unit is to enhance understanding of key aspects of the theory

of electric circuits. The main goal, however, is to equip students with the specialist knowledge to design active analog filters, to have an understanding of passive network design and to be in a good position to undertake further self study as required.

The specific topics covered include the following. Fundamental concepts in circuit theory: network functions, characteristic frequencies. Types of filter: lowpass, bandpass, etc. Review of operational amplifiers. Design of first and second order filters using operational amplifiers. Cascade design. Filter characteristics: Butterworth, Chebyshev. Frequency transformations in design. Sensitivity. Design of passive LC ladder filters. A brief introduction to switched capacitor filters.

Matlab and a Spice simulator will be used extensively.

### **ELEC3203** **Electricity Networks** **Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures and a 3 hours lab per week and 1 hour tutorial per week. **Prohibitions:** ELEC3201 Electrical Energy Systems. **Assumed knowledge:** ELEC2101 Circuit Analysis or ELEC2104 Electronics and Basic Circuits. **Assessment:** Tutorial and laboratory work 20%, mid semester quiz 10%, end of semester examination 70%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study provides an introduction to electrical power engineering and lays the groundwork for more specialised units. It assumes a competence in first year mathematics (in particular, the ability to work with complex numbers), in elementary circuit theory and in elements of introductory physics.

A revision will be carried out of the use of phasors in steady state ac circuit analysis and of power factor and complex power.

The unit comprises an overview of modern electric power system with particular emphasis on generation and transmission.

The following specific topics are covered. The use of three phase systems and their analysis under balanced and unbalanced conditions. Transmission lines: calculation of parameters, modelling, analysis. Transformers: construction, equivalent circuits. Generators: construction, modelling for steady state operation. Cables: types and modelling for steady state operation. Types of electricity grids, radial, mesh, networks.

The use of per unit system. The analysis of systems with a number of voltage levels. The control of active and reactive power. The load flow problem: bus and impedance matrices, solution methods.

### **ELEC3204** **Power Electronics and Applications** **Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures per week, 1 hour tutorial per fortnight and 3 hours lab per fortnight. **Prohibitions:** ELEC3202 Power Electronics and Drives. **Assumed knowledge:** ELEC2401 Introductory Electronics or ELEC2104 Electronic devices and basic circuits or ELEC2001 Electrical and Electronic Engineering or ELEC2003 Electrical and Electronic Engineering A. **Assessment:** Laboratory work 20%, mid-semester exam 20% and end of semester exam 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study is concerned with modern electronic energy conversion techniques. A background in basic electrical and magnetic circuit theory is assumed. Completion of this unit will facilitate progression to advanced study or work in electrical power engineering.

The following specific topics are covered: Power Electronics for Drives: AC-AC converters including static switches and cycloconverter. AC-DC converters including diode rectifiers and thyristor converter. Power quality of AC-DC converters. DC-DC switching converters including buck, boost, buck-boost, first-quadrant, two-quadrant and four-quadrant motor drives. Electronic control of DC motor, induction motor. DC traction. Brushless DC drives. Electric and hybrid electric vehicles.

### **ELEC3206** **Electrical Energy Conversion Systems** **Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures per week, 1 hour tutorial per fortnight and 3 hours lab per fortnight. **Assumed knowledge:** ELEC2104 Electronic Devices and Circuits. **Assessment:** Tutorial and laboratory work 20%, mid semester exam 20% and final exam 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The following specific topics are covered: Single-phase and three-phase circuits, magnetic circuits, inductance, sinusoidal excitation, hysteresis and eddy current loss, permanent magnets, electromechanical energy conversion, singly-excited and doubly-excited systems, transformers, single-phase, equivalent circuit parameters, three-phase transformers, autotransformers, DC machines, DC generators, separate excitation, shunt excitation, series excitation, and compound excitation, DC motors, efficiency, armature reaction, induction machines, revolving field, equivalent circuit, squirrel cage machines, measurements of the parameters, DC resistance test, no-load test, blocked-rotor test, synchronous machines, field relationships, synchronous generators, power-angle relationships, salient pole machines.

### **ELEC3304** **Control** **Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures and a 3 hours lab/tutorial per week. **Prohibitions:** ELEC3302 Fundamentals of Feedback Control, MECH3800 Systems Control, AMME3500 System Dynamics and Control, CHNG3302 Process Control. **Assumed knowledge:** ELEC2301 Signals and Systems or ELEC2302 Signals and Systems. **Assessment:** Tutorial and laboratory work 15%, Midterm examination 25%, Final examination 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit is concerned with the application of feedback control to continuous-time, linear time-invariant systems. The emphasis is on fundamental theory rather than applications. Some background in linear systems theory and the Laplace transform is assumed. The prime aim of this unit of study is to develop a sound understanding of basics and a capacity for research and inquiry. Completion of the unit will facilitate progression to advanced study in the area and to work in industrial control.

The following topics are covered. History of control. Modelling of physical processes; state variables and differential equations. Dynamic response; review of Laplace transform, transfer functions and block diagrams, poles and zeroes. Design specifications in the time domain. Basic feedback principles; effect of feedback on sensitivity and disturbance rejection, steady state accuracy and stability; the Routh criterion; proportional, integral and derivative control. Design using the root locus; rules for sketching root locus; lead and lag compensators; analogue and digital implementation of controllers. Frequency response; the Nyquist stability criterion; gain and phase margins; compensator design in the frequency domain. An introduction to state space design for single input single-output systems; eigenvalues, zeroes and transfer functions; state variable feedback and design of estimators.

### **ELEC3305** **Digital Signal Processing** **Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and a 2 hours lab/tutorial per week. **Prohibitions:** ELEC3303 Digital Signal Processing. **Assumed knowledge:** ELEC2301 Signals & Systems or ELEC2302 Signals & Systems. **Assessment:** Quizzes & Lab 12%, project 10% (bonus), midterm exam 28%, end of semester exam 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to teach how signals are processed by computers. It describes the key concepts of digital signal processing, including details of various transforms and filter design. Students are expected

to implement and test some of these ideas on a digital signal processor (DSP). Completion of the unit will facilitate progression to advanced study in the area and to work in the industrial use of DSP. This unit assumes a basic knowledge of differentiation and integration, differential & difference equations and linear algebra, plus various time and frequency domain representations of continuous time signals and systems.

The following topics are covered. Review of analog and digital signals. Analog to digital and digital to analog conversion. Some useful digital signals. Difference equations and filtering. Impulse and step response of filters. Convolution representation of filters. The Z-transform. Transfer functions and stability. Discrete time Fourier transform (DTFT) and frequency response of filters. Finite impulse response (FIR) filter design: windowing method. Infinite impulse response (IIR) filter design: Butterworth filters, Chebyshev filters, Elliptic filters and impulse invariant design. Discrete Fourier Transform (DFT): windowing effects. Fast Fourier Transform (FFT): decimation in time algorithm. DSP hardware.

### ELEC3404

#### Electronic Circuit Design

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures per week, and a 1 hour tutorial and 3 hours lab per fortnight. **Prohibitions:** ELEC3401 Electronic Devices and Circuits. **Assessment:** Laboratory work 15%, on-line exercises 5%, mid-semester quiz 10%, end of semester exam 70%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study aims to teach students analysis and design techniques for electronic systems such as signal amplifiers, differential amplifiers and power amplifiers. A background in basic electronics and circuit theory is assumed. Completion of this unit will allow progression to advanced studies or to work in electronics and telecommunication engineering.

Topics covered are as follows. The BJT as an amplifier. Biasing in BJT amplifier circuits. Small signal operation and models. Single stage BJT amplifiers. BJT internal capacitances and high frequency models. The frequency response of the common-emitter amplifier. BJT current sources and current mirrors. Differential amplifiers. Output stages and power amplifiers: class A, class B and class AB.

### ELEC3405

#### Communications Electronics and Photonics

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures and a 2 hours lab/tutorial per week. **Prohibitions:** ELEC3402 Communications Electronics. **Assumed knowledge:** ELEC2401 Introductory Electronics or ELEC2104 Electronic Devices and Basic Circuits. **Assessment:** Labs and assignments 20%, end of semester exam 80%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study provides an introduction to the modelling and design of transmitters and receivers for electronic and optical communication subsystems. Students are expected to have a grasp of basic concepts related to electronics and circuits.

The following topics are covered. Electronic oscillators, RC, LC, crystal oscillators. Tuned electronic amplifiers, frequency selectivity. Feedback amplifiers. Electronic modulation and demodulation circuits, amplitude, frequency and phase modulation and demodulation, phase locked loops. Electronic mixers. High frequency RF and microwave communication amplifiers. Photonic devices and models, semiconductor optical properties. Semiconductor lasers and light emitting diodes, laser modes, output spectra, single-mode selection, distributed feedback lasers. Electro-optic modulation of light. Optical amplifiers. Photodetectors, PIN photodiodes, avalanche photodiodes. Optical receiver front-end circuit design. Basic opto-electronic link.

### ELEC3505

#### Communications

### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and a 3 hours lab and tutorial per week. **Prohibitions:** ELEC3503 Introduction to Digital Communications. **Assessment:** Tutorial work 10%, laboratory 10%, in class quiz 10%, end of semester exam 70%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This is an intermediate unit of study in telecommunications following on the general concepts studied in earlier units such as Signal and Systems and leading on to more advanced units such as Digital Communication Systems. Student will learn how to critically design and evaluate digital communication systems including the elements of a digital transmission system, understand the limitations of communications channels, different analog and digital modulation schemes and reasons to use digital techniques instead of analog, and the effect of noise and interference in performance of the digital communication systems. On completion of this unit, students will have sufficient knowledge of the physical channel of a telecommunications network to approach the study of higher layers of the network stack.

The following topics are covered. Introduction to communications systems, random signals and stochastic process, components, signals and channels, sampling, quantization, pulse amplitude modulation (PAM), pulse code modulation (PCM), quantization noise, time division multiplexing, delta modulation. Digital communications: baseband signals, digital PAM, eye diagram, equalization, correlative coding, error probabilities in baseband digital transmission, bandpass transmission, digital amplitude shift keying (ASK), frequency shift keying (FSK), phase shift keying (PSK) and quadrature shift keying (QPSK), error probabilities in bandpass digital transmission, a case study of digital communication systems. Introduction to information theory: fundamental limits in communications, channel capacity and channel coding, signal compression.

#### Data Communications and the Internet

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures and a 2 hours lab/tutorial per week. **Prohibitions:** NETS2150 Fundamentals of Networking, NETS2009 Network Organisation, NETS2909 Network Organisation (Adv), NETS3007 Network Protocols, NETS3907 Network Protocols (Advanced), ELEC3504 Data Communications and the Internet, ELEC4501 Data Communication Networks. **Assumed knowledge:** SOFT2004 Software Development Methods 1 or COMP2004 Programming Practice or SOFT2130 Software Construction. **Assessment:** Mid-semester exam 20%, assignment 10%, lab exercises 10%, end of semester exam 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc, UG Study Abroad Program.

Students undertaking this unit should be familiar with fundamental digital technologies and representations such as bit complement and internal word representation. Students should also have a basic understanding of the physical properties of communication channels, techniques and limitations. Furthermore, students should be able to apply fundamental mathematical skills.

The unit will cover the following specific material: Communication reference models (TCP/IP, ATM and OSI). Circuit switched and packet switched communication. Network node functions and building blocks. LAN, MAN and WAN technologies. ATM systems. Protocols fundamental mechanisms. The TCP/IP core protocols (IP, ICMP, DHCP, ARP, TCP, UDP etc.). Applications and protocols (FTP, Telnet, SMTP, HTTP etc.).

### ELEC3607

#### Embedded Computing

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 hour of lectures per week and 10 three hours labs. **Prohibitions:** ELEC2601 Microcomputer Systems. **Assumed knowledge:** ELEC1101 Foundations of Computer Systems, or ELEC1601 Professional Computer Engineering or ELEC2602 Digital System Design. **Assessment:** Lab 10%, end of semester exam 90%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

Students undertaking this unit of study are assumed to have a basic understanding of digital concepts, and combinational and sequential devices, together with an introduction to computers.

The aim of this unit of study is to teach students about microprocessors and their use. This includes architecture, programming and interfacing of microcomputers, peripheral devices and chips, data acquisition, device monitoring and control and other communications.

### ELEC3609

#### Internet Software Platforms

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours lecture and 2 hours tutorials **Prerequisites:** INFO1103, INFO2110, INFO2120 **Prohibitions:** EBUS4001 E-Business Engineering **Assessment:** Project tasks 40%, Quiz 10% and Final Exam: Based on the course material and the additional readings worth 50%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc, UG Study Abroad Program.

This unit of study will focus on the design, the architecture and the development of web applications using technologies currently popular in the marketplace including Java and .NET environments. There are three key themes examined in the unit: Presentation layer, Persistence layer, and Interoperability. The unit will examine practical technologies such as JSP and Servlets, the model-view-controller (MVC) architecture, database programming with ADO.NET and JDBC, advanced persistence using ORM, XML for interoperability, and XML-based SOAP services and Ajax, in support of the theoretical themes identified.

On completion the students should be able to:

- Compare Java/J2EE web application development with Microsoft .NET web application development.
- Exposure to relevant developer tools (e.g. Eclipse and VS.NET)
- Be able to develop a real application on one of those environments.
- Use XML to implement simple web services and AJAX applications.

### ELEC3610

#### E-Business Analysis and Design

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 hour lecture and 3 hours Labs each week. **Prerequisites:** INFO2120 **Prohibitions:** EBUS3003 E-Business System Design, EBUS3001 Introduction to e-Commerce Systems **Assessment:** Project Specification Document worth 40%, Project Prototype (website) worth 10% and Final Exam worth 50%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Dig Tech & Culture), B A Informatics, B E, B Sc, UG Study Abroad Program.

The unit focuses on the aspects of analysis, project specification, design, and prototype that lead up to the actual build of a website or application.

Topics include:

- technology fundamentals,
- business models (B2C, B2B and B2E systems),
- development methodologies, including writing use cases and UML diagrams), the Project Proposal and Project Specification Document,
- prototyping approaches: Ruby on Rails and WebRatio
- Other quality factors: Information Architecture, Fundamentals of HCI and User-Centred Design, legal issues, and standards-based web development.

Students build a simple use-case based e-business website prototype with web standards. A final presentation of the analysis, design and prototype are presented in a role play environment where students try to win funding from a venture capitalist.

An understanding of these pre-production fundamentals is critical for future IT and Software Engineering Consultants, Project Managers, Analysts and CTO's.

Specific topics covered include:

- Electronic Commerce Technology Fundamentals
- The e-project

- Prototyping with Ruby on Rails and WebRatio
- B2C, B2B and B2E systems.

### ELEC3702

#### Management for Engineers

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours of lectures plus a 1 hour visiting professional or team-based interaction exercise per week. **Prohibitions:** ELEC3701 Management for Engineers, ENGG3005 Engineering & Industrial Management Fundamentals, MECH3661 Engineering Management **Assumed knowledge:** Nil **Assessment:** Essay 20%, projects 30%, end of semester exam 50%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims to develop an understanding of the principles and practices of industry, to provide an overview of the various issues facing an industrial organisation, and of the basic approaches to their management, to understand the changing nature and effects of globalisation on Australia's economic performance, the competitiveness of Australian firms, and the generation of employment and wealth, to gain an insight into the importance of innovation at all levels and functions of all organisations, and of the ways of developing people-skills and organisational styles to promote innovation, to develop the broader skills required by employers of engineers, and to understand the objectives and roles appropriate to governments.

The following topics are covered; Introduction to engineers and management, Strategic planning, Operations and project management, Communication and people in organisations, Management and leadership, Economics and managerial finance, Accounting and management, Marketing, Human Resource Management, Industrial relations, The global knowledge economy, Legal and ethical environment of business.

### ELEC3802

#### Fundamentals of Biomedical Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and 2 hours of lab/tutorial per week. **Prohibitions:** ELEC3801 Fundamentals of Biomedical Engineering. **Assumed knowledge:** ELEC2104 Electronic Devices and Basic Circuits or ELEC2401 Introductory Electronics or ELEC2001 Electrical and Electronic Engineering or ELEC2003 Electrical and Electronic Engineering A or ELEC2004 Electrical Service Unit. **Assessment:** Lab assignments 20%, end of semester exam 80%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit assumes a knowledge of basic principles in physics, mathematics, circuit theory and electronics. In particular, some understanding of the following is required: Thevenins and Nortons theorems, Fourier analysis, radiation, filtering, bipolar and field effect transistors, and operational amplifiers.

The following topics are covered. Biology of the heart, circulatory and respiratory systems, physiology of nerve and muscle cells, fundamental organization of the brain and spinal cord. Medical instrumentation. ElectrocardioGram and automated diagnosis. Heart pacemakers and defibrillators. The bionic ear. Apparatus for treatment of sleep disordered breathing(sleep apnoea).

This unit is descriptive and does not require detailed knowledge of electronics or mathematics, but does require an understanding of some key aspects of mathematical and electronic theory. The unit concentrates on some of the practical applications of biomedical engineering to patient diagnosis and treatment.

### ELEC3901

#### Electrical Exchange Unit 1A

#### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr. Yash Shrivastava **Session:** Semester 1 **Classes:** A workload that is equivalent to one quarter of that of a (normal) full time student at the exchange university. **Assessment:** Assessment is set by the exchange university. A Pass/Fail grade is awarded by the University of Sydney in this unit. Thus the marks obtained at the exchange university will not be included in WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

This is a unit for students who have gone on exchange.

### ELEC3902

#### Electrical Exchange Unit 1B

##### Engineering and Information Technologies

**Credit points:** 12 **Teacher/Coordinator:** Dr. Yash Shrivastava **Session:** Semester 1 **Classes:** A workload that is equivalent to one half of that of a (normal) full time student at the exchange university. **Assessment:** Assessment is set by the exchange university. A Pass/Fail grade is awarded by the University of Sydney in this unit. Thus the marks obtained at the exchange university will not be included in WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

This is a unit for students who have gone on exchange.

### ELEC3903

#### Electrical Exchange Unit 1C

##### Engineering and Information Technologies

**Credit points:** 24 **Teacher/Coordinator:** Dr Yash Shrivastava **Session:** Semester 1 **Classes:** A workload that is equivalent to that of a (normal) full time student at the exchange university. **Assessment:** Assessment is set by the exchange university. A Pass/Fail grade is awarded by the University of Sydney in this unit. Thus the marks obtained at the exchange university will not be included in WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

This is a unit for students who have gone on exchange.

### ELEC3904

#### Electrical Exchange Unit 2A

##### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Dr. Yash Shrivastava **Session:** Semester 2 **Classes:** A workload that is equivalent to one quarter of that of a (normal) full time student at the exchange university. **Assessment:** Assessment is set by the exchange university. A Pass/Fail grade is awarded by the University of Sydney in this unit. Thus the marks obtained at the exchange university will not be included in WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

This is a unit for students who have gone on exchange.

### ELEC3905

#### Electrical Exchange Unit 2B

##### Engineering and Information Technologies

**Credit points:** 12 **Teacher/Coordinator:** Dr. Yash Shrivastava **Session:** Semester 2 **Classes:** A workload that is equivalent to one half of that of a (normal) full time student at the exchange university. **Assessment:** Assessment is set by the exchange university. A Pass/Fail grade is awarded by the University of Sydney in this unit. Thus the marks obtained at the exchange university will not be included in WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

This is a unit for students who have gone on exchange.

### ELEC3906

#### Electrical Exchange Unit 2C

##### Engineering and Information Technologies

**Credit points:** 24 **Teacher/Coordinator:** Dr. Yash Shrivastava **Session:** Semester 2 **Classes:** A workload that is equivalent to that of a (normal) full time student at the exchange university. **Assessment:** Assessment is set by the exchange university. A Pass/Fail grade is awarded by the University of Sydney in this unit. Thus the marks obtained at the exchange university will not be included in WAM calculations. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

This is a unit for students who have gone on exchange.

### ELEC4505

#### Digital Communication Systems

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and a 2 hours lab/tutorial per week. **Prohibitions:** ELEC4502 Digital Communication Systems. **Assumed knowledge:** ELEC3505 Communications or ELEC3503 Introduction to Digital Communications. **Assessment:** Through semester assessment and an end of semester exam (approx. 70%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

Digitally modulated signals: non-linear modulation methods, continuous phase FSK, continuous phase modulation. Modulated carrier data transmission: QPSK, QAM, MFSK, MSK. Trellis coded modulation and modem technologies. Spread spectrum, including frequency hopping and CDMA principles. Plus selected topics from: Optical communication systems - single and multi-channel systems, performance criteria and systems analysis. Satellite communications systems. Cellular mobile radio systems.

### ELEC4605

#### Computer Architecture

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and a 2 hours lab/tutorial per week. **Prohibitions:** ELEC4601 Computer Design. **Assumed knowledge:** (ELEC1601 Professional Computer Engineering or ELEC1101 Foundations of Computer Systems) and (ELEC2601 Microprocessor Systems or ELEC3607 Embedded Computing) and (ELEC2602 Digital System Design or ELEC3601 Digital Systems Design or ELEC3608 Digital Systems Design). **Assessment:** Laboratory 5%, tutorial 5%, end of semester exam 90% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B C S T (Hons), B E, B I T, B I T (Hons), UG Study Abroad Program.

The digital systems design process. The design cycle. Top down design. Specification. Functional design. Structural design. Testing. Hardware description languages such as Verilog or VHDL. Digital systems architectures. Processors, buses and I/O devices. Synchronous, asynchronous and semi-synchronous buses. Bus interconnections. Memory and I/O interface design. Static and dynamic memory design. Memory interfacing. Interrupts. Vectored interrupts. Interrupt controllers. Parallel interface design. Serial interface design. Bus arbitration. Processor interfacing. IBM PC interfacing. PCB and packaging design, grounding, shielding and power distribution, some case studies.

### ELEC4702

#### Practical Experience

##### Engineering and Information Technologies

**Session:** Semester 1, Semester 2 **Classes:** Not applicable. **Prerequisites:** 24 credit points of level 3 or 4 units of study. **Assessment:** Submission of a written report. **Campus:** Camperdown/Darlington **Mode of delivery:** Professional Practice

**Associated degrees:** B E, UG Study Abroad Program.

Core unit of study for the degrees in Computer, Electrical, Software and Telecommunications Engineering and Electronic Commerce.

The Bachelor of Engineering degree requires students to obtain industrial work experience of twelve weeks (60 working days) duration towards satisfying the requirements for award of the degree. Students may undertake their work experience after completion of a minimum of 24 credit points of Year 3 units of study when they have built up a sufficient background of engineering. In general, the type of job that is acceptable for work experience should be in an engineering environment but not necessarily in the same discipline of the degree the student is pursuing. The student is required to inform the School of any work arrangements made by email.

Assessment in this unit is by the submission of a written report of about 4-6 pages on the industrial experience undertaken. The report is to describe the overall structure of the company, the areas that the student became familiar with and their relationship to the firm and, finally, what the student did. A certificate from the company stating the period of employment and the type of work you have undertaken

should be attached to your report. The student should inform the company that a short report on the work experience is to be submitted to the School.

The report is to be submitted to the School electronically (see details on the course website). There is no deadline for submission of the report but it is a good practice to submit it in the first two weeks after the new semester started.

#### ELEC4706

##### Project Management

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures per week. **Prohibitions:** ELEC4701 Project Management. **Assessment:** Take-home mini-assignments (20%), Assignment (20%), End of Semester Exam (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The various aspects of the design process, namely the following.

Engineering design. The design process. Understanding the client's problem. Functions and specifications. Finding answers to the problem. Reporting the outcome. Managing the design process. Design for manufacture, cost, reliability, quality and sustainability. Ethics in design.

#### ELEC4710

##### Engineering Project A

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** There are no lectures for this unit. However, the students are expected to spend at least one full day per week undertaking background research work, organizing their plan of work and preparing their experimental or developmental program. **Prohibitions:** ELEC4703, ELEC4705, ELEC4707 **Assumed knowledge:** 36 credit points of units of study from level 3 and above. **Assessment:** The progress at the end of Engineering Project A will be evaluated by the supervisor based on the thoroughness of the proposed program and the progress achieved during the semester. The student can only progress to Engineering Project B on attainment of a satisfactory result in Engineering Project A. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study builds on the technical competencies introduced in the previous years. The project work is spread over two units (Engineering Project A and B). In Engineering Project A, students are required to plan and begin work on their project and roughly complete half the work required for the whole 'final year' project. In particular, it should include almost all the planning, literature review, and a significant proportion of the experimental or analytical work required of the project. The student will prepare a Progress Report at the end of semester detailing the context of the problem, relevant background research and progress to date. The progress at the end of Engineering Project A will be evaluated by the supervisor based on the thoroughness of the proposed program and the progress achieved during the semester. The student can only progress to Engineering Project B on attainment of a satisfactory result in Engineering Project A.

In Engineering Project B, the students are required to complete the remaining aspects of the project, present their results to their peers and academic staff in a seminar format, and prepare and submit a detailed Treatise.

The final grade is based on the work done in both Engineering Project A and B, and will be awarded upon successful completion of Engineering Project B.

#### ELEC4711

##### Engineering Project B

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** There are no lectures for this unit. However, the students are expected to spend at least one full day per week to complete the remaining aspects of the project, and present their results in a seminar format, and prepare a detailed Treatise. **Prerequisites:** ELEC4710 Engineering Project A **Prohibitions:** ELEC4703, ELEC4705, ELEC4707 **Assumed knowledge:** 36 credit points of units of study from level 3 and above **Assessment:** Management 20%, Presentation 20% and Written Treatise 60%. The final grade is based on the work done in both Engineering Project A and B, and will be awarded upon successful completion of Engineering

Project B. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study builds on the technical competencies introduced in the previous years. The project work is spread over two units (Engineering Project A and B). In Engineering Project A, students are required to plan and begin work on their project and roughly complete half the work required for the whole 'final year' project. In particular, it should include almost all the planning, literature review, and a significant proportion of the experimental or analytical work required of the project. The student will prepare a Progress Report at the end of semester detailing the context of the problem, relevant background research and progress to date. The progress at the end of Engineering Project A will be evaluated by the supervisor based on the thoroughness of the proposed program and the progress achieved during the semester. The student can only progress to Engineering Project B on attainment of a satisfactory result in Engineering Project A.

In Engineering Project B, the students are required to complete the remaining aspects of the project, present their results to their peers and academic staff in a seminar format, and prepare and submit a detailed Treatise.

The final grade is based on the work done in both Engineering Project A and B, and will be awarded upon successful completion of Engineering Project B.

#### ELEC4712

##### Honours Thesis A

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** There are no lectures for this unit. However, the students are expected to spend at least one full day per week undertaking background research work, organizing their plan of work and preparing their experimental or developmental program. **Prohibitions:** ELEC4703, ELEC4705, ELEC4707 **Assumed knowledge:** 36 credit points of units of study from level 3 and above **Assessment:** The progress at the end of Honours Thesis A will be evaluated by the supervisor based on the thoroughness of the proposed program and the progress achieved during the semester. The student can only progress to Honours Thesis B on attainment of a satisfactory result in Honours Thesis A. The final grade is based on the work done in both Honours Thesis A and B, and will be awarded upon successful completion of Honours Thesis B. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study builds on the technical competencies introduced in the previous years. The project work is spread over two units (Honours Thesis A and B). In Honours Thesis A, students are required to plan and begin work on their project and roughly complete half the work required for the whole 'final year' project. In particular, it should include almost all the planning, literature review, and a significant proportion of the experimental or analytical work required of the project. The student will prepare a Progress Report at the end of semester detailing the context of the problem, relevant background research and progress to date. The progress at the end of Honours Thesis A will be evaluated by the supervisor based on the thoroughness of the proposed program and the progress achieved during the semester. The student can only progress to Honours Thesis B on attainment of a satisfactory result in Honours Thesis A.

In Honours Thesis B, the students are required to complete the remaining aspects of the project, present their results to their peers and academic staff in a seminar format, and prepare and submit a detailed Treatise.

The final grade is based on the work done in both Honours Thesis A and B, and will be awarded upon successful completion of Honours Thesis B.

#### ELEC4713

##### Honours Thesis B

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** There are no lectures for this unit. However, the students are expected to spend at least one full day per week to complete the remaining aspects of the project, and present

their results in a seminar format, and prepare a detailed Treatise. **Prerequisites:** ELEC4712 Honours Thesis A **Prohibitions:** ELEC4703, ELEC4705, ELEC4707 **Assumed knowledge:** 36 credit points of units of study from level 3 and above **Assessment:** Management 20%, Presentation 20% and Written Treatise 60% The final grade is based on the work done in both Honours Thesis A and B, and will be awarded upon successful completion of Honours Thesis B. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study builds on the technical competencies introduced in the previous years. The project work is spread over two units (Honours Thesis A and B). In Honours Thesis A, students are required to plan and begin work on their project and roughly complete half the work required for the whole 'final year' project. In particular, it should include almost all the planning, literature review, and a significant proportion of the experimental or analytical work required of the project. The student will prepare a Progress Report at the end of semester detailing the context of the problem, relevant background research and progress to date. The progress at the end of Honours Thesis A will be evaluated by the supervisor based on the thoroughness of the proposed program and the progress achieved during the semester. The student can only progress to Honours Thesis B on attainment of a satisfactory result in Honours Thesis A.

In Honours Thesis B, the students are required to complete the remaining aspects of the project, present their results to their peers and academic staff in a seminar format, and prepare and submit a detailed Treatise.

The final grade is based on the work done in both Honours Thesis A and B, and will be awarded upon successful completion of Honours Thesis B.

## ELEC5203

### Topics in Power Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and a 1 hour tutorial per week, 3 hours laboratory per week. **Assumed knowledge:** (ELEC3201 Electrical Energy Systems or ELEC3203 Power Engineering) and (ELEC3202 Power Electronics and Drives or ELEC3204 Power Electronics and Drives). **Assessment:** Laboratory work 25%, assignments 15%, end of semester exam 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims to give students a good understanding of some specialised areas in electrical power engineering. The unit assumes familiarity with basic mathematics and physics, a competence with basic circuit theory and some understanding of power plant such as transformers, transmission lines, etc, and of power electronics. Successful completion of this unit will lead to confidence in addressing practical industry problems.

The specific topics covered may vary somewhat from year to year. Possible topics include the following.

**Electromagnetic Transients.** Causes of electromagnetic transients-lightning, switching, faults; impact on insulation levels for high-voltage equipment; approaches to analysis-sources, switches, distributed and lumped components; using the transients-analysis program ATP; current research; typical examples, including demonstration of mitigation methods.

**Stability Problems.** Stability problems of electrical transmission systems; modelling of electrical plant and control equipment for stability studies, two axis theory of synchronous generators; stability analysis and system operation, the use of relevant software packages; dynamic stability, automatic voltage regulators and stabilisers; transient stability, the equal area criterion, digital simulation of large multi-machine systems, direct methods of analysis; current research into power system stability problems.

**AC Power Control.** DC- AC inverters: single phase and three-phase topology, voltage and frequency control, switching schemes, harmonics, rectifier mode of operation; applications of inverters: induction motor, synchronous motor and stepper-motor drives; static VAR control; active power filters; interconnection of renewable energy sources: photovoltaic array interconnection, wind and small hydro

interconnection; load leveling with energy storage system, STATCOM, DVR, UPFC, HVDC

**Power System Harmonics.** Sources of harmonics; Fourier analysis; three-phase concepts of balanced harmonics-symmetrical components, different sequences for different harmonic orders; special features of zero-sequence harmonics; a three-phase rectifier load as a source of harmonics; adverse effects of harmonics the need for limits; calculations of harmonic voltages produced by non-linear loads; modelling of power system elements for harmonic calculations; example involving a non-linear load and a capacitor bank, occurrence of resonance; possible mitigation measures.

## ELEC5204

### Power Systems Analysis and Protection

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours of lectures and a 1 hour tutorial per week, 3 hours laboratory per week. **Prohibitions:** ELEC4201 Electrical Power Systems. **Assessment:** Laboratory work 25%, assignments 15%, end of semester exam 60%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit provides the basis for the analysis of electricity grids using symmetrical components theory. It assumes familiarity with basic mathematics, competence with basic circuit theory and an understanding of three phase systems, transformers, transmission lines, etc.

The following specific topics are covered: The types and causes of power system faults; balanced faults and short circuit levels; an introduction to fault current transients in machines; symmetric components, sequence impedances and networks; the analysis of unsymmetrical faults. Review of the impact of faults on power system behaviour; issues affecting protection scheme characteristics and clearance times; the security and reliability of protection schemes; the need for protection redundancy and its implementation as local or remote backup; zones of protection and the need for zones to overlap; the analysis and application of over-current and distance relay protection schemes with particular reference to the protection of transmission lines.

## ELEC5205

### High Voltage Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours lecture and 3 hours lab per week. **Assumed knowledge:** ELEC3105 Circuit Theory and Design **Assessment:** Assignments 15% and Laboratory work 30%, final examination 55%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Recommended: ELEC5204 Power Systems*

**Associated degrees:** B E, Grad Cert E, M E S, M P E, UG Study Abroad Program.

The unit provides the basis of the fundamentals concepts of electromagnetic transients in power networks, high voltage equipment and its use in power systems, overvoltage and overcurrent in electrical networks and mitigation techniques, insulation of high voltage equipment and power systems apparatus and condition monitoring of power system apparatus.

Exposure to several state-of-art online monitoring techniques of power systems apparatus such as transformers and switchgear will ensure that students have knowledge of the latest industrial solutions to the management of the problems associated with overvoltage and overcurrent and the protection mechanisms used.

## ELEC5618

### Software Quality Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours lecture and 2 hours laboratory per week. **Prohibitions:** SOFT3302 Software Quality Assurance **Assumed knowledge:** A programming language, an operating system and IT project management. Ability to program in a high level language. **Assessment:** Final exam: 60% Practical work: 40%, includes programming assignments (20%), and weekly lab programming work (10%), and quizzes (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B C S T (Hons), B E, B I T, B I T (Hons), Grad Cert I T, Grad Dip I T, M Inf Tech, UG Study Abroad Program.

This unit will cover software quality planning, validation and verification methods and techniques, quality measurement and analysis, software standards and software process improvement and software reliability.

Students who successfully complete this unit will:

- understand the fundamental concepts of software quality,
- be able to assess the quality of a software design
- be acquainted with methods of building for quality
- be able to verify and test a unit of code

## ELEC5619

### Object Oriented Application Frameworks Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 hour Lecture and 3 hours laboratory per week. **Prerequisites:** INFO2120, INFO2110 Recommended unit: ELEC3610 **Prohibitions:** EBUS5003 E- Commerce Systems **Assumed knowledge:** Java servlets and JSP, Database programming. Ability to program in a high level language. **Assessment:** Quiz 10%, Project 40% and Final Exam 50%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

Large Internet systems are built using application frameworks. They allow great reuse so developers do not have to design and implement applications from scratch, as students have done in previous units. The unit lays down the basic concepts and hands on experience on the design and development of enterprise systems, emphasizing the development of systems using design patterns and application frameworks. A project-based approach will introduce the problems often found when building such systems, and will require students to take control of their learning.

A project-based approach will introduce the problems often found when building such systems, and will require students to take control of their learning. Several development Java frameworks will be used, including Spring, Hibernate, and others. Principles of design patterns will also be studied.

With the completion of the course the students will be able to:

- Evaluate the advantages and disadvantages of using domain specific frameworks, particularly for web applications.
- Deploy a large site using an application framework, and assess the differences between this type of software development and one with less reusability.
- Customize a Content Management System to particular user requirements.
- Write and Modify Java code using Spring and Hibernate in a web application.
- Compare different Web Application Frameworks available in the market

## EMHU3001

### Electron Microscopy and Imaging/Theory Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Anne Swan and Dr Alan Jones **Session:** Semester 2 **Classes:** Four 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** At least 12 cp of Intermediate Science units from any of the following: Anatomy & Histology, Biochemistry, Biology, Chemistry, Mathematics, Microbiology, Molecular Biology & Genetics, Pharmacology, Physics, Physiology or Statistics. For BMedSc students: either 36 cp of Intermediate units including BMed (2501, 2503 & 2505) or 42 cp of BMed Intermediate units including (2801, 2802, 2803 & 2806) **Assumed knowledge:** General concepts in Biology, and in Biochemistry or in Chemistry. **Assessment:** Two 1 hour exams, theoretical research assignment as a PowerPoint (TM) submission and protocol. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The course is run conjointly by the Department of Anatomy and Histology and the Electron Microscope Unit. The course will focus on the theoretical aspects of transmission and scanning electron

microscopy, the preparation of biological samples for electron microscopy, digital imaging, and freeze-fracture. Immunological and other techniques required in modern research and hospital electron microscope laboratories will also be covered. Students will also receive theoretical training in laser scanning confocal microscopy including the use of fluorescent probes to visualize cellular organelles and cellular processes. Students will undertake a theoretical research project of their choice which is of relevance to the course.

## EMHU3002

### Electron Microscopy and Imaging/Prac Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Anne Swan and Dr Alan Jones **Session:** Semester 2 **Classes:** Two 2 hour practicals and one 1 hour tutorial per week. **Prerequisites:** 12 cp as follows: 6 cp from ANAT2008 OR 4 cp from ANAT2001 plus at least 6 cp OR 8 cp respectively of Intermediate Science units of study. For BMedSci: Either 36 credit points of intermediate units including BMed (2501, 2503 & 2505) or 42 credit points of BMed Intermediate units including BMed (2801, 2802, 2803 & 2806) **Corequisites:** EMHU3001 **Assumed knowledge:** General concepts in Biology, Histology and in Biochemistry or in Chemistry. **Assessment:** Two 1 hour exams, practical reports, practical project assignment by PowerPoint (TM) submission and presentation (10 min). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com (Liberal Studies), B Com, LL B, B E, B Ec Soc Sc, B Ec Soc Sc, LL B, B Ed (Sec), B Sc, B Int S, B Med Sc, B Sc, B Sc (Adv), M B, B S, UG Study Abroad Program.

The course is run conjointly by the Department of Anatomy & Histology and the Electron Microscope Unit. The course will provide hands-on training in the operation of transmission and scanning electron microscopes, processing biological samples for electron microscopy, ultrathin sectioning, cryo-ultramicrotomy, freeze-fracture, electron diffraction, digital imaging, immunological and other techniques required in modern research and hospital electron microscope laboratories. Students will also learn the operation of laser scanning confocal microscopes, including the use of fluorescent probes to visualise cellular organelles and cellular processes. Students will apply their knowledge to complete a project of their choice on electron microscopy of a biological sample, from fixation of the sample to interpretation of the resulting electron micrographs.

### EMUS1601

#### Harpsichord 1

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 14 one-hour lessons/semester and performance workshops/week **Assumed knowledge:** It is assumed that students have some experience of standard harpsichord repertoire such as J.S. Bach's Preludes and Fugues and Scarlatti's Sonatas. **Assessment:** Teacher Grade 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific harpsichord repertoire in a chosen programme of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire. Students will also study and gain experience of basso continuo techniques, figured-bass realisation and score reading through the study of related chamber and orchestral repertoire and relevant pedagogical texts.

### EMUS1602

#### Harpsichord 2

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 14 one-hour lessons/semester and performance workshops/week **Prerequisites:** EMUS1601 Harpsichord 1 **Assessment:** Jury exam assessed by panel 10-15 mins (instrument specific); Teacher grade 50%, Panel grade 50%. Students must pass both assessed components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific harpsichord repertoire in a chosen programme of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire. Students will also study and gain experience of basso continuo techniques, figured-bass realisation and score reading through the study of related chamber and orchestral repertoire and relevant pedagogical texts.

### Recorder 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 14 one-hour lessons/semester and performance workshops/week **Assessment:** Teacher grade 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific recorder repertoire in a chosen programme of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire. Students will also study and gain experience of basso continuo techniques, figured-bass realisation and score reading through the study of related chamber and orchestral repertoire and relevant pedagogical texts.

## EMUS1642

### Recorder 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 14 one-hour lessons/semester and performance workshops/week **Prerequisites:** EMUS1641 Recorder 1 **Assessment:** Jury exam assessed by panel of 10-15 minutes (instrument specific) Teacher grade 50%, panel grade 50%. Students must pass both assessment components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific recorder repertoire in a chosen programme of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and

execution of new repertoire. Students will also study and gain experience of basso continuo techniques, figured-bass realisation and score reading through the study of related chamber and orchestral repertoire and relevant pedagogical texts.

## EMUS1651

### Viola Da Gamba 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 14 one-hour lessons/semester and performance workshops/week **Assumed knowledge:** It is assumed that students have some experience of standard viola da gamba repertoire from the French and German schools. **Assessment:** Teacher grade 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific viola da gamba repertoire in a chosen program of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire. Students will also study and gain experience of basso-continuo and related techniques through the study of related ensemble repertoire and relevant pedagogical texts.

## EMUS1652

### Viola Da Gamba 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 14 one-hour lessons/semester and performance workshops/week **Prerequisites:** EMUS1651 Viola Da Gamba 1 **Assessment:** Jury exam assessed by panel 10-15 mins (instrument specific). Teacher grade 50%, panel grade 50%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific viola da gamba repertoire in a chosen program of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire. Students will also study and gain experience of basso-continuo and related techniques through the study of related ensemble repertoire and relevant pedagogical texts.

## EMUS1661

### Early Keyboard Class 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 13 one-hour group classes **Assumed knowledge:** It is assumed that students have sufficient keyboard skills to perform at least the easiest of J.S. Bach's Two-part Inventions. **Assessment:** One 10-minute exam at end of semester - performance of three short works, realisation of a figured bass sequence and tuning and a 1000 word written assignment on a topic related to the repertoire. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

In this Unit of Study students will develop musical ideas and basic technical skills to play harpsichord repertoire in a chosen program of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting. Students will also study and gain experience of basso-continuo techniques, figured-bass realisation, improvisation and tuning.

## EMUS1662

### Early Keyboard Class 2

## Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 13 one-hour group classes **Prerequisites:** EMUS1661 Early Keyboard Class 1 **Assessment:** One 10-minute exam at end of semester - performance of three short works, composition and performance of a classical cadenza and a 1000-word written assignment on a topic related to the repertoire. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

In this Unit of Study students will develop musical ideas and basic technical skills to play classical repertoire on the fortepiano in a chosen program of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting. Students will also study and gain experience of improvisation and cadenza writing.

## EMUS1671

### Continuo 1

## Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 1 two-hour class per week **Assumed knowledge:** Standard 17th and 18th century repertoire and harmony. **Assessment:** 1 class presentation or performance and 1 written assignment 2000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

In this Unit of Study students will acquire essential foundations for successful and artistic basso continuo realisation. The Unit will be aimed at harpsichordists, lutenists, baroque cellists, viola da gambists and harpists, but will also be of great benefit to melody-line instrumentalists and singers. The Unit will include intensive study and application of figured bass principles, improvisation, ornamentation, score reading, harmonic hierarchy and its implications, and general principles of bass-line playing in relevant chamber and orchestral repertoire. Historical and stylistic awareness through research of relevant pedagogical texts, discussion and application will be a strong and on-going focus.

### Textbooks

### Baroque Flute 4

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 6-14 one hour lessons and/or up to 6 small group/masterclasses and performance workshops/wk **Prerequisites:** EMUS2623 Baroque Flute 3 **Corequisites:** EMUS2724 Baroque Flute 4 (Adv) - Dip Mus only **Assessment:** Jury/qualifying exam assessed by panel 15-25 minutes BMus 25 mins; BMusStud & BMus MusED 15 mins OR public recital at junior level assessed by panel 40 minutes (DipMus only) Teacher Grade 20%, Panel 80%. Students must pass both assessment components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In this Unit of Study students will develop musical ideas and requisite technical skills to perform to a high level specific baroque flute repertoire in a chosen programme of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting and independent in approach to analysis and execution of new repertoire. Students will also study and gain experience of basso continuo techniques, figured-bass realisation and score reading through the study of related chamber and orchestral repertoire and relevant pedagogical texts.

#### Early Keyboard Class 3

## Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 13 one-hour group classes **Prerequisites:** EMUS1662 Early Keyboard Class 2 **Assessment:** One 10-minute exam at end of semester - performance of three short works, realisation of a figured bass sequence and tuning and a 1000-word written assignment on a topic related to the repertoire. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

In this Unit of Study students will further develop musical ideas and technical skills to play harpsichord repertoire in a chosen program of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting. Students will also study and gain experience of basso-continuo techniques, figured-bass realisation, improvisation and tuning.

### EMUS2664

#### Early Keyboard Class 4

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 13 one-hour group classes **Prerequisites:** EMUS2663 Early Keyboard Class 3 **Assessment:** One 10-minute exam at end of semester - performance of three short works, composition and performance of a classical cadenza and a 1000-word written assignment on a topic related to the repertoire. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

In this Unit of Study students will develop musical ideas and basic technical skills to play classical repertoire on the fortepiano in a chosen program of study. Historical and stylistic awareness through research, discussion, and application will be a strong and on-going focus and students will also develop strategies in practice to be self-correcting. Students will also study and gain experience of improvisation and cadenza writing.

### EMUS2673

#### Continuo 3

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Neal Peres da Costa **Session:** Semester 1, Semester 2 **Classes:** 1 two-hour class per week **Prerequisites:** EMUS1672 Continuo 2 **Assessment:** 1 class presentation or performance and 1 written assignment 2000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: It is strongly advised that all bass continuo instrumentalists (harpsichordists, organists, fortepianists, lutenists, harpists and so on) take this Unit of Study with Principal Study 5.*

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

In this Unit of Study students will acquire essential foundations for successful and artistic basso continuo realisation. The Unit will be aimed at harpsichordists, lutenists, baroque cellists, viola da gambists and harpists, but will also be of great benefit to melody-line instrumentalists and singers. The Unit will include intensive study and application of figured bass principles, improvisation, ornamentation, score reading, harmonic hierarchy and its implications, and general principles of bass-line playing in relevant chamber and orchestral repertoire. Historical and stylistic awareness through research of relevant pedagogical texts, discussion and application will be a strong and on-going focus.

## ENGG1061

### Advanced Engineering 1A

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Prerequisites:** UAI score of at least 98 and good performance in HSC Maths, Physics and Chemistry. **Assessment:** A written report on the project undertaken and other oral and written presentations as specified **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: 1st year Interdisciplinary unit for all degree streams in Engineering.*

**Associated degrees:** B E.

The project is a major component of this unit of study. Students will be allotted to groups based on their preferences and will work on a particular project. Although the project will be supervised by a senior Faculty member, the emphasis here is on the team members setting and achieving their own goals, and presenting their work in both oral and written form. Groups will be expected to complete an engineering project by the end of Semester 1.

## ENGG1800

### Engineering Disciplines (Intro) Stream A

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 hours of lecture and one 3 hour laboratory session per week. **Assessment:** Technical assignments and laboratory reports. 3 hour examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T.

This unit aims to introduce students to the specialisations in the Engineering discipline areas of Aeronautical, Biomedical, Chemical, Civil, Mechanical and Mechatronic Engineering, and Project Engineering and Management.

Introductory sessions in the School of Aerospace, Mechanical and Mechatronic Engineering (4 weeks)

An overview of the degree requirements in each stream. The roles of the engineer in each stream (employments, skills, etc). How each of the subjects taught relate to the skills/knowledge and applications required of the engineers. Basically make sure students fully understand what engineers are in the discipline areas and why the students do the subjects they do.

In each stream, one engineering technical topic will be taught as a problem solving exercise, and this topic will be the focus of the laboratory.

School of Civil Engineering (4 weeks)

Introductory lectures in Engineering Economics and Construction Planning, Foundation Engineering, Structural Engineering, Materials, Environmental Engineering.

Each student will be involved in the erection and dismantling of an 8 metre high steel and timber tower in the Civil Engineering Courtyard. Preliminary lectures related to the tower will include safety issues, loading, statical analysis, foundation calculations, construction management, engineering drawings and detailing, geometric

calculations, and survey measurements. Exercises related to these issues will be performed before assembly and disassembly of the tower.

In the School of Chemical and Biomolecular Engineering, students will derive a deeper understanding of the drivers and issues associated with the design of products and processes and the role of chemical engineering in society. This module will provide students with the opportunity to utilise concepts including chemistry, physics, mathematics and mass and energy balance. The project in this module will involve the production demonstration of a specific product; eg., hydrogen fuel generation. Student will be able to explore this production process through a team-led paper study or tutorials and a laboratory-based experiment. Students will be given the opportunity to demonstrate their understanding and problem solving skills through a competition and through report writing.

## ENGG1801

### Engineering Computing

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hour of lectures and 2 hours of computer laboratory sessions per week. **Prohibitions:** MECH1800 Computational Engineering 1A; MECH1801 Computational Engineering 1C; INFO1000 Information Technology Tools; ISYS1003 Foundations of Information Technology; COSC1001 Computational Science in Matlab; COSC1002 Computational Science in C; INFO1003 Foundations of Information Technology **Assessment:** Assignments, quizzes and written exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

The unit will introduce students to fundamental principles of programming. The language used will be Matlab but the principles taught are readily portable to other languages like C and Java. The unit material will be presented in a manner which will help students to draw a connection between programming constructs and real engineering applications. The unit will use engineering inspired case-studies - especially from Civil, Chemical, Aerospace and Mechanical streams, to motivate new material. Besides introductory concepts like variables, arrays and loops, the unit will also introduce more sophisticated Matlab data structures like structs and cells. The extensive Matlab library for visualization will also be introduced. Matlab will cover two-thirds of the unit. The remaining one-third will be devoted to the use of Excel in engineering scenarios. Furthermore, cross integration between Matlab and Excel will also be highlighted.

*Textbooks*

1. Matlab: An Introduction with Applications by Amos Gilat
2. Matlab for Engineers by Holly Moore
3. Numerical Analysis Using Matlab and Excel by Steven Karris

## ENGG1802

### Engineering Mechanics

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two one hour lectures each week, Tutorials: 3 hours per week. **Assessment:** Quizzes and assignments. Assessment marks for assignments and quizzes will be based upon: Layout of the solution (communication); Solution method (clearly showing the students understands); Correct answer (worth no more than 10% of the mark) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E.

The unit covers the following topics: Introduction to Engineering Mechanics (or Newtonian Mechanics), vectors, forces, components; moments - 2D and 3D; free body diagrams; 2D equilibrium; 3D equilibrium; trusses, frames and machines; centroids and centres of mass; friction; bearings and wedges; beams - internal and external effects; distributed actions; fluid statics; virtual work; potential energy and stability. The unit aims to provide students with an understanding of and competence in solving statics problems in engineering. Tutorial sessions will help students to improve their group work and problem solving skills, and gain competency in extracting a simplified version of a problem from a complex situation. Emphasis is placed on the ability to work in 3D as well as 2D, including the 2D and 3D visualization of structures and structural components, and the vectorial 2D and 3D representations of spatial points, forces and moments. The unit is a building block for later mechanics-related units and

streams in Civil, Aeronautical, Space, Mechanical and Mechatronic Engineering, including Solid and Structural Mechanics (Civil and AMME), Soil Mechanics (Civil), Aerodynamics and Fluid Mechanics (Civil and AMME), Flight Mechanics (AMME), Propulsion (AMME), Manufacturing (AMME) and Dynamics (AMME).

### ENGG1803

#### Professional Engineering 1

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 1 hour lecture, 3 hour tutorial/project work (on average - varies week by week) **Assessment:** Individual assignments, group project (proposal, design, delivery), examination 2hour **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

The unit aims to create an awareness of the principles and processes of professional engineering (as per IEAust graduate attributes), including social, economic and environmental aspects; to immerse students in the practical application of these principles and processes through structured educational experiences; to establish the academic requirements for the accessing and communication of information (both written and oral); to expose students to the skills of problem identification, formulation and solution; to allow students to function, individually and in teams, as professionals-in-training.

The students will be able to have an understanding of the principles and processes of professional engineering, including group work; initial competence in the practical application of professional engineering principles and processes to meet challenges and grasp opportunities in social, economic and environmental areas; acquisition of the skills needed to function successfully in an academic environment; an understanding of the basics of the engineering problem solving; an understanding of the requirements of individual responsibility and team accountability, including time management, prioritising and decision making; demonstrated report writing and other communication skills, including information gathering.

The unit is structured around a project/design/build contest. The idea is to teach the students professional engineering aspects and then have them apply what they are learning to an engineering project.

Professional engineering topics to be covered include: accessing information, knowledge economy, creativity, teamwork, leadership, written and oral communication, problem solving, ethics, liability, occupational health and safety and environmental issues.

### ENGG1805

#### Professional Engineering and IT

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2hrs lectures and 2 hrs of lab per week **Assessment:** Quizzes 30%; Article review 15%; Oral presentation 15%; Labs 10%; Participation (attendance) 10%; Project 20% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims to teach students:

To make students aware of the nature of and processes involved in information technology and engineering, including social, environmental, professional and ethical aspects.

To help students to develop problem solving, research and information literacy skills.

To help students develop good writing and oral presentation skills.

To engage students in reflection and recording of their learning outcomes and experiences.

To help students to function, individually and in teams, as professionals-in-training.

Important Note:

This unit of study will provide students with coverage of the following topics required by ACS and Engineers Australia:

Communication skills

Professionalism and ethics,

Team work

Introductory project management

Generic skills will be developed in the following areas: Information Literacy, Personal and Intellectual Autonomy, Ethical, Social and Professional Understanding, Communication and Research and Inquiry.

Practical skills in written and oral communication and problem solving will be developed.

Upon successful completion of this unit of study students will be able to:

Demonstrate an appreciation of the tasks undertaken and roles filled by professionals working in information technology and engineering. Show evidence of understanding the similarities and differences between different sub-disciplines of IT and engineering.

Retrieve information about a specific topic using digital libraries and other sources and to evaluate its quality

Demonstrate ability to produce good quality written material and to be aware of professional expectations for written communication.

Demonstrate ability to deliver a good quality oral presentation and to be aware of professional expectations for oral communication.

Demonstrate a basic understanding of privacy and security issues in the information economy.

Explain the principles of intellectual property and to be aware of licenses, patents and other forms of protection for intellectual property.

Understand the principles of leadership and group work and be able to work effectively in a group to accomplish a task

Describe a systematic approach to problem solving and demonstrate ability to solve a problem solving in simple controlled situation

Describe basic principles of engineering and software design, including finding compromise between user specification, feasibility and cost.

Explain aspects of project management and make use of a suitable project management tool.

Explain issues relating to occupational health and safety in the engineering and computing workplace

Appreciate the importance of ethical behaviour in engineering and computing

### ENGG2004

Special project specified for individual requirement.

**ENGG2062****Engineering Project: Business Plan 2 Adv  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours tutorials per week for one semester. This Unit of study will be offered in either February or July Semesters. **Prerequisites:** Only students who have been named on the Dean's list at the end of Year 1 will be eligible. **Assessment:** A written report and oral presentations. Satisfactory tutorial performance is also required. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

Students will work in groups on a defined Industrial Project, or continue with one of the projects previously carried out in study ENGG1061. Each group will be expected to provide details and insight into how their findings could be used or exploited commercially. This unit of study is designed to provide students with an insight into engineering practice in industry. At the end of this unit, it is expected that students will be able to carry out the following tasks:

- analyse an industrial problem
- carry out the background research required to fully define and solve the problem
- work effectively as a team member at all stages of the project
- write a coherent report, outlining the problem and its solution, as well as making an oral presentation
- prepare a business plan with respect to an industrial or research project.

**ENGG3005****Engineering & Industrial Management Fund  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hrs lectures, 2 hrs tutorials per week. **Prohibitions:** ELEC3702, MECH3661 **Assessment:** Tutorial and project assignments plus a final (2 hour) examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T.

Year 2 core unit of study for the "Management" stream within the degrees in Aeronautical, Chemical, Electrical, Mechanical and Mechatronics Engineering. Engineers and management; communication; micro-and macro-economics; strategic management; business planning; legal responsibilities; industrial hazard management; human resource management; industrial relations; project management; quality assurance; operations management; accounting and financial management. This unit is to introduce students to a range of management concepts and techniques, and to develop an understanding of the role and challenges of management.

**ENGG3062****Technology Education (Advanced)  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours tutorials per week for one semester. **Prerequisites:** Only students who have been named on the Dean's list at the end of Year 2 will be eligible. **Assessment:** A written report and oral demonstrations. Satisfactory tutorial performance is also required. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

Students will work in a group to develop an educational unit for Year 9 High School Students which will involve them in some aspect of engineering science or technology and which will, at the same time, raise an awareness of, and an interest in, engineering. The units will need to be designed with due regard to the teaching and learning process. Activities undertaken as part of the units should reflect, wherever possible, aspects of professional engineering practice.

This elective will help understand engineering principles and applications by investigating, explaining and practising them with Year 9 school students. At the end of this elective it is expected that students will be able to: Investigate, identify, design, develop, implement, and evaluate experiential activities for non-engineers which reflect engineering practice; Develop skills in the management and

use of personal and material resources and processes; Effectively communicate engineering principles and practices to others. Present work in written, graphical, and oral forms.

**ENGG4006****Adv Professional Eng Managemt & Practice  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1(2 hr) lecture and 1 (2 hr) tutorial per week **Prerequisites:** ENGG1803 **Assessment:** 70% course work and 30% final examination. Course work will be a combination of written assignment and oral presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

The concepts covered in this UoS are from the following management areas:

Reflective personal and management practice, Globalisation and International Competitiveness, Strategic Management, Technology Management & Strategy, Workplace Relations and Work Organisation, Innovation, Environmental Management, Intellectual Property, Organisational Change, The Role of Government.

This broad range of topics is covered so as to familiarise students with these areas of management practice that they can be expected to become professionally proficient in.

**ENGG4061****Innovation/Technology Commercialisation  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1.5 hour lecture/1.5 hour seminar per wk **Assessment:** Profile of an innovation, case studies of innovative companies, mid-term quiz, launching a start-up company project, final exam project. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T.

This unit is designed as a 'Master Class' for final year Engineering students to grapple with the challenges of engaging in, facilitating and managing innovation and technology commercialisation. Key learning outcomes are: developing an understanding of the processes of management, and in particular of innovation, dealing with uncertain and inadequate information, how to communicate effectively to and motivate a group of people to work out what to do, and how to do it.

Introduction to challenges of modern management; understanding of the new rules of international competitiveness; effects of globalisation on Australia's economic performance; the competitiveness of Australian firms; the generation of employment and wealth; the changing requirements on the engineer; the engineer as manager and strategist; the role of innovation in business management; product innovation and commercialisation; IP recognition and management; starting a high-tech company.

**ENGG4064****Advanced Engineering Design A  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Literature Survey, project formulation and detailed design of a major integrated facility to be carried out in interdisciplinary groups in Semester 2. **Prerequisites:** Only students on the Dean's List at the end of Year 3 will be invited to join this interdisciplinary group **Assessment:** Assessment will be on the basis of a written report, oral presentations, poster and peer review. Satisfactory tutorial performance and group participation is required. This unit of study can be taken as an elective for all engineering degrees. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: This unit is not timetabled as it crosses so many Schools. Individual teams negotiate suitable weekly meeting times once the teams are organized.*

**Associated degrees:** B E.

The aim to this unit is to develop an understanding of the practice of engineering, utilising a diverse range of skills to solve complex problems. Students will gain skills in design, analysis and management by undertaking a significant project in a multi-disciplinary team

comprising students from across the faculty. Each student will be required to work in a team to

produce an integrated design in greater detail than is possible in ordinary classes and to write a significant design report presenting the results of the process. The ability to work in a team of engineers from different disciplines will be assessed as part of this design project. We try to centre projects around a client, which can be an industrial facility, the Campus and Property Services Office of the University, Research departments within the university, or outside clients (e.g. Nature Conservation Council NSW).

Elements drawn from: Introduction to the design process, Clarification of the Brief, Inquiry, brainstorming, Design philosophy,

Design optimization, Equipment design and costing, Hazard assessment, Environmental Impact Assessment, Project financial Analysis, Business planning.

## ENGG4065

### Advanced Engineering Design B Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Literature Survey, project formulation and detailed design of a major integrated facility to be carried out in interdisciplinary groups in Semester 2. **Prerequisites:** This unit is an extension module for students in ENGG4064. So only students on the Dean's List at the end of Year 3 will be invited to join this interdisciplinary group. **Assessment:** Assessment will be on the basis of a written report and oral presentations. Satisfactory tutorial performance and group participation is also required. This unit of study can be taken as an elective by negotiation for all engineering degrees. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

The unit aims to extend and deepen the understanding of the practice of engineering, gained in ENGG 4064 by undertaking this course as a parallel module. The intention is that this 12 credit point module may allow a student to undertake a body of work which is comparable to a thesis. It would need to involve an extensive process of inquiry and synthesis. In order to undertake this module approval of the Department and Engineering Faculty is required, so students who are interested in perusing this option MUST negotiate a suitable project and the likely deliverables during Semester 1.

## ENGL1002

### Narratives of Romance and Adventure Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr L Warner **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Assessment:** One 1500 word essay, end of semester exam(1500 words), assignment (1000 words), oral presentation and tutorial participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ec (Soc Sc), B Int S, B Sc, B Com, UG Study Abroad Program.

This unit explores the art of narrative from Greek and Roman antiquity to the present. What makes Homer's *Odyssey* and Ovid's *Metamorphoses* defining texts for the history of narrative? Why are the early masters of English narrative so compelling? How does a film like *O Brother, Where Art Thou?* fit in? Issues of particular relevance include the nature of epic, myth and satire; the unfolding of adventure and gender relations; the history of Britain; and the nature of humankind.

#### Textbooks

Shakespeare, *Cymbeline*  
Swift, *Gulliver's Travels*  
Coen brothers (film), *O Brother, Where Art Thou?*  
Unit Resource Book, including:  
Homer, *Odyssey*, extracts; Ovid, *Metamorphoses*, extracts; Weland  
Sir Orfeo; Malory, *Morte d'Arthur*, extracts  
Marlowe, *Hero and Leander*; Narrative theory readings

## ENGL1007

### Language, Texts and Time Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr N Riemer **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Assessment:**

Two 500 word assignments, one 2000 word essay and one 1.5 hour exam  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Media & Comm), B Int S, B Lib Stud, Dip Arts, UG Study Abroad Program.

This course equips students with some general tools for the close analysis of literary language. Grammatical concepts will be introduced and applied to the description of prose, poetry and drama, and students will explore the changing relations between form and meaning in English from the earliest times up to the present. A number of key strands in contemporary language study will also be presented, including semiotic theory, rhetoric and discourse studies and theorizations of the relationship between texts and subjectivity.

#### Textbooks

Collins, Peter & Carmella Hollo: *English Grammar, An Introduction* (Palgrave, 2000)

A Resource book will be available from the University Copy Centre.

## ENGL1008

### Australian Texts: International Contexts Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr B Brennan **Session:** Semester 1 **Classes:** Two 1hour lectures and one 1hour tutorial per week **Assessment:** 1000 word in-class assessment (10%) ; 1500 word essay (45%) ; 1.5hour exam (45%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

This unit explores how Australian authors write in, to and about the wider world. It will open up a range of questions: how international influences work in Australian writing; how Australian texts rewrite authoritative texts of other cultures; how Australian texts imagine other places; how careers, reputations, publication and reception take place within and beyond the nation. In addressing these questions, the unit will focus on issues of authority, identity, representation, translation, borders and authenticity.

#### Textbooks

Brian Castro, *After China*  
Gail Jones, *Dreams of Speaking*  
Dorothy Porter, *Akhenaten*  
John Romeril, *The Floating World*  
Patrick White, *The Twyborn Affair*  
Resource book containing poems, short stories and excerpts from larger texts required for study.

## ENGL1025

### Fiction, Film and Power Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr S Gleeson-White **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Assessment:** One tutorial presentation, one 1000 word essay and one 1500 word essay and a 1 1/2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Arts, UG Study Abroad Program.

A fundamental feature of the modern world is the predominance of media and communication technologies over older, and increasingly anachronistic, "book" cultures. This course looks at the consequences of such a shift for our sense of identity and place by focusing on translations from text to film. A principal theme will be the relations between narrative form and visual experience, with an eye always on the social contexts in which images become a form and source of power. The course will also serve as an introduction to the critical vocabulary used to understand late modern society.

#### Textbooks

Raymond Chandler, *The Big Sleep*  
Nathanael West, *The Day of the Locust*  
Patricia Highsmith, *The Talented Mr. Ripley*  
Peter Carey, *Bliss*

## ENGL1801

### English Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point junior unit of study in English at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Director of Undergraduate Studies.

## ENGL1802

### English Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point junior unit of study in English at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Director of Undergraduate Studies.

## ENGL2623

### Twentieth Century Literature: Modernism Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr B Spurr **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial **Prerequisites:** 12 Junior credit points of English **Prohibitions:** ENGL2023 **Assessment:** One 2500 word essay and one 2 hour examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

Modernism is a complex phenomenon, categorising a range of innovative literary (and other artistic) works, produced principally in Europe, Britain and America in the early twentieth century. Modernist writers strove to find new ways of representing the momentous cultural and technological changes of this period. This unit focuses on representative Modernist texts, setting them in their larger historical and aesthetic contexts and also investigates the history of Modernism as an academic subject and its various reappraisals.

#### Textbooks

The Norton Anthology of Poetry  
Joyce, *Ulysses*  
Shaw, *Heartbreak House*  
Faulkner, *As I Lay Dying*  
Hemingway, *The Sun Also Rises*

## ENGL2629

### Victorian Literature Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr V Smith **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of English **Prohibitions:** ENGL2029 **Assessment:** One 3000 word essay and one 1.5 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

An exploration of literature, culture and Empire in the Victorian period. The course will develop detailed, historicised readings of key Victorian literary texts. Areas of focus will include Victorian morality, the country and the city, Evolution and the novel, the politics of Empire, and 'Victorian Things'.

#### Textbooks

Additional material will be included in a course reader and/or on WebCT.

## ENGL2638

### Literature and Cinema Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr D Kelly **Session:** Semester 1 **Classes:** One 1 hour lecture and one 2 hour seminar per week **Prerequisites:** 12 junior credit points of English **Prohibitions:** ENGL2038 **Assessment:** Oral presentation, one 2000 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study will examine issues arising from a comparative study of literature and cinema. These issues include: continuities and discontinuities between literature and cinema; the forms and modes of literature and cinema; the questions of adaptation, intertextuality and genre; the cultural and historical contexts of literary and cinematic texts; the figurative styles of literature and cinema; and narrative and narration in literature and cinema.

Jonze: *Adaptation*

## ENGL2640

### Shakespeare Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr H Griffiths **Session:** Semester 2 **Classes:** Two 1hour lectures and one 1hour tutorial per week **Prerequisites:** 12 junior credit points of English **Prohibitions:** ENGL2040 **Assessment:** Tutorial participation (10%); 2000 word essay (50%); 2 hour Exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit is an intensive study of plays by Shakespeare in a variety of genres, particularly focusing on current critical interventions, as well as the detailed reading of Shakespeare's dramatic language. Current approaches to Shakespeare read his texts as a way of thinking about ideas of urgent concern in the twenty first century: the environment and ideas of the natural; sexuality and gender; scepticism and belief. Watching film versions of the plays will form an integral part of our study.

#### Textbooks

The Norton Shakespeare, gen. ed. Stephen Greenblatt

## ENGL2652

### Modern Rhetoric Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr R Johnke **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of English **Prohibitions:** ENGL2052 **Assessment:** One 2,500 word essay and an exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: May be cross listed to a major in Linguistics*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit will introduce students to both the theory of rhetoric: the study of human communication, and the practice of rhetoric: the use of language, signs and silence to convey a particular message. It will trace the development of modern theories from classical and later ideas about rhetoric, and teach students to analyse and improve their own written and spoken communication. Students will learn to pay close attention to language, context, and audience. They will develop skills in analysis, interpretation and composition that apply to academic and professional communication as well as literary study.

#### Textbooks

A Resource book will be available from the University Copy Centre

## ENGL2653

### Varieties of English Grammar

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr N Riemer **Session:** Semester 1  
**Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points in English or Linguistics **Prohibitions:** ENGL2053  
**Assessment:** One 3000 word essay and one 1.5 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit introduces students to various ways of talking about English grammar - systemic, generative, traditional among others - and asks them to consider why we might choose one approach or another for tasks such as text interpretation. The unit also introduces students to the history of grammar as a discipline in the European tradition, with a particular focus on the development of grammars in English. This will provide useful background for a detailed examination of the dominant traditions in grammar theory since 1900.

### Textbooks

A course reader will be available from the University Copy Centre.

## ENGL2657

### Myths, Legends and Heroes

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr D Anlezark **Session:** Semester 1, Summer Main **Classes:** One 1hour lecture and one 1hour tutorial per week. **Prerequisites:** 12 Junior credit points of English **Assessment:** Essay (2500 words), Exam 2 hours (2000 words) Tutorial exercise (1500 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

Students will study (in modern English translation) the literature of two closely related peoples of the Early Middle Ages -- the Anglo-Saxons and the Scandinavians (some of whom became Vikings). Lectures and tutorials will cover the literature, history, religion and language of these nations, focusing on representations of the heroic ideal, as this is embodied in mythic, legendary and historical writing. Texts to be studied include Beowulf, The Wanderer, The Dream of the Rood, and selections from the Edda.

### Textbooks

Beowulf (trans. R. Liuzza)  
 Course Reader

## ENGL2658

### Love and Desire in Early Modern England

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr H Griffiths **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 junior credit points in English **Assessment:** One 2000 word essay and one 2500 word take-home exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit looks at the languages used to investigate love and desire in the early modern period. This will involve reading texts by Shakespeare and other canonical writers that you might not be so familiar with. You will be encouraged to discover relationships between emotion, poetic language, rhetoric and sexuality and to entertain the idea that desire is political and that politics are sexualised.

### Textbooks

Shakespeare, Romeo and Juliet (Ed. Jill Levenson)  
 Shakespeare, Complete Sonnets and Poems (Ed Colin Burrow)  
 Early Modern Women Poets, An Anthology (Ed. Stevenson and Davidson)  
 Other texts will be supplied through online course readings

## ENGL2659

### The 18th Century: Scandal & Sociability

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr N Parsons **Session:** Semester 2 **Classes:** One 1hour lecture and one 2hour seminar per week. **Prerequisites:** 12 junior credit points in English **Assessment:** One 2500 word essay and one 2000 word take-home exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit examines the development of literature during the eighteenth century through two important literary and social figurations: scandal and sociability. We will investigate tropes of conversation, politeness and community as constituents of literary texts as well as components of the spaces in which they were consumed. In addition, we will examine current theories regarding the development of a public sphere and the shifting social and cultural location of reading.

## ENGL2660

### Reading the Nation: Modern U.S. Writing

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr S Gleeson-White **Session:** Semester 1 **Classes:** One 1hour lecture and one 1hour tutorial per week. **Prerequisites:** 12 Junior credit points of English **Assessment:** One 1500 word close-reading exercise, one 2500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

In this unit, we will read some of the most significant American novels and short stories of the mid-20th century. We will examine the way in which a range of writers has responded imaginatively to some of the major cultural and historic events of this period. Our specific focus will be in the way in which these writers have imagined the nation in terms of race, gender and place.

### Textbooks

Ralph Ellison, Invisible Man  
 Cormac McCarthy, Outer Dark  
 Flannery O'Connor, selected short stories  
 Leslie Marmon Silko, Ceremony  
 Richard Wright, selected short stories

Such students must seek approval for their proposed course of study from the Director of Undergraduate Studies in the Department of English.

### ENGL3604 Cinematic Modernism Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Hardie **Session:** Semester 1 **Classes:** One 2 hour seminar per week **Prerequisites:** Credit or above in 18 senior credit points of English **Assessment:** One 3000 word essay and six 500 word blog entries. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit will explore the effects of the film medium on the existing cultural technologies of literature in the first half of the twentieth century. We will ask how technical possibilities only partially explored by their native medium were transmitted freely into others: poetry, prose, theatre. Blending film history with literary history, and ranging both alongside pivotal works in the cultural theory of modernism, the unit will equip students with an inter-media perspective on cultural change and transposition.

#### Textbooks

Le sang d'un poète (dir. Cocteau)  
Rose Hobart (dir. Cornell)  
Berlin, Symphony of a City (dir. Ruttmann)  
Piccadilly (dir. Dupont)  
Man With the Movie Camera (dir. Vertov)  
King Kong (dir. Cooper)  
The Fountainhead (dir. Vidor)  
Short films (dir. Charles and Ray Eames)  
Tokyo Story (dir. Ozu)

Gertrude Stein, Operas and Plays  
Ernest Hemingway, The Short Stories  
Wyndham Lewis, Tarr or The Revenge for Love (depending on availability)

### ENGL3605 Canonical Poetry Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr B Spurr **Session:** Semester 1 **Classes:** One 2hour seminar per week. **Prerequisites:** Credit or above in 12 senior credit points of English **Assessment:** One 3000 word essay, one 1000 word class discussion paper and one 2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit examines the concept of canonicity, with regard to poetry in English, from the Renaissance to the present. Issues to be addressed include: What does 'canonical' mean? How and why have certain poems (and poets) come to be (and ceased to be) 'canonical'? What qualities of theme and technique determine canonicity and by whom are they determined? How (if at all) has the potential for canonicity influenced the composition of poetry?

#### Textbooks

The Norton Anthology of Poetry, fifth edn.

### ENGL3606 Fantastical Women Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr J Shaw **Session:** Semester 2 **Classes:** One 2hour seminar per week. **Prerequisites:** Credit or above in 12 senior credit points of English **Assessment:** Annotated Bibliography 2000 words; Presentation discussion and report 1500 words; Essay 2500 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Fantasy provides a space for women writers to explore alternative configurations of self and community. Contemporary fantasy texts by women will be considered, including rewritings of historical legends and fairy tales, and social science fiction. The focus will be on texts which open up the cultural order to illegality and disorder, which explore the forbidden or repressed, and which defamiliarise the familiar. Texts will be read through theorisations of the fantastic and feminism. Fantasy provides a space for women writers to explore alternative configurations of self and community. Contemporary fantasy texts by women will be considered, including rewritings of historical legends and fairy tales, and social science fiction.

## ENGL3612

### English Language and Literary Theory B

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr N Riemer **Session:** Semester 2 **Classes:** One 2 hour seminar per week **Prerequisites:** Credit or above in 12 senior credit points of English **Assessment:** Two x3000 word essays **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

Metaphor. Metaphorical language challenges received understandings of the nature of linguistic communication since it constitutes a systematic case in which expressions are not used in accordance with their meanings. This unit adopts a variety of perspectives to explore the problem of metaphor in an articulated theory of the semiotics of language. Topics discussed include the literal/metaphorical split, the nature of metaphorical meaning, metaphor and language-use, the origins of metaphor within European metalinguistic discourse, and 'cognitive' theories of metaphor.

Course reader available from the University Copy Centre.

## ENGL3633

### Introduction to Old English

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr D Anlezark **Session:** Semester 1 **Classes:** One 2hour seminar per week. **Prerequisites:** Credit or above in 12 senior credit points of English **Prohibitions:** Students who have completed ENGL3621, ENGL3622, ENGL3631, ENGL3632 must consult co-ordinator. **Assessment:** Class exercises, one 3000 word essay and one 2 hour examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Old English was the language of England from the fifth century until the twelfth. This earliest phase of the English literary tradition evolved against a background of cultural encounters: as the Anglo-Saxons encountered the culture of Rome, as they adopted and adapted the Christian religion, and as they reflected on their origins on the European continent. This unit introduces students to the language spoken and written by the Anglo-Saxons, and presents the opportunity to translate and read Old English texts.

A Guide to Old English (Mitchell and Robinson, 7th edition)

## ENGL3634

### Continuing Old English

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr D Anlezark **Session:** Semester 2 **Classes:** One 2hour seminar per week. **Prerequisites:** ENGL3633 **Prohibitions:** Students who have completed ENGL3621, ENGL3622, ENGL3631, ENGL3632 must consult co-ordinator **Assessment:** Class exercises, one 3000 word essay and one 2hour examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

The literature of the Anglo-Saxons offers an insight into a range of understandings of the place of human beings in the world and its history. This course will build on students' elementary knowledge of the Old English language, and offer students the opportunity to translate and read a range of texts including historical prose, love poetry and religious texts. These texts will be studied in a range of contexts, from the cultural and historical to their manuscript setting.

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

Christopher Marlowe. This study of Marlowe's poems and plays gives particular attention to their place in the crises and debates of late-sixteenth-century England. It interrogates Marlowe's ambiguous position on the borderland between heterodoxy and orthodoxy (sexual, political, religious). It examines his construction and/or subversion of an Elizabethan "other" (sodomitical, Jewish, papist, barbarian). It tracks his re-writing of Roman poetry and medieval drama, and his experiments in tragedy, comedy and the presentation of radical ideas.

Aesthetics and Aestheticism. This unit considers the interrelated literary, philosophical, and visual arts traditions of aesthetics from the mid-eighteenth century to the early twentieth century. Its philosophical emphasis will be on Kant and Hegel. Its visual arts emphasis will be on Ruskin and Pater. Its literary emphasis will be more comprehensive, stretching from the Age of Sensibility to High Modernism, though paying special attention to the aesthetes and decadents of the late nineteenth century.

Kant. Critique of the Power of Judgment. trans. Guyer & Matthews (Cambridge).  
 Hegel. Introductory Lectures on Aesthetics. trans. Bosanquet (Penguin).  
 Ruskin. Modern Painters, part 5: Of Mountain Beauty, excerpts in Resource Book available from the Copy Centre.  
 Pater. The Renaissance. Wilde. The Picture of Dorian Gray. Wells. The Time Machine. Norton Anthology of Poetry.

### ENGL3962

#### English: The Text and the Critic Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr H Griffiths **Session:** Semester 1  
**Classes:** One 2 hour seminar per week **Prerequisites:** Credit or above in 18 senior credit points of English **Corequisites:** either ENGL3961 or ENGL3964 **Prohibitions:** ENGL3910, ENGL3920, ASLT3602 **Assessment:** One 2000 word assignment and one 4000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

What is criticism and what prompts it? How have literary texts, along with their writers, readers, and critics, been regarded in classical, medieval, modern, and contemporary cultures? How have texts solicited, accepted, and contested such critical regard?

#### Textbooks

Norton Anthology of Theory and Criticism. ed. Leitch & others.  
 Resource book available from the Copy Centre.

### ENGL3964

#### English Studies: Research Methods Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr H Griffiths **Session:** Semester 2  
**Classes:** One 1 hour lecture and one 1 hour tutorial per week **Prerequisites:** Credit or above in 18 senior credit points of English **Corequisites:** ENGL3962 **Prohibitions:** ENGL3961, ASLT3601 **Assessment:** Two 1500 word

assignments and one 3000 word journal-style essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit is one of two special entry units required for admission to English Honours and lays the foundation for research into literary and language studies. It examines the material characteristics of writing and also focuses on the methods of literary and language research according to their characteristic kinds of interest, evidence, argument, and rhetoric, in both spoken and written debate. It is specifically designed to prepare students to undertake their thesis work in the honours year.

#### Textbooks

Williams & Abbott. Introduction to Bibliographical & Textual Studies (MLA).  
 Slade. Form and Style (Houghton Mifflin).  
 Resource book available from the Copy Centre.

### ENGL4101

#### English Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr H Griffiths **Session:** Semester 1, Semester 2 **Prerequisites:** Credit average in 48 senior English points, including the two special-entry units, ENGL3962 and ENGL3964, and two Advanced units on topics other than twentieth-century literature and film (that is, any except ENGL3601, ENGL3603, ENGL3604) **Assessment:** One 15000 word thesis, worth three eights of the total mark; and the equivalent of 5000 words in each of five coursework options, together worth the other five eights of the total mark. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), Dip Arts(Hons).

As an English Honours candidate you write a thesis of 15000 words, or undertake an editorial or bibliographical project of comparable scope and sophistication, under the supervision of a member of the Department who has some expertise in the field you choose to work in. You will be offered a series of workshops and colloquia on scholarly research and writing. Your thesis will be due at the end of the October recess. You choose five semester-long coursework options, three in the first semester, two in the second. For one of your first-semester options - whichever one you choose - you present your work in the form of a twenty-minute paper you give at a Departmental Honours Conference. Among the five options you choose you may include as many from among the English Honours options and Australian Literature Honours options as you like, but at most two from among the English Advanced units. If your interests and achievements are sufficiently multi-disciplinary, you may undertake a Joint Honours program, half of it under the auspices of the English Department, half under those of another. If you do, your plans will have to be approved in advance by the Honours Coordinators of both Departments.

Semester 1:

1. Medieval Languages 1: Old English

Dr D Anlezark.

Students are normally required to have completed at least two semesters' work in Old English. In this option advanced students of Old English will have the opportunity to read the epic poem Beowulf. Old Norse-Icelandic: subject to staff availability. In this option advanced students of Old Norse-Icelandic will have the opportunity to read a substantial saga and/or mythological or heroic poetry. Old Irish and Middle Welsh will be available in this option's Semester 2 counterpart (subject to staff availability).

Langland

Dr L Warner

Langland's Piers Plowman is one of the most important works of the Western literary tradition-part allegory, part satire, part quest, and all compelling. Among its most prominent readers have been Geoffrey Chaucer, Edmund Spenser, and Thomas Jefferson; among its effects on the world was the beheading of the archbishop of Canterbury in 1381. Using a glossed Middle English edition, we will examine the

poem's historical, literary, generic, and gendered contexts, as well as its fascinating textual history and reception.

The Shape of Things To Come: Utopian Social Dreaming

Dr P Marks

Beginning with HG Wells's classic A Modern Utopia (1905), the unit fast forwards in time, examining literary and cinematic utopias and dystopias from the past two decades. The unit explores the history, politics and aesthetics of the utopian genre (understood here to include dystopias), and focuses on topics such as state, religious and corporate power, the impact of technology, genetics, ecology, gender politics, agency and identity, liberty, and surveillance. It examines the ways in which the social dreams of some are the social nightmares of others.

Texts: (You are not expected to purchase the films)

H.G. Wells, A Modern Utopia; Damien Broderick, The Spike; Andrew Niccol (director), The Truman Show; Neal Stephenson, Snow Crash; Michael Winterbottom (director) Code 46

Margaret Atwood, Oryx and Crake; Alfonso Cuarón (director) The Children of Men; Kim Stanley Robinson, Pacific Edge

The Eighteenth Century Novel: Theory and Practice

Dr N Parsons.

This unit of study investigates the development and circulation of the novel during the eighteenth century. We will be reading novels that have since been canonised as well as material normally excluded from the story of the novel's rise, such as whore narratives and the popular genre of it-narratives (stories told from the point-of-view of an object or animal). We will be considering this material through a number of theoretical lenses, including those provided by Michael McKeon, Lennard Davis and Catherine Gallagher.

Mid-Century Modern

Dr K Lilley

This course focuses on the dynamic interactions of poetry, mass media, design and visual arts in mid-century America with particular attention to the experimental reworking of aesthetic hierarchies and to discourses of confession, psychotherapy, liberation, sexual identity and sexology, and cosmopolitanism. The set-texts will be supplemented by material made available through web ct and in class.

Texts:

Paul Hoover (ed) Postmodern American Poetry (Norton); Hettie Jones, How I Became Hettie Jones (Grove); Sylvia Plath, Ariel: The Restored Edition; Joe Brainard, I Remember (Granary Books); Marnie (d. Hitchcock, 1964); Midnight Cowboy (d. Schlesinger 1969)

Semester 2

1. Medieval Languages 2: Old English

Dr D Anlezark.

Further work in Old English texts. Old Norse-Icelandic: subject to staff availability. Further work in Old Norse-Icelandic texts. Old Irish and Middle Welsh: subject to staff availability. Major medieval prose and verse genres.

The Idea of the South

Dr S Gleeson-White

The American South is frequently conceived as the Problem South, a regional aberration defined by its "exceptional" experiences of military defeat and occupation, and economic backwardness and a brutal slave legacy. Although once charged with being the "Sahara of the Bozarts," the American South has in fact produced some of the most exciting cultural texts of the last hundred years. In this course, we will investigate the idea of the South in a range of literary and visual texts from the 1930s onwards, by examining its most compelling tropes - such as the southern belle, poor whites, and the plantation - in order to contemplate, among other things, the region's fundamental importance to conceptions of "America" itself.

Texts may include:

William Faulkner, The Sound and the Fury (1929); Cormac McCarthy, Child of God (1973); Carson McCullers, The Ballad of the Sad Café (1951); Cynthia Shearer, The Celestial Jukebox (2005); selected short

stories of Eudora Welty (1941), Richard Wright (1948) and Alice Walker Films: *Stranger with a Camera* (dir. Elizabeth Barret, 2000); *When the Levees Broke: A Requiem in Four Acts* (dir. Spike Lee, 2006)

History in English: Lyric, Epic, and Dramatic

Dr B Gardiner.

This option examines the writing of history in verse, drama, and prose, from the late sixteenth to the nineteenth century, focussing on the interrelations of English literature and English historiography.

Texts:

Shakespeare, *The Tragedie of Richard the Second* (1597, 1608, 1623); Bacon, *The Historie of the Raigne of King Henry the Seventh* (1622); Gibbon, *The Decline and Fall of the Roman Empire*, chapters 1-16 (1776); Burke, *Reflections on the Revolution in France* (1790); Carlyle, *The French Revolution* (1837); Macaulay, *The History of England* (1849-1861), abridged by Trevor-Roper

Resource book containing the following texts:

Spenser, "The Ruins of Rome," *Complaints* (1591); Samuel Daniel, from *The Civile Wars* (1595-1609); Dryden, poems about English politics (1658-1688); The Indian Emperor (1665); Wordsworth, from *The Prelude: "Residence in France"* (1805, 1850); Prescott, from *History of the Conquest of Mexico* (1843);

*Movements in Modern and Contemporary Drama: Theory and Practice*  
Dr M Byron.

This course charts the emergence of modern drama from its roots in the nineteenth century and traces its legacy in a selection of contemporary play texts. The aims of the course are threefold: to provide a comprehensive overview of the origins of modern and contemporary drama (in classical and folk traditions, nineteenth-century naturalism and social realism, melodrama and the fantastic); to situate developments in dramatic theory and practice alongside dominant social and intellectual trends of the past century (political tyranny/liberation, class structure, women's emancipation, censorship, technological change, the rise of global capital); and to evaluate dramatic texts and performance using a variety of theoretical and critical frameworks. Most seminars will cover two play texts and accompanying theoretical/critical material, all of which will be related by theme or by the expression of specific theoretical attitudes and techniques. Additionally, there will be ample opportunity to explore both theatre history and aspects of performance.

Texts:

Bertolt Brecht, *The Threepenny Opera*; Georg Büchner, *Woyzeck*; Anton Chekhov, *The Cherry Orchard*; Dario Fo, *Accidental Death of an Anarchist*; Henrik Ibsen, *A Doll's House*; Eugene O'Neill, *Long Day's Journey into Night*; Tom Stoppard, *Rosencrantz & Guildenstern Are Dead*. Other texts to be announced.

*The Poetry of Meditation*

Dr B Spurr

This study of seventeenth-century religious poetry will proceed from a consideration of the influence of manuals and procedures of meditation on poetic themes and structures in the Holy Sonnets of John Donne and in George Herbert's *Temple*. Attention will be paid to biblical, theological and liturgical influences in the poetry and how the meditative tradition continues to inform later seventeenth-century poetry in the writings of John Milton, Richard Crashaw and Henry Vaughan.

Texts:

*The Norton Anthology of Poetry*, 5th edn.

## ENGL4102

### English Honours B Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** ENGL4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), Dip Arts(Hons).

## ENSE1000

### Accompaniment 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Howie **Session:** Semester 1, Semester 2 **Classes:** 1hr Vocal Studio/wk, 8 hrs Accom Tuition **Corequisites:** KEYB1008 Pianoforte 1 (Major) or KEYB1621 Pianoforte 1 **Assessment:** Accompany one student performance at one concert practice (75%), accompaniment tutorial (25%), vocal studio report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

Students will gain basic, first-hand experience of sight reading, ensemble and rehearsal techniques, teaching methods, performance technique and repertoire. Students will be assigned to a vocal studio for one hour each week. They will be expected to act as the accompanist for the lessons throughout the semester and then perform with the student concerned at the Accompaniment concert practice. Progress will be monitored to identify those with special talent in the area of keyboard accompaniment. Reports will be written by the panel attending the concert practice and the teacher supervising the weekly practical tutorials.

## ENSE1001

### Accompaniment 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Howie **Session:** Semester 1, Semester 2 **Classes:** 1hr Vocal Studio/wk, 7 hrs Accom Tuition **Prerequisites:** ENSE1000 Accompaniment 1 **Corequisites:** KEYB1009 Pianoforte 2 (Major) or KEYB1622 Pianoforte 2 **Assessment:** Accompany one student performance at performance workshop (75%), accompaniment tutorial (25%), vocal studio report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

Please refer to Accompaniment 1. Instead of a vocal student, students will work regularly with an instrumental student of their choice throughout the semester. This partner will attend the fortnightly accompaniment tutorials when possible and will take part in the concert practice assessment at the end of the semester.

## ENSE1002

### Choir 2A

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Neil McEwan **Session:** Semester 1, Semester 2 **Classes:** 2 hrs of rehearsals/wk **Prerequisites:** ENSE1015 Choir 1 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

This series of units of study covers both the SCM Choir and the Chamber Choir.

SCM Choir: Rehearsals prepare members for public concerts at the end of each semester. The music chosen covers oratorio and large choral works accompanied by the Sydney Conservatorium Symphony

Orchestra, the Sydney Conservatorium Chamber Orchestra, or the early Music Ensemble. No auditions required.

SCM Chamber Choir: Rehearsals and performances, acquiring essential ensemble techniques in this unit of study, prepare students for public concerts at the end of each semester. The music chosen covers compositions from Gregorian chant to the present day, and may include the Sydney Conservatorium Chamber Orchestra or the Early Music Ensemble. Sight-singing skills, style and historical performance practice will be an emphasis in preparation for performances. Auditions required.

## ENSE1005

### Chamber Music 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** Six 1 hr tutorials plus seminar attendances and performance. **Assessment:** Enrolment/Repertoire (10%), Seminars (20%), Tutorials (50%) one major performance (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

**Associated degrees:** B Mus (Perf), B Mus Studies, Dip Mus, UG Study Abroad Program.

Chamber music training involves numerous key skills: essential entrepreneurial skills of producing and promoting concerts are natural extensions of forming a chamber music group and creating a niche in the marketplace. Chamber music and chamber music skills are studied through the focused engagement with specific repertoire selected by relevant groups. Students are expected to form chamber ensembles of standard configurations which in this context is defined as a group of 3-10 musicians, performing without a conductor. Students are assigned a Principal Tutor who will advise of appropriate works for each level and coach the ensemble through the semester. Groups will be expected to cover a wide range of historical periods and styles.

## ENSE1007

### Chamber Music 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** Six 1 hr tutorials plus seminar attendance and performance. **Prerequisites:** ENSE1005 Chamber Music 1 **Assessment:** Enrolment/Repertoire (10%), Seminars (20%), Tutorials (50%) one major performance (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment.*

## ENSE1618

### Orchestral Studies 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 6 hours/ week ensemble rehearsal and performance, audition and developmental classes as scheduled by the unit. **Corequisites:** Principal Study 1 in an appropriate orchestral instrument. **Assessment:** Tutor/conductor assessment based on

attendance participation, performance and preparation, 100%. Further details in the Orchestral Studies & Large Ensembles Program Handbook. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

The purpose of Orchestral Studies is to develop the entire range of skills which musicians must possess to prepare them to be a member of a professional orchestral ensemble. All students enrolled in Orchestral Studies must participate in two performance projects per semester as rostered. This is supported by the orchestral development program: students will receive weekly training/instruction in all aspects of orchestral playing. This includes participating in weekly repertoire sessions in the Symphony Orchestra or, in other training ensembles and groups such as the Chamber Orchestra, Wind Symphony, Early Music Ensemble, Modern Music Ensemble and Brass Ensemble. For wind and percussion students, participation in the Wind Symphony program can contribute to assessment in Orchestral Studies, providing the students are not enrolled separately in Wind Symphony. The objectives of Orchestral Studies are to develop: A thorough knowledge of orchestral performing styles and practices; ensemble intonation - the ability to play precisely and rhythmically and in tune with other members of an ensemble; the ability to concentrate and play with commitment; teamwork; the ability to work with a conductor and interpret his gestures. Assessment is based on all aspects of participation in the orchestral ensemble (assessed by the ensemble director/coordinator), in the weekly orchestral development classes and, in a final exam. Assessment criteria are: level of preparation, actual performance in the ensemble. Commitment, concentration, ability and teamwork. For further information contact the relevant Chair of Unit. For administrative arrangements contact the Ensembles Coordinator/orchestral manager.

## ENSE1619

### Orchestral Studies 2

#### Sydney Conservatorium of Music

### Accompaniment 4

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** 2hr lec/wk **Prerequisites:** ENSE2000 Accompaniment 3 **Corequisites:** KEYB2008 Pianoforte 4 (Major) or KEYB2624 Pianoforte 4 **Assessment:** Preparation of class material and performance in two masterclasses (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Please refer to Accompaniment 3. Students who show potential will be offered the option of progressing into Accompaniment 5-6-7-8. For further information contact David Miller (Ensemble Studies).

## ENSE2002

### Chamber Music 3

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** Six 1 hr tutorials plus seminar attendances and performance. **Prerequisites:** ENSE1007 Chamber Music 2 or ENSE1001 Accompaniment 2 (BMus Keyboard or Keyboard Majors) **Assessment:** Enrolment/Repertoire (10%), Seminars (20%), Tutorials (50%) one major performance (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Chamber music training involves numerous key skills: essential entrepreneurial skills of producing and promoting concerts are natural extensions of forming a chamber music group and creating a niche in the marketplace. Chamber music and chamber music skills are studied through the focused engagement with specific repertoire selected by relevant groups. Students are expected to form chamber ensembles of standard configurations which in this context is defined as a group of 3-10 musicians, performing without a conductor. Students are assigned a Principal Tutor who will advise of appropriate works for each level and coach the ensemble through the semester. Groups will be expected to cover a wide range of historical periods and styles.

## ENSE2003

### Choir 4A

## Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Neil McEwan **Session:** Semester 1, Semester 2 **Classes:** 3 hrs of rehearsals/wk **Prerequisites:** ENSE1019 Choir 3A **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This series of units of study covers both the SCM Choir and the Chamber Choir.

SCM Choir: Rehearsals prepare members for public concerts at the end of each semester. The music chosen covers oratorio and large choral works accompanied by the Sydney Conservatorium Symphony Orchestra, the Sydney Conservatorium Chamber Orchestra, or the early Music Ensemble. No auditions required.

SCM Chamber Choir: Rehearsals and performances, acquiring essential ensemble techniques in this unit of study, prepare students for public concerts at the end of each semester. The music chosen covers compositions from Gregorian chant to the present day, and may include the Sydney Conservatorium Chamber Orchestra or the Early Music Ensemble. Sight-singing skills, style and historical performance practice will be an emphasis in preparation for performances. Auditions required.

Further details in Orchestral Studies and Large Ensembles Program Handbook. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: For administrative arrangements contact the Ensembles & Orchestral Coordinator.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

In these units of study, through a wide range of repertoire, students will learn the necessary skills for orchestral and ensemble performance, including refining intonation, tone control, working with a conductor, ethics and professional conduct of an orchestral musician.

#### ENSE4022 Orchestral Studies 8 Sydney Conservatorium of Music

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Average 6 hrs/wk - sectional classes, ensemble rehearsals and 2 public performances. **Prerequisites:** ENSE4021 Orchestral Studies (Major) 7/Orchestral Studies 7 **Corequisites:** Principal Study (Major) 8 or Principal Study 8 in an appropriate orchestral instrument or Principal Study (Honours) 8 **Assessment:** Assessment is based on Attendance (punctuality and level of responsibility for absences); Participation (eg sectional, rehearsals, performances), as well as a Chair of Unit grading (technical and facility ability, consistency of preparation and contribution, marking of part, approach to difficult passages, peripheral awareness, rhythmic consistency and stability). Further details in Orchestral Studies and Large Ensembles Program Handbook. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: For administrative arrangements contact the Ensembles & Orchestral Coordinator.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

In these units of study, through a wide range of repertoire, students will learn the necessary skills for orchestral and ensemble performance, including refining intonation, tone control, working with a conductor, ethics and professional conduct of an orchestral musician.

#### ENSE4023 Studio Rehearsal 3

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week **Prerequisites:** KEYB3004 Pianoforte 5 (Major) or KEYB3625 Pianoforte 5, ENSE3022 Studio Rehearsal 2 **Corequisites:** KEYB3005/KEYB3626 Pianoforte 6 **Assessment:** Studio teacher grade 100% based on preparation and performance of lesson material. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment. Note: Public performance will be permitted only at the discretion of the studio teacher concerned and may or may not be used for assessment purposes. This unit of study is not available for Accompaniment students. Admission to the unit of study only with the expressed permission of the appropriate Chairs of Units.*

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies(Hons), B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

Students will become the studio pianist for two fellow students (either instrumental or vocal majors) at the same level of study as themselves. They will be required to attend all lessons within the semester. They will prepare and play the repertoire being studied with their student associate, working under the direction of the studio teacher.

#### ENSE4024 Studio Rehearsal 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Miller **Session:** Semester 1, Semester 2 **Classes:** 2hrs/week **Prerequisites:** KEYB3005 Pianoforte 6 (Major) or KEYB3626 Pianoforte 6, ENSE4023 Studio Rehearsal 3 **Corequisites:** KEYB4002 Pianoforte 7 (Major) or KEYB4627 Pianoforte 7 **Assessment:** Studio teacher grade 100% based on preparation and performance of lesson material. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment. Note: Public performance will be permitted only at the discretion of the studio teacher concerned and may or may not be used for assessment purposes. This unit of study is not available for Accompaniment students. Admission to the unit of study only with the expressed permission of the appropriate Chairs of Units.*

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies(Hons), B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus.

Students will become the studio pianist for two fellow students (either instrumental or vocal majors) at the same level of study as themselves. They will be required to attend all lessons within the semester. They will prepare and play the repertoire being studied with their student associate, working under the direction of the studio teacher.

#### ENTO2001 Agricultural Entomology Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Sarah Mansfield **Session:** Semester 2 **Classes:** (2x1hour lecture, 1x3hour practical, 1x1hour insect collection)/week **Assessment:** 1 x 2hr exam (50%), 3 x lab quizzes (15%), 1x practical test (20%), 1 x insect collection (15%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B Sc, B Sc Agr, UG Study Abroad Program.

This unit is an introduction to insects, the most abundant group of organisms. The course begins with insect external and internal anatomy, feeding modes, life cycles and behaviour. Real world examples are used to demonstrate the ecological roles insects play in natural and agricultural ecosystems (e.g. pollinators, herbivores, predators, parasitoids, disease vectors). This knowledge is then linked to aspects of applied entomology: insecticides, biological control, habitat manipulation, integrated pest management, medical entomology and insect conservation. Practical sessions focus on insect morphology and taxonomy, so that students learn to identify common insect orders and families. Students must make a representative insect collection. This course forms the basis of students' entomological knowledge for BScAgr and BHortSc degrees and lays the foundation for future study in entomology.

#### Textbooks

Required: 1) Laboratory manual, available from University Publishing Service. 2) Zborowski, P. & Storey, R. 1995. A field guide to insects in Australia. Reed New Holland, Sydney. 207 pp. Recommended: Gullan, P.J. & Cranston, P.S. 2005. The Insects: an outline of entomology. 3rd edition, Blackwell Publishing, Malden, MA. 505 pp.

**ENTO2002****Entomology and Parasitology  
Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Sarah Mansfield, Dr David Emery  
**Session:** Semester 2 **Classes:** (2 lec, 3 prac)/wk; individual insect collection (1 hr/wk) **Prerequisites:** (AFNR1001 or CROP1001) and (BIOL1001, BIOL1101, BIOL1901 or BIOL1911) **Assessment:** Prac quizzes, test (30%), 2 hr exam (50%), insect collection (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B An Vet Bio Sc.

This unit provides an introduction to insects and animal parasites. In Entomology, 18 lectures will cover insect anatomy, life cycles, behaviour and ecology. This will include the effects of pest and beneficial insects on agriculture and principles of insect control. In Parasitology, there will be fifteen lectures covering major external and internal parasites including insects, arachnids and a range of helminths (round, flat and tape worms) affecting the exterior and internal organs of farm animals. This includes life cycles, parasite identification and biology, host/parasite relationships, vectors of disease, principles of investigation and of parasite infections in individuals and herds.

Nine entomology practicals deal with insect morphology, taxonomy and biodiversity. Students make a small but representative insect collection and learn to identify common insect groups. Five parasitology practicals will deal with parasite identification, lifecycles, diagnostic sampling and techniques as well as treatment options.

**Textbooks**

Required: Zborowski, P. & Storey, R. (1995) A field guide to the insects of Australia, Reed New Holland, Sydney.

Recommended: Gullan, P. J. & Cranston, P. S. (1994) The Insects: An Outline of Entomology, Chapman and Hall, London.

**ENTO4003****Integrated Pest Management  
Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Sarah Mansfield **Session:** Semester 2 **Classes:** (1x2hr lec, 1x3h prac)/wk **Prerequisites:** ENTO2001 or ENTO2002 or BIOL2017 or BIOL2917 (Note: BIOL2017/BIOL2917 are only for BSc students who elect to take this UoS) **Assessment:** 1 x 2hr exam (40%), 1 x field diary (20%), 1 x group assignment (15%), 1 x insect collection (20%), 1 x class participation (5%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

The focus of this unit is the development and adoption of integrated pest management (IPM) within Australian agriculture. It builds on the knowledge gained in second year entomology (BScAgr and BHortSc) and is a core unit for the entomology specialty (BScAgr). Applied entomology deals with the control of insect pests and the use of beneficial insects. The biology of major pest (herbivores and disease vectors) and beneficial (predators, parasitoids, pollinators) insect groups is covered in depth. Students will compare the advantages and disadvantages of different pest control strategies and evaluate the importance of insect ecology, control methods and socio-economic factors to successful adoption of integrated pest management. Field trips will demonstrate the practical application of IPM concepts presented in lectures. Research, inquiry and information literacy skills will be improved through critical review of current literature and compilation of a field diary. Students will practice their communication skills and develop personal and intellectual autonomy through a group project, in-class discussion and a self-directed insect collection.

**ENTO4004****Insect Taxonomy and Systematics  
Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Sarah Mansfield **Session:** Semester 1 **Classes:** (1 x 2hr lec, 1 x 3hr prac)/week **Prerequisites:** ENTO2001 or ENTO2002 or BIOL2017 or BIOL2917 **Assumed knowledge:** ENTO2001

**Assessment:** 1 x 2hr exam (40%), 1x museum project (25%), 1 x insect collection (25%), 1 x class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

Knowledge of the evolutionary relationships between insect groups contributes to our understanding of insect biology and correct taxonomic identification of insects is essential for all areas of entomological research, including pest management. This unit builds on the knowledge gained in second year entomology (BScAgr and BHortSc) and is a core unit for the entomology specialty (BScAgr). Key concepts that underpin the study of insect systematics, biogeography and phylogeny are described using examples from the evolutionary development of insects. The role of morphological, genetic and molecular studies in the classification of insects is examined. Students will demonstrate their knowledge of insect taxonomy through individual projects and assess the impact of evolutionary relationships among insect groups on modern agriculture. Research, inquiry and information literacy skills will be improved through a museum project and a self-directed insect collection. Students will practice their communication skills and develop personal and intellectual autonomy through in-class discussion of current literature.

**ENVI2111****Conservation Biology and Applied Ecology  
Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr C Taylor **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour practical per week, plus one 2 day field trip during the semester. **Prerequisites:** 24 credit points of Junior Science units, including 12 credit points of Junior Biology (BIOL/MBLG/EDUH). **Prohibitions:** ENVI2911, ENVI2001. **Assessment:** Essays, tutorial papers, exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This topic examines the role of conservation biology and applied ecology in environmental science, examining pattern and process in natural systems and evaluating how these are being affected by pervasive anthropogenic impacts. Focusing on the conservation, assessment of impacts and the restoration of natural systems, we consider the range of ecological issues environmental scientists must address. We examine the extent of environmental problems; derive explanations of why and how they are occurring and address management options for resolving them. We will derive general principles for these by addressing case studies, chosen from Australian examples when possible. The aim of this unit is for you to understand the processes that go into solving environmental problems from an ecological perspective and how to identify management options.

**ENVI2112****Atmospheric Processes and Climate  
Science**

**Credit points:** 6 **Teacher/Coordinator:** Edwina Tanner **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 2 hour practical per week. **Prerequisites:** 24 credit points of Junior Science units, including 12 credit points of Junior Chemistry or Physics **Prohibitions:** ENVI2002 **Assessment:** Assignments, tutorial papers, exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit of study investigates the physical and chemical characteristics of our atmosphere, as well as the natural processes that occur within it and how these contribute to the climate we live in. Topics such as atmospheric structure, photochemical processes, and weather will be examined. The effects of ocean circulation are investigated, particularly examining the ocean's importance as a source/sink for atmospheric constituents and as a heat regulator. The impact of glaciation is also

examined, including sources, quantity, magnitude of threat, and the potential impact to our climate, are then explored. Finally, the unit examines issues surrounding climate change and the modelling of these changes.

### ENVI3111

#### Environmental Law and Ethics Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Gerry Bates Dr Jane Johnson **Session:** Semester 1 **Classes:** Two 2 hour lectures per week. **Prerequisites:** 12 credit points of Intermediate Science or Agriculture units. **Prohibitions:** ENVI3001, ENVI3003. **Assumed knowledge:** Intermediate Environmental Science. **Assessment:** Essays, tutorial papers. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), B Sc Agr, UG Study Abroad Program.

This unit of study covers topics in environmental law and ethics. The environmental law component provides an overview of all laws in Australia pertaining to environmental matters and looks at a number

of environmental issues at the various levels of analysis, policy making, implementation of policy, enforcement, and dispute resolution. It also provides a broad background to the political and economical issues as they relate to the legal issues involved. It also examines international environmental law, particularly examining how these influence and affect our local policies. The ethics component helps students develop thoughtful and informed positions on issues in environmental ethics using arguments derived from traditional ethics as well as environmentally specific theories. Ethical conflicts are often inevitable and difficult to resolve but using the resources of philosophical ethics and regular reference to case studies, students can learn to recognize the values and considerations at stake in such conflicts, acknowledge differing viewpoints and defend their own well considered positions.

### ENVI3112

#### Environmental Assessment Science

**Credit points:** 6 **Teacher/Coordinator:** Dr John Dee Dr Scott Kable **Session:** Semester 2 **Classes:** Two 2 hour lectures per week. **Prerequisites:** 12 credit points of Intermediate Science or Agriculture units. **Prohibitions:** ENVI3002, ENVI3004. **Assumed knowledge:** Intermediate Environmental Science. **Assessment:** Essays, tutorial papers, report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), B Sc Agr, UG Study Abroad Program.

This unit of study is composed of two components: environmental impact assessment and risk assessment. The former is generally concerned with issues related to environmental impact assessment and builds toward the process of producing an EIS/EIA. Moor specifically it seeks to establish a critical understanding of the theory and practice of environmental impact studies/statements (EIS) and environmental impact assessment processes (EIA) from both the positive (scientific) and normative (value) perspectives. Emphasis is placed on gaining skills in writing and producing an assessment report, which contains logically ordered and tightly structured argumentation that can stand rigorous scrutiny by political processes, the judiciary, the public and the media. The risk assessment component considers a more chemical approach to the assessment of risk and issues of safety with respect to chemicals, ecotoxicology and the environment.

### ENVI3114

#### Energy and the Environment Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Chris Dey **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week and three field trips. **Prerequisites:** 12 credit points of Intermediate Science or Agriculture units. **Prohibitions:** ENVI3001, PHYS3600. **Assumed knowledge:** Junior Physics or Intermediate Environmental Science. **Assessment:** Essays, tutorial papers, field reports, exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit covers the following aspects of energy and the environment: energy use; electrical power generation including alternate methods such as wind turbines; the environmental impact of energy use and power generation including the enhanced greenhouse effect; transportation and pollution; energy management in buildings; solar thermal energy, photovoltaics, and nuclear energy; and, socio-economic and political issues related to energy use and power generation.

Students enrolled in Honours programs study various advanced aspects of environmental science. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

### ENVX3001

#### Environmental GIS Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Inakwu Odeh **Session:** Semester 1 **Classes:** Four-day field trip, (2 lec & 2 prac/wk). **Assumed knowledge:** At least 48 credit points in second year agriculture/science units. **Assessment:** One 15 min presentation (10%), 3500w prac report (35%), 1500w report on field excur (15%), 2 hr exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

This unit is designed to impart knowledge and skills in spatial analysis and geographical information science (GISc) for decision-making in an environmental context. The unit of study is intended to introduce students to modern geospatial analysis and GISc technologies. It is offered as a core unit for BLWSc students and as an elective for BScAgr, BHortSc, BSc and BResEc students. The lecture material will present several themes: principles of GISc, geospatial data sources and acquisition methods, processing of geospatial data and spatial statistics. Practical exercises will focus on learning geographical information systems (GIS) and how to apply them to land resource assessment, including digital terrain modelling, land-cover assessment, sub-catchment modelling, ecological applications, and soil quality assessment for decisions regarding sustainable land use and management. A 3 day field excursion during the mid-semester break will involve a day of GPS fieldwork at Arthursleigh University farm and two days in Canberra visiting various government agencies which research and maintain GIS coverages for Australia. By the end of this UoS, students should be able to: differentiate between spatial data and spatial information; source geospatial data from government and private agencies; apply conceptual models of spatial phenomena for practical decision-making in an environmental context; apply critical analysis of situations to apply the concepts of spatial analysis to solving environmental and land resource problems; communicate effectively results of GIS investigations through various means- oral, written and essay formats; and use a major GIS software package such as ArcGIS.

### ENVX4001

#### GIS, Remote Sensing and Land Management Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Inakwu OA Odeh **Session:** Semester 2 **Classes:** 2 lec, 1 tut & 4 hr prac/wk (wks 1-6); Project: (wks 7-12) **Assumed knowledge:** Some knowledge of GIS and spatial information systems and/or some knowledge of soil science, geomorphology or environmental science. **Assessment:** Lab prac reports, group work, presentation and project report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Consent of the unit coordinator required.*

**Associated degrees:** B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

This unit of study is aimed at advanced techniques in Remote Sensing (RS), linked with Geographical Information Systems (GIS), as applied to land management problems. It is a main elective unit for BLWSc and BScAgr students that provide a broader spatial context of the land resources. The unit consists of three separate but overlapping parts: 1) a short theoretical part which focuses on the concepts of RS; 2) a practical part which aims at developing hands-on skills in using RS and GIS tools, and 3) an application-focused module in which students will learn the skills of how to design a land management project and actualise it using integrated GIS and RS techniques. At

the completion of this unit students will have grasp the theories and concepts of GIS and acquired research skills in the application of advanced remote sensing and GIS algorithms to provide evidence-based solutions to natural resource management and environmental problems. Communication skills and critical thinking for solving land resources problems are encouraged through class discussions, group work and tutorial presentations.

### ENVX4002

#### Environmetrics 4

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Thomas Bishop **Session:** Semester 1 **Classes:** 2x1 hr workshops and 1x3 hr practical (weeks 1-7); 6 hours project work (weeks 8-13) **Prerequisites:** BIOM3004 or BIOM3005 or BIOM3006 **Assessment:** One major project (60%), practical assignments (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

This unit of study is designed to introduce the students to advanced statistical methods, programming and algorithm development with direct applications for solving environmental and agricultural problems. It is a core unit for BScAgr students wishing to specialize in Environmetrics and available as an elective for students in BScAgr, BHortSc and BLWSc who have completed one of BIOM3004, BIOM3005 or BIOM3006. In the first half the students will learn about spatial and temporal statistics, the design of sampling schemes to monitor change in space and time, and stochastic simulation. These methods will be taught in R to introduce the students to computer programming and algorithm development. In the second half the students will undertake a major project where they will encode a statistical method or simple process model related to their own interests. At the end of this unit, students will have gained an introduction to computer programming and algorithm development which will empower them to create customised code and scripts in their future studies and career. The students will gain research and inquiry skills through the major project where they will develop their own program to perform an analysis of their choice. Information literacy and communication skills will be developed through weekly computer work.

### EUST2611

#### European & Middle Eastern Myth & Legend

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrea Williams **Session:** Semester 2 **Classes:** One 1 hour lecture per week, one 1 hour tutorial per week and WebCT-guided reading, worksheets, discussion forum for ongoing development. **Prerequisites:** At least 18 junior credit points from Part A of the Table of Units of Study, of which 12 credit points are from one subject; or permission from the Director of European Studies. **Assessment:** Presentation (equivalent to 2000 words) and 2 essays of 2000 words each. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program.

This course introduces some major myths and legends that constitute the foundations of Western European and Middle Eastern cultures. We consider how legends such as the Grail have evolved cross-culturally from the earliest times to the present day, with recent manifestations like the Da Vinci Code. We also examine the transformation of mythical archetypes such as the Quest (seen also in the voyages of Odysseus and Sindbad) and binary pairs (for instance in Ancient Greek and Arabic myth).

### EUST2612

#### Regionalisms in Europe & the Middle East

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathryn Cramer **Session:** Semester 1 **Classes:** One 1 hour lecture per week, one 1 hour tutorial per week and guided reading worksheets via WebCT / online postings planned for ongoing development. **Prerequisites:** At least 18 junior credit points from Part A of the Table of Units of Study, of which 12 credit points are from one subject; or permission from the Director of European Studies. **Assessment:** Oral presentation (1000 words), essay (2000 words), essay (3000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program.

This unit of study is designed to introduce the history of various regions, the nature of regional debate and the role of regional institutions within Europe and the Middle East. It will examine nationalism and community consciousness at levels below the nation-state and will consider the differing relationships between central and regional powers in a number of case studies and the historic reasons for these.

### EUST2613

#### Romanticism and Revolution

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Francoise Grauby **Session:** Semester 1 **Classes:** One 1 hour lecture and one 1 hour tutorial per week **Prerequisites:** At least 18 junior credit points from Part A of the Table of Units of Study, of which 12 credit points are from one subject; or permission from the Director of European Studies. **Assessment:** 2 essays (2000 words each), class presentation (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program.

This unit will examine the impact of the Romantic Movement across Europe by examining the historical and cultural connections between three European countries (Germany, England and France) during the late eighteenth and nineteenth centuries. We will consider the different national contexts separately, look at their influence on each other and at the influence of Romantic thought throughout European society, identifying ways in which Romantic ideas and values revolutionised social, cultural and aesthetic ideas, transformed worldviews and shaped the future of Europe.

**EXSS1018****Biomechanics of Human Movement****Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Halaki **Session:** Semester 1 **Classes:** 2hrs lectures, 2hrs tutorial/practicals **Assumed knowledge:** HSC mathematics **Assessment:** Mid and end semester exams, laboratory report **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (Phy), B Hlth Sci, UG Study Abroad Program.

This unit aims to develop an appreciation of how mechanical principles can be applied to understand the underlying causes of human movement. Topics include: kinematics, vectors, Newton's laws of motion, work, energy, power, and momentum; for both translational and rotational motion; and the influence of fluids on motion. Emphasis is placed on developing mathematical skills and analytical problem solving techniques. The laboratory classes complement the lectures; providing opportunities to validate mechanical principles in a quantitative manner.

**EXSS1026****Biomechanics A****Health Sciences**

**Credit points:** 3 **Teacher/Coordinator:** Dr Peter Sinclair **Session:** Semester 1 **Classes:** 2hrs lectures/week plus independent learning with web and tutor assistance **Assessment:** Mid semester written exam (40%), end semester written exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Phy), UG Study Abroad Program.

This unit provides an understanding of the principles and practice of biomechanics relevant to the analysis of movement associated with a wide range of human activities. The underlying principles of movement analysis are presented together with particular application to the analysis of human movement. These principles are applied in some detail to walking gait. There is an emphasis throughout the unit on the application of principles to problem solving in real situations in clinical and workplace contexts.

**EXSS1027****Biomechanics B****Health Sciences**

**Credit points:** 3 **Teacher/Coordinator:** Dr Peter Sinclair **Session:** Semester 2 **Classes:** 2hrs lectures/week plus independent learning with web and tutor assistance **Assumed knowledge:** BIOS1136 Functional Anatomy A, EXSS1026 Biomechanics A **Assessment:** Mid semester written exam (40%), end semester written exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Phy), UG Study Abroad Program.

This unit provides an understanding of the principles and practice of biomechanics relevant to the analysis of body loads and tissue stresses associated with a wide range of human activities. The impact of movement and muscle action on tissues is studied through the application of statics, kinetics, energy analysis, electromyography, tissue mechanics. Particular application of these principles is made to balance and stability, muscle-joint systems and simple lifting procedures. There is an emphasis throughout the unit on the application of principles to problem solving in real situations in clinical and workplace contexts.

**EXSS1028****Muscle Mechanics****Health Sciences**

**Credit points:** 4 **Teacher/Coordinator:** Mr Tom Gwinn **Session:** Semester 2 **Classes:** Two 1hr lectures/week, four 2hr practical sessions and five 1hr tutorials per semester **Assumed knowledge:** BIOS1137 Introductory Neuroscience **Assessment:** Mid semester exam (25%), end semester exam (75%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Phy), UG Study Abroad Program.

This unit focuses on the crossbridge cycle and the structure of the sarcomere as themes to explore skeletal muscle function and remodelling. Topic areas include: 1) how muscle produces active forces and power, accommodates length changes and develops passive force, (2) the functional implications of altered assemblies of sarcomeres in series or in parallel, (3) the sarcomere remodelling of muscle associated with chronic changes in use (i.e. hypertrophy, atrophy and length changes) and resultant functional, (4) the within- and between-muscle diversity in terms of fiber type diversity, motor unit diversity and whole-muscle architectural variation, and (5) the control of muscle activation both at cellular level (processes of excitation-contraction coupling) and at the whole muscle level (recruitment and rate coding). Practical classes examine muscle histology and architecture and the analysis of joint torques during maximal voluntary isometric, shortening and lengthening contractions.

### EXSS1029

#### Muscle Mechanics and Training Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Tom Gwinn **Session:** Semester 1, Semester 2 **Classes:** 3hrs lectures, 2 hrs practical/week **Assumed knowledge:** BIOS1137 Introductory Neuroscience or BIOS1166 Neuroscience, one of BIOS1130 Molecules and Energy, BIOS1167 Human Cell Biology, CHEM1101 Chemistry 1A, CHEM1001 Fundamentals of Chemistry 1A, EXSS1031 Cell Metabolism and Biochemistry **Assessment:** Mid semester exam (40%), end semester exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Phy), UG Study Abroad Program.

This unit focuses on the sarcomere, and its molecular components, as the basis of skeletal muscle function and adaptability. Starting from the cross bridge cycle, students progress to explore the functional implications of altered assemblies of sarcomeres in series or in parallel. Data is presented on sarcomere remodelling of human muscle in response to training and disuse. Students then apply this information to deduce the effects of these adaptations on muscle function, including alterations in the capacity to produce force and power, and on the passive length-tension properties of muscle. The control of muscle activation is examined both at the cellular level and at the whole muscle level. Students acquire professional skills through participation in a progressive high-resistance weight training program. Lecture material presents dose-response relations for high resistance training in terms of both minimal effective and optimal values for load, sets and frequency of training. Aspects related to cardiovascular risk and muscular injury relevant to high-resistance training are examined. Practical classes examine muscle structure and maximal voluntary responses.

*Textbooks*

No textbook required, students recommended to obtain unit of study manual

### EXSS1031

#### Cell Metabolism and Biochemistry Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Kieron Rooney **Session:** Semester 1 **Classes:** 2hrs lectures, 3hrs practical/week **Assumed knowledge:** Biology and Chemistry **Assessment:** Mid semester exam (25%), practical report, end semester exam (75%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), M N, UG Study Abroad Program.

This unit of study will introduce students to the foundations of biochemistry. Students will gain an understanding of basic chemistry principles such as acid-base balance, chemical reactivity and enzyme regulation through their applications to energy production and consumption during physical activity. This unit of study will develop an appreciation for the role of different cellular components and their function in cell to cell communication, transport of molecules and bioenergetics of macronutrients. This unit of study will include tutorials

and practical classes where students will gain some basic scientific and lab-based skills. Material covered in this unit of study will be used as a platform for further development in EXSS2017 Biochemistry of Exercise.

### EXSS1032

#### Fundamentals of Exercise Science Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3hrs lectures, 2 hrs practical/week **Assessment:** Assignment (20%), mid semester exam (25%), end semester exam (55%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), M N, B Hlth Sci, UG Study Abroad Program.

This unit encompasses the fundamental principles and practices of exercise science. The student will gain an understanding of the application of these principles to the assessment and development of physical fitness. The unit examines energy expenditure, the energetics of exercise, the measurement of human work performance and exercise responses in the laboratory, the assessment of aerobic and muscular fitness and the fundamentals of programming of cardiorespiratory and resistance training exercise programs for healthy, low-risk individuals. The instructions and techniques of resistance training will also be delivered.

### EXSS1033

#### Principles of Exercise Science Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Rhonda Orr **Session:** Semester 2 **Classes:** 3hrs lectures/week **Assessment:** Mid semester exam (30%), end semester exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex &Sp Sc), B Sc (Nutr), UG Study Abroad Program.

This unit provides the student with an understanding of the fundamental principles and practices of exercise science and its application to sport, fitness and rehabilitation. The unit examines the energetics of exercise, ergometry, standard screening procedures for fitness testing and the principles and practice of submaximal aerobic fitness testing.

### EXSS1035

#### Performance Analysis Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Mark Halaki **Session:** Semester 2 **Classes:** Two 1hr lectures, 2hr tutorial, practical/week **Assessment:** Practical skill proficiency exam (pass/fail), performance analysis report (15%), 2500 word group project, 1500 word individual critical review of journal paper (25%), final exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), M N, UG Study Abroad Program.

This unit introduces students to the use and process of scientific measurement and analysis both in the field and in research. The unit will cover aspects of performance analysis, quality of measurement, expression of raw data obtained from measurements, basic data analytical tools and the presentation of data in both a graphical and written format. Measurement, analysis and presentation of data are fundamental to exercise science. Acquisition of these skills is vital for students to be able to read and critically evaluate the research of others. It is expected that the knowledge obtained and the skills learnt in Performance Analysis will assist students in several units of study in Years 2 and 3 of their degree.

### EXSS2015

#### Kinesiology for Occupational Therapy Health Sciences

**Credit points:** 3 **Session:** Semester 2 **Classes:** Two 1hr lectures, two 2hr tutorials, practical/week **Prerequisites:** BIOS1136 Functional Anatomy A, BIOS1139 Functional Anatomy B **Assessment:** End semester exam (55%),

attendance and involvement tutorials/pracs (10%), task analysis (35%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B Hlth Sci, UG Study Abroad Program.

This unit of study will focus on concepts of biomechanics and kinesiology will be applied to situations which have specific implications for occupational therapy practice and intervention in activities of daily living and the workplace. Included in these applications are the use of electromyography, biomechanics of lifting techniques and manual handling as well as the kinesiology of the trunk and upper limb.

*Textbooks*

Greene S and Roberts S, Kinesiology, Movement in the Context of Activity, Mosby (1999)

## EXSS2016

### Motor Control

#### Health Sciences

**Credit points:** 3 **Session:** Semester 1 **Classes:** 2hrs lectures, 2hrs tutorials/week **Prerequisites:** BIOS1137 Introductory Neuroscience **Assessment:** Mid semester exam, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), B App Sc (Ex & Sp Sc), M N, B Hlth Sci, UG Study Abroad Program.

This unit aims to provide students with an in-depth understanding of the control and acquisition of motor behaviours from the perspective of neuroscience. It will examine the nature and cause of movement and the maintenance of posture and balance. Models will be developed which emphasise the control of movement as an interaction between the nervous system, skeletal muscle and the environment. This unit considers the mechanics of movement and clinical disorders to extend the application of the motor system model.

## EXSS2017

### Biochemistry of Exercise

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Kieron Rooney **Session:** Semester 1 **Classes:** 3hrs lectures, 3hrs practicals (alternate weeks) **Prerequisites:** EXSS1031 Cell Metabolism and Biochemistry **Assessment:** Mid semester exam (35%), end semester exam (50%), reports (12%), prac (3%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), UG Study Abroad Program.

This unit investigates the biochemical strategies that maintain energy balance in exercising muscle. The structure of the ATP producing pathways and their kinetic characteristics in terms of maximum flux and flux capacity will be described. The role of signals representing exercise intensity and duration in the regulation of oxidative phosphorylation, glycolysis and creatine kinase reaction will be examined in depth. These mechanisms will be demonstrated by reference to specific examples of high power output (sprinting) and long duration (endurance) activities. The processes of fuel mobilisation during exercise and of fuel storage at rest will be described.

## EXSS2018

### Biomechanical Analysis of Movement

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Benedicte Vanwanseele **Session:** Semester 1 **Classes:** 2hrs lectures, 2hrs practicals **Prerequisites:** EXSS1018 Biomechanics of Human Movement **Assessment:** Group project, mid semester exam, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), UG Study Abroad Program.

The main emphasis of this unit is in developing practical expertise in techniques for the biomechanical analysis of human movement. Students conduct a 2D video analysis project that makes use of a sophisticated computer software package (APAS). A secondary component of this unit is aimed at further development of mathematical and problem-solving skills. Topics include static and dynamic equilibrium, calculation of centre of mass, and determination of joint torques using inverse dynamics.

## EXSS2019

### Exercise Physiology - Acute Responses

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Chin Moi Chow **Session:** Semester 1 **Classes:** 3hrs lectures, 2hrs practicals, 1hr tutorials **Assumed knowledge:** BIOS1133 Body Systems: Structure and Function I, either EXSS1032 Fundamentals of Exercise Science or EXSS1033 Principles of Exercise Science **Assessment:** Mid semester exam, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), B Hlth Sci, UG Study Abroad Program.

This unit will investigate the acute responses to exercise, with a specific emphasis on the roles of respiratory system and the cardiovascular system in oxygen transport and the significance of submaximal and maximal oxygen consumption during exercise. In addition, the concepts of acid-base balance during exercise and of lactate and ventilatory thresholds will be examined. Factors determining provision and oxidation of substrate and interactions among carbohydrates and fatty acids will also be investigated. The cellular events underlying muscle plasticity will be considered in relation to their influence on muscle performance or fatigue. The practical sessions play an essential role in this unit of study with students acquiring skills in the collection of cardiorespiratory data, respiratory gas analysis and metabolic calculations. The practical content of the unit, together with the practicals for the unit of study EXSS2022 Exercise Physiology Training Adaptation (Semester 2), is based on the model of assessment/exercise prescription/reassessment which forms the core of future professional practice.

## EXSS2021

### Nutrition, Health and Performance

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Helen O'Connor **Session:** Semester 2 **Classes:** 3hrs lectures, 3hrs practicals (alternate weeks) **Prerequisites:** EXSS2017 Biochemistry of Exercise **Assessment:** End semester exam, poster assignment, practical book **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), UG Study Abroad Program.

This unit provides students with an understanding of the principles of nutrition to optimise physical performance in sport, recreation and occupation. This unit defines the importance of macro and micro nutrients in the maintenance of health, and the specific roles of carbohydrate, protein and lipids in energy metabolism during exercise. In addition, the interaction between dietary intake and physical activity and its effects on energy-balance, cardiovascular health and other lifestyle diseases are considered.

## EXSS2022

### Exercise Physiology Training Adaptations

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Chin Moi Chow **Session:** Semester 2 **Classes:** 3hrs lectures, 2hrs practicals **Prerequisites:** EXSS2019 Exercise Physiology - Acute Responses **Assumed knowledge:** EXSS2017 Biochemistry of Exercise or BCHM2072 Human Biochemistry **Assessment:** Mid semester exam, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), UG Study Abroad Program.

This unit is concerned with the physiological adaptations associated with training. This unit will focus on cardiorespiratory and metabolic adaptations to endurance, high resistance and interval/sprint training. The implications of training will be discussed with respect to improved fatigue resistance, resulting from changes in the structural and functional capacities of organ systems under normal conditions as well as altered environmental conditions such as altitude and temperature. The mechanisms behind muscle damage and fatigue, including acidosis and excitation-coupling failure, will be examined in the untrained individual and the elite athlete with respect to their specific stimulus and appropriate recovery. This unit will build on fundamental topics of EXSS2019 Exercise Physiology - Acute Responses, and will apply theory to practice with a hands-on approach through the conduct of both sprint and endurance training programs.

**EXSS2024****Applied Physiology  
Health Sciences**

**Credit points:** 5 **Teacher/Coordinator:** Mr Phillip Chapman **Session:** Semester 1 **Classes:** 3hrs lectures/week, 3hrs tutorials, two 2hr practical sessions **Prerequisites:** BIOS1133 Body Systems: Structure and Function I **Assessment:** Mid semester exam (20%), end semester exam (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Phy), UG Study Abroad Program.

The aim of this unit is to provide students with a broad understanding of the physiological responses and adaptations to physical activity and inactivity. The unit has a primary focus on the application of exercise as both a treatment modality and a tool in rehabilitation. The unit describes the basic metabolic, cardiovascular, respiratory, endocrine responses and adaptations to exercise training in healthy, asymptomatic individuals (children, adults and the elderly). The normal exercise response is compared with that in health disorders such as diabetes, arthritis, and heart and lung disease. Particular attention is given to exercise testing and the application of exercise training in clinical practice.

**EXSS2025****Motor Control and Learning  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Nicholas O'Dwyer **Session:** Semester 2 **Classes:** 2hrs lectures, 2hrs tutorials/week **Assessment:** Tutorial presentation (15%), self scored mid semester exam (MCQ, SAQ) (0%), group training project report (35%), end semester exam (MCQ, SAQ) (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B App Sc (Phy), B Hlth Sci, UG Study Abroad Program.

This unit of study provides students with a broad overview of motor control and learning with the aim of stimulating them to think about the mechanisms of normal human movement. Both a behavioural and a neurophysiological approach are taken to the acquisition and execution of skilled motor actions. The behavioural approach is directed at the structures and processes underlying movement without considering their physical basis, while the neurophysiological approach is directed at the neuromuscular machinery and the functional neural connections that govern movement. The unit consists of 3 modules. The first module examines the information processing and energetic capacities of the learner that underpin motor performance; that is, characteristics of the perceptual-motor system such as memory, attention, reaction time, speed-accuracy trade-off, force control, economy of energy, coordination, automaticity, lateralisation, arousal and stress, talent and expertise. The second module examines features of the learning environment that can be manipulated to promote motor learning such as goals, motivation, instruction, practice conditions and feedback. The third module examines applications to teaching motor skills, coaching and rehabilitation and includes a group project in which a motor skill is trained, thereby enabling students to apply the principles of motor control and learning that they have learned.

**EXSS2026****Growth, Development and Ageing  
Health Sciences**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3hrs lectures, 1hr tutorial/week **Assessment:** Mid semester exam (25%), assignment (20%), end semester exam (55%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr), B App Sc (Ex &Sp Sc), M N, B Hlth Sci, UG Study Abroad Program.

This unit of study aims to provide the student with an appreciation of growth, development and ageing of the human across the lifespan. Physiologic changes, motor skill development and physical performance will be examined and related to morphology and stages of childhood and adolescent growth. The relationships between growth, development, gender and physical activity will be explored. The

biological changes and consequences of ageing on physiologic and psychological health, disease and exercise capacity will be investigated. The student will also be able to gain an understanding of exercise prescription for pregnant women, children, adolescents and older adults.

**EXSS2027****Exercise Physiology for Clinicians  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Chin Moi Chow **Session:** Semester 1 **Classes:** 3hrs lectures, 2 hrs practical/week **Assumed knowledge:** EXSS1032 Fundamentals of Exercise Science, BIOS1133 Body Systems: Structure & Function 1 **Assessment:** Mid semester exam (20%), end semester exam (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex &Sp Sc), M N, B App Sc (Phy), B Hlth Sci.

This unit has a major focus on the acute cardiorespiratory and haemodynamic response to exercise in both healthy and diseased populations. The measures of maximal oxygen consumption and anaerobic threshold as determinants of cardiorespiratory performance in endurance events are discussed. In relation to these measures, the concept of acid-base balance is introduced. Physiological adaptations associated with endurance, high resistance and interval/sprint training will be explored. Students will learn the mechanisms behind muscle damage and fatigue. The approach will be integrative, with particular attention given to the regulation of the changes in the cardiorespiratory, and metabolic systems during exercise.

**EXSS2028****Exercise Physiology and Biochemistry  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Chin Moi Chow **Session:** Semester 1 **Classes:** 3hrs lectures, 2hrs practical/week **Prohibitions:** EXSS2017 Biochemistry of Exercise, EXSS2019 Exercise Physiology - Acute Responses **Assumed knowledge:** EXSS1032 Fundamentals of Exercise Science or EXSS1033 Principles of Exercise Science **Assessment:** 1hr mid semester exam, 2hr end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex, SS&Nut)Hons, B App Sc (Ex &Sp Sc), B App Sc (Ex &Sp Sc), B Sc (Nutr).

This unit discusses the acute responses to exercise with a specific emphasis on the roles of the respiratory and cardiovascular systems in oxygen transport and the significance of sub-maximal and maximal oxygen consumption in the limitations to performance. Furthermore, this unit develops an understanding of the specific metabolic response to exercise at the peripheral cellular level and the biochemical strategies that maintain energy balance during exercise and a return to homeostasis in recovery. Students will put theory into practice with weekly laboratory tasks that encourage skill acquisition in the collection of real-time physiological data of the respiratory and cardiovascular response to exercise and subsequent metabolic calculations for the discussion of fuel mobilisation during exercise.

**EXSS3019****Applied Physiology  
Health Sciences**

**Credit points:** 3 **Teacher/Coordinator:** Mr Phillip Chapman **Session:** Semester 2 **Classes:** Lectures and practicals (28hrs) **Assessment:** Mid semester exam (20%), end semester exam (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B App Sc (OT) Hons, UG Study Abroad Program.

This unit deals with the integration of body functions during work and exercise. It includes basic and applied aspects of muscle function, temperature regulation, energy metabolism and respiratory and cardiovascular physiology. Processes associated with physical work capacity, training and adaptation to physical activity will also be examined with reference to special populations, e.g., the aged, disabled.

**EXSS3023****Exercise Testing and Prescription  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Corinne Caillaud **Session:** Semester 1 **Classes:** 3hrs lectures, 2hrs practicals **Assumed knowledge:** EXSS2022 Exercise Physiology Training Adaptations or EXSS2027 Exercise Physiology for Physicians **Assessment:** Mid semester exam, assignment, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), B App Sc (Ex & Sp Sc), M N, Health Sciences UG Cross Inst, UG Study Abroad Program.

This unit is designed to provide a comprehensive and critical examination of exercise testing and programming in low-risk populations. The scientific evidence for exercise dosages for aerobic exercise and resistance training required for health and fitness outcomes will be critically reviewed. Other aspects of exercise programming such as flexibility, warm up and instructional technique will also be covered in this unit. Through the use of lectures and case studies, students will learn how to integrate both the physiological components and logistical aspects of exercise performance, to devise individualised exercise test batteries and prescriptions. Although not a co-requisite, students will benefit from undertaking EXSS3024 Exercise, Health and Disease in parallel with Exercise Testing and Prescription.

**EXSS3024****Exercise, Health and Disease  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jacqui Raymond **Session:** Semester 1 **Classes:** 3hrs lectures, 2hrs practicals **Assumed knowledge:** Either EXSS2027 Exercise Physiology for Clinicians or both EXSS2019 Exercise Physiology - Acute Responses and EXSS2022 Exercise Physiology Training Adaptations **Assessment:** Case study exam, end semester exam, prac exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), B App Sc (Ex & Sp Sc), M N, Health Sciences UG Cross Inst, UG Study Abroad Program.

The aim of this unit is to investigate the application of exercise science to the promotion and maintenance of health via the prevention of chronic disease and the management of people suffering from chronic disease. Students will explore a range of topics including pathophysiology, risk assessment, clinical exercise testing, the role of exercise and client monitoring. Emphasis will be placed on the scientific evidence underpinning the use of exercise and effective doses in those chronic diseases which are responsive to an exercise intervention. The chronic disease conditions covered include metabolic syndrome, diabetes and cardiovascular disease.

**EXSS3027****Exercise and Rehabilitation  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Jacqui Raymond **Session:** Semester 2 **Classes:** 3hrs lectures, 2hrs practicals **Prerequisites:** EXSS3024 Exercise, Health and Disease **Assumed knowledge:** EXSS2019 Exercise Physiology - Acute Responses, EXSS2022 Exercise Physiology Training, EXSS2027 Exercise Physiology for Clinicians **Assessment:** Prac exam, case study exam, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), B App Sc (Ex & Sp Sc), M N, UG Study Abroad Program.

This unit examines the pathophysiological basis of exercise limitations and the use of exercise in the management of a range of musculoskeletal and respiratory conditions such as osteoarthritis, asthma and chronic obstructive pulmonary disease. Throughout the unit, discussion of the effects of disease on the exercise response is used to enhance understanding of normal exercise physiology and biomechanical function. Similar attention is paid to the contributions of disuse and deconditioning to exacerbation of exercise impairment imposed by disease or injury. Completion of 140 hours of workplace experience is a requirement for successful completion of

Exercise and Rehabilitation, and this can be accrued during the undergraduate program.

**EXSS3036****Research and Practice  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Halaki **Session:** Semester 1 **Classes:** Two 1hr lectures, 2hr practical/week **Assumed knowledge:** Basic biomechanics, physiological and motor learning principles, basic hypothesis training, elementary knowledge of exercise science industry **Assessment:** 1hr exam (35%), 2500 word research report (35%), 3000 word assignment (30%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), UG Study Abroad Program.

The aim of this unit is to explore (i) the scientific method using knowledge integrated from previous units of study, and (ii) professional issues related to practice in the field of exercise and sport science. This exploration will include: critical review of scientific writing, proposing research, the communication of scientific knowledge, research design, data collection, data analysis, statistical tests, ethics in research, evidence-based practice and professional and ethical behaviour. Activities and assessment will focus on practical applications in exercise and sport science. Emphasis will be placed on generic skills such as communication, teamwork, independent and critical thinking and practical skills.

**EXSS3037****Exercise Pharmacology & Immunology  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Rhonda Orr **Session:** Semester 1 **Classes:** 3hrs lectures, 2hrs tutorial/week **Prerequisites:** BIOS1133 Body Systems Structure and Function I, BIOS2098 Body Systems Structure and Function II, EXSS2019 Exercise Physiology - Acute Responses **Assessment:** Assignment (20%), mid semester exam (30%), end semester exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), B Sc (Nutr), UG Study Abroad Program.

This unit of study will introduce the student to the principles of pharmacology and immunology. Students will gain an understanding of the pharmacokinetic and pharmacodynamic action of drugs in the body. Drugs used for therapeutic medication, for recreational purposes and for performance enhancement in sport, as well as the interaction of exercise and drug action will be explored. The nature of immunity, the immune response, pathological disorders of the immune system and effects of exercise on the immune system will be examined.

**EXSS3038****Ergonomics  
Health Sciences**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hrs lectures, 2hrs practical/week **Assumed knowledge:** BIOS1159 Functional Anatomy A - Exercise, BIOS1160 Functional Anatomy B - Exercise, EXSS1018 Biomechanics of Human Movement **Assessment:** Mid semester exam (30%), assignment (30%), end semester exam (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), B App Sc (Ex & Sp Sc), M N, UG Study Abroad Program.

Ergonomics is concerned with optimising health, safety and performance in human activities. This unit will broaden the student's knowledge of human tolerance to physical tasks by considering tasks performed across a spectrum of settings, including occupational, sport, and activities of daily living. Specifically through the application of anatomy, biomechanics, and exercise and environmental physiology an understanding of the principles of matching environmental and task related parameters to human characteristics will be developed. This knowledge has application to OH&S, sport safety and the development of accessible environments for functionally impaired.

**Textbooks**

Bridger RS, Introduction to Ergonomics (2nd ed), Taylor & Francis, London (2003)

**EXSS3040****Physiological Testing and Training**

## Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Corinne Caillaud **Session:** Semester 2 **Classes:** 2hrs lectures, 2hrs practical/week **Prerequisites:** EXSS2022 Exercise Physiology Training Adaptations **Assessment:** Mid semester exam (40%), end semester exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), UG Study Abroad Program.

This unit of study provides students with both theoretical knowledge and practical skills (laboratory and field-based) for the physiological assessment and training of elite athletes. The application of current tests and measurements in sports science together with training theory and practice will be critically reviewed. Special attention will be given to the role of speed, strength and endurance in sports performance. Fundamental questions concerning the nature of the training stimulus, training thresholds, plasticity of muscle, dose-response relationships, detraining and overtraining will be investigated. Teaching and learning strategies include lectures, case studies, practical test and measurement skills. On completion of this unit of study students will demonstrate competency within the sports testing environment and a capacity to provide well researched consultancy advice on sports training theory and practice.

### EXSS3041

#### Management, Marketing and the Law

## Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hrs lectures, 1hr tutorial/week **Assessment:** Assignment (40%), end semester exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), B Hlth Sc (Hons), B Hlth Sc (Rehab Cing), B Hlth Sc (Rehab Cing) Hons, B Hlth Sci, UG Study Abroad Program.

This unit presents an overview of starting a small business, adapting current marketing principles and being aware of the many pitfalls that will be encountered along the way. Attention is given to the fundamentals of business planning, staff structuring, and understanding of current occupancy costs together with an insight into the basics of budgetary controls. Media buying, advertising and franchising are also reviewed. Proficiency in the area of legal obligations for leasing, insurance, consumer protection, third party liability and associated legislative obligations such as Occupational Health and Safety is developed. Negotiation skills and business obligations are introduced to augment the level of expertise when leaving university to work within an established firm or commence your own practice, partnership or solely owned company.

### EXSS3042

#### Nutrition for Health, Exercise & Sport

## Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Helen O'Connor **Session:** Semester 1 **Classes:** Three 1hr lectures/week for 4 weeks, two 1hr lectures for 9 weeks, one 1hr tutorial for 9 weeks **Prerequisites:** EXSS2027 Exercise Physiology for Clinicians **Assessment:** Poster presentations (10%), case-based small group work assignments (20%), practical anthropometry examination (20%), end semester exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B Sc (Nutr), B App Sc (Ex & Sp Sc), M N, UG Study Abroad Program.

This unit provides students with background knowledge in nutrition as applied to public health and exercise performance. Emphasis is given to the major, nutrition related public health issues faced by western countries including the impact of diet on obesity, diabetes mellitus, cardiovascular disease and cancer. Students will learn to appreciate how manipulation of diet is used in the management of the abovementioned lifestyle diseases. In addition, students will learn about the way diet can optimise exercise performance through provision of adequate energy and ideal distribution of macronutrients. Use of dietary supplements and nutritional ergogenic aids and the benefit of sports nutrition strategies such as 'carbohydrate loading' will also be a focus. This unit of study has a strong practical emphasis.

### EXSS3043

#### High Performance Coaching

## Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1hr lectures, 2hr practical, tutorial/week **Prohibitions:** EXSS1034 Sport Coaching **Assumed knowledge:** EXSS2016 Motor Control, EXSS2023 Growth, Development and Ageing, BACH1161 Introduction to Behavioural Science **Assessment:** 2000 word report (40%), 1500 word review (30%), 2hr exam (30%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), UG Study Abroad Program.

This unit provides an introduction to the principles of sports coaching and the role of a high performance coach. The unit aims to integrate and apply the concepts acquired over the course of the degree. Students will conduct athlete profiling, sports analyses and performance analyses for the development of periodised training programs. The psychological and behavioural aspects of sport and training will also be explored, providing students with practical skills essential for the development of optimum athletic performance. Students will develop practical knowledge relating to the application of motor control and learning in skill acquisition. The issue of talent identification will be explored using relevant knowledge acquired from previous units of study. Students will also be able to draw on their understanding of various physical and psychological disorders to examine the area of inclusive coaching/athletes with disabilities. The emerging area of athlete development will be discussed, focusing on the promotion of educated and rounded athletes to enhance both competitive performance and life after sport. Legal and business considerations relating to sports coaching, and the structure of the Australian coaching scheme will be explored to provide students with an understanding of the sport and coaching industries.

### EXSS3044

#### Biomechanics of Sports Techniques

## Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Edouard Rene Ferdinands **Session:** Semester 1 **Classes:** Two 1hr lectures, two 1hr tutorials/week **Assessment:** 1hr mid semester exam (20%), written assignment (20%), 2hr end semester exam (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc).

The prime focus of this unit is the application of biomechanical principles to the analysis, understanding, assessment, feedback and improvement of techniques to enhance sport performance. Students will be introduced to the biomechanical analysis of various popular sports such as cricket, golf, soccer, weight lifting, tennis, throwing, etc. Many of the case studies involve the development of practical assessment competency. Skills include the development of a qualitative analysis framework in which to use biomechanical principles to analyse all sporting techniques. On completion of this unit, students will have the specialised knowledge to work with athletes in sports testing environment, and develop a career in which they can work with elite coaches and athletes.

### EXSS3045

#### Professional Practice

## Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2hr lectures, tutorials/week in first 3 weeks of semester, 140hrs professional experience **Assessment:** Individual report, completion of at least 140hrs practicum **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex & Sp Sc).

The aim of this unit is to engage students in practical experiences relevant to exercise science. These experiences will reinforce theoretical knowledge and practical skills acquired through university studies. Students will complete at least 140 hours of supervised practicum in relevant areas such as exercise testing and exercise delivery. Opportunities for appropriate placements will be advertised to students, however students may also seek their own opportunities. Although this unit runs for only one semester, students may wish to (and are encouraged) to acquire supervised practicum hours throughout their degree selecting placements which are consistent with their knowledge and skills at various stages of the degree. This

unit also includes some lecture and tutorial content covering issues related to professional practice.

### EXSS3046

#### Clinical Exercise Practice Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Jacqui Raymond **Session:** Semester 2 **Classes:** 4hrs lectures, tutorials, practical/week **Prerequisites:** EXSS3023 Exercise Testing and Prescription, EXSS3024 Exercise, Health and Disease, EXSS3037 Exercise Pharmacology & Immunology **Corequisites:** EXSS3027 Exercise and Rehabilitation, EXSS3038 Ergonomics **Assessment:** Written assignment, practical competency assessment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex & Sp Sc).

This unit introduces students to a range of issues related to exercise physiology professional practice and service delivery. Topics covered include oral and written communication skills and clinical decision making. Students will also undertake practical work with clients. This practical work will reinforce the content covered in lectures/tutorials and allow the student to build their confidence and skill level in an area of exercise delivery for clinical populations. Students will need to be flexible with times for practical work as this will depend on clinical resources.

### EXSS3047

#### Nutrition Practice for Health & Exercise Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Helen O'Connor, Dr Kieron Rooney, Dr Nathan Johnson **Session:** Semester 1 **Classes:** 2hr lecture/week for 8 weeks, 2hr tutorial for 5 weeks, 2hr practical for 2 weeks (or additional 12hrs if students elect to complete anthropometry accreditation) **Corequisites:** NUTR3911 Nutritional Assessment Methods, NUTR3921 Methods in Nutrition Practice **Assessment:** Group presentation (30%), final exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex, SS&Nut)Hons, B App Sc (Ex & Sp Sc), B Sc (Nutr).

This unit provides the theoretical background supporting the manipulation of diet to enhance sports performance. Students will learn about the way diet can optimise exercise performance through the provision of adequate energy and ideal distribution of macronutrients. Use of dietary supplements and nutritional ergogenic aids and the benefit of sports nutrition strategies such as 'carbohydrate loading' will also be a focus. This unit of study has a strong practical emphasis so that in addition to the provision of a theoretical rationale for diet manipulation, students will be introduced to practical diet strategies to improve nutritional status and exercise performance. Students will have the opportunity to undertake a small research project and be given the opportunity to attain a Level 1 International Society for Kinanthropometry accreditation via practical sessions in this unit.

#### Textbooks

Burke L and Deakin V, Clinical Sports Nutrition, McGraw-Hill, Sydney (2006)

### EXSS3048

#### Applied Nutrition Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Helen O'Connor, Dr Kieron Rooney, Dr Nathan Johnson **Session:** Semester 1 **Classes:** 2hr lectures, 2hr practical classes/week **Assessment:** Presentation, report, practical exam, end semester exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit is not available in 2009*

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex, SS&Nut)Hons, B App Sc (Ex & Sp Sc), B Sc (Nutr).

This unit provides students with background knowledge in nutrition as applied to public health and exercise performance. Emphasis is given to the major, nutrition-related public health issues faced by western countries including the impact of diet on obesity, diabetes mellitus, cardiovascular disease and cancer. Students will study how diets and individuals can be assessed for nutritional adequacy and

how diet can be manipulated to treat the above mentioned lifestyle diseases. In addition, students will learn about the way diet can optimise exercise performance through provision of adequate energy and ideal distribution of macronutrients. Use of dietary supplements and nutritional ergogenic aids and the benefit of sports nutrition strategies such as 'carbohydrate loading' will also be a focus. This unit of study has a strong practical emphasis so that in addition to provision of a theoretical rationale for diet manipulation, students will be introduced to practical diet strategies used to improve nutritional status and exercise performance. An opportunity to attain a Level 1 International Society for Kinanthropometry accreditation will also be available through the practical anthropometry classes in this unit of study.

### EXSS3801

#### Exercise and Sport Exchange Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex & Sp Sc).

Students enrolled at the University of Sydney who wish to take the equivalent of a 6 credit point senior unit of study at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Head, Discipline of Exercise & Sport Science.

### EXSS3802

#### Exercise and Sport Exchange Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex & Sp Sc).

Students enrolled at the University of Sydney who wish to take the equivalent of a 6 credit point senior unit of study at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Head, Discipline of Exercise & Sport Science.

### EXSS3803

#### Exercise and Sport Exchange Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex & Sp Sc).

Students enrolled at the University of Sydney who wish to take the equivalent of a 6 credit point senior unit of study at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Head, Discipline of Exercise & Sport Science.

### EXSS3804

#### Exercise and Sport Exchange Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Ex & Sp Sc).

Students enrolled at the University of Sydney who wish to take the equivalent of a 6 credit point senior unit of study at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Head, Discipline of Exercise & Sport Science.

#### **EXSS4004**

##### **Honours Thesis A**

##### **Health Sciences**

**Credit points:** 24 **Teacher/Coordinator:** Dr Chin Moi Chow **Session:** Semester 1 **Classes:** No on-campus classes, although workshop attendance is compulsory **Assessment:** Continuous assessment, thesis examination **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex, SS&Nut)Hons, B App Sc (Ex &Sp Sc)Hons.

Honours students undertake a research project in an area of exercise and sport science. Each student designs and implements an approved research project, and submits a thesis describing the project and its implications. In completing the research thesis, the student works closely with an academic staff member who serves as the supervisor.

#### **EXSS4005**

##### **Honours Thesis B**

##### **Health Sciences**

**Credit points:** 24 **Teacher/Coordinator:** Dr Chin Moi Chow **Session:** Semester 1, Semester 2 **Classes:** No on-campus classes, although workshop attendance is compulsory **Prerequisites:** EXSS4004 Honours Thesis A **Assessment:** Continuous assessment, thesis examination **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (Ex, SS and Nut), B App Sc (Ex, SS&Nut)Hons, B App Sc (Ex &Sp Sc)Hons.

Honours students will complete their research projects and write a thesis describing the project and its implications. Students will continue to work closely with the academic staff member who is their supervisor.

# University undergraduate units of study – F

## FCNH3013

### Research in Nursing Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 2 **Classes:** study days **Assessment:** research proposal, exam, online quiz **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N.

This unit of study aims to foster the notion that nursing research is integral to all aspects of nursing theory, education, applications and practice. Students will explore a range of quantitative and qualitative research techniques. This unit will help prepare students for future research activities.

## FCNU2002

### Family Health Nursing Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lectures, tutorials and clinical laboratory sessions, clinical placements and formal assessment of clinical performance **Prerequisites:** CLIN1001 and CLIN1002 **Assessment:** Report, presentation, exam, off-campus clinical record book **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B N, B N (I A H), B N, B A, B N, B Sc.

This unit of study focuses on the role of the family in promoting and safeguarding the health and well being of its members at all stages of human development. The unit will assist students to develop tolerance and understanding of the great diversity of family life in modern Australia. The unit will follow the development of the individual family member from conception and birth, through childhood, adolescence, adulthood and old age. It will enable students to develop the nursing knowledge and skills to assist families in maximising their health.

## FCNU2003

### Chronicity and Palliation in Nursing Nursing and Midwifery

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lectures, study days, clinical laboratory sessions, clinical placements and formal assessment of clinical performance **Prerequisites:** CLIN1001 and CLIN1002 **Assessment:** drug calculation test, essay, exam, clinical performance appraisal (CPA)\*, off-campus clinical performance\* **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B N, B N (I A H), B N, B A, B N, B Sc.

This unit will build on the understanding of nursing practice commenced within preceding units. The unit will specifically address nursing practices that are designed to meet the needs of individuals and families who are either living with long term health problems or disabilities, or terminal illness. An emphasis will be placed on an holistic approach to nursing care in a variety of health care settings.

## FCNU3001

### Complex Mental Health Nursing Nursing and Midwifery

**Credit points:** 8 **Session:** Semester 1 **Classes:** lectures, tutorials, clinical laboratory sessions, clinical placements and a formal assessment of clinical performance. **Prerequisites:** All Year 1 and Year 2 units of study. **Assessment:** case management plan and annotated appendix resources, written examination, off-campus clinical performance **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N, B N (I A H), B N, B A, B N, B Sc, UG Study Abroad Program.

This unit extends knowledge and skills introduced in the unit of study, Mental Health Nursing. Issues of more complexity within mental health will be addressed. The effect on the on the mental health and lifestyle of the individual and family and/or significant others of issues such as addiction and homelessness will be considered. Post-traumatic stress in relation to victims of torture, trauma and incarceration will be explored. The principles of primary health care will be integrated in the development of nursing care for people experiencing identified psychopathologies in acute mental health settings and for individuals experiencing enduring chronic mental illness. Students will assess the principles of occupational health and safety and apply the principles of de-escalation, extending skills in micor-counselling. The principles of least to most restrictive mental health nursing environments (as per the National Standards of Mental Health Care) will be explored. Evidenced based strategies for preventing and managing violence which students can then apply in maintaining a safe environment in their clinical practice will be introduced. Students in this unit of study will identify and critique published research as it informs their developing practice and relates to the development of mental health nursing. They will also appraise research development opportunities in mental health by identifying research possibilities for mental health nursing and society.

## FCNU3002

### Community Health Nursing Nursing and Midwifery

**Credit points:** 8 **Session:** Semester 2 **Classes:** lectures, tutorials, clinical placements and clinical assessment **Prerequisites:** All Year 1 and Year 2 units of study, CLIN3001, FCNU3001. **Assessment:** drug calculation test, tutorial presentation, exam, clinical assessment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B N, B N (I A H), B N, B A, B N, B Sc, UG Study Abroad Program.

This unit is designed to provide students with a broad knowledge base in the concepts and practices pertaining to community health nursing. This area of practice is concerned with the health of the community as a whole, and the groups and individuals that are part of the community. The practice of community nursing is based on primary health care principles such as equity, access, empowerment, self-determination and inter-sectorial collaboration. The role of the community nurse, which includes care provider, educator, case manager, coordinator, counsellor, advocate and researcher, will be identified. Students will build on their knowledge of the physical, psychological, socio-cultural, politico-economic and environmental factors that influence community health through the lifespan. Health promotion and disease prevention across the health - illness continuum for defined populations in community based settings will be emphasised. Current health promotion concepts, theories and models will be explored and competencies in health promotion will be developed. Epidemiological concepts and methodologies integral to the understanding of community health and community nursing will be examined. The identification of individuals and populations at risk and the planning, implementing and evaluating of health services will demonstrate the relationship between community nursing and epidemiology.

## FCNU3009

### Older Adults: Acute Care Nursing and Midwifery

**Credit points:** 8 **Session:** Semester 2 **Classes:** lectures, tutorials, clinical laboratory sessions, clinical placements and a formal assessment of clinical performance **Prerequisites:** All Year 1 and Year 2 units of study, CLIN3001, FCNU3001. **Assessment:** learning contract, literature review, essay,

presentation, clinical assessment, exam **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B N, B N, B A, B N, B Sc, UG Study Abroad Program.

Australia, as well as many other countries, is experiencing an explosion in the number of people entering old age and in particular old-old age. Increasingly, nurses are called upon to provide care for older adults in hospital, community and long-term facilities. To provide optimal and relevant care, nurses require knowledge of normal ageing changes as well as the different ways in which disease presents in older adults (both Indigenous and non-Indigenous) compared to younger adults. In addition, there are some diseases that are more common to older adults, eg. Alzheimer's disease and others, that have significant implications for them (eg. complications related to being bed- or chairbound). This unit will examine myths, attitudes and perceptions about the elderly as well as developing students' understanding of acute health problems experienced by older adults in modern societies. It includes a period of clinical education in a specialised setting responsible for the management of older adults.

### FILM2810

#### Film Studies Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons).

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point junior unit of study in Film at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Undergraduate Studies Coordinator.

### FILM2811

#### Film Studies Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons).

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point junior unit of study in Film at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Undergraduate Studies Coordinator.

### FILM2812

#### Film Studies Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons).

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point junior unit of study in Film at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Undergraduate Studies Coordinator.

### FILM2813

#### Film Studies Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons).

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point junior unit of study in Film at an approved overseas

university should enrol in this unit. Such students must seek approval for their proposed course of study from the Undergraduate Studies Coordinator.

### FILM2814

#### Film Studies Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons).

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point junior unit of study in Film at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Undergraduate Studies Coordinator.

### FILM2815

#### Film Studies Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons).

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point junior unit of study in Film at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Undergraduate Studies Coordinator.

### FILM4101

#### Film Studies Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr R Smith **Session:** Semester 1, Semester 2 **Classes:** One 2 hour film screening and one 2 hour seminar per unit per week **Prerequisites:** The prerequisite for Film Studies honours is a credit average in 48 senior credit points of Film Studies. If you do not have this prerequisite please contact the Film Studies coordinator or office to determine possible waiving of the prerequisite. The honours year comprises two semester-long units of study and a thesis of 15,000 -18,000 words in length. Film Studies honours students can commence their study either at the beginning of the year or mid-year. **Assessment:** Film Studies IV has 3 components: a thesis and two semester length option courses. The thesis will be worth 60% of your final result and the two options will each count for 20% of the final result. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B A Informatics(Hons), B Soc Sci (Hons).

### FILM4102

#### Film Studies Honours B Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** FILM4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B A Informatics(Hons), B Soc Sci (Hons).

Please refer to FILM4101

### FILM4103

**FINC2011****Corporate Finance I****Economics and Business**

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Early, Summer Late, Winter Main **Classes:** 2hrs of lectures and 1 x tutorial per week  
**Prerequisites:** ECON1001 and ECON1002 and ECMT1010 and (ACCT1001 or ACCT1003) **Prohibitions:** FINC2001 **Assessment:** 1 x 3hr exam, Assignments, Mid-semester test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Study in Finance commences in second year.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

This unit provides an introduction to basic concepts in corporate finance and their application to (1) valuation of risky assets including stocks, bonds and entire corporations, (2) pricing of equity securities, and (3) corporate financial policy decisions including dividend, capital structure and risk management policies. An emphasis is placed on the application of ideas and current practices in each of these areas.

**FINC2012****Corporate Finance II****Economics and Business**

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Main **Classes:** 2hrs of lectures, 1 workshop and 1 tutorial per week **Prerequisites:** FINC2011 or FINC2001 **Prohibitions:** FINC2002 **Assessment:** 1 x 3hr exam, Assignments, Mid-semester test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program, UG Summer/Winter School.

This unit builds on FINC2011 Corporate Finance I, by extending basic concepts in corporate financing, investing and risk management. The first half of the unit is devoted to current theories of corporate financing and their practical application in corporate investment and capital budgeting. The second half of the unit examines securities and securities markets with an emphasis on pricing, investment characteristics and, importantly, their use by corporations to manage risk. The securities examined include: bonds and related fixed income products; futures; options; and securities denominated in foreign currencies. The goal of the unit is to broaden students' knowledge of corporate finance in preparation for further study in finance in third year.

**FINC2013****Introductory Mathematical Finance****Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hrs of lectures and 1 tutorial per week; Additional workshops as required. **Prerequisites:** FINC2011 or FINC2001 **Prohibitions:** FINC2003, FINC2004 **Assumed knowledge:** HSC 3 Unit mathematics **Assessment:** 1 x 3hr exam, Assignments, Mid-semester test. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

The principle objective of this unit is to introduce students to the basic elements of mathematical finance. Students are exposed to key areas in the modern theory of finance and corporate financial policy with specific emphasis on their development and treatment from mathematical and statistical foundations. The unit provides necessary mathematical background. Topics that are introduced from a more mathematical perspective include: principles of modern financial valuation and analysis; asset pricing theory and market efficiency; theory of portfolio selection and management; and measurement and management of financial risk.

**FINC2192****Finance 2 Honours****Economics and Business**

**Credit points:** 3 **Session:** Semester 2 **Classes:** Weekly seminar  
**Prerequisites:** Distinction or higher grade in FINC2011 or FINC2001; competitive and by application **Prohibitions:** FINC2092 **Assessment:** Assessment of advanced topics covered **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc.

This unit develops the conceptual and theoretical foundations of modern finance theory. Students are asked to understand and critique existing theories and to see their connections with other disciplines and with financial industry developments.

**FINC2551****Finance Exchange****Economics and Business**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc.

**FINC2552****Finance Exchange****Economics and Business**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc.

**FINC3011****International Financial Management****Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2hrs of lectures and 1 tutorial per week **Prerequisites:** (FINC2012 or FINC2002) or (FINC2013 or FINC2003) or (FINC2014 or FINC2004) **Prohibitions:** FINC3001 **Assessment:** 2 x 2hr exams; Project; Assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

Markets are increasingly globalised. There are very few businesses or industries that are not required to deal with issues such as foreign currency, foreign competition and direct investment. This unit is designed to allow students to extend their understanding of basic principles in finance to an international environment. Globalisation of markets introduces risks but also opens up profitable opportunities. Topics covered include: foreign currency valuation and markets; international parity conditions; measuring and managing foreign exposure; international portfolio management; capital budgeting and foreign direct investment; international tax management and international financing strategy.

**FINC3012****Derivative Securities****Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hrs of lectures and 1 tutorial per week **Prerequisites:** (FINC2012 or FINC2002) or (FINC2013 or FINC2003) or (FINC2014 or FINC2004) **Prohibitions:** FINC3002 **Assumed knowledge:** Calculus, regression, probability theory, random distributions **Assessment:** 1 x Report/sem; Exams; Assignment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

Options, futures and swaps are derivatives of underlying securities such as commodities, equities and bonds. These types of securities are increasingly used to manage risk exposure and as a relatively low-cost-way of taking a position in a security or portfolio. They are also being used as part of senior management compensation as a

way of attempting to align the interests of shareholders with that of management. This unit is designed to provide an introduction to this important area of finance without requiring a high level of mathematical sophistication. However, a strong quantitative base is an advantage.

### **FINC3013**

#### **Mergers and Acquisitions Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hrs of lectures and 1 tutorial per week; Additional workshops as required. **Prerequisites:** (FINC2012 or FINC2002) or (FINC2013 or FINC2003) or (FINC2014 or FINC2004) **Prohibitions:** FINC3003 **Assessment:** Final exam, Tutorial work, Project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit will provide: an understanding of the economic and strategic drivers of corporate restructuring activity and their use in the design and analysis of restructuring transactions. Understanding of the evaluation of outcomes from restructuring transactions, both the theory based explanations and the empirical tests of the theories. It will develop the ability to identify synergies in a restructuring transaction and use Discounted Cash Flow methods to assign a value to these benefits. A detailed understanding of the design and economic impacts of deal structures used to effect corporate restructuring transactions. A detailed awareness of the process of merger arbitrage and its contribution to outcome of restructuring transactions. An appreciation of the regulatory environment for restructuring transactions and the impact of these regulations on the process and outcomes of restructuring transactions.

### **FINC3014**

#### **Trading and Dealing in Security Markets Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hrs of lectures and 1 tutorial per week **Prerequisites:** (FINC2012 or FINC2002) or (FINC2013 or FINC2003) or (FINC2014 or FINC2004) **Prohibitions:** FINC3004 **Assessment:** Mid-semester exam; Final exam; Tutorial work; Project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit is concerned with the processes which turn orders into trades in securities markets, and the forces which mould and affect both order flow and order execution. The unit is an introduction to some fundamental market design and structure ideas. At the end of the unit, students should be able to understand (1) how the international markets for foreign exchange, swaps, bonds and equities are organised, (2) how trading is conducted in these markets and how these transactions are cleared, (3) how the markets are regulated, if they are supervised and what risks different counterparties face in these markets. The unit aims to equip students to independently analyse international investment and financing alternatives and to estimate expected returns and costs taking into account liquidity risk, price volatility and credit risk.

### **FINC3015**

#### **Financial Valuation: Case Study Approach Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2hrs of lectures per week; 1 workshop session (not every week) **Prerequisites:** (FINC2012 or FINC2002) or (FINC2013 or FINC2003) or (FINC2014 or FINC2004) **Prohibitions:** FINC3005 **Assessment:** Case study, Workshop work, Exam, Small project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit applies all aspects of finance theory to the general problem of valuing companies and other financial assets. This requires a synthesis of the concepts of present value, cost of capital, security valuation, asset pricing models, optimal capital structures and some related accounting concepts. The subject aims to reach a level of practical application that allows students to understand both the

theoretical frameworks and institutional conventions of real world corporate valuations.

### **FINC3017**

#### **Investments and Portfolio Management Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2hrs of lectures and 1 tutorial per week **Prerequisites:** (FINC2012 or FINC2002) or (FINC2013 or FINC2003) or (FINC2014 or FINC2004) **Prohibitions:** FINC3007 **Assessment:** Mid-Semester Exam; Assignment; Final Examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

This unit is designed to provide a comprehensive analytical approach to the modern theory of investments. Topics covered include: the valuation of bonds and stocks; mean-variance analysis; Markowitz type portfolio analysis; duration and convexity analysis; term structure of interest rates; option pricing; portfolio insurance; performance evaluation; and forecasting. Basic statistics and probability concepts are reviewed at the beginning to ensure that all students have adequate understanding. Although analytical aspects of investments theory are stressed, there is also an equal amount of emphasis on the intuitive as well as practical aspects of the subject.

### **FINC3018**

#### **Bank Financial Management Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2hrs of lectures and 1 tutorial per week **Prerequisites:** (FINC2012 or FINC2002) or (FINC2013 or FINC2003) or (FINC2014 or FINC2004) and (ECOS2001 or ECON2001) or (ECOS2901 or ECON2901) and (ECOS2002 or ECON2002) or (ECOS2902 or ECON2902) **Prohibitions:** FINC3008 **Assessment:** Mid-Semester Exam; Assignment; Final Examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Res Ec, UG Study Abroad Program.

The central objective of this unit is to expose students to the basic principles of commercial bank management. The topics that are covered include: the theory and practice of banking from a financial management perspective; banks and the financial services industry; regulatory restrictions and financial management; performance analysis and strategic planning; asset management and liquidity; investment and loan management; liability and deposit management; capital structure and dividend decisions; and financial management implications of electronic banking, international banking, and other developments.

### **FINC3193**

#### **Finance 3 Honours (Corporate Finance) Economics and Business**

**Credit points:** 3 **Session:** Semester 1 **Classes:** A weekly workshop/seminar **Prerequisites:** Distinction or higher grade in (FINC2012 or FINC2002) or (FINC2013 or FINC2003) or (FINC2014 or FINC2004) and (FINC2192 or FINC2092) or with the permission of the Discipline of Finance. **Prohibitions:** FINC3093 **Assessment:** Seminar presentation; Project; Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc.

This unit deals with more advanced aspects of information transfers between interested parties and modelling of corporate issues such as productivity, remuneration and value.

### **FINC3194**

#### **Finance 3 Honours (Securities Markets) Economics and Business**

**Credit points:** 3 **Session:** Semester 2 **Classes:** A weekly workshop/seminar **Prerequisites:** Distinction or higher grade in (FINC2012 or FINC2002) or (FINC2014 or FINC2004) and (FINC2192 or FINC2092) or with the permission of the Discipline of Finance. **Prohibitions:** FINC3094 **Assessment:** Presentation; Assignment; Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec Soc Sc.

The unit considers who trades, why they trade and how trading takes place. It examines how technology and regulatory changes affect trading behaviour. The unit introduces students to market microstructure research. By studying and critiquing the academic literature, students become familiar with the research questions which have examined and research methods used. This allows students to develop the necessary skills to design and undertake their own research projects in the honours year.

#### **FINC3551**

##### **Finance Exchange Economics and Business**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc.

##### **Finance Honours A Economics and Business**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** (FINC2192 or FINC2092) and ((FINC3193 or FINC3093) or (FINC3194 or FINC3094)) with the grade of Distinction or better in at least two, or with the permission of the Head of Discipline. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Requirements for the Pass degree must be completed before entry to level 4000 honours units of study.*

**Associated degrees:** B Com (Hons), B Ec (Hons).

The honours program in Finance is directed at producing extremely high quality graduates who are capable of undertaking research in finance, either via an advanced research degree at the Master's or PhD level or in the financial community in technical/research-related positions requiring both a high level of analytical skills and an ability to work independently. Graduates are highly sought by investment banking, stockbroking, funds management and management consulting firms. Actual offerings in any year depend on staff availability. With approval, the equivalent of a semester unit can be taken from other disciplines or faculties. Students are required to write a research report in the style of an academic article but with a more extensive literature review. Candidates are encouraged to undertake research of an original nature and of publishable quality. Typically the subject areas relate to securities market micro-structure, investments

and corporate finance, as these are the areas in which the Discipline has expertise and supervisory skills.

Students who have completed majors in both Finance and Accounting, Finance and Econometrics, Finance and Economics or Finance and Marketing, and who are eligible to undertake fourth year honours programs in at least one discipline area of their two majors, may be eligible to undertake joint honours programs, subject to the approval of the Honours Coordinator in both disciplines. Candidates must enrol in FINC4102, FINC4103 and FINC4104 to complete the honours year.

#### **FINC4102**

##### **Finance Honours B Economics and Business**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** FINC4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

## FRES1001

### Research A

#### Sydney College of the Arts

**Credit points:** 2 **Teacher/Coordinator:** Oliver Smith, Foundation Coordinator, and Library staff. **Session:** Semester 1, Semester 2 **Classes:** Library sessions plus self-directed study; total of 40 hours of student effort. **Corequisites:** MSTD1111, MSTD1121, MDRW1013, THAP1201 and THAP1211 **Assessment:** Students are eligible to be assessed for this program if attendance is 90% or over and students have submitted their work folders by the due date. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B V A, Visual Arts UG Non-Degree.

The Foundation research program consists of group library sessions to develop your understanding and skills necessary for visual art research. A written project is undertaken during the semester after the basic library orientation during the first weeks of semester is complete. The independent assessment task will investigate your understanding of the web-based, on-line library catalogue, making accurate citations and your ability to conduct searches inside the Library and on-line.

## FRES1002

### Research B

#### Sydney College of the Arts

**Credit points:** 2 **Teacher/Coordinator:** Oliver Smith, Foundation Coordinator, and Library staff. **Session:** Semester 1, Semester 2 **Classes:** Library sessions, plus self-directed study; total of 40 hours of student effort. **Corequisites:** MSTD1112, MSTD1123, MDRW1014, THAP1202 and THAP1212 **Assessment:** Students are eligible to be assessed for this program if attendance is 90% or over and students have submitted their work folders by the due date. For further information refer to SCA Assessment Criteria. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B V A, Visual Arts UG Non-Degree.

Continuation of Research A. In this semester your experience and use of the Library is further deepened with an assessment project that looks at using the on-line databases. You will remain in groups to workshop the use of the research tools in the Library in order to complete the assessment task independently.

## FRNC1611

### Junior French Introductory 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Alice Caffarel **Session:** Semester 1, Summer Main, Winter Main **Classes:** 4 hours per week (1 lecture, 3 tutorials) **Prerequisites:** Complete beginners, or less than 2 years of French, or less than 65% in Beginners HSC French **Prohibitions:** FRNC1101 **Assessment:** Continuous assessments: participation and weekly exercises online and face-to-face equivalent to 900 words (20%), two grammar tests equivalent to 1350 words (30%), oral test equivalent to 1350 words (30%), written test equivalent to 900 words (20%). (Total assessment 4500 words.) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program, UG Summer/Winter School.

This unit is based both on communicative methodology and functional approach to language. Its main objective is to teach the learner how to communicate and use grammar appropriately in a range of situations, while learning about French culture. Speaking, writing, listening and reading comprehension skills, will be developed through communicative activities. In addition, online resources and grammar activities will complement face-to-face teaching. This unit provides the essential skills for negotiating in and understanding everyday situations. FRNC1612 is the standard progression.

#### Textbooks

Di Giura, M. and Beacco, J-C. (2007). *Alors? Méthode de français Niveau A1* Course booklet to be purchased from the University Copy Centre.

## FRNC1612

### Junior French Introductory 2

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Alice Caffarel **Session:** Semester 2 **Classes:** 3 hours per week (1 lecture, 2 tutorials) **Prerequisites:** FRNC1611 or FRNC1101 or equivalent **Prohibitions:** FRNC1102 **Assessment:** Continuous assessment: participation and weekly exercises online and face-to-face and written expression (equivalent to 2250 words, 50%), oral exam (20%), written exam (equivalent to 2250 words, 30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program, UG Summer/Winter School.

FRNC1612 Junior French 2 is the continuation of FRNC1611 Junior French 1. It aims at strengthening students' oral communication skills and at developing further their written skills (reading and writing). Having completed FRNC1612 Junior French 2, students in their second year will normally enter FRNC2611 Senior French 1.

#### Textbooks

Robbe-Grillet, A (1985). *Djinn. Un trou entre les pavés disjoints* Course booklet to be purchased from the University Copy Centre.

## FRNC1621

### Junior French Intermediate 3

#### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** Less than 80% in HSC French Continuers or more than 65% in HSC French Beginners or equivalent **Prohibitions:** FRNC1201 **Assessment:** Class participation and written exercises (20%) (800 words), 2 written grammar tests (40%) (2200 words), comprehension test (20%) (1000 words), oral test (20%). (Total assessment 4000 words equivalent.) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is designed for students who have studied some French but have not taken the Higher School Certificate examinations, or have less than 80% in French Continuers or Extension unit, or more than 65% in Beginners. It is based on a communicative approach and provides a systematic review of spoken and written French, building on students' previous experience of the language.

#### Textbooks

Capelle, G & Gidon, N. (1999) *Reflet 1*, Paris: Hachette Course booklet to be purchased from the University Copy Centre.

## FRNC1622

### Junior French Intermediate 4

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrea Williams **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** FRNC1621 or FRNC1201 or equivalent **Prohibitions:** FRNC1202 **Assessment:** Class participation and written exercises (20%) (800 words), 2 written grammar tests (40%) (2200 words), comprehension test (20%) (1000 words), oral test (20%). (Total assessment 4000 words equivalent.) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is the continuation of FRNC1621 Junior French 3. It continues to develop speaking, listening, writing and reading skills, while providing further insights into contemporary French culture. Having completed FRNC1622 Junior French 4, students in their second year will usually enter FRNC2611 Senior French 1.

### Junior French Advanced 5

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Caroline Lipovsky **Session:** Semester 1 **Classes:** Two 1 hour lectures and two 1 hour tutorials per week **Prerequisites:** HSC French Continuers and Extension or more than 80% in Continuers French **Prohibitions:** FRNC1301 **Assessment:** Language: Two 200 word written assignments in French (equivalent to 800 words in English), one written class test in French (equivalent to 1500 words in English), one 4-5 minute oral test in French (equivalent to 1000 words in English). Reading: One written class test in French (equivalent to 1200 words in English). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is designed for students who have completed HSC French Continuers and Extension or obtained more than 80% in Continuers. It consists of two segments (Practical Language and Reading) that together seek to develop speaking, writing, listening and reading skills, while providing an insight into contemporary French culture.

#### Textbooks

Course booklets to be purchased from the University Copy Centre.

### FRNC1632

#### Junior French Advanced 6

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Caroline Lipovsky **Session:** Semester 2 **Classes:** Two 1 hour lectures and two 1 hour tutorials per week **Prerequisites:** FRNC1631 or FRNC1301 or equivalent **Prohibitions:** FRNC1302 **Assessment:** Language: Two 200 word written assignments in French (equivalent to 800 words in English), one written class test in French (equivalent to 1000 words in English), one 3 minute oral test in French (equivalent to 700 words in English). Reading: One 1 hour test on medieval literature (equivalent to 1000 words in English), one 3 minute oral exercise on theatre in French (equivalent to 1000 words in English). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is the continuation of the first semester unit FRNC1631. Like that unit, it consists of two segments (Practical Language and Reading) that together seek to develop speaking, writing, listening and reading skills, while providing an insight into contemporary French culture.

#### Textbooks

Aucassin et Nicolette, Garnier Flammarion

La Comédie du Drame, Folio

Course booklets to be purchased from the University Copy Centre.

### FRNC1801

#### French Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud.

For students studying overseas.

### FRNC1802

#### French Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud.

For students studying overseas.

### FRNC2611

#### Senior French Intermediate 1

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Peter Cowley **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** FRNC1622, FRNC1612, FRNC1202, FRNC1102 or equivalent **Prohibitions:** FRNC2103 **Assessment:** Classwork 20% (equivalent to 800 words); reading and writing tests 80% (equivalent to 3200 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is based on a communicative approach and concentrates on interactive exercises and activities to consolidate speaking, listening, writing and reading skills, reinforce understanding grammar, extend vocabulary and improve confidence in communication. This unit is normally taken by specialist students in conjunction with FRNC2614 French Reading 1.

#### Textbooks

Collins-Robert French Dictionaries

Grammaire progressive du français (intermédiaire)

Course booklets to be purchased from the University Copy Centre.

### FRNC2612

#### Senior French Intermediate 2

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Peter Cowley **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** FRNC2611, FRNC2103 or equivalent **Prohibitions:** FRNC2104 **Assessment:** Classwork 15% (equivalent to 600 words), written tests 65% (equivalent to 2600 words), oral tests 20% (equivalent to 800 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is based on a communicative approach and concentrates on interactive exercises and activities to develop skill in complex sentence formation and communicative functions, extend vocabulary, learn about aspects of French culture and acquire skills necessary for oral class presentations and essay writing in French. This unit is normally taken by specialist students in conjunction with FRNC2615 French Reading 2. Having completed FRNC2612 Senior French 2, students in their third year will enter FRNC2621 Senior French 3.

#### Textbooks

Collins-Robert French Dictionaries

Grammaire progressive du français (intermédiaire)

Course booklets to be purchased from the University Copy Centre.

### FRNC2614

#### French Reading 1: Text and Society

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Françoise Grauby **Session:** Semester 1 **Classes:** 1 hour lecture and 1 hour tutorial per week **Prerequisites:** FRNC1612, FRNC1622, FRNC1102, FRNC1202 or equivalent **Prohibitions:** FRNC2621, FRNC3631, FRNC2501, FRNC3621, FRNC3622 **Assessment:** Three written assignments, equivalent to 6000 words in English: class test (30%), commentary on text (30%), essay (30%), and participation and preparation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is required for students intending to major or take options in their third year*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit provides a socio-historical and cultural framework for students' studies within the department and develops reading, analytical and critical skills through the close study of a variety of contemporary, authentic texts. The segment presents an overview of the social transformations France has undergone in the twentieth century and the political challenges it confronts as it attempts to redefine its role in the world and in Europe.

#### Textbooks

A dossier of texts to be purchased from the University Copy Centre.

### FRNC2615

#### Literature and Theatre

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrea Williams **Session:** Semester 2 **Classes:** 1 hour lecture and 1 hour tutorial per week **Prerequisites:** FRNC2614, FRNC2501 or equivalent **Prohibitions:** FRNC2502, FRNC2622, FRNC3631, FRNC3621, FRNC3622 **Assessment:** Class test (1000 words), commentary (1000 words), oral presentation (1500 words), essay (2500 words), (total assessment 6000 words equivalent). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is required for students intending to major or take options in their third year*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit continues the study of French national and cultural identity through the centuries, the development of reading, analytical and critical skills, and the practice of oral and written French. It places greater emphasis on literary texts, including study of narrative fiction and a play. It is designed for students in the second year of the beginner or intermediate streams, to be taken by specialist students in conjunction with FRNC2612.

#### Textbooks

Aucassin et Nicolette, Garnier-Flammarion

Jean Tardieu, La Comédie du drame, Folio

Course booklet to be purchased from the University Copy Centre.

## FRNC2621

### Senior French Intermediate 3

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Caroline Lipovsky **Session:** Semester 1 **Classes:** 1 hour lecture and 2 hour tutorial per week **Prerequisites:** FRNC2612, FRNC2104 or equivalent **Prohibitions:** FRNC3105 **Assessment:** Two written assignments in French (equivalent to 2000 words in English), one written class test in French (equivalent to 1500 words in English), one 3-4 minute oral test in French (equivalent to 1000 words in English). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit follows on from FRNC2612 Senior French 2. It seeks to develop speaking, writing, listening and reading skills while providing an insight into contemporary French culture. The unit uses communicative and cognitive approaches to language learning. Students' active participation through teamwork, role playing and other interactive techniques is an essential aspect of all classes. This unit is normally taken by specialist students in conjunction with one of the options.

#### Textbooks

Course booklets to be purchased from University Copy Centre.

## FRNC2622

### Senior French Intermediate 4

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Caroline Lipovsky **Session:** Semester 2 **Classes:** 1 hour lecture and 2 hour tutorial per week **Prerequisites:** FRNC2621, FRNC3105 or equivalent **Prohibitions:** FRNC3106 **Assessment:** Two written assignments in French (equivalent to 2000 words in English), one written class test in French (equivalent to 1500 words in English), two oral tests in French (equivalent to 1000 words in English). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is a continuation of FRNC2621. It provides further insights into contemporary French culture and will lead to simple discussions on French cultural issues and current affairs.

#### Textbooks

Course booklets to be purchased from University Copy Centre.

## FRNC2651

### Introduction à la Linguistique

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Alice Caffarel **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** FRNC1302 or FRNC1632 or FRNC2502 or FRNC2615 or equivalent **Prohibitions:** FRNC2602 **Assessment:** Classwork, two small assignments (500 words each), final text analysis and interpretation (4000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is a general introduction to linguistics and in particular functional linguistics. It explores language as a system of choices for making meaning in various contexts and aims at providing students with an understanding of what we do when we use language, and grammar, in particular.

#### Textbooks

Caffarel, A. 2008. A Systemic Functional Grammar of French: From Grammar to Discourse. London: Continuum  
Course booklet to be purchased from the University Copy Centre.

## FRNC2666

### Research Methods in French Studies

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michelle Royer **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** Credit in FRNC1632 or FRNC2615 or FRNC1302 or FRNC2502 **Assessment:** 10-15 minute class presentation in French (equivalent to 3000 words in English); research methodology project in French (equivalent to 3000 words in English). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is designed as an 'Advanced' unit for students enrolled in the BA (Advanced) degree program. This unit is a prerequisite for admission to honours but may also be taken by students with a credit average as an additional unit. It introduces students to research methodologies and practices in various aspects of French Studies and provides them more generally with the basic tools for carrying out research in the humanities and social sciences.

## FRNC2681

### French Narrative Cinema

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michelle Royer **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** FRNC1632, FRNC1302, FRNC2615 or FRNC2502 **Prohibitions:** FRNC2802 **Assessment:** All assessment is in French. Oral presentation (2000 words equivalent), classwork (1000 words equivalent), written assignments (3000 words equivalent). (Total assessment equivalent to 6000 words.) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will explore the ways in which French cinema and society have interacted since WWII. It will examine how French society has been represented in fiction films and how major socio-political events have shaped French cinema. We will explore some basic concepts in French film theory and analytical methods derived from them. Film screenings are an integral part of the unit, and students must arrange their timetable so that they can watch each film at least once.

#### Textbooks

A dossier of texts to be purchased from the University Copy Centre.

## FRNC2682

### The Legend of the Holy Grail

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrea Williams **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** FRNC1302 or FRNC2502 or FRNC1632 or FRNC2615 or equivalent **Prohibitions:** FRNC2901 **Assessment:** 20 minute class presentation (equivalent to 2000 words), two essays (1000 words and 1500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

The Holy Grail is one of the most enduring symbols to have emerged from medieval French tradition. This unit will trace the development of the legend from its earliest expression in French literature through to the present day, via various media: the written text (medieval and modern) and the visual arts (illuminated manuscripts and cinema).

#### Textbooks

Chrétien de Troyes: Le Conte du Graal (Livre de Poche Lettres Gothiques)  
La Queste del Saint Graal (Classiques Français du moyen age)  
Michel Tournier: Gaspard, Melchior et Balthazar (Folio)  
Eric Rohmer: Perceval le Gallois (film)

### FRNC3621

#### Senior French Advanced 5 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Bronwyn Winter **Session:** Semester 1 **Classes:** 1 hour lecture and 2 hour tutorial per week **Prerequisites:** FRNC1632, FRNC1302 or equivalent **Prohibitions:** FRNC2303 **Assessment:** Written assignment in French (equivalent to 1500 words in English, 30%); one written class test in French (equivalent to 1000 words in English, 25%); oral class test in French (equivalent to 1500 words in English, 25%), oral presentation (equivalent to 500 words, 10%), preparation and participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will provide a review of formal grammar, concentrating on complex sentences, paragraph and text structure, as well as placing emphasis on oral and written receptive and active communicative skills through functionally-oriented language activities. A range of authentic and semi-authentic material will be used, drawn from written and audiovisual media and occasional literary sources, covering topics of contemporary interest and providing vocabulary development. This unit of study is normally taken by specialist students in combination with one of the options.

#### Textbooks

J. Ollivier, Grammaire Française, 4th edition  
Duplicated material to be purchased from the University Copy Centre.

### FRNC3622

#### Senior French Advanced 6 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Bronwyn Winter **Session:** Semester 2 **Classes:** 1 hour lecture and 2 hour tutorial per week **Prerequisites:** FRNC3621, FRNC2303 or equivalent **Prohibitions:** FRNC2304 **Assessment:** Written assignment in French (equivalent to 1500 words in English, 30%); two written class tests in French (equivalent to 1500 words in English, 35%); oral class test in French (equivalent to 1500 words in English, 25%); preparation and participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is a continuation of FRNC3621. It will normally be taken by specialist students in conjunction with one of the specialist options. Having completed FRNC3622 Senior French 6, students in their third year will enter FRNC3631 Senior French 7.

#### Textbooks

J. Ollivier, Grammaire Française, 4th edition  
Duplicated material to be purchased from the University Copy Centre.

### FRNC3631

#### Senior French Advanced 7 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michelle Royer **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** FRNC3622, FRNC2304 or equivalent **Prohibitions:** FRNC3305 **Assessment:** Written assignments (equivalent to 2000 words), oral presentations in French (equivalent to 2000 words), classwork (equivalent to 500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

In this unit students will develop further their oral and written skills. Emphasis is placed on improving students' fluency, spontaneity and accuracy in oral French through debates and discussion of contemporary issues. Reading and writing skills are developed through specific exercises, such as text summaries and syntheses, as well as grammar exercises.

#### Textbooks

Course booklet to be purchased from University Copy Centre.

### FRNC3653

#### French Translation Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Peter Cowley **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** Credit in FRNC1632, FRNC1302, FRNC2615, FRNC2502 or equivalent **Prohibitions:** FRNC3810 **Assessment:** Assignments 40% (3000 words), tests 50% (2400 words), participation 10% (600 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

An investigation into the theory and practice of translation, from French into English. Students will be required to undertake weekly exercises in translation and to prepare a translation with critical and analytical commentary (equivalent to 3000 word essay overall).

### FRNC3655

#### French Sociolinguistics Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Caroline Lipovsky **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** FRNC1302 or FRNC1632 (Junior French 6) or FRNC2502 or FRNC2615 (French reading 2) or equivalent **Assessment:** 10-12 minute class presentation in French language (equivalent to 3000 words in English), research based essay in French language (equivalent to 3000 words in English). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

The focus of this course is French language. It will familiarise students with the history, status and profile of the main varieties of French outside France and current issues in language policy in the French speaking world, while introducing them to key concepts such as

language use, linguistic variation (according to gender, age, social origin, etc.), or issues of bilingualism and identity. Through critical reading and practice, students will learn how to design, conduct and report research projects regarding French language.

### FRNC3672

#### Francophone Studies 2 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Bronwyn Winter **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** FRNC1302 or FRNC1632 or FRNC2502 or FRNC2615 or equivalent **Assessment:** Oral tutorial exercise in French (equivalent to 1500 words in English 30%), essay preparation exercise (equivalent to 1000 words in English, 20%), essay equivalent to 3500 words in English (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will present a classic Caribbean "rewriting": Maryse Condé's Guadeloupean version of Emily Brontë's fiction classic *Wuthering Heights*. Through the study of this work by one of the French Antilles' best known authors, students will gain some insight into the history of contemporary issues faced by the Antilles, as well as into some of the premises of so-called "postcolonial theory". Questions of literary style within a Francophone colonial or postcolonial context, as well as the particular situation of women and the construction of créolisation, métissage and africanité within these contexts, will also be explored.

#### Textbooks

M. Condé, *La migration des cœurs*

Duplicated material to be purchased from the University Copy Centre.

### FRNC3801

#### French In-Country Study Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

For students studying overseas.

### FRNC4011

#### French Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Michelle Royer **Session:** Semester 1, Semester 2 **Classes:** 2 - 4 hours per week **Prerequisites:** Major in Advanced French or in French with credit average in 48 senior units, including the following units: FRNC2666 and FRNC3631 or equivalent **Assessment:** Classwork and assignments (50%), 12000-15000 word thesis and viva (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

The Fourth Year honours program consists of the following segments:

- Thesis in French (1200-1500 words). A supervisor will be appointed.
- Three semester length seminars:

- La représentation des minorités dans le cinéma français

Lecturer: Dr Michelle Royer. Classes: Semester 1.

Since the 1990s there has been a renewed interest in the representation of marginalised social groups in French cinema. This seminar will examine this new tendency of French cinema and will explore through detailed film analyses the way filmmakers are engaging with the problems of social exclusion and marginalisation in their films. Students will be introduced to French film theories.

- Mots, images et traces dans la littérature française

Lecturer: Dr Françoise Grauby Classes: Semester 2.

This unit will explore the relationships and interplays between writers and visual artists in French contemporary fiction and art. It will examine the varieties of writing which engage with the production of art. Attention will be given to the work of poet/painter Henri Michaux, the

art criticism of Hervé Guibert, the representation of the painter in fiction, and the documentation and record of everyday life as presented by visual/performance artists.

#### Textbooks:

Henri Michaux, *Face aux verrous*

Hervé Guibert, *L'Homme au chapeau rouge* Pierrette Fleutiaux, *Histoire du tableau*

- Les avatars du nationalisme en France

Lecturer: Dr Elizabeth Rechniewski. Classes: Semester 2.

This unit will adopt a historical, sociological and discursive approach to the study of the development of the nation and national sentiment in France from the Middle Ages to the present. It will pay particular attention to Early Modern France and the Enlightenment, using original research and material assembled in the course of the department's research project: 'Communications and National Identity in Early Modern France'. It will also place contemporary debates over nationhood in historical perspective and include study of changing conceptions of citizenship. A variety of sources will be studied including literary and political texts and there will be limited reference to the use of discourse analysis in analysing source materials.

### FRNC4012

#### French Honours B Arts

## GBST2601

### Global Studies, Society, Culture, Nation

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Erin Taylor **Session:** Semester 1  
**Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** GBST1001 and ANTH1002 **Assessment:** one 2000-2500 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Adv)(Hons), B G S, UG Study Abroad Program.

Trans-national economy and global media shape the lives of every citizen today. Everyone is also a member of a unique society and nation with a specific culture and history. This unit addresses the range of ways in which citizens of nation states are shaped by and also engage today's complex global world. This foundational unit will build skills for interpreting the important cultural contexts that inform trans-national politics. Lectures will draw examples from Europe, South Asia and Africa.

## GBST2602

### Human Rights & the Global Public Sphere

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Danielle Celermajor **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** GBST1001 and ANTH1002 **Assessment:** one class debate, one take-home exam and one 2500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Adv)(Hons), B G S, UG Study Abroad Program.

How do international and national/local norms, institutions, and movements interact with and shape each other, or fail to do so? This unit examines the activities of international and regional formal and informal political, non-governmental and civil society organisations, with a particular interest in the dynamics of power and explaining how norms are produced and transformed in global interactions. It considers the constraints and liberational potential of human rights and the relationship between human rights and culture, religion, colonialism and imperialism.

## GBST2604

### Global Communication

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Richard Stanton **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** GBST1001, ANTH1002 **Assessment:** Media analysis 20%, essay (3000 words) 80% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B G S, UG Study Abroad Program.

This unit will examine the role of communication in the global, what it means to be global; what it means to be local and to develop an understanding of the role of individual and collective stakeholders such as the international news media, supranational organisations such as the United Nations, the World Trade Organisation and the World Bank, and non government organisations such as Oxfam, Greenpeace and the International Red Cross. It will examine the communication strategies of these organisations and investigate the role of the international media in shaping opinion in both developed and developing countries.

## GCST2601

### Introducing Media and Popular Culture

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Guy Redden **Session:** Semester 1, Winter Main **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 18 junior credit points **Prohibitions:** WMST2001 **Assessment:** 1500 word textual analysis; 2500 word essay; Tutorial participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit of study will introduce students to the discipline of Cultural Studies through the analysis of media and popular culture. The unit of study will draw on a range of interdisciplinary theories in order to explore how contemporary media and popular culture is analysed within Cultural Studies, including focus on magazines, advertising, cinema and television genres, popular music and video, and the internet.

## GCST2602

### Suffragettes to Cyborgs

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Fiona Probyn-Rapsey **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 18 Junior credit points **Prohibitions:** WMST2002 **Assessment:** one 2000 word essay and one 2500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study will introduce students to fundamental concepts within feminist social, political and cultural theory. We explore debates about gender and difference; between women and men and between women in relation to class, race and ethnicity. Debates around power, discourse and the body are introduced with a particular focus on postmodern readings of bodies, reproductive technologies and identity. A major focus of the unit is to acquaint students with postmodern understandings of gender.

## GCST2603

### Animal/Human Cultures

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Fiona Probyn-Rapsey **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 18 Junior credit points **Assessment:** one 2000 word research essay, one 2000 word research journal **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit introduces students to postmodern understandings of animal/human connections through film, literature, popular culture, philosophy, cultural politics and gender studies. In the first block we consider western perspectives on the relationships between animals and humans. In the second block we consider animal philosophy: from Plato onwards animal-tropes inhabit and structure knowledge. In the third block we consider theories of animal/human relationships in regards to rights, responsibilities and technology.

## GCST2604

### Sex, Violence and Transgression

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Natalya Lusty **Session:** Semester 2, Summer Late **Classes:** one 2 hour lecture and one 1 hour tutorial **Prerequisites:** 18 Junior credit points **Prohibitions:** WMST2004 **Assessment:** one 2000 word case study, one 2000 word take-home exam, online participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

Violence is one of the most prevalent themes in popular culture and public discourse today. It shapes our lives in all sorts of ways, both real and imagined. Incorporating concepts and theoretical tools from gender and cultural studies, this course will examine the construction and representation of violence in relation to sexuality, transgression, difference and power.

## GCST2606

### Genres in Cultural Context

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Jane Park **Session:** Semester 1 **Classes:** one 1 hour lecture, one 1 hour tutorial, and one 1 hour online or media work per week **Prerequisites:** 18 Junior credit points **Assessment:** participation (in class and online), group presentation with 500 word precis, 4 journals (totalling 1200 words), one 1000 word paper, one 1500 word paper or creative project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit introduces students to some theories of genre and to textual examples of specified genres. Several genres will be studied; possible examples may include romance, soap opera, sci-fi, horror, the musical, music video, and reality TV. Examples will be drawn from different media and from both popular and "high" culture. Key themes will include the place of gender in genre and the role of textual conventions in structuring meaning.

## GCST2607

### Bodies, Sexualities, Identities

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Kane Race **Session:** Semester 1, Summer Late **Classes:** one 1.5 hour lecture and one 1.5 hour tutorial per week **Prerequisites:** 18 junior credit points **Prohibitions:** WMST2007 **Assessment:** Tutorial attendance and exercises, one 1500 word essay, one 2500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

In this unit of study we will examine the ways in which feminist and other cultural theories have used bodies and sexualities in order to theorise difference and identity. The body and sexuality have been shown to be a major site for the operation of power in our society. We will look at how bodies and sexualities have given rise to critical understandings of identity. The unit of study will be devoted to working through some of the major theories of sexuality and embodiment, and the analysis of cultural practices.

## GCST2608

### Gender, Communities and Difference

#### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 18 Junior credit points **Prohibitions:** WMST2008 **Assessment:** one 500 word tutorial assignment, one 1500 word essay and one 2000 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit examines difference and diversity within community. It looks at the operation of power and at how power produces and regulates communities and identities. It questions the assumption that community is based on the unity and similarity of citizens and examines alternatives such as difference and sociality. Specific debates about the regulation of reproduction, the production of sexuality, and the provision of welfare are examined. The course is divided into 2 sections: Gender, Community and Difference; and Foucault, Power and Governance.

## GCST2609

### Cultures of Masculinities

**Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael Moller **Session:** Semester 1, Winter Main **Classes:** one 1 hour lecture and one 1 hour tutorial per week **Prerequisites:** 18 Junior credit points **Prohibitions:** WMST2009 **Assessment:** one 1500 word research proposal, one 1000 word review paper, and one 3500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

What do men want? From a traditional focus on femininity in gender studies, it is increasingly clear that masculinity has undergone tremendous changes in the last several decades. From a perspective of gender and cultural studies, this unit examines the economic, social and cultural contexts in which masculinity is lived. We will consider different case studies focused on the changing representation of men in contemporary culture. These will include aspects of style and consumption, roles within workplaces, and in domestic practices.

**GCST2610****Intimacy, Love and Friendship****Arts**

**Credit points:** 6 **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 18 Junior credit points **Prohibitions:** WMST2010 **Assessment:** one 500 word tutorial paper, one 1500 word essay and one 2000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit examines the representation and practices of intimate relations focusing especially on the intersection between intimacy and the constructions of gender. Divided into three sections, the unit will examine theories of love and friendship, contemporary cultural representations of love, desire and friendship (especially in film and literature), and the ethics and politics of erotics. It will question the division between erotic love and Platonic love, examine the new technologies of erotics, and discuss the implications for gender and sexuality.

**GCST2612****Youth Cultures: Images & Ideas of Youth****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Catherine Driscoll **Session:** Semester 1, Summer Early **Classes:** 1.5 hr lecture, 1 hr tutorial and 30 minutes of online learning per week **Prerequisites:** 18 junior credit points **Prohibitions:** WMST2012 **Assessment:** one online journal (equivalent 2000 words), one 500 word exercise, choice of 2000 word essay or take-home exam, participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit uses changing ideas about youth and practices of youth culture as a focus for an introduction to contemporary cultural theory. It aims to introduce students to some of the current parameters for studying cultural forms, practices and theories by examining current and past forms of youth culture, representations of youth and youth culture, and cultural studies of youth. Points of focus include media images of youth, popular culture marketed to youth, and youth subcultures.

## GCST3601

### Gender, Race and Australian Identities Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Jane Park **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 18 Junior credit points, including 6 credit points in GCST **Prohibitions:** WMST3001 **Assessment:** one 2500 word research journal and one 2500 word research essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit explores the cultural discourses around race, gender, and multiculturalism in Australia and the US that have emerged from their colonial and immigration histories. We will consider how these discourses structure dominant representations of ethnic minorities in these countries, and how these minorities have resisted political and social marginalisation. We will focus on particular case studies, including the White Australia policy, the stolen generations, the Japanese internment, and various US cultural nationalist movements.

## GCST3603

### Consumer Cultures Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Kane Race **Session:** Semester 2 **Classes:** one 1.5 hour lecture and one 1.5 hour tutorial per week **Prerequisites:** 18 Junior credit points, including 6 credit points in GCST **Prohibitions:** WMST3003 **Assessment:** tutorial attendance and exercises, one 1500 word essay, one 2500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

From the theoretical basis of cultural studies, this unit examines the ways in which identities are increasingly formed through consumption. It looks both at critiques of consumer societies and at more optimistic theories about the different forms of life that are promoted by consumer culture, including the forms of identity and belonging they engender. We will consider elements of both material culture (e.g. possessions) and media culture.

## GCST3604

### Cultural Theory Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Catherine Driscoll **Session:** Semester 2 **Classes:** one 1 hour lecture, one 1.5 hour tutorial and 30 minutes of online learning per week **Prerequisites:** 18 junior credit points including at least 6 credit points GCST **Assessment:** one online journal (equivalent 1500 words), three 500 word responses to readings, 1500 word take-home exam, participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Cultural Studies was widely discussed as one of the "New Humanities" in the 1990s, but a long history of debates about and theories of culture precede the discipline, and the processes of deciding what are the key texts and concepts of Cultural Studies is ongoing. This unit overviews the most frequently referenced critical and theoretical texts of the Cultural Studies "canon". Students will also consider in detail the place of Cultural Studies in the humanities and debates over its institutionalisation.

## GCST4101

### Arguing the Point Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Ruth Barcan **Session:** Semester 1 **Classes:** one 2 hour seminar per week **Prerequisites:** Credit average in 48 senior credit points of Gender Studies, including GCST2602 (or WMST2002) OR credit average in 48 senior credit points of Cultural Studies, including GCST2601 (or WMST2001) **Prohibitions:** WMST4011 **Assessment:** 4000-6000 words assessment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: The Honours in Gender Studies and Honours in Cultural Studies programs are structured in the same way. For each, a student must enrol in GCST4101 Arguing the Point and GCST4102 Research Skills. Every student then takes four Honours Thesis units and two Honours Seminar units, in Gender Studies or Cultural Studies respectively. It is also possible to do combined Honours by enrolling in one Seminar and two Thesis units from each discipline. All Honours students are also expected to attend the Departmental research seminar series.*

**Associated degrees:** B A (Hons), Dip Arts(Hons).

This unit aims to introduce students to a range of research practices and methods, writing styles and forms of argumentation. Through the study of different examples of Gender and Cultural Studies research, we will seek to encourage students to develop their own research practices and writing skills. Students who are writing their thesis will be encouraged to experiment with different ways of arguing and writing their research. Students who are just starting will have the opportunity to develop their ideas.

## GCST4102

### Research Skills Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Ruth Barcan **Session:** Semester 1 **Corequisites:** GCST4101 **Assessment:** Satisfactory completion **Practical field work:** Workshop lengths at times vary across the semester. A program is provided at the beginning of semester. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: See GCST4101*

**Associated degrees:** B A (Hons), Dip Arts(Hons).

This unit consists of a series of workshops in research skills for Honours students, on topics such as research with databases, interviews, ethics clearance, referencing, Endnote, written expression, and other relevant topics. It also incorporates a support network for students enrolled in the Honours programs.

**GCST4103****Gender Studies Honours Seminar A**  
**Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Ruth Barcan **Session:** Semester 1, Semester 2 **Classes:** one 2 hour seminar per week **Corequisites:** GCST4101 **Assessment:** 4000-6000 words overall **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

### **GDMP1011** **Basic and Clinical Sciences 1** **Medicine**

**Credit points:** 12 **Session:** Semester 1 **Classes:** On a weekly basis, 3 problem-based learning sessions (each 1.5 hours); up to six lectures related to the weekly problem issues relevant to all themes but with an emphasis on basic sciences; two Basic and Clinical Sciences sessions (generally 1.5 hours); **Assessment:** Written assessments in Basic and Clinical Science are formative and summative. However participation in the formative assessments is compulsory. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Upon completion of this module, students will be able to apply an understanding of normal and abnormal human structure, function and behaviour to the diagnosis, management and prevention of health problems. They will also be able to use the best available evidence on outcomes to prevent or cure disease, relieve symptoms or minimise disability and analyse clinical data and published work to determine their validity and generality. Students will participate in the generation, interpretation, application and dissemination of significant advances in medical knowledge; and recognise the limits of scientific knowledge and understanding, and the continuing nature of all scientific.

### **GDMP1012** **Patient and Doctor 1** **Medicine**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Similar to Basic and Clinical Science 1 **Assessment:** The Objective Structured Clinical Examination (OSCE) is formative, however participation in this formative assessment is compulsory **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Upon completion of this module, students will be able to demonstrate understanding of the therapeutic nature of the patient-doctor relationship and the impact on that relationship of the individual characteristics of both patient and doctor. They will have the ability to listen and to identify issues of concern to patients, families and carers and to respond to those concerns, using whatever means are necessary for effective communication. They will also have the ability to elicit and interpret clinical symptoms and signs by interviewing and examining patients systematically and with sensitivity, and to use this information to guide further investigations. Students will have the ability to perform important clinical procedures, particularly those vital in life threatening situations; and ethical behaviour in meeting the needs of patients and families; concern for confidentiality and respect for individual autonomy, enabling patients and their families to make informed decisions in relation to their medical care.

### **GDMP1013** **Population Medicine 1** **Medicine**

**Credit points:** 3 **Session:** Semester 1 **Classes:** Similar to Basic and Clinical Science 1 **Assessment:** CDT material based on the CDT objectives is included in the required formative and summative assessments in Stage 1. Students are also required to work in groups to research and produce a poster on a public health issue. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Upon completion of this module, students will be able to demonstrate understanding of the factors which influence the health of the population and the respective roles of the promotion of health, the prevention of illness and the treatment of disease. They will also understand of the legal, social, economic, historical and political context of medical practice where relevant to the provision of high quality medical care and to medical research. Furthermore, the

students will have the ability to identify and analyse health issues of concern to the community and to contribute constructively and rationally to the debate on these issues; and a rational approach to resolving the tension between the medical practitioner's responsibility for individual patients and his or her responsibility for the health care needs of the whole community.

### **GDMP1014** **Personal and Professional Development 1** **Medicine**

**Credit points:** 3 **Session:** Semester 1 **Classes:** Similar to Basic and Clinical Science 1 **Assessment:** There will be a requirement to attend an intensive two-day PPD course. Failure to meet this requirement will halt progression. In addition, a portfolio of reflective material will be produced and examined in a structured interview. Satisfactory completion of this task is also required for continuation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Upon completion of this module, students will be able to demonstrate commitment to compassionate, ethical professional behaviour and the ability to work cooperatively as a member of a team accepting and providing leadership as appropriate. They will have the recognition of the inevitability of decision-making in circumstances of uncertainty and the capacity to make rational and sensitive decisions based on the best available evidence. Students will have the ability to recognise his or her personal physical and emotional needs and responses to stress, and openness to assistance in time of need and ongoing commitment to the advancement of learning within a community of medical scholars; and skills in the recording, organisation and management of information including the use of appropriate information technology.

### **GDMP1021** **Basic and Clinical Sciences 2** **Medicine**

**Credit points:** 12 **Session:** Semester 2 **Classes:** Similar to Basic and Clinical Sciences 1 **Assessment:** Similar to Basic and Clinical Sciences 1 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Similar to Personal and Professional Development 1

**GDMP2021****Basic and Clinical Sciences 4  
Medicine**

**Credit points:** 10 **Session:** Semester 2 **Classes:** Similar to Basic and Clinical Sciences 1 **Assessment:** Satisfactory performance in the Summative written papers as determined by the Basic and Clinical Sciences Committee. Participation in Required Formative Assessments is compulsory. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Similar to Basic and Clinical Sciences 1

**GDMP2022****Patient and Doctor 4  
Medicine**

**Credit points:** 6 **Session:** Semester 2 **Classes:** Similar to Patient and Doctor 1 **Assessment:** Satisfactory performance in the Summative Objective Structured Clinical Examination (OSCE) as determined by the Patient and Doctor Committee. Participation in the Formative Objective Structured Clinical Examination (OSCE) is compulsory. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Similar to Patient and Doctor 1

**GDMP2023****Population Medicine 4  
Medicine**

**Credit points:** 3 **Session:** Semester 2 **Classes:** Similar to Community and Doctor 1 **Assessment:** Satisfactory performance in the Community and Doctor components of the written assessment as determined by the Community and Doctor Committee. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Similar to Community and Doctor 1

**GDMP2024****Personal and Professional Development 4  
Medicine**

**Credit points:** 3 **Session:** Semester 2 **Classes:** Similar to Personal and Professional Development 1 **Assessment:** Satisfactory performance requires the demonstration of the following competencies: 1. Appropriate ethical and professional behaviour as determined by the PPD committee. 2 attendance at all designated activities in this stage, 3 attendance and completion of all designated Evidence Based Medicine (EBM) activities. Students who miss more than 15% of tutorials in any Block of study may not be eligible to proceed to Stage 3 except by a specific decision of the Stage 2 Examination Committee. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Similar to Personal and Professional Development 1

**GDMP2025****Independent Learning Activity  
Medicine**

**Credit points:** 2 **Session:** Semester 2 **Classes:** Depends on the title of the independent learning activity and approval from the faculty **Assessment:** Independent Learning Activities will be assessed as specified in the Independent Learning Activity Contract. This may be by means of an essay (1000-2000 words), or scientific paper, oral presentation, audio tape, videotape, workshop presentation, laboratory report or a report that describes the activities that have been undertaken and the outcomes achieved. Successful completion will be confirmed by the supervisor's signing of the completed Independent Learning Activity Completion Abstract and the approval of the Independent Learning Activity Committee. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

In the first two stages, students are required to extend the range and depth of their learning by enrolling in an Independent Learning Activity. Independent Learning Activities are varied and include seminar programs, small projects of various types including research, skills-based programs for small groups (e.g. dissection), education-related projects (e.g. developing computer-based materials or undertaking an evaluative study). Many Independent Learning Activities are generated by students themselves, but others are offered by staff. A list of possible Independent Learning Activities is provided, inviting students to indicate their interest. Independent Learning Activity projects require approval by Faculty.

**GDMP3012****Basic and Clinical Sciences 5  
Medicine**

**Credit points:** 12 **Session:** Semester 1 **Classes:** Various clinical schools **Assessment:** Satisfactory performance in the written papers as determined by the Theme committee **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

**Associated degrees:** M B, B S.

Involves student attachments to the main medical and surgical ward services and associated ambulatory clinics in the teaching hospitals in the clinical schools. Students will also have some experience in sub-specialty disciplines, such as Ear Nose and Throat and Ophthalmology. About half of each student's week is spent directly involved in the clinical activities of the service to which they are attached. A progressive increase in clinical responsibility is expected over the total 32 weeks duration of these attachments.

**GDMP3013****Patient and Doctor 5  
Medicine**

**Credit points:** 6 **Session:** Semester 1 **Classes:** Similar to Basic and Clinical Sciences 5 **Assessment:** In order to meet the assessment requirements for the Patient and Doctor theme, students must obtain a satisfactory result in a clinical performance assessment and receive an overall satisfactory result in the Supervisor reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

**Associated degrees:** M B, B S.

Similar to Basic and Clinical Sciences 5

## GDMP3014

### Community and Doctor 5 Medicine

**Credit points:** 3 **Session:** Semester 1 **Classes:** Similar to Basic and Clinical Sciences 5 **Assessment:** 1. Satisfactory performance in a Community Doctor assignment as determined by the Theme committee; 2. Satisfactory performance in the Community Doctor component of the written assessment. Students must meet both of these requirements in order to receive a satisfactory result for the Community and Doctor theme in the ICAs. **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

**Associated degrees:** M B, B S.

Similar to Basic and Clinical Sciences 5

## GDMP3015

### Personal and Professional Development 5 Medicine

**Credit points:** 3 **Session:** Semester 1 **Classes:** Similar to Basic and Clinical Sciences 5 **Assessment:** Students must meet all these requirements in order to receive a satisfactory result for the PPD theme in Stage 3. Satisfactory performance in the PPD portfolio; satisfactory performance in the Evidence Based Medicine (EBM) PEARLS task; students will be expected to attend all problem based learning sessions and tutorials; satisfactory attendance for all clinical rotations (recorded by the supervisor on the supervisor report form); participation in all required formative assessments; demonstration of ethical and professional behaviour as determined by the PPD Committee. **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

**Associated degrees:** M B, B S.

Similar to Basic and Clinical Sciences 5

## GDMP3101

### Medicine Year Three Medicine

**Credit points:** 10 **Teacher/Coordinator:** Associate Professor Christopher Dennis **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken at the student's assigned Clinical School. **Prerequisites:**

GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Assessment:** This unit will be assessed with an on-line formative assessment at the end of the Term, followed by a written summative assessment at the end of Term D which will include components from Terms A,B,C&D **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Medicine Year Three is the first of two Medicine Terms undertaken by medical students enrolled in Stage 3 of the MBBS. This is a non-specialty Term.

## GDMP3102

### Medicine Year Four Medicine

**Credit points:** 10 **Teacher/Coordinator:** Associate Professor Christopher Dennis **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken at the student's assigned Clinical School. **Prerequisites:** GDMP3101 **Assessment:** This unit will be assessed with an on-line formative assessment at the end of the Term, followed by a written summative assessment at the end of Term I which will include components from Terms F,G,H & I. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Medicine Year Four is the second of two Medicine Terms undertaken by medical students enrolled in Stage 3 of the MBBS. This is a non-specialty Term.

## GDMP3103

### Surgery Medicine

**Credit points:** 10 **Teacher/Coordinator:** Associate Professor Christopher Dennis **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken at the student's assigned Clinical School. **Prerequisites:** GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Assessment:** This unit will be assessed with an on-line formative assessment at the end of the Term, followed by a written summative assessment at the end of Term D for students in Year 3 which will include components from Terms A,B,C & D. Students in Year 4 will be assessed with an on-line formative assessment at the end of the Term, followed by a written summative assessment at the end of Term I which will include components from Terms F,G,H & I. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Surgery is the Surgical Term undertaken by medical students enrolled in Stage 3 of the MBBS. This is a non-specialty Term.

## GDMP3104

### Critical Care Medicine

**Credit points:** 10 **Teacher/Coordinator:** Associate Professor Christopher Dennis **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken at the student's assigned Clinical School. **Prerequisites:** GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Assessment:** This unit will be assessed with an on-line formative assessment at the end of the Term, followed by a written summative assessment at the end of Term D for students in Year 3 which will include components from Terms A,B,C & D. Students in Year 4 will be assessed with an on-line formative assessment at the end of the Term, followed by a written summative assessment at the end of Term I which will include components from Terms F,G,H & I. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Critical Care is the Critical Care Term undertaken by medical students enrolled in Stage 3 of the MBBS. This is a non-specialty Term.

## GDMP3105

### Community Medicine

**Credit points:** 10 **Teacher/Coordinator:** Associate Professor Christopher Dennis **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken at the student's assigned Clinical School. **Prerequisites:** GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Assessment:** This unit will be assessed across 4 Themes as follows: Basic & Clinical Science: self-directed learning problems, presentations and leading discussion; Patient & Doctor: Case commentaries; Community & Doctor: Clinical Service Project; Personal & Professional Development: Evidence Based Medicine (EBM) case commentary report, attendance, participation and professional behaviour. Students must achieve a satisfactory level of competence

in all four themes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Community is the Community Term undertaken by medical students enrolled in Stage 3 of the MBBS. This is a specialty Term.

### GDMP3106

#### Psychological and Addiction Medicine Medicine

**Credit points:** 10 **Teacher/Coordinator:** Associate Professor Christopher Dennis **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken at the student's assigned Clinical School. **Prerequisites:** GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Assessment:** This unit will be assessed across 4 Themes as follows: Basic & Clinical Science: written Mini Essay Questions (MEQs); Patient & Doctor: Observed Long Case; Community & Doctor or PPD: Case Study; Personal & Professional Development (PPD): Completion of workbook including Evidence Based Medicine (EBM), attendance, participation and professional behaviour. Students must achieve a satisfactory level of competence in all four themes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Psychological and Addiction Medicine is the Psychological and Addiction Medicine Term undertaken by medical students enrolled in Stage 3 of the MBBS. This is a specialty Term.

### GDMP3107

#### Perinatal and Women's Health Medicine

**Credit points:** 10 **Teacher/Coordinator:** Associate Professor Christopher Dennis **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken at the student's assigned Clinical School. **Prerequisites:** GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Assessment:** This unit will be assessed across 4 Themes as follows: Basic & Clinical Science: written Mini Essay Questions (MEQs); Patient & Doctor: Observed Structured Clinical Examinations (OSCEs); Community & Doctor or PPD: Theme paper; Personal & Professional Development (PPD): Attendance, participation and professional behaviour. Students must achieve a satisfactory level of competence in all four themes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Perinatal and Women's Health is the Perinatal and Women's Health Term undertaken by medical students enrolled in Stage 3 of the MBBS. This is a specialty Term.

### GDMP3108

#### Child and Adolescent Health Medicine

**Credit points:** 10 **Teacher/Coordinator:** Associate Professor Christopher Dennis **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken at the student's assigned Clinical School. **Prerequisites:** GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Assessment:** This unit will be assessed across 4 Themes as follows: Basic & Clinical Science: written Mini Essay Questions (MEQs); Patient & Doctor: Observed Structured Clinical Examinations (OSCEs); Community & Doctor or PPD: Community and Doctor presentations and leading discussion; Personal & Professional Development (PPD): Attendance, participation and professional behaviour. Students must achieve a satisfactory level of competence in all four themes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M B, B S.

Child and Adolescent Health is the Child and Adolescent Health Term undertaken by medical students enrolled in Stage 3 of the MBBS. This is a specialty Term.

### GDMP3109

#### Elective Medicine

**Credit points:** 12 **Teacher/Coordinator:** Ms Karen Garlan **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Undertaken in an environment approved by the Clinical School Elective Committee Members. **Prerequisites:** GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Prohibitions:** GDMP4110 **Assessment:** This unit will be assessed by the submission of an 'Elective Term Report' of between 1,500 to 5,000 words at the end of the Elective Term. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students must obtain approval to undertake an elective from the Clinical School Elective Committee Members who have the role of advising, counselling and directing students in their applications and approving Electives.*

**Associated degrees:** M B, B S.

Elective is the Elective Term that offers students an opportunity to undertake supervised experience in clinical, community work or research, locally, interstate or anywhere in the world. It is an opportunity to prepare for a particular career direction, explore different experiences or enhance skills in particular areas of a student's own choice whilst enrolled in Stage 3 of the MBBS. Students usually organise their own Elective terms but if advice or assistance is needed students can contact the Associate Deans of their Clinical Schools or the Medical Program Administration Unit (MPAU).

### GDMP4011

#### Child and Adolescent Health Medicine

**Credit points:** 10 **Session:** S2 Late Int, Semester 1, Semester 2 **Classes:** Various clinical schools **Assessment:** Progression in Stage 4 depends on satisfactory performance in all four themes in all designated summative assessments held during Stage 4 **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

*Note: Department permission required for enrolment in the following sessions: S2 Late Int.*

**Associated degrees:** M B, B S.

Studies include Paediatric and Adolescent Medicine and Surgery

### GDMP4012

#### Perinatal and Women's Health Medicine

**Credit points:** 10 **Session:** S2 Late Int, Semester 1, Semester 2 **Classes:** Various clinical schools **Assessment:** Progression in Stage 4 depends on satisfactory performance in all four themes in all designated summative assessments held during Stage 4 **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

*Note: Department permission required for enrolment in the following sessions: S2 Late Int.*

**Associated degrees:** M B, B S.

Studies include Obstetrics, Fetomaternal Medicine, Neonatal Medicine and Gynaecology (plus Dermatology)

### GDMP4013

#### Community Practice Medicine

**Credit points:** 10 **Session:** S2 Late Int, Semester 1, Semester 2 **Classes:** Various clinical schools **Assessment:** Progression in Stage 4 depends on satisfactory performance in all four themes in all designated summative assessments held during Stage 4 **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

*Note: Department permission required for enrolment in the following sessions: S2 Late Int.*

**Associated degrees:** M B, B S.

In both urban and rural settings, including General Practice, Geriatric Medicine and Sexual Health Medicine.

### GDMP4014

#### Psychological and Addiction Medicine Medicine

**Credit points:** 10 **Session:** S2 Late Int, Semester 1, Semester 2 **Classes:** Various clinical schools **Assessment:** Progression in Stage 4 depends on satisfactory performance in all four themes in all designated summative assessments held during Stage 4 **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

*Note: Department permission required for enrolment in the following sessions: S2 Late Int.*

**Associated degrees:** M B, B S.

Studies include Drug & Alcohol, Community Psychiatry, Psychogeriatrics, Paediatric Psychiatry and Adolescent Medicine

### GDMP4015

#### Elective

**Medicine**

**Credit points:** 4 **Session:** S2 Late Int, Semester 1 **Classes:** A venue approved by the Faculty of Medicine **Assessment:** Students needs to clearly outline appropriate learning objectives and achieve those learning objectives. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment in the following sessions: S2 Late Int.*

**Associated degrees:** M B, B S.

The prime objective of the Elective Term is to provide the students with experience in a specific area of medicine of their own choice. Students arrange for their elective placement to be approved prospectively by the Faculty, nominating a supervisor who is required to provide a report on the student's performance at the end of the elective. A minimum of eight weeks of supervised experience is required for this term.

**GDMP4025****Pre-Internship Term  
Medicine**

**Credit points:** 4 **Session:** S2 Late Int, Semester 1, Semester 2 **Classes:** Various clinical schools **Assessment:** Each student in the pre-internship phase will be responsible for his/her own learning, but with clear requirements for a final signing off at the end of Stage 4 **Campus:** Camperdown/Darlington **Mode of delivery:** Clinical Experience

*Note: Department permission required for enrolment in the following sessions: S2 Late Int, Semester 1.*

**Associated degrees:** M B, B S.

The Pre-Internship Term aims to ease the transition to internship. Students are placed in locations accredited by the Postgraduate Medical Council of New South Wales for intern training with programs modified to meet the special needs of final-stage students.

**GDMP4110****Honours/ Research Project  
Medicine**

**Credit points:** 12 **Teacher/Coordinator:** Dr Margot Day **Session:** S1 Late Int, S2 Late Int, Semester 1, Semester 2 **Classes:** Frequent, regular contact the honours or research supervisor. **Prerequisites:** GDMP2021, GDMP2022, GDMP2023, GDMP2024 and GDMP2025 **Prohibitions:** GDMP3109 **Assessment:** Honours thesis or research report (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: To apply for honours in the MBBS, students must submit a research proposal to the Honours/ Research Co-ordinator at the end of Stage 2 and before the commencement of Stage 3 of the MBBS.*

**Associated degrees:** M B, B S.

Honours/ Research students will undertake a supervised research project whilst enrolled in the MBBS, that will culminate in the submission of an honours thesis or research report. Students will be monitored through regular progress reports.

**GENE2001****Agricultural Genetics 2****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Professor Peter Sharp **Session:** Semester 1 **Classes:** (3 lec, 3 prac/tut)/wk **Prerequisites:** At least one of (BIOL1001, BIOL1002, BIOL1101, BIOL1901, BIOL1911) **Assessment:** Exam, assignment, tests. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B Sc Agr, UG Study Abroad Program.

This lecture and practical unit of study provides an introduction to the genetics and breeding of plants and animals. It provides an understanding for parallel and following courses. Lectures cover the basics of gene transmission and interaction, cytogenetics, molecular genetics, population and quantitative genetics, as well as the more applied aspects of plant and animal breeding and biotechnology. Practicals emphasise, with agricultural examples, the procedures of genetic and cytogenetic analysis, and the use of computers in simulation procedures in population genetics, quantitative inheritance and selection programs, and provide exposure to current plant and animal breeding and biotechnology.

**GENE4011****Plant Cytogenetics****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Norm Darvey **Session:** Semester 2 **Classes:** (2 lec, 2 seminars/workshops, 1 lab)/wk **Prerequisites:** BIOM2001, GENE2001. **Assessment:** 2hr exam, assignments, practical reports, presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B An Vet Bio Sc, B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

Lectures in cytology and cytogenetics, with special emphasis on cereals and the application of chromosome engineering to plant breeding. The laboratory unit includes routine cytological procedures and tissue culture technology.

**GENE4012****Plant Breeding****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Professor Richard Trethowan **Session:** Semester 2 **Classes:** (2 lec, 2 seminars/workshops, 1 lab)/wk **Prerequisites:** BIOM2001, GENE2001 **Assessment:** 2hr exam, assignments, practical reports, presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

Lectures and practical work devoted to the theory, philosophy and practice of plant breeding, screening techniques conservation of genetic variability, breeding for disease resistance, the use of tissue culture in breeding, with examples from both field and horticultural crops.

**GENE4013****Molecular Genetics and Breeding****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Professor Peter Sharp **Session:** Semester 1 **Classes:** (3 lec, 2 seminars/workshops, 1 lab)/wk **Prerequisites:** BIOM2001, GENE2001 **Assessment:** 2hr exam, assignments, practical reports, presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

Lectures and laboratory work covering the structure and function of plant genomes and genes, the technology and results of DNA transformation and the analysis of plant traits by molecular techniques including by genetic mapping using molecular and other genetic markers.

**GENE4014****Population and Quantative Genetics****Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Prof Chris Moran **Session:** Semester 1 **Classes:** (3 lec, 2 labs)/wk **Prerequisites:** BIOM2001, GENE2001 **Corequisites:** GENE4012 **Assessment:** 2hr exam, assignments, practical reports, presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

Lectures and practical periods dealing with population genetic, quantitative inheritance and animal breeding given by the Faculty of Veterinary Science.

**GENS1000****Education 1: Introduction to Teaching****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Dr Jennifer Rowley **Session:** Semester 1 **Classes:** 1 hr lecture and 1 hr tutorial/wk **Assessment:** Report (30%), poster and presentation (30%), examination (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

Examining the theory and practice of how to teach and how students learn is vital to pre-service teachers. Introduction to Teaching is designed to help you become a reflective classroom teacher who can use good teaching practices and appropriate learning experiences through the effective use of pedagogy. The subject's goal is to develop reflective classroom teachers who can design and develop effective teaching and learning skills and strategies. At the end of this course, you should be able to: explain the role of and the relationship between the school, the teacher and the learner;

recognise, discuss and demonstrate a variety of teaching strategies to develop appropriate teaching and learning experiences for students; recognise, discuss and apply instructional strategies to create a positive and reflective learning environment supporting learning for all students; discuss principles underlying theoretical models of pedagogy; explain, compare and evaluate the practices of theoretical models for effective teaching and learning; summarise and explain the concept of teaching as a reflective practice and apply strategies of reflection to improving classroom practices.

### GENS1001

#### Education 2: Educational Psychology Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Sharon Tindall-Ford **Session:** Semester 2 **Classes:** 1hr lec and 1hr tut/wk **Assessment:** One 1500w essay (40%), tutorial participation and attendance (20%), and short answer tests (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

This course provides an introduction to the study of educational psychology with an emphasis on the cognitive approach to learning and instruction. The course presents an overview of the historical relationship between education and psychology and how cognitive psychology has become the dominant theory in shaping education practices today. The unit aims to develop students' understanding of cognitive psychology and its applicability to music education through a discussion of relevant research and participation in tutorial experiments. It also aims to develop students' understanding of the learner, the learning process and how educators can optimise music instruction through adopting best practices based on empirical research. Topics include: human cognitive architecture and information processing theory; the role of knowledge; memory structures and cognitive processes; problem solving and critical thinking and Piaget's theory of cognitive development.

#### Education 3: Developmental Psychology Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Sharon Tindall-Ford **Session:** Semester 1 **Classes:** 1hr lec and 1hr tut/wk **Prerequisites:** GENS1001 Education 2: Educational Psychology **Assessment:** Tutorial presentation 20%, 1500 word essay 40%, research project 40%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

This course provides an introduction to the study of developmental psychology with the major emphasis on the changes and developments that are unique to adolescence. The course begins with an introduction to the question "What is developmental psychology?" and examines the different approaches undertaken in the study of human development. A summary of the milestones in human development from infancy throughout childhood are summarised. A review of Piaget Theory from Education 2 is undertaken, highlighting the transition from the concrete operational

stage (childhood) to formal operations (adolescence). The major focus of this unit of study is on adolescence; adolescence and family peer relationships; development of Identity; development of Issues in adolescence; research and theories related to these topics and their implications for high school classroom teaching and music education are discussed.

#### Education 4: Studies in Teaching Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Ross Gilbert **Session:** Semester 2 **Classes:** 1hr lec and 1hr tut/wk **Assessment:** One 1500w essay (50%), seminar presentation (30%), seminar participation (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, UG Study Abroad Program.

The purpose of this unit is to use the prior practical and academic experiences of those enrolled in the Bachelor of Music (Music Education) program as a basis for the development of further skills in, and understanding of, classroom teaching. The content will consist of two related strands, namely, cooperative learning and classroom management. Cooperative learning is emphasised because there has been a tendency for music teachers to work mainly in a teacher-centred setting. Students will study cooperative learning by working in small groups practising advanced questioning and active listening skills. The second strand, classroom management, will emphasise such concepts as demonstrating authority, organising the classroom, choosing rules and procedures, communicating with students and the management approaches of Glasser, Canter and Dreikurs. Students not enrolled in BMus(Music Education) are required to meet with the Course Coordinator before enrolling in this unit. For further information contact Dr D. Collins (General Studies).

#### Practical Stagecraft Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Diane Collins **Session:** Semester 2 **Classes:** Two 1hr lec and two 1hr prac tut/wk for 8 weeks. It commences in Week 1, continues for three weeks for four hours per week, then recommences in Week 12 and continues for three weeks, four hours per week. **Assessment:** Practical assessment 50%, stagecraft diary 50%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This General Studies unit is designed to give students an understanding of the process of staging theatre and music theatre in a student or community environment. It covers areas such as the historical development of the actor/audience relationship, form and style and its relationship to theatre design, technical production, basic acting technique and direction. These areas will be covered in lectures, practical experiences, excursions and research. For further information contact Dr D. Collins (General Studies).

### GENS2004

#### Historical and Cultural Studies 1 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Diane Collins **Session:** Semester 1 **Classes:** 1 lecture, 1 tutorial/wk **Assessment:** Essay 2000w (50%), tutorial presentation (30%), lecture and tutorial participation and attendance (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

A study of culture, power and encounter in European history from the medieval era to the dawn of the modern age. The course seeks to analyse the basis of Europe's cultural and historical identity and to place that identity within a global context. Topics may include environmental history, feudalism, mentalities, gender relations, religious transformations, cultural change and the evolution of the "other" in European thought. This involves a study of cross-cultural encounters, with particular emphasis placed on relations with Islam, Asia and Meso-America. By understanding European assumptions regarding difference, students will develop a deeper appreciation of their own cultural and social sensibilities. The unit also aims to provide students with generic oral and written communication skills. Stress will be placed on developing research skills, the distinction between formal and informal writing, the process of critical analysis and techniques of oral presentation and small group discussion. Students will be encouraged to acquire collaborative as well as individual skills. For further information contact Dr D. Collins (Arts and Cultural Inquiry).

### GENS2005

#### Historical and Cultural Studies 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Diane Collins **Session:** Semester 2 **Classes:** 1 lecture, 1 tutorial/wk **Assessment:** Essay 2000w (50%), tutorial presentation (30%), lecture and tutorial participation and attendance (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The French and Industrial revolutions are usually seen as initiating the "modern" era. This unit examines the ideological, social and cultural underpinnings of modernism. Topics may include nationalism, romanticism, radicalism, imperialism, orientalism, the emergence of mass culture, the rise of the avant-garde, the cultural roots of totalitarianism, the relationship between art and revolution and genocide and modernity. The unit builds on the generic communication skills component of Historical and Cultural Studies 1. For further information contact Dr D. Collins (Arts and Cultural Inquiry).

### GENS3000

#### Education 5: Philosophy and History Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Diane Collins **Session:** Semester 1 **Classes:** 1hr lec and 1hr tut/wk **Assessment:** One 2000w essay (50%), seminar presentation (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, UG Study Abroad Program.

The purpose of this unit is to assist students in their thinking about the aims and practices of education by introducing them to a study of the philosophy and history of education. Emphasis is placed upon the methods of philosophical thought and upon encouraging students to apply these in their thinking and discussion of the nature of education and educational processes. The students are introduced to some of the great educational thinkers and to contemporary educational thought in order to stimulate them to examine educational issues and to apply the methods of analysis they are learning to the teaching of music. For further information contact Dr D. Collins (Arts and Cultural Inquiry).

### GENS3001

#### Education 6: Curriculum-Theory & Design Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Ross Gilbert **Session:** Semester 1 **Classes:** 1hr lec and 1hr tut/wk **Assessment:** Seminar presentation (30%) portfolio containing a curriculum design and reflective discussion (70%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students not enrolled in BMus(Music Ed) are required to meet with the Course Coordinator before enrolling in this unit.*

**Associated degrees:** B Mus Studies, UG Study Abroad Program.

The study of curriculum asks, "What should students learn?", and, "How should this learning take place?". In a democratic society where

teachers have considerable choice in the selection of content and the mode of delivery it is essential that student teachers be aware of the philosophical and theoretical issues relating to curriculum and to the process of curriculum design. Thus, the purpose of this unit is to introduce students to curriculum theory through the study of current practices and through the activity of course design. The content of the unit will be presented under four major headings: i. forms of curriculum organisation; ii. curriculum development in New South Wales; iii. the elements of curriculum, viz., objectives, content, method and evaluation; iv. alternative views of curriculum. For further information contact Dr R. Gilbert (Arts and Cultural Enquiry).

### GENS3004

#### Historical and Cultural Studies 3 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Diane Collins **Session:** Semester 2 **Classes:** 1 lecture and 1 tutorial/wk **Assessment:** Essay 2000w (50%), tutorial presentation (30%), lecture and tutorial participation and attendance (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

A study of social, cultural and intellectual change in the early modern period. Topics may include the natural and material environment, changing structures of family and community, popular culture, witchcraft, science and the decline of magic, gender, oral, print and performance cultures, ecological imperialism and slavery. Students will be continually encouraged to relate their knowledge of music to these larger themes and historical constructions. Film, literature, art and music will be used to exemplify the themes basic to the unit. Communication skills remain a core component of the course. Students will be expected to build on the techniques developed in the first year units and to develop a deeper understanding of the processes involved in effective oral and written communication. For further information contact Dr D. Collins (Arts and Cultural Inquiry).

### GENS3005

#### Historical and Cultural Studies 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Diane Collins **Session:** Semester 1 **Classes:** 1 lecture, 1 tutorial/wk **Assessment:** Essay 2000w (50%), tutorial presentation (30%), lecture and tutorial participation and attendance (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit is intended to deepen the student's understanding of nineteenth and early twentieth century social and cultural history. The ongoing impact of industrialisation is a key theme. Topics may include childhood, religious change, early feminism, sexuality, diasporas, social reform, "high" and "low" culture and the role of the state in changing conceptions of individual identity. Students are further encouraged to develop contextual links with their music studies. Film, literature and music are also used to deepen the student's understanding of this course. For further information contact Dr D. Collins (Arts and Cultural Inquiry).

### GENS4001

#### Education 7: Individual Differences Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Jennifer Rowley **Session:** Semester 2 **Classes:** 1hr lecture and one 1hr tutorial/wk **Prerequisites:** GENS1001 Education 2 and GENS2000 Education 3 **Assessment:** Tutorial presentation (30%), tutorial paper (30%), adapted lesson plans (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies.

This subject will introduce students to the individual differences and the exceptional needs of learners. The aim of the subject is to provide a sound theoretical foundation for further studies in education (special needs). The scope of the course is extensive and will require students to critically engage with the theoretical perspectives presented and their practical applications for the classroom and beyond. At the end of this course, you should be able to: critically examine widely held perceptions about people with disabilities and exceptional abilities; develop an understanding of the needs of exceptional learners; demonstrate basic skills in the individualisation of instruction in relation to exceptional learners; demonstrate basic skills in the differentiation of curriculum in relation to gifted and talented students; analyse and evaluate theoretical issues underpinning the education of learners with exceptional needs; critically evaluate current trends in relation to the policies of integration of exceptional people into schools and the community.

### GEOG2321

#### Fluvial and Groundwater Geomorphology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Melissa Neave **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** GEOG(2311 or 2001) or 36 credit points of Junior study including GEOS1001 or GEOS1901 or GEOG1001 or ENVI (1001 or 1002) or GEOL (1001 or 1002 or 1501). Students in the Bachelor of Resource Economics should have 36 credit points of study in Biology (or Land and Water Science), Chemistry and Mathematics. Students in the Bachelor of Land and Water Science should have ENVI1002, 12 credit points of Chemistry, 6 credit points of Biology, BIOM1002. **Prohibitions:** GEOG (2002 or 2302 or 2303) or MARS2002 or MARS2006 **Assessment:** One 2 hr exam, one quiz, one field report, practical exercises **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B L W Sc, B Res Ec, B Sc, B Sc (Environmental), UG Study Abroad Program.

This unit of study provides an introduction to the fundamentals of fluvial geomorphology (the study of surface water as an agent of landscape change) and groundwater hydrology. The fluvial geomorphology section of the unit will describe the movement of water in stream channels and investigate the landscape change associated with that movement. Topics to be covered will include open channel flow hydraulics, sediment transport processes and stream channel

morphology. Practical work will focus on the collection and analysis of field data. The quantity and quality of the groundwater resources are closely linked to geology and fluvial geomorphology. The groundwater section of this unit is based around four common groundwater issues: contamination, extraction, dryland salinity and groundwater-surface water interaction. In the practical component, common groundwater computer models such as FLOWTUBE and MODFLOW will be used to further explore these problems.

#### Sustainable Cities

## Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Phil McManus **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical/tutorial per week. **Prerequisites:** 24 credit points of Intermediate Units of study including 6 credit points of Intermediate Geography units of study. **Prohibitions:** GEOG3921, GEOG3202 **Assessment:** One 2 hour exam; 2000 word essay, tutorial papers, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec (Soc Sc), B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Are cities sustainable? Why or why not? This unit of study develops themes introduced in Intermediate units in Geography relating to sustainability, focusing on the ways we manage urban regions. This involves discussion of topics including utopian visions for cities, urban history, ecological footprint analysis, bioregionalism, transport options, urban form and urban policy, with reference to sustainable futures. The unit of study looks at different Australian cities and includes practical work on a current sustainability issue in Sydney.

**GEOL1501****Engineering Geology 1****Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Tom Hubble **Session:** Semester 2 **Classes:** 39 hours lectures, 26 hours laboratory. Field excursions in the Sydney region, as appropriate. **Prohibitions:** GEOL1002, GEOL1902, GEOS1003, GEOS1903 **Assumed knowledge:** No previous knowledge of Geology assumed **Assessment:** Practical laboratory work, assignment, and a combined theory and practical exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B E.

Course objectives: To introduce basic geology to civil engineering students.

Expected outcomes: Students should develop an appreciation of geologic processes as they influence civil engineering works and acquire knowledge of the most important rocks and minerals and be able to identify them.

Syllabus summary: Geological concepts relevant to civil engineering and the building environment. Introduction to minerals; igneous, sedimentary and metamorphic rocks, their occurrence, formation and significance. General introduction to physical geology and geomorphology, structural geology, plate tectonics, and hydrogeology. Associated laboratory work on minerals, rocks and mapping.

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### GEOL4011 Geology Honours A Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B S T (Hons), B Sc (Environmental)(Hons), B Sc (Hons).

Students enrolled in the Honours program study various advanced aspects of Geology. The program may include lectures, tutorials, seminars and practicals. Students will undertake a research project. Assessment will include the project and may include examination and classwork.

### GEOL4012 Geology Honours B Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** GEOL4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B S T (Hons), B Sc (Environmental)(Hons), B Sc (Hons).

See GEOL4011

### GEOL4013 Geology Honours C Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** GEOL4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B S T (Hons), B Sc (Environmental)(Hons), B Sc (Hons).

See GEOL4011

### GEOL4014 Geology Honours D Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** GEOL4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B S T (Hons), B Sc (Environmental)(Hons), B Sc (Hons).

See GEOL4011

### GEOP4011 Geophysics Honours A Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B S T (Hons), B Sc (Hons).

Students enrolled in the Honours program study various advanced aspects of Geophysics. The program may include lectures, tutorials, seminars and practicals. Students will undertake a research project. Assessment will include the project and may include examination and classwork.

### GEOP4012 Geophysics Honours B Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** GEOP4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons).

See GEOP4011

### GEOP4013 Geophysics Honours C Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** GEOP4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons).

See GEOP4011

### GEOP4014 Geophysics Honours D Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** GEOP4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons).

### GEOS1001 Earth, Environment and Society Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Mel Neave, Dr Bill Pritchard, Ms Edwina Tanner **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prohibitions:** GEOS1901, GEOG1001, GEOG1002, GEOL1001, GEOL1002, GEOL1902 **Assessment:** One 2 hour exam, 2000 word essay, field and prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B E, B Int S, B L W Sc, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program, UG Summer/Winter School.

This is the gateway unit of study for Human Geography, Physical Geography and Geology. Its objective is to introduce the big questions relating to the origins and current state of the planet: climate change, environment, landscape formation, and the growth of the human population. During the semester you will be introduced to knowledge, theories and debates about how the world's physical and human systems operate. The first module investigates the system of global environmental change, specifically addressing climate variability and human impacts on the natural environment. The second module presents Earth as an evolving and dynamic planet, investigating how changes take place, the rate at which they occur and how they have the potential to dramatically affect the way we live. Finally, the third module, focuses on human-induced challenges to Earth's future. This part of the unit critically analyses the relationships between people

and their environments, with central consideration to debates on population change and resource use.

### GEOS1002 Introductory Geography Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Mel Neave, Dr Kurt Iveson **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prohibitions:** GEOS1902, GEOG1001, GEOG1002 **Assessment:** One 2 hour exam, one 2000 word essay, five practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B E, B Int S, B Res Ec, B Sc, B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit of study provides an introduction to the ways that human and physical landscapes are produced. It begins with an investigation of Earth's surface features, exploring the distribution of landforms across Earth and interpreting their evolutionary histories. Several landscapes will be examined including those formed by rivers, wind, oceans and glaciers. But physical landscapes evolve under the influence of and affect human operations. Therefore, the unit of study will also consider the political, economic, cultural and urban geographies which shape contemporary global society. Each of these themes will be discussed with reference to key examples, in order to consider the ways in which the various processes (both physical and human) interact in the shaping of places. The unit of study will also include short field trips to localities surrounding the university to observe processes of spatial change and conflict. The unit of study is designed to attract and interest students who wish to pursue geography as a major within their undergraduate degree, but also has relevance to students who wish to consider the way geographers understand the contemporary world.

### GEOS1003 Introduction to Geology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Tom Hubble, A/Prof Clarke **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour practical per week. **Prohibitions:** GEOS1903, GEOL1002, GEOL1902 **Assessment:** One 2 hour exam, practical reports, field report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B E, B L W Sc, B Res Ec, B Sc, B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

The aim of this unit of study is to examine the chemical and physical processes involved in mineral formation, the interior of the Earth, surface features, sedimentary environments, volcanoes, and metamorphism. Lectures and laboratory sessions on mountain building processes and the formation of mineral deposits will lead to an understanding of the forces controlling the geology of our planet. Processes such as weathering, erosion and nature of sedimentary environments are related to the origin of the Australian landscape. In addition to laboratory classes there is a two-day excursion to the western Blue Mountains and Lithgow to examine geological objects in their setting.

#### Textbooks

The recommended text is Hamblin & Christiansen. Earth's Dynamic Systems. 9th Edition. Prentice Hall. 2001.

### GEOS1901 Earth, Environment and Society Advanced Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Mel Neave, Dr Bill Pritchard, Ms Edwina Tanner **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** Departmental permission is required for enrolment. A UAI above 93 is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator. **Prohibitions:** GEOS1001, GEOG1001, GEOG1002, GEOL1001, GEOL1002, GEOL1902 **Assessment:** One 2 hour exam, 2000 word essay, field and prac reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Agr Ec, B E, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as for GEOS1001, but will be required to carry out more challenging practical assignments.

### GEOS1902 Introductory Geography (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Mel Neave, Dr Kurt Iveson **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** Departmental permission is required for enrolment. A UAI above 93 is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator. **Prohibitions:** GEOS1002, GEOG1001, GEOG1002 **Assessment:** One 2 hour exam, one 2000 word essay, five practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Agr Ec, B E, B Res Ec, B Sc, B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as for GEOS1002, but will be required to carry out more challenging practical assignments.

### GEOS1903 Introduction to Geology (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Tom Hubble, A/Prof Geoff Clarke **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour practical per week. **Prerequisites:** Departmental permission is required for enrolment. A UAI above 93 is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator. **Prohibitions:** GEOL1002, GEOL1902, GEOS1003 **Assessment:** One 2 hour exam, practical reports, field report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Agr Ec, B E, B Res Ec, B Sc, B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit has the same objectives as GEOS1003 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. This unit may be taken as part of the BSc (Advanced).

### GEOS2111 Natural Hazards: a GIS Approach Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Patrice Rey and others **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour practical per week. **Prerequisites:** 24 credit points of junior units of study including one of GEOS1001 or GEOS1002 or GEOS1003 or GEOG1001 or GEOG1002 or ENV1002 or GEOL1001 or GEOL1002 or GEOS1902 or GEOL1501 or GEOS1901 or GEOS1903 **Prohibitions:** GEOG2411, GEOS2911 **Assessment:** One 2 hour exam, one assignment, report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

The geosciences provide an essential framework for understanding the environmental response to short- and long-term geologic, oceanic and atmospheric processes. This unit of study introduces students to a variety of natural phenomena that affect society with impact levels ranging from nuisance to disastrous. The discussion of each hazard focuses on: (1) the process mechanics, (2) hazards and risk, and (3) methods for mitigation. Geographic Information Systems (GIS) are used by scientists, planners, policy-makers and the insurance industry alike to address many issues relating to natural hazards. This unit of study will introduce students to the major concepts relating to GIS and provide practical experience in the application of GIS techniques to hazard mapping, risk assessment and mitigation.

**GEOS2112****Economic Geography of Global Development Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Bill Pritchard, A/Prof Phil Hirsch  
**Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** 24 credit points of Junior units of study, including GEOS1001 or GEOS1002 or GEOS1003 or GEOS1901 or GEOS1902 or GEOS1903 or ECOP1001 or ECOP1002 or GEOG1002 or GEOG1001 or GEOL1002 or GEOL1902 **Prohibitions:** GEOS2912, GEOG2511 **Assessment:** One 2 hour exam, 2000 word essay, tutorial papers, practical report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Int S, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

In this unit of study, students will be introduced to the sub-discipline of economic geography by way of debates on the spatial character of global development. We focus on questions relating to who are the winners and losers from contemporary patterns of global economic change. This includes the analysis of relevant conceptual approaches to these questions (including comparative advantage, global commodity chain theory, regionalism, economic governance etc), plus 'hands-on' examination of the key institutions (such as the WTO and ADB) driving these changes. In general, issues are tailored to themes being played out in Asia-Pacific countries. Students are expected to participate in a variety of practical class exercises throughout the semester, which will include presenting the fruits of independent research activities. This unit provides an especially relevant feeder-unit into GEOS3053/ GEOS3054, the Asia-Pacific Field School.

**GEOS2113****Making the Australian Landscape Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr S.J. Gale **Session:** Semester 1 **Classes:** Two - three 1 hour lectures and one - two 1 hour practicals per week. **Prerequisites:** 24 credit points of Junior units of study, including GEOS1002 or GEOS1003 or GEOS1902 or GEOS1903 or GEOG1001 or ENVI1002 or GEOL1001 or GEOL1002 or GEOL1902 **Prohibitions:** GEOS2913 **Assessment:** One 2 hour examination, practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, UG Study Abroad Program.

The shifts in the nature of the Earth's environment over time and the resultant changes in process regimes have had dramatic impacts on the way the Australian physical landscape has evolved. We consider here the effects of these changes on the broad pattern of the landscape, focusing particularly on slopes and soils. We follow this by investigating the environmental changes that have taken place since the end of the last glacial, the time when the continent's climates and environments first took on a recognisably modern form. We deal specifically with the impact of human activity on the Australian biophysical environment, emphasising both pre-European impacts and those changes that have taken place since European contact.

**GEOS2114****Volcanoes, Hot Rocks and Minerals Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Derek Wyman, Dr Patrice Rey, Prof Geoff Clarke **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour practical per week. **Prerequisites:** One of (GEOG1001, GEOL1001, GEOL1002, GEOS1003, GEOS1903, ENVI1002, GEOL1902, GEOL1501) and 24 credit points of Junior Science units of study. **Prohibitions:** GEOL2111, GEOL2911, GEOS2914 **Assessment:** One 2 hour exam, practical reports, field trip report, group presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B E, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program, UG Summer/Winter School.

This unit of study relates the plate tectonics of subduction zones to a) volcanoes and their hazards; b) geological processes in the deep crust; and c) the formation of precious metal and gemstone ores around the Pacific Rim. A problem solving approach is used to develop the skills required to understand the history of individual volcanoes and predict their future activity and hazards. The unit includes a two

to three day field trip to study an extinct volcano in NSW. Practical work includes independent study of igneous systems, rocks and minerals employing both microscope-based techniques and computer modeling. The unit provides relevant knowledge for GEOS3006/3906 - Mineral Deposits and Spatial Data Analysis.

**GEOS2115****Oceans, Coasts and Climate Change Science**

**Credit points:** 6 **Teacher/Coordinator:** Ass/Prof Dietmar Müller, Dr Peter Cowell **Session:** Semester 1 **Classes:** 26 x 1 hour lectures 6 x 1 hour workshops 1 x 8 hour field work 1 x 24 hour field school (3 days, Easter break) **Prerequisites:** 48 credit points from Junior Units of Study **Prohibitions:** GEOS2915, MARS2006 **Assumed knowledge:** At least one of (GEOG1001, GEOL1001, GEOL1002, GEOS1003, GEOS1903, ENVI1002, GEOL1902, GEOL1501) **Assessment:** 3 x web-based on-line reports (30% of total marks) 1 seminar presentation: field school (20% of total marks) 1 x 2 hour exam (50% of total marks) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Marine Science), UG Study Abroad Program.

This Unit of Study introduces core concepts about how the formation of ocean basins and their influence on climate govern the development of coasts and continental margins. These concepts provide a framework for understanding the geographic variation of coasts, continental shelves and sediment accumulations in the deep ocean. Ocean-basin evolution is explained in terms of movements within the Earth's interior and how these movements determine the geometry of ocean basins, and their alpine counterparts, which interact with the global circulation of the ocean and atmosphere. Affects of this interaction on energy regimes and hydrology are described in accounting for regional controls that govern supply and dispersal of sediments on continental margins and in ocean basins. These controls include effects on wave climates, wind-driven currents and tidal regimes. These controls also govern environmental conditions determining development of coral reefs and other ecosystems that play a key role in marine sedimentation. The Unit of Study systematically outlines how these factors have played out with climate change to produce the beaches, dunes, estuaries and deltas we see today, as well as the less familiar deposits hidden beneath the sea. The Unit also outlines how knowledge of responses to climate change in the past allow us to predict responses of coasts to accelerated climate change occurring now and in the future due to the industrial greenhouse effect. Overall therefore, the Unit aims to provide familiarity with fundamental phenomena central to the study of marine geoscience, introduced through process-oriented explanations. The Unit of Study is structured around problem-based project work, for which lectures provide the theoretical background.

Thurman, HV and Trujillo, AP. Introductory Oceanography. Pearson, Prentice-Hall, 10th Edition. 2004.

**GEOS2121****Environmental and Resource Management Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Phil McManus **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week, one fieldtrip. **Prerequisites:** 24 credit points of junior units of study, including one of: GEOS1001 or GEOS1002 or GEOS1003 or GEOS1901 or GEOS1902 or GEOS1903 or ECOP1001 or ECOP1002 or GEOL1002 or GEOL1902 or GEOL1501 **Prohibitions:** GEOG2421, GEOL2202, GEOS2921 **Assessment:** One 2 hour exam, one 2000 word essay, tutorial papers, one fieldtrip report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B E, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit of study explores cultural constructions of nature and resources, the evolution of environmental thought and the debates about sustainable development. It integrates environmental, economic, cultural and social considerations, with particular regard to water, mining, forestry and fishing industries in Australia and other countries. The unit includes a fieldtrip to the Hunter Valley to look at geological

and geographical issues pertaining to mines, wines and the thoroughbred breeding industries in this region. The unit of study enables students to learn about the economics of resource extraction and the social, cultural and environmental considerations that must be taken into account when developing and implementing environmental and resource management policies.

### GEOS2122

#### Urban Geography Science

**Credit points:** 6 **Teacher/Coordinator:** Prof John Connell, Dr Kurt Iveson  
**Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** 24 credit points of Junior units of study, including GEOS1001 or GEOS1002 or GEOS1003 or ECOP1001 or ECOP1002. **Prohibitions:** GEOS2922, GEOG2521 **Assessment:** One 2 hour exam, 2000 word essay, tutorial papers, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Int S, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Cities are full of different people doing all sorts of different things. Developing an understanding of these processes necessitates attention to the geographical principles that underlie varied social practices (work, leisure, sport, music etc) and social categories such as ethnicity, gender, sexuality and race. We will investigate how different people perceive space and construct space, primarily in Western contexts and thereby seek to understand the cultural and political dimensions of everyday life in cities.

### GEOS2124

#### Fossils and Tectonics Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Dietmar Müller **Session:** Semester 2 **Classes:** Two 1 hour lectures plus one 3 hour practical each week. **Prerequisites:** 24 credit points of Junior units of study, including GEOS1003 or GEOS1903 or GEOL1002 or GEOL1902 or GEOL1501 **Prohibitions:** GEOS2924, GEOL2123, GEOL2124 **Assessment:** One 2 hour exam, practical reports, field report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B E, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

The unit aims to convey how fossils, stratigraphic and structural data are used together to determine ages and environments and the deformation history of rock layers. It covers an introduction to historical geology and the evolution of the major fossils groups. Methods of stratigraphic age determination include litho-, bio-, chemo-, magneto-stratigraphy, as well as radiometric geochronology and the stratigraphic characteristics of the main geological time intervals. Structural methods are focused on brittle deformation in the upper crust and sediments. Students will gain familiarity with the most important fossil groups and how to identify them, and with the most important types of faults and folds. The formation of fossil fuels such as coal, oil and gas will also be covered in an earth history and resource exploration context. The simultaneous use of fossils, stratigraphy and structure to unravel the geological history of a set of exposed rock layers is demonstrated during a field excursion to Yass.

### GEOS2911

#### Natural Hazards: a GIS Approach Advanced Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Patrice Rey and others. **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3 hour practical per week. **Prerequisites:** 24 credit points of junior units of study including a distinction in one of GEOS1001 or GEOS1002 or GEOS1003 or GEOS1901 or GEOS1902 or GEOS1903 or GEOG1001 or GEOG1002 or ENVI1002 or GEOL1001 or GEOL1002 or GEOL1902 or GEOL1501 **Prohibitions:** GEOG2411, GEOS2111 **Assessment:** One 2 hour exam, one assignment, practical report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

The geosciences provide an essential framework for understanding the environmental response to short- and long-term geologic, oceanic and atmospheric processes. This unit of study introduces students to a variety of natural phenomena that affect society with impact levels ranging from nuisance to disastrous. The discussion of each hazard focuses on: (1) the process mechanics, (2) hazards and risk, and (3) methods for mitigation. Geographic Information Systems (GIS) are used by scientists, planners, policy-makers and the insurance industry alike to address many issues relating to natural hazards. This unit of study will introduce students to the major concepts relating to GIS and provide practical experience in the application of GIS techniques to hazard mapping, risk assessment and mitigation.

### GEOS2912

#### Economic Geography of Global Dev. Adv. Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Bill Pritchard, A/Prof Phil Hirsch **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** 24 credit points of Junior units of study, including a distinction in one of: GEOS1001 or GEOS1901 or GEOS1002 or GEOS1902 or GEOS1003 or GEOS1903 or ECOP1001 or ECOP1002 or GEOG1001 or GEOG1002 or GEOL1002 or GEOL1902 or GEOL1501 **Prohibitions:** GEOS2112, GEOG2511 **Assessment:** One 2 hour exam, 2000 word essay, tutorial papers, practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Int S, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This is an Advanced version of GEOS2112. In this unit of study, students will be introduced to the sub-discipline of economic geography by way of debates on the spatial character of global development. We focus on questions relating to who are the winners and losers from contemporary patterns of global economic change. This includes the analysis of relevant conceptual approaches to these questions (including comparative advantage, global commodity chain theory, regionalism, economic governance etc), plus 'hands-on' examination of the key institutions (such as the WTO and ADB) driving these changes. In general, issues are tailored to themes being played out in Asia-Pacific countries. Students are expected to participate in a variety of practical class exercises throughout the semester, which will include presenting the fruits of independent research activities. This unit provides an especially relevant feeder-unit into GEOS3053/GEOS3054, the Asia-Pacific Field School.

### GEOS2913

#### Making the Australian Landscape Advanced Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Stephen Gale **Session:** Semester 1 **Classes:** Two - three 1 hour lectures and one - two 1 hour practicals per week. **Prerequisites:** 24 credit points of Junior units of study, including distinction in one of GEOS1002 or GEOS1003 or GEOS1902 or GEOS1903 or GEOG1001 or ENVI1002 or GEOL1001 or GEOL1002 or GEOL1902 **Prohibitions:** GEOS2113 **Assessment:** One 2 hour examination, practical reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, UG Study Abroad Program.

The shifts in the nature of the Earth's environment over time and the resultant changes in process regimes have had dramatic impacts on the way the Australian physical landscape has evolved. We consider here the effects of these changes on the broad pattern of the landscape, focusing particularly on slopes and soils. We follow this by investigating the environmental changes that have taken place since the end of the last glacial, the time when the continent's climates and environments first took on a recognisably modern form. We deal specifically with the impact of human activity on the Australian biophysical environment, emphasising both pre-European impacts and those changes that have taken place since European contact.

### GEOS2914

#### Volcanoes, Hot Rocks and Minerals Adv Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Derek Wyman Dr Patrice Rey Dr Geoff Clarke **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 3

hour practical per week. **Prerequisites:** 24 credit points of Junior Science units of study and Distinction in one of GEOL1002 or GEOS1002 or ENVI1002 or GEOL1501 or GEOL1902 or GEOS1003 or GEOS1903. This requirement may be varied and students should consult the unit of study coordinator. **Prohibitions:** GEOL2001, GEOS2114 **Assessment:** One 2 hour exam, practical reports, field trip report, group presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B E, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as GEOS2114 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. This unit may be taken as part of the BSc (Advanced).

*Textbooks*

No required textbook. Course notes available.

## GEOS2915

### Oceans, Coasts and Climate Change (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** Ass/Prof Dietmar Müller, Dr Peter Cowell **Session:** Semester 1 **Classes:** 26 x 1 hour lectures, 1 x 16 hour field school (2 days, Easter break), 2 x 1 hour workshops, 1 x 4 hour field work, 1 x 4 hour field work, 5 x 3 hours lab work **Prerequisites:** Distinction average in 48 credit points from Junior units of study **Prohibitions:** GEOS2115, MARS2006 **Assumed knowledge:** (GEOG1001, GEOL1001, GEOL1002, GEOS1003, GEOS1903, ENVI1002, GEOL1902, GEOL1501) **Assessment:** Field School Report (20%), Field and Lab report (45%), 2 web based online reports (15% of total marks), one 1 hour exam: subset of GEOS2115 (20% of total marks) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit has the same objectives as GEOS2115 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students who elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives.

*Textbooks*

None: Online reading materials are provided via Fisher Library.

## GEOS2921

### Environmental & Resource Management Adv Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Phil McManus **Session:** Semester 2 **Classes:** Two 1 hour lectures, one 1 hour tutorial per week and one fieldtrip. **Prerequisites:** 24 credit points of Junior units of study, including a distinction in one of: GEOS1001 or GEOS1901 or GEOS1002 or GEOS1902 or GEOS1003 or GEOS1903 or ECOP1001 or ECOP1002 or GEOG1001 or GEOG1002 or GEOL1002 or GEOL1902 or GEOL1501. This requirement may be varied and students should consult the unit of study coordinator. **Prohibitions:** GEOG2421, GEOL2202, GEOS2121 **Assessment:** One 2 hour exam, one 2000 word essay, one 2500 word essay, one fieldtrip report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B E, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Advanced students will complete the same core lecture materials as for GEOS2121 but are required to complete an essay in place of the regular tutorial reports prepared in GEOS2121.

## GEOS2922

### Urban Geography (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Prof John Connell, Dr Kurt Iveson **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** 24 credit points of Junior units of study, including a distinction in one of: GEOS1001 or GEOS1901 or GEOS1002 or GEOS 1902 or GEOS1003 or GEOS1903 or ECOP1001 or ECOP1002 or GEOG1001 or GEOG1002 **Prohibitions:** GEOS2122 **Assessment:** One 2 hour exam, 2000 word essay, tutorial papers, practical reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Int S, B Res Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Cities are full of different people doing all sorts of different things. Developing an understanding of these processes necessitates attention to the geographical principles that underlie varied social practices (work, leisure, sport, music, etc) and social categories such as ethnicity, gender, sexuality and race. This unit will examine how these process create and re-create urban landscapes. We will investigate how different people perceive space and construct space, primarily in western contexts, and thereby seek to understand the cultural and political dimensions of everyday life in cities.

## GEOS2924

### Fossils and Tectonics (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Dietmar Müller, Dr Patrice Rey, Prof Peter Hatherly **Session:** Semester 2 **Classes:** Two 1 hour lectures plus one 3 hour practical each week. **Prerequisites:** Distinction in GEOS1003 or Distinction average in 12 credit points of Junior Geoscience units (Geoscience is the disciplines of Geography, Geology and Geophysics) **Prohibitions:** GEOS2124, GEOL2123, GEOL2124 **Assessment:** One 2 hour exam, practical reports, field report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B E, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as GEOS2124 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. This unit may be taken as part of the BSc (Advanced).

## GEOS3008

### Field Geology and Geophysics Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Patrice Rey, Prof Peter Hatherley **Session:** Semester 2 **Classes:** (weeks 1-7) 14 days of field work **Prerequisites:** 12 credit points of Intermediate GEOS units **Prohibitions:** GEOL3103, GEOS3908 **Assessment:** The field work will be assessed by written reports (up to 30 pages in total) and field exercises **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit is considered an essential component all Geology and Geophysics majors. All students will undertake a range of exercises, but concentrate on aspects that emphasise their chosen major: (1) field mapping and the analysis of geological objects in the field, in weakly to complexly deformed sedimentary and volcanic sequences; (2) field investigations of mineral deposits and their relationships to host rocks; and (3) the practical application of magnetic and electrical methods commonly employed in the search for mineral deposits. The field course complements other subject areas in Geology & Geophysics and will give students experience in the field identification of rocks and minerals, regional geology, stratigraphy, structure and rock relationships. Students will be required to pay the cost of hostel-style accommodation during field work, which may involve camping.

## GEOS3009

### Coastal Environments & Processes Science

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof. Gavin Birch, Dr Ana Vila-Concejo **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour practical per week; weekend excursion. **Prerequisites:** (6 credit points of Intermediate Geoscience\* units) and (6 further credit points of Intermediate Geoscience or 6 credit points of Physics or Mathematics or Information Technology or Engineering units) or ((MARS2005 or MARS2905) and (MARS2006 or MARS2906)) **Prohibitions:** GEOS3909, MARS3003, MARS3105

**Assessment:** One 2 hour exam, two 1500 word reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: \* Geoscience is the disciplines of Geography, Geology and Geophysics.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Australian coastal environments are dynamic systems responding to input sediments and processes as well as solid boundary conditions. The unit focuses on high-energy wave and wind dominated coastal systems that include the beach-surf zone, dunes, barriers, carbonate (coral reef) environments and their Holocene/Quaternary evolution. The regional impact of waves, tides, embayments, and other environmental parameters in controlling morphology and deposits are addressed. The practical program uses real data sets collected during recent research programs and during two field excursions which address issues

specifically relevant to Australia's coastline. The excursions include one 2 day weekend field trip and one 5 day field trip to the Great Barrier Reef in the mid semester break. *Note:* Students will incur costs in attending the excursions. Alternative

work will be provided if students cannot attend the 5 day field trip.

Course notes will be available from the Photocopy Centre.

### GEOS3014

#### GIS in Coastal Management Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Eleanor Bruce, Dr Peter Cowell. **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour practical per week. **Prerequisites:** MARS(2005 or 2905) and MARS(2006 or 2906), or 12 credit points of Intermediate Geoscience\* units, or (GEOS(2115 or 2915) and BIOL(2018 or 2918)) **Prohibitions:** GEOS3914, MARS3104. **Assessment:** One 2 hour exam, two project reports, quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: \* Geoscience is the disciplines of Geography, Geology and Geophysics.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

Coastal Management is about how scientific knowledge is used to support policy formulation and planning decisions in coastal environments. The course links coastal science to policy and practice in management of estuaries, beaches and the coastal ocean. The principles are exemplified through specific issues, such as coastal erosion, pollution, and impacts of climate-change. The issues are dealt with in terms of how things work in nature, and how the issues are handled through administrative mechanisms. These mechanisms involve planning strategies like Marine Protected Areas and setback limits on civil development in the coastal zone. At a practical level, the link between science and coastal management is given substance through development and use of 'decision-support models'. These models involve geocomputing methods that entail application of simulation models, remotely sensed information, and Geographic Information Systems (GIS). The course therefore includes both principles and experience in use of these methods to address coastal-management issues. (It thus also involves extensive use of computers.) Although the focus is on the coast, the principles and methods have broader relevance to environmental management in particular, and to problem-solving in general. That is, the course has vocational relevance in showing how science can be exploited to the benefit of society and nature conservation.

Burrough, PA and McDonnell, RA. Principles of Geographical Information Systems: Spatial information systems and geostatistics. Oxford University Press. Oxford. 1998.

### GEOS3015

#### Environmental Geomorphology

### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Stephen Gale **Session:** Semester 2 **Classes:** Two 1 hour lectures, one 1 hour tutorial and one 2 hour practical per week or equivalent. **Prerequisites:** 24 credit points of Intermediate units, including 6 credit points of Intermediate Geography. **Prohibitions:** GEOS3915 **Assumed knowledge:** Intermediate geomorphology/ physical geography/ geology. **Assessment:** One 2 hour exam, practical & field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

The first part of this unit deals with the effects of weathering on the physical and the built environment, and considers the relationship between soil and landforms. The second part investigates the environmental changes that have taken place since the end of the last glacial, the time when the world's climates and environments first took on a recognisably modern form. It deals specifically with changes to the Australian biophysical environment and will focus on human-environmental impacts, both under pre-European and post-contact conditions.

### GEOS3018

#### Rivers: Science, Policy and Management Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Mel Neave. **Session:** Semester 1 **Classes:** Two 1 hour lectures, one 1 hour tutorial, two 4 hour practicals per week; fieldwork **Prerequisites:** (24 credit points of Intermediate units of study including 6 credit points of Intermediate Geography units of study) or ((MARS2005 or MARS2905) and (MARS2006 or MARS2906)) **Prohibitions:** GEOS3918 **Assessment:** One 2 hour exam, two 1500 word essays **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B L W Sc, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

The unit of study is concerned with understanding the functioning of river catchments from both natural science and social science perspectives, at a variety of scales. The catchment as a morphodynamic process-response system is addressed with an emphasis on the relationships between processes and landform entities. Similarly, relationships within social, economic, and political systems are explored within the catchment context, with particular emphasis on the interactions between the social system and bio-physical system. Empirical context for the unit will primarily be drawn from the Murray-Darling, Mekong, and Hawkesbury-Nepean catchments. Fieldwork in the latter is integral to the unit of study.

### GEOS3053

#### Asia-Pacific Field School-Assessment A Science

**Credit points:** 6 **Teacher/Coordinator:** Prof Phil Hirsch. **Session:** S1 Intensive **Classes:** Six weeks intensive. eight modules of 3 lectures each; ten full days' equivalent fieldwork; 20 hours small group work. **Prerequisites:** 6 credit points of Intermediate units of study in Geography. Department permission is required for enrolment. **Corequisites:** GEOS3054 **Prohibitions:** GEOG3201, GEOS3953 **Assessment:** One tutorial paper, one extended field report, one exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment. Note: Students must contact the unit coordinator no later than the end of May in the year before taking this Unit.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Int S, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

The unit of study can be taken only in coincidence with GEOS3054 and with prior permission from the unit of study coordinator. It constitutes a Field School run over a six- week period in January-February, prior to the commencement of the semester. In 2010 the Field School will be held in China, Thailand, Laos, Cambodia and Viet Nam. In other years it may be held in the South Pacific (Vanuatu and Fiji). GEOS3053 will focus on the use, development and management of the Mekong River at various scales from village to international river basin. The Field School is run in close association with local universities, whose staff and students participate in some

components of the course. Places are limited, and students interested in the 2010 Field School should indicate expression of interest to philip.hirsch@usyd.edu.au before the end of May 2009.

GEOS3054 will focus on economic development and regional intergration in the Greater Mekong Subregion and their social & environmental implications at various scales from village to transnational region. It is run in close association with local universities, whose staff and students participate in some components of the course. Places are limited, and students interested in the 2010 Field School should indicate expression of interest to philip.hirsch@usyd.edu.au before the end of May 2009.

### GEOS3101

#### Earth's Structure and Evolution

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Patrice Rey, Prof Geoff Clarke **Session:** Semester 1 **Classes:** two 1 hour lectures and one 3 hour tutorial/practical class per week. **Prerequisites:** GEOS(2114 or 2914) and GEOS(2124 or 2924); or 24 credit points of Intermediate Science units of study and GEOS1003 with permission of the Head of School **Prohibitions:** GEOS(3801 and 3003 and 3903 and 3004 and 3904 and 3006 and 3906 and 3017 and 3917) **Assumed knowledge:** GEOS2114, GEOS2124 **Assessment:** one 2 hour exam, practical and field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The Earth's crust and upper mantle, or lithosphere, are a consequence of dynamic and thermal processes operating since the beginning of the Archaean. This unit focuses on information and techniques that enable an understanding of these processes. The main topics presented in this unit include: the formation and evolution of oceanic and continental lithosphere; structural deformation, magmatism and metamorphism at plate boundaries; and the mesoscopic and microscopic analysis of igneous and metamorphic rocks. Practical classes are designed to enable students to competently and independently identify the common crystalline rocks in hand-specimen; and to gather and interpret the structural field data which enables the determination of the structural style and deformational history presented in particular tectonic settings. The concepts and content presented in this unit are generally considered to be essential knowledge for geologists and geophysicists and provide a conceptual framework for their professional practice. Students wishing to specialise in the field and become professional geologists will normally need to expand upon the knowledge gained from this unit and either complete an honours project or progress to postgraduate coursework in this field.

### GEOS3102

#### Global Energy and Resources

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Derek Wyman and A/Prof Gavin Birch **Session:** Semester 1 **Classes:** two 1 hour lectures and one 2 hour tutorial/practicals per week. **Prerequisites:** GEOS(2114 or 2914) and GEOS(2124 or 2924); or 24 credit points of Intermediate Science units of study and GEOS1003 with permission of the Head of School **Prohibitions:** GEOS3802, 3003, 3903, 3004, 3904, 3006, 3906, 3017 and 3917 **Assumed knowledge:** GEOS 2114 and GEOS2124 **Assessment:** one 2 hour exam, practical and field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit examines the processes that form energy and mineral resources, outlines the characteristics of major fossil fuel and metal ore deposits and introduces the principles that underpin exploration strategies used to discover and develop geological resources. The unit will focus on a variety of topics including: coal; petroleum formation and migration, hydrocarbon traps and maturation; precious metal, base metal and gemstone deposit types; and exploration strategies. An integrated approach will relate tectonic processes through time to the formation of fossil fuel and mineral provinces. Practical exercises will introduce students to the techniques used to identify economically viable geological resources using a variety of exercises based on actual examples of resource exploration drawn from both the petroleum and minerals industry. An excursion to active and historic mining sites in NSW will complement the practical studies.

### GEOS3103

#### Environmental & Sedimentary Geology

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Tom Hubble and Dr Adriana Dutkiewicz **Session:** Semester 2 **Classes:** two 1 hour lectures and one 3 hour tutorial/practical class per week. **Prerequisites:** GEOS(2124 or 2924) and GEOS(2111 or 2911 or 2114 or 2914 or 2113 or 2913); or GEOS(1003 or 1903) and 24 credit points of intermediate Science units of study with permission of the Head of School **Prohibitions:** GEOS3803 **Assumed knowledge:** GEOS1003, GEOS2124 **Assessment:** one 2 hour exam, practical and field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

Sediments and sedimentary rocks cover most of the Earth's surface, record much of the Earth's geological history and host important resources such as petroleum, coal, water and mineral ores. The aim of this unit is to provide students with the skills required to examine, describe and interpret sediments and sedimentary rocks for a variety of different purposes. Specific focuses of the unit will be on identifying the recent or ancient environment in which sedimentary materials were deposited; the techniques used to identify anthropogenic pollution of modern sediments; and an assessment of natural hazards commonly associated with the formation of sediment bodies such as landslides and deep marine slides. On completion of this unit students will be familiar with the natural processes that form, modify, pollute and lithify sediments and the recognition and management of the environmental hazards associated with sediment bodies. A variety of sedimentary settings will be examined including fluvial, alluvial, lacustrine, marginal marine and deep marine environments. The various controls on the sedimentary record such as climate and sea-level change, as well as diagenesis and geochemical cycles will also be discussed. Practical exercises will require students to examine global datasets, determine the properties of sedimentary rocks, as well as collect and interpret their own field data. The course is relevant to students interested in petroleum or mineral exploration, environmental and engineering geology as well as marine geoscience.

##### Textbooks

Course notes will be available from the Copy Centre and an appropriate set of reference texts will be placed on special reserve in the library.

### GEOS3104

#### Geophysical Methods

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Prof Peter Hatherly and A/Prof Dietmar Mueller **Session:** Semester 2 **Classes:** two 1 hour lectures and one 3 hour tutorial/practical class per week. **Prerequisites:** 24 credit points of intermediate Science units of study or (GEOS(2114, 2914) and GEOS(2124, 2924))

**Prohibitions:** GEOS3804, GEOS3003, GEOS 3903, GEOS3006, GEOS3906, GEOS3016, GEOS3916, GEOS3017, GEOS3917 **Assumed knowledge:** GEOS2114 and GEOS2124 **Assessment:** one 2 hour exam, practical and field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, B Sc (Marine Science), UG Study Abroad Program.

This unit introduces the common geophysical methods used to investigate the interior of the Earth and focuses on the techniques used for mineral and hydrocarbon exploration and production. Applications of these methods to problems in global geophysics will also be examined with an emphasis on their use in marine and terrestrial environments. On completion of this unit students will have developed a thorough understanding of the commonly used geophysical methods and will be able to evaluate and critically assess most forms of geophysical data as well as be able to actively participate in geophysical explorations. The unit is aimed at students with interests in land-based and marine resource exploration, plate tectonics, internal earth structure, and near-surface investigations of groundwater resources and environmental pollution. Students wishing to specialise in the field and become professional geophysicists will normally need to expand upon the geophysics knowledge gained from this unit and either complete an honours project or progress to postgraduate coursework in this field.

#### Textbooks

Class notes will be supplied through the University copy Centre. Geophysical textbooks held in the library provide adequate additional information that supports the class notes.

### GEOS3513

#### Regional Development and Environment Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Bill Pritchard; Dr Timohir Ancew **Session:** Semester 1 **Classes:** 2 hours of lectures per week and 2 hours of tutorials/practicals per week **Prerequisites:** 24 credit points of intermediate and/or senior units of study including 6 credit points of Intermediate units of study in Geography. **Prohibitions:** ENVI3113, GEOS3511, GEOS3911, GEOS3913 **Assessment:** Two in-class tests, one 1,500 word essay, one GIS report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Sc, B Sc (Environmental), UG Study Abroad Program.

This unit of study acquaints students with debates and tools associated with regional development and the economic analysis of environmental issues. It provides a useful preparation for professional employment in the field of regional development, environmental policy and management, and is relevant for students interested in economic and social issues in regional Australia. Co-taught by a geographer and an economist, the unit addresses four key areas of relevance: (i) regional development theory and practice; (ii) the economics of efficiently utilising and managing the environment; (iii) debates on regional development in Australia (including consideration of the farm sector, Indigenous communities and environmental sustainability), and (iv) the use of GIS to analyse population census data. The unit requires no prior knowledge of economic theory or GIS software.

### GEOS3522

#### Cities and Citizenship Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Kurt Iveson **Session:** Semester 2 **Classes:** One 2 hour lecture, one 1 hour tutorial and one 2 hour practical per week. **Prerequisites:** 6 credit points of intermediate geography. **Prohibitions:** GEOG3203, GEOS3922 **Assessment:** One 2 hour exam, one 2000 word essay, one 3000 word practical report, tutorial participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Int S, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

What does it mean to be a 'citizen', and what has this got to do with cities? This unit explores the urban dimension of contests over the meaning of citizenship. The first half will consider historical configurations of urban citizenship, from the Greek city-states of antiquity through to imperial, colonial and industrial cities. The second half will then focus on contemporary globalising cities. A series of

case studies will consider the production of new configurations of urban citizenship across a range of cities in the world, looking at issues such as: asylum-seekers and the city; children and the city; homelessness in the city; 'culture jamming' and new forms of urban protest; trans-national social movements. The module will involve a substantial practical component, encouraging students to draw on their own experiences of city life to reflect on the meanings of citizenship.

### GEOS3551

#### Geoscience Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### GEOS3552

#### Geoscience Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### GEOS3553

#### Geoscience Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### GEOS3554

#### Geoscience Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### GEOS3801

#### Earth's Structure and Evolutions (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Patrice Rey, Prof Geoff Clarke **Session:** Semester 1 **Classes:** two 1 hour lectures and one 3 hour tutorial/practical class per week. **Prerequisites:** Distinctions in GEOS(2114 or 2914) and GEOS(2124 or 2924); Students who have a credit average for all Geoscience units may enrol in this unit with the permission of the Head of School

**Prohibitions:** GEOS3101, GEOS3003, GEOS3903, GEOS3004, GEOS3904, GEOS3006, GEOS3906, GEOS3017 and GEOS3917 **Assumed knowledge:** GEOS2114, GEOS2124 **Assessment:** one 2 hour exam, practical and field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit has the same objectives as GEOS3101 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. Specific details for this unit of study will be announced in meetings with students in week 1 of semester.

## GEOS3802

### Global Energy and Resources (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Derek Wyman and A/Prof Gavin Birch **Session:** Semester 1 **Classes:** two 1 hour lectures and one 3 hour tutorial/practical class per week **Prerequisites:** Distinction in GEOS(2114 or 2914) and GEOS(2124 or 2924); Students who have a credit average for all Geoscience units may enrol in this unit with the permission of the Head of School. **Prohibitions:** GEOS3102, GEOS3003, GEOS3903, GEOS3004, GEOS3904, GEOS3006, GEOS3906, GEOS3017, and GEOS3917 **Assumed knowledge:** GEOS2114 and GEOS2124 **Assessment:** one 2 hour exam, practical and field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit has the same objectives as GEOS3102 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. Specific details for this unit of study will be announced in meetings with students in week 1 of semester.

## GEOS3803

### Environmental & Sedimentary Geology (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Tom Hubble and Dr Adriana Dutkiewicz **Session:** Semester 2 **Classes:** two 1 hour lectures and one 3 hour tutorial/practical class per week **Prerequisites:** Distinctions in GEOS(2114 or 2914) and GEOS(2124 or 2924); Students who have a credit average for all Geoscience units may enrol in this unit with permission of the Head of School **Prohibitions:** GEOS3103 **Assumed knowledge:** GEOS1003, GEOS2124 **Assessment:** one 2 hour exam, practical and field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit has the same objectives as GEOS3103 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. Specific details for this unit of study will be announced in meetings with students in week 1 of semester.

#### Textbooks

Course notes will be available from the copy centre and appropriate set of reference texts will be placed on special reserve in the library.

## GEOS3804

### Geophysical Methods (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Prof Peter Hatherly and A/Prof Dietmar Müller **Session:** Semester 2 **Classes:** two 1 hour lectures and one 3 hour tutorial/practical class per week **Prerequisites:** Distinction in GEOS2114 or GEOS2914 and GEOS2124 or GEOS2924; Students who have a credit average for all Geoscience units may enrol in this unit with the permission of the Head of School **Prohibitions:** GEOS3104, GEOS3003, GEOS3903, GEOS3006, GEOS3906, GEOS3016, GEOS3916, GEOS3017, GEOS3917 **Assessment:** one 2 hour exam, practical and field reports **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This unit has the same objectives as GEOS3104 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. Specific details for this unit of study will be announced in meetings with students in week 1 of semester.

#### Textbooks

Class notes will be supplied through the University Copy Centre. Geophysical textbooks held in the library provide adequate additional information that supports the class notes.

## GEOS3908

### Field Geology and Geophysics (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Patrice Rey Prof Peter Hatherly **Session:** Semester 2 **Classes:** 14 days of fieldwork. **Prerequisites:** Distinction average in 12 credit points of Intermediate GEOS units. Department permission required for enrolment. **Prohibitions:** GEOS3008 **Assessment:** Written reports and field exercises **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: A Distinction average in prior Geology units of study is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator.*

**Associated degrees:** B Agr Ec, B Sc, B Sc (Environmental), B Sc (Marine Science), UG Study Abroad Program.

This unit has the same objectives as GEOS3008 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. Specific details for this unit of study will be announced in meetings with students in week prior to the field camp which is usually in the break between semester 1 and 2. This unit of study may be taken as part of the BSc (Advanced).

## GEOS3909

### Coastal Environments and Processes (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Gavin Birch Dr Ana Vila Concejo **Session:** Semester 1 **Classes:** Three 1 hour lectures, two 3 hour practicals per week, fieldwork. **Prerequisites:** Distinction average in ((6 credit points of Intermediate Geoscience\* units) and (6 further credit points of Intermediate Geoscience or 6 credit points of Physics, Mathematics, Information Technology or Engineering units) or ((MARS2005 or MARS2905) and (MARS2006 or MARS2906))) **Prohibitions:** GEOS3009, MARS3003, MARS3105 **Assessment:** One 2 hour exam, two 1500 word reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: A distinction average in prior Geography or Geology units is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as for GEOS3009 but will carry out more challenging projects, practicals, assignments and tutorials.

## GEOS3913

### Regional Development & Environment (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Bill Pritchard, Dr Timohir Anceev **Session:** Semester 1 **Classes:** 2 hours of lectures per week and 2 hours of tutorials/practicals per week. **Prerequisites:** 24 credit points of intermediate and/or senior units of study including 6 credit points of intermediate units of study in Geography with a grade of Credit or better **Prohibitions:** ENVI3113, GEOS3513, GEOS3911 **Assessment:** In-class tests, essay, report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Sc, B Sc (Environmental), UG Study Abroad Program.

This unit of study is a more advanced version of GEOS3513. It includes more challenging assessment tasks.

### GEOS3914

#### GIS in Coastal Management (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Peter Cowell & Dr Eleanor Bruce. **Session:** Semester 2 **Classes:** Two hours of lectures, one 3 hour practical per week comprising one 1 hour practical demonstration and one 2 hour practical. **Prerequisites:** Distinction average in 12 credit points of intermediate geography or geology units or GEOS (2115 or 2915) and BIOL (2018 or 2918) Department permission required for enrolment. **Prohibitions:** GEOS3014, MARS3104 **Assessment:** One 2 hour exam, project work, two practical-based project reports, fortnightly progress quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: A distinction average in prior Geography, Geology or Marine Science units of study is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as for GEOS3014 but will carry out more challenging projects, practicals, assignments and tutorials.

### GEOS3915

#### Environmental Geomorphology (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Stephen Gale. **Session:** Semester 2 **Classes:** 3 hours lectures, 6 hours practical per week, fieldwork. **Prerequisites:** Distinction average in 24 credit points of Intermediate units of study including 6 credit points of Intermediate Geography units of study. **Prohibitions:** GEOS3015 **Assessment:** One 2 hour exam, two 1500 word essays, prac and field reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as for GEOS3015, but will carry out more challenging projects, practicals, and field reports.

### GEOS3918

#### Rivers: Science and Management (Adv)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Melissa Neave **Session:** Semester 1 **Classes:** Two 1 hour lecture, one 1 hour tutorial, two 4 hour practicals per week, fieldwork. **Prerequisites:** Distinction average in (24 credit points of Intermediate units of study including 6 credit points of Intermediate Geography units of study) or ((MARS2005 or MARS2905) and (MARS2006 or MARS2906)) **Prohibitions:** GEOS3018 **Assessment:** One 2 hour exam, two 1500 word essays. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as for GEOS3018, but will carry out more challenging projects, practicals, assignments and tutorials.

### GEOS3922

#### Cities and Citizenship (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Kurt Iveson **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 2 hour practical per week. **Prerequisites:** Distinction average in 24 credit points of Intermediate Units of study including 6 credit points of Intermediate Geography units of study. **Prohibitions:** GEOS3522 **Assessment:** One 2 hour exam; e-Sim assignments, tutorial papers. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Int S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

Advanced students will complete the same core lecture material as for GEOS3022, but will carry out more challenging projects, assignments and tutorials.

### GEOS3953

#### Asia-Pacific Field School-A (Adv)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Prof Phil Hirsch **Session:** S1 Intensive **Classes:** Six weeks intensive. eight modules of 3 lectures each; 10 full days' equivalent fieldwork; 20 hours small group work **Prerequisites:** Distinction average in 24 credit points of Intermediate units of study including 6 credit points of Intermediate Geography units of study. Department permission required for enrolment. **Corequisites:** GEOS3954 **Prohibitions:** GEOS3053 **Assessment:** One tutorial paper, one extended field report, one exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Students must contact the unit coordinator no later than the end of May in the year before taking this Unit.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Int S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

The unit of study can be taken only in coincidence with GEOS 3954 and with prior permission from the unit of study coordinator. It constitutes a Field School run over a six- week period in January-February, prior to the commencement of the semester. In 2010 the Field School will be held in China, Thailand, Laos, Cambodia and Viet Nam. In other years it may be held in the South Pacific (Vanuatu and Fiji). GEOS3953 will focus on the use, development and management of the Mekong River at various scales from village to international river basin. The Field School is run in close association with local universities, whose staff and students participate in some components of the course. Places are limited, and students interested in the 2010 Field School should indicate expression of interest to philip.hirsch@usyd.edu.au before the end of May 2009. Advanced students will carryout more challenging fieldwork reports.

#### Government Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S.

## GOVT1101

### Australian Politics Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rodney Smith (S1) **Session:** Semester 1, Semester 2 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Assessment:** Essay; Exam; Participation; Paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit introduces students to debates about the nature and limits of Australian democracy, to the major institutions of Australian politics, and to the distribution of power in Australian society. Major institutions and forces such as parliament, executive government, the federal system, political parties and the media are examined as arenas of power, conflict and consensus. Who rules? How? Which groups are excluded?

## GOVT1105

### Geopolitics Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Diarmuid Maguire **Session:** Semester 2 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Assessment:** Critical reading and bibliographic assignments; essay; exam; tutorial participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit will examine how the contemporary international political order has emerged by focusing upon the interplay of diplomatic and strategic issues in the post-war world. It will begin with an analysis of the Cold War and its origins, tracing the development of Soviet-American rivalry, its manifestations in Europe, Asia, Africa and Latin America, and the different ways in which that rivalry was played out. The collapse of the Soviet Union as both a superpower and a state and the disappearance of the communist bloc will be analysed, before surveying the post-Cold War international scene. Among the issues reviewed in the post-Cold War era will be the question of US hegemony and unilateralism vs. multilateralism, nuclear proliferation, the continuing tension between the first and the third worlds, questions of civilisational conflict, non-state actors and terrorism, democratisation, and regional conflict.

## GOVT1202

### World Politics Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Gil Merom (S1); Dr Susan Park (S2) **Session:** Semester 1, Semester 2 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Assessment:** Assignment; Essay; Exam; Participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit introduces the core content of the field of international relations. The first part of the unit presents the realist, liberal, Marxist and constructivist paradigms of international relations. The second part of the unit discusses the key actors and processes political scientists define in the field, including the state, decision makers, bureaucratic organisations, and classes. The final part of the unit focuses on international security, international political economy, and global problems.

### Australian Foreign and Defence Policy Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Bob Howard **Session:** Semester 1 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2106 **Assessment:** Essay; tutorial presentation; group image; exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit examines Australia's external relations through its foreign and defence policies since Federation. It will begin with an overview of the theoretical tools for studying foreign policy, policy making and the institutions of Australia's external relations, followed by an historical overview of 'Continuity and Change' in Australia's foreign and defence policies over the relevant period. Key regional and international relationships will be analysed, as will Australia's policy response to contemporary global issues such as human rights; the War on Terror; the environment; energy security and nuclear affairs. The unit will conclude with a discussion on identity and Australia's place in the world today.

## GOVT2221

### Politics of International Economic Rels Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr John Mikler **Session:** Semester 1 **Classes:** 3 hrs per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2201 **Assessment:** Exam; essay; tutorial presentation; tutorial participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit provides an overview of four major theoretical approaches to international political economy and how these apply to

understanding the practice of international economic relations throughout the developing world. These theories are: economic nationalism, liberalism, neo-Marxism and poststructuralism. The unit analyses the theory and practice of economic relations by and between states, by applying each of the four main theories to developing country regions. In this way students will also become acquainted with the theory and practice of economic development.

### GOVT2225

#### International Security in 21st Century

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Gil Merom **Session:** Semester 1 **Classes:** 3 hrs per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2205 **Assessment:** Exam, Participation and Essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit introduces the theoretical foundations, essential concepts and central issues in the field of international security. It provides students with analytical tools to understand and participate in current debates concerning security and threats. The first part of the unit provides an introduction to the theoretical interpretations of international security. The second part discusses security phenomena, problems and strategies, including the coercive use of force, deterrence, guerrilla and counterinsurgency, nuclear stability, proliferation of weapons of mass destruction, crisis management, arms races and disarmament, security cooperation and security regimes. The discussion in this part includes a critical review of the dilemmas, strategies, and solutions in each of the issue areas.

### GOVT2226

#### International Organisations

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2206 **Assessment:** Policy paper; exam; participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

International Organisations is a survey of both the range of institutions created in response to various economic, security and environmental challenges faced by states and other actors in the global system, and some of the most prominent theories aimed at explaining them. The course will be arranged around a series of case studies of particular issue areas, from international peacekeeping, to the regulation of multinational corporations, and the struggle to slow global warming. More broadly, the course will question whether international organisations are instruments of or rivals to sovereign states, and whether they reflect the hegemony of the West, solutions to international collective problems, or agents of new transnational communities.

### GOVT2228

#### Environmental Politics

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Charlotte Epstein **Session:** Semester 2 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2208 **Assessment:** Essay; final exam; participation; critical reading notebook **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

Environmental issues pose increasingly difficult challenges to our societies. What is the nature of these challenges? Where have they come from? How have political institutions adapted to them, at the national and international levels? What further changes might be necessary to better meet them? How might these changes come about? What effects might they have on the future of politics? This unit of study will engage these kinds of questions as an introduction to some theoretical and practical dimensions of environmental politics.

### GOVT2331

#### Social Change and Politics

##### Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2301 **Assessment:** Web site review; research report; in-class test; tutorial participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit examines how processes of social change are shaped by a variety of non-institutionalised political actors, including individuals, interest groups and social movements. It will answer questions such as: What is political participation? How and why do people act politically in Australia? How does participation both shape policy agendas and lead to societal change? The main conceptual topics include: political participation, political socialisation, civil society, interest groups and social movements. This conceptual framework will be used to examine the strategic repertoires adopted by movements and groups in society, including: young people, environmental movements, identity movements, the labour movement, anti-corporate globalisation action and community-based politics.

### GOVT2336

#### Gender and Human Rights

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Louise Chappell **Session:** Semester 1 **Classes:** 3 hrs per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2306 **Assessment:** critical analysis (1500 words); group report and presentation; and take home test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit offers a gender perspective on the central activists, institutions and issues involved in advancing international human rights norms. It critically analyzes the role of state and international political institutions in shaping human rights, and focuses particularly on the ways in which women's rights have tended to be ignored in this process. Students will consider the role of transnational feminist actors in challenging mainstream conceptions of human rights and in shaping and enforcing international human rights instruments including the Convention on the Elimination of All Forms of Discrimination against Women and the International Criminal Court. Attention will be given to the experiences of women in western and non-western countries in accessing rights and assess the role that religion and culture play in this process. The gender dimensions of specific rights issues relating to war and conflict, refugee status and trafficking will also be discussed.

### GOVT2440

#### Globalisation and National Governance

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Linda Weiss **Session:** Semester 2 **Classes:** 3 hrs per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2410 **Assessment:** Research paper; mid-semester test; participation; exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

It is often argued that we are entering a new era in which the existence of nation-states and the power of national governments to manage economic and social change are rapidly being eroded by globalisation. This unit will appraise the debates about the impact of globalisation and state power erosion. It will pay particular attention to different forms of global integration and to the interplay between domestic institutions and international pressures. There will be scope for comparing national responses to the changing global economic system.

### GOVT2445

#### American Politics and Foreign Policy

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Ben Goldsmith **Session:** Semester 1 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2405 **Assessment:** Tutorial papers; essay; exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit will be an overview of the American political system and the formulation of foreign policy. It will cover the major Federal political institutions: the Presidency, the Congress, and the Supreme Court. The unit will consider how foreign policy is made through the interaction of these institutions and with other elements of civil society. Finally, it will examine the outcome of this process - US foreign policy itself - with special emphasis on the post-Cold War period. We will seek to answer two key questions: (a) what is the influence of domestic politics on US foreign policy; and (b) how does the US system cope with the apparent contradictions between its ideals and the imperatives of global power?

### GOVT2552

#### Policy Analysis

##### Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2502 **Assessment:** Reading summaries; case study; participation; test. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit examines the nature of public policy and the processes which shape its content. Most of these processes apply across nation states, although they typically manifest themselves in nation-specific ways. First, the unit outlines the nature of public policy - dealing with such matters as definitions of policy and approaches to analysing public policy. These include the traditional 'policy cycle' approach, as well as alternative models based on rational choice, the roles of groups and networks, the nature of institutions and the power of socio-economic interests. Second, it examines the main building blocks of the policy process: actors, institutions, and policy instruments. Third, it examines key stages of the public policy process: notably problem definition, agenda setting, policy formation, decision making, implementation and evaluation. Examples are drawn from Australia and a range of countries throughout the world. Fourth, it examines policy-making in extreme, 'crisis' situations. Fifth, it turns its attention to Australian policy processes, focusing specifically on the areas of economic policy and indigenous affairs. Finally, it takes an overview of public policy processes in a global world, focusing on national policy-making autonomy in the context of globalisation, as well as

challenges for the future. The unit is sufficiently flexible in terms of assessment, allowing students to concentrate on areas of interest.

### GOVT2557

#### Public Sector Management

##### Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours per week (may include one or more of the following: lectures, seminars, tutorials or workshops) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2507 **Assessment:** Reading summaries; case study; participation; test. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S, UG Study Abroad Program.

The organisation and structure of the public sector in Australia and other democracies has been transformed in recent years. This unit traces the outlines of this transformation and the debates that have accompanied it. Where should privatisation stop? How much of government can be "outsourced" or contracted out? Is permanent employment in the public service a relic of the past? Are there special ethical and public accountability requirements of public management that make it essentially different from the private sector? Topics include public sector human resource and financial management practices; relations between public organisations and the public; corporate governance practices in the public sector; commercialisation, corporatisation and privatisation; and parliamentary oversight and administrative law and their implications for the management process.

### GOVT2558

#### Government, Business and Society

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr John Mikler **Session:** Semester 1 **Classes:** 3 hrs per week (may include one or more of the following: lectures, seminars, tutorials or workshops) **Prerequisites:** 4 junior units of study **Assessment:** Exam; essay; case study; tutorial participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B Int S, B Sc, B Com, UG Study Abroad Program.

Modern businesses have new roles and responsibilities within the global economy and society. Understanding the relationships between government, business and society is therefore essential for students undertaking contemporary studies in the social sciences. This unit will provide students with conceptual and practical tools that they can use to examine the role of business in society, to explore the ways in which public policy shapes and constrains business decision-making and to understand the social and ethical responsibilities of business. The unit will introduce students to the political, social, regulatory, environmental and technological challenges facing businesses and the impact of the institutional diversity of organisations. The unit will draw upon Australian and international case study material.

### GOVT2611

#### Capitalism and Democracy in East Asia

##### Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week (may include one or more of the following: lectures, seminars, tutorials or workshops) **Prerequisites:** Two GOVT1000 level units of study **Prohibitions:** GOVT2411 **Assessment:** Essay, journal, exam, participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit will shed light on the springs of change in politics and economics and their intersections in East Asia, which includes South Korea, Japan, Taiwan, China, Hong Kong, and Singapore. The unit examines the political and economic transformation in the region. Among the major issues considered are: Are East Asia's political institutions distinctive? How does economic change affect political

power and the state? Will democratisation and globalisation undermine the distinctive traditions of the region?

### GOVT2774

#### Islam: Democracy, Development and Gender Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Lily Rahim **Session:** Semester 2 **Classes:** 3 hrs per week (may include one or more of the following: lectures, seminars, tutorials or workshops) **Prerequisites:** Two GOVT1000 level units of study **Assessment:** Essay; tutorial presentation; mid-semester exam; end of semester exam; tutorial participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

This unit will focus on progressive and reformist interpretations of Islam propagated in the periphery (non-Middle Eastern regions) of the Muslim World where the vast majority of Muslims reside. In particular, the unit will investigate the way in which reformist interpretations of Islam can provide Muslims with the framework to constructively address the myriad socio-economic and political challenges confronting them and the wider global community. Towards these ends, the theological discourses, socio-economic initiatives and political activities of progressive Muslim reformers, feminists and organisations in the Muslim periphery of Southeast Asia, North America and Europe will be closely examined. An important theme that will be another focus of analysis is the discursive contest between the forces of progressive and conservative Islam.

### GOVT2801

#### Applied International Studies Arts

**Credit points:** 6 **Teacher/Coordinator:** To be advised **Session:** Semester 2 **Classes:** Three hour seminar per week **Prerequisites:** Four core junior BIntS units of study (GOVT1105, GOVT1202, ECOP1001, ECOP1003) **Assessment:** Short papers; simulation participation; policy brief; media release **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is only available to students enrolled in the Bachelor of International Studies*

**Associated degrees:** B Int S, UG Study Abroad Program.

This senior core unit is designed to build on the junior core units of the Bachelor of International Studies and to develop a deeper level of knowledge of international politics and economics, and to apply this knowledge to real-life problems in diverse policy environments. The unit introduces students to the relationship between international law and international politics and economics, and the fields of international law that are directly relevant to the unit's simulation topics. Students will apply theory to practice by taking part in simulations on key global 'Issues of the Day'. These will focus on the environment, human rights and humanitarian intervention, terrorism and international security, trade and development. Participation in the simulations will require students to engage in economic and political policy-making; analysis of input and output issues such as state and organisational strategies; negotiations; and managing diverse international teams. Skills developed will include decision-making under conditions of uncertainty; information literacy; communication and decision-making in small and large groups; and the writing of press releases and briefing documents.

#### International Studies Practicum Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lyn Carson **Session:** Semester 2 **Classes:** This unit is taught online **Prerequisites:** Four core junior BIntS units of study (GOVT1105, GOVT1202, ECOP1001, ECOP1003) **Assessment:** Research project; critical reflection report **Campus:** Camperdown/Darlington **Mode of delivery:** On-line

*Note: This unit is only available to students enrolled in the Bachelor of International Studies.*

**Associated degrees:** B Int S, UG Study Abroad Program.

This senior core unit in the Bachelor of International Studies is designed to provide students with the opportunity to combine theoretical learning with hands-on experience in international studies. Students enrol in the unit in the second semester of their third year, while either studying abroad or engaged as an intern in a government or non-government organisation in Sydney, working on an internationally-focussed project. The unit is taught fully online, accessed via the Faculty's Blackboard site. The aim of the content and assessment is to develop research and critical reflection skills, culminating in a major research paper.

#### Government 2 Honours Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Diarmuid Maguire **Session:** Semester 1 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Prerequisites:** Two junior Government units at the level of Credit or better, or with the consent of the Honours Coordinator, Dr Ariadne Vromen **Prohibitions:** GOVT2091 **Assessment:** Library research assignment; research design assignment; exam; Participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S.

This unit assists students enrolled in the honours program to develop the conceptual and practical skills they need to excel in any area of substantial political inquiry. An overview of political inquiry is presented through an examination of the diversity in theoretical and methodological approaches used by those who carry out political research. This includes looking at, for example, institutional, behavioural, discourse and feminist approaches in political inquiry, and the usage of quantitative and qualitative methods. The assessment is based around constructing research projects that can be utilised to answer current political questions.

### GOVT3993

#### Government 3 Honours Part A

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Michael Jackson **Session:** Semester 1 **Classes:** 3 hours per week (may include a combination of lectures and tutorials) **Prerequisites:** Two senior Government units and GOVT2991 (or 2091), each at the level of Credit or better, or with the consent of the Honours Coordinator, Dr Ariadne Vromen. **Prohibitions:** GOVT3991 **Assessment:** Essays; learning journal; participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B Int S.

Power is the essential concept of political science, which is the systematic study of politics. Bertrand Russell, perhaps the greatest mind of the 20th Century, said power is the central concept of all the social sciences. Students explore this concept in different parts of political science and survey some debates on power, assessing the advantages and disadvantages of concepts of power. There are three themes in this unit. The first is the distribution of power in society. The second is power in comparative politics and the third is power in international relations. The emphasis is on the nature, sources and use of power.

### GRKA3600

#### Advanced Greek

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Jeffrey Tatum **Session:** Semester 1 **Classes:** three 1 hour seminars per week **Prerequisites:** GRKA2601 or equivalent **Assessment:** weekly assignments and weekly tests **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit offers advanced study and practice in the literary language of ancient Greek. Particular emphasis will be given to the appreciation

of Greek prose style through the analysis of Greek texts and through weekly exercises in Greek prose composition. Practice in unseen translation will hone the student's reading and comprehension skills in ancient Greek.

### GRKA3602

#### Greek Epic Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** three 1 hour seminars per week **Corequisites:** GRKA2601 or equivalent **Assessment:** one 2000 word essay and 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

The Iliad, the Odyssey and the poems of Hesiod are the classics of the classics. This unit offers an introduction to the language, style and content of the Greek epics which served as the foundations of Greek cultural identity and are the primary textual sources for Bronze Age, Geometric and Archaic Greek language, religion, history and thought.

### GRKA3604

#### Greek Philosophical Texts Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rick Benitez **Session:** Semester 1 **Classes:** three 1 hour seminars per week **Corequisites:** GRKA3600 or by permission of department **Assessment:** one 2000 word essay and 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit offers a close reading in the original Greek of select classics of Greek philosophy with particular attention of the genres of philosophical expression and the linguistic, cultural and ideological background to Greek philosophical thought.

#### Textbooks

Burnett J. Platonis Opera Vol. 3. Oxford University Press

### GRKA3606

#### Classics of Greek Literature Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Peter Wilson **Session:** Semester 2 **Classes:** three 1 hour lectures per week **Corequisites:** 18 GRKA credit points at 3000 level **Assessment:** one 2000 word essay and 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

In this unit we undertake advanced study of select genres of Greek literature, such as choral lyric, epinician, mime and the novel. It is intended for students with a firm command of Greek literary language and close familiarity with two or more other poetic or prose genres. Topics will be announced before the end of Semester 2 of the previous year.

### GRKA4011

### GRMN2641

#### German Culture and Society 1806-1848 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Yixu Lu **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** 12 Junior credit points of German not including GRMN1133 **Assessment:** Learning journal (2500 words), tutorial paper (1500 words), 2 hour written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit offers an introduction to German culture and society in the first half of the 19th century. It looks at how the foundations of the German Nation State were laid in the wake of upheavals that began with the French Revolution and at the traces of these developments in literature. Through analysing contemporary literary texts and examining cultural, social and political conditions, it builds an understanding of how German society moved towards a unified Nation State and towards industrialisation.

### GRMN2642

#### German Culture and Society 1849-1914 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Yixu Lu **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** 12 Junior credit points of German not including GRMN1133 **Assessment:** Learning journal (2500 words), tutorial paper (1500 words), 2 hour written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit offers an introduction to German culture and society in the second half of the 19th century and examines the process of the founding of the German nation state and its struggle to find its place in Europe. Through analysing literary texts and discussing cultural, social and political conditions from 1849 to 1914 it will build an understanding of how nationalism and imperialism lead Germany ultimately into World War I.

### GRMN2683

#### German Literature and Culture Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Yixu Lu **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** Credit average in 12 Junior credit points of German not including GRMN1133 **Assessment:** 3000 word essay, tutorial paper (2000 words), class presentation (1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

(This is a special honours entry unit.) What is the place of literature in life? Why do people write and read literature? This seminar will provide students with an overview of the history of German literature within its broader cultural context. It will look at different styles of writing and introduce different methodological ways of dealing with literary texts of various times. It will examine the role of literature within society and its importance for sociological and anthropological discourses.

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Birte Giesler **Session:** Semester 1, Semester 2 **Classes:** 5 hours per week **Prerequisites:** A major in German with a Credit average in 48 Senior credit points of German including 12 credit points of special honours entry units (2680 level) **Assessment:** Coursework (involves language assignments, class presentation(s) three 5000 word essays including two written in German, 40%); 12000 - 15000 word thesis (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

This unit consists of the following segments:

A. Advanced Language Tuition

B. Writing of a long essay of 12000-15000 words to be researched and written over the whole year. A supervisor will be appointed.

C. Advanced seminars of which students are required to take two per semester. The seminars offered in 2009 are:

1. Women and Female Figures in German Literature from the Enlightenment to Romanticism

Dr Yixu Lu, Offered: Semester 1, Classes: 2 hours per week

In the 18th century the European Enlightenment was deeply concerned with the question as to the nature of middle-class individuality. This necessarily led to further questions as to a specifically female identity. Does one even exist? This unit of study sets out to answer such questions in their historical and literary contexts. Its point of departure is an introduction into the theories of the most prominent thinkers of that age as to what is uniquely feminine. It goes on to look at works of literature by female and male writers which depict female characters and analyse the relations between gender roles. Finally the practical aspects of women's enlightenment will be examined using texts of the time aimed at an audience of male educators or female pupils. In this way the course offers insights into the cultural history of female role models and offers a grounding in the culture of sentiment of that age which has left its traces on contemporary psychology.

#### Textbooks

Gotthold Ephraim Lessing: Miß Sara Sampson, Reclam, UB: 16

Sophie von La Roche: Geschichte des Fräuleins von Sternheim, Reclam, UB: 7934

Friedrich Schlegel: Lucinde. Studienausgabe. Krit. hrsg., Bibl. u. Nachw.: Polheim, Karl

Konrad. Reclam, UB: 320

Heinrich von Kleist: Penthesilea. Reclam. UB: 1305

2. Film Adaptations of German Language Literature

Dr Andrea Bandhauer, Offered: Semester 1, Classes: 2 hours per week

The adaptation of a literary text into a film involves a great amount of complex translations. In multi-layered processes, the literary text will have to be translated into a visual performance, a process which will inevitably change the structure of the narrative. Directors and also actors will be translating into performance a written script which in fact is itself an adaptation of the literary source. In this sense an adaptation is not only an interpretation of the literary source but also an artwork in itself. There is - one could argue - no original text but both original and adaptation are intertexts. In this seminar, we will look at the adaptation of novellas and novels written in the early twentieth century by international filmmakers of different periods and nationalities. The course offers insight into aspects of form, history as well as into intercultural aspects of adaptation.

#### Textbooks

Heinrich Mann, Professor Unrat oder das Ende eines Tyrannen. rororo Taschenbücher, Nr. 35. Rowohlt, 2005.

#### Films

Sternberg, Der Blaue Engel (1930)

Visconti, Death in Venice / Morte a Venezia (1971)

Fassbinder, Lola (1981)

Kubrick, Eyes Wide Shut (1999)

3. German Linguistics

Dr Jäger, Offered: Semester 2, Classes: 2 hours per week,

Assessment: 4000 word essay, class presentation(s).

After an introduction to the essential elements of German linguistics this seminar will investigate the German language in its historical, regional, and sociological dimensions and how these aspects impact on standard "High German".

## HBRW1011

### Hebrew Modern B1 Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Gilead **Session:** Semester 1  
**Classes:** 4 hours per week **Assessment:** Mid-semester exam (30%), final exam (35%), continuous assessment and class preparation (35%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit provides an introduction to Modern Hebrew. It is intended for students who have little or no previous knowledge and practice of the language. The unit will foster the development of oral communication skills relating to everyday topics. It will include learning the Hebrew alphabet and basic reading and writing skills as well as the introduction of basic vocabulary and language functions. It is imperative that all prospective students contact the coordinator to arrange for a placement test upon enrolment.

#### Textbooks

HBRW1011, Hebrew Alphabet Booklet 2009, University of Sydney Copy Centre

## HBRW1102

### Hebrew Modern B2 Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Gilead **Session:** Semester 2  
**Classes:** 4 hours per week **Prerequisites:** HBRW1011 or equivalent knowledge as determined by the department **Prohibitions:** HBRW1302 **Assessment:** Mid-semester exam (30%), final exam (35%), continuous assessment and class preparation (35%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of the work done in HBRW1011 (B1). It will further develop the language skills acquired in B1. This unit involves a range of learning styles that will assist you to further develop and consolidate your listening, speaking, reading and writing skills.

#### Textbooks

Chayat, S., Israeli, S., Kobliner, H. (2000), Hebrew from Scratch, Part I (new edition) Academ, Jerusalem  
Lauden, E., Weinbach, L. (1993), Multi-Dictionary: Bilingual Learners' Dictionary, AD, Tel Aviv

## HBRW1111

### Hebrew Classical B1 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Young **Session:** Semester 1  
**Classes:** 4 hours per week **Prohibitions:** HBRW1311, HBRW2631 **Assessment:** 2 hour exam (50%), continuous assessment (40%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit, for those beginning the study of Hebrew, brings students from their first acquaintance with the Hebrew alphabet to an understanding of the Hebrew language. The unit is devoted to the study of the grammar and the principles of translation.

#### Textbooks

Contact the department.

## HBRW1112

### Hebrew Classical B2 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Young **Session:** Semester 2  
**Classes:** 4 hours per week **Prerequisites:** HBRW1111 **Prohibitions:**

HBRW1312, HBRW2632 **Assessment:** 2 hour exam (50%), continuous assessment (40%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit continues the study of grammar and classical Hebrew (Biblical) texts, as follows: grammar (2 hours per week), classical text (2 hours per week).

#### Textbooks

Selections from the Hebrew Bible (T'nach) for reading

## HBRW2603

### Hebrew Modern 3 Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Gilead **Session:** Semester 1  
**Classes:** 4 hours per week **Prerequisites:** HBRW1102 or equivalent knowledge as determined by the department **Prohibitions:** HBRW2103 **Assessment:** Mid-semester exam (30%), final exam (35%), continuous assessment and class preparation (35%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of the work done in HBRW1102. It consists of an intensive study of spoken Modern Hebrew with emphasis on communicative skills that will enable students to communicate in simple Hebrew for everyday situations. Simple literary texts and language components, which are orientated around relevant themes, are dealt with. A variety of different methods will be used to explain grammatical structures, morphology and syntax and to provide examples in their use.

#### Textbooks

Chayat, S., Israeli, S., Kobliner, H. (2000) Hebrew from Scratch. Part I (new edition) Academ, Jerusalem  
Lauden, E., Weinbach, L. (1993) Multi Dictionary: Bilingual Learners' Dictionary, AD, Tel Aviv

## HBRW2604

### Hebrew Modern 4 Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Gilead **Session:** Semester 2  
**Classes:** 4 hours per week **Prerequisites:** HBRW1102 or equivalent knowledge as determined by the department **Prohibitions:** HBRW2104 **Assessment:** Mid-semester exam (30%), final exam (35%), continuous assessment and class preparation (35%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of the work done in HBRW2603. It uses a communicative approach to language learning. Students' active participation through teamwork, role-playing and other interactive techniques is an essential aspect of all classes. It is expected that by the end of this unit students will be able to take part in simple everyday Hebrew conversation.

#### Textbooks

Chayat, S., Israeli, S., Kobliner, H. (2000) Hebrew from Scratch, Part I (new edition) Academ, Jerusalem  
Lauden, E., Weinbach, L. (1993) Multi-Dictionary: Bilingual Learners' Dictionary, AD, Tel Aviv

## HBRW2605

### Hebrew Modern 5 Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Gilead **Session:** Semester 1  
**Classes:** 4 hours per week **Prerequisites:** HBRW1102 or equivalent knowledge as determined by the department **Prohibitions:** HBRW2105 **Assessment:**

Mid-semester exam (30%), final exam (35%), continuous assessment and class preparation (35%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit picks up from HBRW2604. It covers language skills and knowledge of Level Beit. In addition to consolidating and further developing spoken communication and writing skills, this unit will introduce the student to a variety of Modern Hebrew texts such as poems, songs, short stories and newspaper articles as well as some Classical Hebrew texts.

#### Textbooks

Chayat, S., Israeli, S., Kobliner, H. (2001) Hebrew from Scratch Part II, Academ, Jerusalem

### HBRW2606

#### Hebrew Modern 6

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Gilead **Session:** Semester 2  
**Classes:** 4 hours per week **Prerequisites:** HBRW1102 or equivalent knowledge as determined by the department **Prohibitions:** HBRW2106 **Assessment:** Mid-semester exam (30%), final exam (35%), continuous assessment and class preparation (25%), oral presentations (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of the work done in HBRW2605. By the end of the unit, students will be able to converse confidently in everyday Hebrew. As well, this unit is designed to enable students who wish to continue learning Modern Hebrew to make the transition into HBRW2607 and HBRW2608.

#### Textbooks

Chayat, S., Israeli, S., Kobliner, H. (2001) Hebrew from Scratch Part II, Academ, Jerusalem  
Lauden, E., Weinbach, L. (1993) Multi-Dictionary: Bilingual Learners' Dictionary. AD, Tel Aviv

### HBRW2607

#### Hebrew Modern 7

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Gilead **Session:** Semester 1  
**Classes:** 4 hours per week **Prerequisites:** HBRW2106 or HBRW2606 or Modern Hebrew HSC or equivalent knowledge as determined by the department **Prohibitions:** HBRW1301 **Assessment:** Mid-semester exam (30%), final exam (30%), oral presentations (10%), continuous assessment and class preparation (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit picks up from HBRW2606. Students will develop their speaking fluency while improving their grammar and usage. The ability to read a variety of Modern Hebrew texts, including newspaper articles, short stories, poems and other literary texts, which reflect socio-cultural issues from the 19th century to the present time, will be further developed.

Special significance is attached to this unit. Upon its completion, students are eligible to be considered for admission to regular studies at the Hebrew University.

#### Hebrew Modern 12

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Gilead **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** HBRW1302 or HBRW2608 or equivalent knowledge as determined by the department **Prohibitions:** HBRW2306 **Assessment:** Mid-semester exam (20%), final exam (25%), 1000 word essay (20%), continuous assessment and class preparation (35%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of HBRW2611. It offers an opportunity for in-depth examination of the linguistic functions of Modern Hebrew as they are manifested in literature and poetry. Through using the Hebrew language in a range of contexts, students will further extend and develop their understanding of the way in which various patterns of the language come together. As well, they will be introduced to contemporary texts, which reflect socio-cultural issues of Israeli society.

### HBRW2623

#### Hebrew Classical 3

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Young **Session:** Semester 1 **Classes:** 4 hours per week **Prerequisites:** HBRW1112 or HBRW2402 or HBRW2632 or HSC Hebrew or equivalent **Prohibitions:** HBRW2115 **Assessment:** Two 2 hour exams (60%), continuous assessment and class preparation (20%), 1500 word essay (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

The books of the Hebrew Bible are studied in the light of their setting and composition history. The course consists of: set classical texts (2 hours per week); and special background area study: Mishnaic Hebrew (2 hours per week).

### HBRW2624

#### Hebrew Classical 4

### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Young, Ms Davey **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** HBRW1112 or HBRW2402 or HBRW2632 or HSC Hebrew or equivalent **Prohibitions:** HBRW2116 **Assessment:** Two 2 hour exams (60%), continuous assessment and class preparation (20%), 1500 word essay (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

The books of the Hebrew Bible are studied in the light of their setting and composition history. The course consists of: set classical texts (2 hours per week) and special background area study: Late Biblical and Dead Sea Scrolls Hebrew (2 hours per week).

### HBRW2631

#### Hebrew Accelerated C1

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Young **Session:** Semester 1 **Classes:** 4 hours per week **Prerequisites:** 18 Junior credit points including 12 credit points in a subject area from the School of Archaeology, Classics and Ancient History or from the Department of Hebrew, Biblical and Jewish Studies or from the Department of Arabic and Islamic Studies **Corequisites:** 6 senior credit points in a subject area from the School of Archaeology, Classics and Ancient History or from the Department of Hebrew, Biblical and Jewish Studies or from the Department of Arabic and Islamic Studies. **Prohibitions:** HBRW1111, HBRW1112, HBRW2401 **Assessment:** 2 hour exam (50%), continuous assessment (40%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

An introduction to Hebrew language for those whose existing corequisite units of study require a basic language ability. It is taught concurrently with the existing Hebrew B-stream.

### HBRW2632

#### Hebrew Accelerated C2

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Young **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** HBRW2401 or HBRW2631 **Prohibitions:** HBRW1112, HBRW2402 **Assessment:** 2 hour exam (50%), continuous assessment (40%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit brings students to a level necessary for the study of Hebrew at an advanced level. It forms a bridge between Hebrew Accelerated C1 and other senior Hebrew units.

### HBRW2641

#### Aramaic 1

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Young **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** HBRW1112 or HBRW2402 or HBRW2632 or HSC Hebrew or equivalent **Prohibitions:** HBRW3901 **Assessment:** 2 hour exam (50%), 2500 word essay (30%) and continuous assessment and class participation (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

The course investigates the language, background and text history of the principal witnesses to Biblical Aramaic, the books of Daniel and Ezra.

### HBRW2642

#### Aramaic 2

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Young **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** HBRW1112 or HBRW2402 or HBRW2632 or HSC Hebrew or equivalent **Prohibitions:** HBRW3902 **Assessment:** 2 hour exam (50%), 2500 word essay (30%), continuous assessment and class participation (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

The unit introduces students to non-Biblical Aramaic dialects such as: Old Aramaic, Elephantine Papyri, Dead Sea Scrolls and Targumim.

## HBWR2651

### Syriac 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Ebied **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** HBRW1112 or HBRW2402 or HBRW2632 or HSC Hebrew or equivalent **Prohibitions:** HBRW2911 **Assessment:** 2 hour exam (60%), weekly assignments, exercises and class participation (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

For those beginning the study of Syriac this is a preparation for more advanced study of Syriac language and literature. It concentrates on the study of elementary Syriac grammar, prose composition and an introductory study of selections of texts from the Old and New Testament Peshitta.

#### Textbooks

Robinson, T.H., *Paradigms and Exercises in Syriac Grammar*, rev.edn. by L.H. Brockington, Oxford, OUP

## HBWR2652

### Syriac 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Ebied **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** HBRW2911 or HBRW2651 **Prohibitions:** HBRW2912 **Assessment:** 2 hour exam (60%), weekly assignments, exercises and class participation (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit builds on the foundation of Syriac 1. It concentrates on the study of advanced Syriac prose composition and selections of texts from the Old and New Testament Peshitta.

## HBWR2661

### Akkadian Language 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Weeks **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** HBRW1111 and HBRW1112 or equivalent in these or another Semitic language **Prohibitions:** ANHS3923 **Assessment:** 2 hour exam (equivalent to 2000 words), class preparation and weekly exercises (equivalent to 4000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit of study will introduce students to the Akkadian language and the reading of Cuneiform documents.

## HBWR2662

### Akkadian Language 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Weeks **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** ANHS3923 or HBRW2661 **Prohibitions:** ANHS3922 **Assessment:** 2 hour exam (equivalent to 2000 words), 2000 word essay, class preparation (equivalent to 2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit focuses on the reading and discussion of representative Assyrian texts.

## HBWR4011

### Hebrew (Classical) Honours A

#### Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Young **Session:** Semester 1, Semester 2 **Classes:** 6 hours per week **Prerequisites:** 48 Senior credit points consisting of: (HBRW2113 or HBRW2623) and (HBRW2114 or HBRW2624)

and (HBRW2115 or HBRW2625) and (HBRW2116 or HBRW2626); and 24 credit points from the department of Hebrew, Biblical and Jewish Studies including at least 12 credit points from HBRW units **Assessment:** Semester 1: Two 3 hour exams (70%), 2000 word essay (30%). Semester 2: Two 3 hour exams (60%), 10000 word thesis (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), Dip Lang Studs (Hons).

First Semester: (i) Students will continue their study of classical Hebrew texts with the study of the Megilloth (2 hours per week); (ii) An additional Semitic language will be studied (2 hours per week) from the following: Aramaic, Syriac, Akkadian, Ugaritic.

(iii) One special area of study will be chosen (2 hours per week) from the following: Classical Hebrew Literature; Medieval Hebrew Literature; Northwest Semitic Inscriptions.

Second Semester: (i) Classical Hebrew texts (2 hours per week); (ii) Additional Semitic language (2 hours per week) out of: Aramaic, Syriac, Akkadian, Ugaritic; (iii) Special area of study (2 hours per week) from the following: Modern Hebrew Literature; Samaritan Literature; Septuagint; (iv) A special interest study will be pursued by students under supervision, leading to the writing of a 10,000 word honours thesis.

## HBWR4012

### Hebrew (Classical) Honours B

#### Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** HBRW4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), Dip Lang Studs (Hons).

Refer to HBRW4011

## HBWR4013

### Hebrew (Classical) Honours C

#### Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** HBRW4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), Dip Lang Studs (Hons).

Refer to HBRW4011

## HBWR4014

### Hebrew (Classical) Honours D

#### Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** HBRW4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), Dip Lang Studs (Hons).

Refer to HBRW4011

## HBWR4021

### Hebrew (Modern) Honours A

#### Arts

**Credit points:** 12 **Teacher/Coordinator:** Ms Yona Gilead **Session:** Semester 1, Semester 2 **Classes:** 6 hours per week **Prerequisites:** Credit or better at 36 credit points of Modern Hebrew from among HBRW2605 to HBRW2612 **Assessment:** Semester 1: classwork, assignment (2000-2500 words in Hebrew), Semester 2: classwork, thesis (8000-10000 words in either Hebrew or English). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B A (Lang)(Hons), Dip Lang Studs (Hons).

First Semester: (i) Students will continue with their study of Modern Hebrew (2 hours per week); (ii) Special areas of study from the following: Hebrew films; Poetry; Literature (2 hours per week); (iii) Classical Hebrew will be studied (2 hours per week).

Second Semester: Modern Hebrew (2 hours per week); (ii) Special areas of study from the following: Hebrew films; Poetry; Literature (2 hours per week); (iii) Classical Hebrew will be studied (2 hours per week); (iv) A special interest study will be pursued by students under

supervision, leading to the writing of an 8,000-10,000 word honours thesis.

### HBRW4022

#### Hebrew (Modern) Honours B Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** HBRW4021  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B A (Lang)(Hons), Dip Lang Studs (Hons).  
See HBRW4021

### HBRW4023

#### Hebrew (Modern) Honours C Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** HBRW4022

### HIMT1051

#### Introduction to Management Principles Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Joanne Callen **Session:** Semester 1  
**Classes:** 3hrs lectures, 1hr tutorial/week **Assessment:** Assignments, exams  
**Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, B Hlth Sci, M H I, B Hlth Sci, M H I M, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit introduces students to the principles of management and develops their skills in management in health care settings. Topics include an introduction to management and what managers do; building effective teams; organising work; the influence of organisational culture; change management; planning; leadership and managerial ethics. Students will also develop an understanding of the structure and functions of organisations. A key objective of this unit is to enable the students to develop practical management skills to enable them to perform effectively as managers.

### HIMT3054

#### Medical Science C Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Ms Anne Marks **Session:** Semester 1  
**Classes:** 2hrs lectures/week **Prerequisites:** HIMT2052 Medical Science B  
**Assessment:** Test, 2hr exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit extends the learning of internal medicine to diseases of the eye, ear, nose and throat (ENT), paediatrics, obstetrics, and gynaecology. It also introduces the fundamentals of clinical pharmacology, surgical procedures, and laboratory testing in medical care.

### HIMT3055

#### Casemix/Practical Coding Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Ms Anne MaArks **Session:** Semester 1  
**Classes:** 1hr lecture, 2hrs tutorial/week **Prerequisites:** HIMT2055 Classification Principles **Assessment:** Assignments, practical skills coding

tests, 2hr final exam **Practical field work:** Students build on the skills developed in HIMT2055 Classification Principles by applying the ICD-10-AM in tutorials and independent learning. Skill levels are increased by learning to abstract clinical statements from discharge summaries and simple (short-stay) clinical records and translate them into coded data. Automated coding and grouping exercises are undertaken to appreciate the relationship between ICD-10-AM and AR-DRGs **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit is designed to cover a variety of casemix classification systems for acute and non-acute inpatients and ambulatory patients. The major emphasis will be on Diagnosis Related Groups (DRGs) with specific reference to the Australian Refined Diagnosis Related Groups (AR-DRGs). Casemix applications and current casemix initiatives will be explored.

#### Textbooks

National Centre for Classification in Health, The International Statistical Classification of Diseases and Related Health Problems, Australian Modification (5th ed), NCCCH, Sydney (2006)

### HIMT3056

#### Management Principles and Practice B Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Joanne Callen **Session:** Semester 1  
**Classes:** 2hrs lecture, 1hr tutorial/week **Assessment:** Assignment 1 (short answer) (20%), assignment 2 (1500 words) (20%), 2hr exam (60%), workbook questions (formative assessment) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, B Hlth Sci, UG Study Abroad Program.

This unit of study covers the key concepts necessary for health service managers. Topics covered include: strategic planning, job design and organizational structures, building effective teams, organizational culture, control, TQM and benchmarking, leadership and power, delegation, change management and managerial ethics.

#### Textbooks

Robbins SP, Bergman R, Staff I & Coulter M, Management (3rd ed), Prentice Hall, Australia (2003)

### HIMT3057

#### Database Theory and Applications Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Anne Marks **Session:** Semester 1  
**Classes:** 1hr lecture, 2hrs tutorial/week **Prerequisites:** HIMT1054 Microcomputing Essentials, HIMT2054 Fundamentals of Programming  
**Assessment:** SQL test (30%), assignment (55%), FileMaker Pro test (15%)  
**Practical field work:** 2hrs/week practical session provided in computer laboratory **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit introduces theories of relational database systems and covers the concepts of relational models, E-R and data modelling, normalisation, systems analysis and design life cycle, logical and physical database design and implementation. The principles of Structured Query Language (SQL) of data storage and queries are also introduced. Students are provided with opportunities to construct clinical databases using different applications such as Sybase, Microsoft Access and FileMaker Pro.

### HIMT3058

#### Professional Practice B Health Sciences

**Credit points:** 4 **Teacher/Coordinator:** Ms Anne Marks **Session:** Semester 1  
**Classes:** Off-campus, block mode; on-campus workshop following practicum  
**Prerequisites:** HIMT2053 Management Principles and Practice A, HIMT2057 Professional Practice A **Assessment:** Report and presentation (60%), supervisor's evaluation (40%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit of study provides students with the opportunity to practise and refine their business communication skills, particularly written skills. The documentation of a procedure, a business report and minute-taking are particular skills that will be addressed. Students will also be able to observe and participate in management-related activities within the facility.

### HIMT3059

#### Introductory Epidemiology Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Dr Mary Lam **Session:** Semester 2 **Classes:** 2hrs lectures, 1hr tutorial/week **Assessment:** Two assignments (25% ea), 2hr exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit introduces students to epidemiology, through the study of historical aspects and design strategies in epidemiological research. This introduction includes measures of disease frequency and association, types of epidemiological studies; descriptive, case-control, cohort studies and quantitative aspects of epidemiological research. This unit also covers issues pertaining to screening tests, disease outbreaks, randomised controlled trials, surveillance and critical appraisal of documented research.

### HIMT3060

#### Essentials of Classifications A Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Anne Marks **Session:** Semester 2 **Classes:** 1hr lecture, 2hrs tutorial/week **Prerequisites:** HIMT3055 Casemix/Practical Coding **Assessment:** Two practical coding skills tests (25% ea), evaluation assignment/oral presentation/poster (50%) **Practical field work:** Students extend their practical skills developed in previous classification units by applying the ICD-10-AM in tutorials and independent learning exercises. Skill levels are increased by learning to abstract clinical statements from clinical discharge summaries and clinical records (intermediate complexity) and translate these statements into coded data. Emphasis is placed on building students' skills in selecting the principal diagnosis and sequencing of other diagnoses for reporting purposes. The Australian coding standards for ICD-10-AM are studied and applied in detail. Coded data are also analysed at a state and national level and data quality/limitations discussed **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit extends the theoretical knowledge and practical skills that students acquired in Classification Principles and HIMT3055 Casemix/Practical Coding. Clinical classification systems other than the ICD-10-AM are explored and students will learn how to evaluate them. They are given the opportunity to test their newly acquired evaluation skills when they work in teams to analyse a specific classification system. Important national and state data collections, notification systems and registration procedures that utilise ICD-10-AM coded data for planning and delivery of health care services are also examined (reinforcing knowledge acquired in Health Informatics B and laterally applying that knowledge from one perspective to another).

#### Textbooks

National Centre for Classification in Health, The International Statistical Classification of Diseases and Related Health Problems, Australian Modification (5th ed), NCH, Sydney (2006)

### HIMT3061

#### Legal Aspects of Health Care Health Sciences

**Credit points:** 3 **Teacher/Coordinator:** Ms Anne Marks **Session:** Semester 2 **Classes:** 2hrs lectures/week **Assessment:** Class tests (30%), 2hr final exam (70%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

In this unit students study legal principles relating to health care. Topics covered include the origin and development of the structure of the court system, legal personnel and litigation, subpoena of witnesses and clinical records, the law of torts, rules of evidence, criminal law, law of contract and the Coroner's Court. This unit also addresses institutional legal responsibilities and covers Commonwealth and NSW legislation relating to health care systems; and policies incorporated within the NSW Department of Health Patient Matters Manual.

### HIMT3062

#### Managing Human Resources Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Anne Marks **Session:** Semester 2 **Classes:** On-campus, 3 days of lectures, block mode **Assessment:** Two assignments (10%, 40%), final exam (50%) **Campus:** Cumberland **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, B Hlth Sc (Rehab Cng), B Hlth Sci, B Hlth Sci, M H I, B Hlth Sci, M H I M, UG Study Abroad Program.

This unit introduces the student to the human resource management function relevant to the work of a health services manager. Areas covered include recruitment and selection, staff appraisal, training and development and human resource planning. The implications of equal employment and affirmative action legislation to human resource management are also covered. The Australian industrial relations framework with particular emphasis on the current workplace focus and conflict resolution are covered. Students are taught how to prepare their own curriculum vitae, job application skills and interview techniques.

### HIMT3063

#### Health Informatics D Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Janelle Craig **Session:** Semester 2 **Classes:** 2hrs lectures/week **Assessment:** Essay (40%), team presentation (20%), report (40%) **Practical field work:** Demonstration of current health informatics initiatives will take place where relevant. This includes EHR vendor demonstrations **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit of study serves to consolidate and build upon the material covered in previous health informatics units. The focus of this unit is on contemporary health informatics/e-health initiatives taking place at local, national and international levels. The Electronic Health Record (EHR) is studied extensively in this unit of study, including business and technical architecture of the EHR, Australian Commonwealth state and territory approaches to an EHR and international developments in EHRs. The infrastructure to support e-health is addressed, with the 'building blocks' of privacy and security, standards and interoperability and identifiers being considered. Other relevant issues related to e-health are covered in this unit of study. These include the information and evidence needs of health care professionals, informatics and health care consumers an decision support technologies. Organisational people and social issues related to health informatics implementation and integration are covered as an important foundation for the socio-technical aspects of this discipline.

### HIMT4050

#### Essentials of Classification B Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Anne Marks **Session:** Semester 1 **Classes:** Block mode, three of 2 days **Assumed knowledge:** HIMT3060 Essentials of Classification A **Assessment:** 3 practical tests (30%, 30% and 40%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

Students consolidate and enhance their practical skills developed in previous classification units by applying the ICD-10 AM in tutorials

and independent learning exercises. Skill levels are challenged by learning to abstract clinical statements from complex clinical records and translating these statements into coded data. Emphasis is placed on building students' skills in locating clinical information for abstraction. Communications are also built through collaborative workshops designed to help students discuss complex coding problems effectively with health care professionals in the workplace. Wherever possible, students are encouraged to independently use computerised coding software when abstracting and coding and compare the coded output with the manual method.

#### Textbooks

National Centre for Classification in Health, The International Statistical Classification of Diseases and Related Health Problems. Australian Modification (4th ed), NCCH, Sydney (2004)

### HIMT4051

#### Financial Management in Health Services Health Sciences

**Credit points:** 6 **Session:** Semester 1 **Classes:** Block mode, three of 2 days **Assessment:** 1500 word essay (30%), 2000 word essay (40%), final exam (MCQ, SAQ) (30%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons.

This unit of study equips students with basic financial management skills. They learn of the financial issues and pressures facing the health care system from all levels (national, state, and local). Skills in recording basic financial transactions, preparing financial reports and budgets and communicating with specialist financial managers are acquired. Topics covered include a brief overview of the Australian health care system and the health status of Australians; private sector financing and health insurance issues; health funding models design; an introduction to health economics, the accounting process and budgeting.

### HIMT4052

#### Contemporary Issues: Health Info A Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Janelle Craig **Session:** Semester 1 **Classes:** 1hr lecture/week **Assessment:** Two essays, exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit utilises case studies and guest lecturers to address the latest developments in the management of healthcare information. Knowledge and skills learned will be applied to real-world problems. Students will research selected topics culminating in written and oral presentations.

### HIMT4053

#### Contemporary Issues: Health Info B Health Sciences

**Credit points:** 12 **Session:** Semester 2 **Classes:** Block mode, three of 2 days **Assessment:** Two assignments (20% ea), literature review (60%) **Campus:** Cumberland **Mode of delivery:** Block Mode

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons, UG Study Abroad Program.

This unit is divided into two sections. The first section covers the skills needed to write a journal article that communicates effectively the latest concepts in health information management. The second part builds on the research carried out by the student in HIMT4052 Contemporary Issues in Health Information A by providing the foundation for the development of the research as a publishable paper.

### HIMT4054

#### Professional Practice C Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Anne Marks **Session:** Semester 2 **Classes:** Clinical experience **Prerequisites:** HIMT3056 Management Principles and Practice B, HIMT3058 Professional Practice B **Assessment:** Report (60%) supervisor's report (40%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Associated degrees:** B App Sc (Hlth Inf Mgt), B App Sc (Hlth Inf Mgt)Hons.

This unit provides students with the opportunity to gain experience in the organisation and management of health information systems within or outside of the traditional medical record department. Students are able to select a placement in an area in which they have a particular interest.

### HIMT4055

#### Research Project I Health Sciences

**Credit points:** 12 **Teacher/Coordinator:** Dr Joanne Callen **Session:** Semester 1 **Classes:** Independent learning **Assessment:** Presentation of thesis **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Hlth Inf Mgt)Hons.

This unit provides honours students with the opportunity to develop a proposal to undertake an investigation in an area of specialised interest in health information management.

### HIMT4056

#### Research Project II Health Sciences

**Credit points:** 24 **Teacher/Coordinator:** Dr Joanne Callen **Session:** Semester 2 **Classes:** Independent learning **Assessment:** Presentation and thesis **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Hlth Inf Mgt)Hons.

During this unit the honours students will complete the investigation begun during HIMT4055 Research Project I. The student will prepare a written report suitable for submission to a refereed journal for publication. Full details of the requirements for this report can be found in the Discipline of Health Informatics Bachelor of Applied Science (Health Information Management) (Honours) guidelines, policy and procedures.

### HIUR2601

#### Hindi and Urdu Intermediate 1 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 1 **Classes:** 4 hours per week **Prerequisites:** HIUR1002 or equivalent **Prohibitions:** HIUR2001 **Assessment:** Classwork (equivalent to 2700 words), exam (equivalent to 1800 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will consolidate oral, aural and written language skills. The unit consists of consolidation and practice of oral language skills in complex situations, advanced course in grammar and reading a selection of short stories and poems.

### HIUR2602

#### Hindi and Urdu Intermediate 2 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** HIUR2001 or HIUR2601 or equivalent **Prohibitions:** HIUR2002 **Assessment:** Classwork (equivalent to 2700 words), exam (equivalent to 1800 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of work done in HIUR2601. It will provide further consolidation of oral, aural and written language skills.

### HIUR3601

#### Hindi and Urdu Advanced 1 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 1 **Classes:** 4 hours per week **Prerequisites:** HIUR2002 or HIUR2602 or equivalent **Prohibitions:** HIUR3001 **Assessment:** Classwork (equivalent to 2700 words), exam (equivalent to 1800 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will concentrate on advanced oral, aural and written language skills. Students will be expected to write short essays in Hindi-Urdu relevant to the reading component of the unit.

### HIUR3602

#### Hindi and Urdu Advanced 2

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Mark Allon **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** HIUR3001 or HIUR3601 or equivalent **Prohibitions:** HIUR3002 **Assessment:** Classwork (equivalent to 2700 words), exam (equivalent to 1800 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an extension of work done in HIUR3601.

### HONS4000

#### Joint Honours

##### Pan-Faculty

**Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Com (Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

This unit is used to record the Honours result when a student undertakes a Joint Honours course.

### HORT2002

#### Horticultural Science 2

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Jenny Jobling **Session:** Semester 2 **Classes:** (2 lec, 1x3hr prac/workshop)/wk **Prerequisites:** BIOL1001 and (BIOL1002 or BIOL1902) **Assumed knowledge:** (AFNR1001 and AFNR1002) or (HORT1001 and HORT1002) **Assessment:** One 2 hr exam (55%), 3 assignments and plant ID quiz (45%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Hort Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc Agr.

This course covers topics in three areas, firstly on the physiology of growth and development of fruit trees, with special attention to the winter/spring activities involved in orchard/vineyard establishment. Secondly there is a unit of the identification of horticultural plants that covers both theory and practical aspects. Thirdly the principles and practices of flower and nursery crop production. Plant identification will build on knowledge and skills learnt in AFNR1001 and AFNR1002 to provide students with a detailed foundation of plant use in ornamental horticulture, based around plant families. The students will gain important information about these aspects of the horticultural industry as well as research and enquiry skills through research based practical sessions and assignments.

##### Textbooks

Reference books: M.N. Westwood. Temperate-Zone Pomology: Physiology and Culture 3rd Edn (Timber Press, 1993)

### HORT3005

#### Production Horticulture

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Jenny Jobling **Session:** Semester 1 **Classes:** (2 lec; 1x3hr prac/workshop)/wk **Prerequisites:** Two of PLNT2001, PLNT2901, PLNT2002, PLNT2902, PLNT2003, PLNT2903. **Assumed knowledge:** ((AFNR1001 and AFNR1002) or (HORT1001 and HORT1002)) and HORT2002. **Assessment:** One 3 hr exam (55%), three assignments (45%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc, B Sc Agr, UG Study Abroad Program.

This unit of study covers topics on the production of perennial fruit crops, wine grapes, the sustainable production of vegetables and it also covers the key aspects of the postharvest handling and quality assurance of fresh produce. At the end of this unit students are

expected to have a detailed understanding of these areas of horticulture and be able to discuss related literature and the physiological principles underlying the commercial success of these horticultural enterprises. Students will also gain research and enquiry skills through research based practical sessions and assignments.

### HORT4004

#### Issues in Horticultural Science 4A

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Dr Robyn McConchie **Session:** Semester 1 **Classes:** 2 lectures per week for 13 weeks & 6 prac per 13 weeks **Prerequisites:** HORT3001 or HORT3004 **Assessment:** Exam (2 hr) (25%), plant ID practical quizzes (15%), consulting report (45%), seminar presentation (15%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

Students attend a series of discussion workshops on minimising the environmental impact of horticultural enterprises. It introduces students to current themes and thinking in sustainable practices in horticultural science, covering issues such as efficient water management, sustainable use of fertilizers, salinity, heavy metal pollution, disposal of plastics, integrated pest management and organic practices. Students also undertake an industry based case study analysis of a horticultural supply chain, designed to provide them with skills in data analysis and interpretation, problem identification and problem solving. In addition, students will add to their general knowledge of important horticultural plants and their uses through plant identification workshops.

### HORT4005

#### Research and Practice in Hort Science

##### Agriculture, Food and Natural Resources

**Credit points:** 6 **Teacher/Coordinator:** Professor David Guest **Session:** Semester 2 **Classes:** 2h tut/wk; one 1-week excursion **Prerequisites:** HORT3005 **Assessment:** Tutorial papers (30%); project proposal (10%); project report (50%); peer review (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr, UG Study Abroad Program.

Upon completion of this unit, students will have participated in a major excursion and a series of discussion workshops based on prescribed readings that will broaden their appreciation of current research themes in horticultural science, industry issues, stimulate critical thinking, enhance professional research skills and give an insight into the career opportunities for horticultural scientists. Attendance at seminars, written reports and presentations made during these workshops will improve student skills in critical analysis and communication.

### HPSC1000

#### Bioethics

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Catherine Mills **Session:** Semester 1 **Classes:** One 1 hour and one 2 hour lecture and one 1 hour tutorial per week. **Prohibitions:** HPSC1900 **Assessment:** Short essays, tutorial work, tests **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This Junior unit of study is highly recommended to Intermediate and Senior Life Sciences students.*

**Associated degrees:** B A, B S T, B Sc, UG Study Abroad Program.

Science has given us nearly infinite possibilities for controlling life. Scientists probe the origins of life through research with stem cells and embryos. To unlock the secrets of disease, biomedicine conducts cruel experiments on animals. GM crops are presented as the answer to hunger. Organ transplantation is almost routine. The international traffic in human body parts and tissues is thriving. The concept of brain death makes harvesting organs ethically more acceptable. It

may also result in fundamental changes in our ideas about life. Science has provided new ways of controlling and manipulating life and death. As a consequence, difficult ethical questions are raised in increasingly complex cultural and social environments. This course will discuss major issues in the ethics of biology and medicine, from gene modification to Dolly the sheep. This unit will be introductory, but a small number of topical issues will be studied in depth. No scientific background beyond School Certificate level will be assumed.

### HPSC2100

#### The Birth of Modern Science Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Ofer Gal **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial per week. **Prerequisites:** 24 credit points of Junior units of study **Prohibitions:** HPSC2002, HPSC2900 **Assessment:** Short essays, tutorial work, tests. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Marine Science), UG Study Abroad Program.

Modern culture is a culture of science. Modern Western science is the outcome of a historical process of 2,500 years. In this course we investigate how Western knowledge-theoretical, technological and medical-acquired the characteristics of modern science: its specific social structure, contents, values and methods. We will look at some primary chapters of this process, from antiquity to the end of the seventeenth century, and try to understand their implications to understanding contemporary science in its culture. Special emphasis will be given to the scientific revolution of the seventeenth century, which is often described as the most important period in the history of science and as one of the most vital stages in human intellectual history.

### HPSC2101

#### What Is This Thing Called Science?

### Science

**Credit points:** 6 **Teacher/Coordinator:** Dean Rickles **Session:** Semester 2, Summer Main **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 24 credit points of Junior units of study **Prohibitions:** HPSC2001, HPSC2901 **Assessment:** Short essays, tutorial work, tests. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Marine Science), UG Study Abroad Program, UG Summer/Winter School.

Philosophers of science aim to define what distinguishes creationism from evolutionary theory, or astrology from astronomy. They give reasons why we can believe that today's theories are improvements over those that preceded them and how we know that what we see and do in scientific practice reflects the nature of reality. This course critically examines the most important attempts to define the scientific method, to draw a line dividing science from non-science, and to justify the high status generally accorded to scientific knowledge. The philosophies of science studied include Karl Popper's idea that truly scientific theories are falsifiable, Thomas Kuhn's proposal that science consists of a series of paradigms separated by scientific revolutions; and Feyerabend's anarchist claim that there are no objective criteria by which science can be distinguished from pseudo-science. This unit of study also explores contemporary theories about the nature of science and explores ideas about the nature of the experimental method and concepts such as underdetermination, the nature of scientific explanation, theory confirmation, realism, the role of social values in science, sociological approaches to understanding science, and the nature of scientific change.

Throughout the ages people have been born, have died, and in between have lived in various stages of sickness or health. In this unit of study we shall look at how these states of being were perceived in different times and places throughout history, while at the same time noting the increasing medicalisation of everyday life, together with the irony that the "miracles" of modern medicine appear to have created a generation of the "worried well". Using this historical perspective, we shall ask how perceptions of sickness, health and the related provision of health care have been intertwined with social, political and economic factors and, indeed still are today.

Modern Western science has a number of characteristics which distinguish it from other scientific cultures. It ascribes its tremendous success to sophisticated experiments and meticulous observation. It understands the universe in terms of tiny particles in motion and the forces between them. It is characterised by high-powered mathematical theorising and the rejection of any intention, value or purpose in Nature. Many of these characteristics were shaped in the 17th century, during the so called scientific revolution. We will consider them from an integrated historical- philosophical perspective, paying special attention to the intellectual motivations of the canonical figures of this revolution and the cultural context in which they operated. Topics will include: experimentation and instrumentation, clocks, mechanistic philosophy, and the changing role of mathematics.

**HPSC3021****Philosophy and Sociology of Biology Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Dominic Murphy **Session:** Semester 1 **Classes:** Two 1 hour lectures and two 1 hour tutorials per week **Prerequisites:** At least 12 credit points of Intermediate HPSC units or Credit or better in at least 6 credit points of Intermediate HPSC units, and at least 24 credit points of Intermediate or Senior units. **Prohibitions:** HPSC3103 **Assumed knowledge:** HPSC (2100 and 2101) or HPSC (2001 and 2002). **Assessment:** Essays, take home tests, tutorial assessment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Sc.

The first part of this class examines the century of the gene from Darwin up to the present. We investigate the various conceptual changes that have occurred in this period, both directly within biology and within society at large. We will explore the disappearance of the Western Christian consensus, rivalries between scientists wedded to different theories and experimental practices, and the different approaches of evolutionary biology and molecular biology. It appears that the more we learn about genes the less agreement and certainty there is about what a gene really is. The second part of the course uses the idea of biological determinism and eugenics as an example of the interrelationships between science and society.

No previous study of biology is assumed.

*Note: This unit is a requirement for HPS majors.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc.  
 Science has become an essential element of Western societies. It is  
 impossible to imagine our lives today without the achievements of  
 science, technology, and medicine. Many scientists and laypeople  
 think that scientific knowledge transcends political, social, cultural,  
 and economic conditions. Sociologists of science think otherwise. In  
 this unit, we will investigate the nature of science, the position of  
 science in society, and the internal dynamics of science.

Sociologists of science have compared scientific knowledge to a ship  
 in a bottle: if you see the finished product, you can't understand how  
 it came about, and you can't believe that it is not what it claims to be:  
 the empirically-determined truth about the world. In this unit, we will  
 have a close look at some of these ships in bottles and examine how  
 they got there. When observing science-in-the-making, rather than  
 the finished product, the factors that influence science become much  
 clearer. We will introduce some of the most exciting and innovative ideas  
 about what science is and how it works by examining the sociological  
 and anthropological approaches to science that have become the  
 basis for research in the social studies of science, technology, and  
 medicine, including: the norms of science, scientists' images of  
 themselves, the boundaries between science and other subjects, the  
 rhetoric of scientific writing, laboratory work, science museums and  
 science in the media.

**HPSC3023****Psychology & Psychiatry: History & Phil  
Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Hans Pols and Dr Fiona Hibberd  
**Session:** Semester 1 **Classes:** Two 1 hour lectures and one 2 hour tutorial per  
 week. **Prerequisites:** (at least 12 credit points of intermediate HPSC Units of  
 study) OR (a CR or above in one HPSC intermediate Unit of Study) OR (12  
 intermediate credit points in psychology). **Prohibitions:** PSYC3202 **Assumed  
 knowledge:** Basic knowledge about the history of modern science as taught  
 in HPSC2100 AND the principles of philosophy of science as taught in  
 HPSC2101 OR knowledge of the various sub-disciplines within Psychology.  
**Assessment:** Take-home essay (2500 words), one 2 hour exam, tutorial work.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal  
 (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc,  
 Grad Dip Psych, UG Study Abroad Program.

Across the unit we examine one of the most interesting aspects of the  
 history and philosophy of science. Viz., the scientific practices and  
 assumptions involved in making human beings an object of study. We  
 will examine the ways in which psychologists and psychiatrists have  
 investigated human nature, the kinds of experimental approaches  
 they have developed to that end, the major controversies in this field,  
 and the basic philosophical assumptions that have been made in the  
 sciences of human nature. We investigate the developments of  
 psychological theories and investigative methods as well as the  
 development of psychiatric theory, treatment methods, and institutions.

Is science really neutral, impartial, and objective? Should it be? Or  
 should it tell us what is right, good, fair, or just? Does scientific  
 progress imply social progress and benefits for humanity? Are  
 scientists responsible when their discoveries are used for evil  
 purposes? Should the publication of dangerous discoveries be  
 prevented? What if the same discoveries might be used for beneficial  
 purposes as well?

In this unit, we give study possible answers to these questions by  
 examining the relationships between science and human values. We  
 consider the extent to which science is, or should be, influenced by  
 the values of scientists and the societies in which they operate. And  
 we question the extent to which science promotes or threatens the  
 good of humankind. Issues such as these are pursued via  
 philosophical examination of major historical episodes involving  
 weapons of mass destruction, Nazi medicine, cloning, mind control  
 in neuroscience, human experimentation and censorship. We also  
 examine contemporary developments in genetics and brain science.

This unit is for science and non-science students alike. It will be of  
 interest to anyone concerned about the social responsibilities of  
 scientists, matters of science policy, and relationships between science  
 and society.

### HPSC4101 Philosophy of Science Science

**Credit points:** 6 **Teacher/Coordinator:** Dean Rickles **Session:** Semester 1  
**Classes:** One 2 hour seminar per week, individual consultation. **Prerequisites:** Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. **Assessment:** Written assignments, seminar participation. **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons), Grad Cert Sc (H P S), UG Study Abroad Program.

The success of science in enabling us to manipulate the natural world has been so surprising, so often, that it has caused many individuals to revise a large part of their pre-scientific philosophical and religious consensus. Something very important is going on, and a number of fascinating philosophical topics emerge when we try to analyse what it is. Working backwards from the success of an epistemological enterprise offers a fruitful way to do philosophy, and, reciprocally, our philosophical insights help to clarify the contentious question of what it means to claim that science is successful.

This unit investigates the relationships between scientific theories and evidence, and the relationships between scientific theories. Participants will have an opportunity to relate the successes and failures of specific sciences to contemporary philosophical debates. Each week the seminar will discuss a piece of philosophical theory in the light of examples from particular sciences. Technical topics will be covered, but very little background knowledge will be assumed.

### HPSC4103 Sociology of Science Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Hans Pols **Session:** Semester 2 **Classes:** One 2 hour seminar per week, individual consultation. **Prerequisites:** Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. **Assessment:** Essays, fieldwork report, seminar participation mark. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons), Grad Cert Med Hum, Grad Cert Sc (H P S), Grad Dip Med Hum, M Lib Stud, M Med Hum, UG Study Abroad Program.

This unit explores recent approaches in the social studies of scientific knowledge. Students evaluate various sociological approaches by

conducting their own research on topics relevant to their own major thesis.

The unit starts with an overview of the development of history and philosophy of science since 1945, to put the emergence of the sociology of science into perspective, before moving on to a selection of readings from the field. Topics will include: the strong program critique of traditional philosophy of science, the sociology of technology, the impact of feminism on the study of science, and the actor-network approach developed by Bruno Latour and Michel Callon.

### HPSC4105 HPS Research Methods Science

**Credit points:** 6 **Teacher/Coordinator:** Hans Pols **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per week, individual consultation. **Prerequisites:** Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. **Assessment:** Literature review, archival research project, seminar participation mark, short essays. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons), Grad Cert Sc (H P S).

Adopting a seminar style, this unit provides students with an advanced knowledge of the skills necessarily to conduct their own original research in the sociology, history and philosophy of science. Participants will be given a weekly set of core readings, and specialists both from within the Unit and from outside will present their views on the topic in question. This presentation will form the basis for a discussion involving the students, the academic members of the Unit, and invited speakers.

Topics will include: the use of case studies in the philosophy of science, how to conduct oral history projects, institutional history, and sociological methodology.

### HPSC4201 HPS Research Project 1 Science

**Credit points:** 6 **Teacher/Coordinator:** HPS Staff **Session:** Semester 1, Semester 2 **Classes:** Weekly individual supervision, fortnightly 90-minute research seminars. **Prerequisites:** Available only to students admitted to HPS Honours and Graduate Diploma or Certificate in Science (History and Philosophy of Science). **Prohibitions:** HPSC4106, HPSC4107 **Assumed knowledge:** HPSC (2001 and 2002) or HPSC (2100 and 2101) **Assessment:** HPSC4201, HPSC4202, HPSC4203 and HPSC4204 are jointly assessed by a research thesis of up to 15,000 words. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons), Grad Cert Sc (H P S).

Research into a topic in history, philosophy or sociology of science under the supervision of one or more members of the HPS staff.

### HPSC4202 HPS Research Project 2 Science

**Credit points:** 6 **Teacher/Coordinator:** HPS Staff **Session:** Semester 1, Semester 2 **Classes:** Weekly individual supervision, fortnightly 90-minute research seminars. **Prerequisites:** Available only to students admitted to HPS Honours and Graduate Diploma or Certificate in Science (History and Philosophy of Science). **Prohibitions:** HPSC4106 and HPSC4107 **Assumed knowledge:** HPSC (2001 and 2002) or HPSC (2100 and 2101) **Assessment:** HPSC4201, HPSC4202, HPSC4203 and HPSC4204 are jointly assessed by a research thesis of up to 15,000 words. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons).

Research into a topic in history, philosophy or sociology of science under the supervision of one or more members of the HPS staff.

### HPSC4203 HPS Research Project 3 Science

**Credit points:** 6 **Teacher/Coordinator:** HPS Staff **Session:** Semester 1, Semester 2 **Classes:** Weekly individual supervision, fortnightly 90-minute research seminars. **Prerequisites:** Available only to students admitted to HPS Honours and Graduate Diploma or Certificate in Science (History and Philosophy of Science). **Prohibitions:** HPSC4106, HPSC4107 **Assumed knowledge:** HPSC (2001 and 2002) or HPSC (2100 and 2101) **Assessment:** HPSC4201, HPSC4202, HPSC4203 and HPSC4204 are jointly assessed by a research thesis of up to 15,000 words. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons).

Research into a topic in history, philosophy or sociology of science under the supervision of one or more members of the HPS staff.

### HPSC4204 HPS Research Project 4 Science

**Credit points:** 6 **Teacher/Coordinator:** HPS Staff **Session:** Semester 1, Semester 2 **Classes:** Weekly individual supervision, fortnightly 90-minute research seminars. **Prerequisites:** Available only to students admitted to HPS Honours and Graduate Diploma or Certificate in Science (History and Philosophy of Science). **Prohibitions:** HPSC4106, HPSC4107 **Assumed knowledge:** HPSC (2001 and 2002) or HPSC (2100 and 2101) **Assessment:** HPSC4201, HPSC4202, HPSC4203 and HPSC4204 are jointly assessed by a research thesis of up to 15,000 words. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons).

Research into a topic in history, philosophy or sociology of science under the supervision of one or more members of the HPS staff.

### HPSC4999 History & Philosophy of Science Honours Science

**Session:** Semester 1, Semester 2 **Prerequisites:** Available only to students admitted to HPS Honours. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons).

All students in History and Philosophy of Science Honours must enrol in this non-assessable unit of study in their final semester.

### HRTG2601 Approaching Heritage Studies Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Annie Clarke **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** At least 18 junior credit points **Prohibitions:** HRTG2001 **Assessment:** one 2000 word essay, one 2500 word project report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study examines the historical, theoretical and political issues associated with the interpretation of cultural heritage, historic sites and landscapes. Students are offered an overview of the heritage industry and Heritage Studies. This unit of study engages with policies, and associated professional practices such as conservation and preservation and their impacts on culture and community. Issues specific to Australia such as Indigenous land claims are examined in the context of international debates.

### HRTG2602 The Museum and Cultural Heritage Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Annie Clarke **Session:** Semester 2 **Classes:** one 3 hour lecture per week **Prerequisites:** HRTG2001 or HRTG2601 or ARHT2034 or ARHT2634 **Prohibitions:** HSTY2022 **Assessment:** one 2000 word essay, one tutorial presentation and one 2000 word tutorial paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

The Museum and Cultural Heritage provides an historical, theoretical and political overview of the development of museums as they relate to the collection and display of cultural heritage. This unit of study introduces key debates on the historical development of the museum as an idea and as an institution. The social and cultural roles of museums and relationships between the identification of cultural heritage, its interpretation and display will be examined.

### HRTG2804 Heritage Studies Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

### HRTG2805 Heritage Studies Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

**HRTG2806****Heritage Studies Exchange****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

**HRTG2809****Heritage Studies Exchange****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

**HRTG2810****Heritage Studies Exchange****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

**HRTG3602****Social History and Heritage Studies****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Annie Clarke **Session:** Semester 2  
**Classes:** one 2 hour seminar per week **Prerequisites:** HRTG2001 or HRTG2601 or ARHT2034 or ARHT2634 **Prohibitions:** HRTG3002  
**Assessment:** one 3000 word research project, seminar presentation and 3000 word seminar paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study examines the relationship between heritage studies and social history. It will explore issues of social history as they are represented in heritage studies and practices. International and historical debates about the way in which social history is used in heritage studies to develop new interpretations of the past will also be considered.

**HSBH1003****Health, Behaviour and Society****Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Steven Cumming **Session:** Semester 1  
**Classes:** 4hrs lectures/week **Prohibitions:** BACH1130 Foundations of Health Sociology, BACH1132 Foundation of Psychology for the Health Sciences, BACH1133 Introduction to Health Psychology, BACH1134 Health, Illness and Social Inquiry **Assessment:** 1hr in-class essay (17.5%), 1000 word essay mid semester (25%), end semester exam (57.5%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (OT), B App Sc (Phty), B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I M, B Hlth Sci, M N, B Hlth Sci, M Rehab Cing, B O H.

This unit provides an introduction to areas of behavioural and social sciences relevant to health and wellbeing. The unit lays the foundation of theory and method necessary for understanding how broad social and organisational structures as well as individual characteristics and behaviours contribute to health and health inequalities.

**HSBH1005****Human Development****Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Andrew Campbell **Session:** Semester 2  
**Classes:** 1hr lecture & 1hr tutorial/week **Assessment:** Project (20%), seminar presentation (20%), 1000 word essay (20%), 2hr exam (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I M, B Hlth Sci, M N, B Hlth Sci, M Rehab Cing, B O H.

This unit of study considers the important psychosocial and functional changes that occur across the lifespan from gestation to old age. Psychosocial factors important for understanding major national health priority areas such as asthma, mental health, cardiovascular disease, arthritis and musculoskeletal disease, cancer, injury, and diabetes across the lifespan are considered.

**HSBH1006****Foundations of Health Science****Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lynne Harris **Session:** Semester 1  
**Classes:** Two 1hr lectures, 1hr tutorial/week and WebCT online learning support **Assessment:** Library skills test (10%), case study (20%), literature review (30%), final 2hr exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cing, B O H, UG Study Abroad Program.

This is an introductory unit for students entering the health sciences. This unit aims to expose students to a range of definitions of health, and key concepts in health and health systems. Students will develop a range of core skills and competencies needed in the study and practice of health sciences and a basis for work practice in the health system or for postgraduate study. Topics include: What is health?; How is health status classified?; Biomedical, psychological and sociological aspects of health and health care; What 'should' a health care system do?; How do we measure health status in an individual, a community and a nation? An integrated sciences model of health care is explored which covers the five domains of biological, behavioural, cognitive, socio-cultural and environmental.

**HSBH1007****Health Science and Research****Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Ms Karen Pepper **Session:** Semester 1, Semester 2  
**Classes:** Two 1hr lectures, 1hr tutorial/week and WebCT online learning support **Assessment:** 2000 word written report (40%), 90min MCQ/SAQ exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), B App Sc (OT), B App Sc (Phty), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cing, B O H, UG Study Abroad Program.

This unit introduces students to key research paradigms in health, and to the major approaches to designing and evaluating basic and applied research in health. Students are exposed to the types of research which inform our understanding of normal and abnormal functions of the human body and of treatment and preventative health care. Students will be engaged in the generation of new knowledge through evidenced based practice and evidence based innovation. Current issues in health science research will be identified, with emphasis on the role of technology in health and e-health.

**HSBH1008****Health Determinants and Interventions****Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Toni Schofield **Session:** Semester 2  
**Classes:** Two 1hr lectures, 1hr tutorial/week and WebCT online learning support **Assessment:** Project (20%), seminar presentation (20%), 1000 word essay (20%), 2hr exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (Ex & Sp Sc), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cing, B O H, UG Study Abroad Program.

This unit has two components. Health Determinants will introduce students to the key factors determining health status in the Australian context. It will explore biomedical and genetic factors, acquired health behaviours, and social, cultural and environmental determinants of health status. Health and wellbeing will be explored through life expectancy, functioning, disability, illness, disease and injury. Initiatives to promote preventable hospitalisation and increased health and wellbeing across population groups will be examined. Health Interventions outlines the distinction between primary and secondary prevention and examines the evidence base for a range of intervention

strategies including public health, preventative and restorative health care. Traditional interventions to promote outcomes through prevention, health promotion, treatment, care, rehabilitation and counselling will be explored alongside complementary and alternative medical (CAM). Healthy ageing and age-related illness will be highlighted.

### HSBH1009

#### Health Care Resources and Systems Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Zakia Hossain **Session:** Semester 2 **Classes:** Two 1hr lectures, 1hr tutorial/week and WebCT online learning support **Assessment:** Teamwork project (30%), assignment (30%), 2hr MCQ/SAQ exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, B O H, UG Study Abroad Program.

This unit explores the organisation and structure of health care delivery systems. National and international frameworks regarding the provision of services to minority and culturally diverse groups, health care policy frameworks, and health care service structure and models of health care funding will be examined. Specifically, students will view the globalisation of health through human, material, financial, research, evaluation, monitoring, surveillance and technology. Issues of communication, advocacy and service delivery in teams will be examined. Safety and quality in health care systems will be highlighted.

#### Textbooks

Taylor S, Foster M and Fleming J, Health Care Practice in Australia: Policy, Context and Innovations, Oxford UP, South Melbourne (2008)

### HSBH2001

#### Health Science and Research 2 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Rob Heard **Session:** Semester 1 **Classes:** Two 2hrs/week mix of face-to-face, web-based learning and self-directed learning **Prerequisites:** HSBH1001 Health, Science and Research 1 **Assessment:** 1500 word individual assignment (25%), 1500 word group assignment (25%), exam (50%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sci, B Hlth Sci, M H I M, UG Study Abroad Program.

This unit of study extends the study of research paradigms in health. Students develop skills in designing research studies to answer questions, and in analysing and evaluating health research findings.

### HSBH3001

#### Health and Indigenous Populations Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Freidoon Khavarpour **Session:** Semester 2 **Classes:** Two 1hr lectures, one 1hr tutorial/week **Assessment:** Short essay (20%), media and data analysis (20%), report analysis (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit of study aims to provide students with an insight and respect for Indigenous perspectives on health and health care. This unit also explores established theories about health and illness from western and non-western perspectives.

The complexity of Aboriginal and Torres Strait Islander health in rural, remote and urban contexts in Australia will be explored. Health of other Indigenous populations outside Australia and their complexities provide a global focus across several cultures. This unit also explores established theories about health and illness from western and non-western perspectives.

### HSBH3003

#### Health Service Strategy and Policy Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Kate O'Loughlin **Session:** Semester 2 **Classes:** Two 1hr lectures, one 1hr tutorial/week **Assessment:** Assignment

(40%), exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit of study offers students an insight into the larger picture of how a nation sets priorities for health services. The importance of evidence-based health policy development in planning health services will be highlighted. Strategies for increasing the cost-effectiveness of health services will be covered. Issues of communication and advocacy in health are portrayed. Students will gain skills in health service needs assessment, measuring cost-effectiveness, macroeconomic evaluation of health services and systems and health equity assessment.

### HSBH3004

#### Health, Ethics and the Law Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Rose Leontini **Session:** Semester 1 **Classes:** Two 1hr lectures, one 1hr tutorial/week **Assessment:** Seminar participation (10%), weekly journal (30%), group presentation (30%), end semester exam (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit of study outlines the legislative role of governments and the role of legislation in health and health services. Fundamental ethical principles applied to ethical issues in health and health research are covered. Medico-legal aspects of health and health services as well as standards and medico-legal privacy principles will be explored. Students will develop an understanding of professionally acceptable behaviours appropriate to practice in the health professions.

### HSBH3006

#### Research Methods in Health Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Tatjana Seizov-Cajic **Session:** Semester 1 **Classes:** Two 1hr lectures, one 1hr tutorial/week **Prerequisites:** HSBH1007 Health Science and Research or HSBH1001 or equivalent **Assessment:** Assessment, various weeks (15%), assignment 2 (20%), assignment 3 (30%), exam (35%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

The aim of this unit is to provide a foundation for critical appraisal of techniques used in health research. The major quantitative and qualitative techniques appropriate for analysing research data in an evidence-based practice environment will be studied. The focus of this unit will be on research methodology that promotes the integration of health-relevant disciplinary perspectives.

### HSBH3009

#### International Health Project Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Zakia Hossain **Session:** Semester 2 **Classes:** Three 1hr lectures, one 1hr tutorial/week for 3 weeks, independent learning package with email support during work placement **Assessment:** Project development, project report **Practical field work:** Work placement in a developing country **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, UG Study Abroad Program.

This unit examines health, illness and health care issues from international perspectives. The unit focuses on global burden of disease, global governance, structural adjustment program and ITRIP and their implications at national and international level. It integrates organisational dimensions, changing patterns of global economy, restructuring of health care and socio-cultural approaches to international health. The unit uses both theoretical and practical approaches. At the practical level, students will be expected to have work experience for eight weeks in a developing country. During this work experience they are expected to develop a series of alternate

approaches in a problem solving project related to health and health care policies. The project will be selected from the WHO priority areas of health and global burden of disease. The project will focus on the following: global health problems and local solutions; burden of diseases, health care system and policy implementation from global perspective; and the role of international organisations in health promotion

### HSBM1002

#### Principles of Human Body Systems A

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Gary Lee **Session:** Semester 2  
**Classes:** 3hrs lectures, 1hr practical/wk **Prerequisites:** HSBM1001 Biochemistry and Human Biology **Assessment:** 1hr mid semester exam (MCQ) (38%), 1hr end semester exam (MCQ) (22%), 2hr end semester exam (MCQ) (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I M, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, B O H.

This unit of study will present the gross anatomy, physiological histology and physiology of the cardiovascular, respiratory, gastrointestinal and immune systems. The pathophysiology and pharmacology of these body systems will also be examined. Particular emphasis will be placed on an understanding of the major national health priority areas such as cardio-vascular disease, cancer and asthma as they occur across the lifespan.

### HSBM1003

#### Principles of Human Body Systems B

##### Health Sciences

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1hr lectures, 2hr practical/tutorial/week **Prerequisites:** HSBM1001 Biochemistry and Human Biology **Prohibitions:** BIOS1158 Structure Function and Disease B **Assessment:** 30min exam (20%), 2hr exam (80%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hlth Sc (Hons), B Hlth Sci, B Hlth Sci, M C V S, B Hlth Sci, M H I M, B Hlth Sci, M N, B Hlth Sci, M Rehab Cng, B O H.

This unit of study will present the gross anatomy, functional histology and physiology of the renal, reproductive, endocrine, musculoskeletal and nervous systems. The pathophysiology and pharmacology of these body systems will also be examined. Particular emphasis will be placed on an understanding of the major national health priority areas such as diabetes, arthritis and musculoskeletal diseases and mental health as they occur across the lifespan.

### HSBM4001

#### Sexology/Sexual Hlth: Global Perspective

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Patricia Weerakoon, Dr Gomathi Sitharthan **Session:** Semester 1 **Classes:** Web based on Web CT6 platform. No on-campus attendance required **Assessment:** All assessments will be completed and submitted online. Assessment 1, 500-800 word reflective report on values and attitudes to sexology, wk 2 (10%); assessment 2, group work and submission of 1000 word report, wk 6 (20%); assessment 3, group work and submission of 1000 word report, wk 9 (20%); assessments 4 and 5, 2000-2500 word independent reports on two selected scenarios with an appropriate experiential community-based activity, due exam week (50%) **Campus:** Cumberland **Mode of delivery:** Distance Education

*Note: This unit of study will be offered as a University wide elective*

The unit provides students with an overview of sexology as a science and a profession in a global context. Students will work in a multi professional, multicultural environment and develop an awareness of sexology and sexual health as an integral part of life and wellbeing that transcends discipline and professional groups as well as geographic and cultural boundaries. Students will be sensitised to the range of sex attitudes and values in the community. The initial learning modules in the unit will introduce the students to the multidisciplinary

nature of the study of sex. The students will then apply this multidisciplinary framework to a series of scenarios that explore issues of sexology at personal, family, community, country and global levels. These scenarios will include: sexual dysfunction and management through the lifecycle; issues of gender concerns including transgender and homosexuality; women's health including gender inequalities; HIV, AIDS and other sexually transmissible infections; adolescent sex education and sexual risk taking behaviour; sex in illness, people with a disability and the aged. Students will evaluate the most recent literature in the area and demonstrate the ability to discuss relevant issues in keeping with the definitions of sexual rights provided by the World Health Organisation (WHO) and the World Association of Sexology (WAS). All students will work in groups on two scenarios (the specific scenarios for the group work will vary depending on current national and global issues). Individual students will select two other scenarios to investigate independently. These individual assignments will have an experiential community based component. Sexuality and sexology is intrinsic to the wellbeing and quality of life of all people, and this unit of study would benefit students in all disciplines of the university.

## HSTO3001

### Microscopy & Histochemistry Theory Medicine

**Credit points:** 6 **Teacher/Coordinator:** Robin Arnold, Prof. Chris Murphy **Session:** Semester 1 **Classes:** Usually four 1 hour lectures per week plus some tutorials **Prerequisites:** (ANAT2008 or ANAT2001) or (BMED 2803 or 2804 or 2805 or 2806) **Corequisites:** HSTO3002 **Assumed knowledge:** Basic understanding of biology. **Assessment:** One 2 hour theory exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The aims of this unit of study are to provide a theoretical understanding of why biological tissues need to be specifically prepared for microscopic examination, how differing methods yield different types of morphological information; to allow students to study the theory of different types & modalities of microscopes, how they function & the differing information they provide; to develop an understanding of the theory of why biological material needs to be stained for microscopic examination; to allow students to understand how biological material

becomes stained; to develop an understanding of the chemical information provided by biological staining - dyes, enzymes & antibodies.

## HSTO3003

### Cells and Development: Theory Medicine

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Frank Lovicu **Session:** Semester 2 **Classes:** Four 1 hour theory lectures and one 1 hour tutorial per week. **Prerequisites:** For BSc students: ANAT2008 For BMedSc students: 42 credit points of Intermediate BMED units, including: BMED2801, 2802, 2805. **Prohibitions:** EMHU3001, EMHU3002 **Assumed knowledge:** (i) An understanding of the basic structure of vertebrates; (ii) An understanding of elementary biochemistry and genetics. **Assessment:** One 2 hour exam, tutorial research papers. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG is highly recommended.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

The main emphasis of this unit of study concerns the mechanisms that control animal development. Fertilisation, cleavage, gastrulation and the formation of the primary germ layers are described in a range of animals, mainly vertebrates. Much of the emphasis will be placed on the parts played by inductive cell and tissue interactions in cell and tissue differentiation, morphogenesis and pattern formation. This will be studied at both cellular and molecular levels.

Gilbert SF Developmental Biology. 8th edn. Sinauer Associates Inc: Sunderland, Mass. 2006.

## HSTO3004

### Cells and Development: Practical (Adv) Medicine

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Frank Lovicu **Session:** Semester 2 **Classes:** One 1 hour tutorial and two 2 hour practicals per week. **Prerequisites:** Note: This advanced unit of study is only available to select students who have achieved a mark of 65 or above in the following prerequisite units of study. For BSc students: ANAT2008. For BMedSc students: 42 credit points of Intermediate BMED units, including: BMED2801, 2802, 2805. **Corequisites:** HSTO3003 **Prohibitions:** EMHU3001, EMHU3002 **Assessment:** One 1 hour exam, Practical class reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 credit points of MBLG is highly recommended.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This advanced unit of study complements HSTO3003 (Cells and Development: Theory) and is catered to provide students with laboratory research experience leading to Honours and higher degrees. It will primarily cover the design and application of

experimental procedures involved in cell and developmental biology, using appropriate molecular and cellular techniques to answer developmental questions raised in HSTO3003. This unit of study will promote hands on experience with different animal models, allowing students to observe and examine developing and differentiating tissues at the macroscopic and microscopic level. The main emphasis of this unit of study will concentrate on practical approaches to understanding the mechanisms that control animal development. Fertilization, cleavage, gastrulation and the formation of the primary germ layers are covered. The parts played by inductive cell and tissue interactions in differentiation, morphogenesis and pattern formation are examined at cellular and molecular levels. Note that for some weeks of the course, specialised practical classes will be carried out at the Westmead campus.

### HSTY1025

#### The Middle Ages (500-1500) Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Lynette Olson **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Assessment:** two 1500 word essays (30% each), one 1500 word exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

The Middle Ages were actually a beginning, which saw the birth and early growth of Europe's civilisation that was ultimately passed on to its settler societies. This unit of study surveys some key events and institutions that shaped the medieval world. Topics include the Christianisation of England, the rise of Islam and its impact on the Mediterranean, the Vikings and Normans, changes in feudal relationships, growth of towns, rise of universities, Crusade and Inquisition, the Black Death and demographic change.

### HSTY1034

#### Early Modern Europe 1500-1750 Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Margaret Sampson **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Assessment:** one 2 hour exam or equivalent, 2500 words written work; 60% classwork and 40% exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

HSTY1034 listens to 'ordinary' people's stories to show the many ways that non-elites negotiated, subverted and challenged aristocratic authority. Themes include the development of courtly culture in great cities like Paris and Rome; rural cultures; witchcraft and magic; peasant revolt; the role of violence; gender; neighbourhood life and the rise of 'middle-class' manners. The unit foregrounds cinema as well as text, investigating the cultural underpinning of such films as Peter Webber's *Girl with a Pearl Earring*, and Claude Berri's masterpiece, *Jean de Florette*.

### HSTY1044

#### Twentieth Century Politics and Culture Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Cindy McCreery **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prohibitions:** HSTY1043 **Assessment:** 2500 words written work and one 2 hour exam; 60% classwork and 40% exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Arts, UG Study Abroad Program.

This unit surveys Europe's twentieth century, examining the First World War, the Russian Revolution, fascism, the cultural ferment of the interwar years, the Second World War and the Holocaust, European empires and decolonization, Cold War culture and politics, and European unification. The transformations of the twentieth century took place in many different spheres of human existence, and this unit introduces students to some of the varieties of history and the diverse ways historians approach the past.

### HSTY1045

#### Modern European History 1750-1914 Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Robert Aldrich **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Assessment:** one 500 word assignment, one 2000 word essay, one 2 hour examination and tutorial exercises and participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

This unit covers the dramatic changes in European life that marked the transition from pre-modern to modern societies. We will see that these changes emancipated many Europeans from legal and physical burdens while creating many new ones of their own. The catastrophes of the twentieth century have their roots in the period we examine, a period that culminated in the First World War and the spectacular explosion of the ideals of material and moral progress that had animated bourgeois elites. In particular, we discuss the transformations that took place in the key areas of human activity: politics and ideology; family and sexual life; work and technology; religious belief; experiences of colonialism; and social class.

### HSTY1076

#### American History from Lincoln to Clinton Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Stephen Robertson **Session:** Semester 1, Winter Main **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prohibitions:** HSTY2035 **Assessment:** one 500 word tutorial paper, one 1750 word essay, one group tutorial presentation (equivalent to 250 words), and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit examines the United States in the years in which Americans felt their society, culture, politics, and individual and national identities, were taking new, 'modern' forms. It offers insights into a nation that is one of the principal forces shaping the world in which we live. We will explore topics such as the rise and fall of racial segregation, immigration, social reform movements, mass consumer culture, sexual revolution, and the changing stance of the United States in the world.

## HSTY1089

### Australia: Colonies to Nation

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Richard Waterhouse **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Assessment:** one 500 word document exercise, one 2000 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Sc, B Com, Dip Arts, UG Study Abroad Program.

Was Australia the peacefully settled 'quiet continent'? First, this unit examines convict society, frontier conflict, the impact of gold, the emergence of cosmopolitan cities and the campaigns for responsible government. Second, it maps the creation of a nation state in the period after 1880, involving constitutional and political changes, the creation of foundation stories, the impact of war, and changing relations between settler and Indigenous Australians. Finally, we chart the nation's cultural, political and economic transformation into a modern, (and post colonial) society after 1945.

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

In 13th-century Karakorum, capital of the Mongol empire, a debate was held between Christians, Muslims and Buddhists. Starting from this, we will examine religious change as cultural change thematically and comparatively with reference to Medieval European Christianity, Islam and Chinese Buddhism. This unique unit is for religious, indifferent and anti-religious people. It involves discussion of processes of acculturation and the interplay between religious and other aspects of cultural 'conversion', including language and art.

### China and its World in the 19th Century

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr John Wong **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial **Prerequisites:** 12 credit points of junior History, Ancient History, Economic History or Asian History and Culture **Prohibitions:** HSTY2006 **Assessment:** one 250 word research proposal, tutorial participation, one 2250 word major research essay, one 2000 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit covers three major phases of development in China's recent history: the so-called century of humiliation (1839-1949), the communist experiment (1949-1978) and now China's endeavours to become a market economy in a globalising world.

## HSTY2607

### Approaches to the Arab Israeli Conflict

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Dirk Moses **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points in History, Arabic and Islamic Studies, or Hebrew, Biblical and Jewish Studies. **Prohibitions:** JCTC2008, GOVT2772 **Assessment:** one tutorial presentation (equivalent of 1000 words), one 2500 word essay and one 1 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, Dip Arts, UG Study Abroad Program.

This unit of study will provide students with a grounding in the historical context of and reasons for conflict in Palestine/Israel. It will enable them to identify the causes of conflict and avenues for peace, as well as making them aware of the politicised nature of scholarship on the region. They will be made aware of the prevalence of emotions and national feeling in discussion of the subject, and of the imperative for sobriety in academic exchange at the University. The unit will enable students to gain detachment from the dominant narratives about the causes of the conflict so they can make up their own minds about the issues.

## HSTY2619

### Living in Colonial Australia

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Kirsten McKenzie **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History, Economic History or Asian History and Culture **Prohibitions:** HSTY2019 **Assessment:** one 3000 word essay and either one 1500 word tutorial paper or one 1.5 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

If "the past is a foreign country", how did people live in colonial Australia? Taking a fresh perspective on Australia's history by focusing on everyday life, we question our assumptions that Australia was settled by people not that different from ourselves. Considering the economic, social and cultural impact of colonization and exploring the contested aims of diverse groups within this emerging society, we will discover why colonial Australia was stranger and more fascinating than you ever imagined.

## HSTY2626

### Fascism and Antifascism

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Judith Keene **Session:** Semester 1, Winter Main **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History, Economic History or Asian History and Culture **Prohibitions:** HSTY2026 **Assessment:** one 1000 word seminar presentation, one 2500 word essay, one 1000 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit will examine the origins and development of the movements of the New Right that emerged in Europe after World War One paying particular attention to their political, social and cultural manifestations as well as the movements on the left that attempted to confront what was seen as a new political phenomenon. The unit will use primary material of literature, diaries, cinema and photography as well as the more conventional sources of political and historical analysis.

## HSTY2629

### Sex and Scandal

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Frances Clarke, Dr Kirsten McKenzie **Session:** Semester 1, Winter Main **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of History, Ancient History, or Asian Studies **Prohibitions:** HSTY2029 **Assessment:** one 1500 word essay and one 3000 word research paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

What makes a scandal? This unit examines a number of sensational case studies from England, America and Australia, beginning with the outrage surrounding Marie-Antoinette and then weaving through the increasingly strait-laced nineteenth century, in which scandals abounded, destroying reputations, rulers and families. It is not behaviour itself, but the ever-changing interpretations of behaviour that gave rise to condemnation and scandalised indignation. Examining occasions when social rules have been flouted allows us to consider the ways in which such rules are themselves constituted, maintained and challenged.

### HSTY2634

#### Columbus to Lincoln: America Before 1865

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael McDonnell, Dr Frances Clarke **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History, Economic History or Asian History and Culture **Prohibitions:** HSTY2034 **Assessment:** one 500 word essay plan, participation, one 2000 word essay and one 2 hour take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

British settlers eventually gained supremacy over the parts of the New World that we now call North America. In time, they would go on to forge a separate nation, resting on a distinct national identity that promised liberty and equality for all, even as vast swathes of the population remained disenfranchised. In studying the development and application of these founding ideals, we survey the formative moments in America history, from white colonization to the Civil War.

### HSTY2640

#### Twentieth Century China

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr John Wong **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History, Economic History or Asian History and Culture **Prohibitions:** HSTY3071, HSTY3072 **Assessment:** one 2500 word research essay, one 2000 word take-home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, Dip Arts, UG Study Abroad Program.

The communist's 1949 victory in China put an end to foreign encroachments and domestic strife. This relative calm did not stop Westerners fretting about China's perceived intentions. The Korean and Vietnam Wars only confirmed their worst fears. China's adoption of a market economy has generated worries of a different kind. We appear to live in perpetual fear of China. This unit examines China's past and present aspirations in an attempt to find productive ways of engaging Chinese history.

### HSTY2645

#### Invisible Cities: Imagining Urban Italy

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nicholas Eckstein **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History, Economic History or Asian History and Culture **Prohibitions:** HSTY2045 **Assessment:** one 3500 word research essay, one 1000 word research journal **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

Invisible Cities uses text, art, the physical landscape, photography and cinema to study the Italian urban imagination from ancient Rome, to its evolution in Florence, Venice, Sienna and San Gimignano. Students learn how Italians reinvent their cities in everyday life and public celebration, how they exploit their streets and piazzas; how human gesture and movement transform urban space; and how modern and contemporary ideas about the city blend and clash with millennia of urban tradition.

### HSTY2651

#### Spanish Civil War

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Judith Keene **Session:** Semester 2 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History, Asian Studies or Spanish Language **Prohibitions:** HSTY2051 **Assessment:** one 2000 word essay, one 2000 word assignment and one exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

The Spanish civil war (1936-1939) was a critical event in modern Spanish history and in international relations. The conflict in Spain elicited an enormous response from intellectuals and activists of the Left and Right around the world. As well, some hundred thousand foreigners enlisted in Spain, most with the Republican International Brigades in what, politically and militarily, was the curtain-raiser to World War Two. This unit enables students to study this important and fascinating twentieth century event in depth.

### HSTY2659

#### Nationalism

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Margaret Poulos **Session:** Semester 1, Summer Main **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History or Asian Studies **Prohibitions:** HSTY2059 **Assessment:** one oral tutorial presentation, participation, one 2500 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

Nationalism is surely one of the most potent forces in the modern era. It has generated wars and shaped identities, forged common bonds and torn populations apart. When and how did nationalism first appear? How should we understand this peculiarly modern phenomenon? After looking at the way scholars have understood nationalism, we delve into 19th and 20th century case studies, along the way focusing on how literature, art and popular culture have been crucial vehicles for furthering nationalist sentiment.

### HSTY2660

#### Violence in Italy

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Nicholas Eckstein **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History or Economic History **Prohibitions:** HSTY2060 **Assessment:** one 1500 word tutorial paper and one 3000 word research essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

Violence is a feature of all human societies in every era. This unit examines the cultural significance of violence in Italy, from the Ancient Roman amphitheatre to the language of twentieth-century Fascist violence and post-war Italy's confrontation with left and right-wing terrorism, the 'years of lead', and Italy's continuing struggle with the Mafia. Themes include violence in Medieval, Renaissance and Early-Modern urban culture, gender and sexuality, crime and punishment in the Enlightenment, and Romantic representations of violence in the nineteenth century.

### HSTY2664

#### Communicating Culture in the Middle Ages

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Julie Ann Smith **Session:** Semester 1 **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History or Asian Studies **Prohibitions:** HSTY2064 **Assessment:** one 1000 word tutorial paper, one 2000 word essay, one 1500 word exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This is a unit about people and cultures. Women and men, merchants and monks, Christians and Jews all formed the cultures, classes and statuses which constituted late medieval European society. The study themes of this unit focus on the means by which ideas, cultures and expectations were constructed and transmitted, and include topics such as healthcare, civic life, the body, gender and sexuality, religious beliefs and practices, otherness, death, political theory, art and architecture, travel.

### HSTY2666

#### American Revolutions

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michael McDonnell **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History, Economic, or Asian History and Culture **Prohibitions:** HSTY2066 **Assessment:** one 2500 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B Int S, Dip Arts, UG Study Abroad Program.

This unit will explore the series of rebellions, wars, independence movements and revolutions that rocked the Atlantic World between 1750 and 1825. Though we'll focus on the American Revolution in particular, we will put that event in a larger Atlantic context, from the Native American resistance movements of the 1750s and 1760s, through to the Spanish American independence movements of the early nineteenth century. We'll also explore connections with the Haitian and French Revolutions and slave rebellions more generally.

### HSTY2667

#### Politics and Cultures of US Imperialism

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Clare Corbould **Session:** Semester 1, Summer Main **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History or Asian Studies **Prohibitions:** HSTY2067 **Assessment:** one 2500 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

Since the 2003 invasion of Iraq, public debate about American power has been dominated by the question: is the United States an empire? Taking this debate as a starting point, students examine: the expansion of American power across the continent and then overseas; political, economic and cultural forms of domination and the subsequent transformation of societies overseas and the US itself; and the value and limits of applying the concept of imperialism to US power.

### HSTY2672

#### Britain and the World: C.1837-1914

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Cindy McCreery **Session:** Semester 1, Summer Main **Classes:** one 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History or Asian Studies **Assessment:** one 1000 word draft essay, one 2000 word final essay and one take home exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit explores the political, social and cultural significance of Britain's foreign engagements c.1837-1914, including war (e.g. Crimean War, Afghan Wars, Maori Wars, Boer War), 'gunboat diplomacy' (e.g. the Royal Navy in the Pacific) and colonial rule (especially India, Ireland and Australia). Special emphasis will be given to the role these engagements played in fostering or challenging a sense of British identity among a wide range of men and women, both in Britain and the wider world.

### HSTY2676

#### Australia and the World

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr James Curran **Session:** Semester 1 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History, Economic History or Asian History and Culture **Assessment:** one oral tutorial presentation, participation, one 2500 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

This unit examines Australia's relations with the world in the post-war era. It explores the historical themes which shaped Australia's response to the world: loyalties to race and empire; communities of interest and culture; the 'Free' versus the 'Communist' worlds; the rise of Asian nationalism, ANZUS and Australian military engagements from Korea to Vietnam. It also investigates the making of Australia's foreign and defence policy from the 1980s to the present, including debates over engagement with Asia and the American alliance.

### HSTY2677

#### Australia: Politics and Nation

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr James Curran **Session:** Semester 2, Summer Main **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History, Economic History or Asian History and Culture **Assessment:** one oral tutorial presentation, participation, one 2500 word essay, one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program, UG Summer/Winter School.

This unit examines the intersection between political culture and nationalism in Australia, with particular attention to the question of when (and if?) Australia became an 'independent' nation. It examines the content and character of British race patriotism in Australia before 1945 and the gradual unravelling of this British myth in the post-war period. Among other issues, the unit explores the end of 'White Australia', the rise of multiculturalism, engagement with Asia, Aboriginal reconciliation and republicanism.

### HSTY2679

#### Advanced Australia

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Penny Russell **Session:** Semester 1 **Classes:** one 1 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points of Junior History, Ancient History, Economic History or Asian History and Culture **Assessment:** one 1000 word discussion paper and one 5000 word primary research essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

This unit is designed for students who want to challenge themselves, hone their skills of independent research and achieve a deeper understanding of Australia's written history. The unit surveys some of the 'classic' and controversial works of Australian history, and shows how new research directions and methods intersect with topical debates. Students have the opportunity to develop a substantial, self-directed research project within structured guidelines. The unit is particularly recommended for students with an interest in higher-level research in history.

### HSTY2680

#### Living: Modern British Social History

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Chris Hilliard **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History or Asian Studies **Assessment:** one 2000 word primary source-based exercise, one 2000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit explores the richness and variety of British social history since the late nineteenth century. Each week's classes open up different historical and methodological questions by studying different

activities -- for instance, eating, drinking, working, buying, learning, and sleeping around.

### HSTY2681

#### Colonialism in Modern Asia

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Robert Aldrich **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History or Asian Studies **Assessment:** one 2000 word essay, one tutorial activity, one 1500 word exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

In modern times, Asia represented a major terrain for expansion by such powers as Britain, France, Japan, the Netherlands and the United States. This inter-disciplinary unit explores and compares the policies, practices, and experiences of colonial powers in Asia. Themes may include the ideological justification of empires; military and political control; the construction of colonial knowledge; the cultures of empires; inter-ethnic relations; economic, medical and urban policies; gender and sexuality; opposition to imperialism; and the heritage of empire.

### HSTY2682

#### Portraits of Medieval Women

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Julie Ann Smith **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History or Asian Studies **Prohibitions:** HSTY3696 **Assessment:** one 800 word tutorial paper, one 2000 word essay, one 1200 word exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Prostitutes, nuns, saints, mothers, mystics, alewives, pilgrims - the lives of medieval women in the 12th-15th centuries were rich and varied. Their experience and contributions to their medieval worlds come alive through insights into such broad categories such as family and marriage, intellectual and spiritual life, as well as through focused case studies. Students in this unit engage with the lives of medieval women through an array of textual and iconographic portraits as well as through a splendid scholarly literature.

### HSTY2691

#### Writing History

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Clare Corbould **Session:** Semester 2 **Classes:** one 1 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 credit points of junior History, Ancient History, Economic History or Asian History and Culture. **Prohibitions:** HSTY2901, ANHS2691 **Assessment:** one 1500 word book or journal review, one 1500 word reflective essay, one 3000 word diary **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

How do we write history? How and why do our approaches to events, lives, and ideas differ from those taken by historians in the past? What is the relationship between historical scholarship and society? To answer these questions, we will examine History's history, social theories (e.g. Marxism, feminism, structuralism, post-structuralism), various historical methods, and processes of historical research and publication. Far from dry discussion, this lively unit focuses on debates that fire up historians, past and present.

### HSTY2805

#### History Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts.

#### History Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts.

### HSTY4011

#### History Honours A

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Prof Robert Aldrich **Session:** Semester 1, Semester 2 **Classes:** two 2 hour seminars per week in Semester 1. Students also submit an honours thesis late in Semester 2. **Prerequisites:** 48 senior credit points of History (up to 18 credit points of which may be cross-listed), including HSTY2691, with an average mark in those units of study of credit or better. Students who do not meet this requirement, however, may apply to the Honours Coordinator for a waiver to permit their entry into the honours program. **Assessment:** All of the major components of the Honours year will be assessed. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Int S (Hons), Dip Arts(Hons).

Honours consists of a number of seminars, coursework and the completion of a substantial research thesis. For details please contact the Chair of Department or the Honours Co-ordinator (where applicable) or obtain a copy of the relevant Student Information Guide from the SOPHI Office.

### HSTY4012

#### History Honours B

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Prof Robert Aldrich **Session:** Semester 1, Semester 2 **Prerequisites:** See under HSTY4011 **Corequisites:** HSTY4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), B Int S (Hons), Dip Arts(Hons).

# University undergraduate units of study – I

## IBUS2101

### International Business Strategy Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Main **Classes:** 2 x lectures and 1 x 1hr workshop per week. **Prerequisites:** 36 junior credit points with at least 12 from the Faculty of Economics and Business **Prohibitions:** IBUS2001 **Assessment:** Participation; Individual assignment; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program, UG Summer/Winter School.

The aim of this unit of study is to understand how international firms win and lose in global competition. Major topics include building corporate capabilities and competencies for competitive advantage; optimal strategies for international business competition; dealing with different market structures and government policies; choosing between equity and non-equity alliances, licensing and joint ventures; understanding the differences in economic, political and legal environments; challenges of operating in emerging economies; managing across borders, including selecting effective types of MNEs and subsidiaries; managerial decision-making and internal MNE organisational design; and management of global networks.

## IBUS2102

### Cross-Cultural Management Economics and Business

**Credit points:** 6 **Session:** Semester 2, Summer Main **Classes:** 2 x lectures and 1 x 1hr workshop per week **Prerequisites:** 36 junior credit points with at least 12 from the Faculty of Economics and Business **Prohibitions:** IBUS2002 **Assessment:** Participation; Individual assignment; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program, UG Summer/Winter School.

Critical to effective management in international and multi-cultural business environments is an understanding of cultural differences and how to manage such differences. The aim of this unit of study is to provide conceptual frameworks and evidence from practice that will develop an understanding of the ways in which cultures differ, how these differences can impact on management, and how cultural issues can limit organisational effectiveness. Strategies for managing and relatively harnessing cultural differences are also evaluated. Major topics include the significance of culture in international management; the meaning and dimensions of culture; comparative international management styles; managing communication across cultures; ethics and social responsibility in global management; cross-cultural negotiation and decision-making; managing global teams; culture and international leadership; and developing the international and global manager.

## IBUS2551

### International Business Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A S, B Com, B Ec, B Ec Soc Sc, B Int S.

## IBUS2552

### International Business Exchange

## Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A S, B Com, B Ec, B Ec Soc Sc, B Int S.

## IBUS3101

### International Business Alliances Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 x lectures and 1 x 1hr workshop per week **Prerequisites:** 36 junior credit points **Corequisites:** IBUS2101 **Assessment:** Participation; Individual assignment; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B A S, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B Int S, B Sc, B Com, UG Study Abroad Program.

The formation and implementation of successful global business strategies involves alliances with a range of stakeholders including international customers and suppliers, overseas agents, international franchisors and franchisees, international joint venture partners, and international merger relationships. The aim of this unit of study is to provide conceptual frameworks and evidence from practice that will develop an understanding of the motivations underlying international alliances, the alternative approaches to alliance formulation and development, and the problems involved in promoting effective alliance management. Major topics include the motivations for international business alliances, analysis of the advantages and disadvantages of different types of alliances, factors influencing the choice of alliance arrangements, alliance structure issues, partners selection and relationship management, the reasons why alliances succeed or fail, and the management of alliance processes.

## IBUS3102

### International Risk Management Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 x lectures and 1 x 1hr workshop per week **Prerequisites:** 36 credit points in junior units of study **Assessment:** Participation; Individual assignment; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B A S, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B Int S, B Sc, B Com, UG Study Abroad Program.

This unit is designed to introduce students to the nature of risk management, particularly the identification of risk, its analysis and consequences for international business actors. Emphasis is placed on surveying some of the environments that can potentially generate risk, how these risks can impact various aspects of market composition and market participation, the integrity of business actors and their profitability and viability. The business environments surveyed include the international financial system, government and regulation of business activity, compliance risk, corporate social responsibility and activism, as well as issues associated with country and political risk.

## IBUS3103

### Global Entrepreneurship and Enterprise Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1.5 lectures and 1 x tutorial/lab class per week. **Prerequisites:** 48 credit points **Assessment:** Group presentation; Individual assignment; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students enrolled in the combined Law degrees are able to complete this unit in their third year of enrolment (full-time).*

**Associated degrees:** B A, B Com, B A S, B Com, B Com (Liberal Studies), B Ec, B Ec Soc Sc, B Int S.

Developing entrepreneurial and innovative businesses is very different to managing large established businesses especially in a global context. In addition to exploring the special problems (and advantages) associated with entrepreneurial small and medium enterprises (SMEs), the course will bring together the skills you have acquired across many disciplines. In this unit, you will develop a funding proposal for a real technology, invention or design and pitch that to a panel of potential investors. Topics include international entrepreneurship theory, opportunity recognition and selection, developing an innovative business strategy, and sourcing appropriate finance (whether angel, venture capital, debt or corporate investment). Central to this course is the integration of theory and practice through workshop sessions, group work, and talks from industry professionals.

### IBUS3104

#### Ethical International Business Decisions Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 x 1hr lecture and 1 x 2hr workshop twice per week for 6 weeks **Prerequisites:** 48 credit points **Corequisites:** IBUS2101 **Assessment:** Group presentation; Individual assignment; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Com, B Com (Liberal Studies), B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

To be able to succeed in international business, both corporations and individuals need broad decision-making abilities. Business decision-making tools yield more coherent and justifiable results when used with an understanding of the ethical, social and environmental aspects of the process. This applies to various situations in the international business setting including business relations with government, customers, employees, and NGOs. Using a case study approach, this unit is designed to look at these non-financial elements in the decisions made within the international business context. Following the completion of this unit, students will have enhanced skills and knowledge relevant to the development and management of international business organisations.

### IBUS3106

#### International Business Special Project Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week **Prerequisites:** IBUS2101 and IBUS2102 with a credit average **Assessment:** Research Project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Students must have achieved a credit average in these units and must have received permission to enrol from the Chair of the Discipline of International Business.*

**Associated degrees:** B A S, B Com, B Ec, B Ec Soc Sc, B Int S, B Sc, UG Study Abroad Program.

The special project in International Business provides students with an opportunity to undertake a supervised reading and research project on an approved topic. Special projects will be undertaken depending on the availability of appropriate staff expertise. Special projects may also be organised by the Discipline to include the opportunity to travel in a group to another country and conduct various case studies in international business. The focus will vary each year based on the specific country and industry focus. As well as being of interest to those intending to work internationally, the unit of study will be appropriate for students intending to work in 'big' business as well as smaller entrepreneurial enterprises.

### IBUS3107

#### Business Negotiations Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 x 2hr lecture and 1 x 1hr tutorial **Prerequisites:** 48 credit points **Assessment:** Participation; Mid Semester exam; Self-Appraisal; Group Project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Com, B Ec, B Ec Soc Sc, B Int S, B Sc, UG Study Abroad Program.

The purpose of this course is to help you understand the theory of negotiation as it is practiced in a variety of strategic settings. The aim is to help you feel more comfortable and confident with the negotiation process. The course is designed to be relevant to the broad spectrum of negotiation problems that are faced by managers but we use specific examples from international strategy such as M&A and joint ventures. The course will provide participants with an opportunity to develop skills experientially and to understand negotiation in useful analytic frameworks. Considerable emphasis will be placed on role-playing exercises and case studies.

### IBUS3551

#### International Business Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

*Note: Department permission required for enrolment.*

**Associated degrees:** B A S, B Com, B Ec, B Ec Soc Sc, B Int S.

### IBUS3554

#### International Business Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A S, B Com, B Ec, B Ec Soc Sc, B Int S.

### IBUS4101

#### Special Topics in International Business Economics and Business

**Credit points:** 12 **Session:** Semester 1 **Classes:** 3 hr seminars per week. **Prerequisites:** Completion of requirements for the pass degree, a major in International Business with a minimum Credit average and approval of the Chair of Discipline. **Corequisites:** IBUS4102 **Assessment:** Student participation in in-class discussion; short essay assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec Soc Sc (Hons), B Int S (Hons).

IBUS4101 studies the recent theoretical and applied literature in international business and management strategy. Topics are organised around four key research themes:

- (i) the boundaries of the multinational enterprise;
- (ii) internal organizational design and structure;
- (iii) location decisions;
- (iv) and competitive dynamics.

Specific topics include the critique of theoretical models in international business, including new institutional economics, internalization, transaction cost, resource, path dependency, contracting and dynamic capability-learning approaches; the relationship between the new

trade theory, increasing return models and theories of the MNE, including location tournament and clustering; the organizational design of non-equity and equity strategic alliances, including the nature of headquarters-subsidiary relations; investment incentives and country impact of foreign direct investment; and competitive and strategic interaction of multinational enterprises. Candidates must enrol in IBUS4101, IBUS4102, IBUS4103, and IBUS4104 to complete the Honours year.

#### IBUS4102

##### International Business Research Methods Economics and Business

**Credit points:** 12 **Session:** Semester 1 **Classes:** 3 hr seminars per week. **Prerequisites:** Completion of requirements for the Pass degree, a major in International Business with a minimum Credit average, and approval of the Chair of Discipline. **Corequisites:** IBUS4101 **Assessment:** Assessment of research proposal. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec Soc Sc (Hons), B Int S (Hons).

Honours study in International Business is directed at the development of the analytical and conceptual skills required to conduct independent research in the field. The focus of this unit is on understanding research methodologies, the design of a research project and preparation of a research proposal. In addition students undertake Special Topics in International Business (IBUS4101) and the Seminar in International Business (IBUS4103). Candidates must enrol in IBUS4101, IBUS4102, IBUS4103, and IBUS4104 to complete the Honours year.

#### IBUS4103

##### International Business Seminar Economics and Business

**Credit points:** 12 **Session:** Semester 2 **Classes:** 3 hr seminars per week. **Prerequisites:** Completion of requirements for the Pass degree, a major in International Business with a minimum Credit average, and approval of the Chair of Discipline. **Corequisites:** IBUS4104 **Assessment:** Student participation in in-class discussion; short-essay assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec Soc Sc (Hons), B Int S (Hons).

IBUS4103 is a seminar required of students undertaking their Honours year in International Business. The seminar builds on the work in IBUS4101 and considers selected issues of current importance in the field, including work related to the research of members of the discipline and recently published cases. In addition topics may be adjusted to reflect student interests and needs. Because of the focus on current issues, the research of members of the discipline, and the interests of current students, topics covered will vary from year to year. We would normally expect to deal with current issues in the following areas: (i) The link between firm structure and international strategy; (ii) Analysis of changes in the international operating environment; (iii) Current studies of entry modes and alliances; (iv) Issues in international risk management; (v) Issues in cross cultural management; (vi) Ethical issues in international management. In addition to in-class discussion, the seminar will require a series of short papers analysing works of particular interest to individual students. Candidates must enrol in IBUS4101, IBUS4102, IBUS4103, and IBUS4104 to complete the Honours year.

#### IBUS4104

##### International Business Thesis Economics and Business

**Credit points:** 12 **Session:** Semester 2 **Classes:** 3 hr seminars per week. **Prerequisites:** Completion of requirements for the Pass degree, a major in International Business with a minimum Credit average, and approval of the Chair of Discipline. **Corequisites:** IBUS4103 **Assessment:** Assessment of the thesis. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec Soc Sc (Hons), B Int S (Hons).

Honours study in International Business is directed at the development of the analytical and conceptual skills required to conduct independent research in the field. The primary focus of this unit is the conduct of research and the writing of a thesis of some 15 to 20,000 words. In addition students undertake Special Topics in International Business (IBUS4101) and the Seminar in International Business (IBUS4103). Candidates must enrol in IBUS4101, IBUS4102, IBUS4103, and IBUS4104 to complete the Honours year.

#### IBUS9001

##### International Business Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc, B Int S, UG Study Abroad Program.

#### ICLS2631

##### Popular Fiction and Popular Culture Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Yiyang Wang **Session:** Semester 1 **Classes:** 1 hour lecture and 1 hour tutorial per week **Prerequisites:** 18 Junior credit points from any department in the Faculty of Arts from Table A of which 12 credit points are from one subject, or special permission from the Director of ICLS. **Assessment:** Class presentation equivalent to 1000 words (10%), essay 2500 words (45%), take home exam 2500 words (45%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program.

What is popular culture? How do we identify popular fiction and how does it fit into both popular and literary traditions? What are the common elements of popular culture and popular fiction in different national, cultural and historical contexts? This unit introduces approaches to the study of popular culture and fiction through the study of different genres of popular fiction written in English or translated into English.

#### ICLS2633

##### Cities of the World Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Bronwyn Winter **Session:** Semester 1 **Classes:** 1 hour lecture and 1 hour tutorial per week **Prerequisites:** 18 Junior credit points from any department in the Faculty of Arts from Table A of which 12 credit points are from one subject, or special permission from the Director

of ICLS **Assessment:** Class presentation equivalent to 1000 words (10%), essay 2500 words (45%), take home exam 2500 words (45%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, UG Study Abroad Program.

The 'city' is a diverse and controversial theme in world literature. It touches upon past and present, alienation and fulfillment, luxury and poverty, success and failure, anonymity and fame. There are modern and old cities, cosmopolitan and 'holy' cities. By examining how the cultural and historical transformation of urban living has been approached by writers of different cultural and national backgrounds, this unit of study offers a journey to different geographic locations but also a journey through time.

## ICLS2636

### Great Books 2: Innovations, Inspirations Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Bronwyn Winter **Session:** Semester 2 **Classes:** 1 hour lecture and 1 hour tutorial per week **Prerequisites:** 18 Junior credit points from any department in the Faculty of Arts from Table A of which 12 credit points are from one subject, or special permission from the Director of ICLS. **Assessment:** Class presentation equivalent to 1000 words (10%), essay 2500 words (45%), take home exam 2500 words (45%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, UG Study Abroad Program.

What works most mark the stylistic development of world literature? What was their innovative and inspirational potential? Did they represent the pinnacle of their tradition or did they break with it? How have they inspired other writers and artists, then and now? This unit will look at some of those literary works that have come to symbolise literary innovation and inspiration and ask how they came to be part of our modern canon and serve as a model for others.

## ICLS2801

### Int Comparative Literary Studies Exch Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2 hours per week **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A.

## ICLS2802

### Int Comparative Literary Studies Exch Arts

## ICLS4011

### Int Comparative Literary Studies Hons A

## Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Bronwyn Winter **Session:** Semester 1, Semester 2 **Classes:** 3 semester-length seminars of 2 hours per week per seminar **Prerequisites:** Credit average in 48 senior credit points of ICLS at Senior level, of which at least 36 senior credit points should be from ICLS Units including exchange units, and 12 may be from cross-listed Units from the School of Languages and Cultures or the Department of English. A reading knowledge of one language other than English is also required. Students not meeting these criteria may apply for special permission from the Director of ICLS. Special transitional entry arrangements will be made for students undertaking Honours in 2009 or 2010. **Assessment:** Seminar presentations; bibliographic project; essays; 12000-15000 word thesis. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Adv)(Hons), B A (Hons).

Honours students will take two core ICLS seminars:

Literary Comparison: History and Methods (semester 1)

Comparative Studies and Literary Debates (semester 2)

A third seminar is to be chosen from a list of literature and culture seminars offered within SLC: contact the Program Director for details. Special permission may be sought to enrol in a third seminar not on this list but offered within the Faculty of Arts and relevant to the student's thesis topic. The Honours thesis will normally be jointly supervised by two members of the ICLS teaching team.

## IMMU2101

### Introductory Immunology Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Scott Byrne **Session:** Semester 1 **Classes:** Two 1 hour lectures per week, one 3 hour tutorial or practical or independent study per week. **Prerequisites:** 24 credit points of Junior units of study from any of the Science discipline areas. **Prohibitions:** IMMU2001, BMED2506, BMED2807 **Assumed knowledge:** Junior Biology and Junior Chemistry. **Assessment:** One 2 hour examination (60%), one 2000 word essay (20%), online quizzes and tutorial group presentation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This is a prerequisite unit of study for IMMU3102 and IMMU3202. The completion of 6 credit points of MBLG units of study is highly recommended.*

**Associated degrees:** B Sc, B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit of study will provide an overview of the human immune system and essential features of immune responses. The lecture

course begins with a study of immunology as a basic research science. This includes the nature of the cells and molecules that recognise antigens and how these cells respond at the cellular and molecular levels. Practical/tutorial sessions will illustrate particular concepts introduced in the lecture program. Further lectures and self-directed learning sessions will integrate this fundamental information into studies of mechanisms of host defence against infection, transplantation, and dysfunction of the immune system including allergy, immunodeficiency and autoimmune diseases.

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### IMMU3102

#### Molecular and Cellular Immunology Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Allison Abendroth **Session:** Semester 2 **Classes:** Three 1 hour lectures, one tutorial and one practical per fortnight. **Prerequisites:** BMED2807 or BMED2506 or IMMU2101 or IMMU2001 and 6cp of Intermediate units of study from Biochemistry or Biology or Microbiology or Molecular Biology and Genetics or Pharmacology or Physiology. **Prohibitions:** IMMU3002, BMED3003 **Assumed knowledge:** Intermediate biochemistry and molecular biology and genetics. **Assessment:** Formal examination: 60% one 2 hour exam. Progressive assessment: 40% includes practical assessment (lab quizzes/practical assignment), 2000word essay, tutorial presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6 CP of MBLG units of study is highly recommended. Concurrent study of IMMU3202 Immunology in Human Disease is strongly recommended.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This study unit builds on the series of lectures that outlined the general properties of the immune system, effector lymphocytes and their functions, delivered in the core courses, IMMU2101 - Introductory Immunology and BMED2807 -Microbes & Body Defences (formerly IMMU2001 and BMED2506). In this unit the molecular and cellular aspects of the immune system are investigated in detail. We emphasise fundamental concepts to provide a scientific basis for studies of the coordinated and regulated immune responses that lead to elimination of infectious organisms. Guest lectures from research scientists eminent in particular branches of immunological research are a special feature of the course. These provide challenging information from the forefront of research that will enable the student to become aware of the many components that come under the broad heading 'Immunology'. Three lectures (1 hour each) will be given each fortnight: 2 lectures in one week and one lecture the following week, for the duration of the course. This unit directly complements the unit "Immunology in human disease IMMU3202" and students are strongly advised to undertake these study units concurrently.

#### Textbooks

Abbas, AK, Lichtman, AH, Cellular and Molecular Immunology 5th edition 2003. WB Saunders Company and/or Janeway, CA, Travers, P, Walport, M and Shlomchik, M. Immunobiology -the immune system in health and disease 6th edition. Garland Press. 2005.

### IMMU3202

#### Immunology in Human Disease Medicine

**Credit points:** 6 **Teacher/Coordinator:** Dr Allison Abendroth **Session:** Semester 2 **Classes:** Three 1 hour lectures, one tutorial and one practical per fortnight. **Prerequisites:** BMED2807 or BMED2506 or IMMU2101 or IMMU2001 and 6cp of Intermediate units of study from Biochemistry, or Biology or Microbiology or Molecular Biology and Genetics or Pharmacology or Physiology. **Prohibitions:** IMMU3002, BMED3003 **Assumed knowledge:** Intermediate biochemistry and molecular biology and genetics. **Assessment:** Progressive assessment: 40% includes practical assignment, portfolio of case studies, poster presentation, tutorial presentation. Formal examination: 60% one 2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of 6CP of MBLG units of study is highly recommended. Concurrent study of IMMU3102 Molecular and Cellular Immunology is very strongly recommended.*

**Associated degrees:** B Med Sc, B Sc, UG Study Abroad Program.

This study unit builds on the series of lectures that outlined the general properties of the immune system, effector lymphocytes and their functions, delivered in the core courses, IMMU2101 - Introductory Immunology and BMED2807 - Microbes & Body Defences (formerly IMMU2001 and BMED2506). We emphasise fundamental concepts to provide a scientific basis for studies in clinical immunology; dysfunctions of the immune system e.g. autoimmune disease, immunodeficiencies, and allergy, and immunity in terms of host - pathogen interactions. This unit has a strong focus on significant clinical problems in immunology and the scientific background to these problems. The unit includes lectures from research scientists and clinicians covering areas such as allergy, immunodeficiency, autoimmune disease and transplantation. This course provides challenging information from the forefront of clinical immunology and helps the student develop an understanding of immune responses in human health and disease. Three lectures (1 hour each) will be given each fortnight: 2 lectures in one week and one lecture the following week, for the duration of the course. This unit directly complements the unit "Molecular and Cellular Immunology" and students are very strongly advised to undertake these study units concurrently.

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### IMMU3552 Immunology Exchange Medicine

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### IMMU4011 Immunology Honours A Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prohibitions:** BMED4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Liberal Stud (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

Students enrolled in the Honours program study various advanced aspects of Immunology. The program may include lectures, tutorials, seminars and practicals. Students will undertake a research project. Assessment will include the project and may include examinations and classwork.

### IMMU4012 Immunology Honours B Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** IMMU4011 **Prohibitions:** BMED4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Liberal Stud (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

See IMMU4011 for information.

### IMMU4013 Immunology Honours C Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** IMMU4012 **Prohibitions:** BMED4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Liberal Stud (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

See IMMU4011 for information.

### IMMU4014 Immunology Honours D Medicine

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** IMMU4013 **Prohibitions:** BMED4014 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Liberal Stud (Hons), B Med Sc (Hons), B S T (Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

See IMMU4011 for information.

### INFD3012 Infectious Diseases

### Medicine

**Credit points:** 6 **Teacher/Coordinator:** A/Prof. Colin Harbour **Session:** Semester 2 **Classes:** One 1 hour lecture and one 1 hour tutorial and one 2 hour practical and one 2 hour case study or theme session a week. **Prerequisites:** 42 credit points of intermediate BMED units including BMED2807. **Assumed knowledge:** Intermediate microbiology, immunology, molecular biology and genetics. **Assessment:** Formal examination: one 2 hour exam, 60% Progressive assessment: includes: 2000w essay, tutorial case presentation, poster presentation, 40%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The completion of MICR3011 is strongly recommended prior to undertaking this course.*

**Associated degrees:** B Med Sc, UG Study Abroad Program.

Infectious diseases occur as a result of interactions between a host and a microbial parasite. This unit of study will explain how infectious agents interact with human hosts at the molecular, cellular, individual patient and community levels to cause diseases and how the hosts attempt to combat these infections. The unit will be taught by the discipline of Infectious Diseases and Immunology of the Department of Medicine within the Central Clinical School, Faculty of Medicine with involvement of associated clinical and research experts who will contribute lectures and theme sessions on their own special interests. The primary learning vehicle in this unit will be the case study involving three or four cases per week on the diseases theme of the week, e.g. Pneumonia in week 1, wound infections in week 2 etc. Students are strongly recommended to complete MICR3011 before enrolling in this unit.

*Textbooks*

Medical Microbiology. Edited by Cedric Mims et al. Mosby, 2004. ISBN 07234-3260-0

### INFD4011 Infectious Diseases Honours A Medicine

**Credit points:** 12 **Session:** Semester 1 **Prohibitions:** BMED4021 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc (Hons).

Students enrolled in the Honours program study various advanced aspects of Infectious Diseases. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

### INFD4012 Infectious Diseases Honours B Medicine

**Credit points:** 12 **Session:** Semester 1 **Corequisites:** INFD4011 **Prohibitions:** BMED4022 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons).

Students enrolled in the Honours programs study various advanced aspects of Infectious Diseases. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

### INFD4013 Infectious Diseases Honours C Medicine

**Credit points:** 12 **Session:** Semester 2 **Corequisites:** INFD4012 **Prohibitions:** BMED4023 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons).

Students enrolled in the Honours programs study various advanced aspects of Infectious Diseases. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

**INFD4014****Infectious Diseases Honours D  
Medicine**

**Credit points:** 12 **Session:** Semester 2 **Corequisites:** INFD4013  
**Prohibitions:** BMED4024 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Med Sc (Hons).

Students enrolled in the Honours programs study various advanced aspects of Infectious Diseases. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

**INFO1003****Foundations of Information Technology  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** (Lec 2 hrs & Prac 3hrs) per week **Prohibitions:** INFO (1903 or 1000) or INFS1000  
**Assessment:** In-course involvement, assignments, quizzes and written exam.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B S T, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit prepares students from any academic discipline to develop the necessary knowledge, skills and abilities to be competent in the use of information technology for solving a variety of problems. The main focus of this unit is on modelling and problem solving through the effective use of IT. Students will learn how to navigate independently to solve their problems on their own, and to be capable of fully applying the power of IT tools in the service of their goals in their own domains while not losing sight of the fundamental concepts of computing.

Students are taught core skills related to general purpose computing involving a range of software tools such as spreadsheets, database management systems, internet search engines, HTML, and JavaScript. Students will undertake practical tasks including authoring an interactive website using HTML and JavaScript and building a small scale application for managing information. In addition, the course will address the many social, ethical, and intellectual property issues arising from the wide-spread use of information technology in our society.

**INFO1103****Introduction to Programming  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** (Lec 2hrs & Prac 3hrs) per week **Prohibitions:** INFO1903 or SOFT (1001 or 1901) or COMP (1001 or 1901) or DECO2011 **Assumed knowledge:** HSC Mathematics  
**Assessment:** In-course involvement, assignments, quizzes and written exam  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc, B Sc (Bioinformatics).

This unit provides an introduction to programming using Java. The main aims are (i) to develop basic programming skills and (ii) learn how to express algorithms using computer programming and develop basic algorithmic problem solving skills.

**INFO1105****Data Structures  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 3hrs) per week **Prohibitions:** INFO1905 or SOFT (1002 or 1902) or COMP (1002 or 1902 or 2160 or 2860 or 2111 or 2811 or 2002 or 2902) **Assumed knowledge:** Programming, as for INFO1103 **Assessment:** In-course involvement, assignments, quizzes and written exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

The unit will teach some powerful ideas that are central to quality software: data abstraction and recursion. It will also show how one can analyse the scalability of algorithms using mathematical tools of asymptotic notation. Contents include: both external "interface" view,

and internal "implementation" details, for commonly used data structures, including lists, stacks, queues, priority queues, search trees, hash tables, and graphs; asymptotic analysis of algorithm scalability, including use of recurrence relations to analyse recursive code. This unit covers the way information is represented in each structure, algorithms for manipulating the structure, and analysis of asymptotic complexity of the operations. Outcomes include: ability to write code that recursively performs an operation on a data structure; experience designing an algorithmic solution to a problem using appropriate data structures, coding the solution, and analysing its complexity.

**INFO1551****Information Technology Exchange  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc, B S T, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This Unit of Study is for University of Sydney students in the Exchange program studying at an overseas university.

**INFO1903****Informatics (Advanced)  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 3hrs & Prac 3hrs) per week **Prerequisites:** UAI sufficient to enter BCST(Adv), BIT or BSc(Adv), or portfolio of work suitable for entry **Prohibitions:** INFO1003, INFO1103 **Assumed knowledge:** HSC Mathematics **Assessment:** In-course involvement, assignments, quizzes, lab exam and written exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B E, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition).

This unit covers advanced data processing and management, integrating the use of existing productivity software, e.g. spreadsheets and databases, with the development of custom software using the powerful general-purpose Python scripting language. It will focus on skills directly applicable to research in any quantitative domain. The unit will also cover presentation of data through written publications and dynamically generated web pages, visual representations and oral presentation skills. The assessment, a long project, involves the demonstration of these skills and techniques for processing and presenting data in a choice of domains.

**Textbooks**

Given the diversity of the material, the main resource for INFO1903 will be the course notes, which will be made available through the University Copy Centre. Additional suggested readings:  
 M. Lutz and D. Ascher. Learning Python, 2nd Ed., O'Reilly, 2003. ISBN 0-596-00281-5

**INFO1905****Data Structures (Advanced)  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 3hrs) per week **Prerequisites:** Distinction-level performance in INFO1103 or INFO1903 or SOFT1001 or SOFT1901. **Prohibitions:** INFO1105 or SOFT (1002 or 1902) or COMP (1002 or 1902) **Assessment:** In-course involvement, assignments, quizzes and written exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

An advanced alternative to INFO1105; covers material at an advanced and challenging level. See the description of INFO1105 for more information.

**INFO2110****Systems Analysis and Modelling  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** INFO (2810 or 2000 or 2900) **Assumed knowledge:** Experience with a data model as in INFO1003 or INFO1103 or INFS1000

**Assessment:** In-course involvement, assignments, quizzes and written exam.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Des Comp, B E, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit provides a comprehensive introduction to the analysis of complex systems. Key topics are the determination and expression of system requirements (both functional and non-functional), and the representation of structural and behavioural models of the system in UML notations. Students will be expected to evaluate requirements documents and models as well as producing them. This unit covers essential topics from the ACM/IEEE SE2004 curriculum, especially from MAA Software Modelling and Analysis.

## INFO2120

### Database Systems 1

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** INFO (2820 or 2005 or 2905) **Assumed knowledge:** Some exposure to programming and some familiarity with data model concepts such as taught in INFO1103 or INFO1003 or INFS1000 or INFO1903 **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Des Comp, B E, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

The proper management of data is essential for all data-centric applications and for effective decision making within organizations. This unit of study will introduce the basic concepts of database designs at the conceptual, logical and physical levels. Particular emphasis will be placed on introducing integrity constraints and the concept of data normalization which prevents data from being corrupted or duplicated in different parts of the database. This in turn helps in the data remaining consistent during its lifetime. Once a database design is in place, the emphasis shifts towards querying the data in order to extract useful information. The unit will introduce different query languages with a particular emphasis on SQL, which is industry standard. Other topics covered will include the important concept of transaction management, application development with a backend database, an overview of data warehousing and online analytic processing, and the use of XML as a data integration language.

## INFO2315

### Introduction to IT Security

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** NETS (3305 or 3605 or 3016 or 3916) or ELEC (5610 or 5616) **Assumed knowledge:** Computer literacy **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

This unit provides a broad introduction to the field of IT security. We examine secure and insecure programs, secure and insecure information, secure and insecure computers, and secure and insecure network infrastructure. Key content includes the main threats to security; how to analyse risks; the role in reducing risk that can be played by technical tools (such as encryption, signatures, access control, firewalls, etc); the limitations of technical defences; and the simple process and behavioural changes that can reduce risk.

## INFO2551

### Information Technology Exchange

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc, B S T, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This Unit of Study is for University of Sydney students in the Exchange program studying at an overseas university.

## INFO2552

### Information Technology Exchange

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B Med Sc, B S T, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This Unit of Study is for University of Sydney students in the Exchange program studying at an overseas university.

## INFO2820

### Database Systems 1 (Advanced)

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prerequisites:** Distinction-level result in INFO (1003 or 1103 or 1903 or 1105 or 1905) or SOFT (1001 or 1901 or 1002 or 1902) **Prohibitions:** INFO (2120 or 2005 or 2905) **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Des Comp, B E, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

An advanced alternative to INFO2120; covers material at an advanced and challenging level. See the description of INFO2120 for more information.

## INFO3220

### Object Oriented Design

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs & Prac 2 hrs) per week **Prohibitions:** SOFT (3301 or 3601 or 3101 or 3801) or COMP (3008 or 3908) **Assumed knowledge:** INFO2110, INFO1105 **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

This unit covers essential design methods and language mechanisms for successful object-oriented design and programming. C++ is used as the implementation language and a special emphasis is placed on those features of C++ that are important for solving real-world problems. Advanced software engineering features, including exceptions and name spaces are thoroughly covered.

## INFO3315

### Human-Computer Interaction

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** MULT (3307 or 3607 or 3018 or 3918) or SOFT (3102 or 3802) or COMP (3102 or 3802) **Assumed knowledge:** INFO2110 **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B Sc.

This unit will introduce techniques to evaluate software user interfaces using heuristic evaluation and user observation techniques. Students will (i) learn how to design formal experiments to evaluate usability hypothesis and (ii) apply user centered design and usability engineering principles to design software user interfaces. A brief introduction to the psychological aspects of human-computer interaction will be provided.

## INFO3402

### Management of IT Projects and Systems

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** ISYS (3000 or 3012) or ELEC3606 **Assumed knowledge:** INFO (2000 or 2110 or 2810 or 2900) **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This course introduces the basic processes and techniques for managing IT projects, systems and services, throughout the IT lifecycle. It addresses both the technical and behavioural aspects of IT management at the enterprise level. Major topics include: organisational strategy and IT alignment, IT planning, project planning, tracking, resource estimation, team management, software testing, delivery and support of IT services, service level agreements, change and problem management, cost effectiveness and quality assurance.

#### Database Systems 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs & Prac 2hrs) per week **Prohibitions:** INFO (3504 or 3005 or 3905) or COMP (3005 or 3905) **Assumed knowledge:** Introductory database study such as INFO2120 or INFO2820 or INFO2005 or INFO2905. Students are expected to be familiar with SQL and the relational data model, and to have some programming experience. **Assessment:** In-course involvement, assignments, quizzes and written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit of study provides a comprehensive overview of the internal mechanisms of Database Management Systems (DBMS) and other systems that manage large data collections. These skills are needed for successful performance tuning, to understand the scalability challenges faced by the information age. Topics include: the internal components of a DBMS engine, physical data organization and disk-based index structures, query processing and optimisation, locking and logging, database tuning, distributed and replicated databases, web search engines, and indices and processing when doing information retrieval from textual data. This unit will be valuable to those pursuing such careers as Software Engineers, Database Experts, Database Administrators, Web Developers and e-Business Consultants.

### INFO3600

#### Major Development Project (Advanced)

##### Engineering and Information Technologies

**Credit points:** 12 **Session:** Semester 2 **Prerequisites:** INFO3402 **Prohibitions:** COMP3615 or ISYS3400 or SOFT (3300 or 3600 or 3200 or 3700) **Assessment:** Individual presentation, oral examination and group report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Only available to students in BIT, BCST(Adv) or BSc(Adv)*

**Associated degrees:** B I T.

This unit will provide students an opportunity to carry out substantial aspects of a significant software development project. The project will be directed towards assisting a client group (from industry or with strong industry links). The student's contribution could cover one or more aspects such as requirements capture, system design, implementation, change management, upgrades, operation, and/or tuning. Assessment will be based on the quality of the delivered outputs, the effectiveness of the process followed, and the understanding of the way the work fits into the client's goals, as shown in a written report.

### INFO4991

#### IT Research Thesis A

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 12 hours per week research work (including interaction with supervisor and research group). **Prerequisites:** Enrolment in Honours (BCST or BIT) **Corequisites:** INFO4990 and INFO4992 **Assessment:** Research thesis **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B C S T (Hons), B I T (Hons), B Sc (Hons).

Together with INFO4992, this unit covers the research and writing of the student's Honours thesis.

### INFO4992

#### IT Research Thesis B

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 24 hours per week research work (including interaction with supervisor and research group). **Prerequisites:** Enrolment in Honours (BCST or BIT) **Corequisites:** INFO4990 and INFO4991 **Assessment:** Research thesis **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B C S T (Hons), B I T (Hons), B Sc (Hons).

Together with INFO4991, this unit covers the research and writing of the student's Honours thesis.

### INFO4999

#### Computer Science Honours Result

##### Engineering and Information Technologies

**Session:** Semester 1, Semester 2 **Prerequisites:** Permission of the Head of Department **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B C S T (Hons), B Sc (Bioinformatics)(Hons), B Sc (Hons). All SIT Honours students must enrol in this non assessable unit of study in their final semester.

### INFS1000

#### Business Information Systems Foundations Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3hrs per week **Prohibitions:** ISYS1003, INFO1000, INFO1003 **Assessment:** Class Tests; Problem-based Group project; **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A S, B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program, UG Summer/Winter School.

The Information Age, with its focus on information as a key business resource, has changed the way Business Information Systems (BIS) are viewed in organisations. In previous years, people approached BIS primarily as a tool to increase efficiency, either by cutting costs, time or energy spent. In the information age, however, the role of BIS is different. It is an enabler of innovation and a tool for getting the right information into the hands of the right people at the right time. This unit is designed to develop your understanding of how businesses operate and shows how business information systems support business operations and management. You will be provided with an introduction to BIS theories, frameworks and models to assist in understanding the nature and contribution of BIS in a range of organisational contexts including private, public and not for profit. Your learning experience will be based on the state-of-the-art educational models of Team-Based Learning, Problem-based Learning and the Reflective BIS Practice.

### INFS1551

#### Business Information Systems Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 2hr lecture and 1hr tutorial per week **Prerequisites:** (INFS1000 or INFO1000 or INFO1003 or ISYS1003) **Prohibitions:** ACCT2003, INFS2000 **Assessment:** In Class Test; Group project; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, UG Study Abroad Program.

This unit is designed to help you understand the firm's information environment and how it contributes to the attainment of business objectives from an end-to-end system perspective. It will raise your awareness of managers' professional responsibilities for the design, implementation, operation and control of business information system applications - primarily relating to the conduct of accounting related transactions. You will learn how to integrate both accounting and non-accounting functions to support the information needs of all users in a modern organization, how to mitigate risks and put appropriate controls in place. You will gain knowledge of approaches and methodologies used in structured design, including data modelling and process mapping, systems development or procurement and implementation.

### INFS2010

#### Managing Information & Knowledge Assets Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hrs per week **Prerequisites:** INFS1000 or INFO1000 or INFO1003 or INFO1903 or ISYS1003 **Prohibitions:** INFS3015 **Assumed knowledge:** INFS2001 **Assessment:** Individual project; Case study; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, UG Study Abroad Program.

Organisations and individuals are often overwhelmed by the amount and diversity of digital information they need (or are required by law) to manage and maintain. This unit introduces you to the concepts of information, content and knowledge management and the systems that enable the acquisition, storage and distribution of business information, an understanding of which is crucial for your role as a future business manager. Adopting a sociotechnical systems design approach, you will develop your understanding of the theory and practical skills required to effectively design and deliver Web content to different kinds of users in a variety of formats. Specific emphasis is placed on the design of usable, scalable, standards-based Web information resources.

### INFS2020

#### Business Process Integration & Modelling Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3hrs per week **Prerequisites:** INFS1000 or INFO1000 or INFO1003 or INFO1903 or ISYS1003 **Prohibitions:** INFS2005 **Assumed knowledge:** INFS2001 **Assessment:** Mid Semester Exam; Group Assignment; Individual Assignment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, UG Study Abroad Program.

This unit provides an overview of business process analysis, design and integration from the management perspective in the context of integrated information systems and inter-enterprise integration models. It will equip you with high level skills and knowledge required to carry out analysis and redesign of business processes facilitating efficient convergence of technology and business. Building on the basic knowledge of business information systems and transactional processing cycles developed from other units, this unit will provide you with a higher level process modelling, analysis and optimisation skills necessary in process-centred organizations. This unit views the functioning of business from a holistic and integrated perspective rather than from a simple functional perspective.

### INFS2030

#### e-Commerce Business Models Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week **Prerequisites:** INFS1000 or INFO1000 or INFO1003 or INFO1903 or ISYS1003 **Prohibitions:** ACCT3006, INFS3020 **Assessment:** Group Presentation; Individuation project; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, UG Study Abroad Program.

This unit will provide you with a detailed overview of the concepts and processes used in doing business electronically in the new digital economy and e-business era. These concepts and tools will enable you to analyse, evaluate, synthesise and implement e-commerce business models. Importantly, this unit will provide the critical link between technologies and the firm's performance and takes a business management perspective in teaching and learning. The emphasis is on the way technologies enable the business and its effective management, rather than the technologies.

### INFS2551

#### Business Information Systems Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T.

### INFS2552

#### Business Information Systems Exchange

**Economics and Business**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T.

**INFS3030****BIS Assurance and Control****Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week **Prerequisites:** INFS1000 or INFO1000 or INFO1003 or INFO1903 or ISYS1003 **Prohibitions:** INFS3010 **Assumed knowledge:** INFS2001, INFS2010, INFS2020 **Assessment:** Individual project, Group project and Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, UG Study Abroad Program.

This unit will introduce you to concepts, tools and techniques that will assist you in identifying, managing and providing assurance with respect to key risk and critical control areas in the acquisition, implementation and operation of information systems. In examining different stages of the information system lifecycle, you will learn about: relevant legal, professional and technical requirements in different contexts; how the application of appropriate risk management and control frameworks may serve to identify and mitigate potential risk areas; and audit standards and approaches that provide assurance as to the effectiveness of processes and controls. The unit takes a multidisciplinary focus examining ways in which accountants, information system auditors, IT and business managers bridge the gaps between business risks, control needs and technical issues. The theoretical and conceptual material covered in lectures is reinforced through practical demonstrations and case study analysis.

**INFS3040****Enterprise Systems****Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3hrs per week **Prerequisites:** INFS1000 or INFO1000 or INFO1003 or INFO1903 or ISYS1003 **Prohibitions:** INFS3005 **Assumed knowledge:** INFS2001 and INFS2020 **Assessment:** Online Case Study; Group project; Mid-semester examination; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, UG Study Abroad Program.

This unit will provide you with an overview of enterprise-wide computing and integrated enterprise systems concepts with the help of packaged software solutions. You will become familiar with Enterprise Resource Planning (ERP), be exposed to the functionality of enterprise-wide systems such as SAP and develop a high level understanding of its underlying business processes and their method of integration. The unit will equip you with a thorough understanding of the process flows in procurement, production management, customer order management, customer service and financial accounting and controlling through detailed exploration of the SAP system software. The integrative capabilities of enterprise system software, and its potential benefits and limitations to businesses, are highlighted throughout.

**INFS3050****Supporting Business Intelligence****Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3hrs per week **Prerequisites:** INFS1000 or INFO1000 or INFO1003 or INFO1903 or ISYS1003 **Assumed knowledge:** INFS2010 or equivalent **Assessment:** Mid-semester examination; Tutorial work; Quiz Individual project; Final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Agr Ec, B Com, B Com, LL B, B E, B Com, B Sc, B Com, UG Study Abroad Program.

Many organisations are flooded with data and information that come from traditional transaction processing systems as well as external sources. A common challenge is to make sense of this data - to convert this data into intelligence and an understanding of its meaning

and message for the organisation. In this unit you will examine the contribution of business intelligence tools and systems and their link with enterprise-wide, business performance management. Issues are explored from the business rather than the technology perspective. A common commercial software platform will be used to demonstrate the role of systems in business intelligence.

**INFS3060****Managing BIS Projects****Economics and Business**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3 hrs per week **Prerequisites:** 12 credit points in INFS units of study **Prohibitions:** INFS3000 **Assessment:** Group Project; Individual Project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Agr Ec, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B Sc, B Com, UG Study Abroad Program.

This unit is intended to consolidate your knowledge and skills with regard to the application of Information Systems in both public and private sector contexts. The unit serves as a Business Information Systems (BIS) capstone and is structured around a semester long project designed to allow you to demonstrate your ability to apply and synthesise BIS concepts in a real world setting. You will consider information systems from a number of perspectives including, but not limited to, their contribution to the strategic objectives of an organisation and the requirements for successful design, implementation and operation. The unit will require you to develop and apply your understanding of Information Systems from both social and technical perspectives.

**INFS3080****Business Information Systems Project****Economics and Business**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 3hrs per week **Prerequisites:** Department permission and at least 48 credit points **Assessment:** Project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T.

Students complete a project in Business Information Systems.

**INFS3551****Business Information Systems Exchange****Economics and Business**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T.

## Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T.

## INFS3555

### Business Information Systems Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T.

## INFS4101

### Business Information Systems Honours A Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Major in Business Information Systems with a Credit average overall and a Distinction average for second and third year units in Business Information Systems. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Requirements for the Pass degree must be completed before entry to 4000 level honours units of study.*

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

This unit is part of the Honours in Business Information Systems. The unit is intended to ensure that students have a sound grounding in research philosophy as is relevant to Business Information Systems. The unit is designed to develop a foundation for developing your knowledge and skills as researchers throughout the Honours year. While the core will remain constant the focus of this unit may vary given the research requirements and interests of the students taking the unit.

## INFS4102

### Business Information Systems Honours B Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Major in Business Information Systems with a Credit average overall and a Distinction average for second and third year units in Business Information Systems. **Corequisites:** INFS4101 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

This unit will ensure that you have a solid understanding of contemporary issues in BIS. You will analyse critical industry issues and evaluate the theoretical contributions that are available to address these issues. You will have the opportunity to explore your own research interests and issues of concern to theory and practice.

## INFS4103

### Business Information Systems Honours C Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Major in Business Information Systems with a Credit average overall and a Distinction average for second and third year units in Business Information Systems. **Corequisites:** INFS4102 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

This unit will ensure that you have a solid grounding in research methods of particular concern to BIS. You will develop skills required for data collection, analysis and presentation as well as for the preparation and presentation of a BIS thesis. The knowledge you will acquire complements the Research Philosophy knowledge and skills acquired in BIS Honours A. You will have the opportunity to explore your own research interests.

## INFS4104

### Business Information Systems Honours D Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Major in Business Information Systems with a Credit average overall and a Distinction average for second and third year units in Business Information Systems. **Corequisites:** INFS4103 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Com (Liberal Studies)(Hons), B Ec (Hons), B Ec (Soc Sc)(Hons).

This unit will ensure that you have a solid grounding in the management of BIS at a strategic level. It will help you develop an understanding of strategic BIS planning, implementation and evaluation at organisational and inter-organisational levels. You will explore the potential impact of BIS in industry transformation. The unit provides you with opportunities to explore your own research interests.

## INFS9001

### Business Information Systems Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

## INFS9002

### Business Information Systems Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

## INFS9003

### Business Information Systems Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

## INFS9004

### Business Information Systems Extension Economics and Business

**Credit points:** 2 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

## INGS1001

### Power and Money in Global Society Arts

**Credit points:** 6 **Teacher/Coordinator:** Associate Professor Dick Bryan **Session:** Semester 1 **Classes:** 3 hrs per week (2 lectures, 1 tutorial) **Assessment:** Essay (1500 words), research report (1000 words), 1.5 hour exam (1500 words equiv), tutorial presentation (500 words equivalent) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: This unit is available only to students in the Bachelor of International and Global Studies*

**Associated degrees:** B G S, B I G S, B I G S, LL B, B Int S, B Int S, LL B.

Making sense of a rapidly-changing economic and political world is a challenging agenda. This unit introduces a range of approaches to understand global economic and political integration and shifting power. In particular, the unit focuses on how the roles of nation states, international organizations and globalizing markets are changing, and

the way conflicts that arise with these changes are being and might be addressed.

### INGS1002

#### Global Culture and Society

##### Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs per week (2 lectures, 1 tutorial) **Prohibitions:** GBST1001 **Assessment:** Mid term long answer questions (1500 words), essay (2500 words), tutorial presentation (500 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available only to students in the Bachelor of International and Global Studies*

**Associated degrees:** B G S, B I G S, B I G S, LL B, B Int S, B Int S, LL B.

This inter-disciplinary unit will develop students' understanding of themes in and approaches to Global Studies. It will introduce students to conceptual frameworks of 'the global' and identify the core perspectives used by anthropology and sociology to analyse issues such as: the emergence of global economic, political, cultural and social processes; population movements; national, international, and global identities; diasporas and diasporic cultures; colonialism, post-colonialism and self-determination movements; discourses of international law, human rights and cosmopolitanism, appreciating the politics of the intercultural.

### INMS1101

#### Indonesian 1A

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michele Ford **Session:** Semester 1 **Classes:** 4 hours per week **Prohibitions:** Native or near native speakers of Indonesian or Malay, HSC Continuers, or Extension Indonesian or Beginners Indonesian with 75% or above or equivalent **Assessment:** Short assignments (500 words equivalent), in-class tests (2000 words equivalent), oral assessments (1500 words equivalent), in-class participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

First year Indonesian is designed to give beginning students a solid basis from which to continue Indonesian Studies at higher levels. It combines 3 hours per week of intensive Indonesian language instruction and private language study with a series of English-language lectures that introduces students to Indonesian culture and society.

#### Textbooks

Materials may be purchased from the University Copy Centre.

### INMS1102

#### Indonesian 1B

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michele Ford **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** INMS1101 **Prohibitions:** INMS1301, INMS1302 **Assessment:** Short assignments (500 words equivalent), in-class tests (2000 words equivalent), oral assessments (1500 words equivalent), in-class participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

Indonesian 1B is designed to further build students' understanding of the language in preparation for the study of Indonesian at higher levels. It combines 3 hours per week of intensive Indonesian language instruction and private language study with a series of English-language lectures that extends students' knowledge of Indonesian culture and society.

#### Textbooks

Materials may be purchased from the University Copy Centre.

### INMS2601

#### Indonesian 2A

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Michele Ford **Session:** Semester 1 **Classes:** 4 hours per week **Prerequisites:** INMS1102 or HSC Continuers or Extension Indonesian or HSC Beginners Indonesian 75% and above or department permission **Prohibitions:** 8 credit point units of study numbered INMS2101 or above **Assessment:** In-class tests (2000 words equivalent), oral assessments (1500 words equivalent), assignment (500 words), in-class participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit emphasises practice in the spoken form of standard Indonesian, along with development of reading and writing skills. Reading of texts related to modern Indonesian society will develop students' understanding of the social and cultural contexts in which Indonesian is used.

#### Textbooks

Materials may be purchased from the University Copy Centre.

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

Students enrolled in this unit will complete an approved program of study at a tertiary institution in Indonesia, normally through the Australian Consortium for In-Country Indonesian Studies (ACICIS). Students can earn 6 credit points for every three semester credits (sks) successfully completed at an Indonesian tertiary institution, to a maximum of 24 credit points in any one semester. Credit may also be awarded pro rata when a student has successfully completed a summer (or equivalent) in-country Indonesian-language program. Intending students must consult the Indonesian Studies Coordinator prior to undertaking any in-country program for which credit will be sought.

**INMS4011****Indonesian and Malay Studies Honours A****Arts**

**Credit points:** 12 **Teacher/Coordinator:** Dr Michele Ford **Session:** Semester 1, Semester 2 **Classes:** 3 hours per week research seminar in Semester 1 and 3 hours per week advanced level study in Semester 1 or 2 **Assessment:** Extended assessment items (50%), 20000 word honours thesis (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

**Indonesian honours research seminar**

This seminar addresses contemporary approaches to the study of modern Indonesia. Classes are conducted in Indonesian to give students the opportunity to develop advanced reading, writing, listening and speaking skills. Students will be given an opportunity to research particular areas of interest related to their thesis project.

**Advanced level study**

In consultation with the honours coordinator, students will select one advanced unit of study which complements their honours thesis research. Students will complete an extended assessment item on an Indonesia-related topic.

**Indonesian honours thesis**

The thesis will be based on independent research under the supervision of a member of staff and will be evaluated according to the level of achievement in the following areas: (1) overall command of the secondary literature in English and Indonesian and demonstration of the ability to use this material to construct an original analysis of primary material in Indonesian; (2) command and analytic use of a relevant corpus of primary Indonesian language material; (3) command of a particular disciplinary or interdisciplinary approach to the topic; (4) overall quality and originality of the essay.

#### ISYS3400

##### Information Systems Project

###### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Meeting with academic supervisor 1hr & Class meeting 1hr) per week **Prerequisites:** (INFO3402 or ISYS3012) and (ISYS3401 or ISYS3015) **Prohibitions:** INFO3600 or ISYS3207 **Assumed knowledge:** INFO2120 **Assessment:** Individual presentation, oral

examination, group report **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit will provide students an opportunity to apply the knowledge and practise the skills acquired in the prerequisite and qualifying units, in the context of a substantial information systems research or development project and to experience in a realistic way many aspects of analysing and solving information systems problems. Since information systems projects are often undertaken by small teams, the experience of working in a team is seen as an important feature of the unit. Students often find it difficult to work effectively with others and will benefit from the opportunity provided by this unit to further develop this skill.

#### Images of Contemporary Italy

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Giorgia Alù **Session:** Semester 1 **Classes:** One 2 hour seminar per week **Prerequisites:** ITLN1612, ITLN1632, ITLN1102, ITLN1202, ITLN1302, HSC Italian Continuers or Beginners, or equivalent language knowledge **Assessment:** Two essays (3500 words), take home assignment (1000 words), oral presentation (equivalent to 1500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Lang Stud, UG Study Abroad Program.

Students will be introduced to a selection of twentieth-century Italian written and visual 'texts' (in particular films), and to aspects of the political, social and cultural developments which constitute their context. The unit of study will use a combination of lecturing, student presentations and group discussions. Students will be encouraged to

develop a thorough critical understanding of the selected texts and a sound knowledge of and sensitivity towards the major social, political and cultural issues which have contributed to the identity of contemporary Italy.

### ITLN3671

#### Dante: Inferno Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** ITLN2611 or ITLN2631 **Prohibitions:** ITLN3701 **Assessment:** Class presentation and paper (1000 words), 2 class tests (2000 words), research paper (3000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is an introduction to Dante's major works, concentrating on the Divine Comedy: Inferno and an overview of Dante's life and times.

#### Textbooks

Dante, La Divina Commedia, Inferno, ed. N.Sapegno (La Nuova Italia) or an edition in Italian

### ITLN3679

#### Filming Fiction: The Italian Experience Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Paolo Bartoloni **Session:** Semester 2 **Classes:** 2 hours per week: 1 lecture and 1 tutorial **Prerequisites:** One of ITLN1612, ITLN1632, ITLN1102, ITLN1202, ITLN1302, HSC Italian Continuers or Beginners or equivalent language knowledge **Assessment:** Participation (5%), classwork (equivalent to 1500 words, 20%), essay 1 (2000 words, 35%), essay 2 (2500 words, 40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

An examination of the relationship between Italian cinema and fiction. Do they speak a common language? Do they employ comparable techniques? Who copies whom? This unit investigates these and other questions by analysing the adaptation of selected contemporary Italian novels into film.

#### Textbooks

Buzzati, Il deserto dei Tartari (Mondadori)  
Moravia, Il conformista (Bompiani)

### ITLN3684

#### Italian Sociolinguistics Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Antonia Rubino **Session:** Semester 2 **Classes:** 2 hours face to face, 1 hour online discussion and activities per week **Prerequisites:** ITLN1202, ITLN1302, ITLN1632, ITLN2612, ITLN2202 or equivalent language knowledge **Prohibitions:** ITLN3752 **Assessment:** Presentation (1000 words), class test (1000 words), final assignment (2500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit of study explores the great linguistic variation that characterises contemporary Italian. It focuses on the situational, social and geographic varieties of the Italian language, exploring their linguistic and extra-linguistic features.

#### Textbooks

Course pack available from University Copy Centre.

### ITLN3687

#### Focus on Writing in Italian Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Antonia Rubino **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** One of ITLN3631, ITLN3612, ITLN3301, ITLN3202 or equivalent language knowledge **Prohibitions:** ITLN3401 **Assessment:** 2 hour exam, written assignments and weekly homework (4000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is designed specifically for students with advanced knowledge of Italian. Students will analyse and produce written texts of varying text types and writing techniques. They will also focus on specific strategies for written communication.

#### Textbooks

Course pack available from University Copy Centre.

### ITLN3688

#### Advanced Italian: Translation Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Antonia Rubino **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** One of ITLN3612, ITLN3631, ITLN3202, ITLN3301 or equivalent language knowledge **Prohibitions:** ITLN3402 **Assessment:** Research task (1000 words), 10 weekly tasks (2000 words), presentation (1000 words), 2 hour exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

The unit is concerned with translating and interpreting from and into Italian, exploring modes, techniques and genres.

#### Textbooks

Texts available from department.

### ITLN3691

#### Italian Literature: 1200-1860 Arts

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** Credit in 12 credit points of Italian or 80% in HSC Italian Continuers **Prohibitions:** ITLN2902 **Assessment:** Two essays (1500 and 2500 words), class test (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program. It is also strongly recommended for intending Exchange students.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Through analysis of representative texts and exploration of their contexts, this honours/exchange preparation unit surveys major figures, works, schools and movements in Italian literary culture from the thirteenth to the nineteenth century.

#### Textbooks

Anthology of Authors from the Duecento to the Ottocento (from University Copy Centre)

### ITLN3693

#### Impatient Capital: 21st Century Italy Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Paolo Bartoloni **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** ITLN1632, ITLN1302, ITLN1202, ITLN2612, ITLN2202 or HSC Italian Continuers **Assessment:** Class presentation (equivalent to 1000-words), 2 essays (2500-words each). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

Several attempts have been made to describe the 21st century with regard to modalities of consumption and attendant aesthetic and ethical representations. The most enduring definitions revolve around the construction of capital as an organic entity, thus the label 'impatient capital'. How does the aesthetic and existential notion of 'impatience' shape contemporary life? This unit zeros in on contemporary Italy, providing a fresh look at Italian society through the analysis of a variety of texts: internet, literary and cinematic.

#### Textbooks

Course pack available from University Copy Centre.

### ITLN4011

#### Italian Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Antonia Rubino **Session:** Semester 1, Semester 2 **Classes:** 2 hours per week per semester for each unit of study **Prerequisites:** Students must have qualified for the award of the pass degree with a major in Italian (36 Senior credit points). They will have completed an additional 12 credit points, normally including the special entry unit ITLN3691. Intending Honours students should attain a Credit average result in senior Italian

units of study taken as a part of their major. **Assessment:** Classwork, assignments and essays (50%), 12000-15000 word thesis (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

The Italian IV Honours program consists of four semester-length units of study, chosen in consultation with the coordinators, and an extended essay. The thesis, 12000-15000 words, is on a topic chosen in consultation with the coordinators and a designated supervisor. Students meet regularly with their designated supervisor. Thesis proposals for Honours and Joint Honours should be submitted well in advance. Italian IV students are required to attend the departmental research seminars and to present a seminar paper on their thesis topic.

#### ITLN4012

##### Italian Honours B

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Antonia Rubino **Session:** Semester 1, Semester 2 **Corequisites:** ITLN4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

## JAZZ1000

### Big Band 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 x 3hr class **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study covers all aspects of professional and creative ensemble performance, including: reading, improvisation, dynamics, tone, intonation, articulation, swing, time-feel, style and ensemble interaction. Enrolment is subject to audition.

## JAZZ1001

### Big Band 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 x 3hr rehearsal **Prerequisites:** JAZZ1000 Big Band 1 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study covers all aspects of professional and creative ensemble performance, including: reading, improvisation, dynamics, tone, intonation, articulation, swing, time-feel, style and ensemble interaction. Enrolment is subject to audition.

## JAZZ1002

### Elective Jazz Orchestra 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2hr tut/wk **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study covers all aspects of professional and creative ensemble performance, including: reading, improvisation, dynamics, tone, intonation, articulation, swing, time-feel, style and ensemble interaction. Enrolment is subject to audition.

## JAZZ1003

### Elective Jazz Orchestra 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ1002 Elective Jazz Orchestra 1 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study covers all aspects of professional and creative ensemble performance, including: reading, improvisation, dynamics,

tone, intonation, articulation, swing, time-feel, style and ensemble interaction. Enrolment is subject to audition.

## JAZZ1006

### Jazz Improvisation 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1 **Classes:** 2hr tut/wk **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during weekly rehearsals (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: THIS UNIT IS NOT AVAILABLE FOR JAZZ PERFORMANCE MAJORS. Entry is by audition and subject to the availability of a place.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This 2 hour combo-sized class meets once per week and is taught by an expert improvisation coach. Concepts necessary for learning the skills of jazz improvisation such as swing, chord reading, scale choices, ear training, phrase construction, form, time and pitch control, repertoire and standard jazz nuances will be taught.

## JAZZ1007

### Jazz Improvisation 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ1006 Jazz Improvisation 1 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during weekly rehearsals (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: THIS UNIT IS NOT AVAILABLE TO JAZZ PERFORMANCE MAJORS. Entry is by audition and subject to the availability of a place.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This 2 hour combo-sized class meets once per week and is taught by an expert improvisation coach. Concepts necessary for learning the skills of jazz improvisation such as swing, chord reading, scale choices, ear training, phrase construction, form, time and pitch control, repertoire and standard jazz nuances will be taught.

## JAZZ1013

### Jazz Counterpoint 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1 **Classes:** 2hr tut/wk **Assessment:** Weekly assignments (70%), 2hr written exam (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit aims to help students develop a clear understanding of the basic principles of counterpoint and its relevant application to jazz performance, composition and arranging. Students may gain experience in applying the theoretical knowledge through performance in class. Students may be expected to bring their instruments to class. For further information contact Craig Scott, Jazz Studies. Non-Jazz major students must seek departmental approval.

## JAZZ1014

### Jazz Counterpoint 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2  
**Classes:** 2hr tut/wk **Prerequisites:** JAZZ1013 Jazz Counterpoint 1  
**Assessment:** Weekly assignments (70%), 2hr written exam (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Consolidation and development of concepts and skills introduced in Jazz Counterpoint 1. For further information contact Craig Scott (Jazz Studies).

## JAZZ1015

### Jazz Ear Training 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1  
**Classes:** 2hr tut/wk **Corequisites:** JAZZ1023 Jazz Performance 1  
**Assessment:** Two tests (20% each), one 2 hr examination (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit offers a systematic study of all simple intervals up to and including one octave, triadic harmony, four note chords in closed position and voice leading within these concepts, focusing on common harmonic movements that occur in the jazz repertoire. There will also be a systematic study of rhythm and form as an ear-training concept. This will be accomplished by taking rhythmic and melodic dictations and developing aural practice drills and routines. For further information contact M.McMahon (Jazz Studies).

## JAZZ1016

### Jazz Ear Training 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2  
**Classes:** 2hr tut/wk **Prerequisites:** JAZZ1015 Jazz Ear Training 1  
**Corequisites:** JAZZ1024 Jazz Performance 2 **Assessment:** Two tests (20% each), plus one 2 hour examination (60%) **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Non Jazz Majors will need to seek jazz unit approval from chair of unit prior to enrolling.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit consolidates and expands upon concepts and skills introduced in Jazz Ear Training 1, plus introducing compound intervals, open voicings, the addition of all upper extensions to all chord types, and increasingly complex harmonic structures. For further information contact C.Scott (Jazz Studies).

## JAZZ1019

### Jazz Harmony and Arranging 1

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** William Motzing **Session:** Semester 1  
**Classes:** 2hr lec/tut/wk **Corequisites:** JAZZ1023 Jazz Performance 1 or MCGY1009 Harmony and Analysis 2 **Assessment:** Written harmony test (50%), approved number of arrangements (50%) **Campus:** Camperdown/Darlington  
**Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Students will review clefs, key signatures, note values, dynamics, articulation, and learn copying and rehearsal techniques. In addition, instruction will include the ranges of and transpositions for the various instruments, chord symbols, scale-chord relationships, and rhythm section scoring. This unit deals with the study of the harmony of standard jazz repertoire. Students will learn to understand and use basic harmonic rules and the typical harmonic devices, diatonic progression and chord patterns which are learned with a view to generating a creative sense of jazz harmony and the ability to write

small combo arrangements. The students are assessed by examination and by submitting arrangements. Legibility in copying is an assessable aspect. The harmonic techniques explored in Jazz Harmony and Arranging 1 are used as the theoretical basis for Jazz Improvisation. For further information contact W. Motzing (Jazz Studies).

## JAZZ1020

### Jazz Harmony and Arranging 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** William Motzing **Session:** Semester 2  
**Classes:** 2hr lec/tut/wk **Prerequisites:** JAZZ1019 Jazz Harmony and Arranging 1 **Assessment:** Written harmony test (50%), approved number of arrangements (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In semester two, the voicing techniques for two to four horns stressing the most effective registers, harmonisation of passing tones, clusters and other techniques will be introduced. Composition of original melodies using motivic development, thematic structure and harmonisation will also be learned. The harmonic techniques explored in Jazz Harmony and Arranging 2 are used as the theoretical basis for Jazz Improvisation 2. The students are assessed by examination and by submitting arrangements for performance. Legibility in copying is an assessable aspect. Students will be organised into ensemble-like groups and may be expected to bring their instruments to perform the works presented. For further information contact W. Motzing (Jazz Studies).

## JAZZ1021

### Jazz History A

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Kevin Hunt **Session:** Semester 1  
**Classes:** 2hr lecture per week **Assessment:** 800w written assignment, or a practical demonstration of four jazz styles between 1870 and 1935 (25%); Listening Test (50%); class tasks and presentations (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Non Jazz Majors need to seek departmental approval in order to enrol.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit focuses on a study of the roots of jazz until the emergence of the swing period. The classes will be structured around the use of sound recordings. Students will be expected to recognise the pathfinders of jazz, their music, the socio-economic factors and to be able to write about and to discuss these various elements. Aural examinations will be of the 'Blindfold Test' variety and written assignments will take various forms such as biographies aided by transcriptions. Research, writing and documentation techniques will be learned. Students will be expected to listen, in their own time, to many recordings and to attend concerts. A recommended listening and reading list will be provided.

## JAZZ1022

### Jazz History B

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Kevin Hunt **Session:** Semester 2  
**Classes:** 2hr lecture per week **Prerequisites:** JAZZ1021 Jazz History A  
**Assessment:** 800w written assignment, or a practical demonstration of four jazz styles between 1870 and 1935 (25%); Listening Test (50%); class tasks and presentations (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Non Jazz Majors need to seek departmental approval in order to enrol.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit will study the emergence of the swing era to the beginning of Bebop. The classes will be structured around the use of sound recordings. Students will be expected to recognise the pathfinders of jazz, their music, the socio-economic factors and to be able to write

about and to discuss these various elements. Aural examinations will be of the 'Blindfold Test' variety and written assignments will take various forms such as biographies aided by transcriptions. Research, writing and documentation techniques will be learned. Students will be expected to listen, in their own time, to many recordings and to attend concerts. A recommended listening and reading list will be provided.

### JAZZ1025

#### Jazz Piano 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1  
**Classes:** 1hr tut/wk **Assessment:** 15min technical exam (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This course is only available to non-Jazz majors.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This class is available to all Conservatorium students as a free choice. The course will focus on basic keyboard technique as well as jazz chord progressions and voicings in small classes with students of like abilities. Students are assessed on their rate of progress by demonstrating successful completion of pieces and exercises. At the end of year examinations, students are required to demonstrate scales, chords, voicings, bass lines and comping.

### JAZZ1026

#### Jazz Piano 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2  
**Classes:** 1hr tut/wk **Prerequisites:** JAZZ1025 Jazz Piano 1 **Assessment:** 15min technical exam (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This course is only available to non-Jazz majors.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Consolidation and development of concepts and skills introduced in Jazz Piano 1.

### JAZZ1029

#### Jazz Small Ensemble 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2hr tut/wk **Assessment:** A final grade will be compiled from continual assessment of professional demeanour, improvisational and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Each ensemble consists of a basic rhythmic section with one or more additional instruments to make up the traditional 'Combo' format. The music that is studied and performed covers a wide range, from early jazz to contemporary jazz. Enrolment is subject to audition, and availability of places. For further details, refer to the Jazz Unit Handbook and/or please contact the Chair of Unit, Craig Scott.

### JAZZ1030

#### Jazz Small Ensemble 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ1029 Jazz Small Ensemble 1 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour, improvisational and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Each ensemble consists of a basic rhythmic section with one or more additional instruments to make up the traditional 'Combo' format. The music that is studied and performed covers a wide range, from early jazz to contemporary jazz. Enrolment is subject to audition, and availability of places. For further details, refer to the Jazz Unit Handbook and/or please contact the Chair of Unit, Craig Scott.

### JAZZ1601

#### Jazz Performance 1

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 hr instrumental lesson; 2 hr Improvisation class; 1 hr sectional tutorial; Jazz Concert Practice **Corequisites:** JAZZ1611 Jazz Ensemble 1 **Assessment:** Assessment: Individual tuition/technical requirements (50%) plus improvisation class component (50%). Students must pass all assessment components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), Dip Mus, UG Study Abroad Program.

These units are offered as major study and entrance is by audition and completion of a Jazz Aptitude Test. Each unit comprises 4 components: individual tuition with specialist on the student's instrument; improvisation class; concert practice in which the student is required to attend and/or perform; and tutorials. For further details, refer to the Jazz Unit Handbook and/or please contact the Chair of Unit, Craig Scott.

### JAZZ1602

#### Jazz Performance 2

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 hr instrumental lesson; 2 hr Improvisation class; 1 hr sectional tutorial; Jazz Concert Practice **Prerequisites:** JAZZ1601 Jazz Perf 1 **Corequisites:** JAZZ1612 JAZZ Ensemble 2 **Assessment:** Assessment: 90 minute Jury exam conducted in the impro class format (50%) plus Improvisation 2 class (30%) plus individual tuition grade (20%). Students must pass all assessment components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), Dip Mus, UG Study Abroad Program.

These units are offered as a major study and entrance is by audition and completion of a Jazz Aptitude Test. Each unit comprises 4 components: individual tuition with a specialist on the student's instrument; improvisation class; concert practice in which the student is required to attend and/or perform; and tutorials. For further details, refer to the Jazz Unit Handbook and/or please contact the Chair of Unit, Craig Scott.

### JAZZ1611

#### Jazz Ensemble 1

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 hr Jazz Piano class; 2 hr Small Ensemble class; 2 hr Elective Jazz Orchestra class OR 3 hr Big Band class **Corequisites:** JAZZ1601 Jazz Perf 1 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour, improvisational and ensemble skills demonstrated during rehearsals and performances, and nominated assessment tasks (100%) NB: the student must pass all three elements of this Unit in order to proceed to subsequent units of study. For further information see Jazz Handbook. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is available for BMus(Perf) Jazz students only. Enrolment in any of the Large or Small Ensembles or Jazz Piano class for other students is by permission of Jazz Unit Chair and/or by audition in the case of small and large ensemble. (The appropriate units of study for other students are Elective Jazz Orchestra 1-8, Jazz Small Ensemble 1-8 and Jazz Piano 1-4.)*

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), Dip Mus.

Jazz Ensemble 1 is a unit of study which provides the jazz student with the opportunity for: Performance of large ensemble arrangements in the Elective Jazz Orchestra, or Big Band. Performance of small

ensemble works and arrangements including original works by the students themselves in a nominated jazz ensemble. Participation in Jazz Piano class.

For further information see Jazz Handbook.

## JAZZ1612

### Jazz Ensemble 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 hr Jazz Piano class; 2 hr Small Ensemble class; 2 hr Elective Jazz Orchestra class OR 3 hr Big Band class **Prerequisites:** JAZZ1611 Jazz Ensemble 1 **Corequisites:** JAZZ1602 Jazz Perf 2 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour, improvisational and ensemble skills demonstrated during rehearsals and performances, and nominated assessment tasks (100%) NB: the student must pass all three elements of this Unit in order to proceed to subsequent units of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is available for BMus(Perf) Jazz students only. Enrolment in any of the Large or Small Ensembles or Jazz Piano class for other students is by permission of Jazz Unit Chair and/or by audition in the case of small and large ensemble. (The appropriate units of study for other students are Elective Jazz Orchestra 1-8, Jazz Small Ensemble 1-8 and Jazz Piano 1-4.)*

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), Dip Mus.

Jazz Ensemble 2 is a unit of study which provides the jazz student with the opportunity for: Performance of large ensemble arrangements in the Elective Jazz Orchestra, or Big Band. Performance of small ensemble works and arrangements including original works by the students themselves in a nominated jazz ensemble. Participation in Jazz Piano class. For further information see Jazz Handbook.

## JAZZ1621

### Jazz Music Skills 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** David Theak **Session:** Semester 1 **Classes:** 2 hour jazz harmony and arranging class; 2 hour jazz aural class. **Corequisites:** JAZZ1601 Jazz Performance 1 or JAZZ1631 Jazz Vocal 1 **Assessment:** Harmony and Arranging Module: Written harmony test (50%), approved number of arrangements (25%) Aural Module: Two tests (50% each), one 2 hour exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Harmony and Arranging Module:

Students will review clefs, key signatures, note values, dynamics, articulation, and learn copying and rehearsal techniques. In addition, instruction will include the ranges of and transpositions for the various instruments, chord symbols, scale-chord relationships, and rhythm section scoring. This unit deals with the study of the harmony of standard jazz repertoire. Students will learn to understand and use basic harmonic rules and the typical harmonic devices, diatonic progression and chord patterns which are learned with a view to generating a creative sense of jazz harmony and the ability to write small combo arrangements. The students are assessed by examination and by submitting arrangements. Legibility in copying is an assessable aspect. The harmonic techniques explored in this unit of study are used as the theoretical basis for Jazz Improvisation.

Aural Module:

This unit offers a systematic study of all simple intervals up to and including one octave, triadic harmony, four note chords in closed position and voice leading within these concepts, focusing on common harmonic movements that occur in the jazz repertoire.

The Chord Scale Theory & Jazz Harmony / Barrie Nettles; Richard Graf

## JAZZ1622

### Jazz Music Skills 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2 **Classes:** 2 hour jazz harmony and arranging class; 2 hour jazz aural class.

**Prerequisites:** JAZZ1621 Jazz Music Skill 1 **Corequisites:** JAZZ1602 Jazz Performance 2 or JAZZ1632 Jazz Vocal 2 **Assessment:** Harmony and Arranging Module: Written harmony test (50%), approved number of arrangements (50%) Aural Module: Two tests (20% each), one 2 hour exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Harmony and Arranging Module:

In semester two, the voicing techniques for two to four horns stressing the most effective registers, harmonisation of passing tones, clusters and other techniques will be introduced. Composition of original melodies using motivic development, thematic structure and harmonisation will also be learned. The harmonic techniques explored in Jazz Music Skills 2 are used as the theoretical basis for Jazz improvisation.

Aural Module:

This unit consolidates and expands upon concepts and skills introduced in Jazz Music Skills 1, plus introducing compound intervals, open voicings, the addition of all upper extensions to all chord types, and increasingly complex harmonic structures.

*Textbooks*

## JAZZ1631

### Jazz Vocal 1

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 hr instrumental lesson; 2 hr tutorial; Jazz Concert Practice **Corequisites:** JAZZ1621 Jazz Music Skills 1 **Assessment:** Teacher Grade 100% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

Jazz Vocal Performance is offered under the

BMusStudies award program. Jazz vocal performance technique and style plus jazz harmony, jazz history, ear training, and music literacy will be emphasised.

## JAZZ1632

### Jazz Vocal 2

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 hr instrumental lesson; 2 hr tutorial; Jazz Concert Practice **Prerequisites:** JAZZ1631 Jazz Vocal 1 **Corequisites:** JAZZ1622 Jazz Music Skills 2 **Assessment:** teacher grade 50% Jury Exam 15 minute 50%. Students must pass both assessment components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S.

Jazz Vocal Performance is offered under the

BMusStudies award program. Jazz vocal performance technique and style plus jazz harmony, jazz history, ear training, and music literacy will be emphasised.

## JAZZ1661

### Jazz Pedagogy

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2hr lecture per week **Assessment:** Written assignment 50%; Class Participation 50% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study is designed to provide students with knowledge about educational approaches

and strategies for teaching jazz to individuals and small and large groups. Topics will include approaches to teaching jazz articulation and style; performance practices including set up regarding OH&S; and jazz resources for teaching.

### JAZZ2000

#### Advanced Small Ensemble 1 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 3hrs of rehearsals/wk **Prerequisites:** JAZZ1024 Jazz Performance 2 **Corequisites:** JAZZ2020 Jazz Performance 3 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Mus (Perf), Dip Mus, UG Study Abroad Program.

Advanced Small Ensemble is only available for Years 2 - 4, and is the premier small ensemble of the Jazz Unit. For further details, refer to the Jazz Unit Handbook and/or please contact the Chair of Unit, Craig Scott.

### JAZZ2001

#### Advanced Small Ensemble 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 3hrs of rehearsals/wk **Prerequisites:** JAZZ2020 Jazz Performance 3; JAZZ2000 Advanced Small Ensemble 1 **Corequisites:** JAZZ2021 Jazz Performance 4 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Mus (Perf), Dip Mus, UG Study Abroad Program.

Advanced Small Ensemble is only available for Years 2 - 4, and is the premier small ensemble of the Jazz Unit. For further details, refer to the Jazz Unit Handbook and/or please contact the Chair of Unit, Craig Scott.

### JAZZ2002

#### Big Band 3 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 x 3hr rehearsal **Prerequisites:** JAZZ1001 Big Band 2 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study covers all aspects of professional and creative ensemble performance, including: reading, improvisation, dynamics, tone, intonation, articulation, swing, time-feel, style and ensemble interaction. Enrolment is subject to audition.

### JAZZ2003

#### Big Band 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 x 3hr rehearsal **Prerequisites:** JAZZ2002 Big Band 3 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study covers all aspects of professional and creative ensemble performance, including: reading, improvisation, dynamics,

tone, intonation, articulation, swing, time-feel, style and ensemble interaction. Enrolment is subject to audition.

### JAZZ2004

#### Elective Jazz Orchestra 3 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ1003 Elective Jazz Orchestra 2 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study covers all aspects of professional and creative ensemble performance, including: reading, improvisation, dynamics, tone, intonation, articulation, swing, time-feel, style and ensemble interaction. Enrolment is subject to audition.

### JAZZ2005

#### Elective Jazz Orchestra 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ2004 Elective Jazz Orchestra 3 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during rehearsals and performances (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study covers all aspects of professional and creative ensemble performance, including: reading, improvisation, dynamics, tone, intonation, articulation, swing, time-feel, style and ensemble interaction. Enrolment is subject to audition.

### JAZZ2006

#### Jazz Improvisation 3 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ1007 Jazz Improvisation 2 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during weekly rehearsals (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: THIS UNIT IS NOT AVAILABLE TO JAZZ PERFORMANCE MAJORS. Entry is by audition and subject to the availability of a place.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This 2 hour combo-sized class meets once per week and is taught by an expert improvisation coach. Concepts necessary for learning the skills of jazz improvisation such as swing, chord reading, scale choices, ear training, phrase construction, form, time and pitch control, repertoire and standard jazz nuances will be taught.

### JAZZ2007

#### Jazz Improvisation 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ2006 Jazz Improvisation 3 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour and ensemble skills demonstrated during weekly rehearsals (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: THIS UNIT IS NOT AVAILABLE TO JAZZ PERFORMANCE MAJORS. Entry is by audition and subject to the availability of a place.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This 2 hour combo-sized class meets once per week and is taught by an expert improvisation coach. Concepts necessary for learning the skills of jazz improvisation such as swing, chord reading, scale choices, ear training, phrase construction, form, time and pitch control, repertoire and standard jazz nuances will be taught.

#### JAZZ2008

##### Jazz Advanced Arranging 1 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1  
**Classes:** 2hr lec/tut **Prerequisites:** JAZZ2017 Jazz Harmony and Arranging 4 **Assessment:** Assignments and end of year examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

The aim of this unit is to encourage students to explore creative approaches in arranging/composing for a large jazz ensemble. The course explores various contemporary compositional practises and concepts, including 20th century harmony, counterpoint and orchestration and looks at various ways these techniques can be used and developed in the modern jazz ensemble. Students will complete at least one original work each semester for a large jazz ensemble (10 piece minimum). Availability is subject to sufficient numbers. For further information contact the Chair of Jazz Studies, Craig Scott.

#### JAZZ2009

##### Jazz Advanced Arranging 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2  
**Classes:** 2hr lec/tut **Prerequisites:** JAZZ2008 Jazz Advanced Arranging 1 **Assessment:** Assignments and end of year examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

The aim of this unit is to expand on concepts introduced in Jazz Advanced Arranging 1 and to further explore creative approaches in arranging/composing for a large jazz ensemble. The course explores various contemporary compositional practises and concepts, including 20th century harmony, counterpoint and orchestration and looks at various ways these techniques can be used and developed in the modern jazz ensemble. Students will complete at least one original work each semester for a large jazz ensemble (10 piece minimum). Availability is subject to sufficient numbers. For further information contact the Chair of Jazz Studies, Craig Scott.

#### JAZZ2016

##### Jazz Harmony and Arranging 3 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** William Motzing **Session:** Semester 1  
**Classes:** 2hr lec/tut/wk **Prerequisites:** JAZZ1020 Jazz Harmony and Arranging 2 **Assessment:** Approved number of arrangements and compositions (50%), written harmony test (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit is a continuation of Jazz Harmony and Arranging 2 and concentrates on more complex harmonic material that forms the basis for Jazz Improvisation 3 as well as learning arranging techniques for five horns and more complex ensemble music. Methods of reharmonisation of existing jazz and standard compositions will be introduced. Students will learn big band orchestration which will include ensemble scoring, sax soli, background writing, form and the related uses of counterpoint. There will be detailed analysis of scores of major composers and arrangers. Selected arrangements will be rehearsed by the Big Band. Students may be organised into ensemble-like groups and may be expected to bring their instruments to perform the works presented. For further information contact W. Motzing (Jazz Studies).

#### JAZZ2017

##### Jazz Harmony and Arranging 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** William Motzing **Session:** Semester 2  
**Classes:** 2hr lec/tut/wk **Prerequisites:** JAZZ2016 Jazz Harmony and Arranging 3 **Assessment:** Approved number of arrangements for big band (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Students will learn big band orchestration which will include ensemble scoring, sax soli, background writing, form and the related uses of counterpoint. There will be detailed analysis of scores of major composers and arrangers. Selected arrangements may be rehearsed by the Big Band. Students may study contemporary techniques encompassing elements of polytonality, serial composition, extended instrumental effects Lydian technique and textural voicings. This subject also deals with the harmonic concepts used in Jazz Improvisation 4. For further information contact W. Motzing (Jazz Studies).

#### JAZZ2018

##### Jazz History 3 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** William Motzing **Session:** Semester 1  
**Classes:** 2hr lec/wk **Prerequisites:** JAZZ1022 Jazz History 2 **Assessment:** 3000w written assignment (30%), 1 hour test (10%), 2hr aural exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit is a study of the careers of jazz musicians and their music from the emergence of Bebop circa 1940 until approximately 1959, including cool, west coast, hard bop, with emphasis on Miles Davis' bands.

#### JAZZ2019

##### Jazz History 4 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** William Motzing **Session:** Semester 2  
**Classes:** 2hr lec/wk **Prerequisites:** JAZZ2018 Jazz History 3 **Assessment:** 3000w written assignment (30%), 1 hour quiz (10%), 2hr aural exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The unit will focus on a study of jazz development from 1960 until the present including third stream music, free jazz, world music influence, the transition to jazz-rock and fusion, Euro-jazz and Australian jazz, with emphasis on Miles Davis' bands.

#### JAZZ2020

##### Jazz Performance 3 Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2  
**Classes:** 1hr lesson, 1hr tut, 2hr impro class, and performance workshop/wk **Prerequisites:** JAZZ1024 Jazz Performance 2 **Assessment:** Individual tuition/Technical requirements (50%) plus improvisation class component (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

These units are offered as a major study and entrance is by audition and completion of a Jazz Aptitude Test. Each unit comprises 4 components: individual tuition with a specialist on the student's instrument; improvisation class; concert practice in which the student is required to attend and/or perform; and tutorials.

**JAZZ2021****Jazz Performance 4****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1hr lesson, 1hr tut, 2hr impro class and performance workshop/wk **Prerequisites:** JAZZ2020 Jazz Performance 3 **Assessment:** 30min jury exam (50%) plus Improvisation (30%) plus Individual tuition (20%). Dip Mus - Junior Recital (50%) plus Improvisation (30%) plus Individual Tuition (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

These units are offered as a major study and entrance is by audition and completion of a Jazz Aptitude Test. Each unit comprises 4 components: individual tuition with a specialist on the student's instrument; improvisation class; concert practice in which the student is required to attend and/or perform; and tutorials.

**JAZZ2022****Jazz Piano 3****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1 **Classes:** 1hr tut/wk **Prerequisites:** JAZZ1026 Jazz Piano 2 or JAZZ1612 Jazz Ensemble 2 **Assessment:** 15 min technical exam (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Consolidation and further development of concepts and skills introduced in Jazz Piano 2.

**JAZZ2030****Jazz Vocal Workshop 1****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1 **Classes:** 2hr tut/wk **Assessment:** A final grade will be compiled from continual assessment of professional demeanour, improvisational and ensemble skills demonstrated during classes (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In this unit students are trained in the skills of part-singing in the Jazz style. Students will learn musical interpretation of material including Jazz standards. Sight-reading, intonation, ear training, breath control, improvisation, posture and tone are expected to be learnt to a practical performance.

**JAZZ2031****Jazz Vocal Workshop 2****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ2030 Jazz Vocal Workshop 1 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour, improvisational and ensemble skills demonstrated during classes (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Consolidation and development of content introduced in Jazz Vocal Workshop 1.

**JAZZ2038****Jazz Ear Training 3****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ1016 Jazz Ear Training 2 **Corequisites:** JAZZ2020 Jazz Performance 3 **Assessment:** Two tests (20% each), one 2 hour examination (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Non Jazz Majors will need to seek jazz unit approval from chair of unit prior to enrolling.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit consolidates and expands upon concepts and skills introduced in Jazz Ear Training 1 and 2, and introduces non-tertiary chord structures, slash chords, and more complex harmonic movements from the jazz repertoire. For further information contact C.Scott (Jazz Studies).

**JAZZ2039****Jazz Ear Training 4****Sydney Conservatorium of Music**

**Credit points:** 3 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2 **Classes:** 2hr tut/wk **Prerequisites:** JAZZ2038 Jazz Ear Training 3 **Corequisites:** JAZZ2021 Jazz Performance 4 **Assessment:** Two tests (20%

each), one 2 hour examination (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Non Jazz Majors will need to seek jazz unit approval from chair of unit prior to enrolling.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit consolidates all concepts from Jazz Ear Training 1,2 and 3. By its conclusion, students will have systematically examined, over four semesters, aural concepts that are essential to creative musical interplay in jazz performance. For further information contact C. Scott (Jazz Studies).

## JAZZ2603

### Jazz Performance 3

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 hr instrumental lesson; 2 hr Improvisation class; 1 hr sectional tutorial; Jazz Concert Practice **Prerequisites:** JAZZ1602 Jazz Perf 2 **Corequisites:** JAZZ2613 Jazz Ensemble 3 ; JAZZ2703 Jazz Perf 3 Adv - Diploma students only **Assessment:** Assessment: Individual tuition/technical requirements (50%) plus improvisation class component (50%). Students must pass all assessment components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), Dip Mus, UG Study Abroad Program.

These units are offered as a major study and entrance is by audition and completion of a Jazz Aptitude Test. Each unit comprises 4 components: individual tuition with a specialist on the student's instrument; improvisation class; concert practice in which the student is required to attend and/or perform; and tutorials. For further details, refer to the Jazz Unit Handbook and/or please contact the Chair of Unit, Craig Scott.

## JAZZ2604

### Jazz Performance 4

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 1 hr instrumental lesson; 2 hr Improvisation class; 1 hr sectional tutorial; Jazz Concert Practice **Prerequisites:** JAZZ2603 Jazz Perf 3 **Corequisites:** JAZZ2614 Jazz Ensemble 4; JAZZ2704 Jazz Perf 4 (ADV) - Diploma Students only **Assessment:** Assessment: 90-120 minute Jury exam conducted in the impro class format (50%) plus Improvisation 2 class (30%) plus individual tuition grade (20%). Students must pass all assessment components. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), Dip Mus, UG Study Abroad Program.

These units are offered as a major study and entrance is by audition and completion of a Jazz Aptitude Test. Each unit comprises 4 components: individual tuition with a specialist on the student's instrument; improvisation class; concert practice in which the student is required to attend and/or perform; and tutorials. ## JAZZ2613

### Jazz Ensemble 3

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2 hr Small Ensemble class or 3 Hr Advanced Ensemble; 2 hr Elective Jazz Orchestra class, or 3 Hr Big Band Class **Prerequisites:** JAZZ1612 Jazz Ensemble 2 **Corequisites:** JAZZ2603 Jazz Performance 3 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour, improvisational and ensemble skills demonstrated during rehearsals and performances, and nominated assessment tasks (100%) NB: the student must pass all three elements of this Unit in order to proceed to subsequent units of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is available for BMus(Perf) Jazz students only. Enrolment in any of the Large or Small Ensembles or Jazz Piano class for other students is by permission of Jazz Unit Chair and/or by audition in the case of small and*

*large ensemble. (The appropriate units of study for other students are Elective Jazz Orchestra 1-8, Jazz Small Ensemble 1-8 and Jazz Piano 1-4.)*

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), Dip Mus.

Jazz Ensemble 3 is a unit of study which provides the jazz student with the opportunity for: Performance of large ensemble arrangements in the Elective Jazz Orchestra, or Big Band. Performance of small ensemble works and arrangements including original works by the students themselves in a nominated jazz ensemble, or Advanced Ensemble. For further information see Jazz Handbook.

## JAZZ2614

### Jazz Ensemble 4

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1, Semester 2 **Classes:** 2 hr Small Ensemble class or 3 Hr Advanced Ensemble; 2 hr Elective Jazz Orchestra class, or 3 Hr Big Band Class **Prerequisites:** JAZZ2613 Jazz Ensemble 3 **Corequisites:** JAZZ2604 Jazz Performance 4 **Assessment:** A final grade will be compiled from continual assessment of professional demeanour, improvisational and ensemble skills demonstrated during rehearsals and performances, and nominated assessment tasks (100%) NB: the student must pass all three elements of this Unit in order to proceed to subsequent units of study. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is available for BMus(Perf) Jazz students only. Enrolment in any of the Large or Small Ensembles or Jazz Piano class for other students is by permission of Jazz Unit Chair and/or by audition in the case of small and large ensemble. (The appropriate units of study for other students are Elective Jazz Orchestra 1-8, Jazz Small Ensemble 1-8 and Jazz Piano 1-4.)*

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), Dip Mus.

Jazz Ensemble 4 is a unit of study which provides the jazz student with the opportunity for: Performance of large ensemble arrangements in the Elective Jazz Orchestra, or Big Band.

Performance of small ensemble works and arrangements including original works by the students themselves in a nominated jazz ensemble, or Advanced Ensemble. For further information see Jazz Handbook.

## JAZZ2618

### Jazz History C

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** William Motzing **Session:** Semester 1 **Classes:** 2hr lecture per week **Prerequisites:** JAZZ1022 Jazz History B **Assessment:** Assessment: 3000w written assignment (30%), 1 hour test (10%), 2hr aural exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

This unit is a study of the careers of jazz musicians and their music from the emergence of Bebop circa 1940 until approximately 1959, including cool, west coast, hard bop, with emphasis on Miles Davis' bands. A recommended listening and reading list will be provided. For further information contact W. Motzing (Jazz Studies)

## JAZZ2619

### Jazz History D

#### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** William Motzing **Session:** Semester 2 **Classes:** 2hr lecture per week **Prerequisites:** JAZZ2618 Jazz History C **Assessment:** Assessment: 3000w written assignment (30%), 1 hour test (10%), 2hr aural exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus.

The unit will focus on a study of jazz development from 1960 until the present including third stream music, free jazz, world music influence, the transition to jazz-rock and fusion, Euro-jazz and Australian jazz, with emphasis on Miles Davis' bands..A recommended listening and reading list will be provided. For further information contact W. Motzing (Jazz Studies).

**JAZZ2623****Jazz Music Skills 3****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 1  
**Classes:** 2 hour jazz harmony and arranging class; 2 hour jazz aural class.  
**Prerequisites:** JAZZ1622 Jazz Music Skills 2 **Corequisites:** JAZZ2603 Jazz Performance 3 or JAZZ2633 Jazz Vocal 3 **Assessment:** Harmony and Arranging Module: Written harmony test (50%), approved number of arrangements (50%) Aural Module: Two tests (20% each), one 2 hour exam (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Harmony and Arranging Module:

This unit is a continuation of Jazz Harmony and Arranging 2 and concentrates on more complex harmonic material that forms the basis for Jazz Improvisation 3 as well as learning arranging techniques for five horns and more complex ensemble music. Methods of reharmonisation of existing jazz and standard compositions will be introduced. Students will learn big band orchestration which will include ensemble scoring, sax soli, background writing, form and the related uses of counterpoint. There will be detailed analysis of scores of major composers and arrangers. Selected arrangements will be rehearsed by the Big Band.

Aural Module:

This unit consolidates and expands upon concepts and skills introduced in Jazz Music Skills 1 and 2, plus introducing advanced chord types, and increasingly complex harmonic structures.

*Textbooks*

The Chord Scale Theory & Jazz Harmony / Barrie Nettles; Richard Graf

**JAZZ2624****Jazz Music Skills 4****Sydney Conservatorium of Music**

**Credit points:** 6 **Teacher/Coordinator:** Craig Scott **Session:** Semester 2  
**Classes:** 2 hour jazz harmony and arranging class; 2 hour jazz aural class.  
**Prerequisites:** JAZZ2623 Jazz Music Skills 3 **Corequisites:** JAZZ2604 Jazz Performance 4 or JAZZ2634 Jazz Vocal 4 **Assessment:** Harmony and Arranging Module: Written harmony test (75%), approved number of arrangements (25%) Aural Module: Two tests (20% each), one 2 hour exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Harmony and Arranging Module:

Students will learn big band orchestration which will include ensemble scoring, sax soli, background writing, form and the related uses of counterpoint. There will be detailed analysis of scores of major composers and arrangers. Selected arrangements may be rehearsed by the Big Band. Students may study contemporary techniques encompassing elements of polytonality, serial composition, extended instrumental effects Lydian technique and textural voicings. This subject also deals with the harmonic concepts used in Jazz Improvisation.

Aural Module:

This unit consolidates all concepts from Jazz Music Skills 1, 2 and 3. By its conclusion, students will have systematically examined, over four semesters, aural concepts that are essential to creative musical interplay in jazz performance.

### JAZZ3018

#### Jazz Transcription and Analysis 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Theak **Session:** Semester 1 **Classes:** 1hr tut/wk **Prerequisites:** JAZZ2017 Jazz Harmony and Arranging 4 **Assessment:** Two completed transcriptions (25%), a 2000 word transcription / analysis essay (50%) and an oral presentation of one transcribed and analysed solo to the class (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

The process of formal analysis is an essential and integral part of learning the art of jazz improvisation. Firstly the aim of this unit is to enable the student to identify the form, content, language and style used in jazz soloing by examining: note choices and their relationship to the chords, motif development, elements of jazz language, and macro and micro elements of solo structure. Secondly the aim of this unit is study and / or identify analysis concepts such as aesthetic, modernism / post - modernism, discourse, ideology, hermeneutics and subjectivity, so that they may develop an understanding of the broader context which surrounds a given work of art and its relationship to jazz improvisation, performance and composition.

### JAZZ3019

#### Jazz Transcription and Analysis 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** David Theak **Session:** Semester 2 **Classes:** 1hr tut/wk **Prerequisites:** JAZZ3018 Jazz Transcription and Analysis 1 **Assessment:** A folio of four completed annotated transcriptions outlining the development of a significant jazz artist with analysis (75%), and an oral presentation of one transcribed and analysed solo to the class (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

The aim of this unit is to expand upon topics introduced to the student in Jazz Transcription and Analysis 1 and to examine other analytical techniques and terminologies, dealing with concepts of tension and release, and further elements of jazz language relating to post - bop, free, and post - modernist improvised music.

Jazz Perf 8 (Advanced) is designed to provide the jazz student with an opportunity to undertake additional study both in improvisation and also by completing a special project in which a specific composer, style, or movement is studied and presented. The unit encourages both peer review and self evaluation. At the conclusion of this unit the student will present elements of their research in a major performance.

## JCTC1001

### Palestine: Roman Rule to Islam

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rutland **Session:** Semester 1 **Classes:** 2 hour lecture and 1 hour tutorial per week **Assessment:** 2 hour exam (40%), 2000 word essay (30%), 500 word synopsis of a tutorial paper (20%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

How did the religion and history of the Jewish people change from the Second Temple to the rabbinic period? Explore the history and religion of the Jews during the watershed period in Palestine under Roman rule. Study the Hellenist influence on Judaism, the development of different sects, including the Dead Sea sect, and the emergence of Christianity. Lectures (2 hours a week) focus on the history of the period. Tutorials (1 hour a week) deal with broad questions such as who is a Jew and universalism and chosenness in Judaism together with a knowledge and understanding of basic Jewish belief and practice. Students will gain insights into the evolution of Judaism from pagan times to the present. At the upper level, students can study Medieval Judaism, Holocaust and Israel.

## JCTC1002

### Jewish Settlement Outside Palestine

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rutland **Session:** Semester 2 **Classes:** 2 hour lecture and 1 hour tutorial per week **Prerequisites:** JCTC1001 **Assessment:** 2 hour exam (40%), 2000 word essay (30%), 500 word synopsis of a tutorial paper (20%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

Do you wish to understand the gradual dispersion of Jews from Palestine? Study this unit to understand the spread of Judaism from Palestine into Africa and Asia. Students will study the story of Muhammed and the rise of Islam; the place of the Jew under Islamic law and the rapid Islamic conquest of much of the known world. They will learn about the dispersed diaspora communities in Babylon and Egypt and the development of Jewish communities in India and China from their early origins to the present day. Lectures are 2 hours and focus on the history of the period. The tutorials (1 hour a week), deal with moral, ethical and philosophical questions relating to Judaism. Discussions will explore the existence and nature of God, prophecy, the Messiah, Torah and the commandments, conversion to Judaism and Jewish attitudes to other faiths.

## JCTC1801

### Jewish Civilization Exchange

## Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Arts.

## JCTC2603

### Jews Under the Crescent and the Cross

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rutland **Session:** Semester 1 **Classes:** 2 hour lecture, 1 hour tutorial per week **Prerequisites:** JCTC1001 or one of HSTY1022, HSTY1031, HSTY1043, HSTY1044, HSTY1045, HSTY1076, HSTY1088, RLST1001, RLST1002 **Prohibitions:** JCTC2003 **Assessment:** 2 hour exam (40%), 2000 word essay (30%), 500 word synopsis of a tutorial paper (20%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

The story of Jews living under the Crescent (Muslim rule) and the Cross (Christian rule) comprises a vibrant period of Jewish history. The unit explores Jews under Muslim rule in Spain and the experiences of Jews under Christian rule in Germany, France and England in the Medieval period, including the problems of Christian antisemitism and the Crusades. These are seminal periods in the development of Jewish thought, with the contribution of great commentators and philosophers including Moses Maimonides.

### From Expulsion to Regeneration

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rutland **Session:** Semester 2 **Classes:** 2 hour lecture, 1 hour tutorial per week **Prerequisites:** JCTC1001 or one of HSTY1022, HSTY1031, HSTY1043, HSTY1044, HSTY1045, HSTY1076, HSTY1088, RLST1001, RLST1002 **Prohibitions:** JCTC2004 **Assessment:** 2 hour exam (40%), 2000 word essay (30%), 500 word synopsis of a tutorial paper (20%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

One of the most traumatic events in Jewish history was the expulsion of the Jews from Spain in 1492. Explore the reasons behind the expulsion and the ways in which new centres of Jewish life emerged, especially in Eastern Europe. Light will also be shed on the establishment of Jewish communities in the Netherlands and England on the eve of emancipation when the new ideas of the Enlightenment paved the way for the rise of the modern Jew.

## JCTC2605

### From Emancipation to the Holocaust

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rutland **Session:** Semester 1 **Classes:** 2 hour lecture, 1 hour tutorial per week **Prerequisites:** JCTC1001 or one of HSTY1022, HSTY1031, HSTY1043, HSTY1044, HSTY1045, HSTY1076, HSTY1088 **Assessment:** 2 hour exam (40%), 2000 word essay (30%), 500 word synopsis of a tutorial paper (20%), class participation (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit is designed to introduce students to the turbulent history of European Jewry, 1750 to 1933. Against the background of far-reaching transformation in almost every aspect of society and culture, the Jew's entry into the modern world will be examined. At the centre stands the process of acculturation, integration, assimilation and Zionism, as well as the responses by non-Jewish society, especially the rise of modern antisemitism.

## JCTC2606

### The Holocaust: History and Aftermath Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof Kwiet, Dr Moses **Session:** Semester 2 **Classes:** 2 hour lecture, 1 hour tutorial per week **Prerequisites:** JCTC1001 or 6 junior credit points from History. **Prohibitions:** JCTC2006 **Assessment:** 3000 word essay (50%), 1500 word essay (30%), class participation (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

This unit provides an in-depth study of the Holocaust. Special emphasis will be placed on the development of Nazi ideology, in particular racial antisemitism, and the gradual implementation of this policy towards the Jews and other victim groups from 1933 to 1945. Other themes focus on the responses of the victims and the role of the by-standers, as well as post-war politics of memory and other issues, including Holocaust denial and war crimes prosecution.

## JCTC2607

### Israel in the Modern Middle East Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rutland **Session:** Semester 1 **Classes:** 2 hours of lectures, 1 hour tutorial per week **Prerequisites:** JCTC1001 or one of HSTY1022, HSTY1025, HSTY1031, HSTY1043, HSTY1044, HSTY1045 **Assessment:** 2000 word essay, 500 word synopsis of tutorial paper, 2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Arts, UG Study Abroad Program.

Israel's position in the modern Middle East and the wider world from state formation to the present has been shaped by social, political and economic processes. Study these processes in the context of the nature of Israeli society and the major foreign policy decisions taken by Israeli leaders. Topics to be studied include: the genesis and development of Zionism, democracy and religion in Modern Israel, post-Zionism, the role of the Holocaust in Israel, Jerusalem and the settlements.

### Judaic Studies Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Assoc Prof Rutland **Session:** Semester 1, Semester 2 **Classes:** Two 2 hour sessions per week in Semester 1 and one 2 hour session per week in Semester 2 **Assessment:** Assignment work for each course (20% each), 15000 word thesis (40%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B Int S (Hons), Dip Arts(Hons).

In addition to the compulsory core unit of study, Jewish Civilisation: Methodology and Tools, students will choose two IV Honours options, each of which will involve two hours a week of classes per semester. The options are:

Classical Period: Biblical Literature, Second Temple Writings.

Modern Period: Yiddish Literature in Translation, Yiddish Popular Culture, The Australian Jewish Experience, The German Jewish Experience, Holocaust Research: Trends and Problems.

Students can choose to specialise in either the Classical or Modern period, in which case they must do a minimum of two options in their specialty, and their dissertation must be in their area of specialty. Each student in IV Honours will write a thesis of a minimum of 15000 words on a subject related to their designated area. The topic will be chosen in consultation with the department's staff and individual guidance will be provided.

**JPNS1611****Japanese 1****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Ms Seiko Yasumoto **Session:** Semester 1, Summer Main, Winter Main **Classes:** 4 hours per week **Prohibitions:** JPNS1111, any HSC Japanese Course **Assessment:** Continuous class assessment (i.e. weekly quizzes, speaking, writing, listening tests) (2000 words), 2 hour semester exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program, UG Summer/Winter School.

This beginners' unit introduces basic communication skills in understanding and speaking Japanese. Students will also learn to write the two Japanese syllabaries and approximately 60 kanji characters and to recognise at least 100 kanji characters in context. Relevant socio-cultural information is integrated with the language learning. This unit also includes a weekly culture lecture.

*Textbooks*

To be advised in the orientation period.

**JPNS1612****Japanese 2****Arts**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** JPNS1111 or JPNS1611 **Prohibitions:** JPNS1121 **Assessment:** Continuous class assessment (i.e. weekly quizzes, speaking, writing, listening tests) (2000 words), 2 hour semester exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit develops both the basic communication skills and the learning skills introduced in semester one. Students will continue to learn to use and understand Japanese in meaningful, everyday contexts. They will be able to write more than 150, and to recognise at least 200 kanji characters in context. Relevant socio-cultural information is integrated with the language learning.

**JPNS1801****Japanese Exchange****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud.

**JPNS1802****Japanese Exchange****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud.

**JPNS2611****Japanese 3****Arts**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hours per week. **Prerequisites:** 65% or more in HSC Japanese Beginners or less than 70% in Japanese Continuers, or JPNS1121 or JPNS1612 **Prohibitions:** JPNS1114, JPNS2212 **Assessment:** Continuous assessment, including class quizzes, tests and written assignments (3000 words), 1 hour exam (1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit consolidates basic grammar and introduces intermediate grammar, through communicative methods and reading practice. By the end of the semester, students should be able to keep up a conversation for a short time in a dialogue, to write short passages without the assistance of dictionaries, to read narrative texts, and to recognise the difference between written and spoken modes of communication in Japanese. Students will be able to write approximately 200 kanji and to recognise about 300 kanji.

**JPNS2612****Japanese 4****Arts**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** JPNS1114 or JPNS2212 or JPNS2611 **Prohibitions:** JPNS1124, JPNS2222 **Assessment:** Continuous assessment including class quizzes, tests and written assignments (3000 words), 1 hour exam (1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to consolidate basic grammar and introduce intermediate grammar through communicative methods and reading practice. By the end of the semester, students are expected to be able to sustain a conversation about a selected topic for several minutes in a dialogue, to write a well-structured short essay without the assistance of dictionaries, and to read Japanese texts on a wide variety of topics. They will be able to write approximately 300 kanji and to recognise about 400 kanji.

**JPNS2621****Japanese 5****Arts**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** HSC Japanese Extension or Japanese Continuers 70% or above or equivalent determined by the department; or JPNS1124 or JPNS2222 or JPNS2612 **Prohibitions:** JPNS2213 **Assessment:** Continuous assessment (weekly quizzes equivalent to 200 words), tests (speaking, writing, listening and reading comprehension tests) (2300 words), 2 hour exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to develop students' speaking, writing and reading skills for the intermediate level of Japanese, so that they are able to use Japanese in a variety of situations. Students will be expected to achieve the following linguistic skills: switch to appropriate speech style in formal and informal situations; express opinions and thoughts; write about 350 kanji and recognise at least 600 kanji. Writing and reading practice will consolidate grammatical, lexical and cultural knowledge.

**JPNS2622****Japanese 6****Arts**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** JPNS2621 or JPNS2213 **Prohibitions:** JPNS2223 **Assessment:** Continuous assessment (weekly quizzes) (200 words), tests (speaking, writing, listening and reading comprehension tests) (2300 words), 2 hour exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to consolidate and extend intermediate level linguistic skills, through the acquisition of conversational strategies such as notions of apology, reasoning, opinions and explanations. Besides oral practice, writing and reading practice will help strengthen grammatical, lexical and cultural knowledge. Students will be able to read about 850 kanji and write about 500 kanji by the end of the semester. The above aims will be achieved by exploring various topics relating to contemporary Japan through authentic materials.

**JPNS2660****Introduction to Japan  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Stavros **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** JPNS1121 or JPNS1612 **Prohibitions:** JPNS2622, JPNS3622, JPNS3632 **Assessment:** Group project (1500 words), 2 quizzes (1250 words each), essay (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to help students of Japanese language understand and acquire knowledge of Japanese society and culture at an introductory level. The unit will be taught in English but will acquaint students with key words and concepts in Japanese. Themes to be covered may include: social structures; contemporary issues and their historical backgrounds; language use in Japanese society; literary and cultural trends; urban culture.

**JPNS2670****Japanese Literature  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Yasuko Claremont **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** JPNS1124 or JPNS2222 (from 2007, JPNS2612) **Prohibitions:** JPNS3116; JPNS3621; JPNS2301; JPNS3631; JPNS3301 **Assessment:** 2 hour final exam (equivalent to 2000 words), 1 hour mid-semester exam (equivalent to 1000 words), presentation equivalent to 1000 words, essay writing equivalent to 1500 words and continuous assessment (equivalent to 500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit of study aims at improving students' language skills by reading modern Japanese literature, which is expressed at a different level from daily use. The comprehension of Japanese literary texts enables students to gain an insight into the writers' themes and expressions and is relevant to contemporary life. When necessary, English translations will be used in conjunction with authentic Japanese material. Students are expected to develop a critical appreciation of Japanese literature.

**JPNS2672****Japanese Media Culture and New Japan  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Ms Seiko Yasumoto **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** JPNS1124 or JPNS2222 or JPNS2612 **Prohibitions:** JPNS3106, JPNS3621, JPNS3631 **Assessment:** Continuous assessment including class quizzes (1000 words each), discussions and research based project (2500 words), and a 1.5 hour exam (1500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to explore the new Japan and its youth cultures and to guide students to understand and broaden their knowledge of changing aspects of Japanese culture and society. Topics from Japanese traditions through to contemporary culture will be analysed. Learning activities include reading media texts (e.g. newspaper articles), video analysis, discussion and research. The unit also provides students with opportunities to pursue their interests and develop cultural knowledge and communication skills.

**JPNS2811****Japanese Exchange 3  
Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

**JPNS2812****Japanese Exchange 4****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

**JPNS2814****Japanese Exchange 6  
Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

**JPNS2815****Japanese Exchange 7  
Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

**JPNS3621****Japanese 7  
Arts**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** JPNS1123 or JPNS2223 or JPNS2622 **Prohibitions:** JPNS2301 **Assessment:** 2 written class tests (800 words), 3 oral presentations (900 words), 5 kanji character quizzes (300 words), class preparation and participation (500 words), 2 hour semester exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Classes will involve a range of learning styles for further development of speaking, listening, reading and writing skills. These will include discussion, short surveys, role-plays, reading passages and short translation exercises. Students will also learn how to use a word processor, email and the Internet in Japanese. By the end of this unit of study, students will be able to read approximately 1100 kanji and write 600 kanji.

**JPNS3622****Japanese 8  
Arts**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** JPNS3621 or JPNS2301 **Prohibitions:** JPNS2302 **Assessment:** 2 written class tests (800 words), 3 oral presentations (900 words), 5 kanji character quizzes (300 words), class preparation and participation (500 words), 2 hour final exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is designed to consolidate and extend skills acquired in JPNS3621. Learning styles will include discussion, short surveys, role-plays, reading passages and short translation exercises. Students will also continue learning how to use a word processor, email and the Internet in Japanese. By the end of this unit of study, students will be able to read approximately 1350 kanji and write 700 kanji.

**JPNS3631****Japanese 9****Arts**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hours per week  
**Prerequisites:** JPNS2302 or JPNS3622 **Prohibitions:** JPNS3301  
**Assessment:** Continuous class assessment including essay writing (1000 words), mid-term exam (1000 words), group and individual presentations (2000 words), 2 hour exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims at the further development of skills beyond the intermediate level. The goals of the unit include the development of skills in language analysis; the understanding of unfamiliar texts of a non-specialist nature; the ability to summarise, to evaluate information critically and to express opinions on a wide range of research topics. Students will be able to write at least 800 kanji and recognise about 1600 kanji.

*Textbooks*

To be advised in class.

**JPNS3632****Japanese 10****Arts**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 2 hours per week  
**Prerequisites:** JPNS3301 or JPNS3631 **Prohibitions:** JPNS3302  
**Assessment:** 1 hour mid-semester exam (1000 words), presentation (1500 words), essay writing (1000 words), continuous assessment (500 words), 2 hour semester exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims at revising and extending language skills to a higher level in order to achieve confidence and proficiency in expressing your views in written and spoken Japanese. Students are expected to develop analytical skills in reading a variety of contemporary writings such as essays, roundtable discussions and articles, and in discussion of current issues and topics. Students will be able to write 900 kanji and recognise about 1850 kanji.

*Textbooks*

To be advised in class.

**JPNS3673****Japanese Society****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Chun-Fen Shao **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** JPNS1123 or JPNS2223 or JPNS2622 or JPNS1125 **Prohibitions:** JPNS3314 **Assessment:** Continuous class assessment, including class quizzes, tests, presentation and written assignments (total 5000 words), 1 hour exam (1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

Is Japan a unique country? What are the similarities and differences between Japan, Australia and other countries? This unit of study offers students the opportunity to explore various aspects of contemporary Japanese society and culture through reading Japanese texts in the original, through group discussions, and through cross-cultural comparisons. Students will develop their own opinions on a range of social and cultural issues while improving their reading, analytical, and both oral and written communication skills.

**JPNS3676****Monsters & Ghosts: Japanese Fantasy & SF****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Rebecca Suter **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** JPNS1123 or JPNS1125 or JPNS2223 or JPNS2622 **Assessment:** 2 in-class quizzes (500 words each), group presentation (equivalent to 1000 words), 1 essay (1500 words), 1 research project (2500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

The course will focus on fantasy and science fiction as means of representing the Other in modern Japanese literature and popular culture. Building on Tzvetan Todorov's definition of the fantastic as a hesitation between the realistic and the supernatural, it will analyse the way in which Japanese fantasy tackles issues of modernity, gender and cultural difference in a variety of genres and media, including the novel and short story, manga, anime and film, from the Meiji period to the present.

**JPNS3677****Behaving the Japanese Way****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Olivier Ansart **Session:** Semester 1 **Classes:** 2 hours per week **Prohibitions:** ASNS2306, JPNS2316 **Assessment:** Tutorial discussions, presentations and writing tasks (equivalent to 1500 words), 2500 word essay, 2 hour examination (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

It is alleged that, at the national level, power in Japan has been monopolized since 1945 by much the same clique, but also that it is never where it seems to be - that it is based on consensus, bottom-up decision-making, but is also deeply authoritarian. Through both Japanese and English sources, we will focus on the exercise of power in contemporary politics, administration, and private enterprise as well as psycho-sociology, education, political and moral thought, and economic structures.

**JPNS3841****Japan In-Country Study 1****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prerequisites:** 12 Junior JPNS credit points **Assessment:** As required by the host institution. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

Approved course in a tertiary level institution in Japan.

**JPNS3842****Japan In-Country Study 2****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Prerequisites:** 12 Junior JPNS credit points **Assessment:** As required by the host institution. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

Approved course in a tertiary level institution in Japan.

**JPNS4011****Japanese Honours A****Arts**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** 'Credit' average or better in the major plus 12 additional Senior credit points, including JPNS3902 or ASNS3690 Approaches to Research in Asian Studies. They may include one 6-credit point Japan-related Asian Studies unit of study. **Assessment:** Coursework assessments (50%) and 15000-20000 word thesis (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

Honours IV students are required to complete all four components: JPNS4011, JPNS4012, JPNS4013, JPNS4014. These components comprise coursework from a pool of postgraduate offerings plus a thesis. Coursework and thesis components are each weighted at 50% of the final result. Students will complete coursework in three of the following areas depending on staff availability:

1. Contemporary issues in Japan: Major topics of concern in contemporary Japanese society and politics.

2. Japanese thought: Discussion of the thought modes, value systems and behaviour patterns that run throughout the course of Japanese history.

3. Japanese history: Focus on conceptual and methodological issues in modern Japanese history, with emphasis on historiography, examining both Japanese and Western historical writings.

4. Japanese literature: Intensive study of classical and/or modern literary texts.

#### JPNS4012

##### Japanese Honours B

###### Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** JPNS4011  
**Assessment:** Written assignment and/or exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

Coursework in one of the following areas: Japanese society, thought, history, or literature.

#### JPNS4013

##### Japanese Honours C

###### Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** JPNS4012  
**Assessment:** Written assignment and/or exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

Coursework in one of the following areas: Japanese society, thought, history, or literature.

#### JPNS4014

##### Japanese Honours D

###### Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** JPNS4013  
**Assessment:** Thesis (15000-20000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

Students will be required to write a 15000-20000 word thesis on an approved Japanese topic.

#### JURS3001

##### Sociological Jurisprudence

###### Law

**Credit points:** 8 **Teacher/Coordinator:** Assoc Prof Alex Ziegert **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Assessment:** 1x2000wd research note (40%) and 1x6000wd research paper (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Completion of this unit satisfies the Jurisprudence/Part 2 requirement of the LLB.*

**Associated degrees:** LL B, UG Study Abroad Program.

The unit of study will introduce the student to the basic concepts of sociological theory and methodology and will show how these concepts can be applied to the observation of the functioning of law. On the basis of such a primary understanding of how societies organise themselves and their law it will become possible for the student to appreciate and evaluate critically the efforts of socio-legal research and the conceptions of some major contributors to the sociological theory of law. The first part of this unit will look at what sociological theory and research can offer today in the description of social life, the explanation of how societies are organised, why people do what they do. Elementary sociological concepts like norm, role, group, power, class, social structure and social system will be related to the operation of the law. Concepts like these provide the tools which make it possible to examine and study systematically and carefully the social organisation and structure of legal systems, the operation and the social environments in which and in relation to which they are operating. The second part of this unit will introduce the student to the methodological and practical issues of empirical socio-legal

research. It will focus on the design and on the practical conducting of a study on selected aspects of the function and operations of courts in the legal process. This part of the unit will be assessed as a research assignment.

#### JURS3003

##### Comparative Constitutionalism

###### Law

**Credit points:** 8 **Teacher/Coordinator:** Assoc Prof Helen Irving **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** Combination of research essay (5,000 words) or take-home exam (75%), seminar paper (2,000 words) or class participation (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Completion of this unit satisfies the Jurisprudence/Part 2 requirement of the LLB.*

**Associated degrees:** LL B, UG Study Abroad Program.

What is a constitution? How does it acquire authority and legitimacy? Is there an ideal constitutional model? Can a successful constitution be 'engineered'? This unit of study explores the rise and spread of constitutions in the modern world and examines the theoretical bases upon which constitutions have been designed, interpreted, and evaluated. It considers the difference between the 'old' and the 'new' constitutionalism, with an emphasis on the issue of constitutional legitimacy, including post-regime change and in times of national emergency. It looks at a number of case-studies of constitutional design and adoption, from the United States to Iraq.

## KCDE1101

### Academic Literacies 1

#### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Assessment:** Reading Tasks, Classroom activities, Summary, Essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study provides first year diploma students with the literacy skills necessary to commence university study and succeed. It employs an innovative scaffolded approach that students can adapt for their own teaching practice. The science component of this unit of study introduces students to some of the theoretical, practical and pedagogic issues relevant to the delivery of science in school settings.

## KCDE1102

### Teaching & Learning: Presentation Skills

#### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Assessment:** Assessment will be based on participation and a range of oral and computer based presentation activities. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

Effective teachers must be successful communicators, requiring mastery of a range of oral and visual presentation skills to communicate well with students. This unit of study prepares teachers

to confidently give oral presentations to an audience, to use computer mediated communication for teaching and to apply a range of computer-based skills and formats to present complex information.

### KCDE1103

#### Indigenous Education and Society

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Assessment:** Assessment will be based on participation, workbook; completion of short reviews; reports; and a major essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study will trace the broad sociological history of education in Australia since the cultural invasion of 1788 and critically examine historical events and circumstances as they relate to limited Aboriginal participation in 'westernised' forms of education today. Social and political perceptions of Aboriginal people as a race 'doomed to extinction' were well-documented during the colonial era, and continue to impact negatively on equality of educational opportunity into the 19th century.

### KCDE1104

#### Researching Indigenous Communities

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** 12 Junior credit points including KCDE1101 **Assessment:** Assessment will be based on summary writing and an applied research project conducted in an Indigenous Australian community. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study aims to provide students with a critical understanding of the differing notions of community with particular focus on Aboriginal communities as locations for research. It explores the history, diversity, characteristics and structures of Indigenous Australian communities and their historical and contemporary experiences of research. A range of library and computer-based research skills are also practised. Students will be provided with an opportunity to synthesise these understandings and apply them in a practical setting through a major community-based research project.

### KCDE1201

#### Academic Literacies 2

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** 12 junior credit point, including KCDE1101 **Assessment:** Assessment will be based on a range of practical literacy activities drawing on readings and writing tasks required for concurrently offered units of study, and participation in math-based activities including classroom and take-home worksheets. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

Advanced literacy is an essential requirement for successful students and effective teachers. This unit of study further develops the skills and concepts taught in Academic Literacies 1 through a range of practical activities. The mathematics component of this unit of study introduces students to some basic arithmetic concepts and skills relevant to the performance of administrative duties in teaching contexts, and planning and delivery of mathematics curricula in school settings.

### KCDE1202

#### Teaching and Learning: Curriculum

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Assessment:** report, in-class activities, on-line activities **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

The aim of this unit of study is to introduce students to important concepts related to curriculum; the stakeholders who can influence curriculum and how curriculum is constructed. Teachers are constantly being introduced to new and innovative syllabi developed by education bodies with the intention that they will address the intended outcomes both at school and classroom level. An introduction to a wide variety of syllabi will allow students the opportunity to explore these documents and determine how they shape the development of school curriculum as a major role of the teacher. Aboriginal perspectives are also a major focus within this Unit of Study therefore syllabi will be examined for inclusion of and suggested implementation of Aboriginal perspectives across the curriculum.

### KCDE1203

#### Human Development and Learning

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1101 and KCDE1103 **Assessment:** Worksheets, interviews, minor essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

The systematic study of human development and learning requires careful observation, documentation and analysis of how people grow, change, adapt and acquire new knowledge over time. This unit of study examines the adolescent period of human growth and development. Both Indigenous and non-Indigenous adolescent physical, social, cognitive and emotional development patterns will be addressed, especially within the socio-cultural context of secondary schools. Particular emphasis will be placed upon relationships between the relatively rapid growth and development of the adolescent student and the opportunity for quality learning. This important transitional period from childhood to young adulthood raises significant issues and challenges related to maturation, identity formation, self esteem, propensity for risk taking and influences of both peers and family.

### KCDE1204

#### Human Society and its Environment 1

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1101 and KCDE1202 **Assessment:** Report, case study analysis and lesson plans. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study aims to prepare History/HSIE students to teach skills and understanding necessary to implement current Board of Studies stage 4 and 5 History and HSIE syllabuses.

### KCDE2101

#### Visual Literacy: Cineliteracy

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1201 and KCDE2104 **Assessment:** Attendance and active participation, two short written critical responses, oral presentation, critique and review summary, and film review report and discussion **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study aims to provide an introduction to the theory and practice of 'cineliteracy' as part of an integrated approach to enhancement of visual literacy skills at the tertiary level. The term 'cineliteracy' refers primarily to critical reading, understanding and response to the moving image; drama, film, documentary, television, video and various forms of computer based digital media. Learning opportunities offered by and through this unit will include direct

experience, critical awareness, and applied understanding of concepts and vocabulary employed to analyse 'language' of the moving image.

### KCDE2102

#### Teaching & Learning: Teaching History

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1201 and KCDE1202 **Assessment:** in-class activities, minor essay, major essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study aims to prepare students for the teaching of History Stages 4 and 5. It will mainly focus on students understanding the relevant syllabi, for History, and ways of incorporating any syllabus changes during their teaching. The unit will also include the development of lesson plans and units of work, as well as incorporating key perspectives of the syllabi into their teaching. This unit of study will provide the students with practical suggestions to prepare them for their first in-school experience. A prime focus will be to stimulate ideas about teaching, provide practical strategies for use in the classroom, and to stimulate a passion for teaching History.

### KCDE2103

#### Education Theories

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1201 and KCDE1203 **Assessment:** participation, workbooks, review, reports; and major essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

The purpose of this unit of study is to give students the opportunity to recognise, analyse and assess various theories related to teaching and learning, and to consider the implications and relevance these theories have for classroom practice. Students will also trace the history of teaching and learning theory that has its foundations in Aboriginal pedagogies and culturally inclusive education initiatives such "both-ways" education programs. Students are encouraged to think about their role as Indigenous educators, in developing teaching and learning theories.

### KCDE2104

#### Introduction to Indigenous Australia

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1201 and KCDE1104 **Assessment:** presentation, a learning journal and a research essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

Indigenous cultures have existed in this country for at least sixty thousand years, yet have been interpreted and represented to the world from predominantly non-Indigenous points of view. This unit of study responds to the lack of inclusion of Indigenous histories and knowledges in mainstream pedagogic practice since invasion. It provides an introduction to Indigenous philosophies and theories by critically examining "contact history" and resistance within a decolonising framework.

### KCDE2201

#### Professional Practices 1

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1201 and KCDE1202 **Assessment:** Satisfactory report from the supervising school, reflective journal, portfolio, in-class activities **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study will introduce students to relevant departmental policies and their implementation in schools. The unit also includes a range of professional experiences in schools and other learning contexts, eg., observing, acting as a teacher's aide, teaching in a classroom, and participation in wider school and community activities.

### KCDE2202

#### Aboriginal Studies in Schools

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1201 and KCDE2102 **Assessment:** Participation; workbook; resource analysis and evaluation; lesson plan; presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study introduces students to Aboriginal Studies and how it is intended to follow a developmental sequence from K-12 in NSW schools. There will be opportunities for students to explore the growth, development and implementation of Aboriginal Studies as an integral part of the school curriculum in NSW.

### KCDE2203

#### Indigenous Health and Communities

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1201 and KCDE2104 **Assessment:** presentation, article reviews and major essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

The continuing poor health status of Indigenous people is well documented. However, attempts at improving Aboriginal health have often been met with inappropriate policy and practice. This unit of study aims to give an historical and contemporary understanding of a diverse range of issues impacting on Aboriginal Health. Students are given the opportunity to explore sociological and indigenous frameworks and knowledge's in order to identify a range of strategies which will work towards improving the health of Indigenous Australians. A focus of this unit will be in providing students with the opportunity to explore the ways in which they may work with Aboriginal communities to facilitate self-determination in Aboriginal health.

### KCDE2204

#### Human Society and its Environment 2

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** KCDE1201 and KCDE1204 **Assessment:** 3000 word essay and lesson plan **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available only to students enrolled in the Diploma of Education (Aboriginal)*

**Associated degrees:** Dip Ed (Aboriginal).

This unit of study aims to prepare History/HSIE students to teach the skills and understandings necessary to implement current Board of Studies stage 4 and 5 History and HSIE syllabuses. In addition the unit focuses specifically on developing literacy and numeracy strategies for teaching across a range of age and ability groups and takes an applied approach to the use of ICT in HSIE and History classrooms.

### KCSE3101

#### Evaluation and Assessment in Schools

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Assessment:** assessment plan, assessment instrument, and presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

The focus of this unit of study is to develop an understanding of the importance and purposes of assessment and evaluation and their interconnected relationship to learning. An historical overview of assessment and evaluation is essential to the understanding of current contexts for assessment and student learning in schools.

### KCSE3102

#### Aboriginal Studies: Stages 4, 5 & 6

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Assessment:** major project, in-class activities, teaching program **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study introduces Stages 4, 5 and 6 Aboriginal Studies, which are Board of Studies approved electives in the secondary curriculum. These courses are based on standard Board of Studies designs and, as such, provide students with an excellent first hand experience of the syllabus continuum in the secondary school. Outcomes-based teaching and learning is a feature and students learn to translate this approach into practical teaching, planning and implementation. Students also consider an holistic approach to Aboriginal Studies where the needs of the students, school and community directly influence the nature of program development and content. Consultation, protocols, ethical research practices and a local community focus feature as they do in both syllabuses. Cross curriculum content and skills with a focus on literacy and ICT (Information and Communication Technology) is part of the ongoing development of students becoming multi-skilled, adaptable and pro-active educators in the field of Aboriginal Studies.

### KCSE3103

#### Indigenous Land and Culture

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCDE2104 **Assessment:** reports, in-class quizzes, reports, research essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

The focus of the unit is to develop an understanding of land from an Indigenous perspective. Students will explore how land is represented and symbolised from an Indigenous cultural perspective. Through a broad, cross-disciplinary approach to inquiry, a range of Indigenous contemporary issues and questions relating to land and land use will be examined. These will include: cultural maintenance and transmission, ownership of land, identity and land, land and environment, religious/spiritual connection to land and place, health and education issues relating to concepts of land, visual and performing arts images from the land, Indigenous land use and management, and contemporary concepts of land and culture in selected urban, rural and isolated Australian communities.

### KCSE3104

#### Australia WW1 to Whitlam

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Assessment:** a footnoting exercise, a tutorial paper, an essay plan, and a research essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

The twentieth century saw major transformations in Australian society. From the aftermath of the Great War, this unit of study follows the traumas of Depression and World War II, into periods of less dramatic but still profound change: the post-war boom through the Menzies years; threats posed by the Cold War; the proliferation of nuclear weapons; the impact of immigration; the 1960s youth protest movement and the Vietnam War, and social changes brought about by the Whitlam government. Through a survey of those years and

their aftermath, the unit seeks to frame and enhance historical understanding of issues and challenges which confront Australians today.

### KCSE3201

#### Professional Practices 2

##### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCDE2201 **Assessment:** satisfactory report from school, reflective journal, portfolio, in-class activities **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

Simply mastering teaching skills and strategies cannot fully develop professional practices and craft knowledge in the classroom; they are part of embodied knowledge, learned through an inductive process including observation, participation, reflective discussion and mentoring. There are ranges of practices used by teachers who are recognised as outstanding in their field. This unit seeks to identify such practices and assist students to adapt them for their own teaching style. The unit of study aims, not only to promote learning of essential skills, knowledges and values, but to facilitate the students' initiation into professional practices through a 20-day in-school experience program comprised of a 1-day orientation, and 19 days supervised teaching and observation.

### KCSE3202

#### Teaching Aboriginal Languages

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Assessment:** participation in workshops, essay, lesson plans and associated material, online reflective responses. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study will orient students within the second/foreign language acquisition literature, and present policy, implementation models, teaching methods/approaches and pedagogies, resource and materials design, as well as programming and planning methods with a particular focus on teaching Aboriginal languages.

### KCSE3203

#### Reading Indigenous Writing

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Assessment:** Critical Response, Essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study surveys contemporary literary production by Indigenous Australians and its social and historical contexts. It is designed to foster a critical appreciation of a variety of literary forms such as poetry, the novel and scripts for stage and screen performance, and to explore their relationships to traditional and modern approaches to story-telling and knowledge sharing. It will reflect on expressions of identity, social history and political autonomy, and the evolution of Indigenous literary production in the broader milieu of colonisation, resistance and self-determination. The unit will encourage generic skills in textual, theoretical and historical analysis, and will stimulate the development of students' personal creative expression.

### KCSE3204

#### Human Society and its Environment 3

##### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** KCDE2204 **Assessment:** presentation, unit of work, teaching and learning

resource folder. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study aims to prepare History /HSIE students to teach the skills and understandings necessary to implement current Board of Studies stage 6 History and HSIE syllabuses. The unit focuses predominantly on the teaching and learning of Modern and Ancient History with an introduction to teaching Legal Studies, Geography, Society and Culture and Business Studies. Emphasis is placed on assessing teaching and learning at the senior level.

#### KCSE4101

##### Special Education: An Introduction

###### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Assessment:** fieldwork report (1500 words); tutorial presentation and participation (1500 words); academic paper (1500 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This subject addresses issues relating to the education of students with special education needs. Issues addressed include the impact of current legislation, evidence based approaches to curriculum, teaching and learning practices for students with special education needs. A specific focus is given to managing challenging behaviours of students in a range of settings.

#### KCSE4102

##### Issues in Indigenous Rights

###### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCDE2104 **Assessment:** participation, case studies and an essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study examines the social, political and legal history of the Indigenous Australian struggle for fundamental human rights, engaging particularly with self-determination and Indigenous rights to land, law, economy and culture. It will promote students' consideration of these issues in both national and international contexts by investigating case studies of key people, events and institutions, specifically those which have galvanised debate and stimulated change. The unit will build generic skills in social and historical research and theoretical analysis, encouraging students to develop an informed and independent assessment of contemporary Indigenous Australian actions toward self determination in a range of social, legal and cultural spheres.

##### 20th Century Europe: Age of Catastrophe?

###### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Assessment:** tests, reflective paper, a tutorial paper, and a research essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study aims to provide an introduction to the central events of early twentieth-century European history, a period which historian Eric Hobsbawm described as 'an age of catastrophe'. This unit, which examines the tumultuous events that occurred during the early twentieth-century, takes World War One as its starting point, investigating the impact this war had on the changing politics, nations, culture and ideology of Europe. The unit then explores these themes in detail by focusing on individual national case studies, and, in particular, the leaders considered instrumental in enacting these

changes. Students will also consider the lived history, that is, the social aspects of the changing politics in England, Russia and Germany. Finally, students will examine European history from a broader perspective by tracing the history of four examples of international conflict.

##### Human Society and its Environment 4

###### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCSE3204 **Assessment:** mini-personal interest project, work education resource kit. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study aims to prepare students to teach the skills and understandings necessary to implement current Board of Studies stage 6 Society and Culture, and stage 5 Work Education syllabuses.

#### KCSE4201

##### Professional Practices 3

###### Other

**Credit points:** 6 **Session:** S1 Late Int **Classes:** Block Mode **Prerequisites:** KCSE3201 **Assessment:** satisfactory report from school practicum, reflective journal, portfolio, in-class activities **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study will be integrated with in-school teaching experience, and explore different methods of expanding knowledge of professional practice through building professional alliances and mentor relationships. Using a selected case study methodology, the unit will provide opportunities for student teachers to gain insights into ways in which construction of individual teaching style can be analysed and understood in terms of contemporary educational theories and practices. The unit, overall, will extend reflective professional experience in schools and other teaching and learning contexts.

#### KCSE4202

##### Knowledge, Self and Education

###### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Assessment:** seminar paper, major essay **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study takes a critical perspective on two concepts central to our understanding of education: the 'self', or individual and 'knowledge'. Assuming that in some significant ways both are socially constructed, the course presents a variety of theoretical and research resources for understanding recently developed ways of looking at educational phenomena as social and historical discursive practice.

#### KCSE4203

##### Colonising and Decolonising the Pacific

###### Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Assessment:** Presentation, summary, research essay, 2 quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

Even before Europeans officially 'discovered' the New World they had imagined what it might be. Notwithstanding decolonisation, this world and its people have continued to be represented according to changing Western view points and priorities. Arguably categories like "race", "blood" and "culture" continue to influence Western historical accounts, and colonised people are often still classified according to historical

models determined by Western intellectual and political priorities. In this unit of study we examine this process of representation and Indigenous challenges to it, focusing on the islands of the Pacific. Three key themes will be investigated: (1) history and the representation of the Pacific; (2) Colonising the Indigenous peoples of the Pacific; and (3) the contemporary Pacific - decolonisation and environmental issues.

#### KCSE4204

##### Human Society and its Environment 5 Other

**Credit points:** 6 **Session:** S2 Late Int **Classes:** Block Mode **Prerequisites:** KCSE4104 **Assessment:** preparation of a legal studies teaching resource folder. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode  
*Note: Department permission required for enrolment. Note: Available to students enrolled in Koori Centre block-mode courses only.*

**Associated degrees:** B Ed (Sec:Aboriginal).

This unit of study aims to prepare students to teach the knowledge, skills and understandings necessary to implement the current Board of Studies Legal Studies stage 6 syllabus. The unit of study focuses on current HSC Legal Studies assessment procedures and available resources to teach this subject to diverse student groups.

#### KOCR2600

##### Indigenous Australia: An Introduction

#### Other

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** (2 lec x 1hr & 1 x 1hr tut)wk **Prerequisites:** 18 Junior credit points **Prohibitions:** KOCR2100 **Assessment:** one 2000 word essay (40%); one tutorial presentation (10%); one 1000 word tutorial paper (20%); WebCT activities equivalent to 1500 words (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B S W, UG Study Abroad Program.

This unit of study explores the historical, social and political contexts of the survival and growth of Aboriginal and Torres Strait Islander cultures and philosophies. The unit is structured around the themes of representation and identities; the colonisation of land and people; and resistance and agency. It will provide students with an introduction to Indigenous philosophies and theories by examining 'contact history' and resistance within a critical framework.

**Credit points:** 6 **Teacher/Coordinator:** Mr Pete Minter **Session:** Semester 2 **Classes:** (1 x 1hr lec and 1 x 2hr tut)wk **Prerequisites:** KOCR2100 or KOCR2600 **Prohibitions:** KOCR2102 **Assessment:** Seminar Presentation, Critical Review, Media Report Research Project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program.

In the second half of the 20th Century Aboriginal and Torres Strait Islander peoples began to culturally and politically recover from the effects of colonisation and assimilation. Having had fundamental human rights severely limited by state and federal legislation, and having experienced years of disempowerment, dislocation and social disruption, Indigenous peoples have sought to reclaim independent social and political power. This unit of study explores national and international developments in this history, addressing issues of political and social representation, and examining contemporary analyses of Indigenous rights to self-determination in legal, political and community spheres.

#### KOCR2604

##### Colours of Identity: Indigenous Bodies

#### Other

**Credit points:** 6 **Teacher/Coordinator:** Ms Shino Konishi **Session:** Semester 1 **Classes:** (1 x 2hr lec and 1 x 2hr tut) wk **Corequisites:** KOCR2100 or KOCR2600 **Assessment:** one presentation; one take-home exam (30%); one 2000 word research essay (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program.

This unit of study explores various ways in which the body contributes to the formation of Indigenous Australian identity, both from within and without. Using contemporary theoretical approaches we will explore the ways in which Indigenous Australian bodies were constructed by colonial discourses; how they were 'othered', fragmented, gendered, and subordinated. We will also explore how Indigenous agency has manifested through the body, for example through withholding labour, political activism, and creative re-presentations of the body.

#### KOCR2605

##### Speaking Gamilaraay 1

#### Other

**Credit points:** 6 **Teacher/Coordinator:** Br John Giacon **Session:** Semester 1 **Classes:** (1 x 3hr seminar)wk **Assessment:** Homework sheets (6) (2000 words), Oral performance (6) (2000 words), Essay (culture topics) (1000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program.

This unit of study will provide students with a basic competence in speaking, understanding, reading and writing Gamilaraay sufficient to recognise and construct simple utterances in the language, and to

understand its relationships with other languages. It will require them to: identify, define and analyse problems and identify or create processes to solve them; use information in critical thinking and problem solving contexts to construct knowledge; respond effectively to unfamiliar problems in unfamiliar contexts; have an appreciation of and respect for diversity, and; use oral, written, and visual communication to further their own learning and as tools for interacting and relating to others.

### KOCR2606

#### Torres Strait Histories and Experiences

##### Other

**Credit points:** 6 **Teacher/Coordinator:** Ms Leah Lui-Chivizhe **Session:** Semester 2 **Classes:** 1 x 1hr lec and 1 x 2hr tut) wk **Prerequisites:** KOCR2100 or KOCR2600 **Assessment:** tutorial presentation(20%), critical review(30%) and essay (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program.

Torres Strait Islanders are often talked about as Australia's other indigenous minority and many Australians know little about the region and its people. This Unit of Study will introduce students to Torres Strait societies through the themes of governance, migration and resource management. Students will learn about the diversity within Torres Strait communities and how Torres Strait Islander experiences of colonisation and responses to colonisation were and are as complex as those of Aboriginal people.

### KOCR2607

#### Indigenous Creative Expression

##### Other

**Credit points:** 6 **Teacher/Coordinator:** Ms Michelle Blanchard **Session:** Semester 2, Summer Main **Classes:** 1 x 3hr seminar **Assessment:** essay (40%), seminar presentation (25%) and creative exhibit (35%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, UG Study Abroad Program, UG Summer/Winter School.

The concept of 'traditional' versus 'contemporary' is very much at the forefront of defining meanings for art works created by Indigenous artists. Typically works created by Indigenous artists are delegated to either one of these categories. This unit will examine the theoretical frameworks which position Indigenous artists, through the study of Indigenous artistic expression across a range of genres. It will provide students with the opportunity to engage with Indigenous artists on a formal and informal basis and to discuss complex issues pertaining to Indigenous works, in performance, literature(writing), music, dance and film.

### KRNS1621

#### Korean 1

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 1 **Classes:** 4 hours per week **Prohibitions:** KRNS1101 **Assessment:** Weekly assignments (200 words each), 2 oral tests (1000 words), 1 hour final written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is a comprehensive beginners course which will lay the foundation for acquiring oral, aural, reading and writing skills in Korean. Students will acquire oral communication skills based on the given grammar points and topics. Various communicative approaches will be employed for the class activities. Students are required to give group presentations during the semester. On the basis of grammar introduced, the reading and writing of short texts will be done in each week.

### KRNS1622

#### Korean 2

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** KRNS1621 or KRNS1101 **Prohibitions:** KRNS1102 **Assessment:** Weekly assignments (200 words

each), 2 oral tests (1000 words), 1 hour final written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

### KRNS1631

#### Korean 9

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** Heritage speakers of Korean who have less than 2 years of formal education in Korean **Prohibitions:** KRNS1301 **Assessment:** 5 assignments (200 words each), major essay (1500 words), 2 hour final written exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is specially designed for background speakers of Korean, largely for the improvement of their reading and writing skills. The reading texts used in the class will be mostly authentic materials from various sources, such as literary and non-literary essays, newspapers and magazine articles. For a given main reading text each chapter provides a complete list of words and expressions, comprehension exercises, discussion and composition sections. The discussion section gives students opportunities to discuss some contemporary social issues in Korean, while the composition section gives learners an opportunity to write something related to the topics discussed.

### KRNS1632

#### Korean 10

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** KRNS1301 or KRNS1631 **Prohibitions:** KRNS1302 **Assessment:** 5 assignments (equivalent to 200 words each), major essay (1500 words), 2 hour final written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

### KRNS1801

#### Korean Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud.

### KRNS2621

#### Korean 3

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Ki-Sung Kwak **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** KRNS1102 or KRNS1622 **Prohibitions:** KRNS2001 **Assessment:** 6 assignments (200 words each), two 15 minute oral tests (1000 words), 2 hour final written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

As an intermediate language unit, students are expected to gain extensive language skills in a diverse range of communicative settings. Interactive exercises and activities will provide students with opportunities to practice and improve their skills in speaking, reading and writing.

### KRNS2622

#### Korean 4

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Pankaj Mohan **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** KRNS2001 or KRNS2621 **Prohibitions:** KRNS2002 **Assessment:** 6 assignments (200 words each), two 15 minute oral tests (1000 words), 2 hour final written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

As an intermediate language subject, students are expected to gain extensive language skills in a diverse range of communicative settings. Interactive exercises and activities will provide students with opportunities to practice and improve their skills in speaking, reading and writing.

### KRNS2671

#### Translation and Interpretation

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** KRNS1302 or KRNS1632 or native speakers of Korean **Prohibitions:** KRNS2400 **Assessment:** Continuous assessment, consisting of 6 tasks (equivalent to 400 words each), 2 hour final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims at providing students with such useful skills in Korean language as translation and interpretation from Korean into English and vice-versa. The unit is divided into three modules: Korean-English translation, English-Korean translation and interpretation. Students will learn how to translate and interpret texts chosen from both print and audio-visual media from a wide range of fields, including society, culture, politics, economics, science and technology.

### KRNS2673

#### Korean Phonology

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** 12 credit points in KRNS or LNGS, or native speakers of Korean **Prohibitions:** KRNS2317, KRNS2318 **Assessment:** 10 weekly assignments (equivalent to 200 words each), 2 hour final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit introduces the sound system of the Korean language - Korean phonology. Some linguistics background is recommended, although it is not necessary. In addition to the two-hour lecture, there will be a one-hour seminar in which further detailed issues are discussed in depth. From the fifth week, there will be one or two weekly problem solving assignments.

### KRNS2675

#### Contemporary Korean Society and Culture

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** 12 junior credit points in Arts **Prohibitions:** KRNS2500 **Assessment:** 15 minute presentation (equivalent to 1000 words), 2000 word essay on an approved topic, 2 hour final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit will provide students with a good understanding of contemporary Korean society and culture by examining not only current issues in Korea (such as legal, political, economic, educational and family matters), but also the Korean people's living style affected by these various issues. The latter will include daily life, gender issues, business culture, entertainment, youth and popular culture. Students also look at the application and/or implication of a certain Korean culture or practice to domestic and international communities; e.g. to South Korea which pursues rapid globalisation or to a multi-cultural society like Australia.

### KRNS2681

#### Korean In-Country Study A

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 1, Semester 2 **Prerequisites:** KRNS1101 or KRNS1621 or KRNS1301 or KRNS1631 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

### KRNS2682

#### Korean Studies Exchange

## Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

### KRNS3621

#### Korean 5

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Pankaj Mohan **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** KRNS2002 or KRNS2622 **Prohibitions:** KRNS3001 **Assessment:** Continuous class assessment, consisting of 8 assignments (200 words each), 2 oral tests (1000 words), 2 hour final written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit aims to further develop oral and written communication skills beyond the intermediate level. Students will acquire fluency in oral communication, with particular emphasis on sophistication and formality of speech. Reading and writing skills are developed through the use of structured texts from the prescribed textbook and selections of authentic reading materials from a range of sources.

### KRNS3622

#### Korean 6

## Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Pankaj Mohan **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** KRNS3001 or KRNS3621 **Prohibitions:** KRNS3002 **Assessment:** Continuous class assessment consisting of 8 assignments (200 words each), 2 oral tests (1000 words), 2 hour final written exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit follows on from KRNS3621 and is designed to extend the student's command of the Korean language beyond the level completed in the previous semester. Through readings of authentic works from Korean newspapers, magazines and academic texts, and structured discussions based on these materials, this unit will introduce students to a wide range of sentence patterns, enrich their vocabulary and enable them to read advanced texts independently.

### KRNS4011

#### Korean Honours A

## Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Duk-Soo Park **Session:** Semester 1, Semester 2 **Classes:** 2 hours per week **Prerequisites:** Credits in all Senior KRNS units including KRNS3901 and KRNS3902 **Assessment:** Coursework assessments (50%) and 15000-20000 word thesis (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

Honours IV students are required to complete all four components KRNS4011, KRNS4012, KRNS4013, and KRNS4014. These components comprise coursework from a pool of postgraduate coursework offerings, plus a 15000-20000 word thesis on an approved topic. Students complete coursework in the following areas:

1. Korean language and linguistics: Centered around reading material on Korean language and linguistics. The major topics include Korean phonology, morphology, syntax, sociolinguistics, and language teaching and learning.
2. Korean history and thought: Focused on conceptual and methodological issues in Korean history, religions, thought, or value systems, examining both Korean and Western literatures in the field(s).
3. Korean media and communication: Cultural, social and political aspects of mass media and communication in Korea. The major topics include media/communication industry, production, content and media/communication policy in Korea.

### KRNS4012

#### Korean Honours B

## Arts

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Credits in all senior KRNS units including KRNS3901 and KRNS3902 **Corequisites:** KRNS4011 **Assessment:** Will be based on seminar coursework. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Asian Stud)(Hons), B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

Refer to KRNS4011

# University undergraduate units of study – L

## LATN1600

### Introductory Latin 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lindsay Watson **Session:** Semester 1 **Classes:** four 1 hour lectures per week **Prohibitions:** LATN1001, LATN2611, LATN2620 **Assessment:** written assignments, class quizzes and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit is designed for beginners, though it is available to anyone who has not completed HSC Latin. No previous knowledge of a foreign language is assumed and all grammatical concepts encountered will be explained. The unit aims to introduce the basics of Latin through the study of elementary grammar and the reading of easy, mostly made-up, sentences and passages. Many of the latter are based on 'real' Latin texts, such as Ovid's *Metamorphoses*, providing an introduction to Roman literature.

## LATN1601

### Introductory Latin 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Roche **Session:** Semester 2 **Classes:** four 1 hour lectures per week **Prerequisites:** LATN1600 or LATN1001 or LATN2611 **Prohibitions:** LATN1002, LATN2612, LATN2621 **Assessment:** weekly assignments, class quizzes and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit builds on the basic knowledge already acquired in LATN1600 and introduces further accidence along with most subordinate clause types and common constructions. Grammatical knowledge is reinforced by translation of sentences from and into Latin, while reading skills are further developed through the reading of simple prose and verse texts. The unit provides both a basis for further Latin study and essential background for students specialising in subjects such as Ancient History, Archaeology, Medieval Studies and Philosophy.

## LATN1801

### Latin Exchange

#### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S.

## LATN1802

### Latin Exchange

#### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S.

## LATN2600

### Intermediate Latin 1

#### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** two 1 hour lectures, one 1 hour seminar and one 1 hour tutorial (optional for those who have passed HSC Latin) per week **Prerequisites:** HSC Latin or LATN1601 or LATN2612 or LATN2621 or LATN1002 **Prohibitions:** LATN2603, LATN1101 **Assessment:** written assignments, one 1500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit concentrates on consolidating the basic knowledge acquired in the first year of Latin or at school through language study and the close reading of one or two texts (to be advised on the department of Classics & Ancient History web site prior to commencement of lectures). The texts will also be studied from the viewpoint of their literary qualities and generic and socio-historical background.

## LATN2601

### Intermediate Latin 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Frances Muecke **Session:** Semester 2 **Classes:** two 1 hour lectures and one 1 hour seminar per week **Prerequisites:** LATN2600 or LATN1101 **Prohibitions:** LATN1102 **Assessment:** written assignments, one 1500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit concentrates on consolidating the basic knowledge of the Latin language already acquired through language study and the close reading of one or two important texts (to be advised on the department of Classics & Ancient History web site prior to commencement of lectures). Acquaintance with Roman literature will also be expanded through studying these texts with a view to evaluating their literary aims and qualities and examining their generic and socio-historical background.

## LATN2620

### Reading Latin 1

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lindsay Watson **Session:** Semester 1 **Classes:** four 1 hour lectures per week **Prohibitions:** LATN1600, LATN1001, LATN2611 **Assessment:** written assignments, class quizzes and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit allows students specialising in areas such as Ancient History to acquire a knowledge of basic Latin at senior level. The unit, though aimed at beginners, is available to anyone who has not completed HSC Latin. The basics of Latin will be introduced through the study of elementary grammar and the reading of easy, mostly made-up, sentences and passages. Many of the latter are based on 'real' Latin texts, such as Ovid's *Metamorphoses*, providing an introduction to Roman literature.

## LATN2621

### Reading Latin 2

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Roche **Session:** Semester 2 **Classes:** four 1 hour lectures per week **Prerequisites:** LATN2620 or LATN2611 **Prohibitions:** LATN1601, LATN1002, LATN2612 **Assessment:** written assignments, class quizzes and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit builds on the basic knowledge already acquired in LATN2620 and introduces further accidence along with most subordinate clause types and common constructions. Grammatical knowledge is reinforced by translation of sentences from and into Latin, while reading skills are further developed through the reading of simple prose and verse texts. The unit provides both a basis for further Latin study and essential background for students specialising in subjects such as Ancient History, Archaeology, Medieval Studies and Philosophy.

## LATN2804

### Latin Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

## LATN2805

### Latin Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

## LATN2806

### Latin Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

## LATN2810

### Latin Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

## LATN2811

### Latin Exchange Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

## LATN3600

### Advanced Latin Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr Paul Roche **Session:** Semester 1 **Classes:** three 1 hour seminars per week **Prerequisites:** LATN2601 or LATN2604 or LATN1102 **Prohibitions:** LATN3607 **Assessment:** written assignments, language exercises and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit concentrates on providing students with the advanced language skills necessary for the understanding and appreciation of more difficult Latin authors. These skills will be fostered both by formal language classes and by the close reading of Latin texts (to be advised on the department of Classics & Ancient History web site prior to commencement of lectures). Through this reading, students will also gain familiarity with the style and language of some important Latin authors.

## LATN3602

### Latin Epic 2 Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms Frances Muecke **Session:** Semester 2 **Classes:** three 1 hour lectures per week **Corequisites:** LATN2601 **Assessment:** written assignments, one 1500 word essay and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit is aimed at students who have taken introductory Latin and are in their 2nd or 3rd year of Latin. It is not recommended for students with HSC Latin who are in their 3rd year. The aim is to provide familiarity with the style and the literary and socio-historical background of Latin epic through the reading of one selected book (to be advised on the department of Classics & Ancient History web site).

## LATN3603

### Latin Imperial Poetry Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Lindsay Watson **Session:** Semester 1 **Classes:** three 1 hour seminars per week **Corequisites:** LATN3600 or LATN3607 **Assessment:** written assignments and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit, which concentrates on the poetry of the Empire, aims to expand students' knowledge of this period of Roman literature through a study of one or more important texts (to be advised on the department of Classics & Ancient History web site prior to commencement of lectures). Language skills necessary for the understanding of the texts will be assumed and emphasis placed on interpretation, literary appreciation and the generic and/or historical background of the texts.

## LATN3605

### Latin Republican Prose Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Jeffrey Tatum **Session:** Semester 2 **Classes:** three 1 hour seminars per week **Prerequisites:** LATN3600 or LATN3607 **Assessment:** written assignments and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Lang Stud, UG Study Abroad Program.

This unit, which concentrates on the prose literature of the Republic, aims to expand students' knowledge of this period of Roman literature through a study of one or more important texts (to be advised on the department of Classics & Ancient History web site prior to commencement of lectures). Language skills necessary for the understanding of the texts will be assumed and emphasis placed on interpretation, literary appreciation and the generic and/or historical background of the texts.

## LATN4011

### Latin Honours A Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Alastair Blanshard **Session:** Semester 1, Semester 2 **Classes:** 3 seminars per week **Prerequisites:** Credit average in 42 senior credit points of Latin including two of LATN3603, 3604, 3605, 3606 plus 6 additional senior credit points of Greek, Latin or Ancient History. **Assessment:** All of the major components of the Honours year will be assessed. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), Dip Lang Studs (Hons).

Honours consists of a number of seminars, coursework and the completion of a substantial research thesis. For details please contact the Chair of Department or the Honours Co-ordinator (where applicable) or obtain a copy of the relevant Student Information Guide from the SOPHI Office.

## LATN4012

### Latin Honours B Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr Alastair Blanshard **Session:** Semester 1, Semester 2 **Corequisites:** LATN4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Hons), Dip Lang Studs (Hons).

Refer to LATN4011

**LAWS1001****Law, Lawyers and Justice****Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Rita Shackel **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS1000 **Prohibitions:** LAWS1007, LAWS3002, LAWS3004, LAWS2013 **Assessment:** class participation, 1x2500wd assignment, 1x assignment, and 1x open book exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to Graduate Law candidates proceeding under the old LLB resolutions. Students attend classes for LAWS2013 The Legal Profession.*

**Associated degrees:** LL B, UG Study Abroad Program.

Law, Lawyers and Justice has a distinct intellectual focus. It is the only unit in the curriculum that concentrates on the regulation of the legal profession and legal practice. Part 1 of Law, Lawyers and Justice examines the nature and structure of the legal profession, historical struggles to regulate the profession, and the current regulatory regime in New South Wales. Part 2 explores specific forms of legal practice, highlights the major cultural and economic forces that challenge attempts to regulate the profession and canvasses alternative ways of organising legal practice and providing legal services. Part 3 investigates the adversary system and considers its advantages and limitations. More specifically, the material in Part 3 addresses how the adversary system moulds lawyers' behaviour within and outside the judicial process and analyses current regulatory measures aimed at curbing the undesirable aspects of an adversarial culture. Part 4 evaluates the way clients are treated by lawyers and suggests strategies to change their conduct in the interests of both equality and effective communication. Furthermore, it examines lawyers' duties to their clients and the ways in which the rules and principles of confidentiality, legal professional privilege and conflicts of interest shape the advice and representation lawyers provide for their clients.

**LAWS1002****Contracts****Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Gregory Tolhurst **Session:** Semester 1 **Classes:** 2x2hr lectures or seminars/wk **Prerequisites:** LAWS1000 or LAWS1006 **Prohibitions:** LAWS1015, LAWS2008 **Assessment:** class participation (10%), 1x assignment (30%) and 1x2hr exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to graduate law candidates proceeding under the old LLB resolutions.*

**Associated degrees:** B A, LL B, B Com, LL B, B Ec (Soc Sc), LL B, B Ec, LL B, B Ec Soc Sc, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program, UG Summer/Winter School.

Contract law provides the legal background for transactions involving the supply of goods and services and is, arguably the most significant means by which the ownership of property is transferred from one person to another. It vitally affects all members of the community and a thorough knowledge of contract law is essential to all practising lawyers. In the context of the law curriculum as a whole, Contracts

provides background which is assumed knowledge in many other units. The aims of the unit are composite in nature. The central aim is to provide an understanding of the basic principles of the common law, equity and statutes applicable to contracts. A second aim is to provide students an opportunity to critically evaluate and make normative judgments about the operation of the law. As Contracts is basically a case law unit, the final aim of the unit of study is to provide experience in problem solving through application of the principles derived from decided cases. Successful completion of this unit of study is a prerequisite to the elective unit Advanced Contracts.

**LAWS1003****Criminal Law****Law**

**Credit points:** 8 **Teacher/Coordinator:** Prof Mark Findlay **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS1000 or LAWS1006 **Prohibitions:** LAWS1016, LAWS2009, LAWS3001 **Assessment:** class participation, 1x 2000wd problem, 1x2000wd essay and 1x 2hr exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to candidates proceeding under the old LLB resolutions.*

**Associated degrees:** B A, LL B, B Com, LL B, B Ec (Soc Sc), LL B, B Ec, LL B, B Ec Soc Sc, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program.

This unit of study is designed to introduce the general principles of criminal law and process as they operate in NSW, and to critically analyse these in their contemporary social context. In order to achieve these goals, the unit will consider a range of socio-legal literature, and will focus on particular substantive legal topics. Although the topic structure is necessarily selective, it is intended that students will gain a broad understanding of crime and justice issues, as well as of the applications of the criminal law. Students will encounter problem-based learning and will be encouraged to challenge a range of conventional wisdom concerning the operation of criminal justice. This unit of study is designed to assist students in developing the following understandings: (1) A critical appreciation of certain key concepts which recur throughout the substantive criminal law. (2) A knowledge of the legal rules in certain specified areas of criminal law and their application. (3) A preliminary understanding of the working criminal justice system as a process and the interaction of that process with the substantive criminal law. (4) A preliminary knowledge of how the criminal law operates in its broader societal context. (5) Through following the process of proof in a criminal prosecution and its defense, to understand the determination of criminal liability. The understandings referred to in the foregoing paragraphs will have a critical focus and will draw on procedural, substantive, theoretical and empirical sources. The contradictions presented by the application of legal principle to complex social problems will be investigated.

**LAWS1004****Federal Constitutional Law****Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Peter Gerangelos **Session:** Semester 1 **Classes:** 2x2hr seminars/wk for 10 weeks **Prerequisites:** LAWS1000 **Prohibitions:** LAWS2011, LAWS3000, LAWS3003 **Assessment:** 2 x mid-semester assignments or exam and 1x final exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to Graduate Law candidates proceeding under the old LLB resolutions. Students attend classes for LAWS2011.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study aims to achieve an understanding of the principles of Australian constitutional law. The unit commences with an overview of the Commonwealth Constitution within the Australian legal and political framework. Substantive topics include, but are not confined to: the defence power, the marriage power, the external affairs power, federalism (including state constitutions and the relationship between Commonwealth and state laws); economic and fiscal power and relations (including the corporations power, the trade and commerce power, freedom of interstate trade, and excise); the judicial power of the Commonwealth; express and implied constitutional rights and freedoms; and principles of constitutional interpretation. Other topics

may be covered, especially if a constitutional power becomes controversial or topical. The unit aims to develop a capacity to evaluate the principles of constitutional law critically, from the perspective of both doctrine and policy.

## LAWS1006

### Foundations of Law Law

**Credit points:** 6 **Teacher/Coordinator:** Professor David Kinley (Combined), Mr Fady Aoun (Graduate) **Session:** Semester 1 **Classes:** Combined: 1x1hr lec and 1x2hr seminar/wk; Graduate: The unit is taught to Graduate Law 1 students on an intensive basis over three weeks. The aim of this is to give students a good grounding in the basic legal skills needed for law studies before underta **Prohibitions:** LAWS1000 **Assessment:** Combined: class participation (20%), case analysis (30%), essay (50%); Graduate: class participation (20%), 1x1000wd essay (10%), 1x1800wd case assignment (20%) and 1x3000wd essay (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program.

This unit of study provides a foundation core for the study of law. We aim to provide a practical overview of the Australian legal system, an introduction to the skills of legal reasoning and analysis which are necessary to complete your law degree, and an opportunity for critical engagement in debate about the role of law in our lives. The course will introduce students to issues such as: (i) the development of judge made and statute law; (ii) the relationship between courts and parliament; (iii) the role and function of courts, tribunals and other forms of dispute resolution; (iv) understanding and interrogating principles of judicial reasoning and statutory interpretation; (v) the relationship between law, government and politics; (vi) what are rights in Australian law, where do they come from and where are they going; (vii) the development and relevance of international law.

## LAWS1012

### Torts Law

**Credit points:** 6 **Teacher/Coordinator:** Mr Ross Anderson (Graduate), Assoc Prof Barbara McDonald (Combined) **Session:** Semester 1, Semester 2 **Classes:** Combined: 1x2hr lectures and 1x1hr seminars/wk; Graduate: 3x4hr seminar/wk for 3 weeks and 1x3hr seminar in week 13. **Prerequisites:** LAWS1006 **Prohibitions:** LAWS1005, LAWS1010, LAWS3001 **Assessment:** Graduate: 1x1hr class test (30%) and 1x2hr exam (70%); Combined: 2500w assignment (30%), tutorial participation (10%) and 1x2hr exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program.

This is a general introductory unit of study concerned with liability for civil wrongs. The unit seeks to examine and evaluate, through a critical and analytical study of primary and secondary materials, the function and scope of modern tort law and the rationale and utility of its governing principles. Particular topics on which the unit will focus include:

- (a) The relationship between torts and other branches of the common law including contract and criminal law;
- (b) The role of fault as the principal basis of liability in the modern law;
- (c) Historical development of trespass and the action on the case and the contemporary relevance of this development;
- (d) Trespass to the person (battery, assault, and false imprisonment);
- (e) Trespass to land and private nuisance;
- (f) The action on the case for intentional injury;
- (g) Defences to trespass, including consent, intellectual disability, childhood, necessity and contributory negligence;
- (h) Development and scope of the modern tort of negligence, including detailed consideration of duty of care and breach of duty and causation and remoteness of damage with particular reference to personal and psychiatric injury;

- (i) Compensation for personal injuries, including special and alternative compensation schemes;
- (j) Injuries to relational interests, including compensation to relatives of victims of fatal accidents;
- (k) Defences to negligence.

## LAWS1013

### Legal Research I Law

**Teacher/Coordinator:** Mr Graeme Coss **Session:** Semester 1, Semester 2 **Classes:** Combined Law: 6x1hr seminars **Corequisites:** LAWS1006 **Prohibitions:** LAWS1008 **Assessment:** Satisfactory attendance, WebCT-based quizzes and 1x in-class test **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions. Semester 1 classes are for Combined Law candidates in the faculties of Arts, Engineering and Science. Semester 2 classes are for Combined Law candidates in the Faculty of Economics & Business.*

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program.

This is a compulsory unit taught on a pass/fail basis. The aim of the unit is to introduce you to finding and citing primary and secondary legal materials and introduce you to legal research techniques. These are skills which are essential for a law student and which you will be required to apply in other units.

## LAWS1014

### Civil and Criminal Procedure Law

**Credit points:** 6 **Teacher/Coordinator:** Professor Mark Findlay **Session:** Semester 1, Semester 1b **Classes:** 2x2hr seminars/wk (combined), 3x4hr seminars a week for 3 weeks followed by 1x3hr seminar in week 13 (graduate) **Prerequisites:** LAWS1006 **Prohibitions:** LAWS1001, LAWS1007, LAWS3002, LAWS3004 **Assessment:** 1x tutorial assessment (25%) and 1x 2hr final exam (75%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program.

This unit of study aims to introduce students to civil and criminal procedure. It is concerned with the procedures relating to civil dispute resolution and criminal justice which are separate to the substantive hearing. The unit will consider the features of an adversarial system of justice and its impact on process. Recent reforms to the adversarial system of litigation will be explored. The civil dispute resolution part of the unit will cover alternative dispute resolution, the procedures for commencing a civil action, case management, gathering evidence and the rules of privilege. Criminal process will be explored by reference to crime and society, police powers, bail and sentencing. International dispute resolution will also be introduced. The course focuses on practical examples with consideration of ethics, and contextual and theoretical perspectives.

## LAWS1015

### Contracts Law

**Credit points:** 6 **Teacher/Coordinator:** Dr Greg Tolhurst **Session:** Semester 1, Semester 1b, Summer Late **Classes:** Combined: 2x2hr lectures or seminars/wk; Graduate: 3x4hr seminar/wk for 3 weeks and 1x3hr seminar in week 13. **Prerequisites:** LAWS1006 **Prohibitions:** LAWS1002, LAWS2008 **Assessment:** class participation (10%) and 1x2hr exam (90%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program, UG Summer/Winter School.

Contract law provides the legal background for transactions involving the supply of goods and services and is, arguably the most significant means by which the ownership of property is transferred from one person to another. It vitally affects all members of the community and a thorough knowledge of contract law is essential to all practising

lawyers. In the context of the law curriculum as a whole, Contracts provides background which is assumed knowledge in many other units. The aims of the course are composite in nature. The course examines the rules that regulate the creation, terms, performance, breach and discharge of a contract. Remedies and factors that may vitiate a contract such as misrepresentation are dealt with in Torts and Contracts II. The central aim of the course is to provide an understanding of the basic principles of contract law and how those principles are applied in practice to solve problems. Students will develop the skills of rules based reasoning and case law analysis. A second aim is to provide students an opportunity to critically evaluate and make normative judgments about the operation of the law. Successful completion of this unit of study is a prerequisite to the elective unit Advanced Contracts.

### **LAWS1016** **Criminal Law** **Law**

**Credit points:** 6 **Teacher/Coordinator:** Prof Mark Findlay **Session:** Semester 2 **Classes:** Combined: 2x2hr seminar/wk; Graduate: 3x4hr seminar/wk for 3 weeks and 1x3hr seminar/wk in week 13. **Prerequisites:** LAWS1006, LAWS1014 **Prohibitions:** LAWS1003, LAWS3001, LAWS2009 **Assessment:** class participation (10%), 1x 2000wd problem (40%) and 1x 2hr exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program.

This unit of study is designed to introduce the general principles of criminal law in context as they operate in NSW, and to critically analyse these in their contemporary social and political relevance. In order to achieve these goals, the unit will consider a range of theoretical literature as well as critical commentary, and will focus on particular substantive legal topics in problem-centred contexts. Although the topic structure is necessarily selective, it is intended that students will gain a broad understanding of crime and justice issues, as well as of the applications of the criminal law. Students will encounter problem-based learning and will be encouraged to challenge a range of conventional wisdom concerning the operation of criminal justice. This unit of study is designed to assist students in developing the following understandings: (1) A critical appreciation of certain key concepts which recur throughout the substantive criminal law. (2) A knowledge of the legal rules in certain specified areas of criminal law and their application. (3) A preliminary knowledge of how the criminal law operates in its broader societal context. (4) Through following the process of proof in a criminal prosecution and its defense, to understand the determination of criminal liability. The understandings referred to in the foregoing paragraphs will have a critical focus and will draw on procedural, substantive, theoretical and empirical sources. The contradictions presented by the application of legal principle to complex social problems will be investigated.

### **LAWS1017** **Torts and Contracts II** **Law**

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Barbara McDonald (Combined), Mr Ross Anderson (Graduate) **Session:** Semester 2, Semester 2b **Classes:** 1x2hr lecture and 1x2hr tutorial/wk (combined), 3x4hr seminars/wk for 3 weeks, and 1x3hr seminar in week 13 (graduate) **Prerequisites:** (LAWS1010 or LAWS1012) and LAWS1015 **Assessment:** 1x1hr class test (30%) and 1x2hr exam (70%) (Graduate); 1x 3000 word assignment (30%), tutorial participation (10%) 1x 2 hour exam (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program.

The laws of tort and contract frequently overlap in practice and are increasingly regulated by statute. This unit aims to develop the integrated study of the law of obligations and remedies. It builds on the introduction to tort and contract law which students have acquired in Torts and Contracts. It will include the study of more advanced

topics in both areas and the impact of related statutory liability and remedies. Topics:

- (a) Concurrent, proportionate and vicarious liability;
- (b) The role of statutory duties and powers in tort law;
- (b) Liability for misrepresentation in tort, contract and under statute (eg statutory duties, s 52 Trade Practices Act 1974 (Cth));
- (c) Liability for economic loss in tort, including some comparative study;
- (d) Detailed consideration of causation and remoteness of damage in tort and contract;
- (e) Damages for breach of contract;
- (f) Unfair dealing in contracts and vitiating factors: mistake, misrepresentation, duress, undue influence, unconscionable conduct. This topic includes a study of equitable principles and statutory rights.

### **LAWS1018** **International Law** **Law**

**Credit points:** 6 **Teacher/Coordinator:** Dr Timothy Stephens (Combined), Mr Ross Anderson (Graduate) **Session:** Semester 1, Semester 2, Winter Main **Classes:** 1x2hr lecture and 1x1hr tutorial/wk (combined), 3x4hr seminars/wk for 3 weeks and 1x3hr seminar in week 13 (graduate) **Prerequisites:** LAWS1006 **Prohibitions:** LAWS2005 **Assessment:** Combined: 1x2000w assignment (25%), tutorial participation (pass/fail), 1x2hr final exam (75%). Graduate: 1x1hr class test (30%), 1x2hr exam(70%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program, UG Summer/Winter School.

The unit of study is a general introduction to private international law and public international law and the relationship between these disciplines. The following private international law topics receive detailed treatment: (1) Nature, function and scope of private international law; (2) Jurisdiction, including discretionary non-exercise of jurisdiction; (3) Substance and procedure; (4) Proof of foreign law; (5) Exclusionary doctrines; and (6) Choice of law in tort. The following public international law topics receive detailed treatment: (1) Nature, function and scope of public international law, including the relationship between public international law and municipal law; (2) Sources of public international law; (3) State jurisdiction, including civil and criminal jurisdiction and jurisdictional immunities; and (4) State responsibility, including diplomatic protection, nationality of claims and exhaustion of local remedies. Available to candidates proceeding under the new LLB resolutions.

### **LAWS1019** **Legal Research II** **Law**

**Teacher/Coordinator:** Mr Graeme Coss **Session:** Semester 1, Semester 2 **Classes:** Combined Law: 3x2hr seminars **Prerequisites:** LAWS1013 **Prohibitions:** LAWS1008, LAWS1022 **Assessment:** Satisfactory attendance and 1x assignment **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions. Semester 1 classes are for Combined Law candidates in the faculties of Arts, Engineering and Science. Semester 2 classes are for Combined Law candidates in the Faculty of Economics & Business.*

**Associated degrees:** B A (Media & Comm), LL B, B A, LL B, B Com, LL B, B E, LL B, B Ec, LL B, B Ec Soc Sc, LL B, B I G S, LL B, B Int S, LL B, B Sc, LL B, LL B, UG Study Abroad Program.

This is a compulsory unit taught on a pass/fail basis. It is a continuation of Legal Research I and covers advanced searching techniques and the use of Lexis.com, Westlaw and other complex commercial databases. The purpose of this unit is to further develop the skills you will need as a law student and to introduce you to the legal research skills you will need after graduation.

### **LAWS1021** **Public Law**

**Law**

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Anne Twomey (Combined), Ms Nicola Franklin (Graduate) **Session:** S2 Late IntB, Semester 2, Summer Late **Classes:** 2x2hr seminars/wk for 10 weeks (combined), 3x4hr seminars/wk for 3 weeks and 1x3hr seminar in week 13 (graduate) **Prerequisites:** LAWS1006 **Assessment:** 1x3000wd assignment (40%) and 1x2hr exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

Public Law will examine the fundamental tenets of constitutionalism and constitutional principle essential to an understanding of the system of representative and responsible government as manifested in the Australian constitutional context, at both Federal and State level. As an introduction to the units Administrative Law and Federal Constitutional Law, it will cover both introductory topics and substantive topics directly relevant to those units. Topics covered include: Constitutionalism and the Rule of Law; Representative and Responsible Government; Amendment of the Commonwealth and State Constitutions; Separation of Powers; Judicial Power and implications derived from Chapter III of the Constitution; the Executive and its Powers; Accountability of the Executive to Parliament, Courts and Tribunals; and Administrative Rule-making.

**LAWS1022****Legal Research I & II****Law**

*Note: Available to graduate law candidates proceeding under the new LLB resolutions*

**Associated degrees:** LL B.

This is a compulsory unit taught on a pass/fail basis. The aim of the first part of the unit is to introduce you to finding and citing primary and secondary legal materials and introduce you to legal research techniques. These are skills which are essential for a law student and which you will be required to apply in other units. The second part of the unit covers advanced searching techniques and the use of Lexis.com, Westlaw and other complex commercial databases. The purpose of this part of the unit is to further develop the skills you will need as a law student and to introduce you to the legal research skills you will need after graduation.

**LAWS2002****Administrative Law****Law**

**Credit points:** 8 **Teacher/Coordinator:** Professor Mary Crock **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Assessment:** 1x3500wd essay (35%) and 1x2hr exam (65%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to candidates proceeding under the old LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

This unit of study involves a study of the relationships of individuals and organisations with government decision makers. It examines the legal principles which apply to those relationships with the aim of developing an understanding of the extent to which decision-makers within the executive branch of the government are accountable to parliament, to the courts and to other administrators, such as ombudsmen and merits review tribunals. The unit provides an overview of relevant legal principles and encourages an understanding of how values of openness, fairness and participation may be promoted. By adopting a critical perspective, the unit requires an appreciation of how political theory and the insights of other disciplines may provide a framework for analysing the choices made by administrators, and by judges in judicial review.

**Credit points:** 8 **Teacher/Coordinator:** Professor Jennifer Hill **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prohibitions:** LAWS2014 **Assessment:** 1x mid-semester quiz and 1x exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to candidates proceeding under the old LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

This unit of study considers the legal structure of the corporation as an organisational form for both public and proprietary companies. It is designed as an introduction to both the law of corporations and the Australian context in which that operates. The focus of this unit is on the nature of the corporation and its governance structure. The unit covers issues such as the implications of the company as a separate legal entity, power to bind the company, duties of directors, and shareholders rights and remedies. Students will be required to evaluate critically existing corporate law and reform proposals, with particular reference to legislative policy and underpinning theory.

*Note: Department permission required for enrolment. Note: Available to candidates proceeding under the old LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

An appreciation of equitable principles and remedies is fundamental to understanding the Australian legal system. This unit of study explains the origins of the equitable jurisdiction and examines its role today. A substantial part of the unit is dedicated to study of the law of trusts, including remedial constructive trusts. Other topics include dealings with property in equity, fiduciary obligations, the doctrines of undue influence and unconscionable dealing, estoppel and equitable remedies.

**LAWS2005****International Law****Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Ben Saul **Session:** Semester 1, Winter Main **Classes:** 2x2hr seminars/wk **Prohibitions:** LAWS1018 **Assessment:** 1x3,000w assignment (30%), 1x2hr final exam (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to candidates proceeding under the old LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

The unit of study is an introduction to the general problems, sources and techniques of private international law and public international law. The private international law part of the unit will focus on the function and scope of this branch of municipal law, with particular reference to jurisdiction, substance and procedure, proof of foreign law, exclusionary doctrines, and choice of law in tort. The public international law part of the unit will focus on the function and scope of this regime of legal norms in the modern world, with particular reference to sources of law, the relationship between public international law and Australian law, state jurisdiction, jurisdictional immunities and state responsibility, and law on the use of force.

*Note: Department permission required for enrolment. Note: Available to candidates proceeding under the old LLB resolutions. Student are required to attend classes for LAWS2016 and addition classes will be scheduled.*

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

This unit of study seeks to provide a knowledge of the basic elements of civil and criminal procedure and evidence. The focus is primarily on the law of civil procedure and the law of evidence. Pre-trial procedures are studied including techniques for initiating litigation, limiting the issues for judicial decision, obtaining evidence to support a case and avoiding trial. Attention then turns to the trial itself. Rules governing forms of evidence, and the basic inclusionary and exclusionary rules of evidence, together with rules governing the burden and standard of proof are considered.

## LAWS2007

### Real Property

#### Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Fiona Burns **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Prohibitions:** LAWS2017 **Assessment:** 1x2500-3000wd optional mid-semester assignment (30%) and 1x2hr (70%); OR 3hr exam (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to candidates proceeding under the old LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

The law of real property has always played an important role in the economic, social and political life of England and of those countries, such as Australia, which adopted its legal system. This unit of study aims to provide a study of the modern-day law of real property. After a brief historical introduction, we consider the nature of the various interests in land, the law of co-ownership (joint tenancies and tenancies in common), priorities between competing interests in land, and the legislation governing the registration of instruments affecting land. We also consider the *Mabo* and *Wik* cases and concepts of native title. Because of its significance in Australian land law, we spend some time considering the Torrens system. We also consider in some detail the law relating to easements and covenants, and provide an introduction to the law of mortgages and leases.

## LAWS2008

### Contracts

#### Law

**Credit points:** 6 **Teacher/Coordinator:** Dr Gregory Tolhurst **Session:** Semester 1 **Classes:** 2x2hr lectures or seminars/wk **Prerequisites:** LAWS1006 **Prohibitions:** LAWS1002, LAWS1015 **Assessment:** class participation (10%), 1x assignment (30%) and 1x2hr exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to Combined Law candidates proceeding under the old LLB resolutions.*

**Associated degrees:** B A, LL B, B Com, LL B, B Ec (Soc Sc), LL B, B Ec, LL B, B Ec Soc Sc, LL B, B Int S, LL B, B Sc, LL B, UG Study Abroad Program.

Contract law provides the legal background for transactions involving the supply of goods and services and is, arguably the most significant means by which the ownership of property is transferred from one person to another. It vitally affects all members of the community and a thorough knowledge of contract law is essential to all practising lawyers. In the context of the law curriculum as a whole, Contracts provides background which is assumed knowledge in many other units. The aims of the unit are composite in nature. The central aim is to provide an understanding of the basic principles of the common law, equity and statutes applicable to contracts. A second aim is to provide students an opportunity to critically evaluate and make normative judgments about the operation of the law. As Contracts is basically a case law unit, the final aim of the unit of study is to provide experience in problem solving through application of the principles derived from decided cases. Successful completion of this unit of study is a prerequisite to the elective unit Advanced Contracts.

## LAWS2009

### Criminal Law

## Law

**Credit points:** 6 **Teacher/Coordinator:** Prof Mark Findlay **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS1006 **Prohibitions:** LAWS1003, LAWS1016 **Assessment:** class participation, 1x 2000wd problem, 1x2000wd essay, and 1x 2hr exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to Combined Law candidates proceeding under the old LLB resolutions.*

**Associated degrees:** B A, LL B, B Com, LL B, B Ec (Soc Sc), LL B, B Ec, LL B, B Ec Soc Sc, LL B, B Int S, LL B, B Sc, LL B, UG Study Abroad Program.

This unit of study is designed to introduce the general principles of criminal law and process as they operate in NSW, and to critically analyse these in their contemporary social context. In order to achieve these goals, the unit will consider a range of socio-legal literature, and will focus on particular substantive legal topics. Although the topic structure is necessarily selective, it is intended that students will gain a broad understanding of crime and justice issues, as well as of the applications of the criminal law. Students will encounter problem-based learning and will be encouraged to challenge a range of conventional wisdom concerning the operation of criminal justice. This unit of study is designed to assist students in developing the following understandings: (1) A critical appreciation of certain key concepts which recur throughout the substantive criminal law. (2) A knowledge of the legal rules in certain specified areas of criminal law and their application. (3) A preliminary understanding of the working criminal justice system as a process and the interaction of that process with the substantive criminal law. (4) A preliminary knowledge of how the criminal law operates in its broader societal context. (5) Through following the process of proof in a criminal prosecution and its defense, to understand the determination of criminal liability. The understandings referred to in the foregoing paragraphs will have a critical focus and will draw on procedural, substantive, theoretical and empirical sources. The contradictions presented by the application of legal principle to complex social problems will be investigated.

## LAWS2010

### Administrative Law

#### Law

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Rosemary Lyster **Session:** Semester 1 **Classes:** 1x2hr seminar and 1x1hr seminar/wk **Prerequisites:** LAWS1021 **Corequisites:** LAWS2011 **Prohibitions:** LAWS2002 **Assessment:** 1x 2,500wd essay (35%) and 1x 2hr exam (65%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

Administrative Law is a study of the relationships of individuals and organisations with government. This unit examines the legal principles which apply to those relationships with the aim of developing an understanding of the extent to which government decision-makers are accountable to the public, to parliament, to the courts and to other administrators such as ombudsmen and merits review tribunals. The unit focuses principally on the grounds of judicial review. The unit encourages the development of a critical perspective on these grounds of review, and their theoretical underpinnings. This critical perspective requires an appreciation of how political theory and the insights of other disciplines may provide a framework for analysing the choices made by administrators, and by judges in judicial review. The unit develops perspectives on how the values of openness, rationality, fairness and participation may be promoted through Administrative Law.

## LAWS2011

### Federal Constitutional Law

#### Law

**Credit points:** 6 **Teacher/Coordinator:** Dr Peter Gerangelos **Session:** Semester 1 **Classes:** 2x2hr seminars/wk for 10 weeks, optional tutorials **Prerequisites:** LAWS1021 **Prohibitions:** LAWS1004, LAWS3000, LAWS3003 **Assessment:** 1x mid-term assessment and 1x final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

The main objective of the course is to impart an understanding of the fundamentals of federal constitutional law through the study of key judicial decisions on powers and prohibitions in the Commonwealth Constitution. In a one session course it is neither feasible nor desirable to study all aspects of federal constitutional law. The course is designed to provide a general conceptual framework for solving problems about federal constitutional law by a detailed treatment of selected topics.

The course also aims to:

- Provide analysis of the function of the High Court as the final arbiter of constitutionality.
- Develop an understanding of the techniques of judicial review as applied in Australia.
- Encourage discussion on the adequacy of the Constitution as Australia's basic instrument of government and on the scope for 'reform' by interpretation.

The topics covered in detail are: Trade and commerce, severance and reading down, inconsistency, external affairs, defence, corporations, freedom of interstate trade, general doctrines of characterisation and interpretation, grants, revenue powers, excise duties, and constitutional rights.

The course includes some material on the US Constitution to provide points of comparison and contrast.

## LAWS2012

### Intro to Property and Commercial Law Law

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Patricia Lane **Session:** Semester 1 **Classes:** 2x2hr seminars/wk for 10 weeks **Prohibitions:** LAWS2004, LAWS2007 **Assessment:** 1x interim assessment and 1x final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

Property law and commercial law are two key sources of rights and obligations in modern western law. This subject provides an introduction to both areas of law, and shows the ways in which they are inter-related. The unit is designed to provide an opportunity to consider the role these areas of law play in Australian society, as well as giving a good grounding in legal principle.

Key topics covered will include: notions of "property"; an introduction to personal property; an introduction to real property including rights to fixtures and airspace; the different title systems relating to land in NSW (eg, Torrens; strata; Crown lands and including indigenous systems); the nature and classification of equitable interests in land and personalty; the principles governing assignment of rights to property at common law and in equity (including by sale and by compulsion - such as by bankruptcy), and an introduction to the principles for resolving competing claims to property

## LAWS2013

### The Legal Profession Law

**Credit points:** 6 **Teacher/Coordinator:** Dr Rita Shackel **Session:** Semester 1 **Classes:** 2x2hr seminars/wk for 10 weeks **Prohibitions:** LAWS1001, LAWS3002, LAWS3004 **Assessment:** class work/participation(10%), 1x2500wd assignment(40%), 1x open book exam(50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

The Legal Profession concentrates on the regulation of legal practice and its practitioners. Part 1 of The Legal Profession examines the nature and structure of the legal profession, historical struggles to regulate the profession, and the current regulatory regime in New South Wales. Developments towards national legal practice are also examined. Part 2 explores specific forms of legal practice, highlights the major cultural and economic forces that challenge attempts to regulate the profession and canvasses alternative ways of organising legal practice and providing legal services. Part 3 evaluates the way

clients are treated by lawyers and suggests strategies to change their conduct in the interests of both equality and effective communication. Furthermore, it examines lawyers' duties to their clients and the Court, and the ways in which the rules and principles of confidentiality and conflicts of interest shape the advice and representation lawyers provide for their clients.

## LAWS2014

### Corporations Law Law

**Credit points:** 6 **Teacher/Coordinator:** Prof Jennifer Hill **Session:** Semester 2 **Classes:** 2x2hr seminars/wk for 10 weeks **Prohibitions:** LAWS2003 **Assessment:** 1 x in-class quiz (30%) and 1 x 2hr open book exam (70%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study considers the legal structure of the corporation as an organisational form for both public and proprietary companies. It is designed as an introduction to both the general law of corporations and the Australian regulatory context. The focus of this unit is on the nature of the corporation and its governance structure. The unit covers issues such as the implications of the company as a separate legal entity, power to bind the company, duties of directors, and shareholders rights and remedies. Students will be required to evaluate critically existing corporate law and reform proposals, with particular reference to legislative policy and underpinning theory.

## LAWS2015

### Equity Law

**Credit points:** 6 **Teacher/Coordinator:** Professor Patrick Parkinson **Session:** Semester 2 **Classes:** 2x2hr seminars/wk for 10 weeks **Prerequisites:** LAWS2012 **Prohibitions:** LAWS2004 **Assessment:** 1x compulsory or optional assignment (30%) and 1x exam (70% or 100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

An appreciation of equitable principles and remedies is fundamental to understanding the legal system and the law of property, taxation and obligations. This unit of study explains the origins of the equitable jurisdiction and examines its role today. A substantial part of the unit is dedicated to study of the law of trusts, including remedial constructive trusts. Other topics include fiduciary obligations, breach of confidence, the doctrines of estoppel, undue influence and unconscionable dealing, and a study of the equitable remedies of the injunction, an account of profits and equitable compensation.

## LAWS2016

### Evidence Law

**Credit points:** 6 **Teacher/Coordinator:** Dr Rita Shackel **Session:** Semester 2 **Classes:** 2x2hr seminars/wk for 10 weeks **Prerequisites:** LAWS1006 Foundations of Law and LAWS1014 Civil and Criminal Procedure **Prohibitions:** LAWS2006 **Assessment:** 1x interim exam (30%) and 1x 2 hr final exam (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study aims to teach students the laws of evidence. The focus of this unit is on the operation of the laws of evidence in civil and criminal trials. The unit considers the laws of evidence contained in statute and the common law. Students will appreciate the significant law reform in this area. The unit considers the rules for adducing evidence, then the rules of admissibility (relevance, hearsay, opinion, tendency and coincidence, credibility, character, privilege and the discretions to exclude evidence). Finally, there will be consideration of issues relating to proof. This unit will focus on the uniform Evidence Acts 1995 and develop students' skills in the area of statutory interpretation. Further, the unit aims to introduce students to the contexts within which lawyers might encounter evidential issues in

the course of a trial. Consideration is also given to the ethical problems that may arise in the conduct of a trial. Students are encouraged to think critically about the doctrines that govern the laws of evidence.

## **LAWS2017**

### **Real Property**

#### **Law**

**Credit points:** 6 **Teacher/Coordinator:** Dr Fiona Burns **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS2012 **Prohibitions:** LAWS2007 **Assessment:** As this is a new unit of study, the assessment is still being finalized. At the time of printing the likely assessment was an optional 1500-1800wd optional mid-semester assignment (30%) and a 90 minute (70%) exam; OR 2hr exam (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to candidates proceeding under the new LLB resolutions.*

**Associated degrees:** LL B, UG Study Abroad Program.

Land law (or the law of "real property") has always played an important role in the economic, social and political life of Australia. Australian real property law draws much of its principle from English real property law; but over the last 100 years in particular, Australian real property law has begun to develop its own unique character. This is particularly evident in two key aspects of modern Australian law: the Torrens system of land registration (which forms a large part of this unit of study) and the developing law of indigenous title to land (which is studied in Introduction to Property and Commercial Law, but which may surface occasionally in parts of this unit also).

This unit considers in particular the following topics: priorities between competing interests in land (building on material from the introductory unit, Introduction to Property and Commercial Law); the Torrens system of land registration; co-ownership of land (joint tenancies and tenancies in common); leases and licences; easements; covenants; mortgages.

## **LAWS3000**

### **Federal Constitutional Law**

#### **Law**

**Credit points:** 10 **Teacher/Coordinator:** Dr Peter Gerangelos **Session:** Semester 1 **Classes:** 2x2hr seminars/wk for 10 weeks **Prerequisites:** LAWS1006 **Prohibitions:** LAWS1004, LAWS2011, LAWS3003 **Assessment:** 2 x mid-semester assignments and 1x final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, LL B, B Com, LL B, B Ec (Soc Sc), LL B, B Ec, LL B, B Ec Soc Sc, LL B, B Int S, LL B, B Sc, LL B, UG Study Abroad Program.

This unit of study aims to achieve an understanding of the principles of Australian constitutional law. The unit commences with an overview of the Commonwealth Constitution within the Australian legal and political framework. Substantive topics include, but are not confined to: the defence power, the marriage power, the external affairs power, federalism (including state constitutions and the relationship between Commonwealth and state laws); economic and fiscal power and relations (including the corporations power, the trade and commerce power, freedom of interstate trade, and excise); the judicial power of the Commonwealth; express and implied constitutional rights and freedoms; and principles of constitutional interpretation. Other topics may be covered, especially if a constitutional power becomes controversial or topical. The unit aims to develop a capacity to evaluate the principles of constitutional law critically, from the perspective of both doctrine and policy.

## **LAWS3001**

### **Torts**

#### **Law**

**Credit points:** 10 **Teacher/Coordinator:** Assoc Prof Barbara McDonald **Session:** Semester 2 **Classes:** 1x2hr lecture and 1x1hr seminar/wk **Prerequisites:** LAWS1006 **Prohibitions:** LAWS1005, LAWS1010, LAWS1012 **Assessment:** 2500w assignment (30%), tutorial participation (10%) and 1x2hr exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Available to Combined Law candidates who commenced prior to 2001 and have previously enrolled in LAWS1007.*

**Associated degrees:** B A, LL B, B Com, LL B, B Ec (Soc Sc), LL B, B Ec, LL B, B Ec Soc Sc, LL B, B Sc, LL B.

This is a general introductory unit of study concerned with liability for civil wrongs. The unit seeks to examine and evaluate, through a critical and analytical study of primary and secondary materials, the function and scope of modern tort law and the rationale and utility of its governing principles. Particular topics on which the unit will focus include:

- (a) The relationship between torts and other branches of the common law including contract and criminal law;
- (b) The role of fault as the principal basis of liability in the modern law;
- (c) Historical development of trespass and the action on the case and the contemporary relevance of this development;
- (d) Trespass to the person (battery, assault, and false imprisonment);
- (e) Interference with goods (trespass, detainment and conversion);
- (f) Trespass to land and private nuisance;
- (g) The action on the case for intentional injury;
- (h) Defences to trespass, including consent, intellectual disability, childhood, necessity and contributory negligence;
- (i) Development and scope of the modern tort of negligence, including detailed consideration of duty of care and breach of duty with particular reference to personal and psychiatric injury;
- (j) Injuries to relational interests, including compensation to relatives of victims of fatal accidents;
- (k) Defences to negligence.

### LAWS3006

#### Commercial Dispute Resolution (Seminar)

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Mr Paul Scanlan **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prohibitions:** LAWS3022 **Assessment:** 1x3500wd essay (45%), 3 assessable workshops worth 15% each (45% total), course participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** LL B, UG Study Abroad Program.

The rapid evolution and acceptance of alternative dispute resolution (ADR) has made it essential that practicing lawyers acquire the knowledge and skills to properly advise clients as to their options, and to be able to guide and support them through the chosen process.

All current ADR models and their variants are examined, from simple negotiation through to arbitration. Mandated ADR and the broader relationship of ADR to the functioning of the formal justice system is considered. The unit has a strong theoretical base but at the same time a clear emphasis on the practical skills needed to handle approaching conflict and resolve disputes.

This course has a strong commercial focus, and employs real life commercial disputes to exemplify typical situations a practitioner will face. Students will learn and develop non-legal skills in handling difficult people and difficult situations, such as self-awareness, empathy, powerful listening and emotional intelligence. They will role-play and workshop the resolution of commercial disputes which involve issues of substantive law as well as people-handling and negotiation techniques.

Completion will not qualify students as mediators.

### LAWS3007

#### Advanced Contracts

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Greg Tolhurst **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS1002 or LAWS2008 or LAWS1015 **Assessment:** 1x3hr exam (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit aims to build on the level of knowledge students gained in the core contract unit. To give the course a focus, particular areas of contract are concentrated on, however, by the end of the course most of the core contract course will be revisited at a higher level of sophistication. In addition, the course will draw upon and develop the knowledge students gained in the core equity and property courses. This course is broken into general units of study, which may vary in any given year. For example, topics covered may include restitution following discharge of contract, the assignment of contractual rights, good faith in contract law, and sale of goods.

**Credit points:** 8 **Teacher/Coordinator:** Mr Saul Fridman **Session:** Semester 1, Summer Early **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS2003 **Assessment:** 1x10,000wd research paper (100%) or 2x5000wd research papers (100%) or combination of research paper and presentation (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

This unit of study will deal with corporate insolvency as well as a number of contemporary issues concerning debt and equity finance in Australian public and proprietary companies. It will cover receivership, voluntary administration, liquidation, the raising of corporate finance and the positions of shareholders and creditors in the event of the company's insolvency.

### LAWS3009

#### Advanced Public International Law

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Assoc Prof Chester Brown **Session:** Semester 1 **Classes:** 2x2hr seminar/wk **Prerequisites:** LAWS2005 or LAWS1018 **Assessment:** 1x 5000 wd research paper (50%), 1x2 hour exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

The purpose of this unit of study is to give an opportunity to students who are already familiar with the basic institutions and processes of public international law to deepen their knowledge of public international law, and widen their research experience in this field, by reference to selected issues of contemporary relevance. Students will be invited to engage with some of the particular challenges of legal practice in the public international law arena, as well as with some of

the leading scholarly debates in the field. Emphasis will be placed throughout the course on the legal analysis of contemporary international issues. These may include: the role of non-state actors in public international law; legal responses to some of the political and economic challenges of globalisation; new developments in the law on peace and security; the changing role of international organizations; and the fragmentation of international law.

### **LAWS3010**

#### **Advanced Real Property**

##### **Law**

**Credit points:** 8 **Teacher/Coordinator:** Assoc Prof Patricia Lane **Session:** Semester 2, Summer Late **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS2007 or (LAWS2017 and LAWS2012) **Prohibitions:** LAWS3100, LAWS3203 **Assessment:** 1x research essay (40%), 1x end of semester take-home exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

The course in Real Property gave an introduction to the legal framework within which rights and interests in land are created and transferred. The Advanced Real Property course deals in greater depth with some of the issues studied in Real Property. This course will concentrate on issues raised by recent developments in property law, with particular emphasis on the role of legislation in allocating and regulating property rights. These themes will be considered in three areas:

1. The law and jurisprudence of the recognition of native title by the High Court in the Mabo case (Mabo v State of Queensland (No 2) (1992) 175 CLR 1) and the Native Title Act 1993;
2. Constitutional and legislative protection of property rights, and the balance between private and public interests in property, including new forms of resource-based proprietary rights;
3. The constraints on government exercise of power to abrogate, or regulate, rights in land, the relationship between environmental regulation and private property rights, and including the High Court decision *Hillpalm Pty Ltd v Heaven's Door Pty Ltd* (2004) 220 CLR 472;

In considering these issues, the course will examine the influences of property theory on the development of the law, including the tripartite classification of property relationships of Professor Kevin Gray, and other theoretical perspectives.

### **LAWS3013**

#### **Business Taxation**

##### **Law**

**Credit points:** 8 **Teacher/Coordinator:** Mr Nicholas Augustinos **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS3047 **Assessment:** 1x mid-term quiz and 1x2hr open book exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study further pursues the goals of Personal Taxation and is to be regarded as an extension of that unit. In particular, the unit analyses the special difficulties of levying tax on business entities and complex transactions, and the operation of the income tax in an international environment. The taxes covered extend beyond the income tax to include stamp duties and goods and services tax, being indirect taxes usually paid by business. This unit of study will cover the following topics: (a) taxation of partnerships and trusts; (b) taxation of companies and shareholders under the imputation system; (c) taxation of international transactions; (d) goods and services tax; and (e) stamp duties.

### **LAWS3014**

#### **Chinese Laws and Chinese Legal Systems**

##### **Law**

**Credit points:** 8 **Teacher/Coordinator:** Ms Vivienne Bath **Session:** Semester 2, Summer L1 **Classes:** Semester 2: 2x2hr seminars/wk. Session 45: Intensive mode (3 weeks). Teaching takes place in November/December in Shanghai as part of the Shanghai Winter School. The unit is assessed in the following year. Applications for the Winter School open in May **Prohibitions:** LAWS3068

**Assessment:** Shanghai Winter School: 1x exam (20%) and 1x4000wd essay (80%). Semester 2: 1x exam (50%) and 1x 3000wd essay (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

**Note:** Department permission required for enrolment in the following sessions: Summer L1.

**Note:** Available to Sydney LLB students proceeding under the old resolutions.

**Associated degrees:** LL B.

This unit of study provides an overall picture of the contemporary Chinese legal system. The unit seeks to develop an understanding of the unique character of Chinese law by tracing its role through major social epochs - its imperial origins, the reforms of the Nationalist regime, the eras of revolutionary and radical transformations, and its role in a socialist market economy. The nature and function of law in contemporary China is explored through examination of the development of various legal regimes, including constitutional and administrative law, the civil and criminal law systems, the legal profession and court system, real property law, foreign investment law and intellectual property law.

### **LAWS3015**

#### **Private International Law**

##### **Law**

**Credit points:** 8 **Teacher/Coordinator:** Mr Ross Anderson (semester 1) **Session:** Semester 1, Summer Late **Classes:** 2x2hr seminars/wk **Assessment:** 1x open book class test (30%) and 1x2hr open book exam (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day **Note:** Department permission required for enrolment in the following sessions: Semester 1.

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

Private international law (or conflict of laws) is the part of local or municipal law which is concerned with questions which contain a foreign element. A foreign element in a legal question may consist of a relevant connection between a fact or party and a foreign legal system. For example, private international law issues may require consideration if a question arises in New South Wales concerning the distribution on death of the New South Wales property of a person domiciled in Greece or the validity of a mortgage of shares in an Indonesian corporation as security for a loan made by an Australian bank or the enforcement in Australia of the judgment of an Austrian court. This unit is a study of selected theoretical and applied aspects of private international law which seeks to develop your understanding of the international dimension of private law and your appreciation of the fact that many legal questions which arise in everyday-life are not confined within one legal system. The principal areas on which the unit of study will focus are (1) the concept of domicile and its role as the main personal connecting factor in common law systems; (2) renvoi and the incidental question; (3) property transactions; (4) succession; (5) marriage; (6) dissolution and annulment of marriage, including recognition in Australia of foreign dissolutions and annulments of marriage; (7) comparative choice of law in tort; and (8) the enforcement in Australia of foreign judgments.

### **LAWS3016**

#### **Competition Law**

##### **Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Brett Williams **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** 1x compulsory essay (33%) and 1x2hr compulsory exam (67%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study examines competition law and policy in Australia. The provisions of Part IV of the Trade Practices Act 1974 (Cth) will be examined together with the reforms introduced by the National Competition Policy. The framework for analysis will include a critical examination of the fundamental purposes of competition law. Some references will be made to the restrictive trade practices provisions of comparative jurisdictions. Topics include: (a) history of competition law; (b) National Competition Policy; (c) elementary economics of competition; (d) fundamental concepts of markets, competition, market power and public benefit; (e) Mergers and acquisitions; (f) horizontal

arrangements affecting competition including price fixing and primary boycotts; (g) vertical arrangements which affect competition including third line forcing; (h) Misuse of substantial market power; (i) Authorizations and Notifications; (j) overview of Remedies and Enforcement. Additional topics may include resale price maintenance, access to Essential Services, exceptions relating to intellectual property.

### LAWS3020 Criminology Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Murray Lee, Assoc Prof Gail Mason, Prof Julie Stubbs **Session:** Semester 1, Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** 1x research essay (50%), 1x take-home exam (40%) and class participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

*Note: Completion of this unit satisfies the Jurisprudence/Part 2 requirement of the LLB.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study aims to introduce students to the theoretical issues associated with the definition and explanation of crime and criminality. Rationales for punishment are examined along with sentencing practice, and other possible responses to criminal behaviour are explored. The unit considers the impact of criminal justice policy and practice on particular groups such as juveniles, women, Indigenous people, ethnic minorities and victims of crime. The regulation of particular types of offences such as hate crime are considered. Other topical issues are covered as they arise in contemporary criminological debate. Students are expected to take part in visits to a gaol and/or a juvenile detention centre.

### LAWS3022 Dispute Resolution Law

**Credit points:** 8 **Teacher/Coordinator:** Prof Hilary Astor **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Prohibitions:** LAWS3006 **Assessment:** 1x2500wd problem (35%), class participation (15%) and 1x3500wd research essay (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** LL B.

Rapid growth in the use of alternative dispute resolution (ADR) in recent years means that this subject is of great practical importance for lawyers. This unit of study introduces a range of methods of resolving disputes, including negotiation, mediation, arbitration, and expert processes. The relationship of ADR to the formal justice system is considered. The application now and into the future of ADR in several areas of law and various jurisdictions is examined. The unit is theoretical, critical and evaluative, as well as having a strong emphasis on the practical skills needed to handle approaching conflict and to resolve disputes. Students will learn skills in interviewing, negotiation and mediation. Students will be required to read materials from disciplines other than law. Completion will not qualify students as mediators.

### LAWS3023 Employment and Industrial Law Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Shae McCrystal **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Prerequisites:** (LAWS1002 or LAWS2008) and (LAWS1004 or LAWS3000 or LAWS3003) **Assessment:** 1x1500wd essay (20%), 1x2500wd essay (30%) and 1x1.5hr exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

The aim of this unit is to introduce students to the law regulating relationships at the workplace. Traditionally, this body of law has been described as "labour law", and has fallen into two general divisions. "Employment law" deals with the individual contract between employer and employee, and "industrial law" deals with the collective aspects of the subject, including award making, enterprise bargaining and

controls on industrial action. There has always been interaction and overlap between the individual and collective aspects of labour law, however the recent shift in political focus - from "industrial relations" to "workplace relations" - has brought particular challenges, which will be examined in this unit.

### LAWS3024 Environmental Law Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Andrew Edgar, Ms Susan Shearing **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Assessment:** 1x4000wd essay (40%) and 1x take-home exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study introduces students to the legal and institutional implications of adopting the precepts of ecologically sustainable development, particularly for governments and corporations. The unit begins with a discussion of environmental ethics, followed by an exploration of its ramifications for policy and decision making, legal structures and processes, accountability, and federal and international relations. Various fields of regulation (including land-use; pollution and natural resources), and decision-making processes (including environmental impact assessment and environmental dispute resolution) provide the context in which to develop the issues.

### LAWS3025 External Placement Program (EPP) Law

**Credit points:** 8 **Teacher/Coordinator:** Mr Graeme Coss **Session:** Semester 1 **Classes:** 1x2hr seminar/fortnight and the equivalent of one day per week for the semester at a pre-selected placement site **Assessment:** 1x essay (40%), seminar performance (30%), placement site evaluation (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment in this unit of study is by special application. Enrolment is restricted to students in their final year of study.*

**Associated degrees:** LL B.

The focus of this unit of study is 'experiential learning' - i.e. learning by doing. In this unit students are afforded the opportunity to work for one day per week during the semester in a 'public interest' placement site. In addition, students attend fortnightly seminars (8 per semester) which are designed to promote discussion and reflection on a range of issues that may arise during the course of the placement as well as seminar presentations on matters relevant to public interest externships. The unit has a public interest focus which is reflected in the selection of placement sites. At the end of the unit students should have: (i) acquired a better sense of the professional and personal responsibilities associated with the practice of law; (ii) developed an appreciation that the law is a people profession; (iii) observed and participated in a high level of problem solving flowing from real case files (where appropriate); (iv) been introduced to the basic inter-personal skills involved in the practice of law; (v) been introduced to aspects of the practice of law such as legal writing, advocacy and time management; and developed the character and habits of a reflective practitioner.

### LAWS3026 Family Law Law

**Credit points:** 8 **Teacher/Coordinator:** Prof Hilary Astor (semester 1), Prof Patrick Parkinson (semester 2) **Session:** Semester 1, Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** Semester 1: 1x 4,000 wd essay (50%), 1 x exam (50%), Semester 2: 1x 3000wd essay (30%) and 1x exam (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study will examine key aspects of Australian family law in their theoretical, social and political context. The laws and legal frameworks that regulate de facto relationships (including gay and lesbian relationships) and marriages will be covered. The strengths and weaknesses of existing law and policy and the impact of family

law reform will be considered. Understanding of the law will be supplemented by discussion of effective and sensitive practice of family law. Topics covered will include 1. The legal regulation of families 2. Resolution of family disputes 3. Violence against women 4. Children and parents 5. Property and Income on marriage breakdown.

### **LAWS3030**

#### **Independent Research Project**

##### **Law**

**Credit points:** 4 **Session:** Semester 1, Semester 2 **Prohibitions:** LAWS3031 **Assessment:** 1x5000wd research paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment in this unit of study is at the discretion of the Faculty. Enrolment is by special application and is restricted to students in their final year of study.*

**Associated degrees:** LL B.

The goal of this unit of study is to provide students with an opportunity to pursue independent research in an area of their choosing. The project must involve a new piece of research. Material which has been submitted for assessment in any other unit of study may not form part of the project. Before enrolling in this unit of study, the student must formulate in writing the topic of the research project and a statement of methodology. The topic of the research project and the methodology must be approved in writing by a member of the teaching staff who agrees to act as supervisor and to be responsible for assessment of the research project. This approval will not be given if the topic of the research project falls within the scope of another unit of study being offered in the same semester. Students must have a WAM of 70% or higher to be eligible to enrol in this unit.

### **LAWS3031**

### **LAWS3033**

#### **Intellectual Property**

##### **Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr David Rolph (semester 1), Dr Simon Butt (semester 2) **Session:** Semester 1, Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** 1x in-class test (50%) and (1x in-class test or 1x essay) (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study will provide a comprehensive overview of the disparate legal rights and causes of action which fall within the general rubric of intellectual property law. These rights fall broadly into two categories: (i) the Creative Rights which are based on a policy of encouraging the exercise of inventive, creative and entrepreneurial

skill and labour to a commercial end and include the law of copyright, patents, industrial designs, trade secrets and confidential information. (ii) the Marketing Rights which concern the marketing of products and are based on a policy of preventing customer confusion and unfair competition in the market place, specifically by way of misrepresentation and include the law of trademarks, passing off and s.52 of the Trade Practices Act 1974. The range of topics and different regulatory regimes to be covered mean that some topics will inevitably be covered in considerably more depth and detail than others. There will be a particular emphasis on registered trade marks and the law of copyright. The general objectives of the unit are to develop a critical understanding of the basic laws and policies governing intellectual property in Australia and to examine and evaluate the operation of those laws and policies. The unit objectives will be attained through classroom discussion and debate and through a study of primary and secondary materials, with emphasis on decided cases and statutory interpretation.

### **LAWS3034**

#### **International Human Rights Law**

##### **Law**

**Credit points:** 8 **Teacher/Coordinator:** Prof David Kinley **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS2005 **Assessment:** class participation (10%), 1x3000wd take-home exam (40%) and 1x4000wd essay (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study introduces students to the principles and practice of international human rights law - a species of international law and policy and a field of ever-expanding dimensions. It will introduce students to some key concepts, debates, documents and institutions in this field, while encouraging critical examination of these from a variety of angles. In summary, this unit considers the question: What happens when we regard a situation or predicament as one involving a breach of international human rights law? What possibilities and problems does this entail? Addressing these questions, we will look at: (a) particular fora where international human rights law is being produced (international tribunals, domestic courts, multilateral bodies - including United Nations organs - regional agencies, non-governmental organisations, academic institutions, and the media); (b) particular settings where international human rights law is being deployed (in Australia and elsewhere); and (c) particular identities/subjects that international human rights law aspires to shape, regulate or secure.

### **LAWS3035**

#### **Jessup International Law Moot**

##### **Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Timothy Stephens **Session:** S2 Late Int **Prerequisites:** LAWS2005 or LAWS1018 **Prohibitions:** LAWS3093 **Assessment:** class participation, memorial writing & mooting and team participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment in this unit of study is by special application.*

**Associated degrees:** LL B.

This unit of study is based on the Jessup International Law Moot Competition conducted annually among law schools throughout the world. Students in the unit work as a team preparing written memorials on a problem of current interest in international law. Mooting usually takes place over four days at the Australian Regional Rounds held in Canberra during February. Assessment is based on a short paper dealing with an issue in the moot problem, memorial writing, mooting and team participation. Previous problems have dealt with the law of the sea, Antarctica, international environmental law and trade law, though always emphasizing basic principles of public international law. Enrolment in this unit will be by competitive selection in accordance with the rules of the competition. The course requires students to consult individually with other team members and the lecturer with no formal classes scheduled.

## LAWS3036

### Law and Economics Law

**Credit points:** 8 **Teacher/Coordinator:** Prof Patricia Apps **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** 1x1500wd essay (15%), 1x2000wd essay (20%), class participation (5%) and 1x2hr exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Completion of this unit satisfies the Jurisprudence/Part 2 requirement of the LLB.*

**Associated degrees:** LL B, UG Study Abroad Program.

The aim of this unit of study is to provide an understanding of the economic analysis of law and to clarify differences between the role of legal argument and the welfare analysis of policy. The unit of study outlines the objectives of public policy defined within the framework of modern welfare economics and examines the social and economic effects of legal regimes within that framework. Particular attention is given to the definition of a competitive market as an analytical concept, and to the available empirical evidence of market failure and the need for government intervention and policy reform. Topics covered include the following: (a) Concepts of social justice and the public interest: fundamental theorems of welfare economics; (b) Economic analysis of property law: legal concept of property and the effects of property rights assignments on wealth and bargaining power; (c) Contract and consumer law: trade theory, bargaining models, asymmetric information, insurance and principles of contract damages; (d) Family law: economics of family formation, household production, intra-family transfers and exchange, child care, discrimination, and fertility; (e) Tort rights and remedies: economics of insurance, asymmetric information and moral hazard, and the distinction between fault and no-fault risk; (f) Economics of crime: formulation of behavioral models, empirical evidence on disincentive effects of punishment, estimation problems, and case studies; (g) Economics of regulation: monopoly theory and the structure of oligopolistic markets; applications to environmental problems and the labour market; (h) Agency theory: application to corporate governance and control.

## LAWS3045

### Migration Law Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Mary Crock **Session:** Semester 2 **Classes:** 2 x 2hr seminar/wk **Prerequisites:** LAWS2002 **Assessment:** 1 x research essay or participation in a class moot (40%); 1 x open book exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

The aim of this unit of study is to introduce students to the legal and policy framework governing immigration control in Australia. Of all the sub-specialities of applied Administrative Law, Migration Law stands out for the breadth of interest and the depth of emotions it excites in members of the broader community. Statistics suggest that one in four of today's Australians were either born overseas or have a foreign-born parent. In spite of this, resentment persists of the immigration program in general and of uninvited migrants in particular (both unlawful non-citizens and on-shore refugee claimants). By placing the current mechanisms for controlling migration in their legal, social, historical and economic contexts, students will be given the opportunity to explore the big issues raised by migration and to look at why the subject has assumed such a central role in Australia's identity as a nation. On a practical level, the unit seeks to develop in students: (a) Skills of statutory interpretation and problem-solving, through the study and use in practical situations of the Migration Act 1958 and its associated Regulations; (b) Skills of legal analysis, gained in the examination and synthesis of court decisions and rulings by the three major administrative review bodies: the Migration Review Tribunal; the Refugee Review Tribunal; and the Administrative Appeals Tribunal; (c) Oral and writing skills, through class presentations and the preparation of a major research paper or participation in a moot. More generally, the unit aims to encourage students to think clearly about the issues involved in immigration control and about the methods adopted by the government to achieve its policy objectives.

## LAWS3046

### Medical Law Law

**Credit points:** 8 **Teacher/Coordinator:** Prof Belinda Bennett (semester 1), Assoc Prof Roger Magnusson (semester 2) **Session:** Semester 1, Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** Semester 1: class participation (10%), 1x optional assignment (30%) and 1x exam (60% or 90%). Semester 2: 1 x 2,000 wd assignment (30%) and/or 1 x 3,500 wd essay (40%), 1 x open book exam (70%, 60% or 30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

This unit of study aims to provide students with an introduction to the legal issues that arise in modern health care. Issues to be covered in the course include: consent to treatment, negligence by health professionals, confidentiality, dispute resolution, legal implications of reproductive technologies, euthanasia and end-of-life decision-making, and organ transplantation. By the end of the unit of study students will be expected to be familiar with the application of case and statute law to health care and be able to discuss the relevant ethical principles which may arise. Student participation in class discussion will be expected.

### **LAWS3047**

#### **Personal Taxation Law**

**Credit points:** 8 **Teacher/Coordinator:** Mr Nicholas Augustinos, Ms Celeste Black **Session:** Semester 1, Winter Main **Classes:** 2x2hr seminars/wk **Assessment:** 1x1hr mid-semester quiz (30%), 1x2hr open book exam (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

This unit provides an introduction to the Australian federal income tax system (including capital gains tax and fringe benefits tax). It introduces both the operation of the tax laws and the underlying principles which those laws seek to implement, as well as the important issues in tax policy, thereby allowing students to make a critical examination of the Australian tax system. Topics covered include the concept of income, the allowable deductions and the capital/revenue distinction, capital allowances, capital gains tax, fringe benefits tax, tax accounting principles, and legislative responses to tax avoidance. The unit also introduces the key concepts used to evaluate tax policy, including welfare economics, thereby providing students with a basic understanding of why taxation is of such fundamental concern in modern democratic societies. The general principles are introduced from the perspective of their application to individuals. However, many of the legal principles discussed in the unit are of general application and are not confined to individuals. This unit serves as an introduction to the taxation of other entities, thereby leading into the study of Business Taxation. This unit is a prerequisite for Business Taxation.

### **LAWS3048**

#### **Policing Crime and Society Law**

**Credit points:** 8 **Teacher/Coordinator:** Prof Julie Stubbs **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Assessment:** 1x5000wd essay/research paper (50%) and 1x take-home exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** Law UG Non-Degree, LL B, UG Study Abroad Program.

The unit of study aims to encourage students to further develop their skills and knowledge in criminology through the critical analysis of theoretical and policy issues within contemporary criminal justice. Particular attention will be paid to policing (in its widest sense) but the unit of study will also examine other criminal justice institutions. A significant component of the unit will be devoted to the analysis of specific criminal justice issues of current relevance. Students will examine: crime and crime control within a social and political context; policing and other institutions and processes of criminal justice in the light of contemporary research and policy debates; the major theoretical frameworks within which crime and criminal justice policy are constructed and analysed; methods of undertaking research and policy analysis; and theoretical assumptions underpinning criminal justice policy.

### **LAWS3052**

#### **Roman Law Law**

**Credit points:** 8 **Teacher/Coordinator:** The Hon Justice Arthur Emmett **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Assessment:** 1x2000wd essay (20%) and 1x3hr exam (80%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study is a general introduction to all aspects of Roman private law. It consists of an historical sketch of Roman life and institutions from the earliest times until the time of Justinian, together with an introduction to Roman legal history and the development of Roman legal concepts. The Roman law of persons, property, obligations (both contractual and tortious) and succession are dealt with in depth and students are expected to know in some detail the Institutes of Justinian, the fundamental text to be studied. The unit is dealt with in a fairly flexible manner, so that students may choose which parts of the unit to study in detail and which parts to study in general outline only. Roman law is studied as a subject partly because of its great intrinsic worth, partly because Roman law has always been, and still is, of great historical importance; and partly, and probably most importantly, because it provides a means of comparing Roman law and the common law with each other and thereby gives a yardstick by which both the virtues and the shortcomings of our own common law can be appreciated. Roman influence is to be found in the legal systems of all European and many South East Asian nations.

### **LAWS3057**

#### **Sydney Law Review Law**

**Credit points:** 8 **Session:** Semester 1, Semester 2 **Assessment:** 1x2500wd essay (25%), 1x5000wd case note (50%), plus editing (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment in this unit of study is by special application. For further information, please visit [www.law.usyd.edu.au/slr](http://www.law.usyd.edu.au/slr)*

**Associated degrees:** LL B.

This unit of study is offered annually under the supervision of the Editor of the Sydney Law Review, who is a member of the full-time teaching staff. The unit is limited to approximately 18-24 students per year, who are selected on the basis of their academic results. Preference may be given to students in their final year in the selection of students for the unit. Each student will complete a range of tasks with respect to the Review, including the following:

- (a) checking articles which have been accepted for accuracy and completeness;
- (b) assisting in the editing and proofreading of accepted articles in the production process;
- (c) writing for submission to the Review one essay plus one case note.

Students selected for this unit must be prepared to serve for six months so that duties may extend beyond the end of formal teaching and assessment, or commence before formal teaching.

A class on editing, research and writing will be provided, and students will be in regular contact with the unit co-ordinator. The Student Editors' main areas of responsibility are as follows:

- (1) Students perform a major editorial role in the production of the Review. All accepted submissions are edited by the students in consultation with an academic supervisor. Students then proofread the articles after they have been typeset. Students are expected to check all quotations and citations for accuracy, to impose the Sydney Law Review house style, and to consult with the academic supervisor if any substantive or stylistic changes are required.
- (2) students are required to complete two pieces of written work: a 2500 word essay analysing a recent piece of law reform and a 5000 word case note. For both the law reform essay and the case note students work with an academic supervisor, selected by the student. A limited number of case notes are selected for publication, according to their merit.

### **LAWS3059**

#### **Media Law Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr David Rolph **Session:** Semester 2, Summer Early **Classes:** 2x2hr seminars/wk **Assessment:** 1x optional problem-based assignment, 1x optional research essay, 1x open book exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

Media Law surveys the law regulating the freedom of the media to investigate and collect information and to produce, reproduce and disseminate factual and fictional material, whether in print, film, by broadcast or by electronic means. The primary focus of this unit is the legal constraints that apply to the everyday practice of journalism. Thus, the unit aims to teach the law of contempt, defamation, breach of confidence and torts which have an impact on journalism, and the limits of investigative reporting. Attention is given throughout the unit to topical and current legal issues relating to the media. Students will be expected to be able to identify and apply the current legal rules and to evaluate their efficacy in protecting and balancing various interests in society: freedom of speech, protection of reputation, privacy, freedom from harassment, protection of confidential information, the right to a fair trial, public interest in the due and open administration of government and justice. The unit is currently divided into three modules: (i) contempt and open justice; (ii) defamation and freedom of speech; and (iii) privacy and breach of confidence.

### LAWS3064

#### Law and Commercial Transactions

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Ms Jacqueline Mowbray, Dr Gregory Tolhurst **Session:** Semester 2, Winter Main **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS1002 or LAWS2008, LAWS2004, LAWS2007 **Assessment:** 1 x exam (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

This unit of study offers students an opportunity to examine the key commercial doctrines and institutions in non-corporate commercial law. The unit will investigate numerous pieces of legislation and case law dealing in commercial law. The unit will advance students' knowledge of not only commercial law but statutory interpretation and case law analysis. This is a survey unit, offering a broad overview of commercial law; topics may include property transfer; commercial relationships (partnership; principal and agency; bailment); sale of goods; risk management (taking security - insurance); and commercial remedies.

### LAWS3068

#### Chinese Laws and Chinese Legal Systems

##### Law

**Credit points:** 6 **Teacher/Coordinator:** Ms Vivienne Bath **Session:** Summer L1 **Classes:** Intensive mode (3 weeks). Teaching takes place in November/December in Shanghai as part of the Shanghai Winter School. The unit is assessed in the following year. Applications for the Winter School open in May and close in July. **Prohibitions:** LAWS3014 **Assessment:** 1x exam (30%) and 1x3000wd essay (70%) **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

*Note: Department permission required for enrolment. Note: Available to cross-institutional and non-degree candidates, and University of Sydney LLB candidates proceeding under the new resolutions.*

**Associated degrees:** Law UG Cross-Inst, Law UG Non-Degree, LL B.

This unit of study provides an overall picture of the contemporary Chinese legal system. The unit seeks to develop an understanding of the unique character of Chinese law by tracing its role through major social epochs - its imperial origins, the reforms of the Nationalist regime, the eras of revolutionary and radical transformations, and its role in a socialist market economy. The nature and function of law in contemporary China is explored through examination of the development of various legal regimes, including constitutional and administrative law, the civil and criminal law systems, the legal profession and court system, real property law, foreign investment law and intellectual property law.

### LAWS3072

#### International Commercial Transactions

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Luke Nottage **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** (LAWS1002 or LAWS2008) and (LAWS2005 or LAWS1018) **Assessment:** Open book mid-semester exam (40%), final research essay (40%), 1x1000wd class presentation (10% individually or [tbc] paired) and other class participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit introduces a range of key legal and practical issues in conducting cross-border business. It aims to outline basic concepts and how they are applied as commerce and technology evolve; but also to explore possible tensions between pressures towards harmonisation in law and practice due to globalisation of economic relations, and the resilience of local or regional traditions. Part 1 surveys sources of law, primary institutions, and main legal vehicles now used in international trade and investment, including the WTO and FTAs. Part 2 focuses on issues in negotiating and drafting contracts, especially those governed by the United Nations Convention on Contracts for the International Sales of Goods (acceded to by Australia in 1988, and almost all other major trading nations) and the UNIDROIT Principles of International Commercial Contracts, including related issues such as payment mechanisms, Carriage of Goods, and insurance. Part 3 introduces basic principles of cross-border dispute resolution, especially international commercial arbitration. Part 4 compares key concepts and issues in influential product liability regimes, namely those found in Europe (and increasingly in the Asia-Pacific region) and the United States. It also outlines broader product safety regulation. Part 5 introduces intellectual property rights and licensing. Part 6 provides an overview of major corporate governance regimes worldwide. These can be central to effective management of cross-border contractual relationships, as well as in decisions to set up corporate presences in offshore markets. Foreign investment regulation and basic taxation issues are also considered. By way of review, Part 7 looks at investor-state arbitrations. To link the many topics in these Parts, the course develops a hypothetical case involving mainly an Australian exporter and Japanese trading partners. The course recalls and develops material covered in other undergraduate courses, but also prepares students for advanced or postgraduate courses in more specific fields. It complements the Japanese Law course, which has a more theoretical focus.

### LAWS3076

#### Japanese Law

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Assoc Prof Luke Nottage (convenor) with other Australian and Japanese lecturers **Session:** S1 Late IntA **Classes:** intensive in Kyoto (and [tbc] Tokyo) 12-15 & 18-22 February 2009 **Assessment:** 2x1000wd reflective notes (20%), and 1x7000wd research essay (80%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit aims to develop the general skills of comparative lawyers, to effectively and critically assess contemporary developments in the legal system of the largest economy in our region. It is taught intensively in Japan by co-directors of the Australian Network for Japanese Law ([www.law.usyd.edu.au/anjel](http://www.law.usyd.edu.au/anjel)) and Japanese professors, mainly from Ritsumeikan University Law School in Kyoto, with some guest lectures by Japanese and other practitioners as well as field trips to various legal institutions. About half the students generally come from Ritsumeikan or other Japanese Law Schools; the other half come from Australian universities or other institutions. The first week in Kyoto provides an introduction to how law operates in Japanese society. After an overview of comparative law techniques, Japanese legal history and its contemporary legal system, classes explore civil and criminal justice, politics and constitutionalism, gender and law, and an introduction to business and law. The second week in Tokyo examines business law topics in more detail, such as corporate and securities law, consumer law (including product safety and financial services), insolvency, ADR, and lawyering.

**LAWS3081****Health Law Jurisprudence****Law**

**Credit points:** 8 **Teacher/Coordinator:** Professor Belinda Bennett **Session:** Semester 2 **Classes:** Two 2 hr seminars per week **Assessment:** Class participation (10%), Assignment (30%), Take-home exam (60%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Completion of this unit satisfies the Jurisprudence/Part 2 requirement for the LLB in the Faculty of Law.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study analyses the theoretical bases for the rights, duties and concepts that form the foundations of health and medical law. The issues to be covered in this unit will include: whether there is a right to health; core principles of bioethics; the role of autonomy in health care and the limits of autonomy; the historical and legal evolution of informed consent; personhood and sanctity of life; justice in health care; regulatory models for health care; and property rights in health care. Readings for the course will be theoretical and interdisciplinary. Participation in class discussion will be expected.

**LAWS3083****Theories of Legal Reasoning****Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Kevin Walton **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Assessment:** 1x in-class test (30%), 1 x essay (50%) and class-participation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Completion of this unit satisfies the Jurisprudence/Part 2 requirement of the LLB.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study explores the nature of legal argumentation from a philosophical perspective. With reference to various theories, it examines the process from which legal conclusions result. The principal theme is the relationship between legal and other forms of decision-making. What - if anything - is distinctive about legal rationality? How - if at all - does legal reasoning differ from other forms of argumentation? Topics for discussion include: the role of morality in legal decision-making; the politics of legal reasoning; rules and their application; the nature of legal principles; the practice of interpretation; the objectivity of legal decisions; the connection between a theory of law and a theory of legal argumentation.

**LAWS3086****War Law: Use of Force & Humanitarian Law****Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Ben Saul **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS2005 **Assessment:** 1x4000wd research paper (60%), 1x in-class assignment (30%) and class participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** LL B, UG Study Abroad Program.

This unit explores the two key branches of international law which regulate military violence by governments or non-State actors: the law on the use of force, and international humanitarian law. The first part of the unit examines the law on the use of force, including its origins and the post-1945 framework of the United Nations Charter; the scope of the prohibition on the use of force, and the exception for self-defence; collective security through the UN Security Council; regional and bilateral security cooperation; humanitarian intervention; anti-terrorism operations; peacekeeping and peace enforcement; and conflict prevention. The second part of the unit explores the origins and purposes of humanitarian law; its scope of application; the different types and threshold of armed conflict; the permissible means and methods of warfare; the status and treatment of combatants, non-combatants and others; the protection of cultural property and the environment; the relationship to human rights law; and the implementation, supervision and enforcement of humanitarian law. By considering the two branches of law together, candidates will appreciate how and why different legal regimes developed to regulate

different aspects of military violence, and understand points of convergence and divergence.

**LAWS3087****Sports Law (seminar)****Law**

**Credit points:** 8 **Teacher/Coordinator:** Mr Saul Fridman **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** Students will be offered a choice of assessment options including: written paper, examination, class presentation, moot court exercise **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

Sporting activity cuts across a number of disparate areas of law. Increasing professionalism, the enormous growth in the Olympic Movement and the commercialisation of sport have all contributed to the development of sport as a business, as well as a pastime. As a result there has been increasing intersection of the law with sporting activity. In this course we will examine the following:

The economics of sports leagues

The structure of sporting organisations

International and national governance of sport

The impact of administrative law on the working of disciplinary tribunals

Industrial law and the treatment of the athlete as employee

Labour market controls and the impact of competition law

Player agents

The law and policy relating to doping of athletes

The impact of intellectual property laws on sponsorship and promotion of sporting events

**LAWS3088****Animal Law (seminar)****Law**

**Credit points:** 8 **Teacher/Coordinator:** Ms Celeste Black **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** 1x3000wd essay/research assignment (40%) and 1x5000wd take-home exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study examines the ways in which the law defines and regulates the relationship between humans and animals. It introduces students to the key issues, debates and documents in this area whilst encouraging a critical examination of these sources. The unit begins with a discussion of the status of animals as property and the implications of this approach and then moves to providing an overview of the moral and ethical arguments supporting an animal protection position and the case for animal rights. The focus of the unit is on the regulatory frameworks which apply to interactions between humans and animals, both domesticated and wild. The following topics will be considered: animal welfare legislation and its enforcement; issues of standing; the role of agricultural codes of practice; wildlife conservation; international law issues including whaling and free trade constraints on improved standards for animal welfare; trade in endangered species and the role of zoos; the use of animals in research (including the responsibilities of institutions and animal ethics committees); regulation of companion animals; and current issues in animal law, such as live export.

**LAWS3089****Theories of Law (seminar)****Law**

**Credit points:** 8 **Teacher/Coordinator:** Dr Kevin Walton **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Assessment:** 1x in-class test (30%), 1x 4000w essay (50%) and class-participation (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Completion of this unit satisfies the Jurisprudence/Part 2 requirement of the LLB.*

**Associated degrees:** LL B, UG Study Abroad Program.

The unit considers a single question: what is law? It explores prominent responses by both philosophers and sociologists to the problem of how law is best understood. Among the notions to which these

responses refer (and on which the unit might focus) are the following: power, authority, rules, morality, communication, rationality, adjudication, solidarity, patriarchy, race, plurality and legality.

### LAWS3090

#### Public International Economic Law (sem)

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Brett Williams **Session:** Semester 1 **Classes:** 2x2hr seminars/wk **Assessment:** 1x essay (40%), 1x exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: (For students going on to do a University of Sydney LLM, students who have done this course in 2009 may enrol in LAWS6249 World Trade Organization II without having to complete the normal pre-requisite unit, LAWS6063 World Trade Organization Law II)*

**Associated degrees:** LL B, UG Study Abroad Program.

This course is an introduction to the law of the World Trade Organization and may also cover an introduction to Bilateral Trade Agreements and Bilateral Investment Treaties.

The largest part of the course deals with the law of the World Trade Organization and the context of economics and politics within which the law operates. This section of the course considers economic and political arguments for and against protection based on some basic economics of trade and economics of public choice. The course presents an overview of the history of the GATT-WTO system and a more detailed study of the dispute settlement system. The course analyzes some of the fundamental rules of the General Agreement on Tariffs and Trade ('GATT'): rules on customs duties, national treatment, non-tariff barriers, the MFN rule on non-discrimination and an introduction to the rules on subsidies. The course then studies the framework of rules under the General Agreement on Trade in Services ('GATS') and the Agreement on Trade-Related Aspects of Intellectual Property ('TRIPS').

The rest of the course is selected from three areas:

- Bilateral Investment Treaties;
- Bilateral Trade Treaties; and
- selected further topics of World Trade Organization law drawn from five areas: the GATT exceptions for restrictions for health, environmental, technical regulations and quarantine reasons; the GATT escape clauses providing for Safeguard measures, Anti-dumping Duties and Countervailing Duties; further consideration of the MFN rule by considering the exception for free trade areas and customs unions; further consideration of the GATS by considering at least one specific service sector, and further consideration of the TRIPS by considering the extent of some exceptions.

### LAWS3092

#### International Commercial Arbitration sem

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Adjunct Professor Rashda Rana **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** 2000 word assessment (40%); 2 hour limited open book exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study aims to introduce students to the fundamentals of international commercial arbitration. The course covers the entire process of international arbitration: the significance of international commercial arbitration in international dispute resolution; the importance of a well drafted arbitration agreement; all procedural aspects and legal issues arising during cross border arbitrations; arbitral awards and the enforcement of arbitral awards around the world through the New York Convention 1958.

The unit will also cover the role and significance of specialised forms of international arbitrations and organisations involved in administering international arbitrations, such as maritime arbitrations, World Trade Organisation (Trade Law/Free Trade Agreement disputes), International Chamber of Commerce (large institution involved in administering international commercial arbitrations), Investor-State arbitrations (Bilateral Investment Treaties), sports arbitrations and Mediation in an international setting.

### LAWS3093

#### Jessup International Law Moot

##### Law

**Credit points:** 6 **Teacher/Coordinator:** Dr Timothy Stephens **Session:** S2 Late 1b **Prerequisites:** LAWS2005 or LAWS1018 **Prohibitions:** LAWS3035 **Assessment:** team participation, memorial writing & mooting and team participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Enrolment in this unit of study is by special application.*

**Associated degrees:** LL B.

This unit of study is based on the Jessup International Law Moot Competition conducted annually among law schools throughout the world. Students in the unit work as a team preparing written memorials on a problem of current interest in international law. Mooting usually takes place over four days at the Australian Regional Rounds held in Canberra during February. Assessment is based on a short paper dealing with an issue in the moot problem, memorial writing, mooting and team participation. Previous problems have dealt with the law of the sea, Antarctica, international environmental law and trade law, though always emphasizing basic principles of public international law. Enrolment in this unit will be by competitive selection in accordance with the rules of the competition. The course requires students to consult individually with other team members and the lecturer with no formal classes scheduled.

### LAWS3101

#### Banking and Financial Instruments

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Assoc Prof Roger Magnusson **Session:** Semester 1, Summer Early **Classes:** 2x2hr seminars/wk **Assessment:** 1x1500wd compulsory assignment (35%), 1x3500wd optional essay (35%) and 1x open book exam (30 or 65%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** LL B, UG Study Abroad Program, UG Summer/Winter School.

This unit aims to provide students with: 1. An introduction to the legal regulation and supervision of banks and other Authorised Deposit-taking Institutions (ADIs); 2. An understanding of the legal basis of the relationship between banks, ADIs and their customers, and an overview of the more common rights and duties which adhere to the banker/customer relationship; 3. An introduction to negotiable instruments; 4. An introduction to some of the legal principles regulating debt finance. The unit focuses principally (but not exclusively) on commercial banking, rather than issues relating to consumer debt. While the unit does not consider insolvency in any detail, a couple of insolvency issues will be mentioned. The aims of the course above indicate the broad themes to be covered. Specific topics are as follows: (i) Legal regulation and supervision of ADIs (banks and NBFIs); (ii) Cheques; (iii) Appropriation, Combination and Set-Off; (iv) Loans & Debt Security: An Introduction to Guarantees; (v) Secured Debt: Fixed and Floating Charges; (vi) Duties and Liabilities of Bankers & ADIs; (vii) Recent Developments in the Law of Secured Debt; (viii) Bills of Exchange).

### LAWS3108

#### Corporate and Securities Regulation(Sem)

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Freehills staff **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** LAWS2003 **Assessment:** 1x3hr exam (90%) and class participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** LL B, UG Study Abroad Program.

This unit covers the key legal framework within which a corporate lawyer operates - the securing (and resisting) of corporate control and raising money in the equity capital markets. Takeovers, schemes of arrangement, buy-backs and capital reductions will be discussed from a technical, practical and tactical viewpoint. Is there still scope for poison pills in the era of the Takeovers Panel - and where does a

target cross the line in the search for white knights? Do schemes of arrangement exploit - or reward - minority shareholders? How has the rise of arbitrageurs and institutional shareholders affected the corporate playing field? The array of fundraising measures available to public companies, including initial public offerings, hybrids and raisings from an existing shareholder base, will be addressed. When is a prospectus required and how do companies manage to raise large sums of money without one? Students will be encouraged to think strategically in applying the legal principles to current topical transactions.

### LAWS3111

#### Philosophy of Law (Seminar)

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Prof Wojciech Sadurski **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Assessment:** class participation (20%), 1x short class presentation supported by a 2000wd essay or written notes (30%) and 1x take-home exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note:* Completion of this unit satisfies the Jurisprudence/Part 2 requirement of the LLB.

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study will introduce students to the fundamental notions of jurisprudence understood as a theory about the aims, functions and values of law and legal systems. It will aim to provide students with the critical understanding of the central issues of philosophy of law understood as a general, abstract, normative reflection on law as such rather than an examination of a concrete, specific legal system, but the purpose will be to provide students with the conceptual means allowing them to conduct a critical scrutiny of particular legal systems and legal rules with which they are familiar. The course will have four parts. In the first part, the general notions of legal legitimacy, legal validity, obligation to obey the law, and relationship between law and politics will be discussed. The second part will focus on philosophy of human rights, with the special emphasis on the notion and functions of rights in a legal and political discourse, the justifications and limits of liberty-rights, and the understanding of equality rights, as well as relationship between the idea of rights and the idea of constitutionalism. The third part will consider the concept of justice - understood often as the principle value which legal systems should serve - and discuss some of the leading contemporary conceptions of justice. Finally, the fourth part will select one specific and controversial area of law - the law of freedom of expression - and attempt to apply the more general insights discussed in the earlier parts of the course to this particular issue. Throughout the course, the emphasis will be on a discussion and the appreciation of the diversity of approaches and theories.

### LAWS3327

#### Legal Geographies

##### Law

**Credit points:** 8 **Teacher/Coordinator:** Dr Fleur Johns **Session:** Semester 2 **Classes:** 2x2hr seminars/wk **Prerequisites:** (LAWS1004 or LAWS3000 or LAWS3003), LAWS2002 and LAWS2007 **Assessment:** 1x1500wd review/commentary (30%), 1x2500wd take-home exam (60%) and 1x in-class presentation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note:* Completion of this unit satisfies the Jurisprudence/Part 2 requirement of the LLB.

**Associated degrees:** LL B, UG Study Abroad Program.

This unit of study will introduce students to the work of legal scholars concerned with the spatial dimensions of law and law's ordering of space, in part through interdisciplinary engagement with geography, social theory, and urban studies. Drawing critically upon this scholarship, students will explore how Australian laws demarcate, in spatial terms, the nation state, the city, the public sphere and the home, as well as various spaces of expertise and specialised practice (such as the hospital, the court, and the university). Conversely, students will consider how spatial frames of thought inform the regulation of property ownership, tenancy, voting and political participation, vagrancy/homelessness, migration and other social and

political phenomena. The questions to which this unit will repeatedly return are: (a) how is law implicated in our understandings and experiences of space; and (b) how do these understandings, in turn, inform the development and interpretation of our laws?

### LNGS1001

#### Structure of Language

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof B Foley **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prohibitions:** LNGS1004, LNGS1005 **Assessment:** Ten short problem based assignments, each about 150 words, for a total of 1500 words; one 1 hour mid-term exam (equivalent to 1000 words); one 2 hour formal final examination (equivalent to 2000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

This unit is a comparative look at the general structure of human language. It looks at the sounds of human language: how the speech organs make them and their variety, in particular, a detailed description of English consonants and vowels and how to transcribe them. It investigates what is a possible word in English and other languages. It looks at the way speakers put words together to form sentences and how and why is English different from Japanese or even Irish.

##### Textbooks

Fromkin, V., Rodman, R., Hyams, N., Collins, P., Collins, P., Amberber, M. 2005. 'An Introduction to Language'. Fifth edition. Sydney: Harcourt.

### LNGS1002

#### Language and Social Context

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr T Borowsky **Session:** Semester 2 **Classes:** Two 1hour lectures and one 1hour tutorial per week **Assessment:** Five 250 word short assignments (totalling 1500 words), one 1 hour midterm exam (1000 words) and one 2 hour final exam (2000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, B Sc, B Com, Dip Arts, UG Study Abroad Program.

This unit introduces the study of the interrelationship between language and society. It is concerned with phenomena of language change and how that leads to varieties in a language. How are these varieties linked to social differences? What distinguishes male speech from female speech or what are the linguistic styles of different social classes or ethnic groups? What is slang, or jargon, and what distinguishes a casual conversation from an interview?

#### Linguistics Exchange

##### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note:* Department permission required for enrolment.

**Associated degrees:** B A, B Int S.

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point senior unit of study in Linguistics at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Director of Undergraduate Studies in the Department of Linguistics.

### LNGS2602

#### Syntax

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr J Simpson **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour workshop per week **Prerequisites:** LNGS1001 or LNGS1005 or LNGS1004 **Prohibitions:** LNGS2002 **Assessment:** Five problem sets, totalling equivalent 2500 words and one 2 hour examination - consisting of problems (equivalent 2000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Syntax deals with how we combine words into phrases, clauses and sentences and how we understand these combinations. Syntax is almost purely internal to language and plays a major role in organising the language system. We look at syntactic concepts in English, languages of Europe and Asia, and those of small traditional communities around the world. Using a problem solving approach, we develop explicit models to describe syntactic phenomena that allow generalisations leading to testable predictions about possible structures.

## LNGS2604

### Discourse Analysis Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof J R Martin **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour workshop per week **Prerequisites:** One of ENGL1000, ENGL1005, ENGL2619, ENGL2647, LNGS1001, LNGS1002, LNGS1003, LNGS1004, LNGS1005, LNGS2601, LNGS2602, LNGS2603, MECO1001, MECO1003 **Prohibitions:** LNGS2004 **Assessment:** Four 500 word term assignments and one 2500 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit of study provides an introduction to discourse analysis, which is concerned with the way in which texts are organised in relation to their social context. In linguistics, the term 'discourse' covers both a) the organisation of linguistic units above the sentence level (cohesion), and b) language in use or context (register and genre). The course will include analysis of texts combining language with image, from the perspective of critical discourse analysis.

## LNGS2612

### Language Variation and Change Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr T Borowsky **Session:** Semester 1 **Classes:** 2 1hr lectures **Prerequisites:** Two of LNGS1001, LNGS1002, LNGS1003, LNGS1004 and LNGS1005 **Prohibitions:** LNGS2026, LNGS2006 **Assessment:** 1 group research project 2000 words and one research project 3000 words plus a presentation 1000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

Human language varies with the social context, and on all linguistic levels (pronunciation, lexis, syntax, discourse structures etc). It does not only show variation in context but also across time. Again, all linguistic levels are affected. You will learn about variation analysis, the many factors that impact upon variation; the forms of variation; how to conduct sociolinguistic variation studies; the mechanisms of language change; constraints on change; and the way in which change is embedded in the larger linguistic system.

## LNGS2617

### Cross-Cultural Communication Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr J Simpson **Session:** Semester 2 **Classes:** One 2 hour seminar per week **Prerequisites:** Either (two of LNGS1001, LNGS1002, LNGS1003, LNGS1004, LNGS1005) or (Credit average in 12 Senior credit points from one of the foreign languages (French, Japanese, Chinese, Italian, Arabic, Spanish, German, Latin, Modern Greek, Ancient Greek, Indonesian, Malay, Korean, Thai, Yiddish, Hebrew, Syriac, Aramaic, Sanskrit)) **Prohibitions:** LNGS3903, LNGS3923 **Assessment:** Assignments totalling 5000 words, including a group research project. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

In today's globalized and multicultural societies, cross-cultural communication is common enough. Even so, it continues to be a challenge, both for people who engage in cross-cultural communication on a daily basis, and for researchers trying to describe and understand it. In this unit of study we will consider a variety of discourse-analytic approaches to studying cross-cultural communication, including conversation analysis, speech act theory, interactional sociolinguistics, the ethnography of communication, and critical discourse analysis. In our analyses of actual samples of cross-cultural communication we will pay particular attention to the social positioning of participants in an interaction, and the ways how social relationships (particularly of power and intimacy) between participants are reflected in their linguistic practices. The course will end with exploring applied perspectives, particularly on cross-cultural communication in educational, courtroom and workplace interactions.

## LNGS2620

### Phonetics Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr T Borowsky **Session:** Semester 1 **Classes:** Two 1hour lectures and one 1hour tutorial/lab per week. **Prerequisites:** Either (two of LNGS1001, LNGS1002, LNGS1003, LNGS1004, LNGS1005) or (Credit average in 12 Senior credit points from one of the foreign languages (French, Japanese, Chinese, Italian, Arabic, Spanish, German, Latin, Modern Greek, Ancient Greek, Indonesian, Malay, Korean, Thai, Yiddish, Hebrew, Syriac, Aramaic, Sanskrit)) **Assessment:** One 500 word assessment on acoustic analysis. One 500 word assessment on transcription tasks. One 2500 word final exam. One 1000 word quiz. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit will provide an introduction to the study of articulatory, acoustic and perceptual phonetics. Approaching the study of phonetics from both the theoretical and practical sides students will learn about the anatomical and physiological bases of the production of speech sounds. They will learn to produce and discern a wide range of the sounds observed in human languages and have practise in transcribing these sounds as well as applying these skills to the wider field of transcription, for example song texts/musical transcription. An introduction to the physical (acoustic) properties of speech sounds provides the basis for an understanding of what acoustic factors matter in speech perception.

## LNGS2621

### Phonology Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr T Borowsky **Session:** Semester 2 **Classes:** Two 1hour and one 1hour tutorial per week. **Prerequisites:** Either (two of LNGS1001, LNGS1002, LNGS1003, LNGS1004, LNGS1005) or (Credit average in 12 Senior credit points from one of the foreign languages (French, Japanese, Chinese, Italian, Arabic, Spanish, German, Latin, Modern Greek, Ancient Greek, Indonesian, Malay, Korean, Thai, Yiddish, Hebrew, Syriac, Aramaic, Sanskrit)) **Assessment:** One 2000 word assessment : 5 problem sets: phonological analysis exercises. One 2500 word final exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This course will provide a foundation in the principles and methods of linguistic argumentation particularly with respect to phonological analysis and the interaction of phonetics and phonology. Development of theories from SPE through to Optimality Theory. Topics include; basic phonological analysis; distinctive features, underlying representations, abstractness, rules and constraints, the role and function of prosodic structure: the prosodic hierarchy syllables, tone and stress; markedness.

## LNGS2622

### The Syntax of English

**Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr J Simpson **Session:** Semester 1  
**Classes:** 2 x 1hr lectures per week. 1 x 1hr tutorial per week. **Prerequisites:** LNGS1001, LNGS2602 **Assessment:** One 2hr/2000 wd final exam. Five 500 wd problems analysing syntactic constructions in English. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is available as a designated 'Advanced' unit for students who are already enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

English is a language in which the principles of syntax, how words are combined into larger units, play the major role in the organization of its grammar. This course will look at the basic syntactic organization of English and some formal frameworks that have been proposed to describe it. Topics covered include; word classes and phrase structure; subcategorization; X-bar syntax; auxiliaries, inflection and the structure of the clause; complementation and embedding. Using a problem solving approach to linguistic data, we will develop explicit models to describe syntactic phenomena that allow us to make generalizations that lead the testable predictions about possible range of syntactic structures in English.

**LNGS2805****Linguistics Exchange Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point senior unit of study in Linguistics at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Director of Undergraduate Studies in the Department of Linguistics.

**LNGS2806****Linguistics Exchange Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S.

Students enrolled at Sydney University who wish to take the equivalent of a 6 credit-point senior unit of study in Linguistics at an approved overseas university should enrol in this unit. Such students must seek approval for their proposed course of study from the Director of Undergraduate Studies in the Department of Linguistics.

**LNGS3601****Semantics and Pragmatics Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr N Riemer **Session:** Semester 1  
**Classes:** Two 1 hour lectures and one 1 hour tutorial per week **Prerequisites:** one of LING2602 [Syntax], LING2603 [Functional Grammar], ENGL2619 [Semiotics of Language] and ENGL2653 [Varieties of English Grammar]  
**Prohibitions:** LING3026, LING3006 **Assessment:** Two 2500 word assignments and one 1000 word class presentation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Compulsory for Honours students; other students may select as an option. This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

Semantics deals with the meaning of words, phrases, sentences and texts, and the relations between those meanings. Pragmatics deals with how speakers use context and shared information to convey information additional to the semantic content of what they say, and with how hearers make inferences on the basis of this information. Our goal is to explore the diversity of ways in which meaning can be expressed linguistically in different languages, as well as of what constitutes evidence for meaning.

**LNGS3605****Structure and Use of a Language Arts**

**Credit points:** 6 **Teacher/Coordinator:** Prof W Foley **Session:** Semester 2  
**Classes:** 2hr seminar **Prerequisites:** LING2601 [or LING2001] and one of LING2602, LING2002, LING2003, LING2603 **Prohibitions:** LING3904  
**Assessment:** 3,000 word essay [this may be staged to include abstract preparation, and to incorporate revision on the basis of feedback from this and from the tutorial paper which may include peer feedback], tutorial paper (equiv. 1,000 words), 2 assignments each ca. 1,000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

A language other than English is chosen for analysis (phonology, morphology, syntax, semantics and discourse), and for description of

the ways it is used (ethnography of speaking including speech acts, speech events, registers and genres). It is examined in its areal, genetic, historical, social and typological context. We also examine sources of data and their reliability, and the way findings are presented (reference and teaching grammars and linguistic papers). Pidgins and Creoles will be discussed in 2006.

### LNGS3690

#### Issues in Theoretical Linguistics

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr T Borowsky, Dr J Simpson **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per week **Prerequisites:** Credit average in 18 senior credit points of Linguistics. The units must include LNGS2601 [or LNGS2001], and at least one of LNGS2602, LNGS2002, LNGS2003 and LNGS2603 **Prohibitions:** LNGS3914 **Assessment:** One 4000 word paper [this may be staged to include abstract preparation and bibliographic work, and to incorporate revision on the basis of feedback from this and from the tutorial paper which may include peer feedback] and one 2000 word tutorial paper **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit introduces students to the methods of linguistic argument through careful study of a current debate in theoretical linguistics. Students learn to identify and assess the underlying assumptions, to work out what evidence would confirm or disconfirm the hypotheses made by different parties in the debate, and to draw conclusions as to which hypotheses are more likely to be useful or correct. They also learn to situate the debate within the wider contexts of linguistic theories and language description. Students are asked to contact staff members to discuss potential topics.

### LNGS3692

#### Media Discourse

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof J R Martin **Session:** Semester 2 **Classes:** One 2 hour lecture per week **Prerequisites:** Two of LNGS2601, LNGS2602, LNGS2603, LNGS2604, LNGS2001, LNGS2002, LNGS2003, LNGS2004, ENGL1005, ENGL2619, ENGL2647, ENGL2019, ENGL2047, MECO1001, MECO1003 **Prohibitions:** LNGS3912 **Assessment:** Two 2500 word assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

"Sexy, healthy and 100% Australian-owned!" This unit examines discourse-analytic approaches to media communication. The discourse of advertising and gender discourses in the media will form a special focus of the course. We explore the politics of media discourses, the ways in which social identities are constructed in the media, differences between communication in various media (print, radio, TV, the internet), the rhetoric of persuasion, and the discourses of popular culture. The framework derives from functional linguistics and critical discourse analysis, as well as cultural studies.

R Iedema et al. Media literacy. Sydney: AMES.

### LNGS3696

#### Bilingualism

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof W Foley **Session:** Semester 1 **Classes:** 2 1hr lectures **Prerequisites:** Credit average in 18 Senior credit points which may be comprised of Linguistics units and foreign language units (French, Japanese, Chinese, Italian, Arabic, Spanish, German, Latin, Modern Greek, Ancient Greek, Indonesian, Malay, Korean, Thai, Yiddish, Hebrew, Syriac, Aramaic, Sanskrit, Anglo-Saxon, Old Norse). Other language units require department permission. **Prohibitions:** LNGS3929 **Assessment:** 3 assignments at 2,000 words each. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, Dip Arts, UG Study Abroad Program.

The majority of the world's population are bi- or multilingual. Even so, monolingualism often gets treated as the norm. This unit explores individual and societal aspects of bilingualism, which will be defined broadly as the use of two or more languages on a regular basis.

### LNGS3699

#### Linguistics Research Issues

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Prof B Foley **Session:** Semester 1, Semester 2 **Classes:** One 2hour seminar per week **Prerequisites:** Credit average in 18 senior credit points in linguistics, including at least 2 of LNGS2601, LNGS2001, LNGS2602, LNGS2002, LNGS2603, LNGS2003, LNGS2604, LNGS2004. **Prohibitions:** LNGS3940 **Assessment:** One 6000 word research paper which will be done in stages and reported on through each stage and presented formally in seminar **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit is available as a designated 'Advanced' unit to students enrolled in the BA (Advanced) degree program.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts.

This seminar aims to prepare students for research in linguistics through critical reading and discussion of current issues and approaches in research and criticism, focussing on a particular subfield of linguistics.

### LNGS4011

#### Linguistics Honours A

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** Dr J Simpson **Session:** Semester 1, Semester 2 **Classes:** 2 hour seminar per option per week **Prerequisites:** Credit average in 48 senior credits points, including at least three of the five units LNGS3601, LNGS2602, LNGS2604, LNGS2620, LNGS2621. ( If the student has not done all five units as part of the undergraduate degree, the other two must be completed by the end of the Honours year as part of the coursework component ) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), Dip Arts(Hons).

Linguistics IV has two components: coursework, comprised of three units of study and a thesis. Two units of study will be determined in consultation with the department and the third is the compulsory Honours seminar (currently LNGS3699). The weighting of the thesis and coursework components is three units of coursework (50 %), thesis (50%).

Students considering enrolling in Linguistics IV honours are encouraged to consult with the Chair of Department as early as possible, preferably towards the end of their third year.

**LWSC2002**
**Sustainable Land and Water Management  
 Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Dhia Al Bakri (Coordinator), Dr Willem Vervoort **Session:** Semester 2 **Classes:** Lec 2hr/wk; practical: 3hr/wk (for 8 weeks); field work: 25hr/wk (for 1 wk only) **Assumed knowledge:** AFNR1001, AFNR1002 **Assessment:** One 2 hr exam (50%), laboratory and practical reports (20%), field trip report (30%). **Practical field work:** 1 week field trip **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

This unit introduces students to the principles and practices of sustainable development and integrated catchment management. Students' appreciation of the principles will be facilitated through theoretical and practical case studies focusing on problems and issues facing land and water users and managers in Australia. This unit builds on knowledge gained in AFNR1001, AFNR1002, and SOIL2001 and establishes the foundation for LWSC3005 (Environmental Water Quality) and GEOG2303 (Groundwater Hydrology). The unit provides one of the essential building blocks for developing the conceptual framework for, and linking the other units to the central themes of, the Bachelor of Land and Water Science. The unit consists of two parts. The first part will involve a series of lectures and practical exercises. The second part of the unit is a 5-day field trip traveling from Sydney to Orange and through the Lachlan valley to the Jemalong irrigation district. During the fieldtrip, students will examine the interactions between the socio-economic and biophysical systems of the landscape, undertake data gathering and perform practical exercises in relation to a wide range of land and water issues and problems. After completion of this unit, students should be able to:

Explain the principles underlying the concepts of sustainable development and ICM

Identify main land and water degradation issues in Australia and define relevant causes, effects and management options;

Describe the relevance of the LG model to sustainable catchment and resource management

Develop an understanding of the link between water quantity and water quality and its implications for management.

Employ a range of basic computational techniques which will allow them to explore the link between water quality and quantity in more detail.

Develop an understanding of flow variability, its causes and assessment and its relation to water quality

Assess landscape-land use interaction in relation to farm productivity, water quality and land management.

 Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr D Al Bakri, Professor I Kennedy, Dr R Caldwell **Session:** Semester 1 **Classes:** 2 lec/wk; 3hr lab for 7 weeks; 25hr fieldwork (in 1 wk only) **Prerequisites:** LWSC2002 or GEOG2321 or AGCH2003 or 6 credit points of intermediate Chemistry **Assessment:** One 2 hr exam (40%), laboratory and practical reports (35%), field trip professional

report (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B An Vet Bio Sc, B Hort Sc, B L W Sc, B Res Ec, B Sc, B Sc Agr, UG Study Abroad Program.

The unit of study will provide students with an in-depth understanding of the main water quality problems in Australia, related limnological issues and the underlying causes and processes. The unit builds on knowledge gained in LWSC2002, AGCH2003 and GEOG2321. The study program commences with a field trip module to the productive Macquarie and Namoi Valleys, where irrigated agriculture has been developed. Environmental impacts of agricultural enterprises such as irrigation farming and human settlements on water environments will be assessed. Field observations on pH, nutrient level, salt content, pesticide contamination, and microbial content in aquatic environments will be made with samples returned for more detailed laboratory analysis at the University. The unit will also investigate sources and dynamic of pollutants in receiving water, sediment-nutrient interaction and pollution control strategies. The unit will cover aspects of freshwater ecology with particular emphasis on wetlands ecosystem, riparian vegetation, phytoplankton communities and cyanobacteria.

**Landscape Hydrology and Management  
 Agriculture, Food and Natural Resources**

**Credit points:** 6 **Teacher/Coordinator:** Dr Willem Vervoort **Session:** Semester 1 **Classes:** (2 lec, 0.6 on-line 2.4 prac )hr/wk **Prerequisites:** LWSC2002 or GEOG2321 **Corequisites:** LWSC3004 **Assessment:** On-line activities 10%; oral presentation 10%; practical reports 50%; 2 hr exam 30%. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B L W Sc, B Res Ec, B Sc, UG Study Abroad Program.

This unit of study is designed to allow students to examine catchment-scale hydrological modeling, groundwater hydrogeochemistry as an investigative tool for water quality and policy making at the catchment level.

It is a core unit for students in BLWSc and builds on the theoretical knowledge gained in LWSC3004, GEOG2321 and LWSC2002. In the first part, students will investigate several ways to simulate catchment hydrological processes and review the possibilities and impossibilities of using simulation models for catchment management. In the second part students will apply hydrogeochemical techniques to investigate groundwater quality and review recent developments in catchment-based management strategies to control salinity and pollution. At the end of this unit, students will be able to articulate advantages and disadvantages of using simulation models for catchment management, justify the choice of a simulation model for a particular catchment management problem, identify issues in relation to uncertainty, apply hydrogeochemical investigation techniques for groundwater and describe innovative strategies for salinity and pollution control. The students will gain research and inquiry skills through research based group projects, information literacy and communication skills through on-line discussion postings, laboratory reports and a presentation and personal and intellectual autonomy through working in groups.

**Credit points:** 6 **Teacher/Coordinator:** Dr Willem Vervoort (Coordinator), Dr Dhia Al Bakri **Session:** Semester 1 **Classes:** (2x1hour lecture and 1x2-3hour practical/fieldwork)/wk **Prerequisites:** GEOG2321 or LWSC3004 **Assessment:** On-line discussion postings (10%) 2 x practical reports (50%), presentation (10%), 2hr exam (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Hort Sc, B L W Sc, B Sc Agr.

This unit of study is designed to give students insight into the use of hydrological modelling in surface and groundwater management, river restoration and policy making at the catchment level. The unit builds

on the theoretical knowledge gained in LWSC3004 and GEOG2321. In the first part, the unit uses a problem based learning approach to explore several ways to simulate catchment-scale hydrological processes and the translation of model outcomes into management. In particular, the unit tries to stimulate discussion on the possibilities and impossibilities of using hydrological models to assess the impact of management and policies in a catchment. The second part of the unit will focus on discussing and using hydro-geochemical methods to explain processes and chemical reactions controlling groundwater quality and salinity at the catchment level. The students will complete a research-based project including field and laboratory investigations in the South Creek catchment, western Sydney. By the end of this unit the students should be able to apply catchment-scale hydrological simulation models to predict management and policy impact, and identify appropriate technological solutions and management practices to control water quality problems and remediate stressed surface and groundwater resources.

## MARS2551

### Marine Science Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## MARS2552

### Marine Science Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## MARS2553

### Marine Science Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## MARS3551

### Marine Science Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Marine Science).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## MARS3552

### Marine Science Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## MARS3553

### Marine Science Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## MARS3554

### Marine Science Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

## MARS4011

### Marine Sciences Honours A Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B S T (Hons), B Sc (Hons), B Sc (Marine Science)(Hons).

Students enrolled in the Honours programs study various advanced aspects of Marine Sciences. The program may include lectures, tutorials, seminars and practicals. They will undertake a research project. Assessment will include the project and may include examinations and classwork.

## MARS4012

### Marine Sciences Honours B Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** MARS4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons), B Sc (Marine Science)(Hons).

See MARS4011

## MARS4013

### Marine Sciences Honours C Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** MARS4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons), B Sc (Marine Science)(Hons).

See MARS4011

### MARS4014 Marine Sciences Honours D Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** MARS4013  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B S T (Hons), B Sc (Hons), B Sc (Marine Science)(Hons).

See MARS4011

### MATH1001 Differential Calculus Science

**Credit points:** 3 **Session:** Semester 1, Summer Main **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1011, MATH1901, MATH1906, MATH1111 **Assumed knowledge:** HSC Mathematics Extension 1 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program, UG Summer/Winter School.

MATH1001 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering.

This unit of study looks at complex numbers, functions of a single variable, limits and continuity, vector functions and functions of two variables. Differential calculus is extended to functions of two variables. Taylor's theorem as a higher order mean value theorem.

*Textbooks*

As set out in the Junior Mathematics Handbook.

### MATH1002 Linear Algebra Science

**Credit points:** 3 **Session:** Semester 1, Summer Main **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1902, MATH1012, MATH1014 **Assumed knowledge:** HSC Mathematics Extension 1 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program, UG Summer/Winter School.

MATH1002 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering.

This unit of study introduces vectors and vector algebra, linear algebra including solutions of linear systems, matrices, determinants, eigenvalues and eigenvectors.

*Textbooks*

As set out in the Junior Mathematics Handbook

### MATH1003 Integral Calculus and Modelling Science

**Credit points:** 3 **Session:** Semester 2, Summer Main **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1013, MATH1903, MATH1907 **Assumed knowledge:** HSC Mathematics Extension 2 or MATH1001 or MATH1111 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program, UG Summer/Winter School.

MATH1003 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as

well as a Junior level requirement in the Faculty of Engineering. This unit of study first develops the idea of the definite integral from Riemann sums, leading to the Fundamental Theorem of Calculus. Various techniques of integration are considered, such as integration by parts. The second part is an introduction to the use of first and second order differential equations to model a variety of scientific phenomena.

*Textbooks*

As set out in the Junior Mathematics Handbook

### MATH1004 Discrete Mathematics Science

**Credit points:** 3 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1904, MATH2011 **Assumed knowledge:** HSC Mathematics Extension 1 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program, UG Summer/Winter School.

MATH1004 is designed to provide a thorough preparation for further study in Mathematics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering.

This unit provides an introduction to fundamental aspects of discrete mathematics, which deals with 'things that come in chunks that can be counted'. It focuses on the enumeration of a set of numbers, viz. Catalan numbers. Topics include sets and functions, counting principles, Boolean expressions, mathematical induction, generating functions and linear recurrence relations, graphs and trees.

*Textbooks*

As set out in the Junior Mathematics Handbook

### MATH1005 Statistics Science

**Credit points:** 3 **Session:** Semester 2, Summer Main **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1015, MATH1905, STAT1021, STAT1022, ECMT1010 **Assumed knowledge:** HSC Mathematics **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Pharm, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program, UG Summer/Winter School.

MATH1005 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering.

This unit offers a comprehensive introduction to data analysis, probability, sampling, and inference including t-tests, confidence intervals and chi-squared goodness of fit tests.

*Textbooks*

As set out in the Junior Mathematics Handbook

### MATH1011 Life Sciences Calculus Science

**Credit points:** 3 **Session:** Semester 1, Summer Main **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1111, MATH1001, MATH1901, MATH1906, BIOM1003 **Assumed knowledge:** HSC Mathematics **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B An Vet Bio Sc, B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, B Ed, B Sc (Psych), B Hort Sc, B L W Sc, B Med Sc, B Pharm, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit is designed for students of the life sciences who do not intend to undertake higher year mathematics and statistics. It includes the fitting of data to various functions and demonstrates the use of calculus

in optimisation problems. It extends differential calculus to functions of two variables and develops integral calculus, including the definite integral and multiple integrals.

#### Textbooks

As set out in the Junior Mathematics Handbook

### MATH1013

#### Differential and Difference Equations Science

**Credit points:** 3 **Session:** Semester 2, Summer Main **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1003, MATH1903, MATH1907 **Assumed knowledge:** HSC Mathematics or MATH1111 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B Com, B Ed, B Sc (Psych), B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program, UG Summer/Winter School.

MATH1013 is designed for students of the life sciences who do not intend to undertake higher year mathematics and statistics.

This unit of study looks at the solution of equations by bisection and iteration, first and second order difference equations where chaos is met, and examples of modelling using simple first and second order differential equations.

#### Textbooks

As set out in the Junior Mathematics Handbook

### MATH1014

#### Introduction to Linear Algebra Science

**Credit points:** 3 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1012, MATH1002, MATH1902 **Assumed knowledge:** HSC Mathematics or MATH1111 **Assessment:** One 1.5 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B E, B Med Sc, B Sc, B Sc (Adv), M B, B S, B Sc (Bioinformatics), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program, UG Summer/Winter School.

This unit is an introduction to Linear Algebra. Topics covered include vectors, systems of linear equations, matrices, eigenvalues and eigenvectors. Applications in life and technological sciences are emphasised.

#### Textbooks

Linear Algebra: A Modern Introduction, David Poole, Thompson Brook/Cole

### MATH1015

#### Biostatistics Science

**Credit points:** 3 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prohibitions:** MATH1005, MATH1905, STAT1021, STAT1022, ECMT1010, BIOM1003 **Assumed knowledge:** HSC Mathematics **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Agr Ec, B An Vet Bio Sc, B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, B Ed, B Sc (Psych), B Hort Sc, B L W Sc, B Med Sc, B Pharm, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

MATH1015 is designed to provide a thorough preparation in statistics for students in the Biological and Medical Sciences. It offers a comprehensive introduction to data analysis, probability and sampling, inference including t-tests, confidence intervals and chi-squared goodness of fit tests.

There are comprehensive details of this unit of study in the Junior Mathematics Handbook distributed at the time of enrolment.

#### Textbooks

As set out in the Junior Mathematics Handbook

### MATH1111

#### Introduction to Calculus Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and two 1 hour tutorials per week. **Prohibitions:** MATH1001, MATH1901, MATH1011, MATH1906 **Assumed knowledge:** At least Year 10 Mathematics

**Assessment:** One 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Department permission required for enrolment. Note: Students who have previously studied calculus at any level are prohibited from enrolling in this unit. In particular, students with HSC Mathematics/Extension 1/Extension 2 (or equivalent) are prohibited.*

**Associated degrees:** B A, B Med Sc, B Sc, B Sc (Adv), M B, B S, B Sc (Bioinformatics), B Sc (Molecular Biology & Genetics), UG Study Abroad Program.

This unit is an introduction to the calculus of one and two variables. Topics covered include elementary functions, differentiation, basic integration techniques and partial derivatives. Applications in science and engineering are emphasised.

#### Textbooks

Calculus: Single and Multivariable. Hughes-Hallett, Gleason, McCallum, et al. Wiley

### MATH1551

#### Mathematics Exchange Science

**Credit points:** 3 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MATH1552

#### Mathematics Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MATH1553

#### Mathematics Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MATH1901

#### Differential Calculus (Advanced) Science

**Credit points:** 3 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** HSC Mathematics Extension 2. This requirement may be varied. Students with an interest in mathematics, but without HSC mathematics Extension 2, should consult the unit of study coordinator. **Prohibitions:** MATH1111, MATH1011, MATH1001, MATH1906 **Assumed knowledge:** HSC Mathematics Extension 2 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This unit is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. It parallels the normal unit MATH1001 but goes more deeply into the subject matter and requires more mathematical sophistication.

*Textbooks*

As set out in the Junior Mathematics Handbook

## MATH1902

### Linear Algebra (Advanced)

#### Science

**Credit points:** 3 **Session:** Semester 1 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** HSC Mathematics Extension 2. This requirement may be varied. Students with an interest in mathematics, but without HSC mathematics Extension 2, should consult the unit of study coordinator. **Prohibitions:** MATH1002, MATH1012, MATH1014 **Assumed knowledge:** HSC Mathematics Extension 2 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This unit is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. It parallels the normal unit MATH1002 but goes more deeply into the subject matter and requires more mathematical sophistication.

*Textbooks*

As set out in the Junior Mathematics Handbook

## MATH1903

### Integral Calculus and Modelling Advanced

#### Science

**Credit points:** 3 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** HSC Mathematics Extension 2. This requirement may be varied. Students with an interest in mathematics, but without HSC mathematics Extension 2, should consult the unit of study coordinator. **Prohibitions:** MATH1003, MATH1013, MATH1907 **Assumed knowledge:** HSC Mathematics Extension 2 or Credit or better in MATH1001 or MATH1901 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

MATH1903 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering.

This unit of study parallels the normal unit MATH1003 but goes more deeply into the subject matter and requires more mathematical sophistication.

*Textbooks*

As set out in the Junior Mathematics Handbook

## MATH1905

### Statistics (Advanced)

#### Science

**Credit points:** 3 **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** HSC Mathematics Extension 2. This requirement may be varied. Students with an interest in mathematics, but without HSC mathematics Extension 2, should consult the unit of study coordinator. **Prohibitions:** MATH1015, MATH1005, STAT1021, STAT1022, ECMT1010 **Assumed knowledge:** HSC Mathematics Extension 2 **Assessment:** One 1.5 hour examination, assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B E, B Ed, B Sc (Psych), B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science),

B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This unit is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This Advanced level unit of study parallels the normal unit MATH1005 but goes more deeply into the subject matter and requires more mathematical sophistication.

*Textbooks*

As set out in the Junior Mathematics Handbook

## MATH1906

### Mathematics (Special Studies Program) A

#### Science

**Credit points:** 3 **Session:** Semester 1 **Classes:** Two 1 hour lectures, one 1 hour seminar and one 1 hour tutorial per week. **Prerequisites:** UAI of at least 98.5 and result in Band E4 HSC Mathematics Extension 2; by invitation **Prohibitions:** MATH1111, MATH1001, MATH1011, MATH1901 **Assessment:** One 1.5 hour exam, assignments, classwork. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Com, B E, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This is an Advanced unit of study. Entry to Mathematics (Special Studies Program) A is restricted to students with a UAI of 98.5 and an excellent school record in Mathematics. Students will cover the material in MATH1901 Differential Calculus (Advanced). In addition there will be a selection of special topics, which are not available elsewhere in the Mathematics and Statistics program.

## MATH1907

### Mathematics (Special Studies Program) B

#### Science

**Credit points:** 3 **Session:** Semester 2 **Classes:** Two 1 hour lectures, one 1 hour seminar and one 1 hour tutorial per week. **Prerequisites:** Distinction in MATH1906; by invitation **Prohibitions:** MATH1003, MATH1013, MATH1903 **Assessment:** One 1.5 hour exam, assignments, classwork. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Com, B E, B Med Sc, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

This is an Advanced unit of study. Entry to Mathematics (Special Studies Program) B is normally restricted to students with a Distinction in MATH1906. Students will cover the material in MATH1903 Integral Calculus and Modelling (Advanced). In addition there will be a selection of special topics, which are not available elsewhere in the Mathematics and Statistics program.

## MATH2061

### Linear Mathematics and Vector Calculus

#### Science

**Credit points:** 6 **Session:** Semester 1, Summer Main **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week. **Prerequisites:** MATH (1111 or 1001 or 1901 or 1906) and MATH (1014 or 1002 or 1902) and MATH (1003 or 1903 or 1907) **Prohibitions:** MATH2001, MATH2901, MATH2002, MATH2902, MATH2961, MATH2067 **Assessment:** One 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Res Ec, B S T, B Sc, B Sc (Bioinformatics), UG Study Abroad Program, UG Summer/Winter School.

This unit starts with an investigation of linearity: linear functions, general principles relating to the solution sets of homogeneous and inhomogeneous linear equations (including differential equations), linear independence and the dimension of a linear space. The study of eigenvalues and eigenvectors, begun in junior level linear algebra, is extended and developed. Linear operators on two-dimensional real space are investigated, paying particular attention to the geometrical significance of eigenvalues and eigenvectors. The unit then moves on to topics from vector calculus, including vector-valued functions

(parametrised curves and surfaces; vector fields; div, grad and curl; gradient fields and potential functions), line integrals (arc length; work; path-independent integrals and conservative fields; flux across a curve), iterated integrals (double and triple integrals; polar, cylindrical and spherical coordinates; areas, volumes and mass; Green's Theorem), flux integrals (flow through a surface; flux integrals through a surface defined by a function of two variables, though cylinders, spheres and parametrised surfaces), Gauss' Divergence Theorem and Stokes' Theorem.

#### Math Computing and Nonlinear Systems

##### Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week (lectures in common with MATH2963). **Prerequisites:** MATH (1001 or 1901 or 1906) and MATH (1002 or 1902) and MATH (1003 or 1903 or 1907) **Prohibitions:** MATH2003, MATH903, MATH2006, MATH2906, MATH2963 **Assessment:** 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit will introduce students to techniques of mathematical computation as applied to nonlinear systems, using the numerical programming language MATLAB and, where appropriate, computer algebra. This knowledge will be applied to a number of modelling problems, particularly those involving nonlinear mappings and nonlinear ordinary differential equations (ODEs). Throughout the unit of study the essential nonlinear theory will be developed, and the resulting ideas will be explored computationally. This will allow us to explore the modern concepts of chaos using a variety of examples, including the logistic map, the Henon map and the Lorenz equations. No prior knowledge of programming or of the MATLAB language or computer algebra is required.

### MATH2065

#### Partial Differential Equations (Intro)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial, one 1 hour example class per week. **Prerequisites:** MATH (1001 or 1901 or 1906) and MATH (1002 or 1902) and MATH (1003 or 1903 or 1907) **Prohibitions:** MATH2005, MATH2905, MATH2965, MATH2067 **Assessment:** 2 hour exam, mid-semester test, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Res Ec, B Sc, UG Study Abroad Program.

This is an introductory course in the analytical solutions of PDEs (partial differential equations) and boundary value problems. The techniques covered include separation of variables, Fourier series, Fourier transforms and Laplace transforms.

### MATH2067

#### DEs and Vector Calculus for Engineers

##### Science

**Credit points:** 6 **Session:** Semester 1, Summer Main **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour practical per week. **Prerequisites:** MATH(1001 or 1901 or 1906) and MATH(1002 or 1902) and MATH(1003 or 1903 or 1907) **Prohibitions:** MATH2001, MATH2901, MATH2005, MATH2905, MATH2061, MATH2961, MATH2065, MATH2965 **Assessment:** One 3 hour examination, assignments and quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program, UG Summer/Winter School.

MATH2067 starts by introducing students to solution techniques of ordinary and partial differential equations (ODEs and PDEs) relevant to the engineering disciplines: it provides a basic grounding in these techniques to enable students to build on the concepts in their subsequent engineering classes. The main topics are Fourier series, second order ODEs, including inhomogeneous equations and Laplace transforms, and second order PDEs in rectangular domains (solution by separation of variables).

The unit moves on to topics from vector calculus, including vector-valued functions (parametrised curves and surfaces; vector fields; div, grad and curl; gradient fields and potential functions), line integrals (arc length; work; path-independent integrals and conservative fields; flux across a curve), iterated integrals (double and triple integrals; polar, cylindrical and spherical coordinates; areas, volumes and mass; Green's Theorem), flux integrals (flow through a surface; flux integrals through a surface defined by a function of two variables, though cylinders, spheres and parametrised surfaces), Gauss's Divergence Theorem and Stokes' Theorem.

### MATH2068

#### Number Theory and Cryptography

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** 6 credit points of Junior level Mathematics **Prohibitions:** MATH3024, MATH3009, MATH2988 **Assumed knowledge:** MATH (1014 or 1002 or 1902) **Assessment:** 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Sc (Psych), B Sc, UG Study Abroad Program.

Cryptography is the branch of mathematics that provides the techniques for confidential exchange of information sent via possibly insecure channels. This unit introduces the tools from elementary number theory that are needed to understand the mathematics underlying the most commonly used modern public key cryptosystems. Topics include the Euclidean Algorithm, Fermat's Little Theorem, the Chinese Remainder Theorem, Möbius Inversion, the RSA Cryptosystem, the Elgamal Cryptosystem and the Diffie-Hellman Protocol. Issues of computational complexity are also discussed.

### MATH2069

#### Discrete Mathematics and Graph Theory

##### Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week. **Prerequisites:** 6 credit points of Junior level Mathematics **Prohibitions:** MATH2011, MATH2009, MATH2969 **Assessment:** One 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit introduces students to several related areas of discrete mathematics, which serve their interests for further study in pure and applied mathematics, computer science and engineering. Topics to be covered in the first part of the unit include recursion and induction, generating functions and recurrences, combinatorics, asymptotics and analysis of algorithms. Topics covered in the second part of the unit include Eulerian and Hamiltonian graphs, the theory of trees (used in the study of data structures), planar graphs, the study of chromatic polynomials (important in scheduling problems), maximal flows in networks, matching theory.

### MATH2070

#### Optimisation and Financial Mathematics

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** MATH (1001 or 1901 or 1906) and MATH (1002 or 1902) **Prohibitions:** MATH2010, MATH2033, MATH2933, MATH2970, ECMT3510 **Assumed knowledge:** MATH (1003 or 1903 or 1907) **Assessment:** One 2 hour exam, assignments, quiz, project **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students may enrol in both MATH2070 and MATH3075 in the same semester*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Res Ec, B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

Problems in industry and commerce often involve maximising profits or minimising costs subject to constraints arising from resource limitations. The first part of this unit looks at programming problems and their solution using the simplex algorithm; nonlinear optimisation & the Kuhn Tucker conditions.

The second part of the unit deals with utility theory and modern portfolio theory. Topics covered include: pricing under the principles of expected return and expected utility; mean-variance Markowitz portfolio theory, the Capital Asset Pricing Model, log-optimal portfolios and the Kelly criterion; dynamical programming. Some understanding of probability theory including distributions and expectations is required in this part.

Theory developed in lectures will be complemented by computer laboratory sessions using MATLAB. Minimal computing experience will be required.

#### MATH2551

##### Mathematics Exchange Science

**Credit points:** 4 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

#### MATH2552

##### Mathematics Exchange Science

**Credit points:** 4 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MATH2916 Working Seminar A (SSP) Science

**Credit points:** 3 **Session:** Semester 1 **Classes:** One 1 hour seminar per week. **Prerequisites:** By invitation, High Distinction average over 12 credit points of Advanced Junior Mathematics **Assessment:** One 1 hour presentation, 15-20 page essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

The main aim of this unit is to develop the students' written and oral presentation skills. The material will consist of a series of connected topics relevant to modern mathematics and statistics. The topics are chosen to suit the students' background and interests, and are not covered by other mathematics or statistics units. The first session will be an introduction on the principles of written and oral presentation of mathematics. Under the supervision and advice of the lecturer(s) in charge, the students present the topics to the other students and the lecturer in a seminar series and a written essay in a manner that reflects the practice of research in mathematics and statistics.

### MATH2917 Working Seminar B (SSP) Science

**Credit points:** 3 **Session:** Semester 2 **Classes:** One 1 hour seminar per week. **Prerequisites:** By invitation, High Distinction average over 12 credit points of Advanced Junior Mathematics **Assessment:** One 1 hour presentation, 15-20 page essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

The main aim of this unit is to develop the students' written and oral presentation skills. The material will consist of a series of connected topics relevant to modern mathematics and statistics. The topics are chosen to suit the students' background and interests, and are not covered by other mathematics or statistics units. The first session will be an introduction on the principles of written and oral presentation of mathematics. Under the supervision and advice of the lecturer(s) in charge, the students present the topics to the other students and the lecturer in a seminar series and a written essay in a manner that reflects the practice of research in mathematics and statistics.

### MATH2961 Linear Mathematics & Vector Calculus Adv Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Four 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** MATH (1901 or 1906 or Credit in 1001) and MATH (1902 or Credit in 1002) and MATH (1903 or 1907 or Credit in 1003) **Prohibitions:** MATH2001, MATH2901, MATH2002, MATH2902, MATH2061,

MATH2067 **Assessment:** 2 hour exam, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit is an advanced version of MATH2061, with more emphasis on the underlying concepts and on mathematical rigour. Topics from linear algebra focus on the theory of vector spaces and linear transformations.

The connection between matrices and linear transformations is studied in detail. Determinants, introduced in first year, are revised and investigated further, as are eigenvalues and eigenvectors. The calculus component of the unit includes local maxima and minima, Lagrange multipliers, the inverse function theorem and Jacobians.

There is an informal treatment of multiple integrals: double integrals, change of variables, triple integrals, line and surface integrals, Green's theorem and Stokes' theorem.

### MATH2962 Real and Complex Analysis (Advanced) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week. **Prerequisites:** MATH (1901 or 1906 or Credit in 1001) and MATH (1902 or Credit in 1002) and MATH (1903 or 1907 or Credit in 1003) **Prohibitions:** MATH2007, MATH2907 **Assessment:** 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, UG Study Abroad Program.

Analysis is one of the fundamental topics underlying much of mathematics including differential equations, dynamical systems, differential geometry, topology and Fourier analysis. Starting off with an axiomatic description of the real number system, this first course in analysis concentrates on the limiting behaviour of infinite sequences and series on the real line and the complex plane. These concepts are then applied to sequences and series of functions, looking at point-wise and uniform convergence. Particular attention is given to power series leading into the theory of analytic functions and complex analysis. Topics in complex analysis include elementary functions on the complex plane, the Cauchy integral theorem, Cauchy integral formula, residues and related topics with applications to real integrals.

### MATH2963 Math Computing & Nonlinear Systems (Adv) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week (lectures in common with MATH2063). **Prerequisites:** MATH (1901 or 1906 or Credit in 1001) and MATH (1902 or Credit in 1002) and MATH (1903 or 1907 or Credit in 1003) **Prohibitions:** MATH2003, MATH2903, MATH2006, MATH2906, MATH2063 **Assessment:** 2 hour exam, assignments/quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

The content of this unit of study parallels that of MATH2063, but both computational and theory components will place more emphasis on Advanced topics, including Lyapunov exponents, stability, 2- and 3-cycles for mappings and concepts such as strange attractors. No prior knowledge of programming or of the MATLAB language or computer algebra is required.

### MATH2965 Partial Differential Equations Intro Adv Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week (lectures in common with MATH2065). **Prerequisites:** MATH (2961 or Credit in 2061) or {MATH (2901 or Credit in 2001) and MATH (2902 or Credit in 2002)} **Prohibitions:** MATH2005, MATH 2905, MATH2065, MATH2067 **Assessment:** 2 hour exam, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, UG Study Abroad Program.

This unit of study is essentially an Advanced version of MATH2065, the emphasis being on solutions of differential equations in applied mathematics. The theory of ordinary differential equations is developed for second order linear equations, including series solutions, special functions and Laplace transforms, and boundary-value problems including separation of variables, Fourier series and Fourier transforms.

### MATH2968 Algebra (Advanced) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week. **Prerequisites:** 9 credit points of Junior Mathematics (advanced level or Credit at normal level) including (MATH1902 or Credit in MATH1002) **Prohibitions:** MATH2908, MATH2918, MATH2008 **Assessment:** 2 hour exam, assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, UG Study Abroad Program.

This unit provides an introduction to modern abstract algebra, via linear algebra and group theory. It extends the linear algebra covered in Junior Mathematics and in MATH2961, and proceeds to a classification of linear operators on finite dimensional spaces. Permutation groups are used to introduce and motivate the study of abstract group theory. Topics covered include actions of groups on sets, subgroups, homomorphisms, quotient groups and the classification of finite abelian groups.

### MATH2969 Discrete Mathematics & Graph Theory Adv Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week. **Prerequisites:** 9 credit points of Junior Mathematics (advanced level or Credit at the normal level) **Prohibitions:** MATH2011, MATH2009, MATH2069 **Assessment:** Two 1.5 hour exams, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

This unit will cover the same material as MATH2069 with some extensions and additional topics.

### MATH2970 Optimisation & Financial Mathematics Adv Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week (lectures given in common with MATH2070). **Prerequisites:** MATH (1901 or 1906 or Credit in 1001) and MATH (1902 or Credit in 1002) **Prohibitions:** MATH2010, MATH2033, MATH2933, MATH2070 **Assumed knowledge:** MATH (1903 or 1907) or Credit in MATH1003 **Assessment:** One 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students may enrol in both MATH2970 and MATH3975 in the same semester*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B E, B Ed, B Sc (Psych), B Sc, B Sc (Bioinformatics), UG Study Abroad Program.

The content of this unit of study parallels that of MATH2070, but students enrolled at Advanced level will undertake more advanced problem solving and assessment tasks, and some additional topics may be included.

### MATH2988 Number Theory and Cryptography Advanced) Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** At least 9cp from MATH (1901 or Credit in 1001), MATH (1902 or Credit in 1002), MATH (1903 or Credit in 1003), MATH (1904 or Credit in 1004), MATH (1905 or Credit in 1005), MATH1906, MATH1907, MATH (2961 or Credit in MATH2061), MATH2962 or MATH (2969 or Credit in MATH2069). **Prohibitions:** MATH2068 **Assessment:** One 2 hr exam, homework assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Ed, B Sc (Psych), B Sc, UG Study Abroad Program.

This unit of study is an advanced version of MATH2068, sharing the same lectures but with more advanced topics introduced in the tutorials and computer laboratory sessions.

### MATH3061 Geometry and Topology Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3001, MATH3006 **Assessment:** One 2 hour exam, tutorial tests, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B IT (Hons), B Res Ec, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

The aim of the unit is to expand visual/geometric ways of thinking. The geometry section is concerned mainly with transformations of the Euclidean plane (that is, bijections from the plane to itself), with a focus on the study of isometries (proving the classification theorem for transformations which preserve distances between points), symmetries (including the classification of frieze groups) and affine transformations (transformations which map lines to lines). The basic approach is via vectors and matrices, emphasising the interplay between geometry and linear algebra. The study of affine transformations is then extended to the study of collineations in the real projective plane, including collineations which map conics to conics. The topology section considers graphs, surfaces and knots from a combinatorial point of view. Key ideas such as homeomorphism, subdivision, cutting and pasting and the Euler invariant are introduced first for graphs (1-dimensional objects) and then for triangulated surfaces (2-dimensional objects). The classification of surfaces is given in several equivalent forms. The problem of colouring maps on surfaces is interpreted via graphs. The main geometric fact about knots is that every knot bounds a surface in 3-space. This is proven by a simple direct construction, and this fact is used to show that every knot is a sum of prime knots.

### MATH3062 Algebra and Number Theory Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3962, MATH3902, MATH3002, MATH3009 **Assessment:** One 2 hour exam, quizzes and assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Students are advised to take MATH(2068 or 2968) before attempting this unit.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B IT (Hons), B Res Ec, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

The first half of the unit continues the study of elementary number theory, with an emphasis on the solution of Diophantine equations (for example, finding all integer squares which are one more than twice a square). Topics include the Law of Quadratic Reciprocity, representing an integer as the sum of two squares, and continued fractions. The second half of the unit introduces the abstract algebraic concepts which arise naturally in this context: rings, fields, irreducibles and unique factorisation. Polynomial rings, algebraic numbers and constructible numbers are also discussed.

### MATH3063 Differential Equations & Biomaths Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3020, MATH3920, MATH3003, MATH3923, MATH3963 **Assumed knowledge:** MATH2061 **Assessment:** One 2 hour

exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study is an introduction to the theory of systems of ordinary differential equations. Such systems model many types of phenomena in engineering, biology and the physical sciences. The emphasis will not be on finding explicit solutions, but instead on the qualitative features of these systems, such as stability, instability and oscillatory behaviour. The aim is to develop a good geometrical intuition into the behaviour of solutions to such systems. Some background in linear algebra, and familiarity with concepts such as limits and continuity, will be assumed. The applications in this unit will be drawn from predator-prey systems, transmission of diseases, chemical reactions, beating of the heart and other equations and systems from mathematical biology.

### MATH3065 Logic and Foundations Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3005 **Assessment:** One 2 hour exam, tutorial tests, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B I T (Hons), B Res Ec, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit is in two halves. The first half provides a working knowledge of the propositional and predicate calculi, discussing techniques of proof, consistency, models and completeness. The second half discusses notions of computability by means of Turing machines (simple abstract computers). (No knowledge of computer programming is assumed.) It is shown that there are some mathematical tasks (such as the halting problem) that cannot be carried out by any Turing machine. Results are applied to first-order Peano arithmetic, culminating in Gödel's Incompleteness Theorem: any statement that includes first-order Peano arithmetic contains true statements that cannot be proved in the system. A brief discussion is given of Zermelo-Fraenkel set theory (a candidate for the foundations of mathematics), which still succumbs to Gödel's Theorem.

### MATH3068 Analysis Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3008, MATH2007, MATH2907, MATH2962 **Assessment:** One 2 hour exam, tutorial tests, assignments. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Res Ec, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

Analysis grew out of calculus, which leads to the study of limits of functions, sequences and series. The aim of the unit is to present enduring beautiful and practical results that continue to justify and inspire the study of analysis. The unit starts with the foundations of calculus and the real number system. It goes on to study the limiting behaviour of sequences and series of real and complex numbers. This leads naturally to the study of functions defined as limits and to the notion of uniform convergence. Returning to the beginnings of calculus and power series expansions leads to complex variable theory: analytic functions, Taylor expansions and the Cauchy Integral Theorem.

Power series are not adequate to solve the problem of representing periodic phenomena such as wave motion. This requires Fourier theory, the expansion of functions as sums of sines and cosines. This unit deals with this theory, Parseval's identity, pointwise convergence theorems and applications.

The unit goes on to introduce Bernoulli numbers, Bernoulli polynomials, the Euler MacLaurin formula and applications, the gamma function

and the Riemann zeta function. Lastly we return to the foundations of analysis, and study limits from the point of view of topology.

### MATH3075 Financial Mathematics Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3975, MATH3015, MATH3933 **Assessment:** Two class quizzes and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Res Ec, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit is an introduction to the mathematical theory of modern finance. Topics include: notion of arbitrage, pricing riskless securities, risky securities, utility theory, fundamental theorems of asset pricing, complete markets, introduction to options, binomial option pricing model, discrete random walks, Brownian motion, derivation of the Black-Scholes option pricing model, extensions and introduction to pricing exotic options, credit derivatives. A strong background in mathematical statistics and partial differential equations is an advantage, but is not essential. Students completing this unit have been highly sought by the finance industry, which continues to need graduates with quantitative skills. The lectures in the Normal unit are held concurrently with those of the corresponding Advanced unit.

### MATH3076 Mathematical Computing Science

**Credit points:** 6 **Teacher/Coordinator:** Dr D J Ivers **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour laboratory per week. **Prerequisites:** 12 credit points of Intermediate Mathematics and one of MATH1001 or 1003 or 1901 or 1903 or 1906 or 1907 **Prohibitions:** MATH3976, MATH3016, MATH3916 **Assessment:** One 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B I T (Hons), B Res Ec, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study provides an introduction to Fortran 95 programming and numerical methods. Topics covered include computer arithmetic and computational errors, systems of linear equations, interpolation and approximation, solution of nonlinear equations, quadrature, initial value problems for ordinary differential equations and boundary value problems.

### MATH3078 PDEs and Waves Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3978, MATH3018, MATH3921 **Assumed knowledge:** MATH(2061/2961) and MATH(2065/2965) **Assessment:** One 2 hour exam, one lecture quiz **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Res Ec, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study introduces Sturm-Liouville eigenvalue problems and their role in finding solutions to boundary value problems. Analytical solutions of linear PDEs are found using separation of variables and integral transform methods. Three of the most important equations of mathematical physics - the wave equation, the diffusion (heat) equation and Laplace's equation - are treated, together with a range of applications. There is particular emphasis on wave phenomena, with an introduction to the theory of sound waves and water waves.

### MATH3961

#### Metric Spaces (Advanced) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics units **Prohibitions:** MATH3901, MATH3001 **Assumed knowledge:** MATH2961 or MATH2962 **Assessment:** 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

Topology, developed at the end of the 19th Century to investigate the subtle interaction of analysis and geometry, is now one of the basic disciplines of mathematics. A working knowledge of the language and concepts of topology is essential in fields as diverse as algebraic number theory and non-linear analysis. This unit develops the basic ideas of topology using the example of metric spaces to illustrate and motivate the general theory. Topics covered include: Metric spaces, convergence, completeness and the contraction mapping theorem; Metric topology, open and closed subsets; Topological spaces, subspaces, product spaces; Continuous mappings and homeomorphisms; Compact spaces; Connected spaces; Hausdorff spaces and normal spaces, Applications include the implicit function theorem, chaotic dynamical systems and an introduction to Hilbert spaces and abstract Fourier series.

### MATH3962

#### Rings, Fields and Galois Theory (Adv) Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3062, MATH3902, MATH3002 **Assumed knowledge:** MATH2961 **Assessment:** One 2 hour exam, assignments and quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students are advised to take MATH2968 before attempting this unit.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B IT (Hons), B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study investigates the modern mathematical theory that was originally developed for the purpose of studying polynomial equations. The philosophy is that it should be possible to factorize

any polynomial into a product of linear factors by working over a "large enough" field (such as the field of all complex numbers). Viewed like this, the problem of solving polynomial equations leads naturally to the problem of understanding extensions of fields. This in turn leads into the area of mathematics known as Galois theory.

The basic theoretical tool needed for this program is the concept of a ring, which generalizes the concept of a field. The course begins with examples of rings, and associated concepts such as subrings, ring homomorphisms, ideals and quotient rings. These tools are then applied to study quotient rings of polynomial rings. The final part of the course deals with the basics of Galois theory, which gives a way of understanding field extensions.

### MATH3963

#### Differential Equations & Biomaths (Adv)

##### Science

**Credit points:** 6 **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3020, MATH3920, MATH3003, MATH3923, MATH3063 **Assumed knowledge:** MATH2961 **Assessment:** One 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Bioinformatics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

The theory of ordinary differential equations is a classical topic going back to Newton and Leibniz. It comprises a vast number of ideas and methods of different nature. The theory has many applications and stimulates new developments in almost all areas of mathematics. The applications in this unit will be drawn from predator-prey systems, transmission of diseases, chemical reactions, beating of the heart and other equations and systems from mathematical biology. The emphasis is on qualitative analysis including phase-plane methods, bifurcation theory and the study of limit cycles. The more theoretical part includes existence and uniqueness theorems, stability analysis, linearisation, and hyperbolic critical points, and omega limit sets.

### MATH3966

#### Modules and Group Representations (Adv)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics **Prohibitions:** MATH3906, MATH3907 **Assumed knowledge:** MATH3962 **Assessment:** One 2 hour exam, assignments and quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit deals first with generalized linear algebra, in which the field of scalars is replaced by an integral domain. In particular we investigate the structure of modules, which are the analogues of vector spaces in this setting, and which are of fundamental importance in modern pure mathematics. Applications of the theory include the solution over the integers of simultaneous equations with integer coefficients and analysis of the structure of finite abelian groups.

In the second half of this unit we focus on linear representations of groups. A group occurs naturally in many contexts as a symmetry group of a set or space. Representation theory provides techniques for analysing these symmetries. The component will deals with the decomposition of representation into simple constituents, the remarkable theory of characters, and orthogonality relations which these characters satisfy.

### MATH3968

#### Differential Geometry (Advanced)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics, including MATH2961 **Prohibitions:** MATH3903 **Assumed knowledge:** At least 6 credit points of Advanced Mathematics units of study at Intermediate or Senior level. **Assessment:** One 2 hour exam and 2 assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit is an introduction to Differential Geometry, using ideas from calculus of several variables to develop the mathematical theory of geometrical objects such as curves, surfaces and their higher-dimensional analogues. Differential geometry also plays an important part in both classical and modern theoretical physics. The initial aim is to develop geometrical ideas such as curvature in the context of curves and surfaces in space, leading to the famous Gauss-Bonnet formula relating the curvature and topology of a surface. A second aim is to present the calculus of differential forms as the natural setting for the key ideas of vector calculus, along with some applications.

### MATH3969

#### Measure Theory & Fourier Analysis (Adv)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorials per week. **Prerequisites:** 12 credit points Intermediate Mathematics **Prohibitions:** MATH3909 **Assumed knowledge:** At least 6 credit points of Advanced Mathematics units of study at Intermediate or Senior level **Assessment:** One 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

Measure theory is the study of such fundamental ideas as length, area, volume, arc length and surface area. It is the basis for the integration theory used in advanced mathematics since it was developed by Henri Lebesgue in about 1900. Moreover, it is the basis for modern probability theory. The course starts by setting up measure theory and integration, establishing important results such as Fubini's Theorem and the Dominated Convergence Theorem which allow us to manipulate integrals. This is then applied to Fourier Analysis, and results such as the Inversion Formula and Plancherel's Theorem are derived. Probability Theory is then discussed, with topics including independence, conditional probabilities, and the Law of Large Numbers.

### MATH3974

#### Fluid Dynamics (Advanced)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics with average grade of at least Credit **Prohibitions:** MATH3914 **Assumed knowledge:** MATH2961, MATH2965 **Assessment:** One 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study provides an introduction to fluid dynamics, starting with a description of the governing equations and the simplifications gained by using stream functions or potentials. It develops elementary theorems and tools, including Bernoulli's equation, the role of vorticity, the vorticity equation, Kelvin's circulation theorem, Helmholtz's theorem, and an introduction to the use of tensors. Topics covered include viscous flows, lubrication theory, boundary layers, potential theory, and complex variable methods for 2-D airfoils. The unit concludes with an introduction to hydrodynamic stability theory and the transition to turbulent flow.

### MATH3975

#### Financial Mathematics (Advanced)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate

Mathematics with at least Credit average **Prohibitions:** MATH3933, MATH3015, MATH3075 **Assessment:** Two class quizzes and one 2 hour exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit is an introduction to the mathematical theory of modern finance. Topics include: notion of arbitrage, pricing riskless securities, risky securities, utility theory, fundamental theorems of asset pricing, complete markets, introduction to options, binomial option pricing model, discrete random walks, Brownian motion, derivation of the Black-Scholes option pricing model, extensions and introduction to pricing exotic options, credit derivatives. A strong background in mathematical statistics and partial differential equations is an advantage, but is not essential. Students completing this unit have been highly sought by the finance industry, which continues to need graduates with quantitative skills. Students enrolled in this unit at the Advanced level will be expected to undertake more challenging assessment tasks. The lectures in the Advanced unit are held concurrently with those of the corresponding Normal unit.

### MATH3976

#### Mathematical Computing (Advanced)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr D J Ivers **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics and one of MATH(1903 or 1907) or Credit in MATH1003 **Prohibitions:** MATH3076, MATH3016, MATH3916 **Assessment:** One 2 hour exam, assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B I T (Hons), B Sc, B Sc (Bioinformatics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

See entry for MATH3076 Mathematical Computing.

### MATH3977

#### Lagrangian & Hamiltonian Dynamics (Adv)

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr. Leon Poladian **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate Mathematics with at least Credit average **Prohibitions:** MATH2904, MATH2004, MATH3917 **Assessment:** One 2 hour exam and assignments and/or quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit provides a comprehensive treatment of dynamical systems using the mathematically sophisticated framework of Lagrange and Hamilton. This formulation of classical mechanics generalizes elegantly to modern theories of relativity and quantum mechanics. The unit develops dynamical theory from the Principle of Least Action using the calculus of variations. Emphasis is placed on the relation between the symmetry and invariance properties of the Lagrangian and Hamiltonian functions and conservation laws. Coordinate and canonical transformations are introduced to make apparently complicated dynamical problems appear very simple. The unit will also explore connections between geometry and different physical theories beyond classical mechanics.

Students will be expected to solve fully dynamical systems of some complexity including planetary motion and to investigate stability using perturbation analysis. Hamilton-Jacobi theory will be used to elegantly solve problems ranging from geodesics (shortest path between two points) on curved surfaces to relativistic motion in the vicinity of black holes.

This unit is a useful preparation for units in dynamical systems and chaos, and complements units in differential equations, quantum theory and general relativity.

### MATH3978

#### PDEs and Waves (Advanced)

##### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Intermediate

Mathematics with at least Credit average **Prohibitions:** MATH3078, MATH3018, MATH3921 **Assumed knowledge:** MATH(2061/2961) and MATH(2065/2965) **Assessment:** One 2 hour exam, one lecture quiz **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Com, B Sc, B Sc (Molecular Biotechnology), UG Study Abroad Program.

As for MATH3078 PDEs & Waves but with more advanced problem solving and assessment tasks. Some additional topics may be included.

**Associated degrees:** UG Study Abroad Program.

This unit is available to Study Abroad and Exchange students coming to the University of Sydney. The unit is part of the Honours year program. Students enrolled in the Honours program study various advanced aspects of Applied Mathematics. The program may include lectures, tutorials and seminars. Assessment may include research, examination and classwork. Intending students should contact the Honours coordinator in this School.

**MBLG1001****Molecular Biology and Genetics (Intro)****Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Dale Hancock **Session:** Semester 2 **Classes:** Two 1 hour lectures per week; one 1 hour tutorial and one 4 hour practical per fortnight. **Prohibitions:** AGCH2001, BCHM2001, BCHM2101, BCHM2901, MBLG2101, MBLG2901, MBLG2001, MBLG2111, MBLG2771, MBLG2871, MBLG1901 **Assumed knowledge:** 6 credit points of Junior Biology and 6 cp of Junior Chemistry **Assessment:** One 2.5 hour exam, in-semester skills test and assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, M B, B S, B E, B Med Sc, B Pharm, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrit).

The lectures in this unit of study introduce the "Central Dogma" of molecular biology and genetics -i.e., the molecular basis of life. The course begins with the information macro-molecules in living cells: DNA, RNA and protein, and explores how their structures allow them to fulfill their various biological roles. This is followed by a review of how DNA is organised into genes leading to discussion of replication and gene expression (transcription and translation). The unit concludes with an introduction to the techniques of molecular biology and, in particular, how these techniques have led to an explosion of interest and research in Molecular Biology. The practical component complements the lectures by exposing students to experiments which explore the measurement of enzyme activity, the isolation of DNA and the 'cutting' of DNA using restriction enzymes. However, a key aim of the practicals is to give students higher level generic skills in computing, communication, criticism, data analysis/evaluation and experimental design.

## Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Dale Hancock **Session:** Semester 2 **Classes:** Two 1 hour lectures per week; one 1 hour tutorial and one 4 hour practical per fortnight, four 1 hour seminars per semester. **Prerequisites:** UAL of 95 or minimum Band 5 in HSC chemistry and biology or by invitation **Prohibitions:** AGCH2001, BCHM2001, BCHM2101, BCHM2901, MBLG2101, MBLG2901, MBLG2001, MBLG2111, MBLG2771, MBLG2871, MBLG1001 **Assumed knowledge:** HSC Chemistry and Biology OR 6 credit points of Junior Biology and 6 cp of Junior Chemistry **Assessment:** One 2.5 hour exam, in-semester skills test and assignments **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), M B B S, B App Sc (Ex & Sp Sc), B Sc (Nutr), B Com, M B, B S, B E, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG S.

The lectures in this unit of study introduce the "Central Dogma" of molecular biology and genetics -i.e., the molecular basis of life. The course begins with the information macro-molecules in living cells: DNA, RNA and protein, and explores how their structures allow them to fulfill their various biological roles. This is followed by a review of how DNA is organised into genes leading to discussion of replication and gene expression (transcription and translation). The unit concludes with an introduction to the techniques of molecular biology and, in particular, how these techniques have led to an explosion of interest and research in Molecular Biology. The practical component complements the lectures by exposing students to experiments which explore the measurement of enzyme activity, the isolation of DNA and the 'cutting' of DNA using restriction enzymes. However, a key aim of the practicals is to give students higher level generic skills in computing, communication, criticism, data analysis/evaluation and experimental design.

The advanced component is designed for students interested in continuing in molecular biology. It consists of 7 advanced lectures (replacing 7 regular lectures) and 3 advanced laboratory sessions (replacing 3 regular practical classes). The advanced lectures will focus on the experiments which led to key discoveries in molecular biology. The advanced practical sessions will give students the opportunity to explore alternative molecular biology experimental techniques. Attendance at MBLG1999 seminars is strongly encouraged.

## MBLG1999

### Molecular Biology & Genetics Seminar A

#### Science

**Session:** Semester 2 **Classes:** Four 1 hour seminars per semester. **Corequisites:** MBLG1001 or MBLG1901 **Assessment:** There will be no assessment for this unit. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Only available in the BSc(MBG) and MBLG1901*

**Associated degrees:** B Sc (Molecular Biology & Genetics).

This unit consists of four introductory molecular biology and genetics research based seminars.

## MBLG2071

### Molecular Biology and Genetics A

#### Science

**Credit points:** 6 **Teacher/Coordinator:** Ms Vanessa Gysbers **Session:** Semester 1 **Classes:** Two 1 hour lectures per week; one 1 hour tutorial and one 4 hour practical per fortnight. **Prerequisites:** MBLG1001 or MBLG1901 and 12 CP of Junior Chemistry. **Prohibitions:** MBLG2971, MBLG2771, MBLG2871, MBLG2001, MBLG2101, MBLG2901, MBLG2111, PLNT2001, AGCH2001, BCHM2001, BCHM2101, BCHM2901 **Assessment:** One 2.5 hour exam, practical work, laboratory reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students enrolled in the combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) must have completed all Junior units for this course (CHEM1101, BACH1161, BIOS1159, EXSS1018 CHEM1102, BIOS1133, BIOS1160, EXSS1033, MBLG1001) prior to enrolling in this unit.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B App Sc (Ex, SS and Nut), B App Sc (Ex & Sp Sc), B Sc (Nutr), B E, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (

This unit of study extends the basic concepts introduced in MBLG1001/1901 and provides a firm foundation for students wishing to continue in the molecular biosciences as well as for those students who intend to apply molecular techniques to other biological or medical questions. The unit explores the regulation of the flow of genetic information in both eukaryotes and prokaryotes. The central focus is on the control of replication, transcription and translation and how these processes can be studied and manipulated in the laboratory. The processes of DNA mutation and repair are also discussed. Experiments in model organisms are presented to illustrate current advancements in the field, together with discussion of work carried out in human systems and the relevance to human genetic diseases. The tools of molecular biology are taught within the context of recombinant DNA-cloning - with an emphasis on essential knowledge required to use plasmid vectors. The methods of gene introduction (examples of transgenic plants and animals) are also discussed. Other techniques include PCR methodology and its use for cloning specific genes and detection of polymorphisms, separating DNA fragments by gel electrophoresis and analysis of macromolecules by Southern, Northern & Western blotting. In the genomics section, topics include assigning genes to specific chromosomes, high resolution chromosome mapping, DNA markers, physical mapping of genomes as well as DNA and genome sequencing methods and international projects in genome mapping.

The practical course complements the theory and builds on the skills learnt in MBLG1001. Specifically students will: use spectrophotometry for the identification and quantification of nucleic acids, explore the lac operon system for the investigation of gene expression control, perform PCR analysis. As with MBLG1001, strong emphasis is placed on the acquisition of generic and technical skills.

## MBLG2072

### Molecular Biology and Genetics B

#### Science

**Credit points:** 6 **Session:** Semester 2 **Classes:** Two 1 hour lectures per week; one 2-3 hour practical per week. One tutorial every second week. **Prerequisites:** BIOL (1001 or 1101 or 1901 or 1911) and MBLG (1001 or 1901) and 12 credit points of Junior Chemistry **Prohibitions:** MBLG2972, MBLG2102, MBLG2002, MBLG2902 **Assumed knowledge:** One of MBLG2071, MBLG2771, MBLG2001, MBLG2871, MBLG2971, MBLG2901 **Assessment:** One 2 hour exam (50%), laboratory reports and quizzes (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit of study builds on the concepts introduced in MBLG2071 and shows how modern molecular biology is being applied to the study of the genetics of all life forms from bacteria through to complex multicellular organisms including plants, animals and humans. Lecture topics include classical Mendelian genetics with an emphasis on its molecular basis, cytogenetics, bacterial genetics and evolution, molecular evolution, bioinformatics and genomics, developmental genetics and the techniques and applications of molecular genetics. Practical: In laboratory exercises you will use a variety of prokaryotic and eukaryotic organisms to illustrate aspects of the lecture material, while developing familiarity and competence with equipment used in molecular techniques, microscopes, computers and statistical tests. Generic skills are developed in report writing, oral presentation, problem solving and data analysis. This is a core Intermediate unit of study in the BSc (Molecular Biology and Genetics) degree program.

### MBLG3999

#### Molecular Biology & Genetics Seminar B Science

**Session:** Semester 2 **Classes:** Four 1 hour seminars (available by invitation only from MBLG program chair) **Assessment:** There will be no assessment for this unit. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Only available to students enrolled in the BSc(MBG) degree or the BCHM3972 course*

**Associated degrees:** B Sc (Molecular Biology & Genetics).

This unit consists of four advanced molecular biology and genetics research based seminars.

### MCGY1000

#### Aural Perception 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 1 **Classes:** One 1hr Lab and one 1hr Solfege tut/wk **Assumed knowledge:** Ability to read music notation including treble and bass clefs. Knowledge of all tonal key signatures and standard time signatures. **Assessment:** Weekly Lab assignment (15%); 1hr mid-semester written test (15%); Solfege class work assessment (15%); 1hr written examination (30%); 10 min Solfege examination

(25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Students work on dictation and sightsinging exercises using diatonic pitch materials, and simple and compound rhythms.

*Textbooks*

As advised on USYD eLearning website.

### MCGY1001

#### Aural Perception 1A

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 1 **Classes:** One 1hr lab and one 1hr Solfege tut/wk **Assumed knowledge:** Ability to read music notation including treble and bass clefs. Knowledge of all tonal key signatures and standard time signatures. **Assessment:** Weekly Lab tests (25%); weekly Lab assignments (15%); Solfege tutorial assessment (15%); 1hr Lab examination (25%); 5 min Solfege examination (20%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Students work on dictation and sightsinging exercises using simpler diatonic pitch materials, and simple and compound rhythms.

*Textbooks*

As advised on USYD eLearning web site.

### MCGY1002

#### Aural Perception 1B

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 2 **Classes:** One 1hr Lab and one 1hr Solfege tut/wk **Prerequisites:** MCGY1001 Aural Perception 1A **Assessment:** Weekly Lab assignment (15%); 1hr mid-semester written test (15%); Solfege class work assessment (15%); 1hr written examination (30%); 10 min Solfege examination (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Students continue to work on dictation and sightsinging exercises using diatonic pitch materials, and simple and compound rhythms.

*Textbooks*

As advised on USYD eLearning web site.

### MCGY1003

#### Aural Perception 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 1, Semester 2 **Classes:** One 1hr Lab and one 1hr Solfege tut/wk **Prerequisites:** MCGY1000 Aural Perception 1 or MCGY1002 Aural Perception 1B **Assessment:** Weekly Lab assignment (15%); 1hr mid-semester written test (15%); Solfege class work assessment (15%); 1hr written examination (30%); 10 min Solfege examination (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Materials studied include diatonic harmony, species counterpoint, modes and rhythms using triplets and duplets.

*Textbooks*

As advised on the USYD eLearning website.

### MCGY1008

#### Harmony and Analysis 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** 1 lecture, 1 tutorial/wk **Assessment:** Assignments (40%), examination (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

An understanding of the materials of tonal music is fundamental to all aspects of a student's musicianship. The acquisition of practical skills in harmony provides a means of examining in their essence issues of musical structure and technique that apply throughout the tonal repertoire. In February Semester students gain fluency in writing four-part harmonisations using diatonic vocabulary, learning the basic chord functions and voice-leading patterns that will provide a framework for later elaboration. Exercises in species counterpoint are included to assist in the comprehension of voice leading principles, and the linear conception of music is further explored through introductory exercises in analysis.

#### Textbooks

Gauldin Robert, Harmonic practice in tonal music. 2nd ed. NY: Norton, 2004.  
Gauldin Robert, Workbook for harmonic practice in tonal music. 2nd ed. NY: Norton, 2004

### MCGY1009

#### Harmony and Analysis 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 2 **Classes:** 1 lecture, 1 tutorial/wk **Prerequisites:** MCGY1008 Harmony and Analysis 1 **Assessment:** Assignments (40%), examination (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Having acquired basic skills in voice leading and an understanding of diatonic chord functions, students are introduced to more advanced concepts that are encountered frequently in the tonal repertoire. These include modulation, diatonic sequences and techniques for working with instrumental textures. Counterpoint studies are continued, both in practice and in analysis, where some aspects of Baroque musical forms are considered.

### MCGY1013

#### Music History 1: Medieval & Renaissance

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tut/wk for 6 weeks. **Assessment:** Tutorial assignment (30%); tutorial participation (10%); final exam (60%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

This unit presents a largely chronological study of major developments in the history of Western art music of the Middle Ages and Renaissance: from the 9th century to 1600. The emergence of different styles and forms is examined through analysis of selected musical examples. Lectures also deal with the relation of music to contemporaneous events, religious and political, as well as technological developments such as music printing. Tutorials provide a detailed analysis of selected pieces, as well as the opportunity for students to discuss further the materials presented there and in the lectures. Emphasis is placed on listening to a wide variety of music. Below is a list of topics to be covered.

- chant: Gregorian chant, later medieval chant, and Hildegard of Bingen
- music of the troubadours and trouveres,
- early polyphony and the Notre Dame school
- French Ars nova and Italian Trecento: Machaut and Landini
- 15th-century English music and Dunstable
- Dufay and Ockeghem
- Josquin des Prez and his contemporaries
- the 16th-century madrigal

- 16th-century instrumental music and instruments

- 16th century sacred polyphony: Palestrina and Lasso

#### Music History 2: Baroque

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 2 **Classes:** Two 1 hr lectures and one 1 hr seminar for 6 weeks **Assessment:** Tutorial presentation (30%), tutorial participation (20%) and final exam (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

This unit presents a largely chronological survey of western art music of the baroque period, approximately 1600 to 1750. The lectures deal with the emergence and development of musical forms and styles, relating these to contemporary political and social developments where possible. Tutorials are devoted to detailed analysis of selected pieces and provide opportunity for students to discuss material covered there and in lectures. Emphasis is placed on listening to a wide variety of music. Below is a list of topics to be covered. Monody and the beginnings of opera; Monteverdi and the early 17th century; early baroque instrumental music: Frescobaldi, Sweelinck, etc; sacred concerto and 17th-century oratorio: Schütz and Carissimi; mid baroque opera: Purcell, Lully and Alessandro Scarlatti; the sonata: from Corelli to J. S. Bach; the instrumental concerto: from Torelli to J. S. Bach; operas and oratorios of Handel; the music of J. S. Bach. Students will attend a specified selection of classes taught within MCGY2611 Music from the Middle Ages to the Baroque.

#### Musicology Workshop 1

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 2hr seminar/wk **Corequisites:** MCGY2014 Musicology 3 (Major) or MCGY2603 Musicology 3 **Assessment:** Presentation of paper on major study, journal, and participation (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Musicology), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

Musicology Workshop provides a forum for discussion of musicological work and is principally intended for undergraduates taking Musicology as the Principal Study. Students taking the Musicology Minor are not required to attend but are very welcome to participate as time allows, as are musicology postgraduate students. Musicology Workshop gives students the opportunity to present their work in a seminar format and to discuss issues and methodology with the whole group, gaining practice in presentation and feedback. Occasional class projects are held in which the whole group focusses on a project such as the discussion of a recent conference or performances, musicological issues or activities, or recent literature. Workshop classes may occasionally be held at other locations for attendance of special lectures or viewing of specialist collections. Students will be expected occasionally to attend other musicological activities at the Conservatorium held at different times such as Musicology Research Workshop.

### MCGY1020

### MCGY1601

#### Musicology 1

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 2 hr seminar, plus attendance at Musicology Workshop **Assessment:** Database quizz (10%) ; Annotated bibliography (20%); Class report and participation (20%); 1500w research report (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B Mus (Mus Ed), B Mus (Musicology), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, UG Study Abroad Program.

Musicology 1 introduces the study of musicology at the undergraduate level. It aims to establish fundamental knowledge and skills required for musicological study and research, particularly emphasizing finding, surveying and reporting on musicological information. In this semester the musical topics for study are drawn from the recent period covered by MCGY2614 Musical Worlds of Today.

### MCGY1602

#### Musicology 2

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 2 hr seminar, plus attendance at Musicology Workshop **Prerequisites:** MCGY1601 Musicology 1 **Assessment:** Assignments 30%; class report and participation 20%; 1500w research report 50% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B Mus (Mus Ed), B Mus (Musicology), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, UG Study Abroad Program.

Musicology 2 continues the introduction to musicology at the undergraduate level, and like Musicology 1, it aims to further the establishment of fundamental methodological knowledge and skills required for musicological study and research. Musical topics for study are drawn from the period covered by MCGY2611 Music from the Middle Ages to the Baroque, and some strategies for musical analysis of music of the period are introduced.

### MCGY2001

#### Advanced Harmony 2

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 2 **Classes:** One 2hr seminar/wk for 6 weeks **Assessment:** Three 15-20 bar

assignments (75%), one 15min seminar presentation (25%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, UG Study Abroad Program.

It is recommended that all students considering enrolling in this unit of study first complete Harmony and Analysis 4. Students in this unit will observe in detail a selection of western musical styles and the work of particular composers, applying the knowledge thus gained by writing short compositions in the relevant styles. For the student with some creative inclinations, the activity of stylistic imitation offers unique insights into the music of any period. Topics for study will be selected according to the interests of the group, taking into account the need for a coherent and cumulative course structure. Students in this unit will attend a specified selection of classes taught within MCGY2600 Advanced Harmony.

### MCGY2004

#### Aural Perception 3

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 1, Semester 2 **Classes:** One 1hr Lab and one 1hr Solfege tut/wk **Prerequisites:** MCGY1003 Aural Perception 2 **Assessment:** Weekly Lab assignment (15%); 1hr mid-semester written test (15%); Solfege class work assessment (15%); 1hr written examination (30%); 10 min Solfege examination (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Materials studied include more complex tonal melodies, chromatic tonal harmony, and rhythms using irregular division and small divisions.

*Textbooks*

As advised on the USYD eLearning website.

### MCGY2005

#### Aural Perception 4

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 1, Semester 2 **Classes:** One 1hr Lab and one 1hr Solfege tut/wk **Prerequisites:** MCGY2004 Aural Perception 3 **Assessment:** Weekly Lab assignment (15%); 1hr mid-semester written test (15%); Solfege class work assessment (15%); 1hr written examination (30%); 10 min Solfege examination (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Materials studied include more complex chromatic tonal harmony, atonal melodic and harmonic materials, and more complex rhythmic materials including irregular and mixed metres.

*Textbooks*

### MCGY2006

#### Classical Studies

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Neal Peres Da Costa **Session:** Semester 2 **Classes:** One 1hr seminar/wk **Prerequisites:** MCGY2012 Music History 3 or MCGY2612 Music in the Classical and Romantic Eras **Assessment:** Seminar presentation (25%), essay 3000 words (50%), attendance/participation (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The unit enables students to explore topics that will deepen and extend their understanding of the style, repertoire and performance traditions of the Viennese classical era, c. 1770-1827 and particularly the music of Haydn, Mozart and Beethoven. Students will become acquainted with important repertoire, research one topic in depth, increase knowledge of several other topics through the research of other class members, and study a selection of critical writings about the classical

period. Specific topics will be devised early in the semester based on scholarly and instrumental specialities.

## MCGY2008

### Music History 5: 1890-1950

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Richard Toop **Session:** Semester 2  
**Classes:** 1 hr lec and 2 hr tut/wk x 3 weeks, plus 2 hr lec and 1 hr tut/wk x 3 weeks. **Assumed knowledge:** Some familiarity with early 20th century music.  
**Assessment:** Either essay (35%) and 2hr examination (65%) OR 3hr examination (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

Traces the essential developments in 20th century Western art music to just after the 2nd World War and relates them to broad changes in 20th century art and society. The overview given in the lectures is reinforced by analysis of key works in the tutorials. Areas studied include: late nineteenth century Romanticism in Germany; anti- and post-Romantic trends in French music; the collapse of tonality; development of new approaches to rhythm and timbre; the neo-classical movement; the influence of jazz and popular music; the beginnings of serialism; music in Soviet Russia; experimentalism in American Music. Works analysed include compositions by Bartok, Debussy, Hindemith, Messiaen, Schoenberg, Strauss, Stravinsky, Varese and Webern.

### Music History 6: Post 1950

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Richard Toop **Session:** Semester 2  
**Classes:** 1hr lec and 2hr tut/wk X 3 weeks, plus 2hr lec and 1hr tut/wk X 3 weeks **Assumed knowledge:** Repertoire covered in Music History 5  
**Assessment:** Either Essay (35%) and Examination (65%), OR Examination (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

Traces the essential developments in 20th century Western art music since the 2nd World War and relates them to broad changes, artistic and otherwise, in post-war society. The overview given in the lectures is reinforced by analysis of key works in the tutorials. Areas covered include: Total serialisation; experimental tendencies in American music; electro-acoustic music; open forms and textural composition; collage; minimalism; music and politics; extended instrumental techniques; East-West fusions; neo-romanticism and the emergence of a post-modern aesthetic and its extensions. Works analysed include compositions by Andriessen, Carter, Ligeti, Lutoslawski, Part, Reich, Scelsi, Stockhausen and Xenakis.

### Harmony and Analysis 3

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1  
**Classes:** 4 lectures and 8 keyboard tutorials/semester, 1 tutorial/wk  
**Prerequisites:** MCGY1009 Harmony and Analysis 2 **Assessment:** Assignments (30%), Keyboard assessments (30%), examination (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

In Semesters 1 and 2 some separation is maintained between studies in counterpoint and harmony but the emphasis here is upon drawing together those two aspects. An ideal model for this approach is offered by the chorales of J.S. Bach, which form a focus in Semester 3. Each

topic is, however, extended to embrace later styles and assignments include the writing of short piano pieces, along with chorale settings and figured-bass exercises. With the benefit of a broader harmonic vocabulary, students will also investigate some aspects of fugal technique and sonata forms.

### Harmony and Analysis 4

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 2  
**Classes:** 1 lecture, 1 tutorial/wk **Prerequisites:** MCGY2010 Harmony and Analysis 3 **Assessment:** Assignments (50%), examination (50%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The study of pre-20th century tonal harmony is completed with a consideration of chromatic techniques, particularly those found in the music of the first half of the 19th century. An exhaustive study of later 19th century chromaticism is beyond the scope of a course at this level, but is intended that students will at least acquire the ability to look further into the music of that period as they encounter it. In keeping with the stylistic orientation of the course, emphasis is placed upon developing facility with instrumental textures and working with some of the smaller forms found in 19th century music.

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Major topics in the history of Western art music from the 9th century through to c. 1750 are discussed and viewed in a broad historical context. Beginning with Gregorian chant, the study moves through different genres, styles, developments in musical instruments, and innovations including the emergence of opera and the development of music printing. Among musical works for discussion and analysis are examples by Hildegard of Bingen, Machaut, Dufay, Josquin, Palestrina, Monteverdi, Frescobaldi, Lully, Purcell, Vivaldi, Handel and J.S. Bach.

#### Music in the Classical and Romantic Eras

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** Two 1hr lectures and one 1hr seminar **Prohibitions:** MCGY3012 Music History 3: 1751-1825 and/or MCGY2013 Music History 4: 1826-1890 **Assessment:** Written assignment, 2,000 - 3,000 words (30%); Listening test (20%); 2 hr exam (35%); Tutorial attendance & participation (15%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This is a foundation unit in the history and analysis of music, which traces the essential developments in European art music in the Classical and Romantic eras. The overview given in the lecture series is reinforced by analysis of key works in the tutorial. Lectures will include consideration of the notion of classicism and romanticism, and the political, social and philosophical background of the period. Topics will include the Empfindsamer and Sturm und Drang style; the growth of the symphony, string quartet and opera; music for virtuoso piano; Lieder; opera in the 19th century, Russian Nationalism and the programmatic vs the absolute in symphonic music.

#### Music in Modern Times

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Richard Toop **Session:** Semester 2 **Classes:** 3h pw, alternating 2 hr lecture + 1 hr tutorial, and 1 hr lecture and 2hr tutorial **Prohibitions:** MCGY2008 Music History 5: 1890-1950 and/or MCGY2009 Music History 6: Post 1950 **Assumed knowledge:** It is desirable that students should have a sound knowledge of 19th century music. **Assessment:** 1500-wd essay (30%), listening test (20%), 2-hr exam (40%), tutorial attendance and participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Traces the essential developments in Western art music from the very end of the 19th century to the start of the 21st, and relates them to broad socio-historical and artistic changes. The overview given in the lectures is reinforced by the analysis of key works in the tutorials. Areas covered include Late Romanticism, Impressionism, Expressionism and Free Atonality, Rhythmic Innovation, Neo-classicism. Influences from Popular Music, Serial Music, Political Music, American Experimentalism, Electro-Acoustic Music, Chance composition, Textural Composition, Minimalism, Collage and Polystylism, East-West Encounters, Neo-Romanticism and Post-Modernism. Works analysed include compositions by Andriessen, Bartok, Cage, Debussy, Messiaen, Reich, Schoenberg, Strauss, Stravinsky, Stockhausen, Varèse and Webern.

#### Musical Worlds of Today

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** 2hr lecture and 1hr tutorial **Assessment:** Essay, 1500 words (30%); online discussion and quizzes (20%); tutorial assignments and participation (20%); listening tests (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This is a Foundation unit in the History and Analysis of Music.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Embracing popular music and examples of traditional and contemporary music in Australia and Asia, this unit offers an introduction not only to the genres themselves, but to the themes

prevalent in the work of contemporary music scholars. These may include gender and race, ownership and appropriation, reception and transmission, technology and globalisation, music as social behaviour, and music and place. Such themes are considered across the three topic modules: Popular Music (including contemporary Aboriginal music); Traditional Music (Australia, Japan, Indonesia) and Australian Music (place and identity, from colonialism to the present day).

### MCGY2619

#### Popular Music: History, Place & Practice Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Charles Fairchild **Session:** Semester 1 **Classes:** 2 hour seminar **Prohibitions:** MCGY1006, MCGY1007, MUSC2654 **Assessment:** Essay (40%), analysis task (30%) and listening test (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study surveys developments in popular music from the early 1900s to the present centred around four thematic clusters: aesthetics, history, places and practices. Lectures will explore analytic techniques for non-notated music, the origins of contemporary forms of popular music as they emerged from African and European folk traditions in North America in the late 19th century. We will also analyse specific music scenes including Motown in the 60s, New York and London in the 70s, Brisbane punk and 'the Dunedin Sound.' We will also learn about the development of contemporary musical traditions such as DJ culture and formulaic pop.

### MCGY2620

#### Russian Music History Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Scott Davie **Session:** Semester 1 **Classes:** 2 hours per week **Prerequisites:** 6 credit points in Foundation units in the History and Analysis of Music. **Assessment:** Tutorial presentation - focus on selected compositions (500 word equivalent); Minor assessment - critical commentary on selected reading handouts (1500 words); Major assessment - essay (3500 words); Attendance and participation in discussions (500 word equivalent) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies (Hons), B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The following topics are covered over twelve classes: Introduction to important commentators, social/political history, library resources, transliteration and the Cyrillic alphabet; Early Russian composers - Bortnyansky, Verstovsky, Alyabyev, Dargomyzhsky and Glinka; The beginnings of Russian musical education - Anton Rubinstein and the establishment of the Russian Musical Society; Moguchaya kuchka - Balakirev, Cui, Borodin. The influences of Stasov and Serov; Moguchaya kuchka continues. Musorgsky and Rimsky-Korsakov; The Moscow school - Nikolai Rubinstein, Tchaikovsky, Arensky and Taneev; The later Moscow school - Rachmaninoff and Scriabin; The later St Petersburg school and the Belyayev Circle - early works of Stravinsky and Prokofiev; The Soviet Revolution - composers who choose exile: Stravinsky, Rachmaninoff, Medtner, Prokofiev, Glazunov; Russian arts under Commissar Lunarcharsky - the debate between the avant-garde and the collectivist composers (ACM & RAPM); The Soviet Big-Five - Prokofiev, Myaskovsky, Kabalevsky, Khachaturian and Shostakovich; Lady Macbeth and the consequences of 1936; The War Symphonies; From Repression towards Liberalisation - Zhdanov, the purge of 1948, and the death of Stalin; Khrushchev and the abolition of the Cult of Personality; a new avant-garde.

#### Textbooks

A reading list of around 30 titles (all held by the library) is distributed in the first class as a guide to resources that may be required in writing the essay. There are weekly reading handouts ranging from 800-3000 words.

### MCGY2631

#### Historical Performance Practice Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Alan Maddox **Session:** Semester 1 **Classes:** 2 x 2hr workshops **Assumed knowledge:** It is recommended that participants will have completed MCGY2611 Music from the Middle Ages to the Baroque. **Assessment:** Research projects including a group performance (40%); Written report (30%); participation & progress (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study cannot be taken by students who have completed ORGN1002 Early Music Seminar 1 or ORGN1003 Early Music Seminar 2 except with permission of the coordinator.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

Lectures, workshop activities, and group projects develop understanding and skills in historically informed interpretation and performance of music. Selected performance practice problems in a range of musical repertoire from the medieval to baroque periods will be studied, with content emphasizing the performance issues of baroque music. This unit of study will be of interest to students who specialise in early music, who perform early music on modern instruments, or who simply want to extend their general musical knowledge and experience, irrespective of their principal study.

### MCGY3001

#### Advanced Aural 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** One 2hr seminar/wk for 6 weeks **Prerequisites:** MCGY2005 Aural Perception 4 **Assessment:** Homework assignments (15%) and topic-based tests (85%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, UG Study Abroad Program.

This unit will build on techniques studied in Aural Perception 1-4. Topics will include complex rhythms, counterpoint, advanced atonal work and specific periods or composers. Students will attend six classes taught within MCGY3600 Advanced Aural.

### MCGY3008

#### Contemporary Studies 2 Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** One 2hr seminar/wk for 6 wks **Prerequisites:** MCGY2009 Music History 6 or MCGY2614 Musical Worlds of Today or MCGY2613 Music in Modern Times **Assessment:** Written assignment (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

Contemporary Studies 2 is presented as a subset of the MCGY 3640 Contemporary Studies. Students will be required to nominate 6 areas of study from the following topics: Nature as a metaphor for music, Music as noise, Microtonality, Process music, The perception of time, The open form, Music as language, Pastiche and allusion, Art music and its others, Music and the body, and Multimedia arts practice.

### MCGY3019

#### Musicology 5 (Major) Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 1hr individual lesson/wk or small group tuition. **Prerequisites:** MCGY2015 Musicology 4 (Major) **Corequisites:** MCGY2018 Musicology Workshop 3 **Assessment:** Assignments/presentation to equivalent of 2000w (20%); Major paper of about 4000 (70%), research process throughout the semester (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Musicology), B Mus Studies, UG Study Abroad Program.

Musicology 5 and 6 (Major and Honours) lead to a greater degree of autonomy and specialisation. Each student prepares one major paper each semester, and is expected to participate to an increasing extent in the selection and definition of research topics. Attention is given to the criteria which lead to the definition of fruitful research areas, and to the discipline required to conduct independent study within

prescribed time limits. Assessment is based primarily on the major paper in its final submitted form. In addition the assessing tutor will normally take into account the research process and initiative demonstrated by the students throughout the semester. Honours students will normally be encouraged to acquire a reading knowledge of a major European language if they do not already have such knowledge.

Students taking the major as part of the BMusStudies may apply to undertake a single substantial paper in the third year instead of the usual structure of a different paper for each of Musicology 5 and 6.

### MCgy3020

#### Musicology Workshop 5

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 2hr seminar/wk **Prerequisites:** MCGY2019 Musicology Workshop 4 **Corequisites:** MCGY4002 Musicology 7 (Major), or MCGY4003 Musicology 7 (Honours), or MCGY4607 Musicology 7 **Assessment:** Presentation of one or more papers on major study, journal, and participation (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Mus Ed), B Mus (Musicology), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, UG Study Abroad Program.

Musicology Workshop provides a forum for discussion of musicological work and is principally intended for undergraduates taking Musicology as the Principal Study. Students taking the Musicology Minor are not required to attend but are very welcome to participate as time allows, as are musicology postgraduate students. Musicology Workshop gives students the opportunity to present their work in a seminar format and to discuss issues and methodology with the whole group, gaining practice in presentation and feedback. Occasional class projects are held in which the whole group focuses on a project such as the discussion of a recent conference or performances, musicological issues or activities, or recent literature. Workshop classes may occasionally be held at other locations for attendance of special lectures or viewing of specialist collections. Students will be expected occasionally to attend other musicological activities at the Conservatorium held at different times such as Musicology Research Workshop.

### MCGY3033

#### Debussy 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** 2 hr seminar/wk for 6 weeks **Prerequisites:** MCGY3006 Debussy 1 **Prohibitions:** MCGY3633 Debussy. **Assumed knowledge:** It is recommended that students have taken Aural Perception 3 and Harmony 3. **Assessment:** Listening test (30%), seminar contribution (20%) and one 2000 word essay (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

The course covers the musical scene in Paris, the literature and painting with which Debussy was fascinated, his aesthetic, his musical language, and questions of performance practice. Works to be studied include the Images for orchestra, Jeux and representative examples of the piano works, songs and chamber music. Students will attend 6 two-hour seminars. Taught with MCGY3633 Debussy.

### MCGY3034

#### Writing Skills for Music Professions

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 2 **Classes:** 1 hr seminar/wk **Assessment:** Portfolio of short written assignments (60%), weekly assignments and seminar attendance (10%), concert reviews (30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Mus Studies, B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit is intended to provide students with opportunities to develop writing and research skills essential for the preparation of properly researched and well-written program notes for recitals and concerts, 'liner' notes suitable for professional music recordings and short articles appropriate for publication as concert or recording reviews. It is especially designed for students who wish to be considered for the Principal Study (Honours) strand of the BMus(Performance) program, but students will also be introduced to broader issues, including music criticism, music and information technologies, music publishing and music copyright. For further information contact Dr J. Shaw (Musicology).

### MCGY3037

#### Romanticism and the Fantastic 2

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** One 2hr seminar/wk for 6 weeks **Assessment:** One article summary (30%); one assignment (60%); class participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus Studies, Dip Mus, UG Study Abroad Program.

This course principally explores musical Romanticism in the latter half of the 19th and early 20th centuries. The further expansion of literary, harmonic and virtuosic influences will be examined in the works of composers including Brahms, Wolf, Tchaikovsky, Mahler and Schoenberg. The course will conclude with a detailed study of dramatic works by composers from Weber to Strauss in response to a variety of texts. Students will attend six classes taught within MCGY3629 Romanticism & The Fantastic.

### MCGY3045

#### Musicology 5 (Minor)

#### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One half-hr tuition or one 1hr small class tut/wk **Prerequisites:** MCGY2024 Musicology 4 (Minor) **Assessment:** 3000w paper (100%), or equivalent short essay and assignment(s) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus Studies, UG Study Abroad Program.

Topics for study are chosen according to student interest with the guidance of the tutor but may be limited by the availability of suitable supervision. It is recommended that for a student taking more than two semesters of Musicology Minor, historical topics be chosen from different periods of music history in such a way that no more than two semester topics are from the same period. Furthermore, a student hoping to transfer to Musicology Major or planning to undertake the Minor for two or more years is advised to undertake topics in their first three semesters similar to those being covered in the first year of the Major.

### MCGY3046

**Associated degrees:** B Mus (Musicology).

Musicology 5 (Hons) and 6 (Hons) build on the methodological foundations of the earlier semesters to develop the student's capacity for advanced study, and independent and original research. A broader view of the discipline and its fields will be developed, and in Musicology 5 (Hons) topics in ethnomusicology are a likely class focus.

### MCGY3622

#### Musicology 6 (Honours)

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** 1:1 tuition; attendance at Musicology 6 class as agreed **Prerequisites:** MCGY3620 Musicology 5 (Hons) **Corequisites:** MCGY2019 Musicology Workshop 4 **Assessment:** Assignments/presentation to equivalent of 2000w (20%); Major paper of about 4000w (70%); research process throughout the semester (10%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Musicology).

Musicology 5 (Hons) and 6 (Hons) build on the methodological foundations of the earlier semesters to develop the student's capacity for advanced study, and independent and original research. A broader view of the discipline and its fields will be developed, and in Musicology 5 (Hons) topics in ethnomusicology are a likely class focus.

### MCGY3629

#### Romanticism and The Fantastic

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** 2 hour seminar **Assessment:** Three article summaries (10% each), 30 minute seminar presentation (30%), final research assignment (30%), class participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit cannot be taken by students who have completed MCGY3029 Romanticism and the Fantastic 1 and MCGY3037 Romanticism and the Fantastic 2 except with permission of coordinator.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This course explores Romanticism in music through an examination of the literature, art and architecture that inspired it. The responses of composers including Schubert, Schumann, Berlioz, Wolf, Mahler, Strauss and Schoenberg to writers such as Shakespeare, Goethe, Byron and Hoffmann will be studied along with the instrumental writing of Beethoven, Paganini, Chopin and Liszt.

### MCGY3633

#### Debussy

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1 **Classes:** 2 hr seminar **Assumed knowledge:** It is recommended that students have some background in late-nineteenth- and early twentieth-century western art music harmony and/or history **Assessment:** Prepared listening test 1 hr (20%); 2 spoken presentations (20%); Weekly journal (20%); progress report and 3000 word essay (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: This unit cannot be taken by students who have completed MCGY3006 Debussy 1 or MCGY3033 Debussy 2 except with permission of coordinator.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

The unit of study covers the musical scene in Paris and the fin-de-siecle music, literature and visual arts that influenced Claude Debussy's compositions and critical writings. Debussy's aesthetic, his musical language and questions of performance practice will be considered. Works to be studied include the Images for orchestra, Jeux, Prelude a l'apres-midi d'un faune, Pelleas et Melisande, La mer and representative examples from his piano works, songs and chamber music.

### MCGY3639

#### Mahler, Schoenberg and the Modern Age

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 2 **Classes:** 2 hr seminar per week x 12 weeks **Prerequisites:** It is recommended that students have some background in/knowledge of late 19th Century harmonic practice **Assumed knowledge:** It is strongly recommended that students have taken Aural Perception 3 (completion of Aural Perception 4 is desirable) and 12 cpts in Foundation units in Studies in the History and Analysis of Music, or that they have a broad understanding of late 19th C and early-mid 20thC Western Art music styles, genres and harmonic language. **Assessment:** one 3000 word written assignment (50%), one listening test (20%), weekly reading and listening journal and seminar participation (10%) and an oral presentation in class of an analysed or researched work (20%). The written assignment may take the form of an essay, an analysis or rehearsal/research notes. The oral presentation can be a 10-15 minute spoken presentation or a performance. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

This unit of study concentrates on discussion and analysis of Gustav Mahler's and Arnold Schoenberg's musical compositions in the context of their involvement in artistic, literary and musical circles in Vienna, Berlin and the United States. Works to be studied include selections from Mahler's ten symphonies, many songs and Das Lied von der Erde and Schoenberg's strong quartets, chamber symphonies, tonal and atonal songs, dramatic works, The Book of the Hanging Gardens, Pierrot Lunaire and the Gurrelieder.

### MCGY3640

#### Contemporary Studies

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Lewis Cornwell **Session:** Semester 1, Semester 2 **Classes:** 2 hour seminar **Prerequisites:** MCGY2613 Music in Modern Times or MCGY2009 Music History 6: Post 1950 **Assessment:** Essay, 3000 words (60%); Journal and participation, including online discussion and concert review (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

*Note: This unit cannot be taken by students who have completed MCGY3007 Contemporary Studies 1 or MCGY3008 Contemporary Studies 2 except with permission of coordinator.*

**Associated degrees:** B Mus (Comp), B Mus (Mus Ed), B Mus (Musicology), B Mus (Perf), B Mus Studies, B Mus Studies, B A, B Mus Studies, M B, B S, B Mus Studies, M B, B S, Dip Mus, UG Study Abroad Program.

Contemporary Studies is about the music of today. Contemporary Studies challenges perceptions of the nature of music through the analysis and discussion of recent music. Contemporary Studies familiarises students with a range of aesthetic premises apparent in recent music and develops the students' critical and analytical skills with regards the philosophical ramifications of such premises. This unit of study also seeks to enable students to draw connections between the issues of today's music with that of the past and to that of other contemporary forms of cultural expression. Topic areas covered in this unit of study include: Nature as a metaphor for music, Music as noise, Microtonality, Process music, The perception of time, The open form, Music as language, Pastiche and allusion, Art music and its others, Music and the body, and Multimedia arts practice.

Each topic area will be illustrated by relevant musical examples and literature. Contemporary Studies will enable students to make critical and informed judgements concerning their future contribution to the world of new music be it in performance, composition, musicology or education.

### MCGY4002

#### Musicology 7 (Major)

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 1hr individual lesson/wk or small group tuition. **Prerequisites:** MCGY3021 Musicology 6 (Major) **Corequisites:** MCGY3023 Musicology Workshop 5 **Assessment:** Research proposal and literature review by mid semester (50%); research progress and writing by end of semester (50%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Musicology).

Musicology Major 7 and 8 form the culmination of the Major in Musicology. Drawing on experience gained in previous years and continuing to develop skills, the student will work on a single project throughout the two semesters. The project topic will be proposed by the student and approved by the Musicology Unit. The outcome will be a research paper of 10,000-12,000 words. Work will be undertaken with the guidance of a supervisor designated by the Musicology Unit. The student will also be enrolled concurrently in Musicology Workshop 5 and 6 in which reports or papers drawing from the research will be presented.

### MCGY4003

#### Musicology 7 (Honours)

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 1hr individual lesson/wk **Prerequisites:** MCGY3022 Musicology 6 (Honours) **Corequisites:** MCGY3023 Musicology Workshop 5 **Assessment:** Work-in-progress including a formal research proposal in preparation for the thesis to be presented at the end of Musicology 8 (Honours) (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

Musicology Honours 7 and 8 represent the culmination of the Honours stream of the Bachelor of Music (Musicology). During these two semesters the student will write a thesis demonstrating the skills and intellectual autonomy developed during this and the preceding years. The thesis topic will be proposed by the student and approved by the Musicology Unit. Work will be undertaken with the guidance of a supervisor designated by the Musicology Unit. The student will also be enrolled in Musicology Workshop 5 and 6 in which reports or papers drawing from the thesis research will normally be presented twice each semester.

### MCGY4004

#### Musicology 8 (Major)

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 1hr individual lesson/wk or small group tuition. **Prerequisites:** MCGY4002 Musicology 7 (Major) **Corequisites:**

MCGY3024 Musicology Workshop 6 **Assessment:** 10,000w research paper (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed), B Mus (Musicology).

Musicology Major 7 and 8 form the culmination of the Major in Musicology. Drawing on experience gained in previous years and continuing to develop skills, the student will work on a single project throughout the two semesters. The project topic will be proposed by the student and approved by the Musicology Unit. The outcome will be a research paper of 10,000-12,000 words. Work will be undertaken with the guidance of a supervisor designated by the Musicology Unit. The student will also be enrolled concurrently in Musicology Workshop 5 and 6 in which reports or papers drawing from the research will be presented.

### MCGY4005

#### Musicology 8 (Honours)

##### Sydney Conservatorium of Music

**Credit points:** 6 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One 1hr individual lesson/wk **Prerequisites:** MCGY4003 Musicology 7 (Honours) **Corequisites:** MCGY3024 Musicology Workshop 6 **Assessment:** 14,000-16,000w thesis of a standard suitable for submission to a refereed musicological journal (70%); public presentation based on this paper in a situation replicating the presentation of a conference paper (30%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

Musicology Honours 7 and 8 represent the culmination of the Honours stream of the Bachelor of Music (Musicology). During these two semesters the student will write a thesis demonstrating the skills and intellectual autonomy developed during this and the preceding years. The thesis topic will be proposed by the student and approved by the Musicology Unit. Work will be undertaken with the guidance of a supervisor designated by the Musicology Unit. The student will also be enrolled in Musicology Workshop 5 and 6 in which reports or papers drawing from the thesis research will normally be presented twice each semester.

### MCGY4047

#### Musicology 7 (Minor)

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One half-hr tuition or one 1hr small class tut/wk **Prerequisites:** MCGY3046 Musicology 6 (Minor) at Distinction level **Assessment:** Literature survey and written work-in-progress towards the major paper to be completed in semester 8 (100%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed).

Topics for study are chosen according to student interest with the guidance of the tutor but may be limited by the availability of suitable supervision. It is recommended that for a student taking more than two semesters of Musicology Minor, historical topics be chosen from different periods of music history in such a way that no more than two semester topics are from the same period. Furthermore, a student hoping to transfer to Musicology Major or planning to undertake the Minor for two or more years is advised to undertake topics in their first three semesters similar to those being covered in the first year of the Major.

### MCGY4048

#### Musicology 8 (Minor)

##### Sydney Conservatorium of Music

**Credit points:** 3 **Teacher/Coordinator:** Dr Kathleen Nelson **Session:** Semester 1, Semester 2 **Classes:** One half-hr tuition or one 1hr small class tut/wk **Prerequisites:** MCGY4047 Musicology 7 (Minor) at Credit level **Assessment:** One major paper of approx. 6000 words (100%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Mus (Mus Ed).

Topics for study are chosen according to student interest with the guidance of the tutor but may be limited by the availability of suitable supervision. It is recommended that for a student taking more than

two semesters of Musicology Minor, historical topics be chosen from different periods of music history in such a way that no more than two semester topics are from the same period. ### MDST2610

#### Medieval Cosmology

##### Arts

**Credit points:** 6 **Session:** Semester 1 **Classes:** One 2 hour seminar per week **Prerequisites:** At least 18 junior credit points from Part A of the Table of units of study, of which 12 credit points are from one subject. **Assessment:** One 2000 word essay and one 4000 word essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study may be counted towards a Major in History.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Arts, UG Study Abroad Program.

This unit examines the conception and various representations of the cosmos in Western Europe from the early Middle Ages (c.500) to the scientific revolution (c.1700). Cosmology is here taken in its broadest sense, including both the celestial and terrestrial worlds and their

interrelationships. Sources to be discussed include cosmological, astronomical, geographical, astrological and magical Latin texts (in English translation) as well as iconographical material (celestial and terrestrial maps, illuminated manuscripts, paintings, engravings, frescoes, etc.).

### MDST2613

#### Sex and Sin in the Middle Ages

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr J Ruys **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** At least 18 Junior credit points from Part A of the Table of units of study, of which 12 credit points are from one subject **Assessment:** one 2,500-word essay, one 10-minute tutorial presentation, one 1,000-word tutorial paper, class participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: this unit of study may be counted towards majors in History, French Studies, English, and European Studies*

**Associated degrees:** B A, B A (Adv)(Hons), Dip Arts, UG Study Abroad Program.

Medieval writers produced texts concerned with the definition, experience, regulation, and even celebration of sex, the body, and gender. This unit introduces students to the ways that concepts of sexual intercourse, sexual identity, gender, and the body were depicted and regulated in medieval texts from the tenth to fifteenth centuries. Students will read in English translation Anglo-Saxon, Old Norse, Old French, Middle High German, and medieval Latin texts that illustrate the complexity of views of sex in the medieval world.

### MDST4011

#### Medieval Studies Honours A

##### Arts

**Credit points:** 12 **Teacher/Coordinator:** A/Prof J Pryor **Session:** Semester 1, Semester 2 **Prerequisites:** Units of study to the value of at least 48 Senior credit points from Medieval Studies units of study or from cross-listed units of study (including at least two MDST units of study to the value of 12 credit points), all with a credit average **Assessment:** A thesis of around 20,000 words plus three 1-semester seminar units of study or equivalent. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), Dip Arts(Hons).

Medieval Studies IV Honours is a 2-semester programme consisting of: A thesis of 15,000 - 20,000 words, written under the supervision of a member of staff nominated by the Co-ordinator and three 1-semester seminar units of study or equivalent. **Note:** It is important that prospective IV-Honours students consult the Co-ordinator to ensure that their choice of Senior-level units of study is appropriate to their intentions for IVth Year. Normally, although this may be varied in individual cases, the coursework is worth 60% of the total mark and the thesis is worth 40%.

## MECH1400

### Mechanical Construction

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (1hr lec & 3hr workshop) per week. **Assessment:** Final report, workshop skills/attendance; machine operation.  
**Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

This unit aims to develop an understanding of: selected historical events; research methods; analysis techniques; application of theory and analysis to real machinery; use of machine and hand tools

At the end of this unit students will have: improved research techniques; improved analysis methods; an ability to connect history to mechanical engineering; an appreciation that they can engineer and build something that works; the opportunity to do real engineering.

This is a project based subject where students will: build their own designs; research historical developments in the area of the project selected; research into the necessary fields to fully understand and analyse the project; review and improve workshop skills; design their own version of the project; build the project in the workshop; test the completed machine.

## MECH1560

### Introduction to Mechanical Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (1hr lec, 2hrs tut, 3hrs workshop) per week **Prohibitions:** AERO1560, MTRX1701 **Assessment:** Assignments, practical work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E.

This unit aims to develop: an understanding of: the role of Mechanical or Biomedical engineers; the content of the degree structure and how the subjects are applied; a range of machining and manufacturing processes required to make mechanical components.

At the end of this unit students will be able to: work in a group; communicate effectively; recognise the engineering content of common machinery and systems; analyse simple engineering problems; demonstrate skills in machining and manufacturing methods through practical experience.

## MECH2400

### Mechanical Design 1

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (1hr Lec & two 2hr drawing office sessions) per week **Assumed knowledge:** ENGG1802, AMME2301 **Assessment:** Assignments and quizzes. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, B Sc, UG Study Abroad Program.

This unit aims for students to experience a realistic design process and to develop good engineering skills. Students will also develop an understanding of: the need for and use of standard drawings in the communication and definition of parts and assemblies; creativity: the design process from initial idea to finished product; methods used to analyse designs; standard components.

At the end of this unit students will have developed skills in: working in teams; freehand sketching and drafting practices; idea generation methods; design analysis techniques and layout; design development and testing; written and graphical communication.

## MECH2901

### Anatomy and Physiology for Engineers

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 3hrs plus tut & lab sessions) per week. **Assumed knowledge:** A basic understanding of biology. Recommended: BIOL1003 (or equivalent) **Assessment:** Student presentation, lab reports, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims for students to gain familiarity with anatomical and physiological terms and understanding their meaning. Students should gain an understanding of the gross anatomy of the major systems in the human body and their importance in the design of biomedical devices. Students should gain an understanding of the major physiological principles which govern the operation of the human body.

At the end of this unit students will be able to: identify the gross anatomical features of the human body; describe the normal function of the major body systems (nervous, circulatory, respiratory, musculoskeletal, digestive and renal); determine how these functions relate to cellular function; determine how a biomedical engineering device affects the normal anatomy and function of the body.

Course content will include: Bone tissue; Skeletal system; Joints; Muscle Tissue; Bones & joints anatomy (prac); Muscle Mechanics; Nerve Tissue; Muscles & nerves prac; CVS Heart; Blood vessels; Respiratory System 1; Respiratory System 2; Homeostasis; CVS and Respiratory anatomy (prac); Physiology; Respiratory Physiology; Cardio-respiratory physiology (prac); Renal Anatomy; Renal Physiology; Abdominal Renal Digestive Anatomy; Digestive Physiology; Oral Presentation.

Anatomy & Physiology by RR Seeley, TD Stephens and P Tate. 7th Edition McGraw Hill Higher Education

## MECH3260

### Thermal Engineering

#### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Lects 3hrs & one 2hr tut per week. **Prerequisites:** AMME2200 or MECH2200 or MECH2201 **Assumed knowledge:** Fundamentals of thermodynamics are needed to begin this more advanced course. **Assessment:** Lab reports, quizzes, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to develop an understanding of: the principles of thermodynamic cycles, gas mixtures, combustion and thermochemistry applied to engineering processes, power and refrigeration systems; heat transfer equipment design. To classify heat transfer situations as conduction, convection, radiation, forced or natural convection. To determine the appropriate approach to problems, the type of solution needed, analytical or numerical. To be able to arrive at a solution and predict heat transfer rates and be able to design and size heat transfer equipment.

At the end of this unit students will be able to: apply the principles of thermodynamics and heat transfer to real engineering situations; have the Ability to tackle and solve a range of complex thermodynamics cycles, air conditioning, combustion, chemical equilibrium, problems involving gas mixtures; have the ability to tackle and solve a range of heat transfer problems including finned heat exchangers, cooling by fluids, quenching, insulation and solar radiation.

Course content will include: Thermodynamics: Exergy and entropy, Power: spark ignition, Power: diesel, Power: gas turbine, Power: stirling, Power: steam, Gas mixtures, Clausius-Clapeyron, Humidity, psychrometry, Air-conditioning, Combustion: stoichiometry, gas analysis, Combustion, thermochemistry, adiabatic flame, temperature Combustion, 2nd Law of Thermo., equilibrium, exergy, Heat Transfer: Conduction, thermal circuits, General conduction equation, cylindrical fins, Heat Exchangers, Numerical solutions, Unsteady conduction, Convection, analytical, Forced convection correlations, Natural

convection, boiling, Radiation spectrum, blackbody, Radiation properties and laws, Radiation environmental, solar.

Fundamentals of Thermal-Fluid Sciences, Second Edition, by Cengael and Turner, published by McGraw-Hill

### MECH3261

#### Fluid Mechanics

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Two 1hr lec & two 1hr tut per week. Prac work one 3hr lab session **Prerequisites:** (AMME2200 or AERO2201 or MECH2202) and (MATH2061 or MATH2067 or (MATH2001 and MATH2005)) **Assessment:** Assignments, quizz, report, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to provide students with a detailed understanding of the theory and practice of fluid mechanics in the context of mechanical engineering.

At the end of this unit students will have the ability to critically assess and solve problems commonly found in fluid mechanics practice, such as sizing pumps and piping systems, designing channels, and determining the lift and drag characteristics of submerged bodies. Additionally, they will develop a structured and systematic approach to problem solving.

Course content will include:

Navier-Stokes equations: derivation, significance and fundamental importance.

Pipe flow: Bernoulli, shear losses, minor losses, networks.

Pumps: pump types, characteristics, applications.

Flow around a submersed bodies: lift and drag

Boundary layers: derivation of equations, laminar and turbulent, transition, momentum integral method, law of the wall, velocity profiles.

Turbulence: concept, properties of turbulent flow, eddy viscosity models, more advanced approaches.

Channel flow: flow in a channel, weir, hydraulic jump

Gas dynamics: steady one-dimensional flow including friction and heat transfer, sound waves, normal shock, nozzle flow, shock tube.

### MECH3361

#### Mechanics of Solids 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lec 3hrs & Tut 2hrs per week and 6hrs lab work per semester **Prerequisites:** AMME2301 or AERO2300 or MECH2300; MATH2061 or MATH2067 or MATH2005 **Assessment:** Assignments, group lab report, quizzes, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit of study aims to: teach the fundamentals of analyzing stress and deformation in a solid under complex loading associated with the elemental structures/components in aerospace, mechanical and biomedical engineering; develop the following attributes: understand the fundamental principles of solid mechanics and basic methods for stress and deformation analysis of a solid structure/element in the above mentioned engineering areas; gain the ability to analyze problems in terms of strength and deformation in relation to the design, manufacturing and maintenance of machines, structures, devices and elements in the above mentioned engineering areas.

At the end of this unit students will have a good understanding of the following: applicability of the theories and why so; how and why to do stress analysis; why we need equations of motion/equilibrium; how and why to do strain analysis; why we need compatibility equations; why Hooke's law, why plasticity and how to do elastic and plastic analysis; how and why to do mechanics modeling; how to describe boundary conditions for complex engineering problems; why and how to solve a mechanics model based on a practical problem; why and how to use energy methods for stress and deformation analysis; why and how to introduce plates and shells and how to do analysis for

plate and shell structures; why and how to do stress concentration analysis and its relation to fracture and service life of a component/structure; how and why to do fundamental plastic deformation analysis; how and why the finite element method is introduced and used for stress and deformation analysis. The ultimate outcome is that the students have the ability to solve engineering problems by comprehensively using the skills attained above.

### MECH3362

#### Materials 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Three 1hr lec & two 1hr tut per week **Prerequisites:** (AMME2302 or MECH2300) and (AMME2301 or AERO2300) **Assessment:** Assignments, quizzes and examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims for students to understand the relationship between properties of materials and their microstructures and to improve mechanical design based on knowledge of mechanics and properties of materials.

At the end of this unit students should have the capability to select proper materials for simple engineering design.

Course content will include: short-term and long-term mechanical properties; introductory fracture and fatigue mechanics, dislocations; polymers and polymer composite materials; ceramics and glasses; structure-property relationships; selection of materials in mechanical design.

### MECH3460

#### Mechanical Design 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** Lec 2hrs & Tut 2hrs per week **Prerequisites:** MECH2400 **Assumed knowledge:** (ENGG1802 or PHYS1001 or PHYS1901) and AMME2301 and AMME2500 **Assessment:** Assignments and quiz. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, B S T, UG Study Abroad Program.

This unit aims to apply some newly acquired skills to begin to understand how stress and strain are distributed in the more common categories of machine parts. Reducing the loads in standard parts to just the most significant, leads to a range of relatively simple analyses. By using different degrees of simplification and a proportional amount of effort, the examination of components can provide results of corresponding accuracy. To lead the student to utilize and be aware of modern computer methods, to be aware of past methods and be prepared of future developments. Not all the analysis of mechanical components are covered in the course but the ones that are deal with exemplify principles that can be applied to novel items that our graduates may encounter in their professional life.

At the end of this unit students will be able to: calculate the weld thickness at a welded joint that is required to carry any combination of loads and apply fatigue life prediction in general to any component; design a bolted joint to carry tensile and or shear loads: use a numerical solver to arrive at the optimal dimensions of a component, given its loads and sufficient boundary conditions; design shafts to carry specified steady and alternating bending moments and torques; design and construct a space frame, such as that for a dune buggy, to meet requirements of strength and rigidity; be able to arrive at the

principle parameters of a pair of matched spur gears, and to be able to extend this to helical gears.

Course content will include: stress and strain in engineering materials; yield and ultimate fail conditions in malleable and brittle materials; spatial, 3D frameworks; deflections due to forces, moments and torques.

R.L. Norton, Machine Design, An Integrated Approach, 2nd Ed. (Prentice Hall)

### MECH3660

#### Manufacturing Engineering

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** Lec 2hrs & Tut 2hrs per week  
**Prerequisites:** (MECH1560 or MTRX1701 or MECH1751 or ENGG1800 or ENGG1804) and (ENGG1802 or PHYS1001 or PHYS1901) **Assumed knowledge:** AMME2200, AMME2301, AMME2302, (MATH2061 or MATH2067) **Assessment:** Assignments, group lab report, quizzes, industrial visit. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

The unit aims to teach the fundamentals of manufacturing processes and systems in mechanical, mechatronic and biomedical engineering, including traditional and advanced manufacturing technologies. This unit aims to develop the following attributes: to understand the fundamental principles of manufacturing technologies for the above mentioned engineering areas; to gain the ability to select existing manufacturing processes and systems for direct engineering applications; to develop ability to create innovative new manufacturing technologies for advanced industrial applications; to develop ability to invent new manufacturing systems

At the end of this unit students will have a good understanding of the following: merits and advantages of individual manufacturing processes and systems; principles of developing new technologies; comprehensive applications and strategic selection of manufacturing processes and systems.

Course content will include:

Manufacturing Processes: Common processes and their science (machining, casting, powder metallurgy, metal working, welding, polymer processing and composite manufacture); merits and limitations; NC and CAM; Introduction to advanced processes (sensor and actuator, IC, intelligent robots and biomedical and nano-technological device).

Manufacturing Systems: Economics in manufacturing; flexible manufacturing; just-in-time manufacturing; group technology; materials selection and requirements planning; quality control; introduction to new technology; introduction to e-manufacturing; human factors; plant layout.

### MECH3661

#### Engineering Management

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** One 2hr lec and one 2hr tut per week. **Assumed knowledge:** ENGG1803 **Assessment:** Assignment, group work, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to: develop an understanding of the principles and practices of industrial and engineering management; provide an understanding of the theoretical and practical issues facing an industrial organisation and the fundamental approaches to their management; understand the ethical, social, economic and environmental contexts of professional engineering within an industrial organization. The attributes that will be developed in this unit of study are consistent with the development of scholarship, global citizenship and lifelong learning.

At the end of this unit students will be able to: understand the fundamental approaches to industrial management; apply a range of these approaches in class experiences and assessment tasks; practice and appreciate the effective management of workgroups; understand the importance of effective design and management of human systems in managing organisational and professional issues; develop an ethical

approach to dealing with professional issues of an economic, social or environmental nature; enhance competence and confidence in oral and written communication.

The concepts covered in this unit are from the following management areas:

Engineers and Management - including ethics, Communication and People in Organisations, Economics, Leadership, Strategic Management, Managerial Decision Analysis, Marketing, Business Planning, Legal Environment of Business, Industrial Hazard Management, Human Resource Management, Project Management, Quality Assurance and Management, Operations Management, and Financial Management.

This broad range of topics is covered so as to familiarise students with the fundamental areas of managerial practice that they can be expected to become professionally proficient in.

### MECH3921

#### Biomedical Design and Technology

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (4hrs lec, tut and site visits) per week **Assumed knowledge:** BIOL1003; MECH2901 or MECH2900; MECH2400 **Assessment:** Assignment, quizzes, design project. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to give students an understanding of the Australian and International biomedical industry and in the development, manufacture and uses of biomedical engineering products in therapeutic, rehabilitation and clinical settings. Students will gain an understanding of the process of biomedical regulation in Australia and other major international markets as well as the entire process of creating a new biomedical engineering product, from design through to marketing and monitoring of the product. Students will design a biomedical device including the preparation of a detailed design brief.

This will be done as a team project. Each team will work on a specific biomedical design project following formal design protocols, including design control, regulatory considerations, and commercialisation/IP considerations.

Course content will include:

- Biomedical Design: A team design project on a medical device.
- Intellectual Property in the biomedical industry.
- Biomedical devices and technology.
- Regulatory and clinical considerations in the biomedical industry.
- Commercialisation strategies in the biomedical industry.
- The Australian biomedical industry - an overview. Includes site visits.
- The global biomedical industry - an overview.

### MECH4241

#### Energy and the Environment

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (2hrs lec, 3hrs tut)/week. **Prerequisites:** 24 credit points of third year units of study **Assessment:** Project report, quizz, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Fourth year elective unit of study.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to acquaint students with the methods engineers use to assess and deal with the environmental consequences of industry and other human activities, with particular emphasis on impact assessment and noise.

At the end of this unit students will be able to carry out economic and environmental impact analyses for energy systems.

Course content will include: economic analysis of energy systems; urban air pollution; ozone hole and greenhouse problems; waste disposal, water pollution; Montreal Protocol; Rio and Kyoto Accords;

Sustainable energy; renewable energy; energy efficiency; CO2 capture and sequestration; other emerging control technologies.

### MECH4255

#### Air Conditioning and Refrigeration Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hrs lec/tut per week  
**Prerequisites:** MECH3260 **Assessment:** Assignments, quizzes, project, examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to develop a practical understanding of air conditioning and refrigeration applications.

At the completion of this unit students will be able to determine thermal loads on structures and design an airconditioning or refrigeration system with attention to air distribution and energy consumption.

Course content will include: applied psychrometrics, air conditioning systems, design principles, comfort in the built environment, cooling load calculations, heating load calculations, introduction and use of computer-based load estimation packages software, air distribution, fans, ducts, air conditioning controls, refrigeration cycles, evaporators, condensers, cooling towers, compressors, pumps, throttling devices, piping, refrigerants, control, refrigeration equipment, stimulation of refrigeration systems, food refrigeration and industrial applications; use of CFD packages as tools to simulate flows in building and to optimise air conditioning design, energy estimation methods and software, energy management in buildings.

### MECH4265

#### Combustion Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** 3 hours lec/tut per week  
**Prerequisites:** MECH3260 **Assessment:** Assignments, quizzes, project, examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: 4th Year elective unit of study*

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims to give students a basic understanding of combustion and some of its applications such as internal combustion engines, gas turbines and fires.

At the completion of this unit students will be able to perform an analysis of simple reacting systems. The theory underlying laminar and turbulent combustion will be covered for both premixed and non-premixed cases. Students will be able to perform calculations of the structure of simple flames.

Course content will include an introduction to droplet combustion, detailed chemical kinetics including the formation of pollutant, the concept of mixture fraction and combustion in engines, furnaces and gas turbines. Fire ignition, growth and spread will also be covered with respect to safety in buildings including the hazards related to the formation of smoke and toxic products.

### MECH4310

#### Advanced Engineering Materials Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 2 **Classes:** (2hrs lec & 3hrs tut/lab) per week  
**Prerequisites:** MECH3300 or MECH3362 **Prohibitions:** MECH4315 Advanced Aerospace Materials. **Assessment:** Quiz, presentation, report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Fourth year elective unit of study.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims for students to understand: how to define the relationship between properties and microstructures of advanced engineering materials; how to improve mechanical design with the knowledge of mechanics and properties of materials; how to conduct failure diagnosis of engineering structures.

At the end of this unit students should be able to: define structure-property relationships of advanced engineering materials; improve the performance of engineering structures through tailoring materials microstructure and manufacturing processes; conduct failure diagnosis of simplified failure cases of engineering structures.

Course content will include: advanced ceramics, superalloys, shape memory alloys and polymers, advanced polymer matrix composites, piezoceramic materials, thin film science and technology, advanced joining methods, processing-structure-property relationship, damage tolerance, structure integrity and reliability, toughening mechanisms.

### MECH4460

#### Mechanical Design 3 Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** 2 hrs lec and 2 hrs tut per week  
**Prerequisites:** MECH2400 **Corequisites:** MECH3460 **Assumed knowledge:** ENGG1802, AMME2301, AMME2500, MECH3361 **Assessment:** Assignments, quizzes **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study teaches the student how to recognise where and how their theoretical skills can be applied to the practical situations that they may encounter in this field of design. Options may be provided in the choice of design assignments. Biomedical engineering and vehicle design problems may be provided as options to more general machine design problems.

The lectures and assignments will cover all or most of the following objectives: Calculate weld thickness for a nominated joint outline, subjected to combined loads; To apply modern fatigue life predictions in general to component parts; Design a bolted joint to carry shear loads; Use a numerical solver to arrive at optimal design dimensions and material properties, provided the invention part of the design is

completed and only the size and shape of the design has to be settled; Design a space frame to carry specified loads and meet dimensional and functional requirements. Make a model of such a frame so that it may be compared with competing frames; Consider the range and evolution of CAD systems to aid in the selection of systems for particular duties, for today and in the near future; Consider the properties strengths and weaknesses of hydrodynamic bearings to lead to proper selection and maintenance; Design or select a coupling that has the appropriate attributes with respect to power and misalignments; Calculate the parameters that define a matched pair of spur gears, leading to the selection of multiple gear pairs in gearboxes; Use a modern kinematic and dynamic package that is integral with our solid modeler CAD system to simulate articulated machinery and determine joint loads between the parts; Considerations of geometrical and practical constraints in the design of parts and assemblies.

### MECH4601

#### Professional Engineering 2

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (One 2hr lec and one 3hr tut) per week **Prerequisites:** MECH3660 **Assumed knowledge:** MECH3661, ENGG1803, AMME4100 **Assessment:** Assignment, presentation, attendance, participation **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit of study aims to create an awareness of the issues surrounding management of projects and in general management in engineering plants; impart knowledge resulting in a more global approach to the practice of engineering and engineering management; provide a vehicle for improving communication skills. The course also aims, when taken together with other courses offered by the School, to substantially meet the requirement of the Institution of Engineers, Australia, for undergraduate training in management theory. On completion of this unit students should be able to: plan small projects, and contribute effectively to planning of larger projects; understand what is required of you in your role in the conduct and management of an engineering project; perform well in that role from the outset, with your performance limited only by your experience; prepare an interesting presentation on aspects of your work for your peers or senior managers; recognise the range of expertise you may need to call on in your role as an engineer working on a project (e.g in the safety and environmental fields); understand what the experts are saying, and to be able to contribute effectively to that discussion, so making effective use of that expertise.

### MECH4622

#### Industrial Ergonomics

##### Engineering and Information Technologies

**Credit points:** 6 **Teacher/Coordinator:** Airdrie Long **Session:** Semester 1 **Classes:** 4 hours of Lectures and Tutorials **Assumed knowledge:** It is assumed that students have a sound understanding of engineering concepts within their chosen specific discipline. **Assessment:** Assessment is by assignment - 80% and exam - 20% **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B E, UG Study Abroad Program.

This is an elective course that is applicable to those engineers who will manage people and will design for people. The aim is for students to acquire an understanding of relationships between humans and the physical and psychological aspects of their occupations and develop basic competence in ergonomics principles and assessment. By the end of this UoS, students should have a basic understanding of ergonomics principles and be able to undertake a basic ergonomics assessment with a measure of confidence. Students should be able to identify real and potential ergonomics issues, source information and call in specialist expertise appropriately.

### MECH4720

#### Sensors and Signals

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (3hrs lec and 2hrs tut) per week **Prerequisites:** MTRX3700 or MECH3701 or MECH3700 **Assumed knowledge:** Strong Matlab skills **Assessment:** Assignment, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Fourth year elective unit of study.*

**Associated degrees:** B E, UG Study Abroad Program.

The unit aims to provide students with a good practical knowledge of a broad range of sensor technologies, operational principles and relevant signal processing techniques. MECH4720 is the last in a series of practical Mechatronic and Electrical courses taken over three years. It takes these practical engineering concepts, along with the associated mathematical, electronic and mechanical theory and applies this knowledge to a series of practical, albeit specialized applications that will be encountered by most Mechatronic Engineers at sometime during their careers.

This unit will start by looking at signal characteristics, modulation, filtering and convolution before examining some passive sensors. It goes on to provide an overview of the workings of typical active sensors with a strong emphasis on optical systems and image processing (Radar, Lidar and Sonar). It provides insight into basic sensing methods as well as aspects of interfacing and signal processing. It includes both background material and a number of case studies.

At the end of this unit students will have a good understanding of passive and active sensors, their outputs and applicable signal processing techniques; an appreciation of the basic sensors that are available to engineers and when they should be used.

### MECH4730

#### Computers in Real-Time Control and Inst

##### Engineering and Information Technologies

**Credit points:** 6 **Session:** Semester 1 **Classes:** (2hrs lec and 2hrs lab) per week **Prerequisites:** MTRX3700 or MECH3701 or MECH3700 **Prohibitions:** ELEC4602 Real Time Computing **Assessment:** Lab work, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Fourth year elective unit of study.*

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims for students to: learn the fundamental principles and requirements of real time software design: understand the basic components of an embedded systems; learn, appreciate and understand the various stages that need to be completed in a large software system implementation; learn the capabilities of a typical high performance real time operating system.

At the end of this unit students will have a basic knowledge of the hardware components available in a microcomputer system and a detailed knowledge of facilities and capabilities typically present in a professional real time operating system. The student will have the competence to design, implement and debug interrupt-driven / event driven multitasking systems. The outcomes of this subject are: to be able to design, plan and implement a large real time software system.; to understand the complexity of real time programming; to be able to select appropriate software/hardware platforms for a given control/monitoring task; to understand the problematic of real time software design; to be able to select appropriate software design tool for a real time task; to be able to debug a complete real time system; to be able to organize and distribute tasks in a large software project; to be able to monitor and control the progress towards a due day working in a group; to understand the main facilities offered by professional real time operating system: Processes, Threads, Timers, interrupts, interprocess communications; to be able to present / demonstrate a real time system in time; to be able to report results in a professional manner.

**MECH4902****Orthopaedic and Surgical Engineering  
Engineering and Information Technologies**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Andrew Ruys **Session:** Semester 2 **Classes:** 3 hours of Lectures per week **Prerequisites:** Mandatory: AMME2301, AMME2302, ENGG1802, BIOL1003, MECH2901, MECH3921 (or their equivalent). Recommended: MECH3362 (or equivalent). **Assumed knowledge:** Basic concepts in engineering mechanics-statics, dynamics, and solid mechanics; Basic concepts in materials science, specifically with regard to types of materials and the relation between properties and microstructure; and A basic understanding of human biology and anatomy. **Assessment:** 15% - Lecture attendance and overall participation 15% - A class presentation, 5-7 minutes, on a topic of choice 25% - An in-depth literature review on a topic of choice 45% - 2 hour final exam, essay style **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

To introduce the student to the details and practice of orthopaedic engineering. To give students an overview of the diverse knowledge necessary for the design and evaluation of implants used in orthopaedic surgery. To enable students to learn the language and concepts necessary for the interaction with orthopaedic surgeons and the orthopaedic implant industry. To introduce the student to the details and practice of other engineering applications in surgery, particularly in the cardiovascular realm.

By the end of this units of study, students will: Be acquainted with the physical properties of human bones and joints; Understand how the skeleton functions as an engineering structure. Learn the physical characteristics of the materials from which the musculoskeletal system is fabricated and be able to adapt basic engineering principles to the design and fabrication of prosthetic joints or to other devices used for replacement and repair of bones and joints; Learn the language of orthopaedics and obtain a glimpse into the world of the orthopaedic surgeon; and Have an understanding of the role played by engineering technology in surgery.

**MECH4961****Biomechanics and Biomaterials  
Engineering and Information Technologies**

**Credit points:** 6 **Session:** Semester 2 **Classes:** (Lec 2hrs, tut 1hr) per week **Prerequisites:** MECH2300 or AMME2302; MECH2900 or MECH2901 **Prohibitions:** MECH4960 **Assumed knowledge:** MECH3300 or MECH3362 **Assessment:** Group seminar, group report, participation, examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B E, UG Study Abroad Program.

This unit aims for students to: gain a basic understanding of the major areas of interest in both the biomaterials and biomechanics fields; learn to apply basic engineering principles to biomedical systems; to understand the challenges and difficulties of biomedical systems.

By the end of this unit students will be able to: apply static and dynamic mechanical analyses to the human body to describe motion; understand the mechanical behaviour of biological tissues and the types of models used to describe this behaviour; understand all the factors involved in the selection of a biomaterial for tissue replacement, including mechanical, biocompatibility, material property and fixation factors; improve their written and oral communication skills in a technical setting; demonstrate a basic understanding of the major areas of current research in both the biomaterials and biomechanics fields, learn to apply basic engineering principles to biomedical systems, and understand the challenges and difficulties of biomedical systems.

Course content will include: biocompatibility and the immune system; introduction to biomaterials; metallic implants; polymeric implants; ceramic implants; dental materials; introduction to biomechanics; tissue mechanics; modelling of motion; biofluid mechanics; injury biomechanics.

**MECO1001****Australian Media Studies  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 2 **Classes:** One 2 hour lecture and one 1 hour tutorial per week **Assessment:** One 1500 word essay (30%); One 1500 word essay (40%); one 2 hour exam

(30%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun, UG Study Abroad Program.

This unit offers an introduction to the history and theory of media and communications studies. Students will gain a foundation in key concepts, methodologies and theorists in the field. They will also explore the interdisciplinary roots of media and communications studies and acquire basic research skills. By the end of the unit students should be familiar with major shifts in the history and theory of media and communications studies and with basic concepts and methodologies in the field.

**Textbooks**

It is recommended that students purchase a reader from the Copy Centre.

**MECO1003****Principles of Media Writing  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr A Dunn **Session:** Semester 1 **Classes:** One 2 hour lecture and one 1 hour tutorial per week **Assessment:** One 400 word news story (20%); one 500 word colour news story (20%); one 700 word broadcast script (20%); one 2 hour exam (30%); attendance and participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun, UG Study Abroad Program.

This unit will give students foundational skills in writing for the print and broadcast media. Students will learn the elements of journalistic style, how to structure news and feature articles, how to script basic broadcast and online news, and be introduced to the principles of interviewing and journalistic research.

**Textbooks**

Course reader;

**MECO2601****Radio Broadcasting  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr A Dunn **Session:** Semester 1 **Classes:** One 1 hour lecture and one 2 hour workshop per week **Prerequisites:** 12 junior credit points of MECO units **Prohibitions:** MECO2001 **Assessment:** One radio news exercise (equivalent 100 words), one 2500-word critical reflection journal, one group radio production and documentation (equivalent 2000 words) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun.

This unit is designed to introduce students to the history, nature and contemporary status of radio. It specifically considers such concepts as news values and the role of the Internet in audio broadcasts. Students will also apply critical analytical approaches to radio and online broadcast texts. Practically, the unit offers an introduction to radio presentation and production, using professional quality digital audio recording and editing facilities.

It is recommended that students purchase a reader from the Copy Centre

**MECO2603****Media Relations  
Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr S Chaidaroon **Session:** Semester 2 **Classes:** One 1 hour lecture and one 2 hour tutorial per week **Prerequisites:** 12 junior credit points of MECO units and (ENGL1000 or ENGL1005 or

LNGS1005) **Prohibitions:** MECO2003 **Assessment:** 1. Media Relations Campaign (2500 words) (35%) 2. Press Conference Presentation (1000 words equiv.) (20%) 3. Final Exam (1000 words) (35%) 4. Tutorial Participation (10%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA(Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun, UG Study Abroad Program.

This unit of study will examine the relationships between stakeholders with an interest in public communication including the environmental groups, media, the corporate sector, government, not for profit industries and health and community relations. This unit provides an overview of media relations theory including issue framing, agenda setting, and co-relational development. It examines image, reputation and relationship building. Students learn to develop a media relations campaign strategy, budget and timeline, using tactical approaches for successful media relations. Students will learn to identify controlled and uncontrolled media, set research priorities and objectives and framing a client response.

### MECO3601

#### Video Production

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr S Maras **Session:** Semester 2 **Classes:** One 2 hour lecture and one 2 hour workshop per week **Prerequisites:** 12 junior credit points of MECO units and (ENGL1000 or ENGL1005 or LNGS1005) **Prohibitions:** MECO3001 **Assessment:** 90 second News Piece (equivalent 900 words); Six-minute video (equivalent 1600 words); Reflection/Analysis in take-home exam format (equivalent 2000 words). **Practical field work:** This unit will involve substantial group video production project work outside of class time. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun.

This is an introduction to the theory and practice of digital video production, with a strong practical component, emphasizing information-based programming (news, current affairs, corporate video, documentary and infotainment). Students will be expected to produce short video items individually and in groups, using professional standard desktop editing software.

#### Textbooks

There is a recommended Reader, available from the University Copy Centre. Supplementary text: Martha Mollison, Producing Videos: A Complete Guide. 2nd edition. AFTRS/Allen & Unwin: Sydney, 2003.

### MECO3602

#### Online Media

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms F Martin **Session:** Semester 2 **Classes:** One 1 hour lecture and one 2 hour seminar per week **Prerequisites:** 12 junior credit points of MECO units and (ENGL1000 or ENGL1005 or LNGS1005) **Prohibitions:** MECO3002 **Assessment:** Group produced web site (50%); one two hour exam (30%); one web site proposal (15%); participation (5%) **Practical field work:** This unit will involve substantial group web site production project work outside of class time. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA(Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun.

This unit will examine the role of the Internet, and the way new media is changing the media landscape. By the end of the unit, students will be familiar with key theoretical and cultural issues in online media, and will have a critical framework with which to engage in analysis of the Internet. Students will also gain practical skills in writing and producing for the web and will develop their own web sites in teams.

#### Textbooks

There is a reader of key articles, available from the University Copy Centre. There is also one textbook: Flew, Terry (2007), 'New Media: An Introduction'. 3rd Edition. Melbourne: Oxford University Press. ISBN 0195551494

### MECO3603

#### Media, Law and Ethics

##### Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr T Dwyer **Session:** Semester 1 **Classes:** One 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of MECO units and (ENGL1000 or ENGL1005 or LNGS1005) **Prohibitions:** MECO3003 **Assessment:** One 2000 word essay (40%), one 2 hour exam (40%) and one WebCT Posting (20%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA(Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun, UG Study Abroad Program.

MECO3603 will introduce students to the area of Media Law and Ethics through discussion of key legal, ethical, and cultural issues relevant to journalism and the professional fields of public communication. Students will be given an introductory survey of the main ethical theories in Western thought to establish a framework within which to examine specific ethical issues that relate to media. They will also be introduced to those aspects of the law that impinge on the work of media professionals.

#### Textbooks

There is a Reader of key articles, available from the University Copy Centre. There are also two textbooks:  
Catharine Lumby and Elspeth Probyn, Eds. *Remote Control: New Media, New Ethics*, Cambridge University Press, Melbourne, 2003.  
Mark Pearson, *The Journalist's Guide to Media Law: Dealing with Legal and Ethical Issues*. \*3rd Edition. Allen and Unwin, Crows Nest, 2007

### MECO3605

#### Media Globalisation Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1 **Classes:** One 2 hour lecture and one 1 hour tutorial per week **Prerequisites:** 12 junior credit points of MECO units and (ENGL1000 or ENGL1005 or LNGS1005) **Prohibitions:** MECO3005 **Assessment:** One 2000 word essay (40%); tutorial presentation/debate (20%) and one 2 hour exam (40%) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day *Note: Available to BA (Media and Comm) and, subject to departmental approval, students undertaking a major in Cultural Studies.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun, UG Study Abroad Program.

This unit aims to demonstrate the complexity of media globalisation and to examine in depth some of the common assumptions associated with the term. While the unit will consider the impact of global market forces (i.e. cheap labour in developing countries, environmental issues, etc), it is interested in the dynamics of globalisation more generally, and media globalisation more specifically. Students can expect to appreciate that media globalisation is a complex proposal that involves formats, localisation, symbolic currency and negotiation.

#### Textbooks

It is recommended that students purchase a reader from the Copy Centre.

### MECO3606

#### Advanced Media Writing Arts

**Credit points:** 6 **Teacher/Coordinator:** Ms M Le Masurier **Session:** Semester 2 **Classes:** One 1 hour lecture and one 2 hour workshop **Prerequisites:** 12 junior credit points of MECO units and ENGL1000 **Prohibitions:** MECO3006 **Assessment:** Three feature articles in different genres, one tutorial presentation. There is no exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA(Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun, UG Study Abroad Program.

This unit of study will build on foundational writing, research and interviewing skills acquired in MECO1003 Principles of Media Writing. The focus will be on writing for print media and will emphasise advanced feature and opinion writing genres. Students will also study the history of print media genres and consider theoretical issues relevant to feature writing.

### MECO3609

#### Critical Practice in Media Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr P O'Donnell **Session:** Semester 2 **Classes:** One 2 hour seminar per week **Prerequisites:** 54 credit points of MECO units and ENGL1000 (or ENGL1005 or LNGS1005) **Assessment:** One 1000 word project proposal and one 5000 word research project. This may either take the form of an essay or a mixed project comprising a media production

plus written work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA(Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun, UG Study Abroad Program.

This unit of study is designed to draw together the key elements of theoretical and practical knowledge and skills that students have acquired in their media and communications studies. Using historical, cultural and industry-based frameworks and case studies, this unit of study will assist students to better understand the relationship between theory and practice in the field and assist them to become critical practitioners. By the end of the unit, students will be able to identify key debates around the relationship between theory and practice and demonstrate an awareness of how critical thinking and media production are capable of mutually informing each other in practice.

#### Textbooks

Readings will be available online through WebCT and/or the Library electronic reserve.

### MECO3671

#### Media and Communications Internship Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr A Dunn **Session:** Semester 1, Semester 2 **Classes:** There are no lectures, but attendance may be required at a programme of industry talks. **Prerequisites:** 30 senior credit points of MECO, including (MECO3603 or MECO3003). Students may not enrol in MECO3671 prior to the second semester of their 3rd year. **Prohibitions:** MECO3701, MECO3702 **Assessment:** Students must satisfy the requirements of an internship contract with their workplace, including attendance and performance, as evaluated through a workplace supervisor report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Available to BA(Media and Comm) and BSc (Media and Comm) students only.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun.

The internship consists of a work placement comprising a minimum of 140 working hours in a media organisation, assisted and supervised by both the workplace and the department. Placements may include print, broadcast, online and new media, public relations and advertising organisations. Students will be required to present a 2000 word journal recounting their experiences during the internship. The internship and internship journal are assessed on a satisfactory/unsatisfactory basis.

### MECO3672

#### Internship Project Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr A Dunn **Session:** Semester 1, Semester 2 **Prerequisites:** 30 senior credit points of MECO, including two of (MECO3602, MECO3603, MECO3002, MECO3003). Students may not enrol in MECO3672 prior to the first semester of their 4th year. **Corequisites:** MECO3671 **Prohibitions:** MECO3701, MECO3702 **Assessment:** One 4000 word research essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: All students must attend the Week One lecture, at which they sign up for one of 3 cycles of 4 x 3-hour seminars.*

**Associated degrees:** B A (Media & Comm), B Sc Media Commun.

This unit is based around the production of a 4000 word critical research essay drawn from issues encountered during and after the internship. Students are required to attend a cycle of four seminars, which they will direct (in the presence of the unit co-ordinator) to discuss and refine their research approaches and questions. Students will also need to submit documentation of their research question and approach before submitting their essay.

### MECO4601

#### Honours Research Methods A Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per week **Assessment:** 4000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Media & Comm)(Hons).

This seminar will introduce students to key research methods and critical approaches in the media and communications fields and engage them in the close reading of theoretical texts. Students will also be required to give presentations and to actively engage in argumentation and critique.

## MECO4602

### Honours Research Methods B Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per week **Corequisites:** MECO4601 **Assessment:** 4000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Media & Comm)(Hons).

This seminar will extend and build on the skills acquired in MECO4601 - Honours Research Methods.

## MECO4603

### Honours Seminar A Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per week **Assessment:** 4000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Media & Comm)(Hons).

This seminar will give students an opportunity to develop their thesis outline in a peer review context, to present work for group discussion and to actively engage with other researchers. Students will be encouraged to experiment with new ideas, approaches and genres.

## MECO4604

### Honours Seminar B Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1, Semester 2 **Classes:** One 2 hour seminar per week **Corequisites:** MECO4603 **Assessment:** 4000 words **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Media & Comm)(Hons).

This seminar will extend and build on the skills acquired in MECO4603 - Honours Seminar A.

## MECO4605

### Honours Thesis A Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1, Semester 2 **Assessment:** Either a thesis of 12000-15000 words OR a media production of an agreed size PLUS a 6000-8000 word extended essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Media & Comm)(Hons).

Regular consultation with supervisor is required, at which an agreed schedule of work will be negotiated.

## MECO4606

### Honours Thesis B Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1, Semester 2 **Corequisites:** MECO4605 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Media & Comm)(Hons).

See description in MECO4605 -Thesis A

## MECO4607

### Honours Thesis C Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1, Semester 2 **Corequisites:** MECO4606 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Media & Comm)(Hons).

See description in MECO4605-Thesis A.

## MECO4608

### Honours Thesis D Arts

**Credit points:** 6 **Teacher/Coordinator:** Dr M Brennan **Session:** Semester 1, Semester 2 **Corequisites:** MECO4607 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Media & Comm)(Hons).

See description in MECO4605-Thesis A.

## MEDF4005

### Medicine Preliminary Medicine

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** M Med (R H H G), M Phil, M Sc (Med)(Preliminary), M Sc Med (R H H G), M Phil Med.

This unit and the associated units, MEDF4001, MEDF4002, MEDF4003 and MEDF4004, are intended for students who may be able to attempt a research degree but are not yet sufficiently qualified. The contents and assessments are determined according to each individual student's needs.

## MGRK1601

### Junior Modern Greek 1 Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Vrasidas Karalis **Session:** Semester 1 **Classes:** 4 hours per week **Prohibitions:** MGRK1101 **Assessment:** Continuous assessment (class exercises) equivalent to 2500 words, 2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

Practical language classes for students who have very little or no prior knowledge of Greek. The unit is based both on communicative methodology and a functional approach to language. By using the Greek language in a range of contexts, students will develop spoken communication (speaking and listening) skills and to a lesser extent written communication (reading and writing) skills.

*Textbooks*

Supplied through the department.

## MGRK1602

### Junior Modern Greek 2 Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Vrasidas Karalis **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** MGRK1101 or MGRK1601 **Prohibitions:** MGRK1102 **Assessment:** Continuous assessment (class exercises) equivalent to 2500 words, 2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is a continuation of MGRK1601. It aims at strengthening students' oral communication skills and further developing their written skills. Having completed MGRK1602, students in their second year will normally enter MGRK2601.

*Textbooks*

Supplied through the department.

## MGRK1621

### Junior Modern Greek 3

**Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Panayiota Nazou **Session:** Semester 1 **Classes:** 4 hours per week **Prerequisites:** Modern Greek Continuers or Modern Greek Extension or equivalent language proficiency as determined by the department **Prohibitions:** MGRK1101, MGRK1501, MGRK1401 **Assessment:** 1000 word assignment, continuous assessment consisting of 6 tasks (equivalent to 1500 words), 2 hour exam, class participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit revises and consolidates the main structures of Greek grammar and syntax and provides an overview of recent Greek history. The language component focuses on developing writing and reading skills by introducing students to the essential morphological structure of the Greek language. The history component offers an insight to some of the most important issues of Greek history since the enlightenment.

*Textbooks*

Supplied through the department.

**MGRK1622****Junior Modern Greek 4****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Anthony Dracopoulos **Session:** Semester 2 **Classes:** 4 hours per week **Prerequisites:** MGRK1621 or MGRK1401 or equivalent language proficiency as determined by the department **Prohibitions:** MGRK1101, MGRK1102, MGRK1402 **Assessment:** 1000 word assignment, continuous assessment consisting of 6 tasks (grammar exercises and compositions, equivalent to 1500 words), 2 hour exam, class participation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is a continuation of MGRK1621. Enrolment into this unit without completion of MGRK1621 is possible after consultation with the chair of the department.

**MGRK2601****Senior Modern Greek 1****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Panayiota Nazou **Session:** Semester 1 **Classes:** 2 hours language and 2 hours cultural and historical survey per week **Prerequisites:** MGRK1102 or MGRK1602 or special permission by the department **Prohibitions:** MGRK1501, MGRK2001 **Assessment:** 1000 word assignment, continuous assessment (language exercises and class tests, equivalent to 1000 words), 2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

The core of this unit is practical language segments aimed particularly at developing skills of listening, speaking and writing. It also provides introductory lectures on the history and culture of speakers of Greek in the post-classical world. Political and social developments described in lectures will be linked to the reading of texts; some in Greek, illustrating how Greek culture and literature have reacted to historical change and ideological repositioning.

*Textbooks*

Supplied through the department.

**MGRK2602****Senior Modern Greek 2****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Anthony Dracopoulos **Session:** Semester 2 **Classes:** 2 hours language and 2 hours cultural and historical survey per week **Prerequisites:** MGRK2001 or MGRK2601 or special permission by the department **Prohibitions:** MGRK1502, MGRK2002 **Assessment:** 1000 word assignment, continuous assessment (language exercises and class tests, equivalent to 1000 words), 2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is a continuation of MGRK2601, and builds upon the knowledge and skills acquired during Semester 1.

**MGRK2603****Style and Expression****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Anthony Dracopoulos **Session:** Semester 2 **Classes:** 3 hours per week **Prerequisites:** MGRK1402 or MGRK1622 or MGRK2002 or MGRK2602 or special permission by the department **Prohibitions:** MGRK2203 **Assessment:** 4 compositions and 4 exercises (equivalent to 2500 words), 2 hour exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

The unit builds on the structures analysed in MGRK1604 and MGRK2602. Its particular purpose is to develop students' ability to write substantial continuous passages of Greek, concentrating on different methods for the effective building of clauses into sentences and sentences into paragraphs.

*Textbooks*

Supplied through the department.

**MGRK2605****Theory and Practice of Translation B****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Panayiota Nazou **Session:** Semester 1 **Classes:** 3 hours per week **Prerequisites:** MGRK1202 or MGRK1402 or MGRK1622 or MGRK2002 or MGRK2602 or special permission by the department **Prohibitions:** MGRK3211 **Assessment:** Continuous assessment (500 words), 2 class tests (2000 words), 2000 word essay. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit is a continuation of MGRK3210 with specific emphasis on the reverse translation from English to Greek. Its main focus is the study of translating strategies of specialised texts and explains changes in their structure. Students are expected to learn how translation works as a semantic transition from one language to the other and be able to understand the necessary changes they must introduce during the translation process in order to make the text semantically functional in Greek.

**MGRK2622****The Other Road to Greek Modernity****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Anthony Dracopoulos **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** At least 18 junior credit points from Part A of the table of units of study, of which 12 credit points are from one subject, or special permission by the chair of department **Prohibitions:** MGRK2501 **Assessment:** Class presentation, 3000 word essay, take home exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit examines attempts to modernise Greek Literature at the beginning of the 20th century by C.P Cavafy, K. Karyotakis and other poets, together with a new trend in Greek criticism put forward by T. Agras and K. Paraschos. These efforts were later overshadowed and marginalised by the dominant discourse of Greek Modernism, which is associated with the group known as the Generation of the 1930's. Parallels are drawn with the European literary context and relevant developments in Greek political life.

**MGRK2633****Social Norms/Stereotypes in Greek Cinema****Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Panayiota Nazou **Session:** Semester 1 **Classes:** 1 hour lecture and 1 hour tutorial per week **Prerequisites:** At least 18 junior credit points from Part A of the table of units of study, of which 12 credit points are from one subject, or special permission by the chair of department **Prohibitions:** MGRK2513 **Assessment:** 3000 word essay, class presentation (equivalent to 1000 words), take home exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit examines a number of the most important Greek films of the last fifty years that give insight into developing views of Greek society. It explores gender representations, social mobility, feminist issues, value systems, significant historical events, sex roles and attitudes towards outsiders. It also discusses stereotyping and ideological constructs, and investigates the relationship between cinematic technique and cultural meaning.

## MGRK2652

### Politics and Politicians in Greece

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Vrasidas Karalis **Session:** Semester 2 **Classes:** 1 hour lecture and 1 hour tutorial per week **Prerequisites:** 12 junior credit points in any subject **Prohibitions:** MGRK2512 **Assessment:** Final essay (4000 words), other written assignments (1000 words), class presentation (1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit looks at some of the most important political movements and prominent political figures, which have shaped Modern Greek social policy and public sphere. Through the study of the political parties, leaders, constitutional history, testimonies, activities, texts and relevant documents, students will gain an understanding of the process of building up statehood in Greece together with specific strategies for citizenship as a pluralistic society.

## MGRK2657

### Greece and the European Imaginary

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Vrasidas Karalis, Dr Anthony Dracopolous **Session:** Semester 1 **Classes:** 1 hour lecture and 1 hour tutorial per week **Prerequisites:** At least 18 junior credit points from Part A of the table of units of study, of which 12 credit points are from 1 subject, or special permission by the chair of department **Assessment:** 3000 word essay, class presentation (1000 words), take home exam. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, Dip Lang Stud, UG Study Abroad Program.

Throughout the last 2000 years Greece and its culture has exerted a powerful influence on the European imagination. This unit surveys the changing images and representations of Greece in European perception from early Rome to Postmodernism. Special emphasis is given to the representation of the Greek legacy by contemporary popular culture. From Alexander the Great to Brad Pitt, and from Cleopatra to Dune, the Greek legacy remains a permanent point of reference for Western culture and articulates a strong tendency towards rational humanism and critical reflection that opposes religious fundamentalism.

## MGRK2675

### New Testament Greek and its World A

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Vrasidas Karalis **Session:** Semester 1 **Classes:** 1 hour lecture and two 1 hour tutorials per week **Prerequisites:** 12 junior credit points in any subject **Prohibitions:** MGRK2525 **Assessment:** Final essay (2000 words), other written assignments (1000 words), class presentation (1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit explores, by means of language, the world, the ideas and the formation of the New Testament as the foundation book of Christian tradition. Language becomes the starting point for the structural analysis of the various books comprising the New Testament and for the close reading in their meaning. It also raises issues of translation and interpretation which were crucial for the establishment of major Christian doctrines and ethical values in different cultures.

Finally, it offers a thorough examination of critical discussions about the continuing influences of the New Testament and investigates the discipline of New Testament studies in the beginning of the 21st century.

## MGRK2676

### New Testament Greek and its World B

#### Arts

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Vrasidas Karalis **Session:** Semester 2 **Classes:** 1 hour lecture and two 1 hour tutorials per week **Prerequisites:** 12 junior credit points in any subject **Prohibitions:** MGRK2526 **Assessment:** Essay (2000 words), other written assignments (1000 words), class presentation (1000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit examines the language, the world and the ideas of the New Testament based mainly on the structural analysis of its Epistles. It explores the language forms and the value systems contained in these texts through studying the linguistic layers determining their reception and interpretation. Tutorials are dedicated to the language itself whereas lectures are exclusively focused to the semantic (theological, philosophical and psychological) analysis of texts.

## MGRK2811

### Modern Greek Exchange

#### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

## MGRK2812

### Modern Greek Exchange

#### Arts

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud.

## MGRK3692

### Theories of Literature

**Arts**

**Credit points:** 6 **Teacher/Coordinator:** Dr Anthony Dracopoulos **Session:** Semester 2 **Classes:** 2 hours per week **Prerequisites:** Credit or above in MGRK1402 or MGRK1622 or MGRK2002 or MGRK2602 or Special Entry Eligibility form signed by the chair of department **Prohibitions:** MGRK3901 **Assessment:** 3000 word essay, class presentation (1000 words), take home exam (2000 words). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Int S, Dip Lang Stud, UG Study Abroad Program.

This unit introduces students to the major literary and cultural theories of the twentieth century and develops a wide variety of concepts, theoretical approaches and methodologies useful for the analysis of Modern Greek literature and culture.

*Textbooks*

Supplied through the department.

**MGRK3841****Modern Greek In-Country Study 1****Arts**

**Credit points:** 6 **Session:** Semester 1, Semester 2, Summer Late **Prerequisites:** 12 junior credit points of Modern Greek **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A, B Int S, Dip Lang Stud, UG Summer/Winter School.

**MGRK4011****Modern Greek Honours A****Arts**

**Credit points:** 12 **Teacher/Coordinator:** Assoc Prof Vrasidas Karalis **Session:** Semester 1, Semester 2 **Classes:** Each seminar is 2 hours per week. **Prerequisites:** A major in Modern Greek plus 16 additional credit points which must include MGRK2904 and MGRK3901 **Assessment:** Essays for each seminar (75%) and 15000 word thesis (25%). **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B A (Hons), B A (Lang)(Hons), B Int S (Hons), Dip Lang Studs (Hons).

Students will complete six semester length seminars and associated work. In addition to this, students will write a long essay of about 15000 words on a subject chosen in consultation with the department's staff. Individual guidance will be provided. The seminars offered in 2009 are:

Semester 1: Classical Heritage; Modern Greek History; Historiography.

Semester 2: Greek Literature in Film; Literary History; Poetics.

**MICR2021****Microbial Life****Science**

**Credit points:** 6 **Teacher/Coordinator:** Deborah Blanckenberg **Session:** Semester 1 **Classes:** Two 1 hour lectures per week, plus an additional six 1 hour tutorials per semester. Eleven 3 hour practicals per semester. **Prerequisites:** 6cp of Junior Biology and (6cp of MBLG (1001 or 1901) or MBLG2901 or PLNT2001 or PLNT2901) and 6cp of Junior Chemistry **Prohibitions:** MICR2921, MICR2024, MICR2001, MICR2901, MICR2003, MICR2007, MICR2011, MICR2909 **Assessment:** One 2 hour theory exam, continuous assessment in practicals, two assignments, two quizzes, practical assignment exercises. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students are very strongly recommended to complete MICR (2021 or 2921 or 2024) before enrolling in MICR2022 in Semester 2. For progression on to Senior Microbiology units, students must also complete MBLG (1001 or 1901) or PLNT (2001 or 2901).*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B E, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), UG Study Abroad Program.

Microorganisms are by far the most ubiquitous organisms on the planet, and underpin healthy ecosystems through nutrient recycling and biodegradation, as well as providing many aspects of plant and animal nutrition. They are used in many industrial processes such as producing enzymes, vitamins and antibiotics, and in the manufacture of some foods and beverages. Microorganisms can also cause problems, however, such as human, animal and plant diseases, poisoning, pollution and spoilage. The small size of most microorganisms means special techniques are required to view, measure, classify and identify them.

In this unit of study, the diversity of microbial life, including viruses, bacteria, fungi, algae and protozoa, and their importance to humans, are introduced. The course is designed for the students wishing to major in microbiology as well as those requiring microbial skills while specializing in related fields, such as molecular biology.

Theoretical aspects of microbiology are supplemented with laboratory classes that teach the safe handling and viewing of microorganisms, and draw on research in microbiology laboratories.

**MICR2022****Microbes in Society****Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Deborah Blackenberg **Session:** Semester 2 **Classes:** Two 1 hour lectures per week, plus an additional four 1 hour tutorials per semester. Eleven 3 hour practicals per semester **Prerequisites:** 6 of Junior Biology and (6 of MBLG (1001 or 1901) or PLNT2001 or PLNT2911) and 6 of Junior Chemistry **Prohibitions:** MICR2922, MICR2002, MICR2902, MICR2004, MICR2008, MICR2012, MICR2909 **Assessment:** One 2 hour theory exam, continuous assessment in practicals, assignment, two quizzes, practical assessment exercises. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students are very strongly advised to complete MICR (2021 or 2921 or 2024) before enrolling in MICR2022 in Semester 2. For progression on to Senior Microbiology units, students must also complete MBLG (1001 or 1901) or PLNT (2001 or 2901).*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B An Vet Bio Sc, B E, B Hort Sc, B L W Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Nutrition), B Sc Agr, UG Study Abroad Program.

Pathogenic microbes cause infectious diseases of humans, animals and plants, and inflict enormous suffering and economic losses. Beneficial microbes are important contributors to food production, agriculture, biotechnology, and environmental processes. The aims

of MICR2022/2922 are to explore the impacts and applications of microbes in human society and in the environment at large, and to teach skills and specialist knowledge in several key areas of microbiology. Medical Microbiology lectures will cover bacterial, viral, and fungal pathogens, and will introduce the concepts of epidemiology, transmission, pathogenicity, virulence factors, host/parasite relationships, host defences, prevention of disease, and antibiotic types, functions, and resistance. Lecture topics in other areas include Food (preservation, spoilage, poisoning, industrial context), Industrial (fermentation, traditional and recombinant products, bioprospecting), Environmental (nutrient cycles, atmosphere, wastewater, pollution, biodegradation) and Agricultural (nitrogen fixation, plant pathogens, biocontrols). The laboratory sessions are integrated with the lecture series and are designed to give students practical experience in isolating, identifying and manipulating microorganisms. BSc or BSc (Advanced) students who have completed MICR2021/2921 and MICR2022/2922 may be offered the opportunity to undertake work experience for approx one month in a local microbiology laboratory (hospital, industrial, university etc) subject to availability of places.

### MICR2024

#### Microbes in the Environment Science

**Credit points:** 6 **Teacher/Coordinator:** Prof David Guest **Session:** Semester 2 **Classes:** Two 1 hour lectures and one 3 hour practical per week. **Prerequisites:** 30 credit points of Junior Science or Faculty of Agriculture, Food and Natural Resource units including 6 credit points of Junior Biology. **Prohibitions:** MICR2021, MICR2921, MICR2001, MICR2901, MICR2003, MICR2007, MICR2011, MICR2909 **Assessment:** One 2 hour exam, fortnightly practical quiz, project report and continuous practical assessment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day  
*Note: Students are very strongly recommended to complete MICR (2021 or 2921 or 2024) before enrolling in MICR2922 in Semester 2. For progression on to Senior Microbiology units, students must also complete MBLG(1001 or 1901) or PLNT (2001 or 2901).*

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Hort Sc, B L W Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biotechnology), B Sc Agr.

This unit introduces the diversity of microbes found in soil, water, air, plant and animal environments. Through an examination of their physiology and genetics it explores their interactions with plants, animals and each other, and their roles as decomposers and recyclers in the environment. The soil is a rich microbial environment, and the concept of soil health and its relationship to plant growth is discussed. Practical classes introduce techniques and skills in isolating, quantifying and culturing microbes, designing and interpreting experiments to study microbial growth, and in preparing and presenting data. Students will complete a short project that is relevant to agricultural microbiology.

### MICR3011 Microbes in Infection Science

**Credit points:** 6 **Teacher/Coordinator:** Helen Agus **Session:** Semester 1  
**Classes:** Two 1 hour lectures per week eight 3 hour practical sessions and three 2 hour clinical tutorials per semester **Prerequisites:** At least 6 credit points of MBLG units and MICR (2022 or 2922 or 2002 or 2902). For BMedSc students: 42 credit points of Intermediate BMED units including BMED (2807 and 2808). For BScAgr students: PLNT (2001 or 2901) and MICR (2022 or 2922). **Prohibitions:** MICR3911, MICR3001, MICR3901 **Assessment:** One 2 hour exam, continuous assessment, practical work **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit is designed to further develop an interest in, and understanding of, medical microbiology from the introduction in Intermediate Microbiology. Through an examination of microbial structure, virulence, body defences and pathogenesis, the process of acquisition and establishment of disease is covered. The unit is divided into three themes: 1. Clinical Microbiology: host defences, infections, virulence mechanisms; 2. Public health microbiology: epidemiology, international public health, transmission, water and food borne outbreaks; 3. Emerging and re-emerging diseases: the impact of societal change with respect to triggering new diseases and causing the re-emergence of past problems, case studies. The practical component is designed to enhance students' practical skills and to complement the lecture series. Clinical tutorial sessions underpin and investigate the application of the material covered in the practical classes.

### MICR3012 Molecular Biology of Pathogens Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Dee Carter **Session:** Semester 2  
**Classes:** Two 1 hour lectures per week, six 5 hour practicals plus two practical-based tutorials per semester. **Prerequisites:** At least 6 credit points of MBLG units and MICR (2022 or 2922 or 2002 or 2902). For BMedSc students: 42 credit points of Intermediate BMED units including BMED (2802, 2807 and 2808). For BScAgr students: PLNT (2001 or 2901) and MICR2024. **Prohibitions:** MICR3912, MICR3002, MICR3902, MICR3003, MICR3903, MICR3004, MICR3904 **Assessment:** One 2 hour exam, continuous assessment, practical report. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit of study is designed to provide an understanding of the virulence mechanisms underlying microbial disease at the molecular level. The following topics will be covered: pathogenic processes and the molecular basis of adhesion, toxin production, cell invasion and

immune evasion in bacteria; the molecular basis of antibiotic action and resistance and modern techniques used in the study of microbial diseases.

The complementary practical course teaches fundamental techniques in molecular microbiology through a molecular epidemiological investigation of a food poisoning outbreak.

### MICR3022 Microbial Biotechnology Science

**Credit points:** 6 **Teacher/Coordinator:** Dr Nick Coleman **Session:** Semester 2  
**Classes:** Two 1 hour lectures per week and seven 4 hour practicals. **Prerequisites:** At least 6 credit points of MBLG units and 6 credit points of Intermediate MICR units. For BMedSc students: 42 credit points of Intermediate BMED units including BMED (2802 and 2807). For BScAgr students: PLNT (2001 or 2901) and MICR2024. **Prohibitions:** MICR3922, MICR3002, MICR3902 **Assessment:** One 2 hour theory exam, practical reports, lab book and skills assessment. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Hort Sc, B L W Sc, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc Agr, UG Study Abroad Program.

Microbes are central to biotechnology as chemical factories, as sources of enzymes, as cloning hosts, and as providers of cloning vectors. The lecture and prac courses in MICR3022/3922 aim to teach basic principles and methods in microbiology in the context of applications in biotechnology - including industrial, medical and environmental biotech. A special focus will be on the importance of microbial diversity as a source of enzyme diversity for biotechnology. The course revolves around three themes, summarized as metabolites, enzymes, and communities. Topic areas to be covered in lectures include production of small molecules (alcohols and antibiotics), production of macromolecules (protein expression, recombinant DNA), and management of microbial proteins in plants and animals (principles, methods, risks), and management of microbial communities (gut microbes, wastewater treatment, bioprospecting). Techniques covered in lectures include fermentation, mutation, making and screening clone libraries, directed evolution, heterologous expression, metabolic engineering, environmental metagenomics, microarrays, and high throughput screening. In one pract project, students will purify (DNA polymerase) from recombinant E.coli cells, and test the enzyme for its ability to catalyze polymerase chain reaction (PCR). In the second prac project, students will isolate hydrocarbon-oxidizing bacteria from soil, and assess their ability to produce a useful metabolite (the blue dye indigo).

### MICR3551 Microbiology Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MICR3552 Microbiology Exchange Science

**Credit points:** 12 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MICR3553

#### Microbiology Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MICR3554

#### Microbiology Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MICR3555

#### Microbiology Exchange Science

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 1a, Semester 1b, Semester 2, Semester 2a, Semester 2b **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Special permission is required for this unit of study.*

**Associated degrees:** B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Marine Science), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition).

This unit of study is for University of Sydney students in the Exchange Program studying at an overseas university.

### MICR3911

#### Microbes in Infection (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Helen Agus **Session:** Semester 1 **Classes:** Two 1 hour lectures per week, plus an additional six 1 hour tutorials per semester; eight 3 hour practical sessions and three 2 hour clinical tutorials per semester. **Prerequisites:** At least 6 credit points of MBLG units and Distinction in MICR (2022 or 2922 or 2002 or 2902). For BMedSc students: 42 credit points of Intermediate BMED units including in BMED (2807 or 2808) with a Distinction in one of these two. For BScAgr students: PLNT (2001 or 2901) and MICR (2022 or 2922) including one Distinction. **Prohibitions:** MICR3011, MICR3001, MICR3901 **Assessment:** One 2 hour exam, continuous assessment, practical work, choice of one essay or one oral presentation. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit is available to students who have performed well in Intermediate Microbiology. MICR3911 is based on MICR3011 with a series of additional tutorials to extend students beyond the core material. Consequently, the unit of study content may vary from year to year.

*Textbooks*

### MICR3912

#### Molecular Biology of Pathogens (Adv) Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Dee Carter **Session:** Semester 2 **Classes:** Two 1 hour lectures per week plus two additional 1 hour lectures per semester. Six 5 hour practicals plus two practical-based tutorials. **Prerequisites:** At least 6 credit points of MBLG units and Distinction in MICR (2022 or 2922 or 2002 or 2902). For BMedSc students: 42 credit points of Intermediate BMED units including BMED (2802 or 2807 or 2808) with a Distinction in one of these three. For BScAgr students: PLNT (2001 or 2901) and MICR2024 including one Distinction. **Prohibitions:** MICR3012, MICR3002, MICR3902, MICR3003, MICR3903, MICR3004, MICR3904 **Assessment:** One 2 hour exam, continuous assessment, practical report, essay on advanced lecture topics. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), B Sc (Nutrition), UG Study Abroad Program.

This unit is available to students who have performed well in Intermediate Microbiology and is based on MICR3012 with two additional advanced lectures related to the research interests in the Discipline of Microbiology that are relevant to the molecular biology of pathogens. The assessment component specific to MICR3922 is an essay researched from the scientific literature on a topic introduced in the advanced lecture course.

Students taking both MICR3922 and MICR3912 may be eligible to undertake a research project (~60 h) in a Microbiology lab (School of MMB) to replace the practical component of both courses. Research projects are assessed by lab performance, lab books and an oral presentation. Allocation to a research project is based on academic merit as places are limited.

### MICR3922

#### Microbial Biotechnology (Advanced) Science

**Credit points:** 6 **Teacher/Coordinator:** Dr N Coleman **Session:** Semester 2 **Classes:** Two 1 hour lectures per week, plus two additional 1 hour lectures per semester. Eight 4 hour practicals per semester. **Prerequisites:** At least 6 credit points of MBLG units and Distinction in 6 credit points of Intermediate MICR units. For BMedSc students: 42 credit points of Intermediate BMED units including BMED (2802 and 2807) with a Distinction in at least one of these two. For BScAgr students: PLNT (2001 or 2901) and MICR2024 including one Distinction. **Prohibitions:** MICR3022, MICR3002, MICR3902 **Assessment:** One 2 hour exam, practical report, lab book, prac skills (continuous), essay on advanced lecture topic. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B A (Adv)(Hons), B A (Adv)(Hons), M B B S, B Med Sc, B Sc, B Sc (Bioinformatics), B Sc (Environmental), B Sc (Molecular Biology & Genetics), B Sc (Molecular Biotechnology), UG Study Abroad Program.

This unit is available to students who have performed well in Intermediate Microbiology and has the same core components as MICR3022. In addition, MICR3922 includes two advanced lectures related to the research interest in the Discipline of Microbiology that are relevant to microbial biotechnology. The assessment component specific to MICR3922 is an essay researched from the scientific literature on a topic introduced in the advanced lecture course. Students taking both MICR3922 and MICR3912 may be eligible to undertake a research project (~60h) in a Microbiology lab (School of MMB) to replace the practical component of both courses. Research projects are assessed by lab performance, lab book and an oral presentation. Allocation to a research project is based on academic merit as places are limited.

### MICR4011

#### Microbiology Honours A Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment. Note: Entry into the School Honours program normally requires a credit average in a major relevant to the chosen project or relevant 24 credit points of senior study. The School will*

consider entry to students who do not have this requirement if their overall academic performance indicates an equivalent performance in other subject areas or if their SCIWAM exceeds 65.

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

Students enrolled in the Honours program study various advanced aspects of Microbiology. The program may include lectures, tutorials, seminars and practicals. Students will undertake a research project. Assessment will include the project and may include examination and coursework.

#### MICR4012

##### Microbiology Honours B Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Department permission required for enrolment **Corequisites:** MICR4011 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Entry into the School Honours program normally requires a credit average in a major relevant to the chosen project or relevant 24 credit points of senior study. The School will consider entry to students who do not have this requirement if their overall academic performance indicates an equivalent performance in other subject areas or if their SCIWAM exceeds 65.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

See MICR4011

#### MICR4013

##### Microbiology Honours C Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** MICR4012 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Entry into the School Honours program normally requires a credit average in a major relevant to the chosen project or relevant 24 credit points of senior study. The School will consider entry to students who do not have this requirement if their overall academic performance indicates an equivalent performance in other subject areas or if their SCIWAM exceeds 65.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

See MICR4011

#### MICR4014

##### Microbiology Honours D Science

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Corequisites:** MICR4013 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Entry into the School Honours program normally requires a credit average in a major relevant to the chosen project or relevant 24 credit points of senior study. The School will consider entry to students who do not have this requirement if their overall academic performance indicates an equivalent performance in other subject areas or if their SCIWAM exceeds 65.*

**Associated degrees:** B Med Sc (Hons), B S T (Hons), B Sc (Environmental)(Hons), B Sc (Hons), B Sc (Molecular Biology and Genetics)(Hons).

#### MKTG1001

##### Marketing Principles Economics and Business

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** 1 lecture and 1 tutorial per week **Prohibitions:** MKTG2001 **Assessment:** Marketing plan; Group presentation; Tutorial assignment ; Two exams **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

This unit examines the relationships among marketing organisations and final consumers in terms of production-distribution channels or value chains. It focuses on consumer responses to various marketing decisions (product mixes, price levels, distribution channels, promotions, etc.) made by private and public organisations to create,

develop, defend, and sometimes eliminate, product markets. Emphasis is placed on identifying new ways of satisfying the needs and wants, and creating value for consumers. While this unit is heavily based on theory, practical application of the concepts to "real world" situations is also essential. Specific topics of study include: market segmentation strategies; market planning; product decisions; new product development; branding strategies; channels of distribution; promotion and advertising; pricing strategies; and customer database management.

#### MKTG1002

##### Marketing Research 1 Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 (or MKTG2001) **Prohibitions:** MKTG2003 **Assessment:** Group project; Tutorial participation portfolio; Individual critique; Exams (mid-semester and final) **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

Fundamental to marketing is a requirement to understand who your customers are and what they want. Marketing research is the essential activity of discovering information and presenting it in a useful format to marketing decision makers. This unit introduces the skills and knowledge necessary to allow students to accurately formulate research questions and then discover answers ensuring that these are accurate, reliable and timely. Particular focus is given to different approaches to and aspects of data collection, including: qualitative research; secondary data collection; questionnaire design; sampling; experimental design; validity and basic data analysis.

#### MKTG1551

##### Marketing Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc, B Int S.

#### MKTG1552

##### Marketing Exchange Economics and Business

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com, B Ec, B Ec Soc Sc, B Int S.

#### MKTG2010

##### Marketing Channels and Logistics Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 lecture and 1 tutorial per week **Assessment:** Assessment is based on Tutorial Discussion, Written Discussion Question Summary, Mid-semester Test, Team Report, Team Presentation, and the Final Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Agr Ec, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B Int S, B Sc, B Com, UG Study Abroad Program.

This unit of study will introduce students to Marketing Channels and Logistics and demonstrate the range of ways in which these important functions complement each other. For example, Marketing focuses on managing and enhancing perceived value from the customer viewpoint, while Logistics focuses on achieving cost-efficient delivery mechanisms. Companies prosper when customers perceive high value and the company achieves this at lowest cost. The unit will address key marketing channels and logistics topics such as, the roles and interface between the marketing and logistics functions within the firm; value exchange (from both business and customer perspective); delivering value through marketing channels and the retail interface.

It will also familiarise students with managing relationships across the distribution chain; the role of logistics in the economy; logistics as value streams; order management and customer service; the management of inventory in logistics processes; and logistics, information technology and information systems.

### **MKTG2112** **Consumer Behaviour** **Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 (or MKTG2001) **Prohibitions:** MKTG2002 **Assessment:** Consumer behaviour audit; Group presentation; Case analyses; Two exams **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

This unit examines the psychological, social, and cultural aspects of consumer behaviour on the marketing decisions of public and private organisations. Concepts and principles are drawn from disciplines such as cognitive psychology, social psychology, sociology, anthropology, and demography to discover and understand various aspects of consumer behaviour. Specific topics of study include: cultural, demographic and psychographic influences; reference group influences; household decision processes and consumption behaviour; consumer perception and learning; motivation, personality and emotion; consumer attitudes; and purchase decision processes.

### **MKTG2551** **Marketing Exchange** **Economics and Business**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S.

### **MKTG2552** **Marketing Exchange** **Economics and Business**

**Credit points:** 6 **Session:** S1 Intensive, S1 Late Int, S2 Intensive, S2 Late Int, Semester 1, Semester 2 **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S.

### **MKTG3112** **Marketing Communications** **Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 (or MKTG2001) **Prohibitions:** MKTG3002 **Assessment:** Assignment; Quiz; Project; Participation; Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program, UG Summer/Winter School.

This unit of study offers an introduction to and overview of current theory and practice in marketing communications. It will include aspects of advertising in the main media (television, radio, print, outdoor, cinema), sales promotion, personal selling and new media, such as the Internet. It will provide students with a sound theoretical/conceptual foundation as well as the strategic/practical perspectives of Marketing Communications planning and implementation.

### **MKTG3114** **New Products Marketing** **Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 (or MKTG2001) **Prohibitions:** MKTG3004 **Assessment:** Group Presentation; Group project; Two exams **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

New products and services are crucial to successful growth and increased profits in many industries. The goal is to help students learn how to develop and market new products and services in both the private and public sectors. A product development assignment is carried out to reinforce the material covered and to provide realistic examples of how new products are designed, tested and launched.

### **MKTG3116** **International Marketing** **Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 (or MKTG2001) **Prohibitions:** MKTG3006 **Assessment:** Participation; Case presentation; International business theatre; Examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

This unit introduces students to international marketing using the marketing concept. It firstly considers environmental factors and then studies how marketing strategies are affected by those environmental factors. It gives students an awareness and understanding of international marketing concepts and highlights their importance in a rapidly changing global economy. Additionally the unit develops students' skills in designing and implementing marketing strategies in diverse international contexts.

### **MKTG3117** **Services Marketing** **Economics and Business**

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 (or MKTG2001) **Prohibitions:** MKTG3007 **Assessment:** Group project; Group presentation; Participation; Exam **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Agr Ec, B C S T, B Com, B Ec, B Ec (Soc Sc), B Ec Soc Sc, B I T, B Int S, UG Study Abroad Program.

This unit provides an understanding of the concepts and processes specifically applicable to services marketing. Services are by nature different from products, and therefore lead to a set of different marketing challenges faced by service-based organisations such as those in tourism, hospitality, health care, aviation, banking, financial, accounting, medical and legal services industries. The unit focuses on those aspects of services that require differential understanding and execution than in a product-marketing environment. Customer care, relationship marketing, and how to use service as a competitive advantage are the other primary areas of interest covered by the unit

### **MKTG3118** **Marketing Strategy and Planning** **Economics and Business**

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 (or MKTG2001), MKTG1002 (or MKTG2003), and MKTG2112 (or MKTG2002) **Prohibitions:** MKTG3201 **Assessment:** Case study; Web-based strategy simulation; and Final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Agr Ec, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B Int S, B Sc, B Com, UG Study Abroad Program.

This course will focus on strategic and managerial aspects of marketing. It will cover the development of innovative, business models; segmentation, positioning and lifecycle strategies; and key aspects of managing and organising marketing activities, and measuring performance. The central theme is how marketing strategy and its management can create superior and sustainable value for both customers and shareholders. Assessment will reflect the Unit's strategic decision-making approach, requiring students to take on the roles of marketing advisors and managers.

### **MKTG3119** **Public Relations Management**

## Economics and Business

**Credit points:** 6 **Session:** Semester 2 **Classes:** 1 lecture and 1 tutorial per week. **Prerequisites:** MKTG1001 (or MKTG2001) **Assessment:** Mid-semester examination; Tutorial work/participation; Case study; Group/individual project; Presentation; Assignment; Report; Essay; Final examination. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Agr Ec, B C S T, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec (Soc Sc), B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B I T, B Int S, B Sc, B Com, UG Study Abroad Program.

Every organisation in the public and private sector makes use of public relations in some form or another. Indeed, for many organisations and marketing professionals, the marketing function is dominated by a mix of advertising, integrated marketing communications and public relations. This subject develops the theoretical and applied knowledge for students to better understand and use public relations. This subject provides a detailed inspection of communication processes necessary for the management of organizational relationships with publics by public relations practitioners. The subject addresses topics such as issues management, event management, media relations, ethics and public relations in commercial and not for profit entities to explore the foundations of contemporary public relations management.

### MKTG3120

#### Building and Managing Brands Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 (or MKTG2001) **Assessment:** Tutorial work/participation; Mid-semester examination; Group project - presentation and report; Final examination **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Agr Ec, B C S T, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec (Soc Sc), B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B I T, B Int S, B Sc, B Com, UG Study Abroad Program.

The most important intangible asset of any organisation is its brand or portfolio of brands. Marketers use an array of internal and external communications approaches to deliver the brand's overall value proposition and experience to its key stakeholders and target customers, and thereby build brand equity. Names, symbols, and slogans along with their underlying associations, perceived quality, brand awareness, customer base and related proprietary resources form the basis for brand equity. Most brands fail because of the lack of proper market research and analysis that enables the brand's core values to be articulated, accurate positioning strategies to be developed, and complete alignment to be achieved between internal and external brand building communications. This unit helps students understand the concept of brand equity and the management of brand assets by learning how to strategically create, position, develop and sustain brand equity.

### MKTG3121

#### Advertising: Creative Principles Economics and Business

**Credit points:** 6 **Session:** Semester 1 **Classes:** 1 lecture and 1 tutorial per week **Prerequisites:** MKTG1001 or MKTG2001 **Assessment:** Essay style Final Exam. Two Tutorial Papers. Group Project, which includes a written report and presentation. Participation, which includes attendance at tutorials and lectures, a number of tutorial tasks and contribution to tutorial debate and discussion. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B A, B Com, B Agr Ec, B Com, B Com (Liberal Studies), B Com, LL B, B E, B Com, B Ec, B Ec, LL B, B Ec Soc Sc, B Ec Soc Sc, LL B, B Int S, B Sc, B Com, UG Study Abroad Program.

Most organisations use advertising to introduce themselves, their products and services to their existing and potential customers. Advertising is their public face and together with integrated marketing communications and public relations is one of the three pillars of commercial communication. This subject explores the creative material that is developed and produced to contact, inform, educate and influence consumer decisions. Advertising is the point where communication theory is put into practice. Through understanding the creative principles and practices of advertising personnel involved in marketing will be able to commission, evaluate and produce creative

material to professional industry standards. The subject addresses topics such as the importance of creativity; messaging issues, determining consumer insights; the creative potential and purpose of different media; developing creative concepts; determining the advertising idea; producing the final creative material and taking it to the marketplace.

### MKTG4101

#### Marketing Honours A Economics and Business

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Requirements for the Pass degree must be completed before entry to level 4000 honours units of study **Assessment:** Coursework and research. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B Com (Hons), B Ec (Hons), B Ec Soc Sc (Hons), B Int S (Hons).

The honours program in Marketing provides specialist training for postgraduate research in marketing, and provides graduates with the analytical skills for solving problems in marketing practice. The program consists of one coursework unit and a two-semester dissertation, written under the supervision of one or more academic staff members.

Marketing Honours A and B involve an expert led series of research seminars which prepares students with the requisite skills to complete their dissertation. In addition, these seminars provide students with research skills that can be applied in either an academic or commercial context.

#### **MKTG4102** **Marketing Honours B** **Economics and Business**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Requirements for the Pass degree must be completed before entry to level 4000 honours units of study **Corequisites:** MKTG4101 **Assessment:** Coursework and research **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons), B Ec Soc Sc (Hons), B Int S (Hons).

Marketing Honours B represents the second part of the semester 1 seminar series. It will guide students as they find and narrow down a thesis topic and will help them prepare for the thesis proposal presentation.

#### **MKTG4103** **Marketing Honours C** **Economics and Business**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Requirements for the Pass degree must be completed before entry to level 4000 honours units of study. **Corequisites:** MKTG4102 **Assessment:** Coursework and research **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons), B Ec Soc Sc (Hons), B Int S (Hons).

Marketing Honours C and D provide students with the opportunity to plan, conduct and report on their chosen dissertation topics. Students work closely under their supervisor(s) to complete this exciting challenging research project. The honours dissertation is expected to be a high quality piece of research, of sufficient standard to be published independently in either marketing journals or conference proceedings.

#### **MKTG4104** **Marketing Honours D** **Economics and Business**

**Credit points:** 12 **Session:** Semester 1, Semester 2 **Prerequisites:** Requirements for the Pass degree must be completed before entry to level 4000 honours units of study. **Corequisites:** MKTG4103 **Assessment:** Coursework and research. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B Com (Hons), B Ec (Hons), B Ec Soc Sc (Hons), B Int S (Hons).

#### **MOBT2102** **Molecular Biotechnology 2** **Science**

**Credit points:** 6 **Teacher/Coordinator:** Dr Matthew Todd **Session:** Semester 2 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** 12 credit points of Junior Biology and 12 credit points of Junior Chemistry **Prohibitions:** MOBT2001 **Assessment:** One 2 hour theory exam (70%) and in-semester assessments (30%). NB Students must pass the theory exam to pass the unit overall. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is only available to students in enrolled the BSc (Molecular Biotechnology) degree.*

**Associated degrees:** B Sc (Molecular Biotechnology), UG Study Abroad Program.

The main purpose of this unit of study is to introduce students to the core concepts of modern molecular biotechnology and build a base for future study in this discipline. It assumes students will have knowledge of Molecular Biology and Genetics through previous study of MBLG1001 and MBLG2771/2871 and concurrent study of MBLG2072/2972. It commences with an introduction to the biotechnology revolution and its impact worldwide. Students are then introduced to how large biomolecules are exploited in drug discovery with discussions of structural diversity in macromolecules, the construction of synthetic peptide and oligonucleotide combinatorial libraries, the uses and screening of such libraries in drug discovery together with examples from industry. This unit proceeds with considerations of the chemical synthesis of pharmaceuticals to specific drug targets. Structure-activity relationships, the use of biomolecules such as proteins versus natural products in drug design, the role of DNA as a drug target, and the importance of metals ions are all discussed together with case studies from industry. Issues associated with pharmaceutical stability and metabolism are then described. The unit concludes with an overview of the commercialization of discoveries in science with consideration given to the role of researchers, universities and industry interactions, and regulatory and patent issues. This is followed by an appreciation of the societal impact and ethics of biotechnology, including how the industry and researchers interact with, and inform, the public. Guest lecturers will contribute to these presentations to help students develop an appreciation of emerging areas in molecular biotechnology from a broad perspective.

### MOBT3101

#### Molecular Biotechnology 3A

##### Science

**Credit points:** 6 **Teacher/Coordinator:** Dr. Neville Firth **Session:** Semester 1 **Classes:** Three 1 hour lectures and one 1 hour tutorial per week. **Prerequisites:** MOBT2102 **Prohibitions:** MOBT2002 **Assumed knowledge:** MBLG (2072 or 2972). **Assessment:** One 2 hour theory exam (70%) and in-semester assessments (30%). Students must pass the theory exam to pass the unit overall. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: NB: This unit of study is only available to students enrolled in the BSc (Molecular Biotechnology) degree.*

**Associated degrees:** B Sc (Molecular Biotechnology).

This unit of study builds on MOBT2102 and to expand concepts and applications of modern molecular biotechnology. It assumes students have previously been taught molecular biology and genetics through MBLG2072/2972. It commences with the synthesis of commercial products by recombinant microorganisms, including small biological molecules, antibiotics, polymers, nucleic acids and proteins, then leads onto large-scale production of proteins from recombinant microorganisms. Students will be introduced to scaled-up microbial growth and bioreactors, combined with typical large-scale fermentation systems and downstream processing. This will be broadened to an appreciation of yeast and mammalian cells in large-scale production. Examples of major protein-based therapeutics will be examined in detail. The unit introduces students to genome sequencing and technologies, and follows with the impact of proteomics in identifying new drug targets and therapeutics, its interplay with genomics, disease states, quantitative vs. qualitative profiles, and the role of bioinformatics in data and database management. The role of protein structure on function and the engineering of protein structures is briefly described. Agricultural and environmental biotechnology is introduced with a focus on promoting plant growth, the utilisation of starch and cellulose, the application of enzymes in food processing, bioremediation strategies and green manufacturing technologies and the impact heavy metals and pesticides on the environment. Issues facing start-up companies and the commercialisation of discoveries complete the unit.

### MOBT3202

#### Molecular Biotechnology 3B Project

##### Science

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Kevin Downard **Session:** Semester 2 **Classes:** 75 hours industry related project over the semester **Prerequisites:** MOBT2002 or MOBT3101 **Prohibitions:** MOBT3002, MOBT3102 **Assessment:** Presentation, project report and essay **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study is only available to students enrolled in the BSc (Molecular Biotechnology) degree.*

**Associated degrees:** B Sc (Molecular Biotechnology).

This Senior unit of study builds on the knowledge gained in earlier units of modern molecular biotechnology. It emphasises applications of molecular biotechnology including product design, research and development, and the importance of recognising industry trends. This will typically involve an industry placement or a detailed industry case study, on-site visits, and interactions with industry partners in association with university staff. To maximize future opportunities, students will learn about funding and research and development. As well as industry-relevant experience, students will research biotechnology kits and technologies.

## MRTY1031

### Medical Radiation Physics Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Barrie Egerton **Session:** Semester 1 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Assumed knowledge:** HSC Physics, 2 unit Maths **Assessment:** Two common and stream specific test (10% ea), 1hr MCQ/SAQ class test (30%), 2hr end semester MCQ/SAQ exam (50%) **Practical field work:** Practical classes will be provided as required **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Students without the assumed knowledge are strongly advised to enrol in the Foundation Mathematics and Physics Bridging Courses offered prior to the commencement of Semester 1*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit introduces students to the safe use of ionising radiation common to all medical radiations. It commences with an examination of the structure of matter, the various modes of radioactive decay together with the types of ionising radiation and their interactions with matter. Discipline specific fundamental physics will also be covered.

*Textbooks*

Graham & Cloke, Principles of Radiological Physics (4th ed), (2003)

## MRTY1032

### Preparation for Practice Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Nikki Field **Session:** Semester 1 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Assessment:** 500 word assignment (16%), two group presentations (22% ea), 2hr final exam (40%) **Practical field work:** Practical classes will provide students with experience in patient care, practitioner patient communication and fundamental discipline specific practice **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: The clinical placement component will be undertaken during semester break and must be completed prior to Semester 2*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study introduces the student to the key generic components of professional practice, patient care, communication skills and ethical behaviour. Students will also be introduced to their discipline specific practice, which will include a short clinical placement.

*Textbooks*

Discipline specific text

## MRTY1033

### Radiographic Practice 1 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Sue Miller **Session:** Semester 2 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Prerequisites:** MRTY1032 Preparation for Practice **Assessment:** Assignment, class tests, exam **Practical field work:** Practical classes will provide students with experience in patient care, practitioner patient communication and fundamental discipline specific practice **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, UG Study Abroad Program.

This unit of study integrates knowledge from both basic and applied clinical sciences and focuses on the radiographer and the patient. Professional practice and personal development issues are considered at the same time as designated techniques. This unit of study will introduce the student to the basic principles of radiography. This unit will also provide students with the knowledge and skills to perform radiographic examinations of the chest, upper and lower limbs and abdomen.

*Textbooks*

Merrill's Atlas of Radiographic Positions

## MRTY1034

### Nuclear Medicine Practice 1 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Elisabeth Kilburn-Watt **Session:** Semester 2 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Prerequisites:** MRTY1032 Preparation for Practice **Assessment:** 1000 word assignment (20%), practical report (20%), 2hr final exam (60%) **Practical field work:** Practical classes will provide students with experience in procedures and radiopharmacy **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Nuclear Med, UG Study Abroad Program.

This unit of study introduces the student to the fundamental aspects of the most commonly performed imaging procedures in nuclear medicine. It provides a study of the anatomy, physiology, and radiopharmaceutical bio-distributions which are fundamental to an understanding of the imaging procedures. Practical aspects of acquisition and radiopharmacy will be introduced.

*Textbooks*

Nuclear Medicine and PET Technology and Techniques (5th ed), Mosby

## MRTY1035

### Radiation Therapy Practice 1 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mrs Nikki Field **Session:** Semester 2 **Classes:** 4hrs lectures, 2hrs tutorial/week and directed independent learning **Prerequisites:** MRTY1032 Preparation for Practice **Assessment:** 1.5hr practical class test (30%), 1500 word assignment (30%), 2hr practical final test (40%) **Practical field work:** Practical classes will provide students with experience in planning simple palliative techniques **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study concentrates on the acquisition of the knowledge and skills to enable the student to satisfactorily plan, calculate and treat simple palliative techniques on the linear accelerator. The role of the radiation therapist as a supporter and educator of the patients will also be covered.

*Textbooks*

Washington C & Leaver D, Principles and Practice of Radiation Therapy (2nd ed), Mosby, St Louis (2004)

**MRTY1036****Health Physics and Radiation Biology  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Barrie Egerton **Session:** Semester 2 **Classes:** Three 1hr lectures/week, one 1hr tutorial, 2hr practical class/fortnight **Prerequisites:** MRTY1031 Medical Radiation Physics **Assessment:** Mid semester 1hr MCQ/SAQ exam (30%), end semester 2hr MCQ/SAQ exam (50%), practical work and/or assignment (20%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy.

This unit of study develops radiation biology for radiological protection and provides a foundation for the physics and instrumentation of devices used in the medical radiation sciences. The unit explores what is known about the effects of ionising and non-ionising radiation on biological systems. An in-parallel study of the general principals of optics, optical fibres, electricity and magnetism, electrical safety and basic electronics provides a foundation for the introduction of ultrasonic transducers, cyclotrons, oscilloscopes, colour television and liquid crystal displays applicable to medical radiation sciences that employ ionising or non-ionising radiation.

Graham D and Cloke P, Principles of Radiologic Physics (4th ed), Churchill Livingstone (2003)

**MRTY2080****Radiographic Practice 2.1  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Mr John Robinson **Session:** Semester 1 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Prerequisites:** MRTY1033 Radiographic Practice 1 **Assessment:** Assignments, class tests, class presentations, computer-based assessment **Practical field work:** Practical classes will provide students with experience in patient care, practitioner-patient communication, radiographic positioning and appropriate anatomy and pathology recognition. The tutorial classes will focus on the development of a clinical knowledge through the use of clinical scenarios **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, UG Study Abroad Program.

In this unit of study the student will investigate radiographic techniques and study the roles of additional imaging modalities in the diagnosis of trauma, injury and disease, in particular, of the musculoskeletal system. The unit of study is divided into modules focusing on designated regions and will generate an inquiry-based learning in the student with class presentations forming a 'wrap-up' seminar for each module. Aspects covered within each module will include patient preparation, contrast media administration, technical considerations, radiographic pathology, with the routine protocols being supported by evidence drawn from reference articles. Practical: practical classes will provide students with experience in patient care, practitioner patient communication, radiographic positioning and appropriate anatomy and pathology recognition. The tutorial classes will focus on the development of a clinical knowledge through the use of clinical scenarios.

**Textbooks**

**MRTY2081****Clinical Education 2.1DR  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Mr Andrew Kilgour **Session:** Semester 1, Semester 2 **Classes:** On-campus and clinical centre, 35hrs/week for 6 weeks **Prerequisites:** MRTY1033 Radiographic Practice 1 **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Clinical departmental assessment (25%), written case studies (50%), university supervisor assessment (25%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

**Note:** Department permission required for enrolment in the following sessions: Semester 2.

**Associated degrees:** B App Sc (MRS) Diag Rad.

This unit of study requires students to attend six (6) weeks of clinical practice in the workplace. During this unit of study, students will practice the radiographic skills basic to anatomical areas such as the chest and extremities. Students are required to reflect upon their professional role and acquire competencies in general skeletal and chest radiography.

**Textbooks**

Students are supplied with a clinical workbook specific to their UoS

**MRTY2082****Radiographic Physics 2  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Dr Elaine Ryan **Session:** Semester 1 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Prerequisites:** MRTY1031 Medical Radiation Physics **Assessment:** Practical (10%), class test (25%), final exam (65%) **Practical field work:** Practical classes will provide students with experience in quality control and application of clinical radiation safety **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, UG Study Abroad Program.

This unit of study introduces the student to the construction, design, operation and quality control of general radiographic and processing equipment. A section on conventional tomography, computerised tomography and associated radiation protection will also be included.

**Textbooks**

Curry TS et al, Christensen's Physics of Diagnostic Radiology (4th ed)

**MRTY2083****Nuclear Medicine Practice 2.1  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Ms Elisabeth Kilburn-Watt **Session:** Semester 1 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Prerequisites:** MRTY1034 Nuclear Medicine Practice 1 **Assessment:** Class test, assignment, final exam **Practical field work:** Practical classes will provide students with experience in procedures, computer and radiopharmacy **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Nuclear Med, UG Study Abroad Program.

This unit of study extends the learning of the most commonly performed imaging procedures in nuclear medicine and introduces the appreciation of abnormal studies. Computer analysis of functional data and tomographic imaging, reconstruction and display will be presented. It provides a study of the pathophysiology and altered radiopharmaceutical bio-distributions and the variations of imaging procedures that may be undertaken. Further theoretical aspects of acquisition and radiopharmaceutical use will be developed. Aspects of quality control of nuclear medicine practice will be introduced.

**Textbooks**

Nuclear Medicine and PET Technology and Techniques (5th ed), Mosby

**MRTY2084****Nuclear Medicine Physics 2  
Health Sciences**

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Dale Bailey **Session:** Semester 1 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Prerequisites:** MRTY1031 Medical Radiation Physics **Assessment:** Practicals/tutorials, class test, final exam **Practical field work:** Practical classes will provide students with experience in radiation detection, measurement and gamma camera functional parameters **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Nuclear Med, UG Study Abroad Program.

This course covers the physical fundamentals of nuclear medicine imaging from the instrumentation and computing perspectives. Starting with simple detectors, students will learn about the components of the gamma camera in detail, the use of computers for data acquisition and analysis, and the bases for tomographic imaging. Some discussion of complementary imaging devices such as X-ray CT is included. The course lays the foundations for students in understanding the functional measurement, imaging and analysis techniques used in nuclear medicine.

## MRTY2085

### Clinical Education 2.1NM

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Tracey Smith **Session:** Semester 1, Semester 2 **Classes:** On-campus tutorials, off-campus clinical placement, 35hrs/week for 6 weeks **Prerequisites:** MRTY1034 Nuclear Medicine Practice 1 **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Clinical assessment, oral case study, practical test **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

*Note: The clinical placement component of this unit of study will be undertaken 6 weeks prior to Semester 1 commencing*

**Associated degrees:** B App Sc (MRS) Nuclear Med.

This unit of study will provide the student with a structured program of clinical experience to attain skills and applied knowledge in nuclear medicine procedures. Students will be required to demonstrate a range of skills, attributes and knowledge at a level of fundamental practice.

#### Textbooks

Nuclear Medicine and PET Technology and Techniques (5th ed), Mosby

## MRTY2086

### Radiation Therapy Practice 2.1

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Yobelli Jimenez **Session:** Semester 1 **Classes:** 2hrs lectures, 4hrs tutorials/week and directed independent learning **Prerequisites:** MRTY1035 Radiation Therapy Practice 1 **Assessment:** Class test, module presentations, final exam **Practical field work:** Practical classes will provide the student with experience in planning pelvic and primary breast tumour techniques using 3D treatment planning systems **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Rad Thy, UG Study Abroad Program.

This unit of study concentrates on the acquisition of the knowledge and skills to enable the student to satisfactorily plan, calculate and treat radical radiation therapy techniques of the pelvis and breast. Oncology principles and the role of the radiation therapist as a supporter of psychosocial health and educator of the patient will also be covered.

#### Textbooks

Washington C & Leaver D, Principles and Practice of Radiation Therapy (2nd ed), Mosby, St Louis (2004)  
Online web based materials

## MRTY2087

### Radiation Therapy Physics 2

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Mark West **Session:** Semester 1 **Classes:** 4hrs lectures, 2hrs tutorials/week and directed independent learning **Prerequisites:** MRTY1031 Medical Radiation Physics **Assessment:** Class test, assignment, final exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Rad Thy, UG Study Abroad Program.

This unit of study concentrates on the physical principles and application of ionising radiation in radiation therapy. The method and measurement of radiation therapy beams will also be covered.

#### Textbooks

Khan FM, The Physics of Radiation Therapy (3rd ed), Lippincott, Williams & Wilkins, Baltimore (2003)

## MRTY2088

### Clinical Education 2.1RT

#### Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Clinical placement, 35hrs/week for 6 weeks **Prerequisites:** MRTY1035 Radiation Therapy Practice 1 **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Case study, reflective summary, final clinical assessment **Practical field work:** 35hrs/week for 6 weeks **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (MRS) Rad Thy.

This unit of study places students in clinical radiation oncology centres throughout Australia. This unit aims to provide the student with a structured program where the knowledge, skills and attributes to practice are applied to the clinical setting. Students will focus on developing their simulation, planning and treatment skills in superficial, orthovoltage, single photon and parallel opposed techniques.

#### Textbooks

Washington C & Leaver D, Principles and Practice of Radiation Therapy (2nd ed), Mosby, St Louis (2004)

## MRTY2089

### Integrated Diagnosis and Treatment

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr John Robinson **Session:** Semester 2 **Classes:** 5hrs lectures, 2hrs tutorials/week and directed independent learning **Assessment:** Assignment, class test, final exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thy, UG Study Abroad Program.

Students will develop an appreciation of the applications of diagnostic imaging modalities to different disease states. The relationship of appropriate therapy will be incorporated together with relevant ethical and radiation implications for the patient and health professional.

#### Textbooks

Students are supplied with online reading material

## MRTY2090

### Clinical Education 2.2DR

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Andrew Kilgour **Session:** Semester 1, Semester 2 **Classes:** On-campus and clinical centre, 35hrs/week for 6 weeks **Prerequisites:** MRTY2081 Clinical Education 2.1DR **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Clinical departmental assessment (50%), written case studies (50%) **Practical field work:** Clinical placement of 6 weeks **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (MRS) Diag Rad.

This unit of study requires students to attend six (6) weeks of clinical practice in the workplace. During this unit of study, students will practice the radiographic skills basic to anatomical areas such as the pelvic girdle, spine and skull/face, whilst consolidating their general skeletal radiography. Students are required to reflect upon their professional role and acquire competencies in skeletal, spinal and skull radiography.

#### Textbooks

Students are supplied with a clinical workbook specific to their UoS

## MRTY2091

### Clinical Education 2.3DR

#### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Andrew Kilgour **Session:** Semester 1, Semester 2 **Classes:** On-campus and clinical centre, 35hrs/week for 6 weeks **Prerequisites:** MRTY2081 Clinical Education 2.1DR **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Clinical departmental assessment (25%), written case studies (50%), OSCE (25%) **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (MRS) Diag Rad.

This unit of study requires students to attend six (6) weeks of clinical practice in the workplace. During this unit of study, students will practice the radiographic skills basic to anatomical areas such as the renal and GIT systems whilst consolidating their skills in pelvic girdle,

spine, skull/face and skeletal radiography. Students are required to reflect upon their professional role and acquire competencies in GIT, renal, skeletal, spinal and skull radiography.

#### Textbooks

Students are supplied with a clinical workbook specific to their UoS

### MRTY2092 Radiographic Practice 2.2 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr John Robinson **Session:** Semester 2 **Classes:** 5hrs lectures, 5hrs tutorials/week and directed independent learning **Assessment:** Assignments, class tests, class presentations, computer-based assessment **Practical field work:** Practical classes will provide students with experience in patient care, practitioner patient communication, radiographic positioning and appropriate anatomy and pathology recognition. The tutorial classes will focus on the development of a clinical knowledge through the use of clinical scenarios **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, UG Study Abroad Program.

This unit of study integrates knowledge from both basic and applied clinical sciences and focuses on the radiographer and the patient. Professional practice and personal development issues are considered at the same time as designated techniques. In this unit of study the student will investigate radiographic techniques and study the roles of additional imaging modalities in the diagnosis of trauma, injury and disease, in particular, of the axial skeleton and the internal body systems. The unit of study is divided into modules focusing on designated regions and will be delivered using inquiry-based learning. Aspects covered within each module will include patient preparation, contrast media administration, technical considerations, radiographic pathology, with the routine protocols being supported by evidence drawn from reference articles.

#### Textbooks

Ballinger PWP & Frank ED, Merrill's Atlas of Radiographic Positions and Radiologic Procedures, Mosby, St Louis

### MRTY2093 Clinical Education 2.2NM Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Tracey Smith **Session:** Semester 1, Semester 2 **Classes:** On-campus tutorials, off-campus clinical placement, 35hrs/week for 6 weeks **Prerequisites:** MRTY2085 Clinical Education 2.1NM **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Clinical assessment, written case study, practical test **Practical field work:** Off-campus, 35hrs/week for 6 weeks **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

*Note: Satisfactory progress in the clinical achievements must be demonstrated in order to progress*

**Associated degrees:** B App Sc (MRS) Nuclear Med.

This unit of study will provide the student with a structured program of clinical experience to attain skills and applied knowledge in nuclear medicine procedures. Students will be required to demonstrate a range of skills, attributes and knowledge at a level above that of MRTY2085 Clinical Education 2.1NM.

#### Textbooks

Nuclear Medicine and PET Technology and Techniques (5th ed), Mosby

### MRTY2094 Clinical Education 2.3NM Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Tracey Smith **Session:** Semester 1, Semester 2 **Classes:** On-campus tutorials, off-campus clinical placement, 35hrs/week for 6 weeks **Prerequisites:** MRTY2085 Clinical Education 2.1NM **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Clinical assessment, practical test, assignment **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (MRS) Nuclear Med.

This unit of study will provide the student with a structured program of clinical experience to attain skills and applied knowledge in nuclear medicine procedures. Students will be required to demonstrate a range of skills, attributes and knowledge at a level above that of MRTY2093 Clinical Education 2.2NM and that is nearing those required of an entry level practitioner.

#### Textbooks

Nuclear Medicine and PET Technology and Techniques (5th ed), Mosby

### MRTY2095 Nuclear Medicine Practice 2.2 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Elisabeth Kilburn-Watt **Session:** Semester 2 **Classes:** 6hrs lectures, 3hrs tutorials/week and directed independent learning **Assessment:** Assignment, group presentation, final exam **Practical field work:** Practical classes will provide students with experience in procedures, computer and radiopharmacy **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Nuclear Med, UG Study Abroad Program.

This unit of study examines a number of body systems and the application of radiopharmaceuticals in nuclear medicine procedures. It provides a study of the pathophysiology and altered radiopharmaceutical bio-distributions and the variations of imaging procedures that may be undertaken. Further theoretical aspects of acquisition, interpretation and radiopharmaceutical use will be developed. Computer analysis of functional data and tomographic imaging, reconstruction and display will be presented. Aspects of quality control of nuclear medicine practice will be developed.

#### Textbooks

Nuclear Medicine and PET Technology and Techniques (5th ed), Mosby

### MRTY2096 Clinical Education 2.2RT Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Clinical placement, 35hrs/week for 6 weeks **Prerequisites:** MRTY2088 Clinical Education 2.1RT **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** 2 case studies, reflective summary, final clinical assessment, observable clinical skills assessment **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (MRS) Rad Thpy.

This unit of study places students in clinical radiation oncology centres throughout Australia. This unit aims to provide the student with a structured program where the knowledge, skills and attributes to practice are applied to the clinical setting. Students will focus on developing their simulation, planning and treatment skills in pelvis and tangent breast techniques.

#### Textbooks

Washington C & Leaver D, Principles and Practice of Radiation Therapy (2nd ed), Mosby, St Louis (2004)

### MRTY2097 Clinical Education 2.3RT Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Clinical placement, 35hrs/week for 6 weeks **Prerequisites:** MRTY2088 Clinical Education 2.1RT **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** 2 case studies, reflective summary, final clinical assessment **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 1.*

**Associated degrees:** B App Sc (MRS) Rad Thpy.

This unit of study places students in clinical radiation oncology centres throughout Australia. This unit aims to provide the student with a structured program where the knowledge, skills and attributes to

practice are applied to the clinical setting. Students will focus on developing their simulation, planning and treatment skills in head and neck and brain techniques.

#### Textbooks

Washington C & Leaver D, Principles and Practice of Radiation Therapy (2nd ed), Mosby, St Louis (2004)

### MRTY2098

#### Radiation Therapy Practice 2.2

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Yobelli Jimenez, Mr John Atyeo **Session:** Semester 2 **Classes:** 5hrs lectures, 5hrs tutorials/week and directed independent learning **Prerequisites:** MRTY2086 Radiation Therapy Practice 2.1 **Assessment:** Class test, module presentations, final exam **Practical field work:** Practical classes will provide the student with experience in planning primary head & neck and brain techniques using 3D treatment planning **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study concentrates on the acquisition of the knowledge and skills to enable the student to satisfactorily plan, calculate and treat radical radiation therapy techniques of the head & neck and breast. Oncology principles and the role of the radiation therapist as a supporter of psychosocial health and educator of the patients will also be covered.

#### Textbooks

Washington C & Leaver D, Principles and Practice of Radiation Therapy (2nd ed), Mosby, St Louis (2004)

### MRTY3099

#### Research in Medical Radiation Sciences

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Peter Kench **Session:** Semester 1 **Classes:** On-campus lectures and group work **Corequisites:** BACH2140 Research Methods for Health Sciences **Assessment:** Oral presentation, reports, assignment **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Assessment is based on group work and peer evaluation*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit introduces the students to the role of research within the medical radiation sciences. Students will be able to select a research topic and develop hypotheses and aims. The development of a research plan is central to the unit, with emphasis on constructing an appropriate methodology for the topic and aims of the project. Skills will be developed in identifying and critical evaluation of current research articles resulting in a literature review appropriate for ethics application and introducing the research topic. Students will complete an application for human ethics approval and work in groups to foster a team approach to research.

### MRTY3100

#### Digital Imaging

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Roger Bourne **Session:** Semester 2 **Classes:** 3x1hr lectures/wk, 6x2hr pracs **Assumed knowledge:** Discipline specific Physics 2 (MRTY2082 Radiographic Physics 2, or MRTY2097 Nuclear Medicine Physics 2, or MRTY2087 Radiation Therapy Physics 2), MRTY2089 Integrated Diagnosis and Treatment **Assessment:** Mid-semester test (25%), practical assessment (25%), final exam (50%) **Practical field work:** Practical classes will provide students with experience in image processing. **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study aims to develop an understanding of imaging theory, digital image processing, and storage systems as they apply to medical imaging.

#### Textbooks

Discipline specific recommended text

### MRTY3101

#### Ethics, Law and Professional Practice

### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Edwina Adams **Session:** Semester 2 **Classes:** Two 1hr lectures, 1hr practical/week **Assumed knowledge:** MRTY1032 Preparation for Practice **Assessment:** Assignments (stream specific), final exam **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit consolidates and extends students learning of ethical, legal and professional practice in the medical radiation sciences. Theoretical aspects of ethics and law relating to the health sciences will be integrated with applied cases. Students will be required to identify and reflect on professional aspects of MRS practice and be aware of what it takes to work at a high professional standard. Students will become familiar with documents relating to their professional practice such as codes of conduct and licensing, and be able to use these documents in their ethical decision making.

#### Textbooks

Forrester K and Griffiths D, Essentials of Law for Health Professionals (2nd ed), Elsevier Australia, Mosby, Sydney (2003)

### MRTY3102

#### Medical Radiation Project

##### Health Sciences

**Credit points:** 6 **Session:** Semester 2 **Classes:** On-campus **Prerequisites:** MRTY3099 Research in Medical Radiation Sciences **Assessment:** Mid semester class presentation (20%), end semester class presentation (20%), 3000 word journal article submission (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study requires students, working in a research team, to implement a pre-designed research project and disseminate their research results in a peer-reviewed format. Students will carry through a research methodology including the collection of data and/or meta-analysis of previous research. Students are expected to produce a journal article, suitable for publication as well as prepare a professional presentation of their findings.

#### Textbooks

Students are supplied with online reading material

### MRTY3103

#### Advanced Issues in MRS

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Assoc Prof Steve Meikle **Session:** Semester 2 **Classes:** On-campus classes, 2hrs/week **Prerequisites:** MRTY3099 Research in Medical Radiation Sciences **Assessment:** Oral and written assignments **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit provides an opportunity to examine advanced issues in research, education and clinical practice in medical radiation sciences. This unit is of particular interest to students wishing to gain an understanding of current developments and their impact on the knowledge base of the medical radiation sciences as well as other scientific and social science disciplines. These developments will include both research and technological advances. The influence of these developments on professional clinical practice will be discussed. It would be advantageous for students planning to enter the honours program to complete this unit.

### MRTY3104

#### Medical Radiation Science Physics

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Barrie Egerton **Session:** Semester 2 **Classes:** 3hr lecture, tutorial or self-directed study library session/week **Prerequisites:** MRTY2082 Radiographic Physics 2 or MRTY2084 Nuclear Medicine Physics 2 or MRTY2087 Radiation Therapy Physics 2 **Assessment:** Two oral presentations (10%, 20%), two written assignments (10%, 60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study enables students to investigate the current technological application of physics-based procedures to medical radiation science.

### MRTY3105

#### Radiographic Practice 3 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Warren Reed **Session:** Semester 1 **Classes:** On-campus lectures, tutorials, practicals **Assumed knowledge:** MRTY2092 Radiographic Practice 2.2, MRTY2091 Clinical Education 2.3DR **Assessment:** Assignment, class tests, web-based assessment **Practical field work:** Practical classes will provide students with experience in patient care, practitioner patient communication and fundamental discipline specific practice **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad.

This unit of study integrates knowledge from both basic and applied clinical sciences and focuses on the radiographer and the patient. Professional practice and personal development issues are considered at the same time as designated techniques. In this unit, the student will investigate specialised radiographic techniques and study the roles of additional imaging modalities in the diagnosis and management of trauma, injury and disease. Trauma imaging, CT, MRI, angiography, mammography and contrast media examinations (not previously covered in Radiographic Studies 2) will form the basis of lectures and tutorials for this semester. Aspects covered will include patient preparation, contrast media administration, technical considerations, radiographic pathology and routine protocols for the specialised modalities discussed.

### MRTY3106

#### Clinical Education 3DR Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Andrew Kilgour **Session:** Semester 1, Semester 2 **Classes:** On-campus and clinical centre **Prerequisites:** MRTY2091 Clinical education 2.3DR, MRTY2092 Radiographic Practice 2.2 **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Clinical departmental assessment (25%), written case studies (50%), OSCE (25%) **Practical field work:** Clinical placement of 6 weeks **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (MRS) Diag Rad.

This unit of study requires students to attend six (6) weeks of clinical practice in the workplace. During this unit, students will practice the radiographic skills basic to anatomical areas such as the renal and GIT systems whilst consolidating their skills in pelvic girdle, spine, skull/face and skeletal radiography. Students are required to reflect upon their professional role and acquire competencies in GIT, renal, skeletal, spinal and skull radiography.

#### Textbooks

Students are supplied with a clinical workbook specific to their UoS

### MRTY3107

#### Radiographic Physics 3 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Elaine Ryan **Session:** Semester 2 **Classes:** Three 1hr lectures, 2hr practical/tutorial or self-directed learning/week **Assumed knowledge:** MRTY2082 Radiographic Physics 2 **Assessment:** Practical mark (20%), assignment(s) (40%), final exam (40%) **Practical field work:** Practical classes will provide students with experience in digital imaging **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, UG Study Abroad Program.

This unit of study introduces the student to digital radiography, computed radiography, PACS, HIS, RIS, DICOM, advanced CT, DSA,

MRI, BMD and sonography. A range of digital and non-digital radiographic specialised equipment will be examined in terms of operational principles, QA, radiation protection principles and radiation dose implications.

#### Textbooks

Curry TS et al, Christensen's Physics of Diagnostic Radiology (4th ed) (1990)

### MRTY3108

#### Nuclear Medicine Practice 3 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Elisabeth Kilburn-Watt **Session:** Semester 1 **Classes:** On-campus lectures, tutorials, practical **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assumed knowledge:** MRTY2095 Nuclear Medicine Practice 2.2, MRTY2094 Clinical Education 2.3NM **Assessment:** Report, practical assessment, final exam **Practical field work:** Practical classes will provide students with experience in procedures, computer and radiopharmacy **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Nuclear Med, UG Study Abroad Program.

This unit of study examines a number of body systems and the application of radiopharmaceuticals in nuclear medicine imaging and therapeutic procedures. It provides a study of the pathophysiology and altered radiopharmaceutical bio-distributions and the variations of imaging procedures and interpretation that may be undertaken. Further theoretical aspects of acquisition, non-imaging procedures and radiopharmaceutical use and quality assurance will be developed.

#### Textbooks

### MRTY3109

#### Clinical Education 3NM Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** On-campus tutorials, off-campus clinical placement (6 weeks) **Prerequisites:** MRTY2093 Clinical Education 2.2NM, MRTY2094 Clinical Education 2.3NM **Prohibitions:** Failure to have the following will result in a removal from clinical placement: criminal record check, personal radiation monitor, immunity status record, student identification badge **Assessment:** Clinical assessment, written assignment, practical achievements **Practical field work:** 35hrs/week for 6 weeks, off-campus, split in two 3 weeks blocks **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

*Note: All the required clinical achievements must be completed to pass this unit*

**Associated degrees:** B App Sc (MRS) Nuclear Med.

This unit of study will provide the student with a structured program of clinical experience to attain skills and applied knowledge in nuclear medicine procedures. Students will be required to demonstrate a range of skills, attributes and knowledge at a level that meets the requirements for an entry level practitioner.

#### Textbooks

Nuclear Medicine and PET Technology and Techniques (5th ed), Mosby

### MRTY3110

#### Nuclear Medicine Physics 3 Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Tracey Smith **Session:** Semester 2 **Classes:** 3hr lecture, 2hr practical, tutorial/week **Assumed knowledge:** MRTY2084 Nuclear Medicine Physics 2 **Assessment:** Satisfactory performance of pracs (attendance required) (20%), major assignment (30%), final exam (50%) **Practical field work:** Practical classes will provide students exercises in image reconstruction, cyclotron operation and radiation safety in departmental/laboratory design **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Nuclear Med, UG Study Abroad Program.

This unit aims to complete the student's knowledge of instrumentation and analytical tools in contemporary nuclear medicine. Advanced issues in SPECT, especially corrections for quantitative imaging, lead on to an in-depth treatment of positron emission tomography (PET). The physical principles of cyclotrons and nuclear magnetic resonance are introduced, along with extension to complementary imaging to MRI. Other nuclear techniques such as spectroscopy and whole body

counting methods are covered. Finally, there is a discussion on aspects of radiation safety, regulatory issues, and departmental design.

Cherry SR, Sorenson JA and Phelps ME, Physics in Nuclear Medicine (3rd ed), Saunders (2003)

### MRTY3111

#### Radiation Therapy Practice 3.1

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Danielle Milinkovic **Session:** Semester 1 **Classes:** On-campus independent research, group discussion forums, practical classes **Assumed knowledge:** MRTY2098 Radiation Therapy Practice 2.2 **Assessment:** Group presentation work, class test, final exam **Practical field work:** Practical classes will provide students with experience in using two and three dimensional radiation therapy planning computers to plan complex radiation therapy treatment techniques **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study applies the knowledge gained in MRTY2098 Radiation Therapy Practice 2.2 to more complex routine radiation therapy procedures. It will concentrate on the acquisition of knowledge and skills to enable the student to satisfactorily plan, calculate and treat supraclavicular and axilla, multi-field thorax and mini mantle techniques. Physics and oncology modules will be presented to encourage a more holistic understanding of each planning technique. Advances in radiation therapy planning and the role of the radiation therapist as a supporter of psychosocial health and educator of the patients will also be covered.

### MRTY3112

#### Clinical Education 3RT

##### Health Sciences

**Credit points:** 6 **Session:** Semester 1, Semester 2 **Classes:** Clinical placement (two blocks of 3 weeks) **Prerequisites:** MRTY2086 Radiation Therapy Practice 2.2, MRTY2097 Clinical Education 2.3RT **Prohibitions:** No current cardiopulmonary resuscitation certificate, unsatisfactory criminal record check and non-compliance with Child Protection (Prohibited Employment) Act 1998, failure to acquire a PRM, failure to have a written record of current immunity status **Assessment:** Case study, final clinical assessment, observable skill clinical assessment **Practical field work:** 35hrs/week for two blocks of 3 weeks **Campus:** Cumberland **Mode of delivery:** Professional Practice

*Note: Department permission required for enrolment in the following sessions: Semester 2.*

**Associated degrees:** B App Sc (MRS) Rad Thpy.

This unit of study places students in clinical radiation oncology centres throughout Australia. This unit aims to provide the student with a structured program where the knowledge, skills and attributes to practice are applied to the clinical setting. Students will focus on developing their simulation, planning and treatment skills in four-field breast and multi-field thorax techniques.

#### Textbooks

Washington C & Leaver D, Principles and Practice of Radiation Therapy (2nd ed), Mosby, St Louis (2004)

### MRTY3113

#### Radiation Therapy Practice 3.2

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Danielle Milinkovic **Session:** Semester 2 **Classes:** On-campus independent research, group discussion forums, practical classes **Prerequisites:** MRTY2087 Radiation Therapy Physics 2 **Assumed knowledge:** MRTY3111 Radiation Therapy Practice 3.1 **Assessment:** Assignment, class test, final exam **Practical field work:** Practical classes will provide students with experience in using two and three dimensional radiation therapy planning computers to plan complex radiation therapy treatment techniques **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study applies the knowledge gained in MRTY2086 Radiation Therapy Practice 2.1 and MRTY2098 Radiation Therapy Practice 2.2 to more complex routine radiation therapy procedures.

It will concentrate on the acquisition of knowledge and skills to enable the student to satisfactorily plan, calculate and treat maxillary/antrum and Parotid techniques. Physics and oncology modules will be presented to encourage a more holistic understanding of each technique. Advances in radiation therapy planning in all of these areas will be addressed. Oncology principles and the role of the radiation therapist as a supporter of psychosocial health and educator of the patients will also be covered.

### MRTY3114

#### Specialised Radiographic Practice

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Warren Reed **Session:** Semester 2 **Classes:** On-campus lectures and practicals **Assessment:** Oral and written assignments **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: Department permission required for enrolment.*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy, UG Study Abroad Program.

This unit of study provides an opportunity to become familiar with specialised practice in the workplace. Professional issues which guide and influence practice in diagnostic radiography will be integrated into the practice areas. Specialised areas such as paediatric and interventional radiography will be studied as well as functional brain imaging. The adaptations to practice required to accommodate the ageing process will also be considered. Management practices as they apply to the workplace will also be examined.

### MRTY3115

#### Introductory Sonography

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Jill Clarke (unit coordinator), Ms Joanne Lomas, Ms Belinda Tong **Session:** Semester 1 **Classes:** Two 1hr lectures/week, one 1hr practical class/fortnight **Assumed knowledge:** BIOS1155 Structure, Function and Disease A, BIOS1158 Structure, Function and Disease B **Assessment:** 30min MCQ/SAQ class test (15%), 45min mid semester MCQ/SAQ class test (20%), 2hr end semester MCQ/SAQ exam (65%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study assumes the student to be familiar with cross-sectional anatomy images*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy.

This unit of study provides an introduction to the physical principles of ultrasound and the clinical applications and practice of diagnostic ultrasound in the abdomen, obstetrics and gynaecology, musculoskeletal and vascular systems.

### MRTY3116

#### CT for Nuclear Medicine Technologists

##### Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Ms Edwina Adams **Session:** Semester 2 **Classes:** Seven 2hr lectures with directed independent work **Assessment:** Two portfolio submissions (30%), group oral presentation (30%), 2500 word written assignment (40%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

*Note: This unit of study assumes the student to be familiar with cross-sectional anatomy images and have knowledge of the fundamental physics of computed tomography (CT)*

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy.

This unit of study develops the knowledge and understanding of computed tomography (CT) as it applies to nuclear medicine. The

focus will be on ensuring quality nuclear medicine CT studies and a high standard of radiation safety. The unit will address radiographic principles and radiation safety; CT instrumentation design and image reconstruction methods; CT scan acquisition and impact of scan parameters on patient dose; attenuation correction and co-registration in nuclear medicine CT systems; and quality control.

Seeram E, Computed Tomography (2nd ed), Elsevier, St Louis (2007)

### MRTY3117

#### Diagnostic Imaging for Rad Therapists Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Mr Mark West **Session:** Semester 2 **Classes:** Off-campus mode: no on-campus attendance required **Assessment:** WebCT discussion (10%), 1500 word assignment (35%), 3000 word assignment (55%) **Campus:** Cumberland **Mode of delivery:** Distance Education

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy.

This unit of study provides the radiation therapist with an understanding and overview of the principles underlying a range of imaging modalities. These modalities include planar radiographs, CT, MRI, SPECT, PET and ultrasound. The advantages and limitations of using each modality in radiation therapy practice will be addressed.

#### Textbooks

Bushong SC, Radiologic Science for Technologists: Physics, Biology and Protection (8th ed), Elsevier, St Louis (2004)

### MRTY3118

#### MR Theory Health Sciences

**Credit points:** 6 **Teacher/Coordinator:** Dr Roger Bourne **Session:** Semester 2 **Classes:** Web-based distance education mode: independent learning package with email support. A non compulsory practical exercise may be conducted on-campus with students to be advised **Assessment:** 2000 word assignment (40%), 3000 word assignment (60%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad, B App Sc (MRS) Nuclear Med, B App Sc (MRS) Rad Thpy.

This unit of study addresses the principles of magnetic resonance imaging. The areas addressed will be image contrast, factors affecting image formation and pulse sequences used from spin echo (SE) to echo planar imaging (EPI). The applications of MRI in medical imaging will be addressed with the effects of signal-to-noise ratio (SNR), fat saturation, artefacts and flow effects being discussed. The biological effects and aspects of patient safety will be included in the unit of study.

### MRTY4032

#### Honours Thesis 1A Health Sciences

**Credit points:** 24 **Session:** Semester 1 **Assessment:** Research proposal (15%), literature review (15%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad Hons, B App Sc (MRS) Nuc Med Hons, B App Sc (MRS) Rad Thpy Hons.

Honours students undertake a supervised research study in an area of medical radiation sciences. Each student will design and implement an approved research study and submit a thesis describing the study and its implications. While completing the research and thesis, each student will work closely with the academic staff member who is their supervisor.

### MRTY4033

#### Honours Thesis 1B Health Sciences

**Credit points:** 24 **Session:** Semester 2 **Assessment:** Assignment (60%), oral presentation (10%) **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad Hons, B App Sc (MRS) Nuc Med Hons, B App Sc (MRS) Rad Thpy Hons.

Honours students undertake a supervised research study in an area of medical radiation sciences. Each student will design and implement an approved research study and submit a thesis describing the study and its implications. While completing the research and thesis, each student will work closely with the academic staff member who is their supervisor.

### MRTY4034

#### Honours Thesis A Health Sciences

**Credit points:** 12 **Session:** Semester 1 **Assessment:** Continuous plus oral and thesis examination. All students must keep to a detailed timeline for each stage of the thesis project **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad Hons, B App Sc (MRS) Nuc Med Hons, B App Sc (MRS) Rad Thpy Hons.

Honours students undertake a supervised research project in an area of medical radiation sciences. Each student will design and implement an approved research project and submit a thesis describing the project and its implications. In completing the research thesis, the student will work closely with the academic staff member who is their supervisor. There are no formal classes but students are required to meet regularly with their supervisor and attend compulsory workshops.

### MRTY4035

#### Honours Thesis B Health Sciences

**Credit points:** 12 **Session:** Semester 2 **Assessment:** Continuous plus oral and thesis examination. All students must keep to a detailed timeline for each stage of the thesis project **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad Hons, B App Sc (MRS) Nuc Med Hons, B App Sc (MRS) Rad Thpy Hons.

Honours students undertake a supervised research project in an area of medical radiation sciences. Each student will design and implement an approved research project and submit a thesis describing the project and its implications. In completing the research thesis, the student will work closely with the academic staff member who is their supervisor. There are no formal classes but students are required to meet regularly with their supervisor and attend compulsory workshops.

### MRTY4036

#### Honours Thesis C Health Sciences

**Credit points:** 12 **Session:** Semester 1 **Assessment:** Continuous plus oral and thesis examination. All students must keep to a detailed timeline for each stage of the thesis project **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad Hons, B App Sc (MRS) Nuc Med Hons, B App Sc (MRS) Rad Thpy Hons.

Honours students undertake a supervised research project in an area of medical radiation sciences. Each student will design and implement an approved research project and submit a thesis describing the project and its implications. In completing the research thesis, the student will work closely with the academic staff member who is their supervisor. There are no formal classes but students are required to meet regularly with their supervisor and attend compulsory workshops.

### MRTY4037

#### Honours Thesis D Health Sciences

**Credit points:** 12 **Session:** Semester 2 **Assessment:** Continuous plus oral and thesis examination. All students must keep to a detailed timeline for each stage of the thesis project **Campus:** Cumberland **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B App Sc (MRS) Diag Rad Hons, B App Sc (MRS) Nuc Med Hons, B App Sc (MRS) Rad Thpy Hons.

Honours students undertake a supervised research project in an area of medical radiation sciences. Each student will design and implement an approved research project and submit a thesis describing the project and its implications. In completing the research thesis, the

student will work closely with the academic staff member who is their supervisor. There are no formal classes but students are required to meet regularly with their supervisor and attend compulsory workshops.

### MSTD1111

#### Foundation Studio A Sydney College of the Arts

**Credit points:** 6 **Teacher/Coordinator:** Oliver Smith, Foundation Coordinator  
**Session:** Semester 1 **Classes:** Lecturer and directed contact over 12 weeks, plus self-directed study; total student effort of 120 hours. **Corequisites:** MSTD1121, FRES1001, MDRW1011 or MDRW1013, THAP1201 and THAP1211  
**Assessment:** A qualitative assessment grade will be allocated at the end of the semester. Students are expected to successfully complete specified stages/projects within the semester, and the combination of these will reflect the final assessment grade. For further information refer to SCA Assessment Criteria. Academic staff will be responsible for end-of-semester assessments and a mid-semester review in Week 7. Where appropriate, guided peer assessment may be employed for some projects. Students are eligible to be assessed if attendance is no less than 90%, and students have submitted all project work. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Associated degrees:** B V A, Visual Arts UG Non-Degree.

The studio program is a project-based, studio-specific program. The studio program is structured to expose students to a diversity of approaches in utilising their chosen studio and its unique qualities.
