## 摘要

新加坡华语教学的现状不容乐观。为此，新加坡教育部进行了一系列改革，新版小学华文教材应运而生。词汇历来是教材设计和编写的一个重要考虑因素。虚词的意义比较空灵，不好把握；同时，虚词又是汉语的主要语法手段，学好虚词至关重要。对新加坡小学华文教材的虚词选编情况进行研究，具有一定的理论意义与实用意义。

本文借鉴二语词汇习得、教材词汇选编与评估和语料库语言学等相关理论，从以下三个方面对两套新加坡小学华文教材（《小学华文》和《小学高级华文》）的虚词选编情况进行研究：

一、分析两套教材虚词总体情况以及共选和独选情况，以考察两套教材虚词的选词规模和难度梯级是否合理；

二、参照对外汉语教学相关的三个大纲，分别从词汇和语法的角度，考察两套教材虚词编排顺序是否合理；

三、从复现率、零复现率虚词分布和首次复现间隔等方面对两套教材虚词复现情况进行比较全面的考察。

最后得出结论，两套教材虚词的编排顺序基本合理，但在选词和复现方面存在不足：两套教材虚词的选词规模均偏小，教材之间虚词难度层级并不明显；两套教材中虚词的复现率低，且首次复现间隔过大，均不利于生词的习得。针对这些不足，本文提出了相应的对策和建议。

## Abstract

The Ministry of Education of Singapore has introduced a string of reforms aimed at boosting Chinese language teaching, as a result of which the new primary Chinese textbooks came into being. Vocabulary has always been one of the chief considerations for textbook design and compilation. Function words, their meaning being somewhat elusive, are harder for learners to grasp. Moreover, grammatical relations in Chinese are largely denoted by function words, the importance of which can't be stressed more. It is meaningful to research into selection and arrangement of function words in primary Chinese textbooks in Singapore, whether in theoretical or practical sense.

Using for reference such related theories as second language vocabulary acquisition, presentation and evaluation of textbook vocabulary and corpus linguistics, this paper deals with selection and arrangement of function words in two sets of Chinese textbooks for primary schools in Singapore, i.e. *Primary Chinese* and *Primary Higher Chinese*, from the following aspects:

1. Function words included in two books are analyzed with a view to comparing word scales and degrees of difficulty.
2. With three syllabuses as a yardstick respectively, arrangement of function words in two sets of textbooks is evaluated from lexical and grammatical perspectives.
3. Recurrence of function words in two sets of textbooks is assessed in light of frequency of recurrence, distribution of function words of non-recurrence, and first recurrence intervals.

Summed up in the conclusion part are merits and demerits, the former being that function words are well arranged in two sets of textbooks, and the latter being that selection and recurrence of function words are yet to be improved. To be specific, function word scales are not large enough and the boundary line of difficulty is not

clear-cut. Frequency of recurrence is mostly below standard and first recurrence intervals are too long, making new words prone to oblivion. Some suggestions are given on how to address these problems.

**Key Words:** Chinese Textbooks; Function Words; Selection and Arrangement;  
Recurrence
