3.	Publicacions amb coautoría UPC/Aalto University.....	12

1. Introducció

1.1. Abast de l'estudi

Abast temàtic

L'estudi recull la publicació científica de la Universitat Politècnica de Catalunya, de totes les àrees d'especialització de la UPC, realitzada en col·laboració amb autors de l'Aalto University.

Els autors de la UPC que s'han considerat, són professors i investigadors vinculats a la UPC en el moment de signar les publicacions incloses a l'informe.

Abast documental

No s'han introduït límits documentals a la cerca. S'han considerat tot tipus de documents científics: articles publicats a revistes, comunicacions a congressos, reviews, material editorial, cartes, etc.

Abast cronològic

No s'han establert límits cronològics a la cerca. La referencia més antiga correspon a un article publicat al 2003. La referencia més recent correspon a un article publicat al 2014.

1.2. Metodologia

Les dades a partir de les quals s'ha elaborat l'informe s'han extret de les bases de dades Scopus i Web of Science (WoS), abastament usades com a eines d'anàlisi bibliomètrica dins del món acadèmic.

Una de les principals dificultats en l'elaboració d'estudis bibliomètrics prenen com a base Scopus o WoS, és la manca generalitzada de normalització als noms d'autors i institucions. És important tenir en compte que totes dues eines mantenen llistats de formes normalitzades de noms d'institucions, però tot i així, les dades que apareixen als registres de Scopus o WoS, són les mateixes que els propis autors i editors van fer constar en els articles, tal i com aquests es van publicar originalment. Com a conseqüència, les institucions sovint apareixen consignades amb diverses variants dels seus noms, circumstància que complica en gran mesura la recuperació exhaustiva d'informació pertinent¹.

¹ En el cas de UPC aquest problema és especialment greu atès que es poden detectar fins a desenes d'aquestes variants.

Per tal de donar una solució a aquest fet, i després d'examinar les especificitats de les institucions acadèmiques que s'analitzen, s'ha decidit aplicar una estratègia única i comuna en la construcció d'algorismes de cerca vàlida per a totes les universitats considerades. L'estratègia de cerca manté, com a principi bàsic, l'obtenció del màxim possible d'ítems per cadascuna de les institucions, sempre i quan no es trenqui la pertinença dels resultats, tot tenint en compte:

- les variants dels noms que s'han recollit són les següents:
 - forma normalitzada a *Essential Science Indicators d'ISI Thomson Reuters i a Scopus (AF-ID)*
 - sigles i abreviatures
 - variants en l'idioma/idiomes oficials
 - variants en anglès
 - altres formes alternatives no normalitzades
- el control dels resultats obtinguts mitjançant la revisió del conjunt de registres recuperat en la cerca.

1.3. Presentació dels resultats

En primer lloc es presenten les principals dades obtingudes: nombre de publicacions realitzades en coautoría; evolució per anys en la publicació en coautoría; distribució per àrees temàtiques, i autors UPC que han publicats articles en coautoría amb l'Aalto University.

A continuación es relacionen les referències de les publicacions realitzades conjuntament per autors vinculats a la UPC i l'Aalto University. Les referències estan ordenades cronològicament de més recent a més antiga.

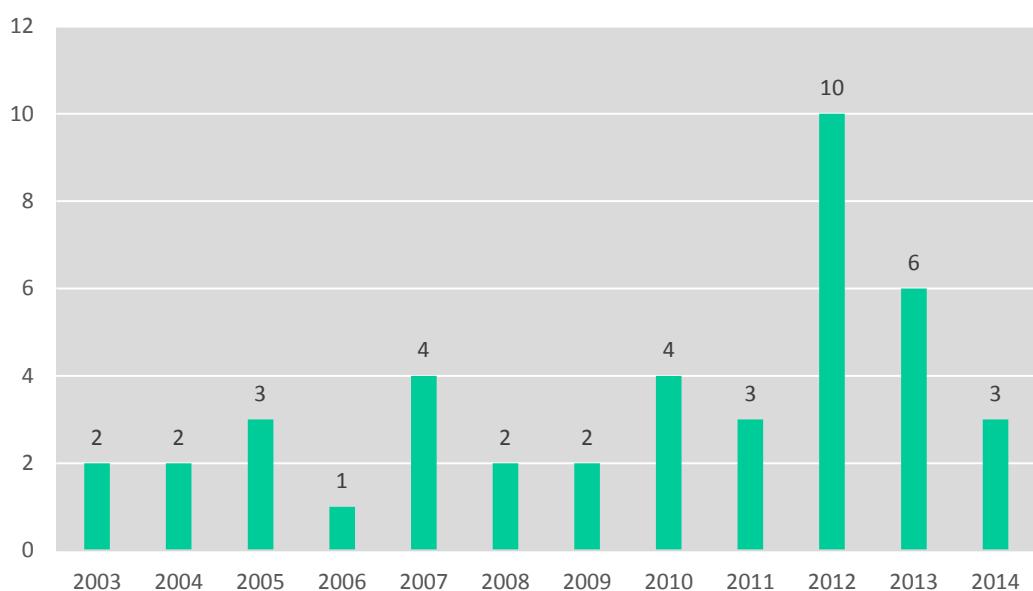

A cada referència s'han destacat en negreta els autors vinculats a la UPC, i en color taronja i els autors de l'Aalto University

2. Dades obtingudes

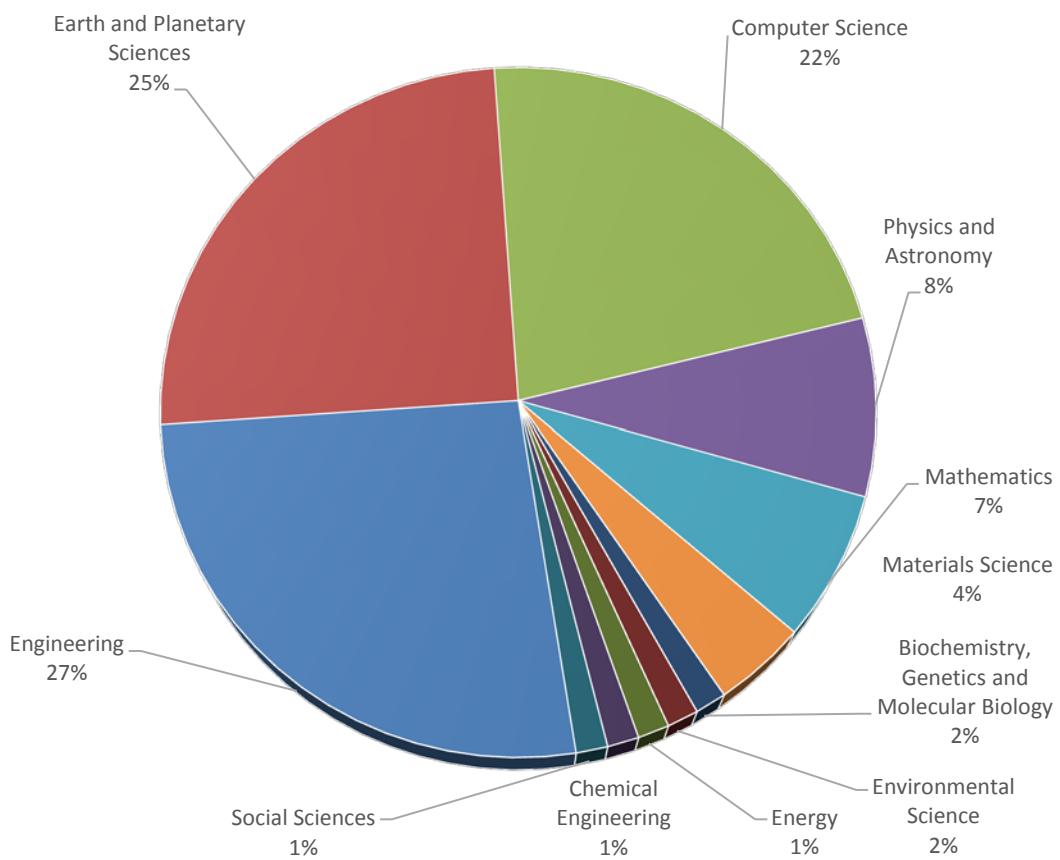

**Nombre de publicacions amb coautoría
