

“Retrieving pattern in a context of sustainable tourism”

6th Conference of International Forum on Urbanism
The new holiday tourism. Tourism and economic development, Responsible Tourism

Authors: Nasiha POZDER, Edin SREBRENICA

“Retrieving pattern in a context of sustainable tourism”

Codes of traditional and un-desecrated landscape:

- priceless values
- continuum and catholicity
- absolute value

- **significant element of development**

• *Keywords: Pattern, sustainable tourism, typicality's*

“Retrieving pattern in a context of sustainable tourism”

**Collapse or misbalance of Codes =
lost of pattern**

**Pattern =
recognizable time or spatial regularity or the connection between
specific elements**

**Sustainable tourism =
appropriate course and strategy to keep retrieved
pattern stable**

- *Keywords: Pattern, sustainable tourism, typicality's*

“Retrieving pattern in a context of sustainable tourism”

“The **essential feature** which **must be maintained** is the **identity** of the system. This **identity** can be defined as that which **distinguishes the system from its background or environment**.

This **allows the emergence** of systems whose **state may change but whose identity is maintained**. “

Batty (2001.)

- *Keywords: **Pattern, sustainable tourism, typicality's***

“Retrieving pattern in a context of sustainable tourism”

Case study: confluences of rivers Drina and Neretva

- readings of pattern
- definition of state
- choosing the model of rehabilitation

- *Keywords: Pattern, sustainable tourism, typicality's*

“Retrieving pattern in a context of sustainable tourism”

Case study:

confluences of rivers Drina and Neretva

Reasons of depaternization:

different circumstances + emigration of population

Chosen method:

urban typology + architectural emblematic elements+natural and ambient datum of environment

- *Keywords: **Pattern, sustainable tourism, typicality's***

“Retrieving pattern in a context of sustainable tourism”

Conclusion:

- **Retrieving of pattern = spatial catalyst** by different aspects, such as **sustainable tourism**
- Chosen and **mapped sites = natural values** and elements of **cultural-historical heritage**, what classifies them as **important resources** for **sustainable tourism**
- Mapped capacities of **rural architecture** and their **location in a broader context** inside **specific regions**, allows implementation of **propagated principle of grid creation**, as a basis for support and **sustainable tourism development**.
