Correction to: BMC Biology 18, 142 (2020)<https://doi.org/10.1186/s12915-020-00862-9>

Following publication of the original article [1], the authors would like to remove the phrase ‘vertically transmitted’ from the last sentence in the fourth paragraph under the heading **Background**.

The sentence originally read:

In addition to serving as crop disease vectors, thrips support vertically transmitted, facultative bacterial symbionts that reside in the hindgut [27, 28].

The sentence should read:

In addition to serving as crop disease vectors, thrips support facultative bacterial symbionts that reside in the hindgut [27, 28].

The original article [1] has been corrected.

Ready to submit your research? Choose BMC and benefit from:

- fast, convenient online submission
- thorough peer review by experienced researchers in your field
- rapid publication on acceptance
- support for research data, including large and complex data types
- gold Open Access which fosters wider collaboration and increased citations
- maximum visibility for your research: over 100M website views per year

At BMC, research is always in progress.
