Dear Dr Tiedeken

FE-2015-00432.R2

Nectar chemistry modulates the impact of an invasive plant on native pollinators
Tiedeken, Erin; Egan, Paul; Stevenson, Philip; Wright, Geraldine; Brown, Mark; Power, Eileen; Farrell, Iain; Matthews, Sharon; Stout, Jane

Thank you for submitting the final version of your paper. This is to let you know that I will send your paper to press shortly.

Your lay summary and photograph will be used to promote your paper following online publication both on the journal website at www.functionalecology.org and on Wiley Online Library.

AUTHOR SERVICES

Production of your article can now be tracked through Wiley-Blackwell Author Services from acceptance through to publication online and in print. Authors can check the status of their articles online and choose to receive automated e-mails at key stages of production. You will receive an e-mail with a unique link that enables you to register and have your article automatically added to the system. The attached document contains important information regarding journal publication and services for authors; you may wish to read this now and/or save it for future reference.

An additional feature of Author Services is that it allows you to nominate up to 10 colleagues to be alerted when your paper goes online and they will get free access to your article. You must register with Author Services to take advantage of this opportunity.

If you are interested in seeing when our accepted papers are published online please consider registering for an e-mail table of contents alert by following the links on our Wiley Online Library webpage at [http://onlinelibrary.wiley.com/journal/10.1111/\(ISSN\)1365-2435](http://onlinelibrary.wiley.com/journal/10.1111/(ISSN)1365-2435)

ACCEPTED ARTICLE ONLINE

As soon as your paper is sent to production it will enter the 'Accepted Article' stage whereby it will be posted online within ~2 working days of acceptance. The paper will appear in its current form before copyediting, typesetting and proofing have been completed. A DOI will be assigned to your paper and it will be citable from this point onwards. At the same time your article will be sent for proofing and you will shortly receive your proofs for approval. The final corrected proof version of your paper will replace the accepted article version on Early View as soon as it is ready and a licence form has been completed. Within the next few days you will receive an email from Wiley's Author Services system which will ask you to log in and you will be presented with the appropriate licence for completion before

the final version of your article is published on Early View.

If your institution is planning a press release for this work, please let us know immediately, so that the accepted version of your paper does not appear online until the press release is ready.

EARLY VIEW

Functional Ecology is covered by Wiley-Blackwell Early View service. Early View articles are complete full-text articles published online in advance of their publication in a printed issue. Articles are therefore available as soon as they are ready, rather than having to wait for the next scheduled print issue. Early View articles are complete and final. They have been fully reviewed, revised and edited for publication, and the author's final corrections have been incorporated. Because they are in their final form, no changes can be made after online publication. The nature of Early View articles means that they do not yet have volume, issue or page numbers, so Early View articles cannot be cited in the traditional way. They are therefore given a Digital Object Identifier (DOI), which allows the article to be cited and tracked before it is allocated to an issue. As soon as your paper has been published you can now post your abstract, plus a link to the article on Wiley Online Library, in your institutional repository or on your home page. Please refer to your licensing agreement regarding re-use of the PDF or full text version of your article. The full text of your article will be freely available after 24 months.

PROOFS

If you have any queries about proofs and publication times you should quote your manuscript reference to Penny Baker, Production Editor, Wiley-Blackwell (Penny.Baker@wiley.com). Proofs will be prepared as an Acrobat PDF (portable document format) file. Unless you have advised us otherwise, a URL and login details for our electronic proofing will be sent to the corresponding author's address as given on the final version of the manuscript. If you are likely to be away for a period of time, please arrange for a colleague to access your e-mail to retrieve the proofs.

We look forward to receiving further work from you in the future.

Yours sincerely,

Jennifer Meyer
Assistant Editor
Functional Ecology

=====
Editorial Office email: admin@functionalecology.org

Functional Ecology is a journal of the British Ecological Society. The British Ecological Society is a limited company, registered in England No. 1522897 and a Registered Charity No. 281213. VAT registration No. 199992863. Information and advice given to members or others by or on behalf of the Society is given on the basis that no liability attaches to the Society, its Council Members, Officers or representatives in respect thereof.
