ASAMUSHI SYMPOSIUM OF MARINE BIOLOGY  
THE SEVENTH YEAR  
SYMPOSIUM ON BIOLOGY OF HYDROZOA AND SCYPHOZOA

The Asamushi Symposium on Marine Biology was initiated in 1958 by the members of the Biological Institute and of the Marine Biological Station of Asamushi of the Tôhoku University as one of the laboratory projects for contributing to the progress of marine biology in Japan.

1958: Experimental Embryology

1959: Marine Ecology

1960: Life Cycle of Marine Animals

1961: Living Organisms of the Antarctic Region

1962: Cultivation of Marine Animals

1963: Fine Structure of Cells and Tissues

The seventh meeting was held on seventh and eighth of September 1968 on the Biology of Hydrozoa and Scyphozoa.

The participants, who are persons having interest in the project including the staff of the Marine Biological Station of Asamushi, were invited to take part.

This symposium was supported by the Foundation in Support of the Marine Biological Station of Asamushi.
