CORRECTIONS TO "PAIRWISE S–NORMAL SPACES" REV. COLOMBIANA MAT. 26 (1992), 25–38

BHAMINI M. P. NAYAR AND S. P. ARYA

University of the District of Columbia

The following corrections are necessary in the paper:

1. Example 2.1.1. is not pairwise normal since $\{0\}$ is τ_1-closed and N is τ_2-closed and a τ_2-open subset containing $\{0\}$ intersects with any τ_1-open set containing N. However, 2.1.1 is an example of a pairwise s-regular pairwise s-regular pairwise semi-T_1 space which is not pairwise s-normal.

2. The topology τ_2 in 1.21 should be $\{\emptyset, X, \{a\}, \{b, c\}\}$.

3. In page 29, where it says semi-τ_1, it should be semi-T_1
