This addendum concerns the paper of the above title found in EJQTDE No. 25 (2008).
There are some misprints in that paper:

(i) Page 3, line 5 should be

$k : [0, 1] \times [0, 1] \rightarrow R_+$ satisfies Carathèodory condition (i.e. measurable in t for all $s \in [0, 1]$
and continuous in s for all $t \in [0, 1]$) such that $\int_0^1 k(t, s)m_2(s)ds$ is bounded $\forall t \in [0, 1]$.

(ii) Page 6, line 6 should be

$k : [0, 1] \times [0, 1] \rightarrow R_+$ satisfies Carathèodory condition (i.e. measurable in s for all $t \in [0, 1]$
and continuous in t for all $s \in [0, 1]$) such that $k(t, s)m_2(s) \in L_1 \forall t \in [0, 1]$.
