

# Beauty Standards

- Eurocentric standards
  - Lighter skin, slender features etc.
  - For men: muscle, style, hair

- Lends to expectations

 New York's Fashion Week - participating models were 82.7% white, 9% Asian, 6% Black, 2% Latinx

- Provides a supportive environment
- Representation of different body types
- Inclusion for every body type

From Buzzfeed

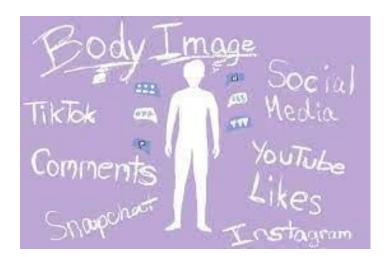

#### The Cons

- Users are typically exposed to thin, fit, and "idealized" body types and will often compare themselves to peers and celebrities.
  - COMPARISON !!!
- Feel pressured to work out/ exercise rigorously

# Discussion Time!

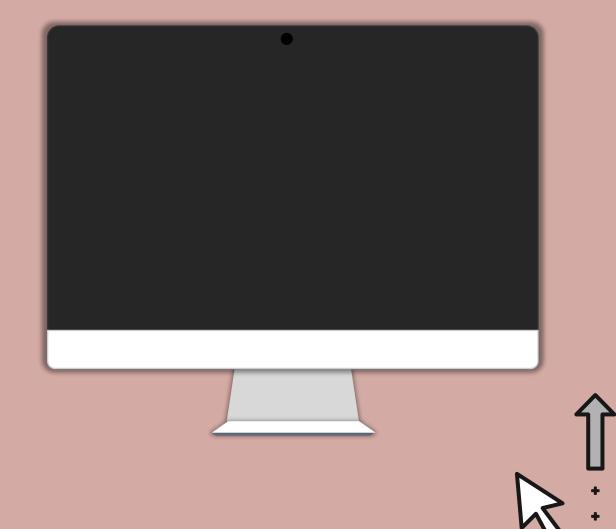

#### **Question 1**

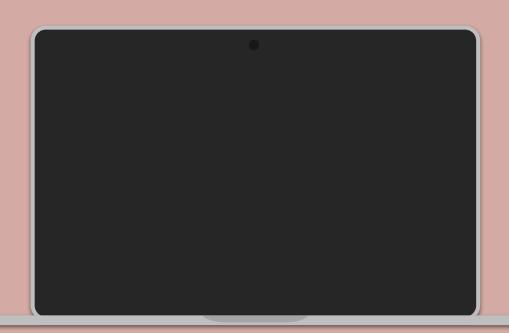

What has your experience been for body perception on social media? Have you experienced any of the pros and/or cons talked about?

SLIDESMANIA.COM

#### **Question 2**

How do you think current representation for body positivity, influencers and celebrities, convey it? How can social media improve this portrayal?

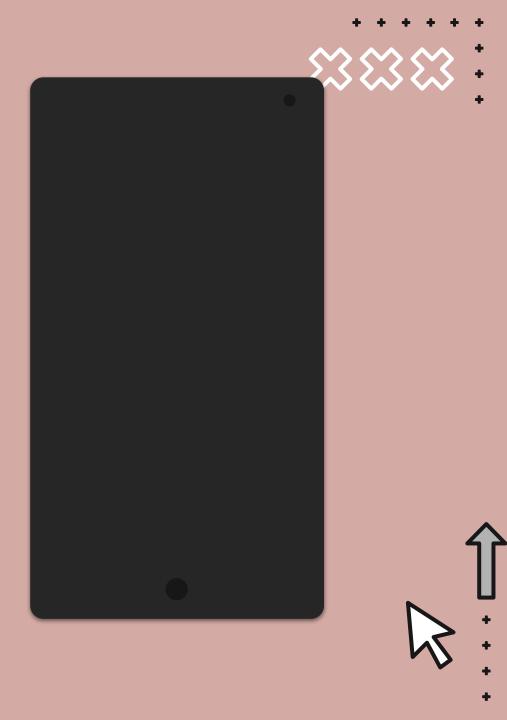

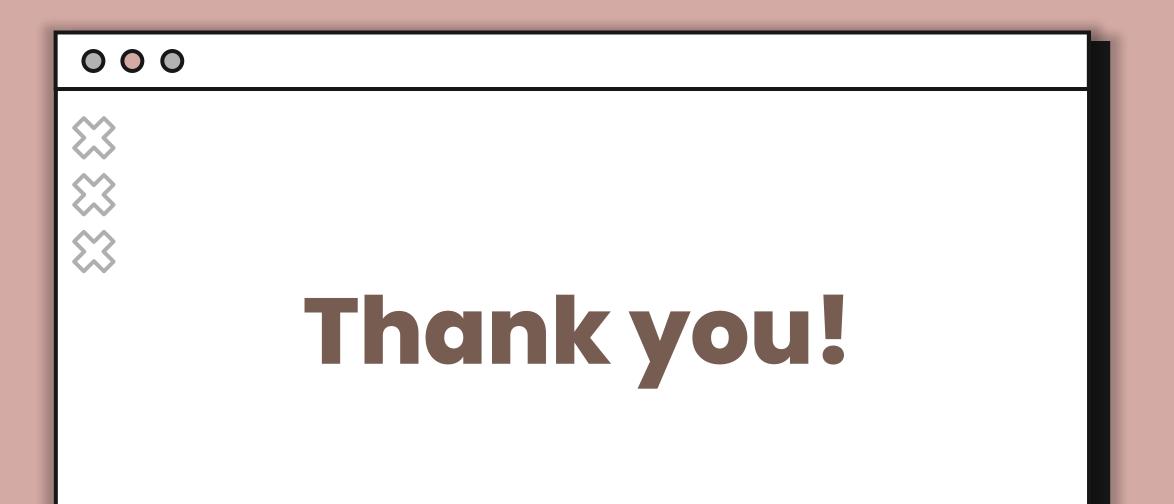

#### **Question 3**

Do you think spreading body positivity on media does more harm than good? Would it be more beneficial if it was completely gotten rid of?
