

Site assessment - DTU Orbit (08/11/2017)

Site assessment

This report describes the site assessment of given position in a given site, for a wind turbine with a well-defined hub height and rotor diameter. The analysis is carried out in accordance to IEC 61400-12-1 [1], and both an obstacle assessment and a terrain assessment are performed.

General information

State: Published

Organisations: Department of Wind Energy, Test and Measurements

Authors: Vesth, A. (Intern), Gómez Arranz, P. (Intern)

Number of pages: 16

Publication date: 2015

Publication information

Publisher: DTU Wind Energy

Original language: English

Series: DTU Wind Energy WTT I

Number: 1116(EN)

Main Research Area: Technical/natural sciences

DTU Wind Energy WTT I-1116(EN), WTT-I-1116, WTT-I-1116(EN)
