

Molecular dynamics computer simulations: A tool for the investigation of amphiphilic systems enzymatic reaction mechanisms on a microscopic level - DTU Orbit (08/11/2017)

Molecular dynamics computer simulations: A tool for the investigation of amphiphilic systems enzymatic reaction mechanisms on a microscopic level

General information

State: Published

Organisations: Department of Chemistry

Authors: Peters, G. H. (Intern), Toxvaerd, S. (Ekstern), Olsen, O. (Ekstern), Svendsen, A. (Ekstern)

Pages: 264-268

Publication date: 1993

Main Research Area: Technical/natural sciences

Publication information

Journal: Tens. Det.

Volume: 30

Original language: English

Publication: Research - peer-review › Journal article – Annual report year: 1993
