

Photonic Downconversion and Optically Controlled Reconfigurable Antennas in mm-waves Wireless Networks - DTU Orbit (08/11/2017)

Photonic Downconversion and Optically Controlled Reconfigurable Antennas in mm-waves Wireless Networks

We report on optically controlled antennas and photonic downconversion for mm-wave wireless communication applications. Experimental results demonstrate a transmission of 1.25 Gb/s using 28 and 38GHz frequency bands

General information

State: Published

Organisations: Department of Photonics Engineering, Metro-Access and Short Range Systems, National Institute of Telecommunications, Federal University of Itajubá

Authors: da Costa, I. F. (Ekstern), Rodríguez Páez, J. S. (Intern), Vegas Olmos, J. J. (Intern), Puerta Ramírez, R. (Intern), Cerqueira S. Jr., A. (Ekstern), da Silva, L. G. (Ekstern), Spadoti, D. H. (Ekstern), Tafur Monroy, I. (Intern)

Number of pages: 3

Publication date: 2016

Host publication information

Title of host publication: Proceedings of 2016 Optical Fiber Communication Conference and Exhibition

Publisher: Optical Society of America (OSA)

ISBN (Print): 9781943580071

Main Research Area: Technical/natural sciences

Conference: 2016 Optical Fiber Communication Conference and Exhibition, Anaheim, California, United States, 20/03/2016 - 20/03/2016

DOIs:

10.1364/OFC.2016.W3K.3

Bibliographical note

From the session: Microwave Photonic Signal Processing II (W3K)
