

Optical Diagnostics of a Gliding Arc Discharge at Atmospheric Pressure - DTU Orbit (08/11/2017)

Optical Diagnostics of a Gliding Arc Discharge at Atmospheric Pressure

General information

State: Published

Organisations: Department of Wind Energy, Composites and Materials Mechanics, National University of Defense Technology, Lund University

Authors: Zhu, J. (Ekstern), Kusano, Y. (Intern), Li, Z. (Ekstern)

Publication date: 2016

Host publication information

Title of host publication: Atmospheric Pressure Plasmas: Processes, Technology and Applications

Publisher: Nova Science Publishers, Incorporated

Editor: Parker, M.

ISBN (Print): 978-1-63485-180-0

Chapter: 2

Series: Physics Research and Technology

Main Research Area: Technical/natural sciences

Publication: Research - peer-review › Book chapter – Annual report year: 2016
