

Asynchronous Free-Space Optical CDMA Communications System for Last-mile Access Network - DTU Orbit (09/11/2017)

Asynchronous Free-Space Optical CDMA Communications System for Last-mile Access Network

We propose a new hybrid asynchronous OCDMA-FSO communications system for access network solutions. New ABER expressions are derived under gamma-gamma scintillation channels, where all users can surprisingly achieve error-free transmissions when FEC is employed.

General information

State: Published

Organisations: Department of Photonics Engineering, Metro-Access and Short Range Systems, Universidade de Sao Paulo, University of Malaga

Authors: Jurado-Navas, A. (Intern), Raddo, T. R. (Ekstern), Sanches, A. L. (Ekstern), Garrido-Balsellss, J. M. (Ekstern), Borges, B. V. (Ekstern), Vegas Olmos, J. J. (Intern), Tafur Monroy, I. (Intern)

Number of pages: 3

Publication date: 2016

Host publication information

Title of host publication: Propagation Through and Characterization of Atmospheric and Oceanic Phenomena.

Publisher: Optical Society of America

Main Research Area: Technical/natural sciences

Conference: Propagation Through and Characterization of Atmospheric and Oceanic Phenomena, Washington DC, United States, 27/06/2016 - 27/06/2016

Bibliographical note

pcAOP, paper TU2A.5
