

Functional Analysis of a Novel Genome-Wide Association Study Signal in SMAD3 That Confers Protection From Coronary Artery Disease - DTU Orbit (09/11/2017)

Functional Analysis of a Novel Genome-Wide Association Study Signal in *SMAD3* That Confers Protection From Coronary Artery Disease

OBJECTIVE—: A recent genome-wide association study meta-analysis identified an intronic single nucleotide polymorphism in *SMAD3*, rs56062135C>T, the minor allele (T) which associates with protection from coronary artery disease. Relevant to atherosclerosis, *SMAD3* is a key contributor to transforming growth factor- β pathway signaling. Here, we seek to identify ≥ 1 causal coronary artery disease-associated single nucleotide polymorphisms at the *SMAD3* locus and characterize mechanisms whereby the risk allele(s) contribute to coronary artery disease risk. **APPROACH AND RESULTS**—: By genetic and epigenetic fine mapping, we identified a candidate causal single nucleotide polymorphism rs17293632C>T (*D'*, 0.97; *r*, 0.94 with rs56062135) in intron 1 of *SMAD3* with predicted functional effects. We show that the sequence encompassing rs17293632 acts as a strong enhancer in human arterial smooth muscle cells. The common allele (C) preserves an activator protein (AP)-1 site and enhancer function, whereas the protective (T) allele disrupts the AP-1 site and significantly reduces enhancer activity (PT single nucleotide polymorphism represents a novel functional cis-acting element at the *SMAD3* locus. The protective (T) allele of rs17293632 disrupts a consensus AP-1 binding site in a *SMAD3* intron 1 enhancer, reduces enhancer activity and *SMAD3* expression, altering human arterial smooth muscle cells proliferation.

General information

State: Published

Organisations: Department of Systems Biology, Center for Biological Sequence Analysis, Integrative Systems Biology

Authors: Turner, A. W. (Ekstern), Martinuk, A. (Ekstern), Silva, A. (Ekstern), Lau, P. (Ekstern), Nikpay, M. (Ekstern), Eriksson, P. (Ekstern), Folkersen, L. (Intern), Perisic, L. (Ekstern), Hedin, U. (Ekstern), Soubeyrand, S. (Ekstern), McPherson, R. (Ekstern)

Number of pages: 11

Pages: 972-983

Publication date: 2016

Main Research Area: Technical/natural sciences

Publication information
