

Water level observations from Unmanned Aerial Vehicles (UAVs) for improving probabilistic estimations of interaction between rivers and groundwater - DTU Orbit (09/11/2017)

Water level observations from Unmanned Aerial Vehicles (UAVs) for improving probabilistic estimations of interaction between rivers and groundwater

General information

State: Published

Organisations: Department of Environmental Engineering, Water Resources Engineering, DHI Denmark, DHI

Authors: Bandini, F. (Intern), Butts, M. (Ekstern), Vammen Jacobsen, T. (Ekstern), Bauer-Gottwein, P. (Intern)

Number of pages: 1

Publication date: 2016

Conference: European Geosciences Union General Assembly 2016, Vienna, Austria, 17/04/2016 - 17/04/2016

Main Research Area: Technical/natural sciences

Publication information

Journal: Geophysical Research Abstracts

Volume: 18

Article number: EGU2016-3144

ISSN (Print): 1607-7962

Ratings:

Web of Science (2014): Indexed yes

ISI indexed (2013): ISI indexed no
