

# Octave-spanning supercontinuum generation in a silicon-rich nitride waveguide - DTU Orbit (08/11/2017)

## Octave-spanning supercontinuum generation in a silicon-rich nitride waveguide

We experimentally show octave-spanning supercontinuum generation in a nonstoichiometric silicon-rich nitride waveguide when pumped by femtosecond pulses from an erbium fiber laser. The pulse energy and bandwidth are comparable to results achieved in stoichiometric silicon nitride waveguides, but our material platform is simpler to manufacture. We also observe wave-breaking supercontinuum generation by using orthogonal pumping in the same waveguide. Additional analysis reveals that the waveguide height is a powerful tuning parameter for generating mid-infrared dispersive waves while keeping the pump in the telecom band.

### General information

State: Published

Organisations: Department of Photonics Engineering, Nanophotonic Devices, Centre of Excellence for Silicon Photonics for Optical Communications, Department of Applied Mathematics and Computer Science , Department of Informatics and Mathematical Modeling, Risø National Laboratory for Sustainable Energy, Chalmers University of Technology

Authors: Liu, X. (Intern), Pu, M. (Intern), Zhou, B. (Intern), Krückel, C. J. (Ekstern), Fülöp, A. (Ekstern), Torres-Company, V. (Ekstern), Bache, M. (Intern)

Pages: 2719-22

Publication date: 2016

Main Research Area: Technical/natural sciences
