Cell derived microvesicles: Novel preparative and characterization methods - DTU Orbit (09/11/2017)

Cell derived microvesicles: Novel preparative and characterization methods

General information

State: Published
Organisations: Department of Micro- and Nanotechnology, Polymer Microsystems for Medical Diagnostics, Statens Serum Institut
Authors: Cherré, S. (Intern), Rozlosnik, N. (Intern), Heegaard, N. H. (Ekstern)
Number of pages: 216
Publication date: 2016

Publication information

Publisher: DTU Nanotech
Original language: English
Main Research Area: Technical/natural sciences
Electronic versions:

20160401_SoleneCherre_PhDthesis_electronic_version_M_IKKEOFFENTLIGG_RES.pdf

Relations

Projects:

Cell derived microvesicles: Novel preparative and characterization methods
