## Abstract

The Library of Congress and the National Endowment for the Humanities (NEH) has created the *Chronicling America: Historic American Newspapers* database containing thousands of digitized newspapers dating from 1836 to 1922. This time is well-suited to research visitor experiences at Mammoth Cave, Kentucky. Students from the Honors Mammoth Cave course created an entry for a national competition to create a web-based data visualization showcasing the type of information and research available through the database. This presentation will highlight the results of student research and their final product.
