A Corrigendum on

Probiotics, Anticipation Stress, and the Acute Immune Response to Night Shift

By West NP, Hughes L, Ramsey R, Zhang P, Martoni CJ, Leyer GJ, Cripps AW and Cox AJ (2021). *Front. Immunol.* 11:599547. doi: 10.3389/fimmu.2020.599547

In the original article, there was a mistake in **Figure 2** as published. The asterisks to denote significance do not appear in the correct place. The corrected **Figure 2** appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

In the published article, there was also an error in affiliation 3. Instead of “United Agricultural Services (UAS) Laboratories, Windsor, WI, United States”, it should be “UAS Laboratories, Windsor, WI, United States”.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

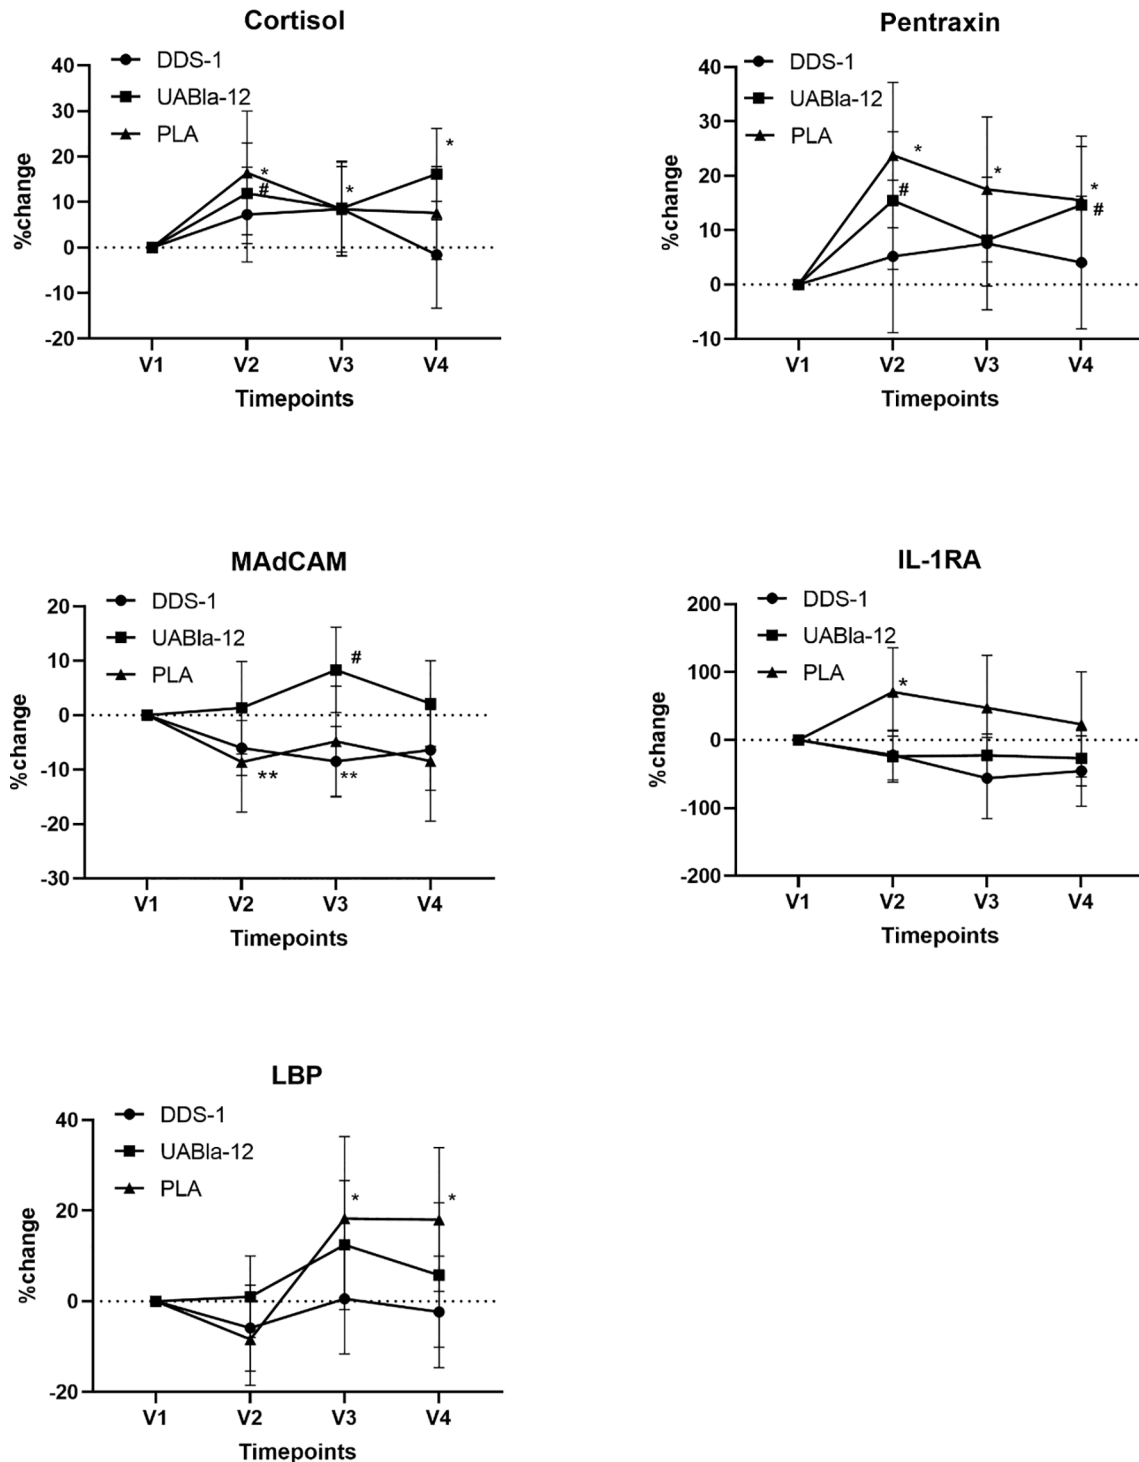

FIGURE 2 | Changes in the concentration of serum analytes over the course of the study. Significantly larger within group changes in the placebo group are evident in all analytes from V1 to V2. Data are % change and 95% CI. The large changes in these analytes while adhering to typical night-day sleep-wake cycle were greater than the effect of nightshift on indices of stress, the acute phase response, serum cytokines and intestinal integrity markers. *significant change from V1 in the placebo group, #significant change from V1 in UABla-12 group. **significance change from V1 in the DDS-1 group.
