Foreword ix

Preface xi

Acknowledgments xiii

A Brief History of Qt xv

Part I: Basic Qt

1. Getting Started 3
- Hello Qt 3
- Making Connections 5
- Laying Out Widgets 6
- Using the Reference Documentation 9

2. Creating Dialogs 13
- Subclassing QDialog 13
- Signals and Slots in Depth 20
- Rapid Dialog Design 23
- Shape-Changing Dialogs 29
- Dynamic Dialogs 36
- Built-in Widget and Dialog Classes 37

3. Creating Main Windows 43
- Subclassing QMainWindow 44
- Creating Menus and Toolbars 48
- Setting Up the Status Bar 52
- Implementing the File Menu 54
- Using Dialogs 61
- Storing Settings 67
- Multiple Documents 68
- Splash Screens 71

4. Implementing Application Functionality 73
The Central Widget 73
Subclassing QTableWidget 74
Loading and Saving 80
Implementing the Edit Menu 83
Implementing the Other Menus 87
Subclassing QTableWidgetItem 91

5. Creating Custom Widgets 101
Customizing Qt Widgets 101
Subclassing QWidget 103
Integrating Custom Widgets with Qt Designer 113
Double Buffering 116

Part II: Intermediate Qt

6. Layout Management 137
Laying Out Widgets on a Form 137
Stacked Layouts 143
Splitters 145
Scrolling Areas 148
Dock Widgets and Toolbars 150
Multiple Document Interface 152

7. Event Processing 163
Reimplementing Event Handlers 163
Installing Event Filters 168
Staying Responsive During Intensive Processing 171

8. 2D and 3D Graphics 175
Painting with QPainter 175
Painter Transformations 180
High-Quality Rendering with QImage 188
Printing 190
Graphics with OpenGL 198

9. Drag and Drop 205
Enabling Drag and Drop 205
Supporting Custom Drag Types 210
Clipboard Handling 215

10. Item View Classes 217
Using the Item View Convenience Classes 218
Using Predefined Models 225
Implementing Custom Models 230
Implementing Custom Delegates 244

11. Container Classes 251
Sequential Containers 252
Associative Containers 260
Generic Algorithms 263
Strings, Byte Arrays, and Variants 265

12. Input/Output 273
Reading and Writing Binary Data 274
Reading and Writing Text 279
Traversing Directories 285
Embedding Resources 286
Inter-Process Communication 287

13. Databases 293
Connecting and Querying 294
Presenting Data in Tabular Form 299
Implementing Master–Detail Forms 304

14. Networking 311
Writing FTP Clients 311
Writing HTTP Clients 320
Writing TCP Client–Server Applications 323
Sending and Receiving UDP Datagrams 333

15. XML 339
Reading XML with SAX 339
Reading XML with DOM 344
Writing XML 348

16. Providing Online Help 351
Tooltips, Status Tips, and "What's This?" Help 351
Using QTextBrowser as a Simple Help Engine 353
Using Qt Assistant for Powerful Online Help 356

Part III: Advanced Qt

17. Internationalization 361
Working with Unicode 362
Making Applications Translation-Aware 365
Dynamic Language Switching 371
Translating Applications 376

18. Multithreading 381
Creating Threads 381
Synchronizing Threads 385
Communicating with the Main Thread 391
Using Qt's Classes in Secondary Threads 396

19. Creating Plugins 399
Extending Qt with Plugins 400
Making Applications Plugin-Aware 408
Writing Application Plugins 412

20. Platform-Specific Features 415
Interfacing with Native APIs 415
Using ActiveX on Windows 419
Handling X11 Session Management 431

21. Embedded Programming 439
Getting Started with Qtopia 440
Customizing Qtopia Core 441

Appendices

A. Installing Qt 447

B. Introduction to C++ for Java and C# Programmers 451

Index 493
