

## XXIX. NETWORK SYNTHESIS

Prof. E. A. Guillemin  
S. G. Chamberlain

V. K. Prabhu  
W. C. Schwab

### RESEARCH OBJECTIVES

As expressed in last year's research objectives (Quarterly Progress Report No. 64, page 337), the further development of an approach to synthesis, which was started during the past two years, will continue during this and for several more years, inasmuch as many collateral problems are generated in the process of working out essential steps in this new method of network synthesis.

E. A. Guillemin
