

Python Programming for the Absolute Beginner Second Edition

MICHAEL DAWSON

THOMSON

COURSE TECHNOLOGY

Professional ■ Technical ■ Reference

CONTENTS

CHAPTER 1	GETTING STARTED: THE GAME OVER PROGRAM.....	1
	Examining the Game Over Program.....	2
	Introducing Python.....	3
	Python Is Easy to Use.....	3
	Python Is Powerful.....	3
	Python Is Object Oriented.....	4
	Python Is a “Glue” Language.....	4
	Python Runs Everywhere.....	4
	Python Has a Strong Community.....	4
	Python Is Free and Open Source.....	5
	Setting Up Python on Windows.....	5
	Installing Python on Windows.....	5
	Setting Up Python on Other Operating Systems.....	6
	Introducing the Python IDLE.....	7
	Programming in Interactive Mode.....	7
	Programming in Script Mode.....	10
	Back to the Game Over Program.....	12
	Using Comments.....	13
	Using Blank Lines.....	14
	Printing the String.....	14
	Waiting for the User.....	14
	Summary.....	15
CHAPTER 2	TYPES, VARIABLES, AND SIMPLE I/O: THE USELESS TRIVIA PROGRAM.....	17
	Introducing the Useless Trivia Program.....	18
	Using Quotes with Strings.....	18
	Introducing the Game Over 2.0 Program.....	18
	Using Quotes inside Strings.....	20
	Continuing a Statement on the Next Line.....	20
	Creating Triple-Quoted Strings.....	21
	Using Escape Sequences with Strings.....	22

Introducing the Fancy Credits Program.....	22
Sounding the System Bell.....	23
Moving Forward a Tab Stop.....	23
Printing a Backslash.....	23
Inserting a Newline.....	24
Inserting a Quote.....	24
Concatenating and Repeating Strings.....	25
Introducing the Silly Strings Program.....	25
Concatenating Strings.....	26
Suppressing a Newline.....	27
Repeating Strings.....	27
Working with Numbers.....	28
Introducing the Word Problems Program.....	28
Understanding Numeric Types.....	30
Using Mathematical Operators.....	30
Understanding Variables.....	32
Introducing the Greeter Program.....	32
Creating Variables.....	33
Using Variables.....	34
Naming Variables.....	34
Getting User Input.....	35
Introducing the Personal Greeter Program.....	35
Using the <code>raw_input()</code> Function.....	36
Using String Methods.....	37
Introducing the Quotation Manipulation Program.....	37
Creating New Strings with String Methods.....	38
Using the Right Types.....	40
Introducing the Trust Fund Buddy-Bad Program.....	41
Tracking Down Logical Errors.....	42
Converting Values.....	43
Introducing the Trust Fund Buddy-Good Program.....	43
Converting Strings to Integers.....	44
Using Augmented Assignment Operators.....	45
Printing Strings and Numbers Together.....	46
Back to the Useless Trivia Program.....	47
Creating the Initial Comments.....	47
Getting the User Input.....	47
Printing Lowercase and Uppercase Versions of <code>name</code>	48
Calculating <code>dog_years</code>	48
Calculating seconds.....	48
Printing <code>name</code> Five Times.....	49
Calculating <code>moon_weight</code> and <code>sun_weight</code>	49
Waiting for the User.....	49
Summary.....	49

CHAPTER 3	BRANCHING, while LOOPS, AND PROGRAM PLANNING: THE GUESS MY NUMBER GAME.....	51
	Introducing the Guess My Number Game.....	52
	Generating Random Numbers.....	52
	Introducing the Craps Roller Program.....	52
	Using the import Statement.....	53
	Accessing randrange().....	54
	Using randrange().....	54
	Using the if Structure.....	55
	Introducing the Password Program.....	55
	Examining the if Structure	56
	Creating Conditions.....	57
	Understanding Comparison Operators.....	57
	Using Indentation to Create Blocks.....	58
	Building Your Own if Structure.....	59
	Using the if-else Structure.....	59
	Introducing the Granted or Denied Program	59
	Examining the else Statement.....	60
	Using the if-elif-else Structure.....	61
	Introducing the Mood Computer Program.....	61
	Examining the if-elif-else Structure.....	63
	Creating while Loops.....	65
	Introducing the Three-Year-Old Simulator Program.....	65
	Examining the while Structure.....	66
	Initializing the Sentry Variable.....	67
	Checking the Sentry Variable	67
	Updating the Sentry Variable.....	68
	Avoiding Infinite Loops.....	68
	Introducing the Losing Battle Program.....	68
	Tracing the Program.....	70
	Creating Conditions That Can Become False.....	71
	Treating Values as Conditions.....	72
	Introducing the Maitre D' Program.....	72
	Interpreting Any Value as True or False.....	73
	Creating Intentional Infinite Loops.....	74
	Introducing the Finicky Counter Program.....	74
	Using the break Statement to Exit a Loop.....	75
	Using the continue Statement to Jump Back to the Top of a Loop.....	75
	Understanding When to Use break and continue.....	76
	Using Compound Conditions.....	76
	Introducing the Exclusive Network Program.....	76
	Understanding the not Logical Operator.....	79
	Understanding the and Logical Operator.....	80
	Understanding the or Logical Operator.....	81

- Planning Your Programs..... 82
 - Creating Algorithms with Pseudocode..... 82
 - Applying Stepwise Refinement to Your Algorithms..... 83
- Returning to the Guess My Number Game..... 83
 - Planning the Program..... 84
 - Creating the Initial Comment Block..... 85
 - Importing the random Module..... 85
 - Explaining the Game..... 85
 - Setting the Initial Values..... 85
 - Creating a Guessing Loop..... 86
 - Congratulating the Player..... 86
 - Waiting for the Player to Quit..... 86
- Summary..... 86

CHAPTER 4 for LOOPS, STRINGS, AND TUPLES: THE WORD JUMBLE GAME..... 89

- Introducing the Word Jumble Game..... 90
- Using for Loops..... 90
 - Introducing the Loopy String Program..... 90
 - Understanding for Loops..... 91
 - Creating a for Loop..... 92
- Counting with a for Loop..... 92
 - Introducing the Counter Program..... 92
 - Counting Forwards..... 94
 - Counting by Fives..... 94
 - Counting Backwards..... 95
- Using Sequence Operators and Functions with Strings..... 95
 - Introducing the Message Analyzer Program..... 95
 - Using the len() Function..... 96
 - Using the in Operator..... 97
- Indexing Strings..... 97
 - Introducing the Random Access Program..... 98
 - Working with Positive Position Numbers..... 99
 - Working with Negative Position Numbers..... 100
 - Accessing a Random String Element..... 101
- Understanding String Immutability..... 101
- Building a New String..... 103
 - Introducing the No Vowels Program..... 103
 - Creating Constants..... 104
 - Creating New Strings from Existing Ones..... 105
- Slicing Strings..... 106
 - Introducing the Pizza Slicer Program..... 106
 - Introducing None..... 108

Understanding Slicing.....	108
Creating Slices.....	109
Using Slicing Shorthand.....	110
Creating Tuples.....	110
Introducing the Hero's Inventory Program.....	111
Creating an Empty Tuple.....	112
Treating a Tuple as a Condition.....	112
Creating a Tuple with Elements.....	113
Printing a Tuple.....	113
Looping Through a Tuple's Elements.....	113
Using Tuples.....	114
Introducing the Hero's Inventory 2.0.....	114
Setting Up the Program.....	115
Using the len() Function with Tuples.....	115
Using the in Operator with Tuples.....	116
Indexing Tuples.....	116
Slicing Tuples.....	116
Understanding Tuple Immutability.....	117
Concatenating Tuples.....	117
Back to the Word Jumble Game.....	118
Setting Up the Program.....	118
Planning the Jumble Creation Section.....	119
Creating an Empty Jumble String.....	119
Setting Up the Loop.....	119
Generating a Random Position in word.....	120
Creating a New Version of jumble.....	120
Creating a New Version of word.....	120
Welcoming the Player.....	120
Getting the Player's Guess.....	121
Congratulating the Player.....	121
Ending the Game.....	121
Summary.....	121

CHAPTER 5 **LISTS AND DICTIONARIES: THE HANGMAN GAME 123**

Introducing the Hangman Game.....	124
Using Lists.....	125
Introducing the Hero's Inventory 3.0 Program.....	125
Creating a List.....	126
Using the len() Function with Lists.....	127
Using the in Operator with Lists.....	127
Indexing Lists.....	127
Slicing Lists.....	127
Concatenating Lists.....	128

- Understanding List Mutability..... 128
- Assigning a New List Element by Index..... 128
- Assigning a New List Slice..... 129
- Deleting a List Element..... 129
- Deleting a List Slice..... 130
- Using List Methods..... 130
 - Introducing the High Scores Program 130
 - Setting Up the Program..... 131
 - Displaying the Menu..... 131
 - Exiting the Program..... 132
 - Displaying the Scores..... 132
 - Adding a Score..... 132
 - Removing a Score..... 133
 - Sorting the Scores..... 133
 - Reversing the Scores..... 134
 - Dealing with an Invalid Choice..... 134
 - Waiting for the User..... 134
- Understanding When to Use Tuples Instead of Lists..... 135
- Using Nested Sequences..... 135
 - Introducing the High Scores 2.0 Program..... 135
 - Creating Nested Sequences..... 136
 - Accessing Nested Elements..... 137
 - Unpacking a Sequence..... 138
 - Setting Up the Program..... 138
 - Displaying the Scores by Accessing Nested Tuples..... 139
 - Adding a Score by Appending a Nested Tuple..... 139
 - Dealing with an Invalid Choice..... 139
 - Waiting for the User..... 140
- Understanding Shared References..... 140
- Using Dictionaries..... 142
 - Introducing the Geek Translator Program..... 143
 - Creating Dictionaries..... 143
 - Accessing Dictionary Values..... 144
 - Setting Up the Program..... 146
 - Getting a Value..... 147
 - Adding a Key-Value Pair..... 147
 - Replacing a Key-Value Pair..... 148
 - Deleting a Key-Value Pair..... 149
 - Wrapping Up the Program..... 149
 - Understanding Dictionary Requirements..... 150
- Back to the Hangman Game..... 150
 - Setting Up the Program..... 151
 - Creating Constants..... 151
 - Initializing the Variables..... 154

Creating the Main Loop.....	155
Getting the Player's Guess.....	155
Checking the Guess.....	156
Ending the Game.....	156
Summary.....	157

CHAPTER 6 FUNCTIONS: THE TIC-TAC-TOE GAME..... 159

Introducing the Tic-Tac-Toe Game.....	160
Creating Functions.....	161
Introducing the Instructions Program.....	161
Defining a Function.....	163
Documenting a Function.....	164
Calling a Programmer-Created Function.....	164
Understanding Abstraction.....	164
Using Parameters and Return Values.....	165
Introducing the Receive and Return Program.....	165
Receiving Information through Parameters.....	166
Returning Information through Return Values.....	167
Understanding Encapsulation.....	167
Receiving and Returning Values in the Same Function.....	168
Understanding Software Reuse.....	169
Using Keyword Arguments and Default Parameter Values.....	169
Introducing the Birthday Wishes Program.....	170
Using Positional Parameters and Positional Arguments.....	171
Using Positional Parameters and Keyword Arguments.....	171
Using Default Parameter Values.....	172
Using Global Variables and Constants.....	174
Understanding Scopes.....	174
Introducing the Global Reach Program.....	175
Reading a Global Variable from Inside a Function.....	176
Shadowing a Global Variable from Inside a Function.....	177
Changing a Global Variable from Inside a Function.....	177
Understanding When to Use Global Variables and Constants.....	178
Back to the Tic-Tac-Toe Game.....	178
Planning the Tic-Tac-Toe Game.....	178
Setting Up the Program.....	180
The <code>display_instruct()</code> Function.....	181
The <code>ask_yes_no()</code> Function.....	182
The <code>ask_number()</code> Function.....	182
The <code>pieces()</code> Function.....	183
The <code>new_board()</code> Function.....	183
The <code>display_board()</code> Function.....	183
The <code>legal_moves()</code> Function.....	184

The winner() Function.....	184
The human_move() Function.....	185
The computer_move() Function.....	186
The next_turn() Function.....	189
The congrat_winner() Function.....	189
The main() Function.....	190
Starting the Program.....	191
Summary.....	191

CHAPTER 7	FILES AND EXCEPTIONS: THE TRIVIA CHALLENGE GAME.....	193
	Introducing the Trivia Challenge Game.....	194
	Reading from Text Files.....	194
	Introducing the Read It Program.....	194
	Opening and Closing a Text File.....	197
	Reading Characters from a Text File.....	198
	Reading Characters from a Line	199
	Reading All Lines into a List.....	200
	Looping through a Text File.....	201
	Writing to a Text File.....	201
	Introducing the Write It Program.....	201
	Writing Strings to a Text File.....	202
	Writing a List of Strings to a Text File.....	203
	Storing Complex Data in Files.....	204
	Introducing the Pickle It Program.....	204
	Pickling Data and Writing It to a File.....	205
	Reading Data from a File and Unpickling It.....	206
	Using a Shelf to Store Pickled Data.....	207
	Using a Shelf to Retrieve Pickled Data.....	209
	Handling Exceptions.....	209
	Introducing the Handle It Program.....	210
	Using a try Statement with an except Clause.....	210
	Specifying an Exception Type.....	211
	Handling Multiple Exception Types.....	212
	Getting an Exception's Argument.....	213
	Adding an else Clause.....	214
	Back to the Trivia Challenge Game.....	214
	Understanding the Data File Layout.....	214
	The open_file() Function.....	216
	The next_line() Function.....	217
	The next_block() Function.....	217
	The welcome() Function.....	218
	Setting Up the Game.....	218

Asking a Question.....	218
Getting an Answer.....	219
Checking an Answer.....	219
Getting the Next Question.....	219
Ending the Game.....	219
Starting the main() Function.....	220
Summary.....	220

CHAPTER 8	SOFTWARE OBJECTS: THE CRITTER CARETAKER PROGRAM.....	221
	Introducing the Critter Caretaker Program.....	222
	Understanding Object-Oriented Basics.....	223
	Creating Classes, Methods, and Objects.....	224
	Introducing the Simple Critter Program.....	224
	Defining a Class.....	225
	Defining a Method.....	226
	Instantiating an Object.....	226
	Invoking a Method.....	226
	Using Constructors.....	227
	Introducing the Constructor Critter Program.....	227
	Creating a Constructor.....	228
	Creating Multiple Objects.....	228
	Using Attributes.....	229
	Introducing the Attribute Critter Program.....	229
	Initializing Attributes.....	230
	Accessing Attributes.....	231
	Printing an Object.....	232
	Using Class Attributes and Static Methods.....	233
	Introducing the Classy Critter Program.....	233
	Creating a Class Attribute.....	235
	Accessing a Class Attribute.....	235
	Creating a Static Method.....	236
	Invoking a Static Method.....	236
	Understanding Object Encapsulation.....	237
	Using Private Attributes and Private Methods.....	237
	Introducing the Private Critter Program.....	237
	Creating Private Attributes.....	238
	Accessing Private Attributes.....	238
	Creating Private Methods.....	240
	Accessing Private Methods.....	240
	Respecting an Object's Privacy.....	241
	Understanding When to Implement Privacy.....	241
	Understanding New-Style and Old-Style Classes.....	242

Controlling Attribute Access.....	242
Introducing the Property Critter.....	242
Using Get Methods.....	243
Using Set Methods.....	244
Using Properties.....	244
Back to the Critter Caretaker Program.....	246
The Critter Class.....	247
Creating the Critter.....	249
Creating a Menu System.....	249
Starting the Program.....	250
Summary.....	250

CHAPTER 9 OBJECT-ORIENTED PROGRAMMING: THE BLACKJACK GAME..... 253

Introducing the Blackjack Game.....	254
Sending and Receiving Messages	254
Introducing the Alien Blaster Program.....	255
Sending a Message.....	257
Receiving a Message.....	257
Combining Objects.....	257
Introducing the Playing Cards Program.....	257
Creating the Card Class.....	258
Creating the Hand Class.....	259
Using Card Objects.....	260
Combining Card Objects Using a Hand Object.....	260
Using Inheritance to Create New Classes.....	261
Extending a Class through Inheritance.....	262
Introducing the Playing Cards 2.0 Program.....	262
Creating a Base Class.....	263
Inheriting from a Base Class.....	264
Extending a Derived Class.....	265
Using the Derived Class.....	266
Altering the Behavior of Inherited Methods.....	268
Introducing the Playing Cards 3.0 Program.....	268
Creating a Base Class.....	269
Overriding Base Class Methods.....	269
Invoking Base Class Methods.....	270
Using the Derived Classes.....	272
Understanding Polymorphism.....	273
Creating Modules.....	273
Introducing the Simple Game Program.....	273
Writing Modules.....	274
Importing Modules.....	275

Using Imported Functions and Classes.....	276
Back to the Blackjack Game.....	277
The cards Module.....	277
Designing the Classes.....	279
Writing Pseudocode for the Game Loop.....	280
Importing the cards and games Modules.....	281
The BJ_Card Class.....	281
The BJ_Deck Class.....	282
The BJ_Hand Class.....	282
The BJ_Player Class.....	284
The BJ_Dealer Class.....	285
The BJ_Game Class.....	285
The main() Function.....	288
Summary.....	289

CHAPTER 10 **GUI DEVELOPMENT: THE MAD LIB PROGRAM..... 291**

Introducing the Mad Lib Program.....	292
Examining a GUI.....	294
Understanding Event-Driven Programming.....	295
Using a Root Window.....	296
Introducing the Simple GUI Program.....	296
Importing the Tkinter Module.....	298
Creating a Root Window.....	298
Modifying a Root Window.....	298
Entering a Root Window's Event Loop.....	299
Using Labels.....	299
Introducing the Labeler Program.....	299
Setting Up the Program.....	299
Creating a Frame.....	300
Creating a Label.....	300
Entering the Root Window's Event Loop.....	300
Using Buttons.....	301
Introducing the Lazy Buttons Program.....	301
Setting Up the Program.....	301
Creating Buttons.....	302
Entering the Root Window's Event Loop.....	303
Creating a GUI Using a Class.....	303
Introducing the Lazy Buttons 2 Program.....	303
Importing the Tkinter Module.....	303
Defining the Application Class.....	304
Defining a Constructor Method.....	304
Defining a Method to Create the Widgets.....	304
Creating the Application Object.....	305

- Binding Widgets and Event Handlers..... 305
 - Introducing the Click Counter Program..... 305
 - Setting Up the Program..... 306
 - Binding the Event Handler..... 306
 - Creating the Event Handler..... 307
 - Wrapping Up the Program..... 307
- Using Text and Entry Widgets and the Grid Layout Manager..... 307
 - Introducing the Longevity Program..... 308
 - Setting Up the Program..... 309
 - Placing a Widget with the Grid Layout Manager..... 309
 - Creating an Entry Widget..... 310
 - Creating a Text Widget..... 311
 - Getting and Inserting Text with Text-Based Widgets..... 311
 - Wrapping Up the Program..... 313
- Using Check Buttons..... 313
 - Introducing the Movie Chooser Program..... 313
 - Setting Up the Program..... 314
 - Allowing a Widget's Master to Be Its Only Reference..... 314
 - Creating Check Buttons..... 315
 - Getting the Status of a Check Button..... 316
 - Wrapping Up the Program..... 317
- Using Radio Buttons..... 317
 - Introducing the Movie Chooser 2 Program..... 317
 - Setting Up the Program..... 318
 - Creating Radio Buttons..... 319
 - Getting a Value from a Group of Radio Buttons..... 320
 - Wrapping Up the Program..... 321
- Back to the Mad Lib Program..... 321
 - Importing the Tkinter Module..... 321
 - The Application Class's Constructor Method..... 321
 - The Application Class's create_widgets() Method..... 322
 - The Application Class's tell_story() Method..... 324
 - The Main Part of the Program..... 325
- Summary..... 325

CHAPTER 11 GRAPHICS: THE PIZZA PANIC GAME..... 327

- Introducing the Pizza Panic Game..... 328
- Introducing the pygame and livewires Packages..... 329
- Creating a Graphics Window..... 330
 - Introducing the New Graphics Window Program..... 330
 - Importing the games Module..... 331
 - Initializing the Graphics Screen..... 332
 - Starting the Main Loop..... 332

Setting a Background Image.....	333
Introducing the Background Image Program.....	333
Loading an Image.....	334
Setting the Background.....	334
Understanding the Graphics Coordinate System.....	335
Displaying a Sprite.....	336
Introducing the Pizza Sprite Program.....	336
Loading an Image for a Sprite.....	338
Creating a Sprite.....	339
Adding a Sprite to the Screen.....	339
Displaying Text.....	341
Introducing the Big Score Program.....	341
Importing the color Module.....	342
Creating a Text Object.....	342
Adding a Text Object to the Screen.....	343
Displaying a Message.....	343
Introducing the You Won Program.....	343
Importing the color Module.....	345
Creating a Message Object.....	345
Using the Screen's Width and Height.....	346
Adding a Message Object to the Screen.....	346
Moving Sprites.....	346
Introducing the Moving Pizza Program.....	346
Setting a Sprite's Velocity Values.....	348
Dealing with Screen Boundaries.....	348
The Bouncing Pizza Program.....	348
Setting Up the Program.....	349
Deriving a New Class from Sprite	349
Overriding the update() Method.....	350
Wrapping Up the Program.....	350
Handling Mouse Input.....	351
Introducing the Moving Pan Program.....	351
Setting Up the Program.....	351
Reading Mouse X- and Y-Coordinates.....	352
Setting Mouse Pointer Visibility.....	353
Grabbing Input to the Graphics Window.....	353
Wrapping Up the Program.....	354
Detecting Collisions.....	354
Introducing the Slippery Pizza Program.....	354
Setting Up the Program.....	356
Detecting Collisions.....	356
Handling Collisions.....	356
Wrapping Up the Program.....	357
Back to the Pizza Panic Game.....	358

Setting Up the Program..... 358
 The Pan Class..... 358
 The Pizza Class..... 360
 The Chef Class..... 362
 The main() Function 364
 Summary..... 365

CHAPTER 12

**SOUND, ANIMATION, AND PROGRAM DEVELOPMENT:
 THE ASTROCRASH GAME..... 367**

Introducing the Astrocrash Game..... 368
 Reading the Keyboard..... 369
 Introducing the Read Key Program..... 369
 Setting Up the Program..... 370
 Testing for Keystrokes..... 370
 Wrapping Up the Program..... 372
 Rotating a Sprite..... 372
 Introducing the Rotate Sprite Program..... 372
 Using a Sprite's angle Property..... 374
 Creating an Animation..... 375
 Introducing the Explosion Program..... 375
 Examining the Explosion Images..... 375
 Setting Up the Program..... 376
 Creating a List of Image Files..... 376
 Creating an Animation Object..... 377
 Working with Sound and Music..... 378
 Introducing the Sound and Music Program..... 378
 Working with Sounds..... 378
 Working with Music..... 381
 Wrapping Up the Program..... 382
 Planning the Astrocrash Game..... 383
 Game Features..... 383
 Game Classes..... 384
 Game Assets..... 384
 Creating Asteroids..... 384
 The Astrocrash01 Program..... 384
 Setting Up the Program..... 385
 The Asteroid Class..... 385
 The main() Function..... 387
 Rotating the Ship..... 388
 The Astrocrash02 Program..... 388
 The Ship Class..... 388
 Instantiating a Ship Object..... 389
 Moving the Ship..... 389

The Astrocrash03 Program.....	389
Importing the math Module.....	390
Adding Ship Class Variable and Constant.....	390
Modifying Ship's update() Method.....	391
Firing Missiles.....	392
The Astrocrash04 Program.....	392
Modifying Ship's update() Method.....	392
The Missile Class.....	393
Controlling the Missile Fire Rate.....	396
The Astrocrash05 Program.....	396
Adding a Ship Class Constant.....	396
Creating Ship's Constructor Method.....	397
Modifying Ship's update() Method.....	397
Handling Collisions.....	397
The Astrocrash06 Program.....	398
Modifying Missile's update() Method.....	399
Adding Missile's die() Method.....	399
Modifying Ship's update() Method.....	399
Adding Ship's die() Method.....	399
Adding an Asteroid Class Constant.....	400
Adding Asteroid's die() Method.....	400
Adding Explosions.....	400
The Astrocrash07 Program.....	400
The Wrapper Class.....	401
The Collider Class.....	402
Modifying the Asteroid Class.....	403
Modifying the Ship Class.....	403
Modifying the Missile Class.....	404
The Explosion Class.....	404
Adding Levels, Scorekeeping, and Theme Music.....	405
The Astrocrash08 Program.....	405
Importing the color Module.....	406
The Game Class.....	406
Adding an Asteroid Class Variable and Constant.....	411
Modifying Asteroid's Constructor Method.....	411
Modifying Asteroid's die() Method.....	412
Adding a Ship Class Constant.....	412
Modifying Ship's Constructor Method.....	413
Modifying Ship's update() Method.....	413
Adding Ship's die() Method.....	413
The main() Function.....	414
Summary.....	414

APPENDIX A Livewires REFERENCE..... 415

- The livewires Package..... 416
- games Classes..... 416
 - The Screen Class..... 416
 - The Sprite Class..... 418
 - The Text Class..... 420
 - The Message Class..... 421
 - The Animation Class..... 421
 - The Mouse Class..... 422
 - The Keyboard Class..... 423
 - The Music class..... 423
- games Functions..... 424
- games Constants..... 425
- color Module Constants..... 427

INDEX..... 429
