Contents

Dedication	v
Preface	ix
Introduction	xiii
1. The Classical Preisach Model of Hysteresis	1
1.1 Definition of the Classical Preisach Model	1
1.2 Geometric Interpretation and Main Properties of the Preisach Model	8
1.3 Identification Problem for the Preisach Model. Representation Theorem	20
1.4 Numerical Implementation of the Preisach Model	37
1.5 The Preisach Model and Hysteretic Energy Losses	49
2. Generalized Scalar Preisach Models of Hysteresis	65
2.1 "Moving" Preisach Model of Hysteresis	65
2.2 Preisach Model of Hysteresis with Input-dependent Measure	73
2.3 "Restricted" Preisach Models of Hysteresis	93
2.4 Dynamic Preisach Models of Hysteresis	108
2.5 Preisach Model of Hysteresis with Accommodation	117
2.6 Magnetostrictive Hysteresis and Preisach Models with Two Inputs	124
2.7 Experimental Testing of Preisach-Type Models of Hysteresis	132
3. Vector Preisach Models of Hysteresis	149
3.1 Classical Stoner–Wohlfarth Model of Vector Hysteresis	149
3.2 Definition of Vector Preisach Models of Hysteresis and Their Numerical Implementation	158
3.3 Some Basic Properties of Vector Preisach Hysteresis Models	167
3.4 Identification Problem For Isotropic Vector Preisach Models	183
3.5 Identification Problem for Anisotropic Vector Preisach Models	190
3.6 Dynamic Vector Preisach Models of Hysteresis	201
	vii

3.7	Generalized Vector Preisach Models of Hysteresis. Experimental Testing	207
4.	Stochastic Aspects of Hysteresis	225
4.1	Preisach Model with Stochastic Input as a Model for Viscosity	225
4.2	Experimental Testing. Scaling and Data Collapse in Magnetic Viscosity	236
4.3	Preisach Model Driven by Continuous-Time Noise. Origin of the Universality of Long-Time Thermal Relaxations	245
4.4	Noise in Hysteretic Systems and Stochastic Processes on Graphs	256
4.5	Analysis of Spectral Noise Density of Hysteretic Systems Driven By Stochastic Processes	267
4.6	Modeling of Temperature Dependent Hysteresis Within the Framework of Randomly Perturbed Fast Dynamical Systems	272
4.7	Functional (Path) Integration Models of Hysteresis	281
5.	Superconducting Hysteresis	299
5.1	Superconductors With Sharp Resistive Transitions	299
5.2	Experimental Testing of the Preisach Modeling of Superconducting Hysteresis	313
5.3	Nonlinear Diffusion in Superconductors with Gradual Resistive Transitions (Linear Polarization)	331
5.4	Nonlinear Diffusion in Isotropic Superconductors with Gradual Resistive Transitions (Circular Polarization)	348
5.5	Nonlinear Diffusion in the Case of Elliptical Polarizations and Anisotropic Media	359
6.	Eddy Current Hysteresis. Core Losses	377
6.1	Eddy Current Analysis in the Case of Abrupt (Sharp) Magnetic Transitions	377
6.2	Eddy Current Hysteresis and the Preisach Model	397
6.3	Eddy Current Losses in Magnetic Conductors with Abrupt Magnetic Transitions. Excess Hysteresis Losses	411
6.4	Eddy Current Analysis in the Case of Gradual Magnetic Transitions	424
6.5	Eddy Current Analysis in the Case of Circularly Polarized Electromagnetic Fields. Rotational Eddy Current Losses	443
	Subject Index	469
