

*Charles C. Coleman*

# **Modern Physics for Semiconductor Science**

WILEY-VCH Verlag GmbH & Co. KGaA

## Contents

Preface *ix*

- 1 Relativity 1**
  - 1.1 Introduction 1
  - 1.2 Newtonian Relativity 2
  - 1.3 The Lorentz–Fitzgerald Transformation 10
  - 1.4 Einstein Relativity 20
  - 1.5 Problems 29
  
- 2 Classical Applied Statistics 35**
  - 2.1 Introduction 35
  - 2.2 Distribution Functions 36
  - 2.3 Mean Free Path 46
  - 2.4 Gaussian Distribution 52
  - 2.5 Maxwell–Boltzmann Distribution 57
  - 2.6 Density-of-States Functions 66
  - 2.7 Failures of Maxwell–Boltzmann Statistics 72
  - 2.8 Problems 78
  
- 3 Quantum Mechanics 83**
  - 3.1 Introduction 83
  - 3.2 Blackbody Radiation 84
  - 3.3 Bose–Einstein Statistics 88
  - 3.4 Molar Specific Heat of Solids 92
  - 3.5 Photoelectric Effect 96
  - 3.6 Bohr Model of the Hydrogen Atom 101
  - 3.7 Lasers 113
  - 3.8 Problems 124
  
- 4 Wave Mechanics 129**
  - 4.1 Introduction 129
  - 4.2 de Broglie Waves 130
  - 4.3 Wave Properties 134

4.4	One-dimensional Schrödinger Equation	143
4.5	Constant-potential Problems	152
4.6	Problems	164
<b>5</b>	<b>Condensed Matter</b>	<b>167</b>
5.1	Introduction	167
5.2	Waves in Lattices	167
5.3	Phonon Properties	174
5.4	Pauli Exclusion and Fermi–Dirac Statistics	181
5.5	Free-electron Theory	188
5.6	Superconductivity	203
5.7	Band Theory	214
5.8	Problems	222
<b>6</b>	<b>Semiconductors</b>	<b>225</b>
6.1	Introduction	225
6.2	Charge-carrier Properties	226
6.3	Intrinsic Semiconductors	238
6.4	Extrinsic Semiconductors	249
6.5	Problems	257
<b>7</b>	<b>Semiconductor Junctions</b>	<b>261</b>
7.1	Introduction	261
7.2	Metal–Metal Junctions	262
7.3	Internal Junction Currents	267
7.4	Metal–Semiconductor Contacts (Schottky Junction)	275
7.5	MIS Junctions	291
7.6	Semiconductor–Semiconductor or p-n Junctions	294
7.7	Two Applications	306
7.8	Problems	312
	<b>Answers to Selected Problems</b>	<b>313</b>
	<b>Index</b>	<b>317</b>
