

## Intro

- There were 89,500 new cancer diagnoses in adolescents and young adults (AYA) in 2020
- The SKCC does not have a formal AYA oncology program
- Many programs are designed without patient input

## Methods

- One-time survey of AYA patients who have received cancer care within the SKCC catchment area
- One-time survey of oncology physicians and advanced care providers at the SKCC

## Primary Objectives

- To assess the current perspective of AYA patients regarding medical services and psychosocial support delivered to AYAs in Philadelphia
- To assess the current knowledge and perspective of healthcare providers at the SKCC about the care and services needed by AYA patients

## With You, For You

We have developed a unique needs assessment survey for patients and providers. The results will be used to inform the development of a patient-centered AYA cancer program at the SKCC

Patient Survey

Provider Survey
