

# Table of Contents

Introduction .....	1
<b>PART I SOLID STATE PHYSICS, ELECTRONICS AND OPTICS .....</b>	<b>3</b>
<b>Section 1. Materials and Fabrication .....</b>	<b>5</b>
<b>Chapter 1. Submicron Structures Technology and Research .....</b>	<b>7</b>
1.1 Submicron Structures Laboratory .....	7
1.2 Microfabrication at Linewidths of 100nm and Below .....	7
1.3 Improved Mask Technology For X-Ray Lithography .....	9
1.4 Optical Projection Lithography Using Lenses of High Numerical Aperture .....	10
1.5 Studies of Electronic Conduction In One-Dimensional Semiconductor Devices .....	10
1.6 Surface Superlattice Formation In Silicon Inversion Layers Using 0.2 $\mu$ m-Period Grating-Gate Field-Effect Transistors .....	12
1.7 Study of Surface Superlattice Formation in GaAs/GaAlAs Modulation Doped Field-Effect Transistors .....	13
1.8 One-Dimensional Subbands and Mobility Modulation in GaAs/AlGaAs Quantum Wires .....	14
1.9 Study Of Electron Transport In Si MOSFETs With Deep-Submicron Channel Lengths .....	16
1.10 Crystalline Films On Amorphous Substrates .....	17
1.11 Epitaxy via Surface-Energy-Driven Grain Growth .....	18
1.12 Submicrometer-Period Gold Transmission Gratings for X-Ray Spectroscopy and Atom-Beam Interferometry .....	18
1.13 High-Dispersion, High-Efficiency Transmission Gratings for Astrophysical X-Ray Spectroscopy .....	19
1.14 Soft X-Ray Interferometer Gratings .....	19
<b>Chapter 2. Microstructural Evolution in Thin Films of Electronic Materials .....</b>	<b>23</b>
2.1 Grain Growth in Thin Films .....	23
2.2 Modelling of Microstructural Evolution in Thin Films .....	24
2.3 Post-Nucleation Heteroepitaxy in Lattice Mismatched Systems .....	24
2.4 Thin Film Zone Melting Recrystallization of Silicon .....	24
2.5 Capillary Instabilities in Thin Solid Films .....	25
2.6 Kinetics of Thin Film Silicide Formation .....	25
2.7 Reliability and Microstructures of Interconnects .....	25
2.8 Focused Ion Beam Induced Deposition .....	26
<b>Chapter 3. Focused Ion Beam Fabrication .....</b>	<b>29</b>
3.1 Focused Ion Beam Program .....	29
3.2 Development of Focused Ion Beam Lithography and Patterning .....	29
3.3 Frequency Tunable Gunn Diodes Fabricated by Focused Ion Beam Implantation .....	31
3.4 Field-Effect Transistors with Focused Ion Beam Implanted Channel Regions .....	31
3.5 Microstructure and Properties of Gold Films Produced by Ion Induced Deposition .....	31
3.6 Focused Ion Beam Induced Deposition of Submicrometer Structures .....	32
3.7 In-Situ Measurement of Gas Adsorption and Ion Induced Deposition .....	32
3.8 Planar Vias through Si <sub>3</sub> N <sub>4</sub> and SiO <sub>2</sub> Fabricated by Focused Ion Beam Implantation .....	33
<b>Chapter 4. Chemical Reaction Dynamics at Surfaces .....</b>	<b>35</b>
4.1 Chemical Reaction Dynamics on Semiconductor Surfaces .....	35
4.2 Collision Induced Dissociative Chemisorption: Chemistry with a Hammer .....	35
4.3 Collision Induced Desorption .....	37
<b>Chapter 5. Ultrashort Laser Pulse Interactions With Matter - New Effects and       Spectroscopic Applications .....</b>	<b>39</b>
5.1 Impulsive Stimulated Raman Scattering of Ultrashort Pulses .....	39
5.2 Exciton-Phonon Interactions in Organic Molecular Crystals .....	40
5.3 Phonon and Polariton Dynamics in Nonlinear Optical Crystals .....	41
5.4 Coherent Excitation Through Optical Absorption of Ultrashort Pulses .....	41

<b>Chapter 6. Chemical Beam Epitaxy of Compound Semiconductors</b>	<b>43</b>
6.1 Introduction	43
6.2 Controlled Substitutional Doping of ZnSe Grown by Chemical Beam Epitaxy	44
<b>Chapter 7. High-Frequency InAlAs/InGaAs Metal-Insulator-Doped Semiconductor Field-Effect Transistors (MIDFET's) for Telecommunications</b>	<b>47</b>
<b>Chapter 8. The Consequences of Low-Dimensionality in Oxide Superconductors</b>	<b>51</b>
<b>Chapter 9. Heterostructures for Optical Devices</b>	<b>53</b>
9.1 Integration of GaAlAs and InGaAlAs Multiple Quantum Well Heterostructures in Guided Wave Optical Circuits	53
9.2 Molecular Beam Epitaxy (MBE) Growth of Graded Composition InGaAlAs Heterostructures on InP Substrates	54
9.3 Molecular Beam Epitaxy of Pseudomorphic InGaAlAs Quantum Wells on (111) Oriented GaAs and InP Substrates for Optical Modulators	55
9.4 Characterization of Strained Layer InGaAlAs Heterostructures on (111) Oriented GaAs Substrates	55
9.5 Molecular Beam Epitaxy (MBE) Growth on Textured Substrates: Three-Dimensional MBE	56
9.6 Molecular Beam Epitaxial Growth on (n 11) Vicinal Surfaces	56
9.7 Kinetic Beam Processing of III-V Heterostructures	57
9.8 Diffraction Coupled Heterostructure Diode Laser Arrays	58
<b>Section 2. Optics and Devices</b>	<b>59</b>
<b>Chapter 1. Optics and Quantum Electronics</b>	<b>61</b>
1.1 The Nonlinear Waveguide Interferometer	61
1.2 Picosecond Optical Signal Sampling	62
1.3 Solitons	63
1.4 Squeezing of Pulses	64
1.5 Multiple Quantum Well Semiconductor Waveguide Optical Devices	64
1.6 Additive Pulse Mode Locking	65
1.7 Femtosecond Pulse Propagation and Amplification in GaAs Laser Diodes	66
1.8 Ultrafast Dynamics in InGaAsP Devices	66
1.9 Femtosecond Laser Systems	67
1.10 Femtosecond Studies in GaAs	71
1.11 Femtosecond Electron Dynamics in Metals	73
1.12 Laser Medicine	74
1.13 A New Conjugate Gradient-Type Algorithm for Rate Equations	76
1.14 Large Nd:Glass Laser System and X-Ray Laser	78
1.15 Whisper Gallery Mirrors	79
1.16 X-Ray Detection Using Quantum Well Exciton Nonlinearity	80
1.17 Study and Development of a Variational Method for Relativistic Atomic Structure Calculations	81
1.18 Large Coherency and Cold Fusion	81
<b>Chapter 2. Infrared Nonlinear Optics</b>	<b>85</b>
2.1 Magnetoresistance of HgMnTe	85
2.2 Mode Mixing in Narrow Gap Semiconductors	85
2.3 Plasma Instabilities in Quasi-Two-Dimensional Electron Gases	86
2.4 Nonlinear Optics of Zero Gap Semiconductors	87
2.5 Optical Nonlinearity Due to Resonant Impurity Scattering in HgCdSe:Fe	87
2.6 Four-Wave Mixing in Heavily Doped n-GaAs Epilayers	88
<b>Section 3. Surfaces and Intersurfaces</b>	<b>89</b>
<b>Chapter 1. Statistical Mechanics of Surface Systems and Quantum-Correlated Systems</b>	<b>91</b>
1.1 Finite-Temperature Properties of Correlated Systems	91
1.2 Random-Field Mechanism in Random-Bond Multicritical Systems	91
1.3 Exact Pair Correlations in a One-Dimensional Fluid of Hard Cores with Orientational and Translational Degrees of Freedom	92

<b>Chapter 2. X-Ray Diffuse Scattering</b> .....	<b>93</b>
2.1 Metal Surface Studies .....	93
2.2 Rare Gases on Graphite .....	94
<b>Chapter 3. Semiconductor Surface Studies</b> .....	<b>97</b>
3.1 Ground State Geometries of Surfaces .....	97
3.2 Hydrogenation .....	100
<b>Chapter 4. Ultralow Temperature Studies of Nanometer Size Semiconductor Devices</b> .....	<b>105</b>
<b>Chapter 5. Coulomb Repulsion and Resonant Tunnelling</b> .....	<b>109</b>
<b>Chapter 6. Graphoepitaxy of Colloidal Crystals</b> .....	<b>111</b>
6.1 Structure of Langmuir-Blodgett Films .....	111
6.2 Growth of Colloidal Crystals .....	111
<b>Chapter 7. Step Structures on Semiconductor Surfaces: Thermodynamics, Kinetics and Influence on Heteroepitaxy</b> .....	<b>113</b>
 <b>PART II APPLIED PHYSICS</b> .....	 <b>115</b>
 <b>Section 1. Atomic, Molecular and Optical Physics</b> .....	 <b>117</b>
<b>Chapter 1. Quantum Optics and Photonics</b> .....	<b>119</b>
1.1 Laser Raman Clock Studies .....	119
1.2 Fiberoptic Gyroscope Studies .....	123
1.3 Laser Linewidth Narrowing .....	123
<b>Chapter 2. Basic Atomic Physics</b> .....	<b>125</b>
2.1 Rydberg Atoms in a Magnetic Field .....	125
2.2 Microwave Quantum Optics .....	129
2.3 Millimeter-Wave Measurement of the Rydberg Constant .....	131
2.4 Precision Mass Spectroscopy of Ions .....	134
2.5 Atom Interferometry .....	136
2.6 Traps for Neutral Atoms .....	138
2.7 Forces on Atoms from Light .....	140
<b>Chapter 3. Molecular Physics</b> .....	<b>143</b>
3.1 Electric Neutrality of Molecules: Acoustic-Electric Neutrality Experiment .....	143
<b>Chapter 4. Small Angle X-Ray and Neutron Scattering – Its Application to Supramolecular Solutions</b> .....	<b>145</b>
4.1 Solvent Effects on Phase Separation in Micellar Solutions .....	145
4.2 Protein - Surfactant Interactions and Protein Denaturation .....	147
4.3 Ion Distribution and Solubilization in Reverse Micelles .....	148
4.4 Ion Distribution around DNA Molecules .....	148
4.5 Photon Correlation Spectroscopy and Its Application: Critical Phenomena in a Microemulsion .....	149
 <b>Section 2. Plasma Physics</b> .....	 <b>153</b>
<b>Chapter 1. Plasma Dynamics</b> .....	<b>155</b>
1.1 Relativistic Electron Beams .....	155
1.2 Plasma Wave Interactions – RF Heating and Current Generation .....	158
1.3 Physics of Thermonuclear Plasmas .....	167
1.4 Tokamak Experiments in the High Poloidal Beta Regime on Versator II .....	173
 <b>Section 3. Electromagnetics</b> .....	 <b>179</b>
<b>Chapter 1. Electromagnetic Wave Theory and Applications</b> .....	<b>181</b>
1.1 Electromagnetic Waves in Multilayer Media .....	181
1.2 Remote Sensing of Earth Terrain .....	187
1.3 Remote Sensing of Sea Ice .....	193
1.4 SAR Image Interpretation and Simulation .....	195
1.5 Microwave and Millimeter Wave Integrated Circuits .....	200
1.6 High-Speed Integrated Circuit Interconnects .....	203

<b>Section 4. Radio Astronomy</b> .....	<b>207</b>
<b>Chapter 1. Radio Astronomy</b> .....	<b>209</b>
1.1 Galactic and Extragalactic Research .....	209
1.2 Orbiting VLBI .....	210
1.3 High-Resolution Passive Microwave Imaging of Atmospheric Structure .....	211
1.4 Tiros-N Satellite Microwave Sounder .....	212
1.5 Long-Baseline Astrometric Interferometer .....	212
1.6 Video Image Processing .....	213
1.7 Nonthermal Radio Emission from the Jovian Planets .....	214
<b>PART III SYSTEMS AND SIGNALS</b> .....	<b>217</b>
<b>Section 1. Digital Signal Processing</b> .....	<b>219</b>
<b>Chapter 1. Digital Signal Processing</b> .....	<b>221</b>
1.1 Introduction .....	221
1.2 Receiver-Compatible Adaptive Modulation for Television .....	223
1.3 Reconstruction Of Nonlinearly Distorted Images From Zero Crossings .....	224
1.4 Development of a 2.4 Kbps Speech Vocoder .....	224
1.5 Correction of Geometric Distortions in Side-Scan Sonographs Caused by Sonar Motion Instabilities .....	225
1.6 Representation and Manipulation of Signal Processing Knowledge and Expressions .....	226
1.7 Iterative Algorithms for Parameter Estimation from Incomplete Data and Their Applications to Signal Processing .....	227
1.8 Assisting Design Given Multiple Performance Criteria .....	227
1.9 A Dual Excitation Speech Model .....	228
1.10 Motion Estimation from Image Sequences .....	228
1.11 MultiLevel Signal Matching for Vector Quantization .....	229
1.12 Application of Nonparametric Statistics in Narrowband Signal Detection .....	230
1.13 Image Texture Modelling .....	231
1.14 Structure Driven Scheduling of DSP and Linear Algebra Problems .....	231
1.15 The Application of Function Approximation Using Generalized Polynomials to the Development of Optimum Windows .....	232
1.16 Iterative Algorithms for Parameter Estimation from Incomplete Data and Their Applications to Signal Processing .....	233
1.17 Equalization (Identification) of Non-Minimum Phase Systems .....	233
1.18 Fractals and Chaos for Digital Signal Processing .....	234
<b>Chapter 2. Cognitive Information Processing</b> .....	<b>235</b>
2.1 Advanced Television Research Program .....	235
2.2 Computer-Aided Fabrication System Structure .....	236
<b>Chapter 3. Optical Propagation and Communication</b> .....	<b>239</b>
3.1 Squeezed States of Light .....	239
3.2 Laser Radar System Theory .....	241
3.3 Fiber-Coupled External-Cavity Semiconductor High Power Laser .....	244
3.4 Analog Processing of Optical Wavefronts Using Integrated Guided-Wave Optics .....	245
<b>Chapter 4. Custom Integrated Circuits</b> .....	<b>247</b>
4.1 Custom Integrated Circuits .....	247
4.2 Cellular Array for Image Processing .....	251
4.3 Algorithmic Fault Tolerance in Digital Signal Processing .....	252
4.4 Compiling Signal Processing Algorithms into Architectures .....	253
4.5 Iterative Algorithms for Stochastic Estimation .....	254
4.6 The Vision Chip Project .....	255
4.7 Techniques for Logic Synthesis, Testing and Design-for-Testability .....	258
4.8 Mixed Circuit/Device Simulation .....	262
4.9 Circuit Simulation Algorithms for Specialized Applications .....	262
4.10 Numerical Simulation of Short Channel MOS Devices .....	263
4.11 Efficient Capacitance Extraction Algorithms .....	264
4.12 Parallel Numerical Simulation Algorithms .....	264

<b>Chapter 5. Neurophysiology and Neural Computation</b> .....	<b>267</b>
5.1 Electrical Transients in the Frog Optic Tectum .....	267
5.2 Pulse Interval Coding in Regenerative Transmission Media .....	268
5.3 Interactive Front End for Pulsed Neural Network Simulators .....	270
<b>PART IV LANGUAGE, SPEECH AND HEARING</b> .....	<b>271</b>
<b>Section 1. Speech Communication</b> .....	<b>273</b>
<b>Chapter 1. Speech Communication</b> .....	<b>275</b>
1.1 Processes and Representations Involved in Speech Planning .....	276
1.2 Speech Physiology .....	277
1.3 Speech Recognition .....	278
1.4 Studies of the Acoustics, Production, and Perception of Speech Sounds .....	280
1.5 Computer Facilities .....	282
<b>Section 2. Sensory Communication</b> .....	<b>283</b>
<b>Chapter 1. Auditory Psychophysics and Aids for the Deaf</b> .....	<b>285</b>
1.1 Perceptual Anchors .....	285
1.2 Binaural Hearing .....	285
1.3 Hearing Aid Research .....	285
1.4 Tactile Communication of Speech I .....	285
1.5 Tactile Communication of Speech II .....	286
1.6 Multimicrophone Hearing Aids .....	286
1.7 Cochlear Prostheses .....	286
1.8 Hand Function .....	286
<b>Section 3. Auditory Physiology</b> .....	<b>289</b>
<b>Chapter 1. Signal Transmission in the Auditory System</b> .....	<b>291</b>
1.1 Basic and Clinical Studies of the Auditory System .....	291
1.2 Signal Transmission in the External- and Middle-Ear .....	291
1.3 Cochlear Mechanisms .....	292
1.4 Membrane Properties of Auditory Neurons .....	293
1.5 Stimulus Coding in the Auditory Nerve .....	293
1.6 Middle-Ear Muscle Reflex .....	294
1.7 Cochlear Efferent System .....	296
1.8 Sources of the Brainstem Auditory Evoked Potential .....	296
1.9 Cochlear Implants .....	297
<b>Section 4. Linguistics</b> .....	<b>301</b>
<b>Chapter 1. Linguistics</b> .....	<b>303</b>
1.1 Introduction .....	303
1.2 Abstracts of Dissertations .....	303
<b>Appendices</b> .....	<b>313</b>
<b>Appendix A. RLE Publications and Papers Presented</b> .....	<b>315</b>
A.1 Meeting Papers Presented .....	315
A.2 Published Journal Articles .....	323
A.3 Journal Articles Accepted for Publication .....	332
A.4 Journal Articles Submitted for Publication .....	335
A.5 Books/Chapters in Books .....	337
A.6 Reports Published .....	339
A.7 Theses .....	339
<b>Appendix B. Current RLE Personnel</b> .....	<b>345</b>
<b>Appendix C. Research Support Index</b> .....	<b>351</b>

**Project Staff and Subject Index** ..... **353**
