There were errors in Table 2 in the paper by Richards *et al.* (2008) for which the authors apologize. The data for the three secondary outcome measures at post-treatment were incorrectly reported using the same figures as those reported for the baseline measures in Table 1. The primary outcomes were reported correctly.

The correct version of Table 2 is given below.

**Table 2.** Follow-up scores, coefficients of difference between intervention and patient-randomized control group with cluster controls, 95% CI and *p* values of the difference
